#### Patrol Report No.M.

1940/41

A report of two patrols enducted by D.F. Medisen and seven members of the native constabulary to the villages in the vicinity of Laucala's and A.J. Pondon's claims and also to all native villages in the area North and West of the Post.

### Tropose of Patrols,

(1) To win back the confidence of the natives in the retinity of Euscola's and Pendon's claims. These natives had been intimidated by UGDNN an indentured labourer of Euscola's. The native place together with some other indentured labourers of Euscola's that place is a mearly village. They paid the natives who accompanied them in this goods stolen from Euscola's house. When Euscola's natives were arrested they told the natives who had received the stolen goods from them that they hould also get into trouble and hence their timidity.

and been applied for by both the Latheren and Seven Day Adventist places for the purpose of ascertaining who has the most rightful claim on them.

and checking of census. (3) deseral routine patrolling, consolidation work

Vicitod A.J. Peadon's claim. Day observed there campeo.

village. Agreeably surprises at clean and orderly state of same. All houses previously statered about in the bush have been dostroyed and an estimate new village built. Proceeded to Kyshruwahru village and round it to be clean one many old houses renewed. Complimented matives on heeding my instructions. Camped.

11.2.41. Visited Zuccola's plain. His labourers were limed X addressed also warned about visiting pative villages. His store and house and house to be missing to Ramu Fost by way or Dillages articles were found to be missing. To Ramu Fost by way or Dillages.

#### TERMA. TY OF HE! GUITERA.

Trade41. cont.d.

... UNINFERTRU AND KINGA Willages have been entirely renewed and all the old soutered houses destroyed. Camped at Pass Fost.

Hade a surprise visit to TaPU village. When the patrol extract the natives were working feverishly to clean their reads, which had hitherto been neglected. Matives were infermed that I would be going back to the station for a few cays, but that I would be returning shortly and doing a patrol of all the area in their vicinity. Camped.

Returned to TAPU village. Roads in excellent order. On account of heavy thunderstorm unable to line matives today. Camped.

Mined natives and chesked consus. Six wemen and three men who failed to appear for census after each a long varning and the afterwards appeared when cent for were caned and warned that failure to line suid mean imprisonment in future. TAPU, which is a very large willage of more than 700 natives, has now been rebuilt in four distinct groups. The people had no complaints to make, They appear to be dealed applied that the influence of the Entheron Mission.

18.2.41. To ENGAL village at demovement a shange from my former visit to this placed instead of coming to a descriptivities with which matters at and or in the ridges harling defiance at the patrol, I was extensioned a house into an entirely new grouped village, where all the hetiral two kined ready to have the senses taken. The initial disk with very for names in it, so I immediately compiled a new book. Compale

Lined all the matives on in today and addressed that. They replied that they were now ready to give up fighting and settle down. Accordingly a site was marked out for a rest house and Folice burred; s. Brow the police accompanying me expressed curprise at the sendiness of these people to line.

20.4.41. Returned to hamm Pest to attend to mail and active published for today's 'plane.

21.2.41. Proceeded to YAMPOBIA VILLAGE on route AMILI but to former place on secount of heavy incoment rain.

Rain egain this morning To AMILI village where the patrol arrived at symmethest root bears and police barrance built somewant the instigution of the leading sweet of the village this place has been grouped visilar to the villages alones to Room Post Compad.

Visited TTAI village ident retimes and checked concup. A few new mases resorded. Initial reprinanted severaly for concenting three matives. Padanyoured to trace female who was alleged to have atticles from I.J. Ubeaks house. Twent female on the line having risted Ubeak's place. Initial told to democage all old sease as other places have done. Camped.

To AUMONOMOR village this village has settled does cain after its attack on the patrol party in August 1940. Len in the fight which enemed two natives were shat Mattros lined well and exhaust a checked. It was noticed that a number of natives had nigrated to peak form sub-divis in Then asked the reason the people stated that them asked to the nearby village of MUMA during the trouble last year. It was been that the latual was one of the native shot last year and in the place has been recommended the mative NOKOFA to met in that subjective and the second

UNIMPERTENU and KINARIU villages have been entirely renewed and all the old scattered houses destroyed. Comped at Room Post.

12...41. Rade a surprise visit to TAPU vill ge when the patrol arrived the natives were working feveriably to clean their re de which had hitherto been neglected. Natives were infermed that I would be going back to the station for a few days, but that I would be returning shortly and doing a patrol of all the area in their vicinity. Comped.

16.2.41. Returned to TAPU village. Reads in excellent order. On account of heavy thunderstorm unable to line natives today. Campada

17.2.41. Indeed notives and checked consus. Six wemen and three men who failed to appear for consus after such a long warning all she afterwards appeared when sent for were could not warned that failure line ould mean imprisonment in future. The U, which is a very large village of more than 700 natives, has now been rebuilt in four distinct groups. These people had no complaints to make. They appear to be familiar rapidly under the influence of the latheran Mission.

18.2.41. To ENGAL village at Sam. What a change from my former visit to this place! Instead of seming to a deserted village with armed natives standing on the ridges hurling defiance at the patrol. I was seromonique? A numered into an entirely new grouped village, where all the matire ? Now limed ready to have the concus taken. The industry seconds an old book with very Tew names in it so I immediately should be not book. Compade

19.2.41. Lined all the natives again today and addressed them. They replied that they were now ready to give up fighting and sattle down. Assordingly a site was marked out for a rest house and Folice barracks. Even the pelice accompanying me expressed surprise at the readiness of these people to line.

20.2.41. Reterned to Ramu Fost to attend to mail and correspondence for today's 'plane.

21.2.41. Proceeded to TAMPOSSA village on route AMMIA but Date forced to camp at former place on account of heavy incomment.

20.2.41. Rain again this morning. To ANULI village there the provol arrived at 2pm. Excellent rest house and police barracha will here. At the instigntion of the leading man of the village this place has been grouped similar to the village closer to huma Post. Casped.

Datives lined and new book compiled Chamerous new confidence of provided Also lined natives of TROU and APANO and inversed them to line as one group. Native HARONKEI has been recommended as Industration Will on account of the good work he has done during the last old months. The previous islandant was really one of the leading trouble makers of this village has fled to PININTEGU along-Compet.

consular few new names recorded. Inlust reprinted natives and checked consular few new names recorded. Inlust reprinted a severely for occording there natives. Endeavoured to trace female who was alleged to have states articles from F. J. Ubanks house. Every female on the line denies having visited Ubank's place. Inlust told to desolish all old houses up other places have done. Content.

25.2.41. To AURIDIONOFI villago. This villago has cuttled down again after its attack on the pytrol party in August 1940, when in the fight which ensued two natives were shot. Entires lined well and common was checked. It was noticed that a number of natives had signated to hene Bern sub-division. Then asked the reason the people stated that the migrants had returned to their proper slaces. A number of people stated that the migrants had returned to their proper slaces. A number of people stated that the lilage of NUMA during the trouble last year and in his place has been recommended the mative MONOFA to act in that example Camped.

12...41. Made a surprise visit to TAPU village. When the patrol arrived the malives were working feveriably to clean their roads, which had hitherto been neglected. Matives were informed that I would be going back to the station for a Yew days, but that I would be returning shartly and doing a patrol of all the area in their vicinity. Camped.

16.2.41. Returned to TAPU village. Roads in excellent order. On account of heavy thunderstorm unable to line natives today. Camped.

17.2.41. Mined natives and chesked census. Six women and three men who failed to appear for census after such a long varning and the afterwards appeared then sent for were caned and warned that sailure to line ould mean imprisonment in future. TAPU, which is a very large village of more than 700 natives, has now been rebuilt in four dictinet groups. These people had no complaints to make. They appear to be coming rapidly under the influence of the Lutheran Mission.

18.2.41. To PYGAI village at Sam. what a change from my former visit to this place! Instead of change to a deserted village with armed natives standing on the ridges hurling defiance at the patrol, was coremonious an unbered into an entirely new grouped village, where all the native is seen lined ready to have the consus taken. The lulusi yituduaed an old dook with very few names in it so I immediately compiled there book. Campad.

19.2.41. Lined all the natives again today and addressed themthey replied that they were now ready to give up fighting and settle
down. Accordingly a site was marked out for a rest house and Police
barracks. Even the police accompanying me expressed surprise at the
readiness of these people to line.

20.2.41. Returned to Damu Fost to attend to mail made correspondence for today's 'plane.

21.2.41. Proceeded to YAYPOSSA village on route APULL but me forced to camp at former place on account of heavy incomment rain.

22.2.41. Rain again this morning. To ANDLE village where the patrol arrived at 2pm. Excellent rest house and police barracks built here. At the instigntion of the le-ting and of the village this place has been grouped similar to the village closer to Rama Post. Camped.

Matives lined and new book compiled Conserous new beas precised. Also lined notives of ORGU and AFANO and in grased them to line as one group. Native Paronnell has been recommended as Inlust of LULI on account of the good work he has done during the leat sir months. The provious labuai, who was really one of the leading trouble makers of this vallage has fled to PHNINTEGU area, Compod.

24.2.41. Visited TIRAI village.Livel natives and chroled concast few new names recorded.Luluai reprinanted severely for concessing three natives.Ind.avoured to trace femals who was alleged to have atolen articles from L.F. Ubanks house. Every female on the line denies having visited Ubank's place. Indust told to demolian all all houses so other places have done. Camped.

25.2.41. To AUMUNOUSE village. This village has bettle again after its attack on the patrol party in legal 1940, when is the fight which ensued two natives were shot. Entires lined selected to the same senses was sheeked. It was noticed that a number of natives had signated to bene Bene sub-division. When caked the reason the people stated that them migrants had returned to their proper places. A number of people also filed to the nearby village of KUMA during the trouble last year. It was learned that the lutter was one of the natives shot last year and in his place has been recommended the native MOKOFA to act in that capacity. Camped.

#### TERRITORY OF NEW GUINEA.

26.2.41. To BAIAHASTU village, which has been entirely rebuilt. Hetives limid and census checked. To KUNA village. Road between Wide and BAIAHASTU not in the best of order. Natives were already limed then I arrived at KUNA. Census checked. Village clean and in good order. Nativis of AUROHOMOF! were ordered to return to their non village. Two suspendingers seen here. Jenvy rain. To YAMPORSA where the patrol camped.

27.2.41. Lined YAMPONGA village.Ceusus checked and some new names recorded.Many migrations from here to YABUMKA village.Frocedied to KANDIDA.New Police quarters erected under, supervision.FAMPONGA village reports kidnepping of young male native SINORO by BIYAMMA village. Camped at KANDINA.

28.2.41. Lined natives of MANNIERA and Specked census. Forceded to ONGE village and checked census. Then this village was entirely burnt by MNGAI, AMULI and AUMONOMOFI last year they shifted closer to BANGIA where a good new village has been conceed. To BAROLA village, where census was checked. Muny new names reworded. No complaints concerning out enemies. Camped.

1.3.41. Proceeded to the new village of MASAMANKA on the invitation of the people when I arrived there I discovered that the natives had built a rest house and police barracks of their was velition. Extives were a little timid at first but gained more confidence by afternoon. I decided to buy a pig for police and cargo carriers but was informed by the leading man of the village that they were unable to sell one. On asking him the reason why they were short of pigs he admitted that L/Cpl. Fillia had previously made many demands on him for page. Evidently this member of the police had a wonderful time up here on the Jurari-Rama divide about two years ago when he was apparently allowed to room at large by the Officer-in-Charge at that time. Asm. ed

Lined natives of NASANATKA village and issued a new book. Rather an excellent line (p for a new village. If course this village is greatly influenced by Bar La natives who have a harlet within \5 minutes walk of NASANKA. Proceeded to ANTHAM RA where matives were lined and consus checked. Loft ABUNIVARA and went to HAMMIPLERA village. If for of the people of this place and proviously lined with HAMMA and BOPINAPI but most of them as witted that they had lived in little however neattered about in the nearby bush. Accordingly the people were lined and a new book issued. MANELVIN A is an entirely new village. Proceeded to ROPINAPI where camp was made. Theme on Alyura arome.

Lined natives of ROPIMAFI and NAMORA and elected sensus.
The names recorded. MANORA who previously lived den on the plain not far from the foot of Mt. MANORITHMA of their a.m aword have diffted up on the hill near ROPIMAFI. Proceeded to TAMANORI and checked centure.
To YANAMA VILlage where camp was made.

these natives are employed on suckly by ". Ubanks and J. Dorenz, It was making noticed that a few of those people have their houses built near the wasse of E. Ubanks and J. Lorenz. They have been ordered to demolish these houses and rebuild them in the proper village site. Proceeded to James.

#### ROADS.

considering that the set sealon is now in progress. The reads between the villages which caused me some trouble last year some approbably better than those of the remainder of the villages seen on the patrol. Even if the reads may need a little attention in places it is not my policy to send out folicy to have them attended to for I calculate that police, especially in new areas, to more hard than good when allowed to roam round the country without buropean supervision.

The actual distance covered on the patrol cannot yet be ascertained as I have no proper drawing instruments with which to complete a map.

#### TERRITO Y OF MEN GUL TA.

#### REST PISES.

Throughout the occarse of the patrol only in two places did I have to pitch a tent morely at EMGAI and AUMONONOTI. hen these people were at loggerheads with the Administration last year they burnt the rest houses and police intracts and have not since rebuilt them, although in both cases are villages have been built. Then I visited each of these places I arked the natives to put up new rest houses and police quarters and I sa now pleased to relate that since I have returned to the station be lulumis of both places concerned have reported to me with the news that they have done as I requested.

To adcourage a little healthy convetition amongst the different mative rilages I have now decided to offer a gift of a little trade to the native village, which in my opinion, erects the best type of post house. Up to date in all villages to the North and West of Tamu Fost I have not yet seen a rest house with a floor.

#### LULUATS.

Nothing outstanding was seen amongst Inlusio on the entire patrol. Even though they wear a hat their prestige does not count for much once the Officer leaves their villages, of the resent Inlusio, that of KUMA in perhaps doing the best work. The leading real of AHUMA was is recommended as Inlusional also been doing the very able to these last few months, whether his good work will of atime remain to be seen.

and the luluai of Yakawa.

#### DEDICAL.

All villages on the whole second healthy one un except for framboccia. Many of the children seen badly need N.A.B. injections. Two suspect lepers were seen at MCCA village. Colds have from prevalent of late and a few natives have died from pleurisy and pneumonia.

#### NATIVE POLICE.

Throughout the patrol the conduct of the native police was quite satisfactory. Constable SCAME easily displayed the most fritiality and ability. Constables and KAFU and TUBE are also considered as quite capable units.

#### FCODSTUFFS.

There is still a slight food shortage in some villages owing to the recent long spell of dry weather. This distinuity will ston be evereone, however, for many of the new gardens are alreedy responding very well to the good weather experienced these last three months.

#### CENSUS.

I think I may say with confidence now that on the choic the census is about 90% complete in most of the villages virited. Villagers have been warned that if their name already appears in the census and that if they fail to line, without an excuse for an future census patrol they will have to be punished by imprisonment, I would throught the natives in this strain, if I thought they were not yet rough for sterner action.

Now that the matives have a good it a of lining property ? would suggest that all now books be issued so that natives may be allocated to their proper family groups and also to their own villages. On this patrol I noted quite a few inter-village migrations, which were accounted for by the fact that people are returning to their own ground.

previous officers. In new Tooks issued I impressed on the natives that in future they must answer to the name written in the book.

#### TERRITORY OF MIN GUINEA.

It will be noted in my patrol cover that I have not filled in statistics relative to births, deaths, new names and migrations. Why this has attempted previously I cannot understand, for all villages were apparently in a very unstable state, and it is only wihin the last few months, after a vigorous campaign that the natives are really beginning to understand what lining means.

I have impressed upon all natives that they must return to their owr ground and villages and cettle down now that major fighting

From data collected it will be seen that female adults outnumber male adults by over three hundred. The only female explanation of this is feuds and tribel fighting. Clancing at the children's columns it will be noticed that male children outnumber female children by about two numbered so that henceforth one can expect to see a steady increase in male adults and accordingly a more equitable balance ictneen adult males and moult females.

#### NATIVE SITUATION.

An almost unbelievable improvement has been noticed in the area covered by this patrol. Just six months ago when I first visited this area my party and I had to be on the alert all the time for fear of an ambush. In fact we were ambushed at THGAI and again at AUMON-MHOFI, where regrettably the patrol had to shoot two nations in self defence.

Apparently all old animocaty towards the Administration has been swept aside. Intirely new grouped villages have been built in every case and on the patrolks arrival in most of the places the villagers were already lined. There certainly must be a vest improvement in ENGAI, when even the Volice commented upon the manner in which they lined.

Not one complaint of a Serious nature was made on the critics patrol. Adveror, a few petty complaints were brought to my reties and these were to still amicabli. This goes to show that the natives appear on the surface at least, to be placing more trust in the Administration and are less ready to settle disputes according to their own ides.

MANKA and MANEIPIRMA. When I violed Parola, Rahamanka ment wert for me to visit them. A new road had been cut for over helf the distance and un my arrival thore a new rest house and police barracks had been constructed if the valuage had been a small one I would have immediately concluded that they were seeking prejection from stronger peoples. It hundred and tharty two names were resorted for first census. It is my opinion that Parola actives were instrumental in including Marahama to compare with administration iscale. Maneiralists is not at entirely new valuage in that it is outside the im mile boundary but previously those people had not 1900, for census, they had lived in the bush in scattered house. Now they have grouped hith a valuage of one hundred and twenty people and have accepted an influential man as their loader.

The state of offaire new existing in the greater propor-tion of the "ten mile radius area" gives me great milefaction, and if the situation continues as at present I think that some consideration should be given towards the lifting of the Uncontrolled bun within a six mile radius at least.

#### TERRITORY OF NEW GUINEA.

#### MISSIONS AND THEIR ACTIVITIES.

One of the objects of this patrol was to decide which Mission body had the greatest claim to the villages of Final and MASANKA, places applied for by both Missions. Although the Nack Mission helpers of the Literan Mission have been sending out urgers to the village of FUNAI to try and influence them I have no hesitation in saying that FUNAI should be manned by a S.D.A. Mission teacher, on account of its proximity to EAROLA and KANEMBA, which places both have S.D.A. Missions.

MASANAMKA, being a new village and not previously influenced by any Mission can belong to no other but the S.D.A. Mission if you will agree that a Permit be granted for this village. MASANANKA is a only about forty minutes walk in an approximately westerly direction from BAROLA. The S.D.A. Mission teacher at BAROLA often visits an outlying hamle? of MAROLA which places is about fifteen minutes walk from MASANANKA. I consider that MASANANKA is a safe enough village. In which to allow a Mississ teacher to reside, and have no hesitation in asking that a Permit be granted.

The Intheran Mission has get a definite hold on the village of TAPU and already its influence can be noted even to a very casual observer. ENGAI which is comparatively close to TAPU was granted a Permit for the S.D.A. Mission in December 19.9, but evidently the S.D.A. Missionary did not concentrate on the place, with the result that the Lutheran Mission Helpers from AUMONONOFI have been sending out natives from the latter village to urge them to accept he Estheran distring. When I was camped in Tarai village I noticed that all the natives attended a merning and evening service peculiar to the Ditherans. The native who is acting in the capacity of Lutheran agent in NUGAI village is a very influential man and seems to have such say with his prople.

MUMA village, which is under the influence of the S.D.A.
Wission and which fortunately has a rather able injust, was one of the
most advanced villages seen on the intire patrol. The Mission helper
had apparently iven induced the natives to wash in readiness for the
arrival of the patrol.

On the chole it may be said that the work of the Missions is not progressing very quickly, but it is also pleasing to note that the Missions are not attempting to force their views too quickly, for no complaints were made by the natives.

were a little restless but they gave an assurance that they would remain in the village. The patrol than proceeded and made camp as a rise near the village. The natives stood off 200% 100 yards and would not visit the camp. A native constable proceeded andwar able to gain the confidence of the natives sufficiently to sit down with them. The officer later proceeded but he natives withdrew. They were informed that the patrol head from they inentions. Later food was requested and after a lot of unaccessery delay four native visit the case. They were addressed and informed to gather the They ware informed that the patrol hearth of y inentions. Late food was remember, and after a log of tanacousery delay four native visit the camp. Here eare and informed to gather the requirer and visit the camp. When they recumed however the natives appeared to adapted an intirely different policy. It was assertioned that several of the elder men of the village and had gene into biding when the patrol arrived returned to the village and began in violent language to abuse the pa rol and discourage the jourger men with had shown every ign of being friendly. Some the whole attractions changed. Its carrol was abused and the natives as here of with white arrows, near the camp. There was no doubt that these allows men lad brought on this change on the natives. Selationable did not brought on this change on the natives. Selationable did not brought as for and get it which the party did. As allows having across fixed as it though. So shots were fixed as it was hill reproduced a fixed as it though. So shots were fixed as it may hill reproduced a fixed as it though. So shots were fixed as it may hill reproduced the party go be off, there chief complete to him must have real first and fixed heart the fallowing day the party late party in a officer had alout in he will as and they will not must the practical to develop. They disbolived every as insure of the party in the party in a constitute about its produced the natives who were returning to the across observing food and on his sociation a lately a constanting to the case of a report of tribul fitting elsevers as insured. The fallowing in via of a report of tribul fitting elsevers as insured to the natives who were returning to the across had been assured of the authors who were returning to the case of a report of tribul fitting elsevers day he had a report of tribul fitting elsevers day he had not been about the party inflicated—fine this will be determined the detroying the future confidence of the natives and the natives will be a tribuled of the carrol of the seri further damage being dope. It was hought advisable to state native constables in the functor group to assure that there may bave natives had one form of protection. They are a peaceful group and no difficulty has been experienced with them. As very had attracts as all reversus eccasions obeyed deverment instanctions it was an obligation to the cest to protect them in some way or other. They are a weak group, handfact ited all their bows and arrows. End relied on the administration to wooded them. This is generally the impression given to willages and as chas eccasion it was necessary to ake some action to ensure that the positive could live in come cort of peaceful. The native constraints were given instructions and rectricted to an area towaring the gardata of the uname peoples.

the wider given, rivine! ware nore or less satisfactory. There is still evident an atmosphere of fear amongst the Kaiantu and Uniquier beau villages. The less of village style that until all the prisoners from this village are released they cannot it good friends with the Kainantu peoples. They were told that the prisoners would be released shortly and then perhaps there may be quite a satisf otory tenor existing. The officer did not emission on this position as it is felt that any ottempt to just the matives into friendship will not be lasting. It is thought be ter for the natives to adjust this themselves then they are ready to do so.

the area is quite satisfactory and apart from one or two adjunctions little has happoned, since he last visit. The area is equipments little has happoned, since he last visit. The area is equipmently peaced through by native labourers and miners and is cloudy develoring, however until such time as we can give the native something constructive to de to occupy his time, there is always the passibility of natives being incited into action. Living in cloud quarters as they do there is bound to be occasional outbursts although there may be two or three years botteen each one.

whilling to disques the matter.

The villages to the marth rest wave visived on the shird patrol in the dianon-waste group. The villages ners found, generally to be in a healthy state and the prevailing conductors from to be satisfactory. But or road were consultant consistent to be satisfactory. But or road were consultant consistent to some of the villages and instructions were given that about on head to be given to the reads insedictely, an exception was ranced in recept of Asupia, which has been golyst be an epidentic of colds. They were well on the martin throughts then other rillages proved that the parel visited they are the martin. Everal weeks previously a mative of function was the martin. Everal weeks previously a mative of function with the female. The Francis of the coldent the martin village and the village consovered consistent has the female. The relatives of the female then took as it is now he village for account that the trilage quite some a time before the critical of the patrol. The relating actives, should be actived the village francis that the trilage quite some a time before the critical of the patrol. The relating actives, should be active to the female state and they had vacated the village quite some a time before the critical of the patrol. The relating actives, should be the village and they had vacated the village quite some a time before the following normals without actives the patrol is? One village to the female the coldent the relative the following normals without actives the patrol is? The village was launa, the natives had killed a different the relative will possibility be sendy to thooke the relative.

The second village was launa, the natives had killed a different theoretic the patrol which had strayed into their gradens, then the patrol will be only as female to the coldent the relative will possibility be sendy to discover the relative the coldent the relative and the beauter and the sole matter and the sole matter and the sole matter and the patrol and another pig we taken. The mains after the pat

The patrol made adjustments with he natives of Abenakeou and P.Euccels concerning certain property of the natives which P.Euccels wished to remove before commencing siming operations. The natives were most agreeable and compensation was made subject to the approval of the siming Marden wie was later visiting the area.

The patrol returned to the Fost before completing the area as the District Officer had notified the Officer of his intention to visit the Fost. A patrol will demonde early in May to complete the area.

The area is in a peculiar state of transition from the old order of things to the new. They have come to accept the administration as a permanent institution who has for the time digraphed social life and made a complete change over in the general schane of life. The old order, of exceent lighting and lavaging is a thing of the sast and although outbreaks of lighting any occur, these will have been funned by some of the clarate, they are greatly restricted and a cusual developed from are small quarrels. The administration imposed itself on the natives and has taken away or restricted that which was most important in thier lives, we have continued patrols and constantly instructed the natives to cause fighting and submit their quarrels so expitration, but we have said vary little attempt to engander some index my and feater is another the order of things to the new. They have come to accept the Administra and submit their quarrels of arbitration, but we have take vary
little attempt to engender some index ry and foster it amount the
'tives that would take the place of fighting. From information
lied by the natives it appears that the moles in the past have
very little of the work in the village life. Most of the gardens
wild in grassland and this was left entirely to the foldes
hilst they speat the time making arrows or fighting. Now that
has ceased the male appears to be the personification of
his may be so at the moment, but then he has not had time to
elf to the transition and he still is between the latter of the personification of the person very little to encourage the native into some industry priority in his life, that oc upied the same trempt has been made and is additionally

rearraiting in the higher allitudes, such as Edic Greek. The natives are slow to respond to it, but I do not consider that many more years will slapse before they will be wanting to go. If the mining community would gree their own food requirements then the natives would realise that they could not accumulate wealth without working, as it is they have done no early as the feasles attend to the gardens and to make bring it to the miners and get the trade. Thus they have not been absorbed into the new regime as they are still able to acquire what they cont without any draws exertion and I feel that what trade they do acquire is not appreciated as it is so easily obtained. To work for a north and got the same amount of trade as they get for bring about ten "bilums" of trade does not feater embloyment. I agree with the natives on this point, and until such time as the deamnd for native foods is diminished then the native will carry on as he is. The sining continity is not whelly to blams as this station is at present dependent on active from. It has been the policy of the Officer however in the nature of trade to get as much destructed a trade as possible, such as laws laws, rail, paper, as his is but short its lived and the native will continue ly be driven by incentive sequire more. It would be most interesting to take a census of wealth in some of the villages and estimate exactly how much they really to possess.

core of the villages and estimate exactly how much they really do possess.

The elder souple of the village in the age groups between 20-35 are the difficultivatives to dea with, all ough they appear to be the Alam which have adopted the Administration policy they are the root of most disturbance. They have most the excitates of the fight before the Administration arrived, and now in some deads regret that they had lost it all. He younger grantains generation are much one tractable and can be more early saung from one source to another. Not so the older men. Where is the will sie out end then the area will adjust itself. It is fell though that soon there will be a sponentmone swift, to recruiting by the natives. At the mount they are stagment, there is no insentive to so it are fight and set pigs. Now we don't fight and contact wrong, but sie least we could have done in replace it with some concrete proposal instead of continuity talking to them that to give them I do not propose to go into for the simple reason thatse yet I have not formulated any scheme, but it is a policy which not only includes the Samu but also the whole hinter and areas.

#### NATIVE SITUATION.

It was criginally planned that this patrol should take place early in January but owing to pressure of work from other areas was perpendential some ungrat patrols had be a conducted. In this commands made by the District Officer on the last patrol to this area made in Cotober, that the attention of patrols chould be control on this area, I have done my best to know that intention in mind, but it was unwreidable that three and helf senthe had clasped before I was able to devote time to this work, even at this stage the patrol is still incomplete, but this is due to my returning to the station to attend to other matture and also in importables of a visit from the District Officer. On the completion of the visit by the District Officer, a return is being made to the area to visit villages savisited on this patrol and also to acc that afjustments ands on this patrol have been, or are, being corried out.

The patrol have been, or are, being carried out.

The patrol dealt with the sattlement of four distances in the course of the patrol. These were as follows.

Three matives of ARUNA had attacked several matives of MURAKORA, and had killed one of the latter villagare. I attacated to chain some reason for the attach, but the natives of MURAKORA, and had willed one of the latter villagare. I attacated to chain some reason for the attach, but the natives of MURAKORA as called not supply any recess for the attach, but the natives of MURAKORA as patrol into the area had consensed vacated the village. I was able on the second day of my arrival to take a comman in make the only absented even the three natives implicated in the insident, as I had only four Mative Constables with no, and though these acted untilingly in searching the country I was unable to make an arrest. It is presumed that they have fled to friendly groups submide the area into unvilled seatory and as such I have no intention of proceeding there to obtain them. They will return in due course when a furtion offered will be made to alrest them, these attacks on Samifaca are of long-standing, and previously as MURAKORA was outside the usual group patrolled, actifies was danc. However as the village is now included in the native was date to convince the group was disturbed over the incident, but as there were only those native involved no action was taken against the village 2s general. Also disturbed were the meanty village of University visited the village. Active Constables when meanty village of University visited the village. Active Constables when meanty village of the ARUNA matives located three of this village is a grean and of the same of the stratege of the village in a grean of the village in a grean, one of whom made an affort to strike a Constable, but

the unsuccessful. He was arrested and with the other two natives brought before me. I reprisended the two natives, and then let them free, and the third, the eggressor, was given a short sentence in prison. This was taken to indicate to the natives that they are in me way to attempt to assault Constables.

The UNMAR matives laid a complaint that they were being watched by their hereditary encades, the \$4500Kab, and that whilst cleaning their section of the road they had been insinking at least the complaints and fefence from the natives named and took action usual in the Uncontraction.

The natives of ARAN had complaint of intindation again mainty to shistOff group. They had pose in a body to ARAN on the protest of getting PARDARM mutu, but acre aread. There was little doubt that the reminance was a secondary conditional, the least being to bluff the ARAN matives are secondary conditions, the least being to bluff the ARAN matives are secondary conditions, the name and all the fall until the secondary conditions, the least being to bluff the ARAN matives are secondary conditions, the name and the invoking I was not prepared to put them in prison, as I adopted the fixterland active for the Village of all the naise was invoking. I was not prepared to put them in prison, as I adopted the fixterland active the village of all the naise was live was a fixed that would have been to extreme. In the presence of both law monother the bear and this would have been to extreme. In the presence of both law matives of \$14,000 and the presence of both law matives of \$14,000 and the presence of both law matives and this to hope that the long starling analytic structure, and also as a paid to a starling and also as a paid to fittle parent, and the recommend the natives of UNITARANA and also as a gaid to fittle parent, and the recommend the native of UNITARANA who saw in a body to chalation for the law and the same and the same the same and the same and

on the patrol, natives were invited to give up their bows and arrows, and over twohundred bows and a thousand arrows were destroyed by the natives themselves. I am not so optimistic as as regard this gesture as giving up all their arms, but it was certainly encouraging as they all came from the villages who had been responsible for the unrest. This practice is carried out in all

villages.

A scheme is being made in this area, whereby cash group is to poly casual labour to the Ramm Fost and also as necessary to the layers Agricultural Station. Rack group had been informed of this offices and all have stated that they are ready to co-operate in it. The term will be for one menth only. This may appear to be short but as I consider that it would be preferable to have a shorter period than the established custom of there menths so as to move through the groups in quicker retation. It is perhaps the best from of contact, and as I have proposed the scheme to the matives it will take some aix or seven menths to complete the area. The first batch have commenced work at AITURA, and are from the CUMARA group. I requested themty natives, who readily came forward, and their names taken and instructions given for then to proceed. They agrived at Aiyura, with a increase of 15, namely thirty five algebras.

It will be necessary for the scheme to be crivied successfully, that matives be drawn from groups friendly to clash other and the EURAMA natives requested that they come by thouselves, as they feared servery if accompanies by other villages.

ROLDS

Roads could have been improved and the lower villages had done little work on thes during the past few months. Generally, however they were quite estimatestory and pleasing to welk upon. I have no doubte at all the a motor read could be put through this area with little cost. I was under the impression that a member of the Agricultural department recently nade a report on the possibilities of a road from the Morkhom River to the Roam and an in accord with this orficer that it is quite a practical scheme.

POLICE.

The detachment of Native Constables conducted thouselves in an orderly fashion. N.C. Braker, on whom and arrow was fixed had followed out the instructions given by this Officer that on me occasions are firearms to be used and although in my opinion if he had fired and killed the native I would certainly have defended him. He arrested the native. The Constabulary on the hams have the very strictest instructions concerning their rifles, and the use thereof and I have sentioned this point to indicate that, although fixed upon the Constables obeyed orders.

seriously injured. The NORMORA village had also provoked a quarrel with the BISINNAPI village also over a pundanus tree. On this same eccasion the disput did not get beyond words, mainly due to the reticience of the BOSINNAPI people. The patrol proceeded and awaited the netives return at NROMORA. For several days attempts at contact failed, and sport from repairs to the rest house, which had partially destroyed, no overher action was taken, itbeing thought best to await the natives desire to return to the village and then adjust the matter.

After several days however work was consented on the nearby villages, using NORMORA as a base camp. In this way all villages were visited and the position existing in each appeared to be good. were visited and the position existing in each appeared to be good.
Fost noted, however, was the fact that at each of the villages in which a Lutheran Mission teacher is stationed, the natives appeared less enthsciastic than in these village which are free of them.
This to the Officer, appears contrary to the intention of the Mission the are supposed to foster good relations between the people and the Administration. My only reaction to this matter is that the Mission teachers use the Officer as a sort of bogoy man to frighten a the natives into doing some thing or refrain from doing as set and the consequence is that the natives 'come timid of the Officer.
The matter was discussed with the Rev. Frerichs of the Lutheran Mission and he has given an undertaking to inform Mission teachers Mission and he has given an undertaking to inform Mission teachers that they are to refrain from using the Administration as a scene of schieving desired ends, but rather fester co-operation with the natives and the Administration.

Very good road work had been done, the attendance at centus was lion, and the natives had constructed a new village site and they bud apardoned their habit of living about in the bush. They were reprinted for their part of the invidents with NCR LRA and as is all villages visited, howe and arrows were taken and destroyed. The village of TANARA, which had killed several pige of bunkRax Fluaise and were also hiding NORMOHA natives lined unsatisfactor/ly on the first day but later all arrived and the nesecutry adjustments wade with them.

After a weit of ever a fortnight, the natives of NOBMORA decided to return to their village. Overtures were made and later the natives, with the exception of three men re turned. They were given to understand prior to their return that action would be believed. given to understaxd when to their return that action would be action to instigators of the medition, and they were willing in action be them and the matter concluded. Unfortunately the main person did not return, but others were envolved were dealt with. Later the village was sen again and good road work was being down and the village seemed to be actiling down well.

During the stay at NORMORA one was able to get a very good insight into the adjacent areas as complaints came thick and

fast. They were mostly trivial, such as wife beating, but saveral incidents which are occurred during the past few months were brought up, which in the course of normal patrol activity would not have been heard of. On the whole, however, the area is exite sound, and it has made a little progress since the last visit in

October.

#### TAI-ORA - BAROLA GROUP

This group as a whole have had far less attention than the other groups sentioned and in several respects they are not as progressive. This, I think, is due to their baving had less contact with Miners then other groups, and they seem to be more in their original state. The TAL-ORA village is well advanced and they are responding well mainly due to the buluei who is one of the few powerful men in the area. This may also be said, but to a lesser extent of RAIFINKA. They have done good work and are regular vsititors to the station. The Sheira village is fair, and the OURJAA, which only lately have moved in closer to the more contacted groups. Are absorbing the principles of Administration well. The village of AKUMABORA was found to be in a healthy state and SOBINAFI of AKUMAHORA was found of AKUNAHORA was found to be in a healthy state and SOBINAPI visited for the first time, and census taken, although they have individually had many contacts, some extending to Salamana, are very sound. Other area; and villeges were quiet and villeges were clean and reads freshly out and cleaned.

#### BATIVE SITUATION

#### KATHANTU - PUHANO GROUP.

As was reported in the December Monthly Report a disturbance bad accoursed early in that period between the pathwas of UNIGOUPATEND group and KAINOA Group, in which three natives from the latter vilings were shot by the for or group. - patrol had visited the area on recepit of the information, but spart from four arrests little could be done to adjust the matter as the natives had left the viliage and were living in the bush. Native Constable EANOWAI, who is married to a female of the group proceeded to the area, at the wish of the natives, and arranged for them to return the their village. The patvol had, as its initial work, the adjustment of the incident. On arrival at the village about 50% of the natives of the group presented themselves for common purposes. An the following day a further 10-15% had returned and it was proposed to adjust the matter. The natives of the two groups were assembled and it was discussed. The Natives of WhitMARWASKU group coused the natives of KAINOA or practicing revery and laid the blank of the death of the MINOA or practicing revery and laid the blank of the assembled against them but raised to combor charge. I asked the CAINOFERSUS the hadden by consulting the census book) as a result of the dipting, the KAINOA ratives refuse the officer for an anicable seminate why the matter was brought up before the officer for an anicable seminate and the natives when nearly of the previous securions they had made papersentation to the buffeer at Renu but me achiral was thought when the responsible for the revious securions they had read papersentation to the later own hands and avenue it. They had kept their nord and had made a datarily attack on KAINOA, they would take the law into their corn hands and avenue it. They had kept their nord and had made a datarily attack on KAINOA, as a result of the active resemble to make the law into their own hands and avenue it. They had kept their nord and had made a datarily attack on KAINOA, as a result of the batter of the active of the attack and

Che can quite realise the visupoint of the natives in the matter, particularly, when it is realised that the bowner had given way to the sorterer. It shows her easily the sative will react to the psychological aspect of sorter, which reacts and attempt to dismise them with some casual commence intended to undersine the beliefs in them officacy of sortery. The classification and analysms of the phenomena, which reacts upon the native is at times difficult to assess, as set are at one and the same time attempting to undersine it by semestry imprisonment and by persuasion. Therefore what may be satisfactory for one group, may be producing a hardship in another, as in most cases the allogations are sade only after the death, illness or disease in occurring or has accounted, and the accused had no intentions of practicing his art. He has become the talk of the village overnight and see added power. If he is guilible he will boast of his achievements, then the evidence against him is concrete, but in most cases he is far to thever to be caught, and he remains silent, preferring fanc to come to him rather than estentationally seek it.

The main reads throughout the area were satisfactory. Good sprk had been done on clerning and re-draining them as well as maintaining the grass. The villages are all now composted by reads although this may not be so evident if one unsepactedly arrived at a village without the natives being given notice. Generally, however, they are mept fairly cleaks RESTHOUSES. The resthouses are in fair condition. Although it is into for each village to construct a resthouse and pertinent buildings this has not yet been as explished. phy Mative Constabiliary setted in an orderly assumer and although they still do not six as freely as one would like to see them with they local actives, there are beginning up realise that every native is not a potential enemy of the Administration and therefore one to be treated discourteeurly. ANTIVE SITUATION.

Like patrol agt out to visit all villages in the area to the Merth and Mest of the Mean Post but the patrol was ourtain and allestion given to the visit of a/A.V.U. Vial. accompanied by this efficer must of the villages which is he been proceed to violt were passed through and they natives had seembled at the willage.

the areas were, an a whole natisfactory and energy for included cases the natives were living in harmony with their neighbours. Several weeks ago there had been also and killer by a Rative of Augustina native who had been shot and killer by a Rative of Funance. The affair had become with a minic was setupout the monkeys of each village the ensure for the entertainment being plot of grand over which the natives of Funance have recently taken to planting and which is arrows the particular village. During the playing of the natives which lasted several days as one suffered injuries as the boss are very moult and the arrows are small pieces of reed. Instruction have the past trained a larger and heavier reed and sharpened the end which penetrated the Exercise of young native of immention. The chier infives of both dillages had lent measurement to the encounter and were no doubt hapling that it should develop, adjustments were reads and the area has settled down against

that it should develop. Adjustments were made and the area has settled down agains.

The villages of Pursu and Tata were in condition and except in the nemespherance of the native responsible for the death previously mentioned all natives were present. This is quite contrary to the experience met with by the hadings applicant attached to know a lawing. It must be taken into accome, that the natives were under the impression that if they suppearer, with sares etc they would be sent to mean hospital and any form or detengion in punishment to these matives. It is not the fact of herd work of imprisonment but morely being detained which forms the punishment. This was explained to the natives.

The village of milimaisa has been remarked convenity as one of

to the natives.

The village of minositys has been regarded gerrally as one of the nest servous vilages in the areas file has been due to a migration which took place several years as of a group which had been given trouble. There being near Milmoirs and always being grouped together as one village has brought this stars on the local natives for heavy group always fail to line and only on the previous escending have they itsed and their names tolens. May have now left milmoirs and have cettled in an the Manushigulin roofs.

The village of utalify had previously supplied carriers to the states and this newton was adjusted by all natives returning to the starion as a colored heir terms of works, it first then are no all natives all natives and this natives was that the Maines matter was preciping screen, and the officer may take but great as hear or so all natives liked for carrier that the Kaines matters were preciping screen, and that the Maines matters were preciping screen, and that the Maines matters were preciping formations and stars than the came take the stars of the stars

for his famely and near relatives to leave the area entirely and penetrate into new country. These migrations have encurred upon the

penetrate into hew country. These migrations have securing upar the past tro to three years.

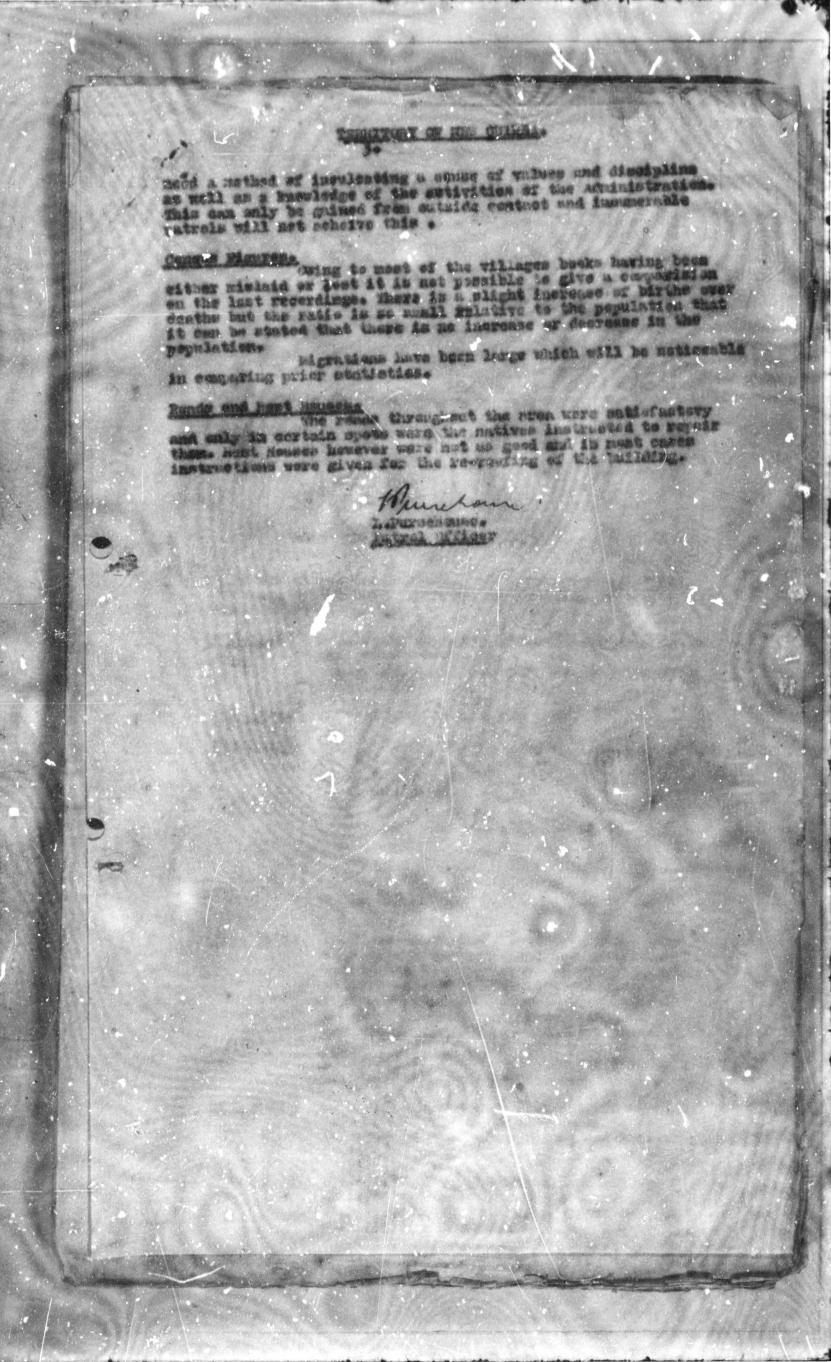

The villages of Abchakema and Anonastema were most entising tery. The former village had laid a complaint against purposels for putting hales for testing purposes near their gardens. And nather was adjusted by P. Muscels buying the gound at a price which was agreed upon by those interested and witnessed by the Officer. There will be doubt be further adjustments necessary in this matter at a later date if the piner decides to work this ground but it has been left in abcyance until it exists as it yet doubtfol if the miner will remain.

The small village of Aponentems was visited and found to be eatisted to the country.

satistactory.

these were the only villages which here visited in the course of mernal duties but as reported earlier most of the rilleges to the east were visited by the Officer when accompaying of .. Della Viel in course of the utt mpt to obtain local matives to work at Edie Creek. The Willages appeared to be in a must natiofactory-condition.

Severally speaking the villages in this section of the hours are fairly well developed and it was nest regrettable that the natives did take the opportunity to go to work under the conditions affered. They

#### MATIVE SITUATION

The patrol set forth to establish friendly relations with the HORACOR group and each also to contact groups on the most side of the Lamart divide. The HORACORA matives most the patrol on the read approaching the village and was velected anthusiastically by the natives. Owing a disturbance within the village itself several days before the arrival of the patrol cortain natives were absented they serve addressed that about 60% of the natives had an abled. They serve addressed and atrees and laid upon the contation of tribal righting and the evils attendent upon righting. Also an attempt was made to inculoate the administration ideals. The natives respected well and several disputes were settled. Natives from Mairisma and other groups Guelated in the settlement or old disputes. The patrol was trable to contact the matables matives on this occarion and active the distributed the harmonian and it can be assumed that the group in nor willing to about Administrations they attied that they regrested the previous disturbances and chetsed that they regrested the previous disturbances and chetsed that they had no distort for them seems.

other areas visited were all engaged in tribel fighting mostly with hereitary ensaies ever the divide. The fighting score an every day occurrence with this group. The natives were advented and etyess laid on the point that they were on no account light the controlled areas. Apart was one of two consequation were unider personal matters about either pigs or woman, they seemed little interested in the villages which lay north and north-west of the It is not anticipated that a patrol will cross the Lamari divide for young time and no notice was taken of their displace with areas ever the divide.

In all villages the contact was good and the natives me showed no feer or nervaunas over the visit, and lined thout any repeated callings. The area will be revisited in three months time, as patrols will have to be made to see that the natives as not attack the groups already under administration influence.

#### BATTVE SITUATION.

The patrol was erried out on a normal basis, the prime objects being the settlement of disputes and also for the efficer to complete the initial patrol of the entire area. So census recordings used solventhough in several villages the causes was called over. This was mainly to check up on attendances, which were in some cases must restatisfactory. The patrol saited in most village for quite some time before an adequate number limet. Approximately 85% attended the dense becomes the major than made in the leaser controlled areas. It is difficult to understand the aversion the natives have for forming lime completely. The previous recording of the officer in sharpe pagesting this area and compas was that all natives in one village had assimiled and were calting for the atrols arrival ( Gadaup Patrol Report regrandy 193). The position is difficult to understand as the villages such as Justification is difficult to understand as the villages such as Justification is difficult to understand as the theory was a patrols of years and it is surely time that the nervousness was overcomes. They did not appear to be timed but that they were apathetic and adopted this method of pageive relationer. There was no reason why certain individuals failed to resistance. There was no reason why certain individuals failed to line as they were not involved incitner internal or external disturbance paids would tend to make they afried of line on account of saing detectal Unit at wardings have been given to the natives and it is proposed in fut ure that some action be taken. They cannot be continued by war

and still fail to appear, without some action being taken. A final warning was given to the nations, that if they did not appear at future census takings, and there was no excuse for failing to do so, that action would be taken. I would not class such behavior as being that from a controlled area.

The village which oppeared from information received to be the trouble makers in the area was KUNDANA. Thuse natious have in the past caused much concern, and it seems it is the wish of other village to acquee them of some misdeed or other even if they have to go beth several years to do so. There is no doubt that they have been agreeding in the past, but the accustions brought aginst them by other villages appeared to be without foundation or that the trouble occurred with the accusers in the first instance and they were attempting to solicit administration aid to repay pust offences. The fighting which occurred several months ago between AROHA and KUNDANA was from information supplies by both parties due mainly to the activities of the ARONA natives. These have been somewhat neglected and have had a free hand in local affairs.

Norcery accusations were appeared, as they always will be during this period of wet weather when Elemens is more common and the death rate increasing. Several of these matters were adjusted, other had to posponed as the interpreter with the patrol became ill and I was forced to return him to kapu before the whole of the area was patrolledo the ARDHA natives were conacted but those to the north west, 3555.00 KAI-ORA, and BAMPAMARI were not contacted.

At was found that several of the larger villageo, 3 ASSOURA,

OUMARA, PUBTIBASSA MAMARAIN, and ARUNA mamp are desprised of sevral large hamlets, eacheous distance away from what may be termed the main village. It has beaudecided that in future these villages to sub-divided and that each large hamlet operate as a village. This cill bring Administration contact closer to the individual and a cetter understanding of the relationship existing between the present hamlets will be obtained. More rigid supervision will be able to be maintained and taluets will have a better grip. Most of the hamlets particularly the larger ones are nominal control of a Lalunds.

Apart from the uncattefactors element preventing in regard to census recording the area made be stated to be jettifactory. The natives are living in cordial relationship with anier metablesses.

Apart from the unsatisfactors element's revailing in regard to census recording the area made be stated to be satisfactory. The natives are living in cordial relationship with thier neighbours and there has been little disturbing influences. It is remarkable how close it is to the Markham and get the wide differage in the present state of the two areas. One would imagine that the contact between the two areas would have brought forth a better state. Particularly at ARONA as the Markham villages are only about 4 hours away and there is quite a lot of visiting from the Markham to AROMA. A summary of the state in each group is given hereunder.

Viliago in datisfactory order and a fair state of affairs exists. Read well tended. An inclination to become decompralised but it will have little effect on the solidity of the Fillage life.

These natives appeared timid. They failed to line completely only about 75% being present. The village as at present is too divided and a reconstruction is being made to form several villages from the large group. Read well out. Rest house delapidated and resided repairing.

Same statement applicable to BASSOURA as to OMAURA. The village at the mement is too unweeldk to be very satisfactory. The hamlets to be incorporated as villages with their own village chiefs in control. This will make for more intensive control.

These natives are in good an pe. The contact with the more advanced villages of Kambaldah and Markham River villages has brought them to a marked degree of control. Roods, Rest House and buildings

were in good order and condition. Quite a number of matives absent when the patrol arrived attending a Mission ceremony at MaMPIL. All arrived back later in the afternoon.

NORARI and NAMBAIDAN.

Host satisfactory compared with the Rama standard. The
previous occupation of the village by Lathersh Pastor will evident
and the villages can be put outside the term uncontrolled. Nords
well out and all matters attended to.

The course control in thems willage to complete They appear to be saftering from sores etc which seems to be making them listlems. Those natives have more to do with the Eurkham areas than the Enset, which accounts for their much higher state.

had been paid to roads but outside of this there is little to be outdiscount the village.

A large group needing sub-division. The present group is now too large as progress is slowly taking its course and the red arge to cap-divided is being taken so that control will be firmer. Apad work fair.

NEW AND AND THE SET OF THE SET OF

This village needs constant visits to give the natives more confidence. Many matters brought up for minguis sutiliament and they should good control once the initial contacts had proved subtafactory. They probably were every of the accretizate make by the BASSOURA natives agisst them.

Village Visited for the first time forever two years. The natives were inclined to be timid and only bout70% lined. They have contact with the market and should be in a better state.

Both villages is a sathefactory state. House were well tended and were quite confident. The latter village perticularly being progressive.

Roads throughout the entire area were most pleasing. Several repairs were offected during the patrol to neglected putdless but on the whole the natives seen to take care and pride in their highespys.

The officials is the area were found to surpass those in inner famu area. They have power and prestige and generally work well and attempt to maintain order in the villages. Many officials from all villages accompated the patrol for several days and at one/stage 13 lulusis were present for the ceremony of lowering the flag.

# NATIVE SITUATION.

The patrol was of a normal routine nature, attending to end adjusting disputes both internal and external. The general attitude of the natives in the farthermost section of the Roun Irea, FUNAI KANARA etc, seems to differ in many respects from the areas closer in to the station. They seem shy andreticent and have no doubt an inferioty complex due to the lack of trading facilities with the minors of the area, which are open to most areas. This obstacle will be now overcome, however, as E. Ubanka have moved his camp to a site near the village.

other villages which have been trading with miners have reached a fair stage in the Assimilation of Government ideals. In one particularly, the benefits of the context appear to be more harmful than beneficial, that is the case of AKORA. The natives realise the dependence of the miners upon their good graces for adequate supplies of native food and there is a faching permenting the area that they can obtain all they desire if they came to bring food. The failure of the AKORA natives to comply with an instruction to maintain a small section of the main read is due to doubt to the tendency of the miners to satisfy every whim of the natives so that he wills continue with his trading pursuits. Not only in the matter of reads is this attitude manifested but in the general upholding of administration principles. It is noticeable in the trading of women and betty the fire matters which the manifested in the trading of women and petty the fire matters which the manifest have to be wrong, but they are wise enough to realise that it is quite unlikely that it will be reported as trading activities will come immediately.

The patrol mt2 Pitrol Officer Hamilton and incidents

The patrol met Patrol Officer Hemilton and incidents which have been causing friction between the Barola natives (Ramu) and the YULIEDFI natives (Bena Bena) finalised. This matter has been in hand a tr some time and although of a previous visit on attempt was made to clarify the position all the known facts where hat brought up. On this secassion however all differences were settled and the meeting concluded with friendly gestures by both villages.

Sorcery assusation were prominent and scaroly a visit to a village was concluded without some allegation being made. All cases were satisfactorily adjusted, for the present at least, but no doubt, when another death occurs there will be further presumptions of sorcery.

The Russ natives are more individualists them is generally, accepted. The idea of a control figure, responsible for the maintenance of order in the community is not compatible to them. The instilling of the pover and prestige of the Luluai is therefore no easy task and in some cases he is merely a figure head for the receipt of orders. They do absorb ideas collectively but only after the individual have given thought to them. This attitude is also noticeable in the apprehension of wanted notives, and it is very rare that a native will assist in any manner to apprehend him.

The position in each village appeared as hereunder.

BAROLA. Afair state of affire exists in this village. The distribunces with YULHUFI which and existed for six moths have tended to make the natives reticent.

KANAMPA. The natives still in a semi-primitive sate compared with other creas. Timid and shy but appeared to be willing and once the initial shyness were off showed much ontonsisem.

rusal. Under partial control of the Lutheran Mission. The natives have no central village and therefore are inclined to be timid. The village is in good order and beyond sorrery hompiaints there was no dispures to object. Will probably lose a lot of their timidity show triding relations with F. Ubenks are opened up.

AMORA. Ir many respects advanced, but in others they are slow to fully group the principles of Administration, Appear cullen and ely, with little daire to co-sporate.

YANANDA Bader the influence of the Luthersm . ission. They reflect a slow advance of Administration polcy but what they have absorbed they keep to. Zenor in the village very good.

one of the rost advanced in the area.

DMINISTANTU. Village in good order.

A system of improving inter village communication is now being made with the construction of roads. In this area the only good existing has been the main highway to huma Bona. At all villages the roads were marked out and worked commenced on them whilst the patrol was in the village. This was done to see that the correct ideas were put into their done trustions.

history.

Both the Lucheran and the Saven by Adventicts are operating in the area with more or less favolable success. The natives do not appear to take air ngly to Miscian activities, and although they do not resent them they take them in nost onces with calm indifference. Their presence in the villages has I think a restrainting influence.

The detachment acted in sultable manner although there was little to do. An attempt is being made to inculoate into the Folico that they must assit the local native and also get his confidence which I don't think exists at the memoria.

the Heavy rate in the normings Proceeded to TPH. Notives addressed Actumed to Statio at 7-20 to tonduct Labour work for Samooks September 19th.

# HARIV MITTURE

The patrol wer of only three days daratton and the object of the visit cas to give the native confidence in the officer. it had been noticeable that the arms was not sure of the of the and it was thought advisable to conduct a short patrol through the area and establish possidence in the muliver Defore any actual

whilst in other villeges, there appeared at first suches recentment. Before the potrol had left the village, the atmosphere had changed. Not many adjustments were made on the patrol as they were not brought forward for sattlement although it was known to the efficer that certain surcery found stilly existed an attempt was wide to Indemntation native's bolief in the efficacy of sorowry. In the past year six natives of 18th have died, due no doubt to colde, but the natives have recorded the doubt against one.

have recorded the double against OGU.

The area is the most backward of shat may be toruse the inner Rass group. They have not completely absorbed the Administration ideals, and are still in the period of transition with a lating for the restoration of the old order of things. Their compact with places in the past has been limited and it is, perhaps this appears to give the indications that the matives are not seatiful as yet.

The personal attributes of an officer are analysed in thi seres to a greater extent than elsewhere in the Hamm, and it was for this resent that the natives were not instructed in many mattern which needed attention, such as reads, rest houses, etc, but that they become associated with the officer in a more personal namer. The succeeding patrols to this area should be such more satisfactory and the disputes both between individuals and villages will be brought forward for settlements.

It is pointed out that the natives prevailing in each village is given. It is pointed out that the natives present note of groups paragings than of village compositions.

YANDONNA The most adapped vill go of the area Confident has been established with the natives and on allow t had been made in the peat to attend to reads.

The death of six of their number during the year has tended to fester soresty accusations. They appeared timed at first but later showed more confidence. Roads could have been improved although attention had been given to the rest house.

They were at first inclined to be shy and they seem to need a lot of contact before they will assist in the administration mark, formage it was due to my muving visited several areas to show they are not friendly before arriving at the village and they were afraid of sorcery allegations.

These native took quite a time to appear but muce they ald there was general entherises . About twenty five per cost of the vilinge sere absent standing a limited coletration. The group has possibilities of improving than the abser aross.

These natives were timed at first but later showed confidence and discussed certain matters with the officer.

Comprises of four large hamlete along the river slepes. The natives showed crafffence. The lathersh blacked had a station in the area and theory work in general conscillation is felt. The village is the hame of sorvery but together with the Mission and the Administration attaching the problem it is slowly being defeated.

Roots in the area had not been repaired for quite some time and were in some cases only tracks. O. & cubequent wish this matter will receive attention. Connecting villages in the TAPU area the paths were well out and attention had been given he their will emence.

AUG. 18tho

Left UNATE and proceeded through FURAUI ond thouse to AL-MONTANU visiting groups or howlets of the vilings enrants. The vilings of AL-YANITA visited and matiwas addressed. Proceeded to Rama station.

#### BATTER STRUCTURE

The native situation in the cost \_\_isted
was most satisfactory.The wheit was parely routine and the natives
in cost villager were instructed in the administration
policy.The response is each assummity was pleasing... comms
was not taken as it is necessary for the natives to have more
confidence in the officer than at present. This was sy first
visit to the area and it was only natural that the natives
would prefer to seek the vatch the options of a new officer
before they would count these elves in spice of this many
adjustments were brought before the officer for actionent
but the adjustment on a fiture visit the afficer will be presented
with disputes which will relipse the recent mettals which
were adjusted.

hen visiting the area it is difficultie under stand sky the area is classified as amcontrolled. The natives readily assist in all matters pertaining to Government influence and the work as roads bridges rest-income ato. It willing accomplished there is a much more healthier tore in the villages and hamlets visited then there is in any of the taxable villages in the Radang sub-division. The natives present their eases for nottlement, village officials have the right ideas and generally there is no hampering with the truth, nor an attempt to hide information which is prevalent in Madange

the patrol was the equatitued power of the village officials. Care was taken to see that all lalamis were the excepted leaders in the adminity-like is following as the policy of the former officered during the past five souths was inculenting the position of villages officials into the minds of the savives. By the establishment of firm cancellates sameunities under the real and seeinal head control one by norse easily obtained and once obtained the community easily handled, he which in the area are a strong virile managed in all cases it appeared that they were rigidly shayed. Farticularly is this so in the case of the largement lawest whose sutherity and power wer surrounding groups is well constainted. Were in being taken to see that chiefs do not abuse their savers and demand exercises priors for the illigit use of their authority.

Sefinately controlled, so far to it is possible to get it in this area, due to the lack of open-tunities for these waives to be absorbed into the new order of things. It is respected that have notices common find employer t in other historiant areas as this would greatly assist in the consplicating of the spea and would bring forth a spirit of antual co-operation, as it is now the notives have progressed, but in comparsion cities other areas the progressehas been due to the untiring efforts of former officers. Other areas and districts have been consolidated by former indentured indexern she have returned none bringing with them prectige power and authority atives look with all upon natives returning home after the initial content with the European all to then caster to inculents the ideals of authority-taking as there is not only a reliable native in the village but Pepurks can be autostaniated by the native in the gen of everyday life if the consumity, de reclines and knows right from arong apart from the social behavior of the area.

334-175ke

Proposeded in light rain to Pullana Notives edirected Several complaints adjustes. Proceeded on to OHARTU bulld composite villages, several complaints adjusted

which is not always in accordance with the accorded form of right and wrong. The Home natives have been unfortunate in the geographical location in which they are settled as it practically forbids the employment of labourers from the area into the lowland and secondly that the only development where work can be obtained is at the very door of the villages and the employers are loothe to have working for them natives who ere so envolved and keenly interested in the social and political life of their village. Alight disturbance in the village and the employer lagge in the labour for several days whilst the musives return to assist in the settlement or join in the feast-it for this remain that the local labour has the reputable of being unsatimmentery-if the natives could obtain work further in land where their health would not puffer, the area would soun he fully constolled and a truer accimilation of the Adoles-

istorcion policy would be obtained by the native.

The use of Bona Bona natives in this area is deplorable as it will tend to give the lucal native the impressionthat eark is unnecessary. The natives are able to obtain sufficient trade for their needs by trading native foods to the minore

I would suggest that the Uncontrolled areas Ordinance relating to the employment of least natives be waived in the Ross area amplicare will then have the apportunity of

A CARLES THE CONTRACT OF STREET

haft draw life to ATTACAMENT STREET, AND THE STR

**を影かり、水、水流が**所

The tener existing between graups could be improved. They are now in the transition period and the although the how and arrow has been supercoded in some cause by legal adjustment many of the matives have resorted to the practice of servery for the settlements of disputes. Future patrols will atreas the need for the eradicating of this evil which can be achieved by fostering a spirit of matival co-operation and also by the desire for all natives to have a seminon medical of expression namely plagin are tarious linguistic boundaries must be broken down to some extend dy all the area is fully controlled. The former ensity between groups still exists and old scores have not in the native aims been sufficiently and ald scores have not in the native mind been sufficiently repeid.

101.1034

The detachmeny of Sakire Constables in charge of L/Corp.Silis carried out their duties in a more or less estimatory number. They do not show the necessary enthances in the/r work to orig forth high praise.

roots lending from the main highway to the respective villages. Rest houses were well maintained and little advice sould be given to the natives on their upkens,

ridges arrived at the village of Olkaka-The village was coerted. An attempt was made to bring the natives book to the village but no sign was seen nor no sound heard of them. The patrol then turned back and striking to a counterly direction came to a large samp. The pairol moved around the outshirts of the symmpoluring the journey a small cluster of houses was seen in the symmpoluring

burning in the less-to's contracted by the Morace's ... burning in the less-to's contracted by the Morace's ... who were obviously in hacte in huiding them. The Pitrix moved along the southern edge of the armp and arrived at the village of Moracora to find it deserted. The village appeared to have been deserted for about a veek although the gardens were being mode.

E TAY OF VIOLENCE OF SERVICE

auc. the Remained in the village and an attempt was made to gain contect. The matives succeed the requests of the potrol in an arregent and aggressive manner. It was then established that the natives had constructed a site in the centre of the remp shich was heavily surrounded with pit-pit-

During the afternoon contested was established with the notives of MANONA a village also in the uncontrolled area and without one form of convol. The natives were friendly disposed towards the patrol but it was later ascertained that the Boracore natives had three days previously establed the village and five natives had been killed.

puring the night a native presentally of the Mortours group visited the camp and was apportently about to ignite a house occupied by the expriers when he was disturbed and he dispressed in the darkness.

The patrol proceded to the new site situated if the scamp. Every conceiveable object had been placed in the way of the patrol and attempt made to ambush the party. The patrol reached the first hamlet and proceeded to the second group of buildings when the patro was forced to fire on the attachers four natives were shot before the patrol knowns able to reach a secure position. The natives had advanced before

Four natives were that before the patrol sheres able to reach a secure position. The natives had advanced before the patrol and latter were seen proceeding to the nountaine to gain shelter with their friends. The patrol returned to the former site of the village as it was thought that the natives would return and contact would be established. No contact was established.

The patrol moved to the former site of the Cirara main's natives and it was ascertained that they has built a new village practically adjoining the controlled village of ABRIGAThe patrol visited the area but the natives bid. The abeira group she were visited were instructed in Sative Administration and also informed to tell the natives of Cirara to report at the post.

The village of TABCRA visited and natives spoken to regarding native Edministration. The latter villages are under a strong degree of influence. Seturned to the station.

#### NATIVE SITUATION.

The attack by the Expacers group is not considered serious. have notives have in the past refuse Government contact and havebeen containably harracting the nearby cone troicd groups. The area is the last goups before the divide and it is considered advisable that the remaining villages in this group numbering four or five be brought under control. If this is not done the native vill continue to right the areas already under control and thus errors a most under the areas already under control and thus errors a most under the atmosphere.

Contact was established with the CIRARA group on the 7th inst and all the make members of the village visited the station. Although it appeared as though those natives were involved, as one of thier number was coaght in the act of igniting the state at alyura, the natives have assured the mix officer that the native was at that time living at Moracora. The actions of those natives number went to the occurred

tends to prove that they were not involved but socing that one of their men had been caught that the responsibility was on them. The villagehar new resumed its normal routine and as it has been brought near the gully controled village of ARSIRA Se further trouble is to be expected. They also have been reided on many sessions by the Moracora gampa \_comp which is most powerful.

The village of DIRARA was valited and is in excellent

condition and most pleasing.

It is belived that the siyura incidents are now closed and no further trouble is expected, he area will be again wisited to follow up and conshidate the area and it is considered that contact will be established and the area mere rapidly brought under control if the visit is followed

Ho information of any reliability was obtained as to the reasons for the incidents at Alyura-Although it was at first believed that events during the visit to the area by Er-Jahlouseman Forcatry Inspector were in some ways responible for the attacks I am now of the opinion that it was due entirely to the natural inclinations of the nativos and as this is the season for fighting-akl gardens having been ploated and no work to be desceased one without cause or provocations.

Thereday 20th July. Proceeded to Rema Station visiting

# Prior incidents giving rise to tribol Unrest.

The Inlant of Barola had been appointed gausdies over one of the natives in the village nother native of Unchain questioned his right to the gausdiananth of the child by performing a correspony of inclining the septume of the acce. The Launi remonstrated with the native who retalisted by absorbing the Inlant in the log. From this invocate willages took ander cach one attempting to draw the other off appears a though bankla winned to have a general conflict. In the Commetable obstituted in the vicinity attempt to intercede but the natives of University information that he would be attacked.

The arms in now settled and no luther trouble is

Hoticanble in the Willages on cither side on the boundary of home and Bone Bone was the feeling that natives had for each other. There is no natural feeling and sook side are afraid of the officer from the other aub-division, in attempt was made to promote more confidence in officers generally.

> L Purchaine Officer in Charace

TERRITORY OF NEW GOLNEA

M. 12/2 -District Office, MADANG. 21st. June, 1939.

MEMGRANDUM TO

Officer in Charge, RAMU.

The following extracts are from Patrol Report M. 67 of 1938/39 by Assistant District Officer Kyle and are forwarded for your information as they deal with your area:-

\* Kainantu. The whole position in the Upper Ramu area appears excellent. Natives seen were under a good degree of influence, all groups are road connected, & main routes are well graded and maintained. Only two tribal disturbances have been reported in the last year from any area under control, and these were promptly dealt with. I gained a strong impression that, although the Upper Ramu area is compact and comparatively small, the officer in charge has too much to do. There is a large native population, but labour inspection, permits, post office, and other work in connection with Europeans takes a great deal I would suggest that, if at all possible, a Cadet should be posted to Ramu. The area controlled from Kainantu then could and should be extended to include Finintegu Post and the Kamunantina Valley to the Dunantina kiver where a natural language boundary occurs. Finintega is about 8-6 hours from Kainantu and 2 long days from Bena Bena which, at present, controls the area. This would considerably relieve the of icer at Bena Bena and permit him to give more attention to areas such as the Atsare valley which needs considerably more consolidation.

It is suggested also that an early change of officers in charge at Ramu would mean retrogression in the area, and would annul the effects of a great leal of hard work. From experience, the writer can affirm that the Hoper Ramu are a suspicious and difficult peop and their confidence is not easy to win. There were few if any suggestions which could be made to the officer in charge.

Roads: From Kaigulan there is again practically no track to the Ramu divide. Mative can not be expected to make and maintain this track without supervision, and payment, as some 20 odd miles of bad country without population have to be covered. Throughout the Upper Ram: area all tracks appear good, and considerable work was in progress during my visit. From Kainantu to Bena Bena, and thence to Garoka the road is excellent and further work is in progress." progress."

(H.L. Downing), Acting District Officer.

To Unpoping Village. Consus revised and conserv multipes attemded to. Injections gives. Hallyum of Sasseura Countains and Consura came to most patrol and somepany 18.

22mdg To Inkanampa Villago. Some timidity due to edjustments with Alma. Theft adjusted and Gusseus checked and natives addressed re vacious matters. Improving. Best houses in good order. 23mds

To Tombonakonn thance Yatil-ora Villages. Elvellert rondwork.Compus takon and adjustments: made. Injections giving

Rashs To Burahuma Group. This is the second visit of a patrol and considerable timidity was in evidence. After some time contacts were made and food brought to the patrolletives addressed on Administrative matters. 25the To Cmaura and Makeyana, Here the census was revised and pig theft with Sassaura adjusted. Roads bridges and rest houses in excellent order. Centralised group urged. Food to embarramerout brought. Very confident.

26the To Kai-ora and Domponeri Villages.Gensus checked and adjustments made. No timidity whatever. Injections given. Roadwork attended to.

To Cominet the Andena groups. Very nervous as they have not been previously visited and negligible contact only was able to be made. Severtheless it is thought that the is paved for future visits. Journey made to Communicate Communicated and serious matters actended to. Communicated and suring the month had engaged in a skimmish with Kundana village. Full enquiries made and preliminary adjustments made. To be fully adjusted intertimidity.

28th Census chroked and villages visited of Sassaura and Warinkapa. In very good order and readwork and new rest houses built near the villages. Minor adjustments attended to. Injections given.

Mar lote To Arang where the Consus was revised and adjustments made. Unia hamlet visited and ctasus checked. Injections given. Boundary matter with Sassaura edjusted.

We Sabias Here backward than Arms. Census revised and Garden matter with the lower village of Gammuan adjusted. To Koraka. Injections given census checked such morriage adjustment.

To the lower villages of Dompit and Wampul. Wempul carriors doing perterage due to fear of contraction of Malaria by Rama carriers. Geneus checked and Massion of Lutbern's Sectinspected. Adjustments between Dempit and Wampul of marriage matters. Readwork form the mantain excellent.

51318 To Omnouse where the Omnouse and Merit Villages were assembled sweiting patrol. Census checked and injections given. Matives constructing centralised group after three years of urging. New showing good improvement.

Return made to Asm (Kombaidsm). Gensus and other matters attended to. A "Lly controlled village.

7 taks Journey made to Dombitaka. Excellent progress. Compus shooked and injections given. No adjustments. Estives addressed on progress and Administrative matters. To Puntibassa village.

Commun checked of Puntibassa arl Yampara. Two complete centralised villages have been formed. Injections given villages inspected and various drainage and bridge work .beonesses but betseyages

9824 To Binamarian. Very satisfactory and under good everol. Randwork will tended. Censes revised and boundary mutter with runtibassa attended to. Addressed is various matters.

To Manurain and Aya-ara, With return of indentured labourers a consequent improvement is to be notified. Census checked sinor adjustments attended to and Seventia Day Adventist Station inspected. Roadwork good.

To Rundama Village. A sentralised group has been formed. A number of new nomes added to Genesia this checked and work commected with their recent assturbance with oneninka strended to. Adressed re this and various matters.

Finalisation to be effected at a more opportune time.

12th: To Onemakuspa and via Wopepa. Census checked at Wopepa New rest houses built. Hatives very confident. Minor adjustments: Injections gives. Census revised at Onemanuspa and natives addressed re general and administrative matters. Head not good and natives put to work on this before patrol left village.

13th. Return to Rama via Alyura village.

Petrolling was on a normal routine basis except for the Enquiries and tentative adjustments of the disturbance with Onemipha. This was a localised matter not effecting in the with manipha. This was a localised matter not effecting in the slightest any of the other villages. The fresh contacts with marabuna and andena were also outside the sphere of normal routine. That the fierce linguistic barriers are breaking down is now in rvidence. That the O-Mara, Sassaura, Chaminka and Inkanampa inlaid and Natives came to meet the patrol at Akana speaks for itself. Also that the Binamarion, Puntibases, Marpara and Mundana people met the patrol at Korake is further evidence that the suspicious, recembents, fears of sorcery and hostility are much decreased since the last patrol.

The natives are journeying much more freely between the villages. Recently, Koraki, Comura, Sassaura and Puntibases natives Recently, Koraki, Comura, Sassmara and Puntibeses natives have several times visited Rame an increase in confidence, as they have to traverse the territories of fermor enemies. In spite of this much work remains to be desc. Here it is not In spite of this much work remains to be desc. Here it is not necessary to teach all the minor formalities and actions that the people of the Ramm area, the are remoter from contacts of the civilized Markham River people, need.

Centacts with the Markham River people are increasing very mach, particularly at was Binemarion and Mamarain.

The most progressive villages may be said to be Dorbitake.

Tembonakens, (spractically new village) Rigmarion, Mamarain and Wopepa. In each of their hair and the stating of laraclavan is predominant. When one considers that length of hair means strength to them is overcoming their enumies this may be interpreted as an entermost the interpreted as an entermost of an enamental and near Australian and in these areas.

At all villages with the sweetien of part of the highway at enamental, and near Australian reseases to prepare for patrole as the constant building up of prestige in the Inlais causes him to be able to central his people much better. This work of building up prestige among a people actoriously individualistic, for the Inlai is new having its effect. Complaints, except for maninks, were on a solid normal footing.

The better roads, the additions to the senses, the type of case The better reads, the additions to the senses, the type of case brought for adjustment, tre meeting and preparing for petrole gives one cause to think that, taken as a whole, the area has progresced.
At the never villages of Bompanari, Inkamaspa, and Tomberakena satisfaction is expressed. They have all out roads and menatructed satisfaction is expressed. They have all out roads and menatructed rest houses and hostilities are lacking. They are a marrow linguistic band on the range dividing the Godsup from the Morobe controlled area of the Lamari-Vallala headw text. Whoy show a gratifying increase in confidence.
The previously untouched groups of the Andena and Maraluna are in a marrow valley the other side of the range dividing the Gadsup from the Lamari valley. This may be presentare, but at Most it will bring our sphere of patrelling to meet the work now being done on the Most side of the area, so that although all the villeges in this narrow ralley have not been vietted slight penetration has been made allowing a previous gap in contacts to be spened. The contacts were fair only

<u>ن</u> ه due no doubt, to the timidity a remed in the pople by alarmists and friends from the hadron areas expressing the Administration as a type of body. This will be overcome. Food was brought and the may to future success paved, it is hoped. In the larger villages of hampit Wampul, Graduan and Merit, which have recently been included in the Farm area a good state is to be noted. Although not of the standard of the remeinder of the Martine Valley people, they are controlled and have not engaged in hostilities for many pears now. These are not Gaduup people but four a tend structuling near Marowain along the ham of the forthill-Ziglis etc., of the Mardine Valley water made many of the forthill-Ziglis etc., of the Mardine Valley water made many of the sec. However, it is beneficial to the leaser Homes said the helper altitude to have the contacts now induced by the inclusion of these people in the Rama area. It allows a normal process of progress to be followed.

The pople here are littless in comparison with the higher

The same of the sa

Family Area. It allows a normal process to followed.

The pople here are listices in comparison with the higher altitude natives and much medical work was attended to. This is only natural in a semi mountainous tribe having contact and inter-marriage with the lower savannah areas.

Raia marred the patrol to some autent-two fine days only being experienced during the patrol.

In spite of the progress mentioned above the well dut yeads and houses constituted on the natives initiative, the ready reference of dispatro the type of matter brought for adjustment and the confidence of the document of granteent detraction form progress) much remains to be done and it is feared that this will take some time you.

much remains to be done and it is feared that this will take some time you.

One good step may be mentioned and that the death of the old feud between Sassaura said area. Since the last patral, payment of them have intermarries and they now pass freely into each other's villages and are received.

The long anticipated results of the reactions of the people after some of their number had been to the civilised control to work may not be seen in a slight degree. At Minamerian, Managain, and Pantibuses the improvements and better undersymboling of our ultime to desires is notable. A much more satisfactory tener is felt and matters were able to be conducted on a footing of more colid foundation. This is the result of several of their respective men having returned after work with Mr Thomas at Wan, or the whole satisfactors may be expressed with the area.

Altura Groups

ALYMPA Groups In good order. Inlai much more responsive. Working as easual labourers at the agricultural Station. Permission gives to construct some houses in the flats to counteract and prevent the new passin swime fever-Complaints against Yoyenskows signstand.

Alamo (Imperior Schampi Groups)

akuna is a great deal under the contralises groups have been built in such instance. Thereby a better control is obtained. Many migrations between the groups: Inlust, though now more conscientions after recent admonityion remains somewhat of a possure quite estiled, and progressing impoping more advanced than the other villages. Interace Grouns

at first due to acquestions of pig theft; these adjusted

For recently contacted villages they are very good. Readwork has been done. Inlai quiet but effecient.
Adjustments made. They have settled their old foud with the Marabuna people. Okamra-Makoyanec

a very satisfactory village with a noticeable respect for the Administration. They continue to improve, roads are very well tended and bridger and rect houses are in good order. They quite frequently visit Ramm Station.

Kai-ore-RampanaritAlthough one of the newer villages have

show considerable advance due to the influence of maura villes. Though of a different linguistic group they are friendly.Roadwork and rest houses constructed. Onuninkas

Their old foud with Aundama recurs now red again although it is now searing to meagre proportions. Action is to be taken in the near future concerning their recent disturbance in an otherwise well sottled area.

Sassauras@arinkspas

The village remains fairly good. New rest houses have been built and the reads are well tended. The Inlai is showing interest in his work and a resultant progress in his people is to be noticed. All present for comeus-a distinct change from earlier visits when timidity kept half the villages in hiding. In January of the present year they ended the long drawn out found with Arau and the two villages now mix freely.

Arau-Sabis-Unia Growing

In good orders no hostilities have been experienced with them now for a number of years. Though advanced few speak Pidgin English. Lutheran Mission school impected. They are having a good influence on Barotin and also to a lesser degree on the village unter Mt Brandora of Osaura.
Sabia had tresponsed in parden work on the grounds of Dampit and adjustments were made in this.

Koraki-Kambailans

Of a very high standard for the area and all

ork is conducted on a controlled footing Much framboesia and injections given. Both villages have been to Rama several times of late. They have intermarried a great deal with Minamarion. Dampit Wasquile

redical matters were given attention. Although not of a standard with the Markham River people they are fully controlled; The lulual is a conscientious man with very complete power over his people.

Onsequence of the natives have not the solidity of the Dampit group but have not engaged in hootilities for several years.
They are controlled but were not found in a good state. As a result of the provious patrol a centralised group has been formed. Herit is decidedly on the wame as a village and contemplate unification with Ommetical Encouragement given in this for the benefits the natives would derive from such a merging. Dome Ataka

Good progress to maintained. The Inlai has a thorough sontrol over his people and the result is a very satisfactory village on uncontrolled area standards.

Puntibossa-Yumpares

With the return of one of their number from work at Was seen improvement is to be noted. They are settled and so truce of their previous believeity may be seen. The progress has been made over the last three years. The natives have responded to the desire for them to construct a centralised group in each instance, Very good readwork dome.

Sinorarions These people have constant contact with the Ragiosposs village in the Markham Valley. They have five of their number sho have been under indenture and the result is a fully controlled village. All, somen and children as well as the men are weaked and clean and have assimilated the culture of the Markham River people. Very peaceful.

Hamareint Are area and improvement on the last patrol was to be noted. Three natives retained from indenture seem to have made noted. Three natives retained from indenture seem to have been noted. Three natives retained from indenture seem to have been noted. a lot of changes for the better. Posds and rest houses have been reconstructed. The village has a tenor of good order about it contrary to their previous lethorgy.

Kundanat Recently engaged in hestility with the Oneminka villago. Both laces had met with food a to make up their past differences and while these were dooking one young man from Chantaka quarreled with two young men from Mandama by bringing up and boasting of his father's rictory over the father of one of the men from Kundama. As the places were wary of each other some of the younger was had taken bows and arrows with them and thus the old foul was removed although on a far smaller scale than previously when the whose villages were embroiled. Adjustments in full are to follows tentatively adjustments have been made.

A CONTRACTOR OF THE PARTY OF TH

WOD CDAR Show a vest improvement on their former state. Two youths previously students at the school for Pidgin English at Rama Station have recently returned to their village and some to be paytly responsible for the increase in confidence, the well out reads and the new rest houses and police shelters which have been built/ The Juliais are more consciontions in their work and regularly visit Rause

Now quits settled. Ajustments have been made butween they and their former encudes the Yayone benu. No progress to speak of can be mentioned except that the prestige of the Indust has increased and with this it is hoped some results may soon be

On the whole the lulusis have now reached a better standard of control over their people. This has been a considerable returnation of progress with every men so individualisation with the centrol has come a securer grouping and functioning of each group. At Sangarra, Dombitaka, Rimmarice, Repends and Omaura the work of the Industrials shown results for the better in their people. LULILIAISE

Sontralised Groups:

This is gradually taking form. It greatly alds
consolitation it to found. Progress in this has been along but
all now with the exception of Kai-ora, kukuyana, and Caran Lamps
have seriormed with the principle.

Pigres are given of the Patrol Jacket Gover. A state of new names have been able to be added due to an increasing on distance. Migrations are noticeable at Akuna and also Jementan and Minnearing

medical: Some fresh cares of Fremhoosia were found and Anjections were given. The influence from the Ramu area spread on to the Gadaup but, after a minor percentage of deaths, has now passed on.
The health of the Dampit Wampul Camsuam villages was not found of a good standard.

At the Seventh Day Adventist Mission Stations of Tembenologue, Omeura, Managen and Alyur, a very noticeable improvement in the natives is to be found. In all i, these villages the tembers are constal boys and the respect of the Administration is inculated. It is represented in the attitude of the people. It is only now that the foundations previously laid down are showing results; and these are very good.

The Enthernn Mission shows very little advancement on the previous patrol but maintain the atendard already achoived. Instruction of Pidgin English is accordance with the Uncontrolled areas Engalation is taking a most half hearted or negligible form . Still co-operation is carried on citis the Administration in all matters except this.

Mankete of Ortobure and Mopou-a visited and consum checkeds Complaints against Algura natives adjusted. Discussion with TRANSES and migor restored absorbed to Foture to Ress.

The thing to be noted in the main by the potrol was that it and become quite apparent that the old and constant timidity has a large gone, Every where was to be abted oridon on a thin considered. The addition to the consum, the better out roods tended confidence the addi one to the census, the better out reads by the people themselves, the bringing forward of people for medical treatment and the better reference of of puters

A comprising feature of the present patrol was that it the safe groups of the four area cooked dishes of food serve amounting the patrol a proceedure sol often sarried out here. Also was it surprising to find the carriers eating Mithese their eyes here is the fact that all water is carried about in bushes minute from village to village to avoid acrosmy contratantion age weaters if this suggest a breaking down in the fitereness of the paneline. The answer many is in the negative however. In a belliness area the material inhibitory maxims of fear and traditional emaity must be carried on from plane to plane as progress advances. The box and arrow sagisms additionally an appearance of the papears of the papears.

True less as a very large extent been evaruately must be carried on this has to a very large extent been evaruately making a shame to calcius in a stride capacially skin linguistic burders much as at land, a says adding suspicion, the bridge which spans this gap is someony. For example, at present a very severe epidenic is suspicing the area of an inflammatic nature and at long forwar deaths scenarious, it has taker a lot is convince and at one present a very severe epidenic is suspicing the area of an inflammatic nature and at one can be converted, it has taker a lot is converted nature one for the converted, it has taker a lot of converted nature of the converted area one that the they need not level as manufact and the first and process in the lace of converted as a second and the area of converted the converted came, but to a lesser degree such incidents are constantly given and evaluately attended for cupervillions always are constantly given and evaluately attended for cupervillions always are instantly given and evaluately attended for cupervillions always are instantly as one total later more patrol as a second in them. In one clear way and account to a decided in a converted in the converted takes are constantly attended for cupervillions are one and make more diagrams. A surprising feature of the present patrol was that in the safe groups of the rank area cooked dishes of food were

The pakrol was emeng Kafe peoples for the most part and much mare display in recoption was exhibited then many the Remas who despise puch

in recoption was exhibited then many the Bones who despise puch glamour. At Imagement particularly by people careed much demonstration. The read is very well out there and some argument of branches and bumbess were the starting point of descing and singing about of us into the new rest he we they have constructed immunicable in particular is mentioned because of the fast that hitherto our contacts there have been far from good. The present patrol revealed a complete change of front shared to a losser degree by the majority of virages visited. This is mainly due to the inoresed confidence which here must be tarded as success or failure and which makes must be carried as success or failure and which makes must be carried as success. which here must regarded as success or failure, and which makes work t times very difficult.

the moin moulding saint now be commenced in engaget and the standards acheived, maintained,

In the Souteest paper a good strangement on their provious state is to be nested and the retires own such more confident and settled. They are not however of the some standard of the inge to Tapa groups will also exception of Rai also which to of a very good stage under "A Aulai "it. This walkwort Corner has recently been referring matters for adjustment, of an individual nature, resident has been done and entisfaction and on expressed with the progress. It is now eleven menths since fighting has seemered in may of the villages vicited .

Es had been the intention to continue Man Resupintenn and Southern Pirection to comment groups back to exact there, but this will have to be done at a later date, as more time had niroady been taken then enticipated and with smo officer on the "tution whert petrols in verted cirections found the most offeetive.

Heavy rains almost seek aftersoom dalayed work to

n very great anvest.

Howe there have been no hestilities for a long time new hat the people are singgish. They are chedient but in an awhound stage of transition. There are many adjustions between the willage of Testesse and Sinispe. A new Newt Today and Police and carrier shelters have been constructed but glod readwork does, the present hald of lost says areds re-ording continually in his work. Convel Labourers from hors are at present at the Station and used on the patrols

**文印度印度**印度 seconding to instructions the patives have carried out as good readwark. Village broomed and limed sweiting memous. A we good Livence is to be noted. Many men with their heir out and wearing lara-layes-perhaps on outsend special of an insert acceptance of our methods. Court, senses on a good feeting. Tirals

Manda well tended and new yest house built-tains a e mus. Injections given as much frombacein in in evidence. Con

Although originally an offshoot of Immunicabl the place m functions calle separately from it. Very good receiver do to. Intereser referred by them to the station for adjustment. The fermer timidity has gone, and they seem to be secreting our methods with a better understanding. Injections given, adjustments, essent etc.

formed but but village clean. A controlined group to being formed but this very slavly. Many nigrations have securise due to people returning to their original villages. A number of new manes added. Algestsopts with the surrounding groups had left a few better temps and better considence in the people. The handet of April on the main rand desires to stry there for grade purposes. The Tools seem to be out/ng mader Mocion influence where before they actively repelled it.

emplote transformation has taken place and instead of the remote house in the summer a composite group has been formed.
They showed so at an af the provide timidity and readily lines for corona parameter. The loading has been of great assistant at the time of the patrol come of the scople were away at biliness in the last Barry, area furnishing an exemple of the gradual broading down of the fieres linguistic entagonisms.

Investments:

Including Reremenoft and Amaginati. For the first time in the present officer's experience the live has shown a complete confidence. The group has been given some concentration of inte and the results are bringing the people is to case form of order instead of their furtive habits. Readwork has been well done and a fact flow a and Police Chalter constructed.

Gred work continues here but is at a standatill at present due to the mray deaths of the current influencie infection. At first

the people attributed this to corecry on the part of immuneable how adjustments were made in this regard and the people realise to a large entent that they are not the only and suffering from the present infection. Reads here been well out and the Best house is in good order. Consus shocked etc and injections given. These was using the first of the people in this direction to except in the stricter form, our methods and it was at first a shock to them that having done so they were susceptible to deaths previously they as did the others, attributed all deaths to servery and the best and sweet porate coronany was always performed to ascertain the secretar Research a better understanding has been resolved.

Tamponaethe village as intuits its very good State under huanto.

Roads were found will tend d and the village broamed and the people limed awaiting census. Redical matters attended to.

The village shows a much steadier tener and have quite settled down. Readwork has been done and the people have been visiting the Station. Being part of the original large Efentira village, many migrations atill ensur, between the split components of Beingantu Orage Youpesea and Yamusu.

Pais is now assuming properties as the largest of the

This is now assuming proportions as the largest of the split Efective villages. Needs are well out and the people have referred matters for adjustment though of late not much of them has been soon. Fith the swine fever still respent in their village they have been allowed to build small houses in the remeter places in order to care for their pigs the better. In spite of this a large contralised group has now been formed.

The is the most singlish of the w lages visited the luint mention, although he has been imprisoned twice at Sulamons shows no signs of having profited from his experience. I crimes have been consisted but it is the general tener with in pulk Roads are not cut. Algrations to Daimants and Tomposes have been fairly constant and this is good as it will eventually leave Montire with but a small handful to share his projudices. Never more confidence was exhibited then on the provious visit, had more concentration is needed vanished.

Yanabo has been satisfactory for some time now. They keep their share of the much main Resurbenne-beans road in good order and are at present constructing rout houses. The halai although somewhat of a possur is frequently to be seen in the station. The general feeling here is good.

are well tended. At the time of the patrol a Almber of the men requested that the go to work ar casual labourers at the "gricultural station. The village seems to have progressed very well and are accepting our methods with better. The talai in spite of his outward bravade is a conscientions many

The village has responsed very well to directions given them. A contralised group has been formed and from a fair distance their group of forty odd houses may be some erroning a ridge. They have been regular visitors to the station of late and readily refer complaints for adjustment, such sickness and notical attention given. It is a natisfactory progress.

Abunamotas

Nativos are in a fairly good state. Originally these came
from mear Homora but seve routed by these latter and fled to Harolas
they have now with full adjustments haring been made with Namora,
returned to part of their original grounds. The village only
comprises ten houses as present but it is employated that nigrations will shortly enlarge the population. A slight attempt had been made on the road but they have been busy with the construction of their houses. On completeion of these to construct road.

Karaninterne

The vallage is good but door not show may improvement on the last visit to it. They are settling more to reating however. They have aggreed to build a central group thetrod of the present reads housen in the case gross. Discussions with Armigirla so the latter being settled on their grounds. Read work to not very good but some attempt had been made. Timidity to far loss and was areviewed due to accumulines of severer and one their by was proviously due to acquestions of screeny and pig theft besigning and Yenabe. There is room for such improvement in t

The village remains in a good state; the fermer quarrels with Karupinters and ablers have been adjusted, and at the time of the patrol people of both villages were to be found at Endpicks. The village regularly visits dism and is perhaps the best of these Seath western villages. Fromboosis in evidence and injections git he a number of the people have returned to Iniecra and Ablera new that the provious fraces of twelve mentles ago has fully subsided.

Ablerat

village much improved. For fifteen minima they have been quiet and seem to be coming under soil. Inthose are now referre for adjustment. A rest House has been built and the reads some 7 ound very wall oute the people were found limed availing the proper to be included and the characters that is building his duties seriously and the characters charge in his people is to be noticed.

Inch Francocka and injustious were given.

Orares
These people had been very simply and furtive, but the present patrol revealed a much better tener. Homes were tended my and excellent bridge constructed over the Int-dra Greek. There is a decided increase in excidence to be moted. T41-grai

A much broter feeling emists and the people have fermal two composite errors. Ontakers and Hopes-me After reprinsed the Inlai has taken his village tree in hope. The Magnie do not exhibit any timedity whatever and are regular visitors to the Static House are well out and on the whole a stancy progress is to be maind Insurance; and Armany

purposes. Transmost is the most backsord of the villages in that group but in Steking a much batter forms and now to not show any of their forms kimidaty.

The Area visited is suffering from the type of influent which is affecting the whole areas heny injections were given fromboach being prevalent, parthocharky at Tirat, Salpinian and Abiseco Assuber of deaths home resulted from the combined constant rains and influenced optionics

These year west wast sensumed on the whole. Such west has been time at them and drainage carried out. These are tarded new retirely on the natural was made on horseback. Some but parts exist yet between Tape-Turner, Barola Ansanders and near Earlything as well as as Crago. The remaining and greater part is very good.

As all villages the sensus was checked. A mader of miditions seadunds . Aignations still occur at the villages take a large settled form. This will continue tests all are finally and completely modificat out mottled. The previous four of sommus baking and that such was apportated with normary to gone.

ACRECOARDED and the brown rains, crops are not yet ready and a food shuringe still exists though to a lesser extent. At present, () the crows of each ridge, on the slopes of which are the native gardons, one may see a post expensived with feliages at the base of the post is to be seen two or three figures, which from any distance beyond fifty yards look extremely like someon natives and are quite easily mistaken for such.
This is concerned with the ritual of you planting. The ornamented post represents the height to which it is desired the you will grow as well as that when the dried leaves fall from where they have been placed it is known that the yous are quite ready to be picked. The figures at the base represent the ancious owner and guardies of the plat. The post and figures must remain till the time of taking out the you when a different correspy is performed. Such figures may be seen arouning such ridge where gardens are to be found.

Seventh Day Advertist as well as Satheren Missions At Youare and Tape a fairly strong hold is maintained by the Satheren Massions Sayout this in ore is nothing upon which to communicate

Composite Growthes

From the evidence wors on the patrol much
more has been done by the natives in this regard particularly at
Barelo, diena, Ermango and Ogn. Date: "dainistrative control
obtains from this collective grouping.

Except for the Yoyomakemi-Yearstone area on the frings of the Gedesp area, petrolling followed a normal routine nature.

The telling of Geness Figures has proved a very good aid in consolidation and the people now routily line for this purpose. It is a gratifying change after the cork of last year, when visits to the villages produced but a handful of people present. This last of faith seems to be passing thermality bith the time. Indeed the tenest antithous 1/s new the case one and matters brought formed for adjustment are reading large proportions. This main area, which was the half of portion under careing for and obtaining a constitut of portion under careing for and obtaining a constitut of hostilities can not so very difficult a newer, but more that was control as attude areas is the minds of the mainters of so far, well-what next? Things to the burriers remines that going to constant villages and enterp to cork to obtain a moneaumy vider horizon, the beginnings of a clight apply pould be vigurely discounted as labourers or ing to the fact that, being to complet uncleas as labourers oring to the fact that, being to complet uncleas as labourers aring to the fact that, being to complet uncleas as allowers a oring to the fact that, being to complet uncleas as a cli, the surfect of trade goods, Incident on the sarilar could have not incorporate for trade goods, Incident on the sarilar could make in their attitude toward the administration.

Industrial with this was at abilitude of thesisty a warde government influence. on the fringe of the Gadeup Aren, petrolling fellow

Sovermost influence.
The result was a vivile and headstrong people entirely ablivious to let and order, and maspicious of it.

By a constant attention to thir, the attitude some to reversing rather well.

With the exception of the Yerenakenu- Transmised villages all of the area visited have been, amongst other areas, used as caused labourers on the stations furthernore, reports from the "ining prospectors of the feen have it that a number of local council labourers, have been used fully associately for their three month periods on the mass of a young son is called the is a working at each and such a place."

All this is far more eignificent than appears, and at long last it may be definitely stated that the terming y int has been

Terringhentens and Koyenakens the ordinary problems associated

A STATE OF THE PARTY OF THE PAR

with people on linguistic boundaries are still being

Cases. Between these two villeges and the Gadeup Village of

somerate and Organization and the Galley Village of somerate and Organization and been rife during the entire experience of the Administration. To a large extent this was pettled by a/P.O. Miliott in the latter and of 1937. The Villages, due to other more presents affairs had not been given very much attention before

Gradually disputes stretching back for years have been evered and the disputes are now more of a personal nature than

oradually disputes stretching buck for years have been evereuse and the disputes are now more of a personal nature then inter village.

With this gradual settlement has come a respect for the administration and the Tamentone and Tayanakens may now be seen regularly at the Station. Six of them are at present employed as essual labourers; and are working althoughed two of their provious omenion.

With a little more attention harmony should be reached.

In the whole the patrol showed a very fair standard of control. Reads in these villages are excellently cut and matters for adjustment were able to be carried out on a somethic and orderly footing.

At each village the Inlai had his people lined Nathing for the arrival of the patrol.

Perhaps the best guides to the advance of the even visited is that (a) Court work is now centraing on malters within the village instead of liter village matters. (b) Readwork and Rest House construction and repairs are being done of the native's own initiative. (c) The native are learning to work and accept the routine attached to it. (d) The census of them is estimated as 90% complete.

The large amount of matters for adjustment now referred to the Station for adjustment instead of being settled by the people in their own bellicose fathion and the routin of the census are the best indication of increasing confidence.

Kainess

Consus checked and adjustments made. The village is stabilisting and migrations are far less frequent. They have not engaged in hostifities now for two years and are pursuing the agricultural safety valve so desired for those pusples. There are four humbet divisions among those, but composite grouping is not so important among those more naveness people as in other villages. However it is being encouraged.

Villege electr reads well out, Several young girls at present at school at the Severath Day Adventist Shanions Lulai is very consciontious in his works A significant improvement noticed from the fermer indifferent attitude of the people; maintintense

good with his work. The village has been in good omittel for

Owing to Inlat's age Ye-e chosen to act for him in various matters. Village concurs in the appairiemes. From here as well as at Kainen newived are working at European witer. Yomoripas

a well regulated village. Here and in order.

A botter idea of commun taking, adjustments made. Though not of the standard of the above groups shows improvement. They have sometructed a very good road. Buch mere consolidation needed.

Under the newly exected Eulai Royuma good progress may be pound in a small valley together with iso-entermy Yoyanskemm and Yamnontonn , they have not been so regularly visited as other places. Now herever, with the enthusiass of report attention, a cignal temperoment may be seen.

Taument ones

The same position exist as at Punane, Finding they can now walk about with safety the people are regularly visiting the Station. The experience seems now and they are taking advantage of it. From externals and judging by their presence of the Station one would think them in advance of ather illages. This attitude has yet, however to be .beili 1110d.

You bunkey Doing eleasly allied to Tompentum their effairs are a parallel. Adjustments with the dedaup villages of Renerate and Ominamican have produced a much more settled effect. The newly elected Inlai is very keen on his work and results of this are to be clearly seen. They are definitely noe yielding to Government influence, and timidity has almost entirely disappeared. A first consum you while to be obtained: A distinct change from the previous visite when the village was found described.

In the main Dru areasin good control. Reads well tended. They are working at ensurin at European residences. The villige has been percentle for the past eleven months. Consus estimated as 95% scupletes.

Although all readily lined for commun purposes, they have been timed of late due to accumations of corcery. Adjustments were made in this. Rigrations back to abstract and runned due to the essention of righting has left the original inhabitable only, now. The people have formed a composite group and should be entisfactory in the future.

Sensus shooked; readwork good. No nervoumess whatever exhibited. They are reaching a good form of control. Neuringe adjustments mult.

A new Rest House was built by the matives during the pairsi's stay to replace the former one which had collapsed in recent floods. The village although responsive to Administration policy, and is a good form of control, exists in a scattered form. Encouraged to form a controlled group. The Inlai has been fairly responsive to work although he is a clever possure. Considerable illages due to recent inflaminal spidemic. Servery allegations adjusted.

The previous Inlet Yiramets has been an edverse offeet on the village, but the natives so longer fallow bines. The standard is not up to that of Yauntenu, but a symmiter ale improvement to to be noticed. Adjustments and cameno matters accorded to:

Risaion activitys In the area violted Risaions influence dees not exist to any great doal. At Yopenshenu and Pumme some good solidifying work has been carried out by the Inthones Massion, Otherwise there is little to report in Van regar

This was carried out in each of the villages visited for its consolidation value morethen for its statistical value. Geneus is still fluctuating as the natives are returning from adopted homes to their original grounds following the lapse from hostilities. For example, the envisions of Yomoristem's, which had proviously fled to the entire Maininentu fellowing hostilities with Alemontine have now returned to their original site between Fungau and Unionfintenue This migration causes come difficulties with the common figures. The totals, however, are securate.

Modicals a number of double have occured in the area visited.

The to an influence effective which has been of a

rather severe actives attention was given where possible, but the caseal attention which, only is possible in possing through the villages had dittle or no values with the trained local medical attendants on the Station however, much more is able to be situated in this regard. A number of possion were sent to the station for attention. Injections for transpossia were given, during the policy. Interest of the remarkable of the station of the policy of the station of the villages without exception the work of the talents of the villages at least of the villages at them. This power and prestige has beened a local of building up in a possion or individuals.

a slight offert had been made with the reads, these latter on well as the rest-houses were found in good repair. Reads were well drained and tended, and the people very pleased with their efforts in this direction.

end the past patrol to these absult show good results.

The two villages functions at one unit.
A considerable improvement is to be noticed in the previous
timinist has disappeared. Morort, the new lated is a very

different and to his predecessub and the results of his energy may we seen in the well out roads, the new Nest-bouse and Police shelfore.

The people had been urged to return to their previous condition and form a more compact groups this they are doing. most that all matters with their fermer encodes the Assor Mai-ora natives have been adjusted, a much better tenor is to be asen

Only detinfunites may be empressed with these people. Here a new hast-doube has been built to supersede the last one on the natives oun initiative.

This is the Third visit of a patral to these peoples a read has been out through the bush. On the whole a good improvement is in evidence. Last October truey were engaged in hostilities with Commun. and Harekuna. Their passent adgrees stands is direct contrast to the normal progress of this area. The people are cost actiofied with themselves for the west they have done. impercussions any naturally cooks so peoples further out, interfere with them but gradual extensions of the patrolled boundaries will overcome this also. emoreve vill everouse ALBO PLIZZE

No timidity may now be noticed. Response to the policy for Centralized grouping has been very good. An entire now vilings has been formed in which ame-mi and Secentification are now emp. This is then more settefactory then the remote hemist divisions which were to less area. The site is on the grounds of their original village from whence they were driven by the Coverses. With the saitlement this effoir the relaxed has been made. Although covered of them have recently show themselves for work at Ramm, the tendency here is for a complete indifference to ward manifely Village sourly functions harmoniously with Resonance and here a more obedient tender towards matters outlaid is to be

Arene Rosekes Anna Sabine

There is no beed to speak of progress here.

The people are fully controlled in most respects and patrolling assumes a now orderly note among them. Response is given to may requests outlined. Satives from here are at present working at the agricultural Station at Alyura. They have formed compact parameter villages. After epidemic setbacks they are on the up grinameter. Second and Herite

These villages are on the lower altitude.

These Willages are on the lawer alliques of the lawer alliques of the James Divide and thomas equationless and approximately and approximately and approximate the class of the Godings of Illinois by the Roma Carriers, purple from those lower williamen will need the patrol of Administration and record the patrol of Administration and record of the Control of Administration and record to the Control of the Con

In the back.

[unilbasian]

This includes Aumeparamas and Vampure.

The village continues in an oven tenor. Three Boat's actions were paid out. It is not unfortunate that Malarial incention contracted in employment at the industrial or free renders consolidation in this regard to a pagetive result.

The villagers are at process consentrating on garden work and minor matters only were brought foreset for adjustment. mentalas

The people are fur pore confident and some to have recovered from their former lethargic state. Retiges who now referred by them to the differ for adjustment. Two definite groups under the two Zalais now exist and a corresponding increase in consolidation is shown. Boodwark in still poor.

There to a steady Progress to be mated and the matives are now earlying out readwork and other duties.

Y/----

on the previous bight very little could be achoived to a femalt of the timidity evidence; a direct contract may be seen. Nead to the vilings and from it also well cut; a feet-and relies shalter have been built and in general an advance toper was exhibited. Sing on the Rose-Sadag Sundaries a number of matters for adjustment wave presented.

These people as well are as the Ruma Gadaup Divide but are far loss advanced. Some timidity is to be seen and a number of metters were required to be adjusted. The people are I as matter story than any of the other villages visited and a 11 by giren concentration.

WOLLANDER STRANGE

Confidence is mounting and it is a weller to go to a village and find that the natives have not already described it and gone into the bush. continued in antivos have not already deserted it and gone into the bush.

Initity was noticed at the Contemps hander of Topy, at Orage and the new village of Sovalkores in cach instead this was everyme before the patrol laft the village.

Instead the new village of Sovalkores in cach instead this was everyme before the patrol laft the village.

Instead of a varied nature from adultary and hert to disabedients the examine of the Raist.

Sing to the marial arganisation of the Rama people complete matholity is mayor held by one man and consequently the power of the Islai meets constant building up if results are to be adultively. Into it done wasterefver and whomever possible.

Composite grauping is gradually taking its affect and there villages the hard responded to this show a butter degree of control particularly analyzing. Runsi and above.

Vith the comparative lapse in heatilities and the frace degree of travelling in affect it has caused thede namice division to secur and new man. The greets of Blance are to be cause on onch successive patrol. The building of them has been curtailed in order that efficient latherity may be control by the Islaic This caused be done if his people are accutered in various directions.

The saturing norming harkes at familian rided a great deal in breaking down the old fierce intervillage barrious.

With the casier mining of the people are very mach subverighed by the gradual trace it is bringing about.

The difficulties may be appreciated when it is realized that in the Rama-Gedeup acres different languages are spoken.

The difficulties may be appreciated when it is realized that in the Rama-Gedeup acres different languages are spoken.

The difficulties may be appreciated when it is realized that in the Rama-Gedeup acres different languages are spoken.

The difficulties may be appreciated when it is realized that in the Rama-Gedeup acres done and access of the patrolled special from the propers of Eighting of rilinges oven if they be a subtent of the patrolled acres from those from them.

Pighting to this area is such as intrincte part of the ritual and religion, and they feelings of the Rama peoples are not entirely diverted from this as yet.

In the newfor Archara villages it is exticipated that good progress will be shown them. They seem more tractable. In the recently contacted Sorotkore group, although slight timidity was noticed, still the progress is good.

In all the villages risited, no serious distrurbances or righting have taken place for the past nine conting.

Slight friction in regard to pig thefts were encountered and fully adjusted. fully adjusted. Taput Binimpa Be

Tapus Binimpa Report. Village not as satisfactory as could be desired but steedy. Told to improve reads

Tentorpa. New Socie made out. The hamlet has divided into a further division of constants. Rest House and Read under construction as percel left village. The village is now mainly grouped about the Enthern Mission townsor stationed there. Tanakus

Village has shown on last two securious good rand work and also a fair degree of control. on errival of the Petrol the Luist cod the people lines waiting for census taking, matters adjusted, a good improvement is to be noticed in the work of the Inlai.

Village fount in good order major the Imiai. His work is very good.
The statisty formerly noticed has entirely disappeared, and a lengthte fouting has been reached through which to effect control.

The people gran to have settled down very antisfactorily a good idea of Comean tabing is above. Naturally with the rates of kinemic same family groups include adopted children but this will adjust itself with Chrisux common shooting and affiling.

A disagreewest with Kanaspa had caused some disagreems, but this has been adjusted- a sereony matter.

An expelient new Rest House har been completed by these people.

Village book insued. Common for from complete. Intiven-slightly timid. They have not been visited before they report. Buinnahu- Grages

Beforenty is under a fair control and rouds have been tonded. At trage however none timidity is still to be none.

Since the doubt of a mysbor of their elder non in prishs at
Salamous and the occompant breaking up at the people and shifting
to now vallage situs amplete satisfaction with them connet be
expressed. Their food ampelies are not maintained and in this
they berrow considerably from Kaimenia village. A very elight
improvement is to be noticed set they are being given
concentration.

They show much more confidence than on the previous vist., The people really limed and adjustments were made. They have captied out good rendwork. The Luisi managements is delay

The group to showing could note: Conses approximately 795 complete s Cagos

The village to in exceptional orders this is the third time a partial has vicited them. Reads here but and a very good rest house and police shalter built by the mattrees. In this femoura village lest aid.
The progress of those people is gratifying and they shaw complete spatiance. May were addressed to the continuance of bringing complaints to the station for adjustment.
The furt of the souly exected tales is word and so has appeared for the present at lesse, very consciontions in his tarks.

Emapte the iniai has proved his worth. The village is well bround and the rents well out.

The iniai has extended his influence to Farmer, previously intractable. The people are weekly visitors to Samu Stations

The village has hardly been touched before. On a provious visit they had all scattered to the bush us a result of a theft. They are now settling and h we all returned to their village. They have cut reads and show some Lagraneous. They readily limed for occase purposess.

Huch improved. They have acted as consel labourers at Santa The Lukel to Velding his dation more surfacely and this to syldene in the improved reads and village. They refer menters to hams for "Sjustments and simility whatever on on provious visit." sa possible.

Porabarunka and Aparas

In good order. Rondwork has been done.
The natives were found lined waiting for sensur taking.
Einer adjustments were made and the natives addressed. They were
supowinged to do many with the sumy small hashet divisions,
which at present exist with them.

Pormerly the sumifinks village. So nerrowess whatever, the Lukei has a fair control of his village. They keep their chare of the Remu- Prace-beams reed in good order. Adjustments made with Supola village in regard to corpery matter. The two villages are not friendly tring to past heatilities, but the enterpoises to gradually being broken dome.

Aratpinion of the supolarity being broken dome.

Under Biti the jule the village is quiet and are regular visitors to the station. Reads and village are in good order. Adjustments made between they and Abiers villagers in regard to ply theft. redical matters and adjustments attended t namepiateum. Smilled

Pozmerly the Unabanka and Aratpinka villagefa. An improvement in to be noticed: reads are cut and the people were found limed waiting for commun taking. Various adjustments made and matives addressed. Told to visit the Uniona people beyond Caslanka Sission Station to spread their influence to bushe

Crowsta- Tarmeiday people. The Orosata village has been previously emission, by people. The Growsky village has been previously exchanged, by in surten, in 1733. The contact was essential at those prople are constantly visited by the more controlled villages measure the Station for trading purposes.

In a provious visit to hours Piers in 136 the officer was told of these people and their village name was given. A first the village are found described but toundes mishifull contact was established. They were addressed but toundes mishifull contact was established. They were addressed to furthering daminishmative policy. A process they seem most trackable, enoficating to not as constant.

They had been attacked by the horse weaple or the hour-lemmit divide and had fled to reimed in the Finiatolys true but have recently returned.

It is understood that the passi people are of a different linguistic group and non an after people are of a different It is understood that the Sensi people are of a different lingulatio group and are an office from the Larent valley people. They are to the Southwest of Archara and sentost with Park in iot necessary amyet. They will be included, however, at a submember patrol.

factory.
Contact was also established with Yoth, a village of the same

Village found far more condident and in botter control.
A number of new names were added. The Islat is taking his duties more seriously and the tener of the Village exhibits this.
They have been p excels for ten months nows a great change to their provious constant fighting, with Yai-ora and armin hims hadwark in a small measure has been attended to and the people are regular visitors to the Stations Oroza:

The natives are not up to the standard of Ablera although a great degree of their timidity has alsappeared. Pig thaft adjusted and natives addressed to violt the Station more frequently. A lot more consolidation is accord with them although after the past general fighting of them it is sufficient and hard enoug work that for the present they have abandoned this. The building up to more civilized moden must necessarily be also tentation of these williams.

### Novelkeres

For a second visit program is makin matory in the people. Seas merconances was evinged, but this was due to a thort from the orars people several days proviously. Read have been altempted and a rest house built. Since the provious visit they have account times visited the Station. It is unticipated that the improvement they show will continue. mentirae

Sec.

Together with nornikors are showing isprovement. The people restly limed for senson taking and brought a matter of theft for adjustment. They were encouraged to take food to the agricultural Stations which they have done recently on several occasions.

A usell village. They are regular visitors to the agricultural Station, but have only once visited home. They reddily limed and a first consus was taken. A recent libeau ocens to have greatly deploted their numbers.

Now with loss worfers make attention is given forde. The autter has been constantly streamed with the metives. For the sems reason tracks do not now always follow the cof now stains and hills, but a better grade in being sough the patrol was mode on horseback, anough for a summe better means better the patrol was mode on horseback, anough for a summe better than and functuageer villages.

Des Sont Houses have been constructed at M Tops and Moratkers. Shortly it is hoped to have Nort h convenient distinces throughout the Afens

Constant migrations make denous work difficults a form of re-momertment states to be reling place and matives upon to be returning to their former villages apptilities. In the pastTime only will adjust and solidity this.
Composite Orderings

This has been adopted to a great measure by Punci, Adiera, Araipinka and Ongo. It is of great value in compelication and in being pursued riserover possible.

MATIVE SITUATIONS

The patrol was of a normal routine mature and aboved steadinges in the villages visited. Results of the stress laid as readwork is beginning to be chosen and the country between villages may be traversed in comparative case. Except for the journey to remai the omitre patrol was made on hursesback. Results are also being shown in the matter of the matives forming their scattered humanic into contrained Groups. This has formed a large part of the policy, and it is held that the control was growing, he mainly due to this tendency to composite villages.

During the stay of the patrol at associal activity in this remain was partic large meticeable. At this village also some excellent work has been done by a rative recently returned from indentance in the state of the countries and for substitute his countries after substitute his people them outside exheritations.

The former friction between Miliania and Journey for the past wine members. the past mine months.

Priesdship however, between them, to a long way off.

On the whole, the tener of the villages visited was good; carrying was carried out well and no timidity was experienced at all.

popula Village found in fair orders Books are well oul. Betives encouraged to emulate the Uningfantenny- Christian people. There is, Housever, a considerable improvement enoug the

Controlled grouping to being carried out well-men frumbreats nation and injections gives-pressure Villages

Natives in good order. They were encouraged to smalgabate the healet of anomorphy with the main village. A good edward mattered but more consolidation sledel.

Kukuniu was chosen as imled but recommendation will follow observance of his powers.

observance of his powers.

Magazine Village in good arter. The healet of Karmyonepa
is far removed from the main group.
These people sie not well united one on effort is being mode
to tring them together again.
A considerable number of deaths has accord in the people
menths mainly due to contacts and long visits to the people
on the lower surmanah flats of the Rama-Markhas wrong

The village was found orceptionally next and well brossed. Inc Imlai is earnest and is doing good work. These people so well as the Funanu natives are practically a controlled village and regularly act as corriers and oscuel in backers.

**EXPLANA** The village remains in a good form of control and gone good roodwork has been dome. Through the Paramount Iniai recrei, rapid progress has been made in the Uniquity-Rama Read. Hore the death of pigs due to Swime Fever caused considerable construction, a rough ostimation of ook of the pige dying from this diomeso.

These people have mostly all returned to Yes, riga mear Univertations, their original demicile. Sentus.

A steady progress is Noticed. Gradually a composite willage is being formed and following it a greater control through the Lulai. The natives have been engaged in constructional work on the Maignlia Rood.

pilimetes although not up to the Standard of the other vilinges our course Standard has been carried our visited, at advance is to we seen. Sudmork has been carried out and the provious timidity seems to have washings. Their relations with runnel has are such improved although the two groups do not yet miz freely. Denosis

The villager has been shifted to a more convenient site several miles to the mestward of the former cite. The matives are quite sattled but regard Bilimpia with distrust. To a great extent this animosity has been overcome and further consolidation here will be pursued. Between anipu hamlet and the main village of Jumest, migrations are continuous. lacontinar

Here a very great improvement is to be naticed. Roudwork has been done and the outward forms of control ere more observed. Since one of the village leaders was chosen to act with the imlai, a marked progress may be seen.

Composite Croupings

incouragement to the mutives in the respect is speting with success. The sork is also as eas only be expected, but its results are

It is mainly by this means that a 11 control may be gained. To aid this every effort is made to impress the lower of the Lulai.

Particularly man progress to this direction be soon at seapula, Alamontine and Gmento.

Acce, this distance work to be finishing its cycles
The rate of desting is you choose at more in comparison to the
legace of one month and a half ago.

Reads house traversed rare /a good order. Repairs have been effected by the n atives where necessary and only at old intervals was it assessary to draw the attention of the people to any reconstructional work. The present road from milimain to Fumnai is far from matisfactory and a new rooth, that used by the natives themselves, to Tapu sooms the most setisfactory roads.

This road is now practically complete.

From Knigulin and Funantime the natives have worked upwards while
the Ramu Batives have worked to most them.
all clearing has been completed and only Coresel (1200 remain to be graded. The road may be called a good, Tive fast wide bridle truck.

At each village this was curried out more for consolidators measures then the gaining of statistics. Statistics for this area were forwarded in Pobruczy.

Route inid out for a road to the papule and Morth-north test villages. Settern made to Dami Philips.

progress in the villages visited, except in the case of Yoyenakenu.

A good idea of census taking now exists with the satives, and on the arrival of the patrol is each village the label had lined the people and thus assats and matters for adjustment were able to be made in a fairly orderly fachion. The former idea that census tiking was directly associated with corpory scena to have been avarance and a far steedler feeling may be noticed.

Carriers were used from the villages visited the use of local natives for this purpose being a part of marmal routine.

In each case addresses were made to the malivor and encouragements given for these to cork as assault labourers with the assistant labourers with the assistant

laing prospectors.

Ny so doing it is a ped that the routize and associations thereby acquired will be of considerable banefit in their values.

The standard has been reached with the particular villages wisted in the main Kainantu valley, where the final impairs to a controlly state is ready to be given.

This however is retarded by the implicitly of these people through health reasons to engage in employment at any of the centres where continuous application to daily and association with more civilised natives produces the than state required. In this although their working escually on home Station for three months at a time has been found very successful, in working

three months at a time has been found very aucconeful, in working for the prospectave of the Area a different situation erises. The proximity of the natives to their villeges courses them aster generally one work's labour to desire to rethin to their purples. Yevenskom Villeges.

There is a hereditary feud between the people of Yoyenskenu and the Honorata villages. This is revived back year and is, on each occasion dealt with vias Intelligence

Report on Born Post for August 1937 and foural Report of N.C. Elliote of 20th Hovember 1937. It was thought that the matter was office. The matices are regular visitors to the Station and were believed to be settling down.

However during the absence of the Officer in Charge at Sofuku a man from Momerata visited Yoyenakenu village and laid rinim to certain lands of his father within the Yoyenakenu boundary. An argument arose and the loyenakenu natives killed him-Momerata natives retaliated by killing a man from Yoyenakenu

thely have neturing from my is So them rullages to flow

development to the william state of buying parrakect feathers.

Before the visit of the patrol negatiations had been made with both of the villages, but on our appreach the village of Yayenakena gave way to timidity and retorted progress.

Finally havever temperary adjustments were made. Michaelm managements had been adjustments were made. Michaelm managements had been received as yet and as it is desired to end this potty fighting once and for all, histo is as being made in the matter will the person or persons directly behind the affair have term definitely asserted of the final-factor strike and, being of different linguistic groups will take time to completely astile.

The natives are now glist and in each case hive since visited the Station.

Forever information is now in hund to effect finalization in the matter. and the correspond to the confidence when and in the matter Justments to the offiger in the Yourcestenus
Village obowed considerable timidity at first due to
association with Yoyemakenu in recent disturbance. confidence was gained and a census taken.
It is solisved that a census was previously taken by A.D.O. Tyle in 1934 but her since then. They tegether with 180- Punche Ruysneltoux and Iso-entent form a group which Eliough come to the Salmanu group, are acided victors. Saudo were historicate and the natives encouraged to via Station w re frequently. These people seem to be settling down o'll and were found in good order. Several matters were broughter edjustment, and the sameus revised. The Luint in gaining prestige and this was fostered as much ne possible. As Youngetons exhibits for less control than these people the Inster were encouraged to visit the Youngetons people more frequently for consulidation purposes. Isomettecht: The natives sere plightly nervous at first of were present. Reveral of the natives joined the patrol to work at the Station. These people are quiet in cuite of having been so seldem victed and with further contact with equal anow good improvement. uninvfirtenus

The village is in good order. Since Bowata has been made Iulai good progress has been made. Roads and village are in good order . A contralized grouping is being made here also. The village is drewn on for cosual labourers at Ramu Station. the consus was checked and adjustments made.

In February 1938 the matives requested that they be allowed to rebuild their village nearer the soin read. This they have one it a composite form. The work of the Lulai is good and the people are regular visitors to the Station.

The corpus was checked and adjustments made.

They were recently us a so carriers to he defulm area and on the whole seem to be settlings.
A new rest house has been built by them, and during the patrol's stey shelters for the carriers were added.

The matives readily lined.

The previous Lalai Yirimais who was deposed had been having an advers effect on the people. He is no longer followed, however. The tenow of the village shows improvement but needs considerably more conscidention. Matters adjusted and consus cheep.4.

These people were fighting in August of 1937.
As the village was a large one Ipare was appointed to aid the Lulei in his work.
The considerable progress shows is believed to be ine to him.
They are regularly used at the Station as essent imbourous and
readily refer adjustments to the officer in charge.
They we now formed into two contralised groups. Carries his tasks out well and is reliable

offest on the control of the natives. A good response has been and in these Forthern villages, and at Unimufiatess. Keininestu, Kekstuant and Okentenu results are noticeable.

Medical: Injections were given for Frankoesia at Uninufintena Keketuantu and also at Yountenus An influencic Epidemic was having an adverse offset on the natives at the time of the patrol.

Swine Fevers
This is taking heavy toll of the pige of the werthus news first came through from Finintegu of the progress of this disease but little could be done to check it except to warm the natives to implate their pigs and particularly any showing the symptoms of the disease. It has gained rapid away and having hilled appreximately one half of the pige of this area seems to be passing on.

Roads Rost Houses:

The reads were found in excellent order except for those at Yaumentenu and Iso-entery and Iso-Pumanua During the Fatrol's stay the natives of Case latter villages effected repairs. hest Houses were in good condition. At Yauntenu a new house has been butlt.

Indenture of Panu Mativess

In view of the Degree of centrel of the natives of the villeges visited it is full that the final impulse to a completely controlled state referred to in the paragraph dealing with the Native Situation of this report could be most readily acheived by a number of the young min being given employment in one of the industrial contres at a favourable altitude devoid of Calarial fever.

In march of 1936 a number of men, went to sau for employment under Buiolo Gold Dredging Company; but the experiment did not meet with the success hand formand the natives were received. not meet with the success hoped for, and the natives were returned to Ramu before having had time to absorb the influences. associations and routine which would have been so beneficial to them. Fever was apparently contracted in was where such exists,

and the men were returned after three months. much more than this in

Ramu People under a fairer trial. Could advise please be given on the possibility and policy of finding suitable employment where natives will be cared for, at a favourable altitude devoid of Malarial Fever such as at Edie Creek or such similar place.

results obsained.

The contacts were under and satisfactory
results obsained.

The contives were addressed by Administrative
policy and upper to vists the Rusk station. Pollowing the contact several natives were detained as a result of their their of trade goods from the agricultural Station of Ayura. Anicable relations were maintained after the detention of these men. Deposits to A.S. Topping Andrew Andrews

Return made to Remm Station via Orara Village.

The Pairol was made for the surveys of habing contact mink and adjustments with was emparing the friendly attitude of the villages Southward of Alyura agricultural Station.
The Tileges were visited once provides by A.D.O Emross in Tile.
Now, with the settling of the Agricultural Station in the vicinity sees such contact with the surrounding natives was considered a stream contact with the surrounding natives was considered a stream contact from the Station only increased the measure of aprending control to these villages, not as much time as could be desired was given the pairol and further association will follow.
The Results were satisfactory and since the return of the patrol Emilyon of each of the villages visited have come to Roug Station.

These matives visit the Agricultural Station

These natives visit the Agricultural Station with food but have not been previously visited by an Administrative Officer.

They seem to have been influenced in control by Alma Abiera and Aiyura villages and show very little timidity. Roads are under course of construction and the general attitude is good.

Consolidation work was attended to.

Mentimps Village:

This village as well has not been previously visited and consolidation work was pursued. The natives were found very nervous and will meet much attention to forward their progress. They were addressed and unged to construct reads but more stress was laid on the necessity of their visiting the Station. This and further patrolling only will overcome their narrousness. The preliminaries of administration solicy were set out a graikors Village. This forms a large village and was proviously

This forms a large village and was proviously visited by A.D.O Murton in 1935.

Considerable timidity was shown but contacts were made to the degree of being able to adjust the recent that of trude goods from the Agricultural Department.

In this several men /were detained.

This detention was not a premature action in dealing with a new people and was carried out only after due consideration. General consolidation work was attended to and Administrative Policy Ethernheitzt extended.

It is anticipated that here response to the principles laid out will be quicker than at Mentimpa.

Recommendations are not made for Iulais as it is considered premature for precise knowledge to be gained in this respect after but one visit. It has been preved in the area that mistakes in this direction can have very retrograde effects.

The arknowledged leaders have been singled out and upon confirmation of their leadership recommendations will follow.

Further consolidation of these villages will be given. However it now allows a freez mind that these people

promismic to the Agricultural Station have been visited and a start made in the controlling of them.

/ though personnel does not allow for a greater expension of villages to be patrolled, still in the present sums such a step was very peocessary.

This patrol has entended the petrolled area town his day and a helf march from the Morobe bender approach the Name-Lamori Divide.

A rough explanatory m op accompanies the report.

A fuller and more exact sketch vill later be examitted.

native dituations On the Whole it can be said that the Aron shows an improvement. Owing to non- residence of Europeans, trade goods are highly in demand and so on this a better control can be built up than in the Ramm area where these are in surfeit. This is an important factor. hrough this self sufficiency a great deal of the indolence exhibited is created. Several new villages, Ikunampa, Tomberakenu and Kai-era were included in the patrol.

Such villages were visited as a routh of complaints of more contacted matives on the fringe of the policited area. It Inkanaspe the results of the visit are natisfactory, some of their number accompanying the patrol as carriers, and on the return to many proceeded to the Agricultural Station at digura and are at present working there as casual labourers.

a rew village naving been come rected in a composite form

A tendiney inclines to thic throughout the area but results are

The type of matter brought for adjustment he well given evidence that an understrading is being reached.

Representatives of most of the villages of the area

Representatives of most of the villages of the area accompanied the patrol during the entire paried; but very fow actually returned with the patrol to the Station, through four mainly of servery among the Resu peoples.

### Akuna-Bokampia

The tenor of the village was found better.

Nokampi have rebuilt their village close to Amma and the two
places function as one unit.

A new root house has been built following the suggestion of the
previous patrol and readwork how been carried one.

The Lulai is of an indolest nature and was reprincipled and
reminded at this duties, must of the good work done has been
shouldpred by leading men of the village.

Impoping:

The lulai is an energetic type and has aparred his village on . Four featlies had catablished a kamlet some miles from the main village.
This was discouraged and the natives told to reside with their lulai according to policy.
This was carried out before the patred by departure and the hamlet abanioned.

These villages, as far as con be accertain of, were only once visited previously, by a.D.O. Serten in 1914.
Freshmably due to the accusations of their by Akuna, the natives were very servous and during the day sat on a nearby ridge and all efforts to entice them fluxther failed.
Example according to their number to the comp and following on this, contact was sate.
The following day the context was persond until women and children joined the men in trir confidence.
A book was made out and a temporary densus taken and Indiship tentatively given to the sen of the leading man.
Confirmation of this will be asked when it has been apportained

that the correct man has been chosen.

Saveral of the natives accompanied the patrol inroughout the area and are now working at the Agricultural Station at Alyura.

Geograp

A slight advance is to be noticed. Less nervousness and attention to Administrative matters.
The natives were addressed and told that instead of heeding reports by other people, of Administration Hestility towards them; to came to the Patrol and ascertain the truth; and, in so doing no hero rould some to them.
A better feeling nos seems to exist between Caura and Bear several of the latter bring in Capara during the Patrol's stay. A new Police Rest hower has been built

Here the village scarz to have settled down and swideness that they are willing to accept Administrative control was noticed.

A west house and police anolter has been tuilted

The progress is gratifying. as during the patrol in alley They readily lined for census purposes. They seem vary anxious to solicit Administration aid to fight their present enemies, the Ehrabupa.Discussions were held re this but the acryousness of Marabana did not allow asynting further to be done .

A subsequent patrol will attend to the matter. infore the patrol left, work was being commenced on a read to replace the present rough pad to the village, i.e. Comure to

Kai-ora a village approximately a mile away from Bean has now chifted to the Besa site and in future, the village will be referred to as Kai-ora-Besu.

San Baumus Together with the villages Charinka and ans-ai. a steady advance was seen. the willages show confidence now and much work was able to he done during the Patrol's short stay. Adjustments were made on a very good fosting. Encouragement was given the natives to form a sentral group instead of the present scattered houses. in gaining this Edvence, arou, of a different linguistic group hasbeen used as a lever-This village, being almost completely controlled forms ab exsellent foil and the new rest-have and reads under constr-action at Cassaura have been invited in no small degree by begradgement of prakes of Artu. There was communica to reprimend the Lulai on the previous

Arau-Abesias

The villages continue in their rists of good control and deem to be congreting this.

Reads and rent houses are in good repair.

The Lulei of abosin was replicanced for ignitention to some matters, but apart from this his work is good.

patrol, but at present, his work is very good.

This village lies at the feet of Mount Branders and according to report has not previously been visited. The natives who were at Arau at the time wore contacted and during the next patrol the village aill be visited. Korake-Kambaidans

The village remains in gold control. an excellent rest house has been built.

Gassa brought for adjustment were of a sensible nature and well haid out by officials. At Kambaidam(Ana) the village meens to be stapitaing. Being a mission centre, migrations were frequent, but now, the village seems to be settling back to normal.

As well, hestilities with runtibuse caused frequent migrations from Binnemarrion, but with the commation of these such heve ceased. Dombitakas

A new village has been constructed on ther main read as a result of exhortations on the previous patrol to form a o uposite group. It: Lulai koeps a good centrol. harringe matters were attended as between they and the Juntibassa villageso

Puntibenso: The vilinge continues to improve. It maintains several solice and carriers houses and a hest House and its roads in very good order. its previous hestilities with the surrounding villages seems to have ceased entirely. However with the relinquishing of its arms, its prestige has been turned to servery matters in the eyes of its former edverand the Tollow it that in boardy desired

meny at contituen

At such as you possible was done during the patrol th alley

These people of a different lingulatic group altogether, are almost entirely controlled.
In spite of the constion of hostilities, purtibases still retains its prestige in their eyes. Repeated risits and intermingling of the two villages does not diminish this. Of all the villages visited, those are the most advenced. As yet they have not been able to persuade Owene village to return from the surkness River plates although it is hoped that in the near Thouse this will be brought about. Manaraint

Here after an effort to prouve the people from their lathargy, some results are noticed.

Howin had been out and at comess checking timidity had disapprored to that the entire village was present. The fulal seems to be taking a more serious interest in his mo roles Mar Lathata at TANKS CANCEL SECTION OF

Yundanas The plresson bers is considerable. It is a matter of six months since these people were in arms and at easily with surrouwing villages. They have work bettled how to besseura and to Vopepa have At the consus a muster of Now manes work added. Twenty five of their number are at present engaged as casual laboure mi at Romus

in accordance with d pirou expressed during the lost wisit m new village is being formed as a central group, although this is by no mouns complete as yet.

sopeen: work has been done on the roads, but the villagers still show timidity. In future concentration will be given them.

Onanampa- Sawarumpa:

Very little progress has been made with these people and it is anticipated that they will shortly return to their main village akuna whence they originally signated. They were addressed andr resdwork was curred our before the patrol's departure. TO WHAT I SEE

POADSFor the most part roads are in very ggod condition and have been well tended. "Atween Area and Sassaura a more practicable route was laid

The Patrol was made on nerseback REST-MOTICES:

These are in good repair. At Omaura repairs were effected. Akuna, Korake and Kindana new Mest-houses have been built, while at dassaura one is in the course of construction.

CHABUSE

At each village the census was chooked. The figures given are more reliable than the previous statistics as the better confidence of the netives al. a more correct check to be made. The belief that Genous -taking is directly associated with sorecry seems to be on the wans. In aplite of the tentativeness of the figures the value in consolidation as regards consus taking is perhaps the more important factor as yet.

Police Buse Camps Should a future increase in Native Constabulary personnel allow it, it is keenly desired to establish a base Camp at Puntibassa.
For A vary exert time Codet Valhee was stationed thouse and

The second secon

testical adventages of this central part of the Area at a very powerful village are great.
At present the Gadaup Area is practically detached from Room and except for spondic visite, the intense Car of sereety prevents the one area from visiting the other.
This would, to a very large entent, he evercome viv. the residence of reliable police in the Area.

De orter Hapuka-tein NoBiG45:

1994

Purther work with Tontompa hamlet and thefte adjusted. Endenvour made to overome the present apathetic attitude of these people and rondwork communed. to Ramue Return made Mative Situations

the ratrol revealed a sapesimetery Mativo It is true that in some instances a degree of timility was noticed but during the Patrol's step this was to a great extent evereene. The causes of such being a guilty consolence That the people are settling down is noticeable.

For example from the previous census of the Village, of Taput
and Im are the precent about revealed "algretion by sk to their
village of a number of "copie who had left their original
villages as a result of inter-group fightener with the comparative constitut of this the return has been made. villages as a result of inter-group fightings with the comparative constitut of this the return has been made.

Again, at Immunanable and Tapu a newhork of new "mashroom growth"

hamlets have arisen in localities previously a newhork of the last former adversaries.

In spite of this it is pure groundwork.

The moulding into contralised groups after this disintegration

following truce, and the inspiration of greater confidence

of these and other peoples and their runsher development

in administrative matters remains a tasks.

The reactions to initial enthusianss has to be everous.

The reactions to initial enthusians has to be overcome.

Constant patrolling alone can assure it as well as drawing the natives to the central point - the Station.

The Patrol included sens of the Sopa peoples i.e. Funal Tenara and Tital and Enrops handet of Tapughars the juncture of the two linguistic groups commenses.

As opposed to the Rose natives a lesser degree of timidity is in evidence and also a greater profession.

Their independence and confidence enabled more to be done than with the Rose people visited, the latter being sore instined to evacion and proventention. implined to evasion and prevarication. it most villages food was brought to emblarrasment point.

For half of the way the reads the well cut but later evolves into a very bad native pad. no record of a previous census exists and the present one-is incomplete. The Lulai is not very interested in his work and this was discussed with him. He holds good sway among his people. Some harvousness exist, and to a cortain extent this was overcome in the Adjustmentor minor matters.

This was previously the Montire village but the has been shifted following the arrest and imprisonment be Julai and his non some time ago in Salamous. at the Tulai and his asm sees time ago in Salemana.

At this time the Iulai died and in a separate report reference is made to his successor.

The present leader Kasapi keeps the village in a seat condition and other witters of the group are in order. The village san arged to visit the station more frequently as it is solden that they are seen at Russ.

Matters were brought to the Patrol for adjustment and various administrative matters were discussed, and the Census taken.

On the rante laid out for a road.

Immuna asbi: This comprises the four small hamlets of ogu, station of the Lutheren Wission exists within the Village. Karaminofi, he hamlet of Karamanofi showed some timidity at the time of Cenaua taking due to the previously reported belief that stanta-

Bainagantus

huch is nonscieted with sereory.

Later however at the time of bringing food they alread all came forward.

The natives were addressed and minor adjustments were made mainly concerning marriage matters.

The tracer of the group is good only a distinct advance on the Groge standard.

The Tillages are orderly and new readwork has been done.

These people are not frequently visited but were found resy translable and much was able to be discussed and done. This is probably due to their close relations with Yampessa Village which has recountly assumed a very good form of mastemental.

a commun which should be 90% complete was taken and minor matters

The leading man of the village and normowledged by them is Abi-aki and it is suggested in a coparate report that he to made Inlais

made Inlai.
A mumber of those natives joined the patrol until its return to the Stations

LARGAL

Here a good command of his village is maintedned by tapariya the Julai.

Administrative matters were dismused and adjustments made. A census was taken the actives readily lining.

For the present pig hunting season houses are in scattered groups.

Later an is the custon they will rounite into the one large village.

Very little nervomences exists and a sensue was casily obtained.
At attempt at sesuming Administrative methods was seen and a good attempt at roads and been made.
Several of the natives joined the patrol to work as casual labourers at home.

A better centrel that in meet villages is evidenced. The natives seem anxious to exhibit the outsaid signs of civilisation and many lavariaves are noticed.

Minor matters were adjected and administrative matters attended to on a very good feeting. The Occasio was taken. In the respect hewever they down to the avarage levelein the matter of foods.

Routes were laid out.

The natives revely visit the Station and encovingement was

The natives parely visit the Station and encouragement was given to remody this.

A number of people have returned to their original village of ormspiaks.

As a consequence of the present peace with Rainants Villagers, remor enemies, a slight disintegration has taken places the village is very large. While this is gratifying in one respect still a composite village is preferable, at the ripe time such will be present for. At present suggestions to that end have been made.

Baropa Hamlet is sumposed of mainly migrated dops speaking

people who are not expected to remain on their present site for any longes of time.

The village is in an awheard stage of transition and dealings with them are caroful: their state of control is good but it is their entry on to the secondary transitory stage and the lethargy attendant on it which is requiring attention.

Consus figures are given but it is requested that in the cases of Orage Issungabi and agu these or tracted as most tent-

In the instances of Orage Balamantu and Onge it is the first time a consum is recorded while in the remainder of cases with the exception of Tapi sithough it is reported by the matires test a cooses has been previously token, no second of such exists. the work in this regard therefore; cannot be expressed as complete.

TOLION BARS GALLED It is intended to place a Police Base Comp From here observation may be kept on the area visited as well as other mearby area.
The value of this is obvious as in addition to the influence the value of this is obvious as in addition to the influence than value of this is obvious as in addition to the influence than value of this is obvious as in the area influencing progress. of an idministrative member in the area influencing progress constantly, in his journeyings he will be encouraged to take with him members of different villages and thus aid further in the lessening of the antagonisms which are a feature of the area.

CHIDS's To the villages visited seeds of Cars Pumpkin sed Papalon fruit vers distributed with the encouragement that on their maturity the natives bring them and other salesble produce to the market recently inaugurated at Room to further ald in the development of friendly relations.

The village has now shifted and forms Baismentu village.

The village has now shifted and forms Baismentu village.

Ensapi is the asknowledged leader of the village and in a separate report he is recommended as Inlai of Baisments.

Likewin Abs-ahi of Onge and Noyanki of Topu are resummended as Inlais of their respective villages.

At Orace the Inlai has not shown attention to his work and was reprimanded and his duties discussed with him. In the remaining villageo good control is maintained.

OFFICIALS OF OTHER VILLAGES ACCOMPANYING PATROLS with the system now in operation of natives free "seal villages acting as carriers, it was skee thought fir to request the respective lalais of the men to accompany the Patrol.

By this method a wider, more emicable horizon is created. It also evinces a desire in the village visited to parade their degree of sortrol. EDICALS

present cold rains, health seems good. At Tapu however frambossis is prevalent and unfortunately no supplies for treatment were available. Morourechrone has been invaluable. Being ernamentative it is called for and the later realisation that it is an effective remedy gains faith for other treatments. So far a comparative dislike of European treatment of allegate been shown but this is gradually being broken down.

MIRGION ACTIVITIES:
There were two mission centres in the area visited- Immunanchi and Tapu : both are of the Lutheran Mission. At Tesunanabi sork is alow but good. At Tapu very good work is being done by this body. No Seventh Day Adventist Missions are in the Area.

For the most part reads were poor and stress was laid on the matter of attention to them.

Now routes were laid out where measurary i.e. at Oraport of Funai and Tapu and Temape.

Since the return of the Fatrol Sacrets have been issued to the Inlair and work remanded on them.

At Orage the House has fallen into impendiable disrepair and during the Patrol's stoy work was remembed on a new buildings At Pumei a new rest-house and police and carrier's abelier have been comptracted. At Tiral there is need of shelter and the natives are constructing a house.

In the main the Potrol found the area entisfactory but in meed of more impetus to Administrative Control. The first stages of consolidation have been sycreome but the evolution from the reaction of enthusiasm must begine

#### **TENNESS**

The villages visited in the carlier purious of the petrol were not consumed as they were at first some server as any one and it was not until just before the pubrol left that they regained their confidence and came up fromly.

proviously been liked and had no nonitation to coming to the seconds. To hantet, Allina, onless had been giving a good deal of trouble, and not refused to line with TAUMERRY during the 1936 concers, were now personaled to come like and it is the upon that the community of this hamlet is about 600 complete.

now about 90% completes although in the case of the latters

one smalle-group, the Argrowith, had formerly been included with them. In the last year this latter group has killed a man of Ammaran, and the two groups are no longer friendly with the result that the Argrowithus went into hiding during the step of the patrol and were not included in the commune.

chart 50-90; complete, while OFFERENT in colimited as about 75,400;.

had their names taken care up, and the case happened at ASURULA. However contact was made with those who had hidden and had the patrol not been cut short it is probable that they would have be lost their nervousness entirely. It is thought that a inter patrol through this area will be successful in obtaining their names. Some of this nervousness is due to the fact that immediately after the last patrol here in 1935, when the names were taken, an outbreak of influence and sores occupred in the area and the experistious mind of the natives connected the two, and most of them up a afraid that if they give their members to another patrol, they also would be affiliated.

outbreak occurred mainly among those was had not given their names earlier and only about 10% of the deaths were of those also show came were recorded. Unfortunately atreas was also placed on the beneficial influence of injections to counterest framboosis and seres, but as it happened a missionary had given an injection about a year ago, and one potient had died, as far as could be ascertained, from a later attack of influence that the natives had a tendency to attribute the death to the first injection. As far as possible, this likes we disconsitual, that the only method of finally disposing of the first sends be to make as sories of successful injections.

## Chieftainship of Vi lago Groups.

some of the disturbances to the area personal to be due to the fart that the wrong non were had been appointed Julumi and the matives ignored his authority.

At MENTURED and ANOHANTE the matter was investigated thoroughly and it appears that in both these places mistakes had been made.

In the local dislect, the word for chiefted to AYAPAVAVANOR, while that for vill go e dur to KAROMANON.

When the hats were first given to the desert initials, the natives were mentioned about their chiefs but apparently the latter were arraid that they would be held recreate responsible for trouble in the walkers, and so they his with all their families.

chen the patrols orrived and started questioning the natives, as awaited was made of the real eniets, the Aramanance, and the only men willing to come forward and receive the hard were some of the Makanance, usually junior men, as the semiors were in hiding with the Aramanance, there this has occurred, the Aramanance and remained the real enthority among the natives homesives, while the man with the lumni's hat was expected to be the scape, sat.

in his village is very real, and very few matives dispute it, one

whereon when one of the KAKOMANIE has been given a laluai's hat, unless his wishes coincide with those of the AYAFAMANIMA he is ignored.

hat was one HARLIA, who although the fighting chief of the village and one of the MAKCHANES was really a native of the AMAZA, which he had oft because of some trouble he had emmed there. The AMAZAMANANDA of MAKETUATTY to one BYMAYA, and the other matives, even MAMAZAI matil recently, they him readily hately however, MAMAZAI hat been the cause of further trouble, not a result of which he was imprisoned at Harm, and the village is now settling down under Symaza.

At AN HARTU the position to similar. The AYAFAMANARA, one MOPAO, and most of the MARMANDA, hid, and hats were given to two non ARMANATO and ANTUNARAS : MOSIS however retaining his authority while the two non with hats were to be scapegoate, according to native idea.

The natives now admit that at the time inquiries were first make concerning the leader of the village, they had all been instructed as by the AXAPARAMAMA to concern him and old mention of him, and apparently he naminated one man to receive the hat and so the misconception arose.

Now that the position has been clarified these a false lulusis are prepared to hand over their hats to the real leader.

invosifications had on the natives. At both KERFTUARTS and antillard after the matter had been settled there use general set rejoicing snong the natives and it is thought that the sork of the sac patrols in these willages will be much easier than in the gas pasts.

Among other facts, it was found that the heir of spontent to the leaf-runing of a vi lagh or group is called Travillal. STARS, and us he is a language men that the ATALASTARS, he very often as a me the latter's deputy, particularly in matters which necessitate leaving the vilege, as the old her is usually too ald to week walk for any considerable distance.

The office of AYAMAMAMMA on apparently assessed trottery, and former father to come or if the come in tou and a seed that the bone is tout former helder takes over until his seed darks, when it reverts to the sen of the first Loider.

Ansever this see is still too young, it passes to the sen of the brother, if he is of age.

In practice however, a blood relative may have greater claims than a real brother, but his was not investigated fully as the natives bounde restless under continued quenti ming and the matter was dropped. The did not permit of it being resumed on a later date.

# Hative Situation

In the Isorinally area, the Isorinal parties outless had, some missing months ago, stolen neveral page from average was settled, natisfacturity during the visit of the patrol.

52 ta

Journey made to Kustess. The matives are estiling and a good gethering was present Adjustments were made and the course revised. They were addressed as the deixability of friendly relations with the Medge souring villages and discussions were held with they and natives of Puntibers and Passents who were present. That route are year and a start was made on them during the Patrol's store.

Patrol returned to Remy vielther Alyura Village on route.

ative situation

for the most part shows a steady advancement on the last

The main putrolled villages incline to a fair degree of ocates. In the Marabe arms and Emphasian villages the position is near-ing that of e-mi-combrated places.

Instant were brought to the patrol for adjustment by nest.

Pageins and only in the cytifing cases who may degree of

regins and only in the cutifing cases was any degree of newtonsons which are clarated important and only constant curbons was continue this alvance.

At return the description the vilingers were in a state of our course of decrees the results of the results of

cot due to the hortile actions of the Resa Mativess this was mijusted and mrw in general with most other villages gradually learning that they can settle disputer vithout resource to amm by reporting them to the Station, no fear of outbreak need be anticipated unless under warranted provocation.

A close water is kept on the area and with putrelling and checked

setive Siguetions (cost)

Quiet. In several instances natives of the revilings of Tembershoms have consitued that's from Alasta, some of the Tembershoms were present and in the Guse the matter was adjusted. It will be necessary to the maginture to include the village in patrols. The Alasta metives are stoody and visit the Agricultural Station at Ajura regularly and on the whole are stoody.

boso dogree of unonsinous was noticed in regate the secont milling of the balet of unousee friendly will but on its adjustment normality was restored.
The group hosever does not seen very progressive. The bulat although very planeibly boing a great aid in skrimintrative matters. After a present talk with him he seemed to show me seel in his work.

The present talk with him he seemed to show me cours Groups

in large numbers bringing food and for discussion and commu

puryococo.
They show signs of accepting Administrative methods and brought fermard various matters for cettlement by the path the hilling of their lula! By the Bena natives had effects them and the surrounding no leve very much but after the subsidence maximize of the patrol's visit to here villag some only too willing to settle all past differences and musiquements. These were effected on a sound brate. That friendly relations now aniet to evidenced in the fact that twice since the return of the patrol the matives have visited the station together.

About five menths age a curred areas.

About five menths ago a curred areas between those and the Commen anticomin regard to the less of a pig. The ometra people desired the theft and the Rose matives apparently drapped the metter.

They then told the Inimi of Commen that they had pigs they would sail him.

No went to hose and the matter of the lest pig was revived and the Inimi was killed.

In october at a Rilicht violted the village to discuss the matter and was repetved with heatility.

The present patrol made full constitues into the matter and on visiting the village for discussion was also attended, in the fraces which exceed two natives were killed.

Later on contacting the village encouns was not with and full discussions were able to be held, the neighbouring vil of commers and Casasters being present.

Assist

on the Bean Bean River thes are too recognised eroseinds, one near the village of woman and the ther near markets. The farmer is he one at present in use, but has the disadvantage that in flood times it is improvable, even as horseback. The somewhall could be although shall for gad with a sondy

bottom is passable except in really had floods, but because of the sandy nature of its banks, the river is continually chifting its course, and outling a new channel.

to the ultimate development of the road must make provision for motor traffic, it is thought that although for do are at present preferable because of lack of labour, in the end bridges must be built. Because of this the route through Errofic would be mated labour, as the better position for the bridge would be at the SDUGUI crossing where the built of the river are of stone and a bridge could be built well above the flood level.

If this route is shopen, the resh can then follow a gently shoping over down towards the FUNANT until opposite the salt springs, when it turns were through the grass flats below the village of EAPNINU, and then on the to the MUNANTIMA river crossing. This would avoid the two undescently high climbs over the spure on either side of EAPNING.

The present MULLITERA fard could be unsuitable for bridging owing to the difficulty is raising all parts of the bridge above flood level, he about a mile further down stress the river is capting between higher banks and no unusual difficulty would be experienced in building there.

foot of MY SMANIGA could be evolded by relighing the lover lying country clong the boats of the E/Co th present trock.

# SAUT DEPOCITO

In a fermer report (see 1936) a description was given of th salt spring at nonther sales one of the sources from which the natives of the LAPS and NOPA areas obtain their salt. Of the two other such springs in themseighbourhood, near nontheman and KAPUKAHARIGE, that former is the language, and with higher sching content.

necommonied by a discharge of sulphurous gases, but in this case th discharge is continuous instead of intermittent, and at times unpleacenty atrong. The veter has a fur more coline taste than at SDESSY and in faintly warm.

The method of proparation and by the matives is the same in both cases, that is, the burn the grasses and the ground at the edge of the epring, much the cahes, filter, or bather, strain, he decented liquid, and concentrate the results of sevent machings until a make of salt is obtained.

This salt is frequently traded swor the divide into the Ross stee, and is comediate of as for as the middle Ross, via the MHANTIN valley.

### Shooting of Native at KUMUINA on 20th June 1937

Concerning the above, 1 beg to

report as follows ;

hostility between the village of homolma and those villages which are situated in the valley of the MARMOMONTINA, near the Government post at FISISTUGU. when all others visited the station, bringing food etc, homolma was one of the three villages which held aloof. Several attempts were made to get in touch with them, but if the villages was visited, the natives, carrying their weapons, his in the timber above their village, and rejused to come down. Lately the attitude has become definately hostile to the Administration, and defiant messages have been shouted out to patrols and parties in the vicinity.

at nimfuna, one of the elders of kumulna village appeared on a hill above the camp, and called out that if the patrol interfered with the people of nimfuna, men of kumulna viuld kill the wives and children of the police at the simintifu station. A few weeks later, when several natives from villages in the Dunantina valley were arrested, the lulu i appeared on the hill above the station, and called out that if the Government officer then operating in the area did not cease from interfering with friends of his, he would shoot him on the road, cut him up and make soup.

After each of these outbursts, visits were made to the village, or messages sent, to the luluai, but contact could not be gained with either the luluai or the other natives, and s outed messages only received insults in reply.

At the beginning of June, natives of rININTUGU were cutting the grass on the landing ground, when armed natives from KONOINA appeared and hid in the swamp at the head of the drain. The FININTUGU natives then ran away, and reported the matter to the constable at the station, who went down to investigate, but the KOMOINA natives dispersed on his appearance.

Other native reports which have not been confirmed as thoroughly as those given above state that the luluai and his brother have threatened to kill or make sorcery against all natives who assassisted the Government in any way, by supplying a food or firewood, or by acting as carriers etc. Whether they did actually make these threats or not.

effect was that some of the natives, particularly from FININTUGU, were nervous of visiting the station, and some would only come after dark, while difficulty was at times experienced in obtaining carriers, or men to cut the grass on the landing ground.

From information which has now been recieved, it is probable that this attitude on the part of the luluai was due to the theft of a woman from his village by a man of IKANOFI. The luluais complained to a patrol then in the area, but as the IKANOFI ignored demands to return her of to pay compensation, and no effective action was at first taken to enforce the order, apparently the a luluai lost faith in the good will of the Administration officer, and decided to have nothing further to do with the station.

This however was not known at on the 20th June, when, all attempts to come to terms with the luluai having failed, the village was raided in the hope of arresting the luluai and his brother.

Apparently it was the custom of this village, fearing police action, to place sentries on the tracks leading to the village, during the stay of a patrol in the area. One of these sentries gave the alarm, and the raid was a failure, except that an enormous quantity of weapons, some a recently made, were confiscated and destroyed.

The luluai an his brother were urging the others on to attack the police, so a party of police sli ped round behind him to cut off their retret.

A native was seen in the act of firing and was shot by N/C MALAGON, and this warned the others.

The luluai later stated that this was his son, who, bits one leg advanced in the act of firing his bow, was struck on the kneecap, a and the bullet, deflected, pierced his abdomen.

He was callied away by his friends, and died later, but this was not known at the time, end he was thought to be not even wounded.

on the following day KOMOINA sent in peace offerings per men of HIMPONA. The message was carried by the mission leader (Popetera) of HIMPONA but he distincted it to his own ends, saying that the gifts were from hid own vitlage which desired the franchip of the Government: the girls were accepted, and there made in teturn. He was requested to carry a message to KOMCINA, offering place, and asking them o come, if not to the station, to a heatral price such as HIMPONA to discuss the matter. This he agreed to do. Apparently he kept the presents for himself, and told the KOMOINA luluai that their gift, had been relieved with contempt, and himself was threatened with arrest, while KOMOINA as threatened with a further raid. Two days later he returned to the station and sold to the luluai of KOMOINA as laughing at the failure of the raid, (at this time nothing was known at the station of the death of a native) and was planning to raid the station on return.

For the next few days, messages were sent to the luluar through other natives, but they all reported that he had listened to them in

silence, and had refused to answer them. He later said that, believing the first report from HIMPONA, he was suspicious of all others of a different tenor.

Action in the meanwhile had been taken against IKANOFI, and a ter reports of this had reached KOMOINA, another visit was made to the exation village on the 5th July, ut the natives refused to appear. Not until the 10th, was a message received from the luluai that, provided no attempts were made to arrest him, or to shoot him, he would appear on the landing ground to talk things over. On the 11th he appeared, and as natives from IKANOFI were also at the station, he invited was invited to attend the meeting, and discuss the matter of the stolen woman. This he did, and received compensation from IKANOFI. A peace ceremony was then held between HIMPONA, KOMOINA, and IKANOFI.

A long conversation was held with the luluai and his brother, and they both denied the most of the threats attributed to them, but the luluai admitted that when incensed over different things, he may have said words in the heat of the moment, words which he now regretted as he did not mean them, and he was only too anxious to be at peace with the A ministration. Compensation was paid to him for the death of his son, and mutual regrets expressed. The duplicity of the HIMPONA naive was then brought to light, and the luluai preposed to some back the the station in the morning, and make peace with FININTUGU. This he did, and bringing many more men of KOMOINA ith him, drotons were planted by KOM INA, FININTUGU, and the patrol officer.

On subsequent occasions, KOMOINA natives have brought food, firewood, and timber to the station, and have supplied carriers, so that it is thought that the luluai is sincere in his desire to remain at peace, but only the future can prove this.

It is thought thee better to let matters remain thus, rather than to take proceedings to prove the statements attributed to him, and to charge him with making threats of violence, sorcery etc. as he has as complete a control over his village as has the luluai of HENKANOFL and any such action would only tend to alieniate his friends as well as himself, whereas his continued friendship is greatly to be desired, not only for his influence in his own village, but for the influence he has over other villages, particularly those in the upper portion of the KARMOMONTINA valley, and the lower portion of the DUNANTINA.

This was a centiment lon of the other Gedoup patrol and it oferioted the area. Apart from OFFIA the native situation is good. Although I think that the OFFIA natives were only seffering from a guilty consists as they had just recently stolen come pigs from the NAVARIE natives. When that is settled I think they will be ruite alright. Thus the whole of the Gedrap was completed and I find that although at the moment they are a little nervous of government patrols I think that it will not be long before they are completely under control, in the full sense of the word.

Ramu Copy

District of Morobe FININTUGU Base Camp. 11th July 1937

Officer in Charge RAMU

Fighting between Natives and Police at IKANOFI on 28th June 1937

Concerning the above, I beg to

come time ago natives of KOMOINA village complained that a woman bed been stolen from them by IKANOFI natives, and they requested that the patrol then in the area should take action to instat on her return, or failing that, suitable axion payment should be made to her former husband in accordance with native custom. Messages were sent to IKANOFI to this effect, but these messages were ignored. When no further action was taken, the KOMOINA became restless, and it is thought that their present hostility to the Administration is due to this cause.

More recently, the IKANOFI natives have been requested by their neighbours to assist in the cutting of the grass of the FININTUGU landing a ground, and to keep in good repair their share of the neighbouring roads. This they refused to do, and abused the natives who made the requests to them,

They have also threatened to tractice sorcery against all natives using the main road between Ramy and FINIATUGU, with the result that this road is not now used by natives of the KOMPIRIRI valley when they wish to visit the station, KOMPERI natives oreferring to travel via YOHOBI and FAGARMINOFI, AVANINOFI ratives via FAGONOFI, and ABABI natives via HENKANOFI.

About a month ago, two HIMPONA natives returning from visiting friends in the COMPIRIRI valley, were shot by IKANOFI, one dying immediately on his return to his village, and the other a few days ago. Formerly the IKANOFI village had been built on the lower portion of the creek, but following the shooting of the HIMPONA men, they destroyed this portion, and withdrew to the old site in the bush at the head of the clek, same of them building a new village in the bush at the head of Mt MUKERINKA,

of this village, fully armed, vatching this road, and they have boasted that to others that when all others threw agay their sorcery charms and weapons at Ramu, they hid some of theirs, and only gave up three which were useless and worn out, since when they have been busy making new and better ones.

on the 22nd of Jun a visit was paid to the village, in order to question the

nativer, and to reason with them if possible. The party was merely subjected to abuse, and a small dedetechment of police, sent to occupy a commanding position to prevent any treachery on the part of the natives, was fired upon. In accordance with their instructions, they did not fire in return, as no barm was done by thenatives. A message was sent to the party in the village, and the whole party withdrew, arresting the luluai, and another man.

This action had apparently no effect on the remainder of the village, who continued defiant, and accordingly it was decided to raid the place on the morning of June 28th.

TANGUI went to the upper viblage, while a second party with the officer went to that lower down. This party, having further to go, had not reached its position when the first party reached its destination, and successfully surrounded the ouses. The alarm was given, and men in the lower village called out to the others; "Hide in the serub, and shoot the police in the clearing; we are coming." Before they could leave their own village however, the second party had reached them, and they were unable to lo as they wished. When the police in the upper village heard the shouts, they thought they would be surrounded, so left the village, and returned to the top of the hill, thus enabling the natives in the houses to gather their weapons and escape. Finding that they had been unnesessarily alarmed, the police returned.

By this time, the natives, now thoroughly aroused, had hidden themselves in the scrub and swamp-cane on the sides of the path and opened fire on the police as they came along.

N/C DONDO was wounded in the left forearm, a d his assailant was that by N/C MALAGUN who followed.

N/C HAKOWAI was fired on by another natives who missed but was killed by the constable before he could fire a second time.

N/C BEDUN dodged arrows fired at him by two natives, one of whom he shot, and seriously wounded the other, who is reported to have died later

The second party then arrived at the rear of the natives, who finding themselves almost surroundedm made good their escape before the gap could be closed.

Natives friendly to IKANOFI.
from FININTUGU, KINKIO, and SABIZA have been used as
intermediarias to establish ontact with IKANOFI
after the fighting. The majority of IKANOFI
notives had taken refuge with a hamlet 66 SABIZA,
and at first they refused to come near the officer
or the station, and more than a week was spent
Sbeforesatisfactory entact was made.

On the 6th July a visit was made to SABIZA, and as the natives failed to come up as promised speech was gained with other at KINKIOon the 9th. On the 10th a few visited the station in company with other natives, mostly from KINKIO. That night they returned, all but a few, to their willinge in the KARMOMONTINA valley. On the 11th July, a large party of voer 50, men, women, and children, wisited the station.

Payment for the account woman was made representatives compensation paid of steading he to the two men of HIMPONA killed Compensation was then made for the four men of IKANOFI killed during the fighting.

When questioned about those responsible for the makilling of the HIMPONA men and the theft of the woman, they blaced the blame on the dead men. This is obviously a subterfuge to hide the real culprits, but the death of four of them number has had a profound effect on them, and it was thought unwise to press the matter further. The peace ceremony was then held, representative of KCMOINA and HINPONA also taking part. Later that day, some of the younger men, who had previously visited the station, came up and delivered their weapons, which were destroyed. N.6.E. (N. C. Elliott)

#### TERRITORY OF NEW GUINEA

RAMU, Distric of Mordae, Monday Jane Joh. 1937

Mr. Cadet McPhee, RADEL.

Patrol instructions
You will proceed today to the village of Aiyura as
the first part of a patrol to the Gadoup Arca.
You will thence proceed to the camps at Akuma,
Omaura, Sasuara, Arau, Korake, Funtibessa, Binamar'an, Mamarain,

Omama, Kundana and Arons.

The work to be done is general consolidation work and you should settle, so far as you are able, and disputes brought before you. No pleise action is to be taken under any circumstance before being referred to merunless, of course, the party is in danger.

The village groups of Mamarain, Arona and Rundana

require most attention.

Fifteen carriers will be made available. These carriers are to be employed on road construction and improvement of base camps when not employed as carriers. Tools will be supplied.

The patrol should take not less than 20 days ,as it is through quietly working amongst the native that best ro-

Various matters for attention will be given you under separate cover.

T.G.Aitchison; officer in Charge

#### Mative Situation.

The native rituation is quiet. The natives in the area ocen to have stopped their internal strift, and to have headed the telk of the toversment officers. The entires in all villages visited were meet interested in the petrol and helped in currying cargo and bringing in from in fact the petrol was everlosied with fact in in any villages and in most cases foot was fest behind. The lulusis are showing good knowledge of their work and appear to have central over their villages.

#### Eingion Situation.

The makive mission temphers of the Inthorna Massion are gaining quite a hold on the matires. Jose churches end schools have been built throughout the area and are well attended, particularly at Elekandian. The mission teachers themselves sure most useful to the patrol as interpretars and helped in other ways.

## Descused Retate.

The natives had done a good de l of work on the tracks especially the runtibassa satives. Roads: -Rest Housest-

Rest houses required a good deal of repairing but at each village we found the surrounding grounds well cared for especially at the Funtibuses villagos.

#### Remarks:

The first part of the patrol was taken up in inquiring into land matters. The natives are agreeable to sull a block of land containing 2,000 acres approx. to the Dept. of griel. In order that an agricultural station may be started there. Inquiries will be set out in separate report after necessary approval has been sought from headquar ern.

Various small matters for adjustment were brought before me at Aruna and were settled to the apparent satisfiction of all.

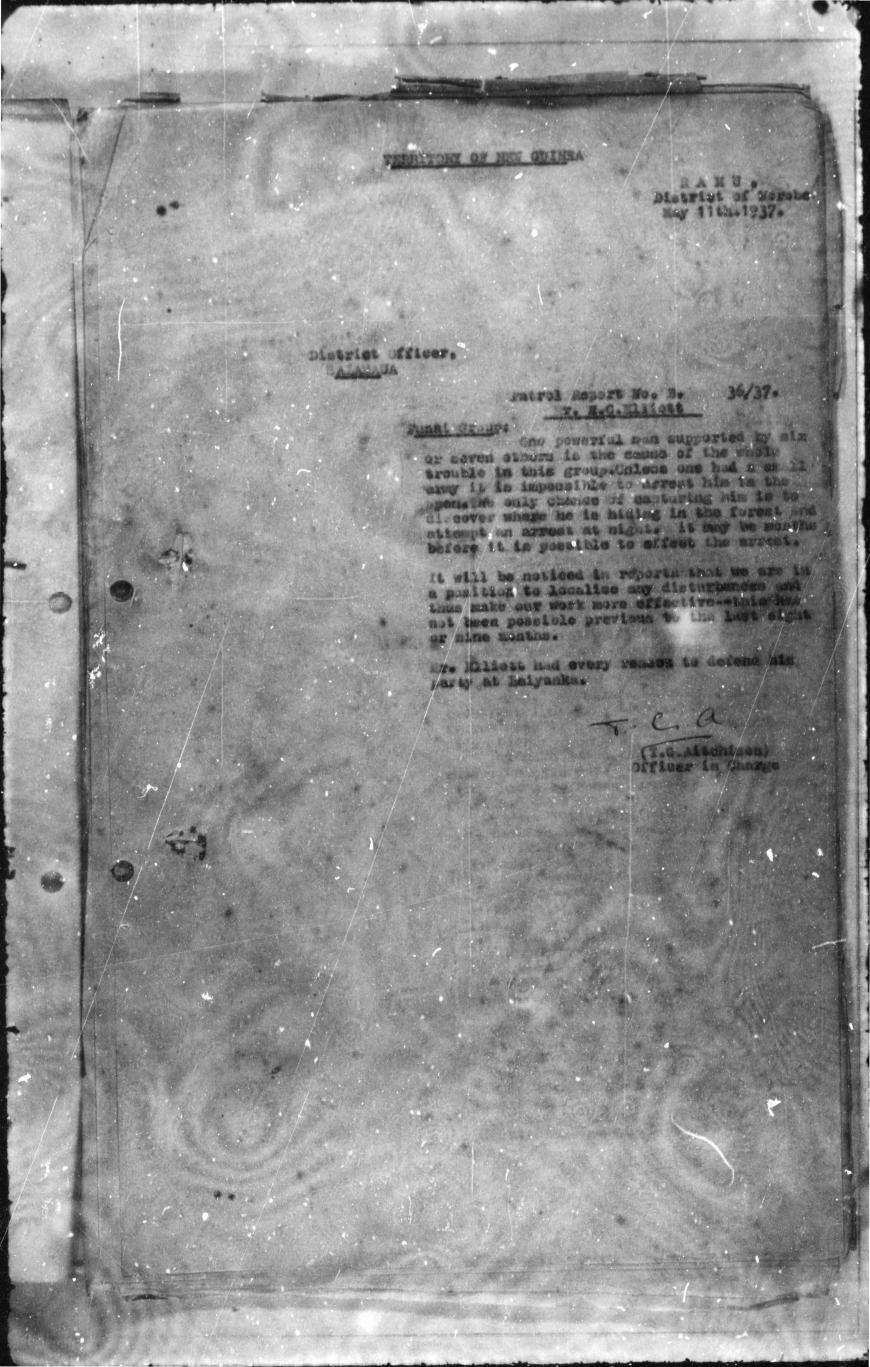

Complaints had been made that outlying villag -cs had been behaving in a threatening manner towar -de the members of Akuna and maura groups. No action was taken as the offending villages are outside our sphere of influence. It is hoped that the pouceful villages are not disturbed.

A complaint was made by the natives of Korake and runtibassa that the natives of passure and pool on a waman from them towns toformed that a number

of maguera natives had visited the village of marake to take part in a 'sing ging' when they were leaving a group comprised of four men had called to a young woman to bring a little food for them and when she brought the food they had kidnapped her. The woman, is appears, cas from funtibass but married to a wan at Korake.

The natives of the three villages were trought together, and after considerable contier and abusive remarks regarding the opposite the case were found to be as follows. is continuery in these parts a wange may be married to a and has not yet reached the stage of publicy. The woman belonged to the funtibessa villages and the youth to Korake the woman living with her musband at Korake The woman was dispatisfied with her hu band because of his inability to carry out all his duties toward her. The husband's father effered his services to the women ac/apted them on two occasions but was not patiafied and made as angements to desert her amsband and marry a man of Casaara. The o of tunity of recurning with men from Sassure offered itself when the \*sing sing\* was being held, and she pretended to bring food to their village, and then escaped with them. Some of the more responsto hassure before they could bring her before her hosened. Her loss led to a great deal of discontent and feeling was remain between members of the villages; esceptially as some of the younger men of assaura were encouraging her to remain at assaura, he matter was settled and the younger men of assaura warned against encouraging 'ran away' wives to remain at insir village.

I have quotes the case more or less fully to demonstrate the stage to raich the natives of this area have advenced during the last months: formerly such as securrence would have led to a fight between the villages concerned but they are not willing to bring the matter to an officer for adjustment such cases are for from the matter to an officer for adjustment such cases are for from rare and during a partful there may be as many as ten or a dazen brought for adjustment. The natives of all groups were very friendly but I was purticul ariy impressed with the work of the runtibassa people who were formerly the most bucheard. non for three menths. (T.G. Altchison)

merlice, he is reported to have said that he would those any Soverment official, or any mistoury or mistout teacher who same to his village, or even used the road below he willage, as a reculof union invests the road below he willings, as a reculto use this road, the main road between our mission.

stations, TidinoTRA and Wilasovina.

Werder he to tope an that a visit would be made to his willage, and that if he chose to give up his weapons and comes his threate no further action would be taken. (At this the it was not about that he was responsible for the Coath at Billsoff and that if he permisted in his attingence he would be arrested.

The valings was accordingly visited and it was found that weepons had been stacked at the backs of the houses, bowe viring ready for any, whilst the young men were writing searchy.

In matuch had been present, at the police roved all the young declare the denare of the things, and conficuated the weapons.

That was quickvitable enough to their the citation to his swimmings, and sporteness has been a put they there is reclings to gave them as.

Unfortunately the case believed and he was left at large.

Investigation of affairs.

In our freeding and the village should be the state of affairs.

In any our reached,

In all has ears, and burnt are hause down, and source to have reverge feeture.

In any outreached,

In all has a back to the faith of the particular and the village and led food, and said that the friends of the village and led food, and said that the friends of the village and led food, and said that the friends of the village and led food, and said that the friends of the village and led food, and said that the friends of the village and led food, and said that the friends of the village and led food, and said that the friends of the village and led food, and said that the friends of the village and led food, and said that the friends of the village and led food, and said that the friends of the village and led food the the there is not the village.

The next a raing, TURN himself, or appearently confident that his protectations of reform had been believed, as we had been extent to tall the natives that they had, arrived with the others and walted through the casp, impeating the defensive a measures town. He then started a discussion, palculated to district abtention, his he was arrained before he could give my signed to his friends, interpretable that the blacks.

This man is definitely a memore to his district, so his dignting power has been proved, but he has the local natives tempified. With his removal, it is thought that his friends will dignerate his following was small, and that his personality clone segment officient to oversee all openition, it is apparent too, that his membal owers are attakentive, elthough he hisbelf is no longer young.

Reports had been received that the the metives of the men of the m

It was confirmed that EDAR matives had select a woman from TARM, and menom sign. Letter at the instigation of MANOFI, they stoke shother. Then the onlives of HOTWINA applicad by a few from TARM, atole a tenth big from TARM. The sallives of TARM, being almore in their declaration to

abevein from fighting, forbore to retaliste, but appealed to the Saministration to help them.

It is said that at the time the netives of TARN and surrounding villages had given up their vespons, the men of TRNE and HORNIKA refused to give up theirs, saying that when the cuteus patrol had gone, hey would short all the sige belonging to their friends, and having finished them, they would short the men and wares. The woman stales was provented by from returning to her harb had by the threat that she would be shot if she attempted to the that she would be shot if she attempted to escape.

After a while, as no downment careful appeared, some of the fighting men of them they would still all members of it. This spread to the other to villages HORNIKA and RANGEL, and they also made such statement.

and the men concerned in the digetenting and the theft of the words wer arrested. As the patrol was returning to camp, and of the younger fighting men, against the advice of the edders, attended to embuch the party and release their friends. As the patrol took a different route at the return this failed of its object, but the address, enraged at being failed, tried to suipe from sover, but we then fire was returned, they desisted, and the police and princess arrived quietly at the name without further sphesiption.

eith the a tives, and at a gethering of the send ment and natives from TARN, KROW, KRYAFA, and SEVERA, the stolen woman was returned to her hasbead, the pige returned to the natisfaction of the original owners, and a large quantity of bows and arrows given up.

The MESS spokesmus said that before they had been members of the TAFF people, but dissention his arises, as a result of which they had left the valley to live on the heights with the WASA people, forgetting their HAFF sustant and special, and became as one with the WASA, at easily will those in he valley below. Sow hovever they hid soon the over of the Doverment and were willing to make reignal with their brothers as they were told. To have that this was genning, they said heavy the incomments and trace with the incomments and they were the incomments and they were the incomments and their they was told.

To show them the facilehouse of their tell of milling members of a Government patrol, a demonstration of the ever of a rifle was given.

One of the chief fighting was of ARRY picked out a bow and arrows from those gover up, and fixed at a seed-mark on a cost. Himse fixed whose was a miss, but the second went within a foot of the mark, and penetrated the wood for a depth of two or three inches. A rifle shot was then fixed, atting in a chair, as the intives exe told to demonstrate the case with which it could by handled, but actually to obtain a steadler aim, shattering the arrow at the point where it entered the pood, and passing completely through the wood, entered the ground beyond.

for men had been billed and one wounded when the parrol

when returned the fire of the actives, but labor reports stated that two only had been injured, sub the others ere said to have been killed as they have involved in the pipe caling, and had gone into hiding, in order to make sure however, that these would be no Panagur among the relatives after the patrol had lett, compensation was paid to them.

According to statements under the the entires, the five sur onedly milled, together with two of those arrested, were the instigators of the pigatesting, and an assemble on the inlust of farm, and he remonstrated about the stealing of the sense. The other younger new, although they had taked part, and done so at the bidding of the others, so they were released a ter being contioned.

In eifte to the early, and returned a new to replace that shot by thes. They also gave as one bay, which they stated one all they had, the others having been given up previously. This I am inclined to doubt that they were told that it was safficient, and the second coremany between the head man of MOTHURA and TAM completed the work.

The village grows were one of the few which refused to attend the consus last year, and inco then, in a it of efforts by the midnish helpers and teachers, the datives have permisted in their refusel to give up their weapons, and latery have a threatened all mission teachers with violence, should they extend to oppose the Tilings.

lergy village, the mission intives estimating the population at well over 200. Didging four the number of houses seen, this to thought to be an overestimate, and it is more likely that the master is between 100 and 150.

To the satives to the village there are also to be hand discontented a lives persons from other willages ender indicated a lives persons from other willages ender indicated a lives persons from their relatives in groupe under includence, have sought refuge there as one of the few remaining pieces where they would be free from interference.

All actives seen in this village were heavily among, and transcessful attempts fore made to persons them to follow the example of their friends and disease.

They, in common with other villages who were the courses of disturbance in the area, had threatened to shoot any Government efficial of constable who appeared in the village.

They were invited to viest the petrol of Principal and this they remined to do, extending an invitation however, to the patrol to violatheir village, saying that everything would be made ready for for its arrival, firewood, etc. being prepared. Triendly white of the village who excived later stated that this was an attempt at treathery, no the party would be attempt as seen as a case of the mane of seens came.

mesepted, but the party arrayed at the village unemposted and you the rest. So armagedest bathoparently

been made for its reception no stated, empact for the 1 rge number of meapons corried by the satives, the majority of mean rom emey. Some of the charm of the village stayed, and ster neveral house, con tack the betablished with some of the others.

Although they refused to part with their vences, gifts were amenaged, and friend the probably indicate, was expandeded. Later the mission teachers visited the village namelested and it is thought that there will be no further violence offered them for some time, during which time they may be successful in persuading the actives to dispute.

presented further compilienties being done in this areas but later reports from the missio. Leonners are cathefacte

Reports were continually being received that men from this village were travelling across the divide to assist in the fighting between the Principles and the Billionia.

Ilthough onlied fighting by the natives, it was assectabled that most if not all, was done vocally.

A pertain anount of unrect ha present modes the modelly healet, and so far an ordered from active reserve, it has could be gathered from active reserve, it has active being an elderly men who has never taken the leader being an elderly men who has never taken class y to Government inclusive who has never taken active at the could remain the say of the Alexandra matives were injured, he would remain to an above at the FIRITION station.

contact with amone as through the fore may ives.

22nd. Again unpunuessing in gaining contact with moments matives a arror in approaching them from the arong side in the first instance.

by Bilimotya people that summer antives threatening ; lot but not texting any action 24th, Resumed to Station visiting Alamoutina on route.

The road to Tairora and Ablera is being kept in g good order. bier natives are making disprovements. The Roads around the Borthern villages are being kept clean for the greater part. They appear to have at led up fairly well to the wet cesson. A new route was marked out for the tracks joining the villages of farther to the North-Though this track is through forest it will be an improvement on the present one. the awampy parts of the roads near Pusane require attention which is now being carried out under the supervision of a constable.

An experiment is being tried with a new type of house. This natives' attempts at greating houses on rectangular base are not a success and it has been decided to try houses built after the native conical style.

Part only of the main object of the patrol was achieved I made the error of approaching the villages of Asspain and Amonants from the wrong direction.

It appears that the anomalte natives invited the malives of abenakene to a 'sing sing' alter abenakene natives of abenakens to a 'sing shig'sine abenakens natives went down to the sing sing' but one of the men of asomatu became excited at seing a native who was present when he had been arrested some time ago and shot him the "enakens natives returned to their willages fortnight later the abenakens untives found the men she had shot one of their members attest ing potatoes from the abenakens gardens They on set them away but so old woman larged behind in arrest to abt in the last of the second states and the second states and the second obtoin just a few more potations and the Abenakenu -ives shot her.

It was pleasing to have the Abendrenu matives co the camp and momit their wrong-doing after the injured and to visit the with me as soon as we were

able to establish friendly relations:

Every difort was made to establish friendly relations with the asupula as anomanta natively in a parara they are afraid of the established theme action of one of their number in whiching the benakens native. It will be necessary to nork through their friends in order to gain Contact . Contact will no doubt be ostablished with the next month or so.

Remours had reached me that the Puncest natives intended making trouble with the natives of Bilimciyabut investigation proved that the symmetric merely been talking a great deal and made a threatening gest were from a suntain topolon Bilimciya natives appear to be most friendly towards use.

Feb. 9th. Left station and proceeded to villages of Kainantu, and Umanapa.

into recent complaints concerning behavior

of Iso-ontenu natives. 11th. Left Funnum 1.0.m. and come to Iso-ontenu village at dawn Returned to sta -ion after abending most of the day at Mainantu hamlete.

13th. Left station and to Talfora vill age. Inquiries made into behavior of certain connected with the group.

14th. To Abiers and Grara Villages. 15th. Left to mp at 2.2m. and took members of the hundly haddes from Villa to be charged at Ramu. Returned to Kamu.

# General Remarks: -

Complaints had reached me that the natives of the villages from which we arrested certain unruly mombers had been killing pigs and generally schaving to a displeasing manner towards the natives of other villages. The natives of Yoyl-Yamnt enu complained that one of their manber had been wounded by a native from Iso-outenu.

After the reports had been confirmed we entered the village of Incommend and arrested 14 natives who had been causing disturbances. The village was situated in a cane-grass swamp and considerable diffic -ulty was experienced entering it without allowing the inhabitants to know of our approach. The party was fired on by native who were living in houses situated further in the awamp and two natives were shot in the act of firing on the party. One was later sent to Salamana to have the bullet extracted.

The second part of the patrol was

2. / 030 10 200 made to the Southern villages where it was reported family disputes were in progress and disturbances might result if they were not checked. The disputes were mainly concerned with pig and foot stealing which was likely to lead to reprisals arrests were made after careful inquiry into the cases and the ratives concarned sentenced to short terms of imprisonment. It is not anticipated that there will be further trouble from the unruly elements of the groups concerned. (T.C. Altchison) Officer in Charge. So Mankanort which is on the main road from Rapu to Beans Benna, in excellent track run Tron Tehena to Mafanofira Camp. The road from Mar-canofira to Witibi is in good order and a great doal of work has been put into the formation of the bridle path. Several Asprovements were made in the grading and the natives are to butl the read over the route marked out. . good deal of work has been done on the road between Witht and Onelunka. Taking into consideration the fact that the south Western villages had not been previously visited it is plausing to note the excellence of the roule.

The camp at Finintigs still requires considerable attention. The Kompeys, camp has been greatly improved by Mr. Elliott. It is proposed to erect a camp near the village of saninofi which is site uated between the Komperi and ababe dung. The natives had erected rough camps for the patrol at Ababe, Johan and Kalanofira. These purpose will be improved from time to time them has payed to be through the west -gh the wres.

General Remarket-

SOMEONE PARTY STATE AND ADDRESS.

The object of the patrol ( to entablish friendly relations with the natives in the South testern corner of the Kafe tribs. The patrol of the factors of the -ther to the South belong to a trib known as YATE trice and direct in some respects from those of the Maie tribe. No sifort was mode to establish contact with the Yate people as they are not distarbing the Mafe natives and there is quite sufficient to keep us occupied in our general Consolid cation form at the moment, non we have a firm base on which to work we can think of visiting the Yate people. To the last of The Kafe is a small fribe known as the FORK but it appears that this tribe will soon be absorbed into either the Kafe or Yate atticioned training triben and

Arrived Pinifing.

#### VIDIAL ORDER

The natives were quite friendly, but more interested in their "el\_pinge" them in the patrol, the singsing season now being in full swing. They are also dising inest to set an earliers for the same reason.

Vit: the TILAL sub-group, the pairoi was more successful, mainly because 4ke of the indusi's efforts to gather the leople when the pairoi arrived. They were highly delighted with a distribution of photographs taken on a previous visit.

#### TOSTROFT GROUP

The three wisit villages of this group visited, TUSINGRI, TREMUSERIA, and Hama-I, after their initial hesitency was over, gothered round the patrol in force, and desired it to sty for a week or more. Unfortunately the stey was cut short by the socident to Holden's plane, which close new uted BAIYAHAA village from being visited.

#### Makiye Yooda

divide, as with the WISAE peoples. Good in somposince it is now the intermediate period when the old sweet otato erop is finished, and the new one a is not yet ready. In this gloup there are however a transmission makes of cabbages grand, and a corresponding demand for out with which to cook it.

The other side of the divide energy the TISINGTI peoples, has a bountiful erop, and eince there have been very few Surgeons through there, a great descend for trade pools exists, and this probably explains the natives desire for the plant to stry longer in the area. They were cult willing to bring food to the B as fern at DIRECTO but had not already dear as as they were not every of the changes there.

Bilimolya vigit.

The natives from Bilimoiya had assaulted and behaved threateningly towards some natives from rumani when the rumani natives were returning from a rrying cargo for me on a previous patrol.inquiries were made at almostica as to the relations of the Alamostina natives and Bilimoiya natives as news had reached me that the trouble maker from the Bilimoiya group may be in maing at Biamontina.Commiderated difficulty was not with but we were inally able to ascertain that the alamostina natives had been sheltering this ran but he had returned to his village. The following day we proceeded thanks we left for Bilimoiya villages having to pass through unantu villages on route for party of twenty passed through the village in the hight without waking anyone and we were able to effect arrests after considerable difficulty as the natives of erecter stockades around the villages and were allot to his effect arrests after considerable difficulty as the natives of the people arrested identified and charges laid a ainst them, have the people arrested identified and charges laid a ainst them, hince the second visit to the village the natives have brought in the leader of the troublesome group and he is to be imprised end as Balamana.

Tairora: -

News had reached me that the not ves from Tairora were being dicturbed by rival families trying to cause a break in the village group. A visit was made and the two parties interviewed --certain adjustments were made and the matter has been settled for the moment. Soth groups were warned if the consequences if any fighting took place.

Seketuantu.

A complaint was brought to me by natives under indenture to A.J. readon that the Reketuantu natives had been
to having is an offensive manner towards them. They complained
that they had been struck with sticks and stones and Jack the
natives were guerally unfricted, to rards them.

Upon investigation it was found that the complain-

ants had joined in a game with some endingers and the game termine somewhat vigorous and sticks and small stones were being thrown by one group of enidden in at the other group which the labourers were helping, one of the labourers was struck and the three of them ran away saying to the hatives that they were going to tall the 'Kiap' that they had been assaulted by the Kesetmantu natives on their return trip they passed not the village and informed the natives that the 'Kiap' was on in to shoot them. The natives informed me that they had spent the might in the lush sizer they had been told that the 'Kiap' was coming to shoot them.

The complainants have been charged under Sec.83(c)

#### MAZAWE HEALTH

In the WSA? eros, coros and asia disionans were rife, and about 45 enous of conjunctivities were noticed. The active mission tomober obtains a rankle enount of medical stores from Kela-II, but this is last liciat. That stores could be speed from the potrol equipment we 6 left with him.

In the other creas, the health of the matives appeared to be good, with the exception of the village of NAMPHH. Here skin diseases, such as grillad and Empires of feeted the greater proportion of the members of the village, and is probably due to the dirty condition of the place, and matives, and also to the fact that there is no medical tultul there, the former one having died mome time ago, and so for no successor had been appinted.

#### BOADE

SAMM ares; Natives have done no work on road since it was mark d out.

AMARI rea; Good, with the exception of the road to the ATSURAS droot, and the portion in the care of ATTIGURIS which had been neglect d for mose time. This and now been remedied, and the roads are now in excellent order throughout.

omeried out on the main read to Malaret, and the read to West Based from Gambles has been cleared, and bridges built over expect crossing the track. Thus the new road to Remu from the Maraham to now quite saitable for foot traffie.

STRAP arer: Boads non-existent, but a cone bridge to built by the patrol in order to comes the FIRAP river, and the natives of HOPIRIMED have been instructed to construct a come suspension bridge over the STRA river, so in times of flood, the unter, confined in the garge, are a night velocity, and cross my is extremely difficult and dangerous.

ALGULIS erea: — — grase on the rests in this arm had been out by the antives, but they did actualist that the necessity for side drains, with the result that waiting was imposed by portions that were morely pig wallows. — The natives were shown how to construct a reasonably subjectory youd, and consequently construct a reasonably subjectory youd, and consequently construct a reasonably subjector where the consequently construct a reasonably subjector where the consequently consequently construct a reasonably subjector where the consequently cons

the notives are under medium height, but sturinly wilt, somewhat rescabling the natives of the Shadon, and are of the types, one very light skinned, almost yeller, with brown symm, and it? I festures, and a block skinned coursed fourt red type. he lighter skinned type is said to suffer more than the other from sures at low r sittleder.

The stacks dist was formerly source, but the mission helpers have introduced term, going, and commute, obthough the inter are not yet and speach to work, and the restricted to the lower pars of the walley.

#### KALGULIN AREA

After leaving (USAR the entrol visited morthwes from the Bina River area were threat ming reprisely for one of their friends enught steeling, and sent to Rema to be imprisoned. Fearing that the people of STRA would carry out their threatthness of Resident Constitute to move their village some four miles south, away from the foothills. An attempt was made to visit the BINA people, but was prevented by the flooded state of the river. This size prevented the petrol from visiting the village of SIMMIAI was set as intermediaries between Morioland and SURA.

The Bills river ares has never been visite by a patrol, at the antives have a contact with whites apart from one who was to wimma. Pron the throats they made to the Borlingro, it was obvious that they are as a few destruction that would be comped it they attacked as wheel force named with risles.

The viliage of waters was found to be in a filthy condition, and in the village book is man found that of all strong and make passing through, five had separated unfavourably on this minte, but nothing had been done by the native. They were secondled, reprinteded, the village cleaned unfar an ervision, and set to make on the rande, bittle, although the grass had been out, one without drains, and in parts were no better than algorithms.

visited, and so his real house collapsed during broukfast a day was spent rebuilding it. The landing has inspected, and agreed made to three actives (are below)

of the role become remained, and the potrol returned to Manager a solution remained, and the potrol returned to Manager at a solution remains for here. Notes had been east out assistant, and presenting Minager at 10 million to been to been. Of the solution seem rejected and the rost terms to been. Area this good removed, it seems that if the left of agriculture expense their etation at here. There will be so difficulty in obtaining imbourage from this orde.
