Tammy Nicholas Dearie has accomplished much and has held a number of positions during her long tenure at UC San Diego Library. On June 30, she will step down from her position as Associate Librarian for Library Services and also from the position of Interim Librarian at UC San Diego. A veteran of the UC system, she has spent the past 20 years at UC San Diego Library, where she has served as the Director of Library Services, Associate University Librarian, and the chair of the Library Management Committee. She has been an active member of the UC system, serving on numerous committees and working groups, and has served on the Board of Directors of the California Library Association.

Dearie has a wealth of experience in library budgets, departments, and staff, as well as major projects, processes, and initiatives. In 2000, after serving on the panel of the former Chancellor's Task Force on Federal Libraries, she was appointed as the Director of the Library. Since then, her leadership has been instrumental in shaping the future of the Library, ensuring that it remains at the forefront of library developments.

Dearie is known for her commitment to continuous learning and innovation, and as a result, has gained knowledge and expertise in virtually all areas of library administration. She has also published and presented numerous papers in a wide range of library venues, on topics ranging from the future of academic research and the role of libraries in society to the importance of collections development and the role of libraries in promoting access to information.

Dearie is also known for her leadership in the UC system, serving on numerous committees and working groups, and has been an active member of the UC system, serving on numerous committees and working groups. She has been a key figure in the development of the UC system, and has played a critical role in shaping the future of the UC system.

The UC San Diego Library’s information specialists have joined a growing national movement, focused on data scholars and librarians, to preserve and provide access to research data. While the University’s Research Data Coalition (RDC) Program has focused on the long-term preservation of research data—collaborating with faculty, researchers and others—those recent efforts have focused primarily on digital data. However, most of the last ten years, so much progress achieved in digital data preservation is to maintain access to research data. Individuals and institutions together to provide access to valuable of research data. To create new services and data for UC San Diego, enabling researchers to more easily upload their data to the library for access and preservation. These data services, including the library’s new Quick Data Deposit service, are based on a service developed by the University's data preservation and customer services team. It will help researchers and librarians achieve the goals of the RDC Program and the Library’s broader mission.

The Library’s Data Services Team and its partners, including faculty and librarians, have been working to make sure the library’s resources are available for access and preservation. They have developed a service called “Quick Data Deposit,” which allows researchers to quickly and easily upload their research data to the library. The library will provide a web form for researchers to upload their data and a team of librarians will review and approve the data for preservation. The library will also provide access to the data through a searchable database, allowing researchers to easily find and access the data they need. The library is also exploring additional ways to make sure the data is accessible and usable for future research. They are working with other libraries and researchers to develop best practices for data preservation and to ensure that the data is accessible for as long as possible. The library is committed to providing access to research data and collaborating with other libraries and researchers to ensure that the data is available for future use.
When requests are made, library staff will retrieve these items for pick-up on the newly installed Self-Service Shelves near the Library Front Desks. The paging service saves users the time and effort of searching for materials in the stacks, and traversing across the area to find needed items.

The LC San Diego Library’s information specialists have joined a growing national movement, focused on digital scholarly communications. While the Library’s Researchers Data Coalition (RDC) Project has focused on the large-scale preservation of research data—collaboration with faculty researchers and others—those recent efforts have expanded to focus on digital scholarly communication in the last ten months, as policy changes advanced the creation of resources and services to maintain access to research data. These efforts are important in supporting the research

"For this Spring Year, the UC San Diego Virtual Archaeology Lab is continuing to work with the Virtual Reality (VR) Lab at UC San Diego to explore virtual archaeology. When you planned the way that virtual technology and real world engage with the past and present, this represents the ultimate challenge: Does IIHR plan to continue the finding of new digital resources and services..."

Download the Campus VPN for Unlimited Access of Library Materials
The Virtual Private Network (VPN) service is a win-win for Spring Month. First, when library patrons at the UC San Diego Library access the internet via the館, a personal, reliable, dedicated, and electronic connection is created. Second, if patrons are advised that they are within the UC San Diego Campus firewall (which means they are not connected to the public Internet), they are able to access the library's rich collections. These collections, which include audio, video, and text, are available 24/7. To begin, click on the link below to access the librarian's guide on how to use the UC San Diego Campus VPN.

The UC San Diego Library's researchers are excited to join this growing national movement, bringing research data that are currently locked away into the “Library Data Preservation and Services Team.” This team is focused on providing researchers with a seamless way to access, manage, and share their data. They are currently working on a project called the "Data Management Hub," which aims to provide researchers with a centralized repository for their data. The team is also working on developing new tools to make data management easier for researchers. They are also collaborating with other libraries across the country to improve the services and tools that they offer. This information is provided for informational purposes only and should not be used as a substitute for professional advice.

With the "Data Management Hub," researchers can easily upload their data to the library for access and storage. The library is committed to providing researchers with a seamless and user-friendly experience. They are also working on developing new tools to make data management easier for researchers. They are also collaborating with other libraries across the country to improve the services and tools that they offer. This information is provided for informational purposes only and should not be used as a substitute for professional advice.
When requests are made, library staff will review them and make available pick-up on the newly installed Self-Service Hold Shelves near the Library front desks. The paging system allows staff to time the effort of searching materials in the stacks and transfers across the area to notified librarians, information specialists, and scholars, who delivered it to their desk, and then to one of the two hold shelves for pickup. This work is continuing at many rateable locations, with help from peers to assist one another to provide access to a broad range of traditional government sources.

"Closing new data services for UC San Diego, enabling researchers to more easily upload their data to the library for access and discovery.

"The UC San Diego Library’s Information and engagement specialists have joined a growing national movement,-focused on data scholars and information professionals. While the Library’s Researchers Data Committee (RDC) Program has focused on the larger framework of research data — collaboration with faculty researchers and others — those recent efforts have guided successful adoption and resulted in two months of study, as last month’s cost analysis showed that the direction is leading to a more sustainable and innovative approach to managing and creating important scientific information.

"UC San Diego Special Collections staff — other library information professionals — have been working closely with colleagues at the Scripps Institution of Oceanography in the development of a new course focused on education and outreach, including the "Virtual "Scripps" event at UCSD. This event will be a seed of collaboration among libraries, information specialists, and scholars, while delivered in their own library, and we will see the benefits of our collaboration.

"Dearie, we are pleased to have the opportunity to share our experiences in the development of a library data preservation and customer support, and we look forward to furthering our efforts to deliver important environmental data.

"To UC San Diego Special Collections and others — these are the community's voices from our team.

"With the pleasure of being part of this growing library community, we look forward to furthering our efforts to deliver important environmental data.

Tammy Nicholle Davis has accomplished much and has held a number of positions during her long tenure at UC San Diego Library. On June 30, she will step down from her position as Assistant Library Director for Enterprise Services, a position she has held for 17 years. Though she will not retire, Tammy will continue to work at the Library in a new role.

“While retirement can be challenging in some ways,” said Brian Schottlaender, Director of the UC San Diego Library, “I’ve seen the potential I’ve seen in Tammy, so I’m very, very lucky that this transition will allow us to have the almost inevitable respect for her leadership and management skills. She also knows this campus and understands its culture. She’s brought block management and a strong track record to collaborating with faculty and students. These excellent attributes will greatly benefit the Library and the campus community over the next several months.”

Davis has a wealth of experience in managing budgets, departments, staff, as well as major projects, processes, and initiatives. In 2003, after serving on the board of the Irvine Public Library Services Corporation for five years, Davis was appointed as its Executive Director. As a member of the Irvine Library Board of Directors, she was able to establish a strategic plan that helped the Library become one of the best-performing in the county.

“Tammy has a vision for excellence in managing budgets, departments, staff. She has been a leader in various projects, and initiatives. In 2008, after serving on the board of the Irvine Public Library Services Corporation for five years, Davis was appointed as its Executive Director. As a member of the Irvine Library Board of Directors, she was able to establish a strategic plan that helped the Library become one of the best-performing in the county.”

To the UC San Diego Library, Tammy has been a vital member of the Library leadership team. She has been a driving force in rethinking and transforming the Library’s services and spaces to better meet the needs of our students, faculty, and staff. Her leadership has been instrumental in creating a more welcoming and inclusive environment for all Library users. Her dedication to the Library and the campus community is truly inspiring.

The UCSD Library will continue to be a hub for the academic community and provide opportunities for students, faculty, and staff to connect and collaborate. We look forward to continuing our partnership with Tammy Nicholle Davis as she begins this new chapter in her career.

Week-Long Summer Training Program for Scholarly Communications Starts July 31

The FORSECI Scholarly Communications Institute (FSO) will host a week-long summer training program designed to help researchers, librarians, and other scholars navigate the ever-changing and increasingly complex scholarly communications landscape. The program, which is being hosted by the UC San Diego Library, will be held on the university’s campus from July 31 through August 4, 2017.

FSCSI is an intensive immersion course, offering an opportunity for participants to gain a deeper understanding of the scholarly communications landscape and the challenges faced by those working in this area. The program features a comprehensive curriculum that includes sessions on topics such as copyright, open access, scholarly publishing, and data management.

The program is open to anyone interested in learning more about the latest trends in Open Access and data management, and gaining expertise in new technologies. Participants will also have the opportunity to network with other professionals in the field.

Please visit the FSO website for more information and to register for the program.

Tammy Dearie
To Serve an Interim University Librarian
Starting July 2017

Tammy Nicholson Dearie has accumulated much and has held a number of positions during her long tenure at UC San Diego. Library Summer June 32, she will step down from her position as Interim Librarian for Interlibrary Services at San Diego. She will then begin the job as Interim Head of the UC San Diego Library on July 1, with the expectation that she will return to the role of Associate University Librarian. As such, she is looking forward to serving in this capacity and expanding her role as a leader within the Library.

Dearie has a wealth of experience in managing budgets, departments, and staff in a number of major projects, processes, and initiatives. She was named the Interim University Librarian for UC San Diego Library in 2015. Prior to that, she was appointed Director of the UC San Diego Library in 2010. During her tenure as Interim Librarian, she oversaw the successful completion of the strategic planning for the UC San Diego Library, including the development of the Library’s new strategic plan, the San Diego Library: A Vision for the Future. She has also served as a member of the University’s senior management team, where she contributed to the development of the University’s strategic plan and the implementation of initiatives to support the University’s mission.

Dearie has a longstanding commitment to diversity, equity, and inclusion. She is a member of the UC San Diego Diversity and Equity Task Force and has served on numerous committees and task forces focused on diversity and inclusion. She is also a member of the UC San Diego Library’s Diversity and Equity Council, where she has led initiatives to increase diversity and inclusion in the Library and across the University.

Dearie has a strong record of service in the academic community. She is a member of the Association of University Libraries and has served on numerous committees and task forces at the national level. She is also a member of the California Association of University Libraries, where she has served as the Chair of the Board of Directors. She has also served as the Chair of the Southern California Library Association, where she has worked to increase collaboration and partnership among libraries in the region. She is also a member of the Western Library Association, where she has served as the Chair of the Board of Directors.

Dearie has a strong track record of community engagement. She has served on numerous boards and committees at the local and regional level, including the San Diego Regional Library Association, where she has served as the Chair of the Board of Directors. She is also a member of the San Diego Chamber of Commerce, where she has served as the Chair of the Board of Directors.
