

Mr. Thos. M. Games,

Supt. El Capitan Indian Reservation,
Santa Ysabel, Cal.

Dear Sir:

We are in receipt of a letter from the Department of the Interior under date of May 9, replying to our request for prompt action in the matter of an application for right of way for the Conejos Reservoir and canal. This letter states that the matter is referred to you for report.

We urge that this matter is of serious importance to our system and our consumers. The State through the Railway Commission is insisting on definite performance, as you will note by a perusal of the orders of the Commission, which we have marked. It will undoubtedly add to your satisfaction in making a decision to be supported by definite orders of the State Railway Commission which as you know has plenary powers as a Public Utility Commission. On our part we are pleased to draw attention to the fact that our original application had in advance stated intentions regarding improvement, which are conformable to the orders of the Commission after a hearing.

This is actually a matter of public importance enforced by the deficient rainfall of this season. We

stand ready to supply you with any information which may be lacking to make your decision and report, and to that end will send our engineer, Mr. Post, to you with all the data for consultation. We have 13 volumes of testimony before the Railway Commission, and if there is any question, legal, engineering or economic which is not set down there in reference to our system, we should be greatly surprised to hear of it. We urge to give this as immediate consideration as possible.

Respectfully,

Murray and Fletcher.
