**Diplo to Headline Festival**

*A.S. Concerts and Events released the Sun God Festival 2014 lineup Friday, April 18. The lineup includes Diplo, who many suspected would perform after he dated "UC San Diego" for May 16 on his tour calendar. Also included on the lineup is Irvine rock band Young the Giant, rapper Juicy J and New Politics, the artist behind last summer’s "Harlem."*

In Fall Quarter 2013, ASCE conducted a student survey to determine this year’s lineup. “For us, the survey results were a strong compass in terms of the acts we chose to pursue and stand firm on,” ASCE Festivals Director Andrea Hsueh said. “We made a very wide no-guest policy and a no-host policy during last year’s festival, including a campuswide no-guest policy and a no-host policy in International House and The Village. The no-guest policy stipulates that no non-students will be allowed to stay in residential areas, while the no-host policy stipulates that only residents who live in those areas may be there.

The rest of the lineup includes Joey Badass, Audien, Ty Dolla $ign, Torro Torro, Giraffage, Miner, 2TONE DISCO and Jhameel. DJ Demon will be the Sun God Stage House DJ, Joey Avery will be the Comedy/Midway Host and James Kellogg Jr. will be the Comedy Hypnotist.

This year’s Sun God Festival requires students to reserve wristbands online in advance so they can easily be identified during the festival, meaning students are also required to carry their ID cards with them at all times.

There will be extra safety precautions due to the number of hospitalizations that occurred during last year’s festival, including a campuswide no-guest policy and a no-host policy in International House and The Village. The no-host policy stipulates that no non-students will be allowed to stay in residential areas, while the no-host policy stipulates that only residents who live in those areas may be there.

INVESTIGATION

A.S. Council transferred $60,000 from its Mandated Reserves to the programming budget for student organizations on Wednesday, April 16. The decision was influenced by student organizations requiring money for separate cultural graduation ceremonies.

According to VP Finances and Resources Sean O’Neal, programming funds ran out due to money owed to college councils and KSDT earlier this year. Consequently, the A.S. budget was $140,000 less than expected. The budget for every A.S. office was reduced, including about $30,000 from the student organization programming budget, though A.S. Concerts and Events was spared. “This year, we were trying to rebuild A.S. and make sure we were ful and moving. “

The vote passed 27–4–0, although according to Revelle Senator Soren Nelson, at the beginning of the council meeting, many more council members had intended on voting “no.” Multiple representatives from student organizations came into the meeting to ask A.S. Council to withdraw the funds. According to next year’s VP Finances and Resources Igor Geyn, these students’ personal testimonies were “incredibly powerful and moving.”

“I don’t feel what happened in A.S. over the past couple years should fall on student orgs,” Geyn said. “We need to have that rainy-day fund, but it’s also a public institution and people are paying in student fees. They’re only here for four years, so trying to make sure that people who are paying in student fees are getting... the way we metaphorically frame social problems implicitly influences the decisions we make to solve them.”

The UC San Diego Health System partnered with Language Access Network (LAN) to provide a new, live-video remote interpreting device to enhance communication and improve medical understanding.

The device, My Accessible Real-Time Trusted Interpreter, is a flat-screen computer tablet that connects via wireless Internet to LAN’s professionally trained medical interpreters. It uses a two-way video function and allows healthcare providers to have face-to-face communication with patients through the screen.

Healthcare providers are able to access Martti 24 hours a day through the tablet, allowing patients to see interpretation throughout the screen. The live interpreter will stay with the patient as long as necessary throughout the entire process to provide professional interpretation services.

Martti also complies with the Health Insurance Portability and Accountability Act of 1996, which ensures insurance coverage of medical expenses.

According to an AV Network news source, the medical interpreters are proficient in more than 210 languages, including American Sign Language for deaf or mute patients.

A press release from LAN states that Martti is being developed as a solution to the inherent problem of miscommunication in healthcare. As a physician-led company, LAN knows that the price of miscommunication in healthcare care can be extraordinary.”

According to an AV Network press release, “As a physician-led company, LAN knows that the price of miscommunication in healthcare care can be extraordinary”. Panos said, “From missed diagnosis and ineffective treatment to poor outcomes and patient dissatisfaction and confusion, the stakes can be very high. We believe language should never be a barrier to quality care.”

Currently, LAN is providing this service to over 350 medical facilities, including the UCSD Health System starting earlier this year.

A.S. Council looks for Alternative Revenue to Increase Budget

California Legislators May Offer 4-Year Degrees

BY ZEV HURWITZ
Senior Staff Writer

California legislators are set to take up a bill that would enable junior colleges across the state to offer a limited amount of four-year degrees in undergraduates. The legislation, Senate Bill 850, seeks to foster a larger number of college-educated adults by expanding the accessibility of a four-year degree.

The bill’s author and primary sponsor, state Sen. Marty Block (D-San Diego), has said that the addition of new baccalaureate degrees offered will help satisfy the state’s need for an additional 1 million bachelor’s degree-holders by 2025.

“We’re excited about taking a practical approach to improving job prospects in California,” Maria Lopez, a representative for Block, told the UCSD Guardian. “[SB850] is a practical approach to improving education needs within the framework of the California Master Plan.”

SB850 would, in its current form, only allow a maximum of one four-year degree program to be offered at a given community college campus. Each junior college also would only be able to offer a degree program that is not offered at a nearby University of California or California State University campus. Additionally, all community college baccalaureate programs would need to provide specialized skills for a particular career path, such as law enforcement management or respiratory therapy.

“Community colleges would need to demonstrate a workforce need in order to have the program approved,” Lopez said.

Lopez added that the variety of offerings for the majors could vary depending on the region and community college district.

Should SB850 be enacted, it would directly alter the text of the California Master Plan for Higher Education of 1960, which currently mandates that public junior colleges shall offer instruction through but not beyond the 14th grade level.

“California would become the 22nd state in the country to offer junior college four-year degrees, following Michigan, which became the last year. State legislators, including Block, have tried unsuccessfully four times since 2004 to allow junior colleges to offer baccalaureate degrees.”

Scott Lay, the president and chief executive of the Community College League of California, says his group is supportive of the bill in an “additive capacity.”

“This is great in concept, but it doesn’t answer all the questions,” Lay said in a phone interview with the Guardian. “We don’t yet know how fees for the programs would be administered and what tuition rates students would pay.”

SB850 has already received bipartisan support in the State Senate, including Republican and bill co-sponsor Joel Anderson, whose district includes parts of San Diego and Riverside. Lay says that he thinks the bill has a bright future in the legislature.

“There’s a significant interest in providing some authority to community colleges to offer four-year degrees, and Marty Block is the person to push this forward,” Lay said. “I expect it will end up on the governor’s desk.”

The bill’s first stop will be in the Senate Education Committee, in which discussion regarding the bill is expected to begin on April 23. If approved by both houses of the legislature and signed by Gov. Jerry Brown, four-year programs could begin being offered at junior colleges in the fall of 2015.
Money Over Mind

In the U.S., intellectual property is credited to universities rather than to researchers, an unjust policy that undermines individual success.

There is certainly money to be made from new technology in ways that donít deprive the discoverers of their own fair share. Cornell Tech, a school created by Cornell University and Israeli university Technion, primarily benefits from students’ work by retaining shares in the start-up companies founded by the students. This is a good departure from the typical system used by American institutions, which闺蜜ices keep the rights to researchers’ intellectual property and profit from royalties. In fact, allowing students to fully develop the company for themselves means that they become the wealthy aliens who may donate even more than what the royalties will make. Adam Schwarz of the Guardian described a situation in which one student goes to zero, but down the line, the successful alien gives back far more money.

Another issue with the royalty system is that it supports education and discovery not for academic pursuits, but for the institutions to benefit financially. Success and relevance are not measured completely by profit margins and industrial success. While commercialization yields technological improvements, such as the developments of higher capacity batteries and efficient transistors that led to the iPhone, industry lacks the vision of science as a pursuit of higher knowledge and a better understanding of the physical world. Ultimately, this can undermine the actual

Amusement Park Cannot Properly Accommodate Wild Animals’ Needs

Last year’s documentary “Blackfish” sparked such passions that some classify it as a psychological thriller. It contends with the issue of captive orcas, which are kept in captivity for their amusement value, which has caused four human deaths. Though SeaWorld criticizes the film for its heavy reliance on pathos, many facts remain unchanged, and there’s no need to pretend these animals are human to empathize with their suffering.

The fact still stands that captive orcas live significantly shorter lives than wild orcas do. Many animals live longer in captivity, but orcas, like many large, intelligent mammals, fare better in the wild. According to the “Encyclopedia of Marine Mammals,” while Pacific Northwest orcas live more than 40 years on average, captive orcas die in their 20s. Even with current technology, parks cannot provide the stimulation comparable to that in the wild. According to researchers, orcas need to see all of the orcas’ needs in such an enclosed space. Marine biologist Dr. Naomi Rose and Dr. Chris Parsons point out that mortality rates in captivity remain more than double of those in the wild and have not improved since the 1990s. For two decades, experts have learned little about how to effectively lower these captive mortality rates.

With our vast ignorance of these creatures, captivity halts their lives. Knowing the facts, we can choose whether or not to continue to capture and maintain them. In this instance, it is best to free them. The fact that SeaWorld has animal rights activists up in arms, but they continue to keep orcas in captivity with a supposed educational value, yet a captivity halves their lives. Knowing the facts, we need to learn to appreciate these animals, to think, feeling minds in their own right.

Just as a cognitive science major, I never thought that my class- mates or professors would ever use their knowledge about poverty as a weapon against it. However, this is often the case with the frequent metaphor of the war against poverty. This metaphor is used in many public programs “for” aiding the poor. For instance, the War on Drugs is one of these programs, which are often the most damaging to those in poverty.

There is an inherent contradiction in this metaphor. This is not a metaphor that can be used to make our world a better place. A war against poverty is a distraction of the real problem, which is the war on the poor.

The war on poverty is a war on the poor, wasting billions of dollars on the poor when we should be providing the poor with the tools to help themselves. The poor should be taught how to work, not how to help the poor. The poor should be educated, not given handouts.

The war on poverty is a war on the poor, wasting billions of dollars on the poor when we should be providing the poor with the tools to help themselves. The poor should be taught how to work, not how to help the poor. The poor should be educated, not given handouts.

In the United States, the poor are not given the tools to help themselves. The poor are given handouts and are not taught how to work. This is a war on the poor, not a war against poverty.

oritize their research discoveries. Ultimately, leaving these decisions up to the inventor will improve the progress of both technology and the economy.

LETTER TO THE EDITOR

UCSD Loses Campus Icon With Graffiti Hall Closure

Dear Editor,

I am writing regarding the recent vandalism and active enforcement of vandalism laws in the Humanities and Social Sciences Building and Mandeville stairwells. This is a sad development for UCSD and the students. The wall writings in HSS (and in years past in McGill, Mandeville, Applied Physics and Mathematics and Galbraith) as opposed to the tagging, which is of relatively recent vintage, have their earliest documented reference in a Triton Times article dated Oct. 29, 1971. A humorous response by "Joe Beets, Steward, United Graffiti Writers Local 116" followed in the Nov. 5 issue. The student graffiti was already so notable and interest-
ing that a class was offered on the graffiti the following year (Triton Times, April 14, 1972). Numerous articles followed over the years, with articles in 1977, 1981, 1982, 1985 and on.

Pocketing the money from those in the industry spend much of their time trying to solve. Although it hasn't yet been discovered, the solution is thought to lie in quantum computing, the physics theory that was all too often dismissed as impractical. While the most valuable research may appear to be distant from reality, its progressive thinking eventually yields the most revolu-
tional innovations.

Many student papers have been written — some of which I am in possession of. Some of these papers interview administration officials and police and document a tolerance and even affection for the wall writings and writers, completely at odds with the attitude displayed today. AP&M, the site of the oldest writ-
ing, was completed in 1969, making the wall-writing tradition nearly as old as it is. In fact, it is older than the Pumpkin Drop, which Muir College boasts of as its oldest tradition. It is far more genuine too and utterly unique to UCSD.

I was a writer during much of the 1980s. As a group, we have always sought each other out. Writers dating from the 1970s until today, a period spanning decades, are in contact. For more history on the "peeps" (as we came to call ourselves), check out the "UCSD Peeps" group on Facebook. It is sad to see this harmless activity, thought fondly of by so many and tolerated by the administration for so long, so vociferously quashed.

A BATTLE FOR AWARENESS

BY SYDNEY RECK & SOUMYA KURNOOL
FEATURES EDITOR & ASSOCIATE FEATURES EDITOR

Autism is an increasingly common disorder, identified in one out of every 68 children, according to the U.S. Centers for Disease Control and Prevention. Because April is National Autism Awareness Month, researchers and community members in the San Diego area are stepping up efforts to promote awareness about the condition, UCSD researchers at the Autism Center of Excellence, Dhush founder Jeffery Adler and Autism Society San Diego share what they are doing to promote awareness this April.

...In Business

Jeffery Adler, founder of the Dhush beverage lounge in UCSD’s Price Center, has become an important fundraiser for the autism cause on campus as a result of his personal resonance with the condition — two of his close friends have children who are autistic.

"It created an emotional account for us," Adler said. "Stepping back a bit, it became part of our shared vision to find ways to intersect commercial enterprise with community." As a result, Dhush has partnered this month with Autism Society San Diego as a 30 Days of Happy campaign to raise funds for camps for autistic children. Dhush created a new drink called the "Happy Camper" to commemorate the partnership.

"We wanted [a drink] that was colorful, fresh, optimistic and happy," Adler said.

The Happy Camper is a drink made of hand-squeezed lemons, fresh strawberries and strawberry jello. For each purchase of the $4.50 drink, Dhush donates a dollar to programs held by the Autism Society San Diego for autistic children. Customers are also invited to round up their change to contribute to the cause. Student organizations on campus are also holding happy hours at Dhush, with a portion of the proceeds going towards fundraising.

"The other time I was [at Dhush], there was a mother and a child chattering," Adler said. "They had bought that drink and the mother was explaining her story about a personal experience with autism. [...] I thought there was some hidden power in that. That gal might not have even known about autism or heard about it if it were not for the drink." Dhush hopes to raise $5,000 by the end of the month to fund Camp I CAN, which stands for Including Children with Autism Now, and Surf Camp, which is held at La Jolla Shores each summer. Fett explains that events such as these are meant to include children with autism who are often excluded from other camps and daycare services because they require more supervision.

...In Research

Autism research expert Richard Stoner, a Project Scientist in Neurosciences, is working together with neuroscience professor and director of the UCSD Autism Center of Excellence Eric Courchesne in order to identify early biomarkers of autism.

"The earlier we can detect it, the earlier we can start treatments that will improve the overall prognosis," Stoner said.

Having been involved with the Autism Center of Excellence since late 2009, Stoner used postmortem brain tissue in a study to compare patterns of gene expression in normal and autistic cortices. He took samples of three different regions of the brain and, upon examination, found distinct patches of abnormal expression in the majority of autism samples.

Even-advancing technology, Stoner says, has allowed him to approach research on the disorder in new and possibly significant ways.

"Most autism research to-date has relied on behavioral imaging or genetic analyses," Stoner said. "While these studies all point to a brain-based origin for the disorder, no clear pathology had been found. Thanks to recent advances in technology and key collaborations, we were able to look for signs of the disorder at the tissue level in a way that couldn't be done before." Stoner believes Autism Awareness Month is essential for raising awareness and in raising funds for further research that could have a significant impact on individuals and families affected by autism.

"I think it's an important topic to raise awareness for, and the fundraising helps support a lot of what we do," Stoner said. "As a researcher, autism awareness for us is year-round — talking with parents, working with students and communicating new findings to a broader community.

...For Families

A s the former President of Autism Society San Diego and as a mother of two children — aged 21 and 23 — who have moderate to severe autism, Shirley Fett feels that many people still do not understand autism as a condition.

"People need to understand autism is not about bad parenting and need to be understanding and supportive," Fett said. "People with autism are very loving and sweet little people. In the past, people thought autistic people did not have emotions or friends, which is not true. Autistic people just are not always able to express emotions in the same way other people might." Fett also acknowledges that a portion of public knowledge about autism comes from the movie "Rain Man," which is not at all typical of most cases of autism, though many autistic children have skills that aren’t immediately apparent. For one of her sons, that skill was speed-reading. Fett and her husband noted that he seemed to be reading actively at age two, even though he couldn’t talk.

"People with autism are very diverse," Fett said. "Autism is not the whole person; they are just impacted by it. Just as diabetes doesn’t define a person in their whole being, neither does autism. Every person with autism has their own sense of humor and things they like to do." Fett has had the unique experience of being a mother of two that contributed to her passion for providing services for families like hers.

"No matter how old or young your child is, you feel lonely in the journey because your kid isn’t like other kids," Fett said. "When you go to birthday parties or try to enroll your kids on campus, you feel very different and isolated. There is still a huge need for parents to have a group of other families and parents [in similar situations] that they feel they can turn to." According to Fett, the Autism Society San Diego has come a long way since she started going to support group meetings in 2000. Today, the Society has over 500 paying members. There are six support group meetings per month, along with meetings tailored for Spanish speakers and free, monthly pool parties for families to get together with the rest of the autism community. The Society also held its splash for Cash fundraiser pool party on Sunday, April 13, during which Dhush provided free drinks to families.

Autism Society San Diego hopes to focus more on aiding adults with autism with finding employment, as according to the U.S. Bureau of Labor Statistics, only 33 percent of young adults with autism in 2009 were employed. Fett also identifies swim lessons for autistic children as another priority for the Society, as autistic people are drawn to water because it makes them feel at peace but also presents a threat of drowning.

Though Fett has stepped down from her position as president, she remains active in the Society's executive board and continues to promote awareness and support for families with autistic children through her personal experiences. She notes that her experiences as a mother have changed her outlook on her and her sons’ lives.

"There’s times when you think, ‘I’m going to be the one whose kid will become normal’," Fett said. "For the majority of us, that’s not a reality. Most kids with autism still have challenges as they become older. But my kids have some of the happiest lives I know. I don’t have the same experiences as other parents. My kids will not go to college and get married, but that doesn’t mean that can’t be a great life. It’s definitely a different journey for sure."

For more information, readers can contact Sydney Beck and Soumya Kurnool at sbeek@ucsd.edu and skurnool@ucsd.edu.
THE RUNDOWN ON AUTISM

1 out of 68 children are identified with autism, according to the U.S. Centers for Disease Control.

Autism is 5x more prevalent among boys than among girls (CDC).

In 2009, only 33% of young adults with autism were employed (U.S. Bureau of Labor Statistics).

It is estimated to cost at least $17,000 more per year to care for a child with autism compared to a child without autism (CDC).

Autism Society San Diego was founded in 1966 by Bernard Rimland, founder of the Autism Society of America. The San Diego chapter was one of originals. It holds six support group meetings per month around the San Diego County.

UCSD's Wagner Festival is a platform for graduate students to put on plays they have written and a converging point for diverse sources of inspiration. This year's festival will feature five new plays taking place from April 16 to April 26, written by five UCSD graduate student playwrights as part of the UCSD Master of Fine Arts Graduate Playwriting program.

The Wagner Festival is held every April in the Mandell Weiss Forum Theatre, the Arthur Wagner Theatre and in the Theodore and Adele Shank Theatre, and is part of the MFA's three-year graduate playwriting program. Now a 12-year tradition, the Festival gains a new director and a new playwright each year. This year's Festival will have the most playwrights, showcasing five plays to the public.

Plays to be featured will be "The Mango Farmer of Vermont" by Emily Feldman, "Deluge, or The Panda Play" by Kristin Idaszak, "in the crowding darkness" by Jeff Augustin, "Battlecruiser Aristotle" by David Jacobi and "Campo Maldito" by Bennett Fisher.

Augustin's "in the crowding darkness" centers on an Afghanistan War veteran who returns home to the comfortable life that he and his partner led, only to uncover issues in their past and present that causes the couple to struggle.

"A friend of mine came back and, overall, his life didn't change course," Augustin said. "He went back to college, got his degree, has a wife and kids. I became fascinated with the adjustment back to civilian life!"

The struggles center on what we do when our personal dreams conflict with the dreams of our loved ones," Augustin said, "along with these ideas of what a gay couple is and what marriage is supposed to look like."

According to Augustin, his friend, who is a returned war veteran, inspired the play. "A friend of mine came back and, overall, his life didn't change course," Augustin said. "He went back to college, got his degree, has a wife and kids. I became fascinated with the adjustment back to civilian life!"

The focus of Jacob's "Battlecruiser Aristotle" is on the situations characters face and the decisions they must make while inside a spaceship.

"This piece started as a spoof of the popular TV show called 'Battlestar Galactica,'" Jacobi said. "The story focuses on a young girl on the ship who seems happy, but she can't seem to pin down what's bothering her. One day, an alien appears on the ship and makes some changes in [the girl's] life that ends up starting a rebellion and almost killing everyone on the ship."

Jacobi's inspiration for the play was a mix of his childhood and "Battlestar Galactica." "I'm attracted to genre and using pop art," Jacobi said. "I tend to stray from the classics and focus on the things I was raised on – comic books, TV, movies. This is an existential story on a girl who lacks agency, and I'm using sci-fi to tell it."

Jacobi compared participating in the Wagner Festival to a residency as opposed to just a setup program because of its element of community.

"It was an award just coming here because of the small amount of people that they take," Jacobi said.

Fisher's "Campo Maldito" focuses on a tech-startup business in San Francisco disrupted by the haunting of ghosts.

Fisher was inspired by the growth of the San Francisco Bay Area and how it has changed over the years.

"The play is about this changing world in San Francisco," Fisher said. "I am fascinated by the area with a lot of poverty and violence, yet [is] a really beautiful place with all these historic buildings and murals." Fisher believes being able to participating in the Wagner Festival is a wonderful opportunity because of the unique learning experience it provides its graduate students.

"It's great just to be in a rehearsal room thriving off of the energy of other MFA directors, designers and actors," Fisher said. "You learn more about your play in your rehearsal than when you're writing."

Ghosts, Mangoes and Battlestar Galactica
Playwrights of the Wagner Festival at UCSD share the inspirations behind their plays, performed from April 16 to 26 at the La Jolla Playhouse.
Track and Field Sets Records at Three Meets

**SPORTS**

**THE UCSD GUARDIAN | MONDAY, APRIL 21, 2014 | WWW.UCSDGUARDIAN.ORG**

**THE UCSD GUARDIAN | MONDAY, APRIL 21, 2014 | WWW.UCSDGUARDIAN.ORG**

The UCSD track and field team had yet another record-setting this Wednesday through Saturday at the California Invitational, the Mt. San Antonio College Relays and the Soka Peace Invitational. By the end of the trials of meets, the Tritons broke the men’s 200-meter school record and came within 0.13 seconds of breaking the men’s 1500-meter record.

**California Invitational, April 16 to April 17: Three members of the track and field squad competed in the California Invitational, two of whom reached provisional qualifying marks. Junior Veronica Bradley tied for 18th place in the heptathlon with a score of 4,618 points, over 200 points above the NCAA provisional mark. Bradley is now the fifth-highest scorer in UCSD’s program history.

Redshirt freshman decathlete Dan Golobovic scored 6,720 points in the B flight, 500 points above the provisional qualifier, and won his flight. He now holds the third-best mark in UCSD’s history. Junior Brian Gerckens and sophomore Tareq Alwafai, posted times in the men’s 5000-meter run at 14:27.19 and 14:31.88, respectively.

Sophomore distance Scott Acton also reached a provisional time in the men’s 10,000-meter run. His time of 30:51.86 was not only good enough to reach the provisional qualifier for the NCAA championship, but also earned him the fourth-best time in UCSD history.

On the women’s side, sophomore distance Paige Hughes and Chandler Colquitt joined the ranks of those reaching personal bests this weekend, setting them in the women’s 10,000-meter run. Hughes’s time of 37:03.67 beat her best time, which was set several weeks ago in La Jolla at the Cal-Neveada Championship. Colquitt ran the race with a total of 37:38.85, earning the seventh-best time in program history.

“We had a great number of seasonals and lifetime personal records today,” Salerno said about the meets.

Soka Peace Invitational, April 18: At Soka, junior sprinter Keith Rose broke the men’s 200-meter school record, set by him a year previously, with an impressive time of 22.51 seconds. Rose’s time is the third this season to set a school record.

The whole track and field squad now looks to come together to defend its home turf at the Triton Invitational this Friday, April 25 and Saturday, April 26. Events will commence on the Triton Track & Field Stadium at 10 a.m. on Friday.

“Leah had an awesome, awe-inspiring weekend,” Lizotte said. “We’ve proven that we can play with the best teams in the country, and when we do those things at a high level, we’re as good as any body.”

**Water Polo Will Enter WWPA Championships as No. 1 Seed**

**W. WATER POLO, from page 12**

Cap Most Valuable Player award.

“To be honest, I’m still taking it all in,” Gonzales said. “It was really a surprise, and I feel so honored to have even been in the running for it. It’s kind of a once-in-a-lifetime thing.”

Gonzales is only the second Triton ever to have earned the MVP award. Two years after Lizotte took the honor herself, Lizotte, UCSD’s leading scorer and most consistently productive player, finished with two assists on what was a relatively quiet night on the stat sheet.

Leah had an awesome, awe-inspiring weekend,” Lizotte said. “I’m really proud of her. She’s a senior and she works really hard. (Friday) was good for her and for all of us.”

The Tritons hope to continue their winning ways as they prepare to host the WWPA conference championships starting Friday, April 25. With a 4–0 record in conference action, the Tritons are in the No. 1 seed and have a first-round bye to start the tournament. While matchups have yet to be determined, the Tritons’ first game will take place on Saturday, April 26 at 3 p.m. at Canyonview Aquatic Center.

** presente the Triton Invitational this Friday, April 25 and Saturday, April 26. Events will commence on the Triton Track & Field Stadium at 10 a.m. on Friday.

“Leah had an awesome, awe-inspiring weekend,” Lizotte said. “We’ve proven that we can play with the best teams in the country, and when we do those things at a high level, we’re as good as any body.”

**UCSD to Play Azusa Pacific in Two-Game, Non-Conference Series on Saturday**

**BASEBALL, from page 12**

Cruz pitched six innings, giving up four runs on 10 hits to get the winning decision and the series split.

However, six scoreless innings from a 1-5 innings, will host a strengthening CCAA squad in Cal State Dominguez Hills starting on Friday, April 25 and concluding the following day.

“Leah had an awesome, awe-inspiring weekend,” Lizotte said. “We’ve proven that we can play with the best teams in the country, and when we do those things at a high level, we’re as good as any body.”

**UCSD will meet Azusa Pacific University in a nonconference series next weekend with the first pitch scheduled for 2 p.m. on Saturday, April 26. The Tritons will end regular season play the following weekend against Cal State San Bernardino before heading to the CCAA Championships in Stockton, now just under three weeks away.

UCSD BLOOD DONOR ALLERGY STUDY:
Subjects with either current allergy symptoms to inhalated allergens (cat, grass, dust mites), or healthy non-allergic volunteers needed as blood donors for research study. Will be reimbursed $20 for your time. Contact Dr. Broide, Department Medicine (619-335-6865).

BICYCLES

Old-School 650c road tires size 43 (North County) $150 - I have for sale a really nice pair of Old-School 650c Sola Dual System road tires size 43. These were very high end when these were made several years ago. They were mostly used as my back up tires so they are in pretty good shape with no rips or broken parts. The tires have never been run but I am not sure what the warranty is on these tires as they don’t have Vekro strips, instead they have a notch for this upper shoe and wire (thick fish line) dial for the 2 lower parts of the shoe. These are probably the easiest shoes to adjust as you just have to turn the dial to your preferred tension. Another great thing about these shoes is that the parts are replaceable where the Vekro shoe wear out and you can’t keep your shoes thin or replace the Vekro. These shoes also come with the (SOS) Side Dual System which is a bar-end adjustment on the bottom of the shoe that allows you to adjust how stiff or soft you want the sole to be. Inside the shoe very little use. PIECE IT FIRM Listing ID: 94431016 at ucsdg guardian.org/classifieds for more information.

Vintage Miami Sport 14 M10 Speed Road Bike (Cheezaide) $250 - Simple Components, Brand New Tubes and Tires, New Cables with Housing, Made in Italy, Super Clean and rides excellent. Listing ID: 94433151 at ucsdg guardian.org/classifieds for more information.

Velomax Velocity Aerob Road Bicycle Wheel (Cheezaide) 75+ Size 700, aluminum. Listing ID: 94433151 at ucsdg guardian.org/classifieds for more information.

SPORTS EQUIPMENT

9’9” x 24” x 3” Surfboard (La Jolla) $150 - If you see this post it’s available now $150. Made by master shaper Jeff Alexander (5,400 shaped boards). Jeff has also made a custom fiber-reinforced Outrigger canoe. According to Hawaiian Sustainable (US west, Mike and Amen on Oahu), the thing is "amazing". Foot pads were removed, so the canoe is still on them. Jeff is in Bali and said; “Sell it” $150.00 Listing ID: 94431678 at ucsdg guardian.org/classifieds for more information.

Windsurfing (San diego) $150. windsurfing brand. fend 4, 10’ and sail f7. Listing ID: 84269745 at ucsdg guardian.org/classifieds for more information.

FURNITURE

Fulton Contemporary Sofa Bed Group with 2 Ottomans: Get the most out of your living room, family room or home entertaining room with the help of this sofa group. The sofa offers comfortable seating as well as the ability to convert the sofa into a bed. With the included ottomans, you can easily add a sleeping solution to your living room when guests come over. The ottomans also allow for different configurations and can be passed with the sofa to form a sectional or together to form 1 long ottoman. You can arrange this comfortable sofa group in a configuration that suits your space and needs. 

Any questions call for information: 626-673 8934 Listing ID: 84431185 at ucsdg guardian.org/classifieds for more information.

Full bed white truck camper shell (Clairemont Mesa) $175 - Full size white truck camper shell. Has plenty of problems that are reflected in the ridiculously low price. Pick up only, and it will take 2 strong people to lift it. I CAN NOT HELP I will delete this post when it has sold. Currently on 2001 Chevy Silverado Listing ID: 94431183 at ucsdg guardian.org/classifieds for more information.

queen mattress brand new with box $180- $180 brand new in plastic pillowtop queen mattress and box spring with warranty Listing ID: 94431179 at ucsdg guardian.org/classifieds for more information.
2014 POWERED BY THE CHANCELLOR’S OFFICE AND THE UCSD GUARDIAN

UPCOMING AT

OUT AND PROUD WEEK 2014 – LGBT RESOURCE CENTER
Out and Proud Week presents the largest opportunity for visibility, networking, and community building for UC San Diego. This week-long celebration combines significant events and day-to-day activities that will feature opportunities to come together as a community and to celebrate the many contributions of our students, staff, and faculty. Join us on Monday, April 21st, for the launch of the Queer Alliance Resource Center and a series of events to celebrate the coming out experiences of students, faculty, staff, and alumni. Visit www.ucsd.edu/queer for a full calendar of events.

THEATRE TUESDAY PRESENTS – PASSPORT TO CULTURE: NEW YORK – STUDENT SERVICES CENTER, D100
At 6:30PM this Theatre Tuesday event will introduce you to a cultural experience in New York City. Captioned films are available for everyone who wants to experience the New York film festival experience. This month’s film features: Blue Steel and More Money, More Problems. Students who attend both films will receive a free ice cream on campus; the first 50 students who arrive will receive ice cream for free. Find out more at earthweek.ucsd.edu/campus/earthday/events.

FRI 4.25
10am
FITSTOP HEALTH ASSESSMENT – THE ZONE, PRICE CENTER PLAZA
This is a 30-minute free health assessment that measures your level of health and wellness compared to others in your age group. Four components are measured: 1. Cardiovascular Health, 2. Muscular Strength & Endurance, 3. Body Weight & Composition, and 4. Flexibility. See how you stack up and improve your emotional health! Workshops are free and provide education and tools to help improve your health. This event is hosted by the Student Health Advocates.

2:30pm
WORK & TRADE ABROAD INFORMATION SESSION – INTERNATIONAL CENTER LOUNGE
If you are not thinking about going abroad to work or study, please join us for this upcoming Work and Trade Abroad Information Session. Please note that you must be an undergraduate student and must have completed at least one year of classes; there is no cost to register. More info can be found on the international.ucsd.edu website.

5pm
RELATIONSHIPS WITHIN THE MILITARY COMMUNITY – STUDENT VETERANS RESOURCE CENTER
This presentation and discussion led by Dr. Susanah Pincus explores how military communities affect one’s family members and partners, how to improve communication among family members and within couples, and how and when to seek help if experiencing significant emotional distress. This event is for the military community and partners, as well as those interested in having a supportive and informative atmosphere. This event is open to all students, faculty, staff, and campus community members.

8pm
HAUICHICA – THE LOFT
This year’s Loft Live will feature local artists that can be described as “deconstruction/information” artists. They work on-site, using electronic and analog sounds to create an audio experience. This is an interactive and participatory discussion. This is a free event and open to the public. For more information, visit the Loft Live Facebook page at www.facebook.com/loftlive.ucsd.edu.

SAT 4.26
8pm
DILLINGER ESCAPE PLAN – PORTER’S PUB (ORIGINAL STUDENT CENTER)
This event is sponsored by the Rock Student Association and features local band Dillinger Escape Plan. The show is free and open to the public. All ages are welcome! This is a ticketed event. For more information, visit www.rockstudent.org.

SUN 4.27
4pm
UCSD CSA PRESENTS 9TH ANNUAL CULTURAL SHOW, BREAKING – PC BALLROOM EAST
This event celebrates the various cultures at UCSD through music, dance, and food! This is a student-run event and all proceeds will go to local community organizations. Please bring your credit card to purchase tickets at the door.

Upcoming at

THE UNDERACHIEVERS’ PORTER’S PUB (ORIGINAL STUDENT CENTER)

3pm
MUNKSTOCK – MUIR QUAD
Come to the Main Quad for some free food, fun activities, and great music! We will have homemade lollipops, a photo booth, signs, tote bags, and music by the Underachievings, featuring Ray Fulcher, for the music of the last year of high school.

4:22pm
THE UNDERACHIEVERS – PORTER’S PUB (ORIGINAL STUDENT CENTER)
Also Performing: Denaiss Apparau, Kira Curry and Chelse Rising. For more information, visit theunderachievers.ucsd.edu....

SoFTBALL
Tritons Suffer Season’s First CCAA Sweep
No. 15 UCSD dropped all four games of conference series against No. 8 Humboldt.

BY BRANDON YU SPORTS EDITOR

After a disappointing series split the previous week, the No. 15 UCSD softball team suffered an even more devastating slate of games this past Friday and Saturday, as California Collegiate Athletic Association opponent No. 8 Humboldt State University swept the Tritons 4–0 in Arcata, Calif. UCSD now holds a 36–13 overall record and is 19–9 in CCAA action.

The series was critical, as UCSD sits in third in conference standings, right under Humboldt State in second. “It was definitely a crucial series,” UCSD head coach Pati Gredilla said. “To be swept by them is very disappointing for us. I was definitely hoping to sweep the series, if not split the series because they are a good team.”

In spite of the tough losses, the Tritons have already clinched a playoff berth for the upcoming CCAA championships in early May.

In the first matchup of the series, UCSD earned the first lead of the game at 1–0 when senior third baseman Emily McQuaid singled in senior outfielder Kirsten Willmon for a third-man run in the bottom of the inning. UCSD scored one run in the fourth inning, but a final score of 9–2 by Humboldt easily downed the Tritons. Sophomore left-hander Alexis Edwards (17–7) had an uncharacteristically rough outing on the mound, allowing a season-high seven earned runs on six hits in only 2 1/3 innings pitched.

“Tritons got the edge in the opening frame to enter the second quarter with an early 2–0 advantage. In the second quarter, the Tritons’ offense remained in control as UCSD built up a 5–0 lead before the Anteaters finally broke their scoreless streak with less than three minutes remaining in the period. At the half, the Tritons led 6–2.

“Going into the game, our team definitely knew we’d have a grudge the entire way,” senior utility Leah Gonzales said. “We knew we had to come out energetic and ready to play.”

In the third quarter, both squads mustered just one score apiece, but UCSD maintained a strong 7–3 lead entering the final quarter. In the fourth frame, the Anteaters jumped out with two goals to cut the edge to a shaky 7–5 score. However, with half of the quarter left in play, UCSD was able to strip away the Anteaters’ momentum and seal the cup victory.

“It was an awesome experience,” senior utility Sarah Lauritzen said. “It was an overall great team win. We had four girls score two goals [each] on top of some great defensive plays. Across the board it was a great team effort.” Winser, Kirkland and junior attacker Jolene Guiliana finished with a pair of scores. Gonzales led the Tritons defensively and offensively — with two goals and an assist — to earn the Harper Cup MVP Award.

UCSD Splits at SFSU, Clinches Playoff Berth
No. 18 Tritons take two out of four against SFSU to qualify for May’s CCAA conference tournament.

BY JOHN STORY ASSOCIATE SPORTS EDITOR

For the first time since 2012, the No. 18 UCSD baseball team has clinched a postseason appearance in the California Collegiate Athletic Association Championships after taking two games over San Francisco State University on the road this past weekend. After splitting the series against the Gators, the Tritons are now 27–13 overall and 23–9 in league play, good enough to guarantee a top-four finish in the CCAA by the season’s end.

San Francisco State defeated UCSD 7–6 in Thursday’s series-opener, breaking the Tritons’ 11-game win streak in the CCAA. UCSD’s recent fashion of come-from-behind victories, the Tritons overcome a two-run deficit to lead 4–2 after the visitor half in the sixth inning, only for the Gators to tie once again in the bottom of the inning. UCSD would allow three more runs going into the ninth inning, only produc
ing two runs in the top of the frame to close the game.

Friday’s doubleheader would prove to be a different story, with UCSD sweeping the Gators 7–3 and 3–1 in the first game of a doubleheader.

Junior southpaw Trevor Scott (4–2) started for the Tritons on the mound, settling in and holding San Francisco to three runs on four hits across six frames. UCSD, leading 6–3 going into the ninth inning, exploded offensively in the closing frame by racking up 17 hits on the home team and sending 11 runners across the plate. Redshirt freshman outfielder Brandon Shirley started the surge by sending a ball out of the park for the first time in his collegiate career. Senior outfielder Justin Rahn also sent four runners home in the final inning off a two-run double and a two-run single.

Senior right-hander Blake Fassler (4–3) took the loss on the mound in the nightcap, pitching 5.2 innings and allowing three runs on three hits. UCSD failed to capitalize on a bases-loaded opportunity in the first inning and failed to produce offensively throughout, tallying only four hits with two of them off the bat of sophomore infielder Troy Cruz.

6–8), the only Triton to start all 40 games, took the mound for the ninth time this season for the final game of the series on Saturday.
