JANUARY 5, 1929

Morse Construction Company,
920 Eighth Street,
San Diego, California.

Gentlemen:

When comparing your consignment report covering the month of October with our records we find your inventory to be short 1-Lion 50 Hole Battery.

This difference is evidently covered by your notation of one (1) Battery returned, however, since no credit memorandum was authorized when you returned this Battery, our records still show an additional 50 Hole Lion Battery in your inventory.

Taking the matter up with our Mr. Strand, we find that this Battery being new but defective was returned to the California Cap Company, for repairs, same which were made at no additional charge and returned to you.

If the above information is correct and you have this Battery on hand, kindly include it in your report for December.

Yours very truly,

TROJAN POWDER COMPANY

Gentlemen:

Please send us the following:

5000 No. 8 Caps
5000 No. 7 Caps.

Yours very truly,

February 28th,
1 9 2 9

Mr. G. A. Strand,
Trojan Powder Co.,
Crocker Bldg.,
San Francisco, Calif.

My dear Gus:

I would like to have you ship one car of powder to arrive in San Diego March eighth or ninth, approximately, to contain :

1 ton of 60% Hercules Gelatin 7/8 x 8 stick
5 tons of 60% Trojan "C" powder, 7/8 x 8 stick
1 ton of Trojan 60% Standard, 7/8 x 8 stick
2 tons of 40% "C", 7/8 x 8 stick
2 tons of 40% ~~Standard, 7/8 x 8 stick~~
2 tons of granular

I might say that this ton of 60% Gelatin is for Jake in driving the tunnel at Spring Valley. They are going to need probably ten or twelve tons of granular for the shot which probably will take place in the later part of April or the first part of May.

They are also putting in another tunnel at Murray Canyon now and would like to have Bob come down and have the tunnel put in to suit him so if you and he are coming down this way soon it would be a good proposition for the two of you to lay it out.

Bob said that you were coming down with him the next trip and I sure will be glad to see you.

Sincerely yours,

EFjr:AK

Dear Bob:

Was up to see Hannigan & Lang, also Basich Bros. Neither Hannigan or Leng were there, but I saw Roy Richards, Supt. for Basich Bros. Had a nice talk with him.

He said he had used lots of Trojan powder and they will be in the market for powder themselves in the near future. I gave him a card and told him I would like to fix him up. Also, he tells me that it is barely possible he will buy all the powder for Hannigan.

At any rate, they have about 3000 pounds of Hercules on hand and it wasn't until Saturday that the quarry site was actually approved by the State and it will be well into next week before they start installing their equipment.

Had a talk with the resident State highway engineer at Laguna Junction, who is a friend of mine by the name of Warren. He knows Hannigan very well, also Richards, and altho it is not within his province to boost, he said he would speak a good word for us to both.

I think it would be a good plan if you were down here sometime next week as Jake is about finished with his tunnels and Cole was asking for you the other day in regard to his tunnel at Murray Canyon.

Got a car in today which had 4000 pounds of 40% bag so that Hannigan can try some of it out if he wants to.

Hoping to see you down this way in the near future, I am

Mr. Ed. Fletcher, Jr.,
Morse Construction Co.,
San Diego, Cal.

Dear Ed;

On the way up yesterday stopped in at the Calavera Rock Co. This has promise of becoming quite an outfit, and I am glad we didn't overlook them any longer. They have a very good plant already in operation and have what looks to me like the best rock deposit for a crushing operation that I have seen for some time. They have required practically no powder in developing the quarry, but as soon as they get up to the solid bank will probably shoot coyotes, and I imagine will use considerable powder.

Right now they are up against shooting out a cut in order to develope some ground storage. I looked it over and estimated it would take approximately 1000 lbs. of 20% CC. Will you please write them, Box R, Oceanside, and quote them a delivered price. While you are at it better quote them on Granular, 20%, and 40%, and if you'll send me a copy of the letter I'll try to stop in and see them on my way down next time.

They are going to develope into regular customers for some body, and right now is the time to get started with them. I offered to help them in shooting this cut and am pretty sure we can get the business. I don't think you need worry about the credit because three of the five owners are officers in the Southwest Paving Company.

Yours very truly,

R. D. Hardent

PORTLAND, OREGON

June 22nd 1929.

Morse Construction Co.,
San Diego, Cal.

Dear Miss Fletcher;-

Have your letter of June 19th regarding the Western Metals Company. Their driver was certainly very much mistaken in saying that they handled Trojan Granular. The only chance for that would be in the event they had taken in a limited amount from some job which had originally been sold by yourself. I think there is very little chance of that though, and the probabilities are the driver was merely mistaken.

Am glad Edward had such a nice trip. I just got back a week ago to-day from a trip to Portland myself, and know how beautiful that country is at this time of the year.

Tell Ed to let me know if there is anything in particular going on around there. St John left to-day for a vacation of a week or so, and unless something special comes up I will be sticking fairly close to Los Angeles until he gets back.

Yours very truly,

R. D. Harden.

June Twenty-sixth,
1 9 2 9

Mr. Robert Harden,
c/o Al St. John's Office,
Hellman Bldg.,
Los Angeles, Calif.

My dear Bob:

Just returned home from a wonderful vacation and find your letter of June 22nd relative to the Western Metal Supply Company handling Trojan granular.

Of course there is always a possibility that the Western Metal Supply Company might have had included in one of thier cars some Trojan granular the same as I had a ton of 60% Gel included in a car of Trojan but I hardly believe this is the case and I think that the driver was mistaken as you state, however, I have a means of checking up for sure and will find out.

We had a wonderful trip up through the Redwood highway up the Oregon Coast to Coquille to Roseburg and then up to Portland.

We had a nice visit with several of Mildreds college chums en-route at various places and then went up the Colorado River highway to Yellowstone down to Salt Lake and on our way home from Salt Lake took in Bryce's Canyon, Kaibab Forest, north rim of the Grand Canyon, Zion National Park and also took in Boulder Dam from Las Vegas.

By the way, Dad had lunch and a nice talk with Eaton in Los Angeles on our way home. You know Eaton is the engineer in charge of Flood Control for the city of Los Angeles. Dad brought up the subject of Trojan powder for the big job that our good friend Slocum is on and I think that through Eaton's influence that we may be able to do you some good on that job. If so, you want to see that Gus protects us on it.

Eaton and his wife are coming down for a trip into

Mexico or to the mountains with my father and I will probably go on the trip myself and see what mess we can get in.

Since I have been home I have been out to see Jake and I think it will be August before he will be ready to shoot. They are running about 1,000 tons a day now but he and I both estimated that they had at least twenty-five or thirty thousand tons in the whole shot and he wants to be entirely cleaned up before he shoots.

Gabbs got a ton of Hercules or Giant for the Nevada Contracting Company the other day.

It seems that every time a car of explosives come in for anybody the Santa Fe call us to find out who they are and where they are that is how it happens that I found it out so I guess it is no use of planning on seeing them soon.

By the way, what are we going to do with all this bag 40? We have sold so much "CS 40 standard powder lately to the county and to Fenton Parker that I am going to need another car soon but with so much bag 40 in the magazine I have no run to store it.

I don't know whether to stick the stuff in a car and ship it back to the factory or what to do. I certainly don't want to have it taking up the room in the magazine. What have you to suggest?

I had a nice talk with Gus on the way through and incidently mentioned to him that Hannigan and Lang had bought a car of Giant. You should have heard the Swede swear. I thought you had told him or I would not have mentioned it to him. You have probably heard from him by this time.

Hope to see you down this way soon.

Sincerely yours,

EFjr:AK

June Twenty-seventh,
1 9 2 9

Mr. Gus Strand,
Crocker Bldg.
San Francisco, Calif.

My dear Gus:

Thanks for your information regarding the single lead wire.

Please ship me immediately 1000 feet of single lead wire No. 14 gage either in the 250 foot rolls or 500 foot rolls.

You used to send them in varrying lengths but that makes it bad. I hope you will insist that they are either 250 or 500 lengths either red or black it does not make any difference.

For your information the lead wire that I procurred from Western Metal to fill an order was marked Hercules wire. Before I delivered same I tore off the label.

It may be that they are making special lead wire in 250 foot coils.

At any rate ship them as above because we are soon going to need them and I don't want to be out.

I also want to acknowledge receipt of your general instructions and safety orders for conveying to storage and useage of explosives.

We will try to see that we live up to all rules and regulations set forth.

Hoping to see you down this way in the near future, I am

Sincerely yours,

EFjr:AK

Mr. G. A. Strand,
c/o Trojan Powder Company,
Crocker Bldg.,
San Francisco, Calif.

My dear Gus:

I am enclosing bill against Monarch & Breen for powder which we furnished them before the car that you sold was delivered.

As you know, we gave it to them at practically cost awaiting arrival of the car and it was particularly on that account that Bob was able to sell them a car, the fact that we did take care of their immediate wants at car load prices.

We were stuck on that ~~so-called~~ local Mountain Spring job to the tune of $150 to $200 under like circumstances and do not want to have it happen again, however, do not want to embarrass Monarch and Breen by filing a claim with the State immediately as I had assurance from you that this bill would be taken care of in the very near future and that is my only recourse.

but am not unless

Sincerely yours,

EFjr:AK

My dear Ed:

Your letter of December 5th, regarding the bill of Monarch & Breen. This was the matter I discussed with you in your office and after talking the matter over with Bill Monarch, I did not get to see you as it was late when I got down to the City. Want to say however, that Monarch told me that he would mail you a check immediately for this amount and trust you received it by this time.

Yours very truly,
G A Strand

Ask him about the Bill from the Grant.

December Twenty-fourth,
1 9 2 9

Mr. G. A. Strand,
620 Market Street,
San Francisco, Calif.

Dear Mr. Strand:

Replying to your favor of the twentieth regarding Monarch and Breen check would say that we received same from them soon after you were here and thank you for your kind interest in this matter.

We have just received from the Grant Hotel a bill for $7.00 made out to G. A. Strand and R. D. Harden which we will be glad to pay if it is correct.

There has been so many errors made in the past there that we thought best to get your o.k. before paying same.

With the Season's Greetings to you, I am

Sincerely yours,

MEP:AK
