San Diego, Calif.

C. W. CO.

Dear Sir:

FILE

Not having been favored with a reply to our letter of the 5th inst., we write to inquire if we can be of service to you in furnishing further information on the subject of OXWELD apparatus.

The OXWELD PROCESS has so revolutionized engineering methods in many branches of the metal industry that it is now recognized as an essential part of the equipment of every modern plant.

Oxygen and acetylene are two inexpensive gases which can be readily obtained in all of the large manufacturing centers, and when combined and burned a very hot flame is produced which will quickly reduce metal to the molten state. This flame applied locally to a broken casting or to pieces of metal which it is desired to unite will readily melt the surrounding metal, causing it to flow together, thus producing a serviceable weld. OXWELD apparatus is especially designed and constructed to utilize these gases in the most efficient way to produce these results.

Hoping to have the pleasure of hearing from you at an early date and assuring you that any inquiries you may care to make will receive our prompt and careful attention, we remain

Very truly yours,

*H. P. Harding*

Dear Sir:

At your request we sent you catalogues of equipment for Oxy-acetylene welding and cutting. We have written you under dates of May 5th and 28th, but have not received reply. We should like to know if you are interested in OXWELD apparatus at this time and if you have received the bulletins mailed you.

We will have a representative who is to be permanently located in San Francisco within the next few weeks who will take this matter up with you upon his arrival.

Hoping to hear from you in the meantime and assuring you that any inquiries you may care to make will receive our most prompt and careful consideration, we remain

Very truly yours,

OXWELD ACETYLENE COMPANY.

Dear Sir: - -

Not having received replies to our several letters, we write to inquire if you are interested at this time in the purchase of an oxy-acetylene welding and cutting equipment.

If we can serve you with further information or data relative to our apparatus, we shall be pleased to hear from you.

Thanking you for the courtesy of a prompt reply, we are

Very truly yours,

OXWELD ACETYLENE COMPANY.

San Diego, Cal.

Dear Sir:

Under date of April 24th you addressed a letter to the Oxweld Acetylene Appliance Company of Pittsburgh, which was referred to and answered by our Chicago office under date of May 5th. This correspondence has been referred to me and thinking there might be further information you desire we are again taking the matter up with you. You have no doubt received our various catalogues and it is possible that a less expensive appliance could be used to advantage in your work.

If you are still interested and have not provided yourself with something of this kind we would be glad to hear from you and answer any inquiries which may be of interest to you, and, as stated in our letter of May 5th, the services of our organization, both technical and mechanical engineers are at your disposal.

Hoping you will advise us as to the present situation, we remain

Yours very truly,

OXWELD ACETYLENE COMPANY
