Mr. F. W. Huber,

Riverside Portland Cement Co.,

Title Insurance Bldg.,

Los Angeles, Cal.

My dear Mr Huber,

I have two samples of water, one from La Mesa Reservoir and one from the Seepage below the Reservoir, which I should like to have analyzed. The idea being to determine whether they are identical. Also, we have a sample of the corrosive clay which eats up our pipe lines. I thought you could give us the percentage of rust producing alkali in this soil.

Please let me know if you care to make this analyses and what the charge will be. If not, please suggest some chemist to whom I can send them.

Very sincerely yours,

WSP-WK

Mr. Wm. S. Post,
924 - 8th Street,
San Diego, Cal.

My dear Mr. Post:-

I have yours of 18th inst. regarding water analyses and a corrosive clay. I should be glad to examine both the water and the clay for you, and will be pleased to do the three analyses for you for \$50.00.

Yours very truly,

Frederick W. Huber

Consulting Chemical Engr.

Mr. Frederick W. Huber,
Title Insurance Bldg.
San Diego, Cal

My dear Mr. Huber:

I hope to send you samples shortly but just at present
we are too poor to scientifically investigate; have to wait over the
July 1st.

Very sincerely yours,

Ed Fletcher Papers
