Sirs:

Will you kindly send us your trade catalog and price list on Venturi Meters. In fact any published data you may have on them will be very useful to us as we contemplate the installation of one.

Mr. Lawrence C. Fay a friend of your Chief Engineer, refers you to us.

Very truly yours,

Chief Engineer.

Cuyamaca Water Company.

Los Angeles, Cal.

Gentlemen:-

If you are ready to bid on the installation of a 1220 foot syphon of 42" reinforced pipe we ask you to meet our representative at the office 916 8th St, San Diego, on Thursday, (June 26) at 8 or 9 AM., who will conduct the representatives of prospective bidders to the works. All details can be talked over on the trip.

We also will take up matters of 36" concrete pipe laid by you at the Murray Hill dam, which is badly crushed for over 30' in length.

Wire us as to arrival.

Very truly yours,

Chief Engineer.
Cuyamaca Water Company.

Dear Sir:-

Mr. Maxson called on long distance and wished me to telephone you the following message:

"If you haven't enough work for your men, it will be a good thing to make the repairs on the 36 inch pipe at Grossmont, and he asks you to arrange for these repairs with Mr. Harritt and cooperate together."

Very sincerely yours,

N. D. WHITMAN, ENGINEER

Attention Mr. Post.

Gentlemen:

The writer will be in San Deigo Wednesday morning, October 15th, and if convenient we should like to have your Chief Engineer inspect our work at Sand Creek for final acceptance on that date.

We presume you will have water available at that time for filling the syphon without unnecessary delay.

Very truly yours,

REINFORCED CONCRETE PIPE CO.

H. H. Maxson,
Engineer.

HHM/RES

FILE

Oct. 8, 1913.

Mr. H. H. Maxson,
Central Building,
Los Angeles, Calif.

Dear Sir:

Replying to your letter of October 4th:

I shall be glad to meet you in San Diego
October 15th, on Wednesday morning, and proceed to the
work for final inspection.

The present water supply is small, and it will
take a considerable time to fill the syphon. For
this reason, Mr. Bartl, the Superintendent Engineer,
has frequently suggested that you authorize him to
gradually fill the syphon, at the rate of two or three
feet additional head per day. In that case, the syphon
can be readily filled on the date of your arrival, and
would be ready for a final test of leakage in two or
three days. Otherwise, it would take longer.

You will understand that we are especially anxious
to put this syphon into service promptly, and everything
that you can reasonably do to hasten matters will be ap-
preciated. In so far as you or your representative are
put to extra expense in inspecting and being present
during this gradual refilling, would seem to me to be a
proper extra charge. So if you could send me some one
before the 15th to supervise refilling the line, I should
think it would be advisable.

Yours very truly,

W.S.P.
