First UCSD Open House To Be Today

Today marks the first annual open house of the University of California, San Diego.

Highlighting today's activities will be the dedication of Harold and Frieda Urey Hall at 4:00 p.m. in the Revelle Plaza.

Many facilities on campus, including dormitories, art gallery, library, laboratories, and classrooms will be open for inspection. Students will guide visitors through the campus and answer questions about UCSD.

Special entertainment will be presented in the main cafeteria and in the Humanities-Library auditorium. The aquarium-museum will be open at Scripps Institution of Oceanography.

For further information about today's program and a map of the campus see pages 3 and 4.

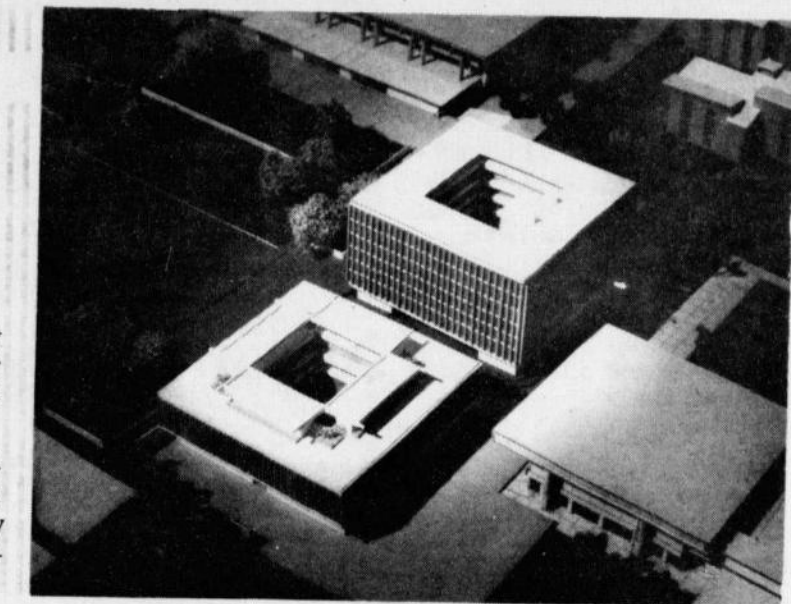

New College To Be Named John Muir

On April 22, the Regents of the University of California authorized the naming of UCSD's previously untitled second college in honor of John Muir.

Muir's work embodied many of the disciplines on which Muir College will place emphasis. The selection is particularly appropriate due to Muir's scientific and writing abilities.

Muir College will begin construction in the fall of 1967. The presently proposed curriculum differs in certain important facets from that of Revelle College. The general education requirements will include a three-term sequence of courses on the cultural tradition of a nation. Students will be offered a choice among three Western cultures, an oriental culture, and an ancient culture. The culture will be studied in its literary, historical, philosophical, and sociological aspects.

Students intending to major in sciences will be offered courses similar to those in the Revelle College sequence. Those planning to pursue work in other areas will be able to select a special sequence emphasizing fundamental concepts underlying all scientific disciplines. Students will take a sequence in mathematics, with various tracks to suit different interests, training, and educational goals; a sequence in

NEW DORMS — These new dormitories, scheduled to be completed in September, will complete Revelle College.

New Revelle College Dorms To Complete First College

Completed working drawings of the Revelle College Residence Hall Unit II will be presented in approximately one month by Tucker, Sadler and Bennett, A.I.A. architects and engineers of San Diego, to the University of California at San Diego.

Completion of the dormi-

tories is scheduled to allow them to be open to the Fall 1967 classes.

The dormitories will be the final phase of College I of the University and will contain two buildings; one six stories in height and the other four stories.

Cost of construction is estimated at about \$2,200,000. The project will be located adjacent to the main plaza of Revelle College and will relate directly to the main cafeteria building.

The concept of the Unit II dormitory will be that of a more formal character; the design and the formality being dictated by other major completed structures fronting on the plaza.

The concept of the two buildings interrelating by a mall is unique in the design of college dormitories. An attempt to get away from the high-rise, long corridors, hotel aspect was a prime consideration in the development of the structure.

Each building will contain a central atrium with balconies providing access to all rooms and a view down to a central court.

The concept also provides better relationships for all rooms with light and ventilation to the exterior of the building.

Each floor will contain 64 students which has been found to be the optimum group for college living, being very similar to that found in fraternity or sorority houses.

The units are designed to break down into five suites of rooms with a centrally located, commonly shared study area as well as a lounge on each floor for television, meetings and other social activities.

An innovation is the inclusion of bed and facilities for off-campus or other university students to be provided in each five-room suite.

The center of the court is so designed that it will provide space and landscaping for outside activities such as

Joel Hildebrand To Talk At Urey Hall Dedication

Climaxing today's series of events will be the dedication of Harold and Frieda Urey Hall at 4:00 in the Revelle Plaza.

Speaking at today's ceremony will be Professor Joel H. Hildebrand, professor of chemistry at the University of California at Berkeley. Dr. Hildebrand was a teacher and close friend of Dr. Urey's when Dr. Urey was a graduate student at Berkeley.

Dr. Harold Urey is presently a Professor of Chemistry at Revelle College. He is

also, among other positions, a consultant to NASA and a consultant to the Jet Propulsion Lab in Pasadena.

Dr. Urey holds some 28 honorary degrees and has won 14 awards and medals, including the Nobel Prize in Chemistry in 1934, and the National Medal of Science in 1964.

He has written two books, *Atoms, Molecules and Quanta*, in 1930 (revised 1964), and *The Planets*, 1952.

Coffee House To Be Built By Students

A joint General Council-Associated Students undertaking to build a Coffee House for the UCSD students has been started. The project should be completed by the end of this year or the beginning of next.

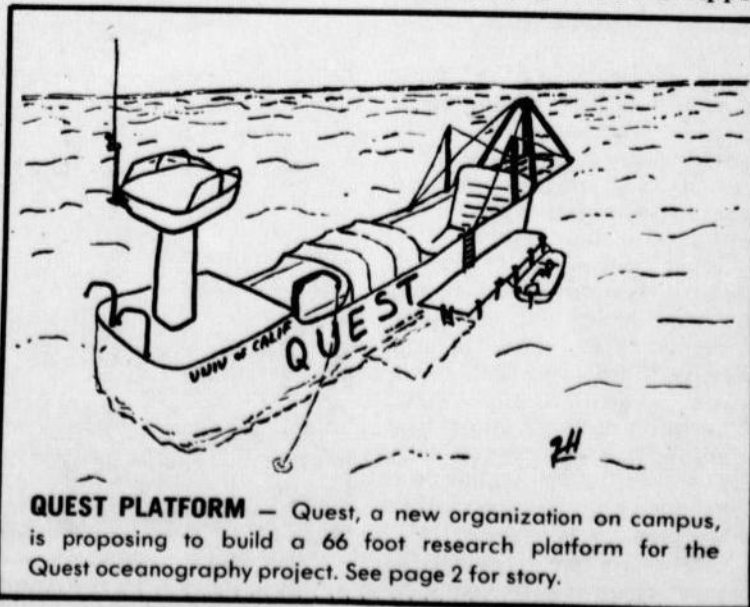

The University has given the students \$10,000 to be used for the cluster of three buildings. Half of the money has been allocated to the construction costs. The remaining \$5,000 may be used for furnishing and decorating the buildings.

All construction, designing, and operating will be done by the students. Any volunteers for electrical or plumbing assistance, or people with access to wholesale supplies are greatly needed.

The interior of the building is designed to be ethnic with a stage, table, chairs, red wood paneling, and painted cement floor.

Map Correction

To travel from the upper campus to Scripps instead of going by La Jolla Shores Dr. as shown on the map, go down Torrey Pines Rd. until you come to La Jolla Shores and then go north on La Jolla Shores until you come to Scripps.

QUEST PLATFORM — Quest, a new organization on campus, is proposing to build a 66 foot research platform for the Quest oceanography project. See page 2 for story.

QUEST, New Organization, Fills Hollow On Campus

Quest consists of several student organizations, each building "giants". Proposed is a 66 foot research platform being planned by the Quest oceanography project. Directed by Mike Bengry, students are also outfitting two Boston Whalers for oceanographic work. Specific programs in oceanography and marine biology are underway.

In classroom studies, the math-physics workshops, active since January, have recently been expanded under the direction of Robin Phillips to include humanities discussion groups and creative writing workshops. Next fall an extracurricular course, "Introduction to Unconscious Automata," will be sponsored. The donation of an experimental robot for Quest research is being considered by a major defense contractor.

Other possible donations include a gas turbine for the aerospace research project. Directed by Gary Allen, specific programs will extend from aerospace medicine through space propulsion systems.

John Nubers' urban problems study group is investigating the social character

of San Diego while Mike Bell's earth sciences project is studying local fossil structure.

Activities are also being planned in fine arts, psychology and biochemistry. Students have rebuilt quonset hut 402 in Camp Matthews to provide for a research center and electronics laboratory. Next year a quarterly magazine, directed by Barry Jorgensen, will publish all research results as well as students' literary and artistic efforts.

An unique scholarship program, whereby a student working through the summer for Quest will receive \$600, was announced recently by Ward Beecher's office. However, Tom Birtley who developed the program for Quest has expressed some doubt that funds will be available for this summer. Nevertheless, several students are planning to commit their summers to individual research. The summer facilities will be supervised by Mike Sommer.

Anyone interested in Quest is encouraged to attend a meeting Wednesday, June 1 at 4:00 in HL 1148. Present

officers and members should be there to outline objectives for next year. Currently 17 elective offices for 66-67 are to be filled:

president, exec v-pres, v-pres for business, v-pres for projects, v-pres for public relations, secretary, treasurer, and directors for aerospace research, biochemistry, earth sciences, electronics, fine arts, oceanography, psychology, publications, urban problems and workshops.

Any student is eligible for candidacy and, if interested, should leave a card with name, phone and interests at the Quest office as early as possible.

June 3rd Date of Carnival

The General Council is sponsoring a carnival to take place on June 3rd from 4 p.m. to 8 p.m. Following the carnival a dance will be held from 9 to 1 in the cafeteria.

The General Council will assign booth space and make construction materials available. However, any organization wishing to secure its own materials may do so.

To simplify the handling of money, a ticket booth will be selling 5c tickets to be used in lieu of change. The dance, which follows the carnival, will feature "The Youngs."

Any organization wishing to operate a booth during the carnival should register with the General Council.

CHANCELLOR GALBRAITH — Chancellor Galbraith (center) is shown eating in the student cafeteria.

New Opportunities For Amanuensises

by Barry Jorgensen
Quest Project Director

An interest in creative writing has recently brought to my attention a need for publication media. The young creative writer is often unable to find even functional sources of criticism. Let alone a place to publish his work, good as it may be.

While taking a course in creative writing at San Diego State last summer, I was told that the only method to locate sources of publication was to prepare manuscript copies and send them to as many publishers as possible. This effort is highly ineffective however due to two basic problems. First, even experts rarely know what any publisher will want to publish in his magazine at any one time. Second, publishers themselves rarely consider or take the time to consider manuscripts by authors that have never been published.

And it is hardly necessary to mention that no criticism is implied in this system. A solution to these problems, though not unique, but which seems effective to me would be to set up an organization that would both publish on a larger than local scale and in addition offer assistance in locating alternative publishing media. This alone would greatly enhance the position of young creative writers and publishers as well. For even though there are many fine local sources of publication, these are not adequately able to fill the needs of creative writers interested more in the publication of their material where possibility of further personal gain is taken up.

As Project Director for Publications in Quest, I have seen an unique opportunity in supplementing these goals, for here we have an organization that is rapidly increasing in both size and name. A Quest publication of creative writing sent to all those affiliated with Quest and to any other interested parties, granted a high quality of material, would, if sent out on a large scale, more than adequately fill the needs of at least the writers of this area. A forum for criticism could also be incorporated into the form of this publication with the least effort. To conclude let me say that as Project Director I intend to pursue this with interest and speed and I would greatly appreciate, and am open to, any suggestions or comments from those interested or willing to help.

Dr. Glenn Seaborg To Speak At State

Dr. Glenn T. Seaborg, chairman of the United States Atomic Energy Commission, will be San Diego State's commencement speaker on Friday, June 10, President Malcolm A. Love announced today.

Some 2,700 students will be graduated in ceremonies that will begin at 10:00 a.m. in the Aztec Bowl.

Before speaking, Seaborg

will receive an honorary doctor of laws degree from the college. This will be the second honorary doctoral degree issued at a San Diego State commencement. The first was given the late President Kennedy during the 1963 graduation.

Seaborg became chairman of the Atomic Energy Commission March 1, 1961 following the resignation of former Chairman John A. McCone. His current term extends until June 30, 1968.

As chairman he has represented the United States in a continuing series of international events. He: (1) appeared at the four general conferences of the International Atomic Energy Agency held in Vienna 1961 through 1964; (2) headed the U.S. delegation to Russia in 1963 to sign the "Memorandum on Cooperation in the Field of Utilization of Atomic Energy for Peaceful Purposes;" (3) participated in Test Ban Treaty ceremonies in Russia in 1963; (4) headed the U.S. delegation to the third International Conference on the Peaceful Uses of Atomic Energy in Geneva in 1964.

LETTER

Prophet Sanitary?

Dear Editor,

It is obvious that the Prophet Company does not plan to improve the quality of its food this year. Not only has the quality of the food remained low, but sanitary conditions appear to be at an ebb.

Employees can frequently be seen serving food directly after wiping off counters with cleaning rags. These servers seem to have rather lax sanitary ideals in general. They often use their hands to assist in their duties. Recently a particularly gross demonstration of unsanitary practices

was exhibited. After serving the wrong dish to a student returning his used plate for seconds, the server had no qualms about scraping the food from the dirty plate back into the general service tray. It was served to the following students.

Daily the cashier sends over-loaded tray bearers back to return excess food they have picked up. Silverware and service in general is often spotted. It is not uncommon to find specks of food adhering to the surfaces of glasses, plates, and spoons.

We realize that there are many problems in producing food for masses of people. However, minimum standards of quality and decency must be maintained. Apparently the Prophet Company does not realized this. I don't know for how long the University has saddled itself with the contract for this company, however, before it is renewed I hope some tangible insurance of improvement will be obtained. The food and service alone are enough to keep many students from living in the dorms.

Don Holam

Igor Siehtnichts

by Lon Hall

What the hell is the matter with you lazy, apathetic slob? What does it take to get you off your fat duffs and out doing something? To be quite blunt: You make me violently sick to my usually Don Holm

All year I've listened to all you asinine idiots whining about the apathy at this campus. The fact is that you, every single one of you whining puppies, are at fault for the apathy on this campus.

What have you done this year to combat apathy? Want me to tell you what you've done? Nothing, absolutely nothing. What you do to fight apathy is to sit on your dead asses and whimper about the dullness of this campus.

When someone throws a dance in hopes of getting you off your asses you tell them: "Why should I come to your dance. It will be a failure because no one will come to it." The quite rational retort that people would come if they were not all as stupid as they evokes an unintelligible mumble.

All I can say through my sneer is may you rot in hell.

UCSD OPEN HOUSE PROGRAM

12:30 TO 2:00 P.M. EXHIBITS, DEMONSTRATIONS, DISPLAYS

Aerospace and Mechanical Engineering Sciences — 5th Floor Urey Hall
The department of AMES will have an exhibit of laboratory equipment and techniques. This exhibit will be on the fifth floor of Urey Hall.
Chemistry Department — 4th Floor Lobby, Physics/Chemistry Building
The Chemistry Department will conduct tours of the chemical laboratories and cosmochemical laboratories including those of Harold Urey. These tours will leave from the 4th floor lobby of the Physics/Chemistry Building.

Computer Center — 3rd Floor, Urey Hall
The Computer Center will conduct guided tours through the facilities showing the Control Data 3600. These tours will leave from Room 3116 Urey Hall.

Language — Lower Level of the Humanities/Library Building
The Revelle College Basic Language Program's Language Center will be open for inspection. This is Room 134 Humanities/Library Building. They will provide a demonstration of equipment and materials used by the students.

Library — 2nd Level, Humanities/Library Building
The Library will be open, informational sheets will be available to visitors and the staff will be most happy to answer any questions.

Philosophy — 2nd Level, Humanities/Library Building
The Philosophy Department will have a display of books used by their department and a display of biographical information on members of the Philosophy Department staff. This display will be located on the patio area of the second level Humanities/Library Building.

Physical Education Department — Building 269 Camp Matthews
The Physical Education Department will be open for inspection and the staff will be happy to answer questions. The architectural drawings and designs of the physical education facilities will be on display.

Physics Department — 3rd and 4th Floors, Physics/Chemistry Building
There will be a large spark chamber in operation showing actual cosmic rays in the hall off the lobby of the 4th floor, Physics/Chemistry Building.

The Space Sciences Laboratory will have their display in the Lobby of the 3rd Floor of the Physic./Chemistry Building. It will include instruments flown on the Orbiting Solar Observatory I, to detect gamma rays and X rays from space, a model of the OSO and instruments for the OSO III. To be launched this summer.

The Space Sciences Laboratory will also have a display in the case in the south hall off the lobby showing copies of instruments flown on satellites Relay I, Relay II, Explorer 15, Explorer 26, and Injun 3.

The Space Sciences Laboratory — Room 3210 Physics/Chemistry Building will be open to visitors.
Movies of Solar and Auroral Activity will be shown continuously in Room 3405 Physics/Chemistry Building.

Many of these facilities will remain open after 2:00 p.m.
2:00-3:00 P.M. MAIN DINING ROOM PROGRAM — Dr. Ted Forbes, Emcee
2:00 University Folk Dancers — a campus organization comprised of students, faculty and staff. They meet after hours to teach and encourage

recreational folk dancing. The dances performed today are:
Vrtielka (Hungary) Schupplattler (Bavaria)
Hopak (Ukraine) Drmes iz Zdeneine (Croatia)
Zelltaler (Austria) Sitna Zhensko Hora (Bulgaria)
Al Tira (Israel) Ca Cak (Serbia)
Momachko (Croatia)

2:20 Capella Music of the 18th Century presented by Ingebor Hardorp, Elisabeth Marti, Joan Caldwell, Michael Mullin and Johannes Hardorp. This group was formed from the larger Madrigal Singers of UCSD and will be performing again later in the school year.

2:40 Spanish Folk Music by La Cociudad Hispanica de UCSD, a student organization designed to give members a background in the culture of Spanish speaking peoples and an opportunity to use the Spanish language. Miss Helen Landerman will sing Spanish folk songs with guitar accompaniment and Miss Elba Urrea will perform Spanish folk dances.

3:00 Mr. Sam Hinton, Assistant Director of Office of Relations with Schools will speak on the University of California system and specifically, UCSD. There will be a question-answer session with the audience.

3:30 Dr. Ted Forbes, Dean of Students — Acting Chairman of Physical education will discuss the future of intercollegiate athletics at UCSD.

4:00 P.M. DEDICATION OF HAROLD AND FRIEDA UREY HALL — To take place in the Revelle College Plaza

ADDITIONAL DEPARTMENTS AND OFFICES OPEN TODAY ARE:
T. WAYLAND VAUGHAN AQUARIUM-MUSEUM will be open from 9:00 a.m. to 6:00 p.m. It is located at Scripps Institute of Oceanography. Due to road construction, the best way to get to the aquarium is Torrey Pines Road to the stop light at La Jolla Shores Drive; turn right on La Jolla Shores Drive north to Scripps Institute of Oceanography.

THE UNIVERSITY ART GALLERY will be open from 12:00 to 4:00. It is located at Camp Matthews.

THE CAFETERIA SNACK BAR will be open from 1:00 to 4:00 p.m. in the Central Facilities Building.

THE RESIDENCE HALLS will be open. You are invited to visit in the following suites where General Council students will be available to answer questions.

Suite 100	Challenger Hall	(Men)
Suite 300	Challenger Hall	(Women)
Suite 200	Galathea Hall	(Women)
Suite 250	Discovery Hall	(Men)

THE REGISTRAR'S OFFICE — Room 2104 Urey Hall will be open to distribute information on admission to the University of California and UCSD.

THE STUDENT HEALTH SERVICE — Building 548 Camp Matthews will be open for inspection. There will be a staff available for emergency treatment.

There is a display on the LIFE AND TIMES OF HAROLD AND FRIEDA UREY on the 1st Floor of Urey Hall.

In case of emergency, contact the Campus Police, 453-2671 or University extension 1333.

College Philosophy, Brahm's "Song of Fate", General Education Haydn's "The Third Mass"

The educational philosophy of Revelle College was developed around the questions: What sort of knowledge must students master if they are to become liberally educated? In what areas? To what depth? How specialized must that education be in the undergraduate years?

The lower division curriculum assumes that an undergraduate should not settle firmly upon his major field until he has had a chance to learn something about the many fields that are open to him. His general education must, then, be thorough enough for him to see the opportunities of as many fields as possible. Once the undergraduate has completed his program of lower division study he should be ready to start specialized work in the field of his choice.

The general education will not end in lower division work; every upper division student will be required to

do a substantial fraction of his course work in an area of learning outside his major field

Through such a curriculum of general education, Revelle College Faculty believes the student will develop the capacity to understand and appreciate.

Brahms' "Song of Fate" and Haydn's "The Third Mass" will be performed for the first time at San Diego State by the 800-voiced College Chorus, 65-voice Aztec Concert Choir and the San Diego State Symphony Orchestra, Sunday, May 22.

Two performances, at 3:15 p.m. and 8:15 p.m., will be

given in Peterson Gymnasium, 55th Street and Remington Road. General admission is \$1 and tickets may be purchased through the music department or at the door before the concert. Children under twelve and San Diego State students are admitted for half-price.

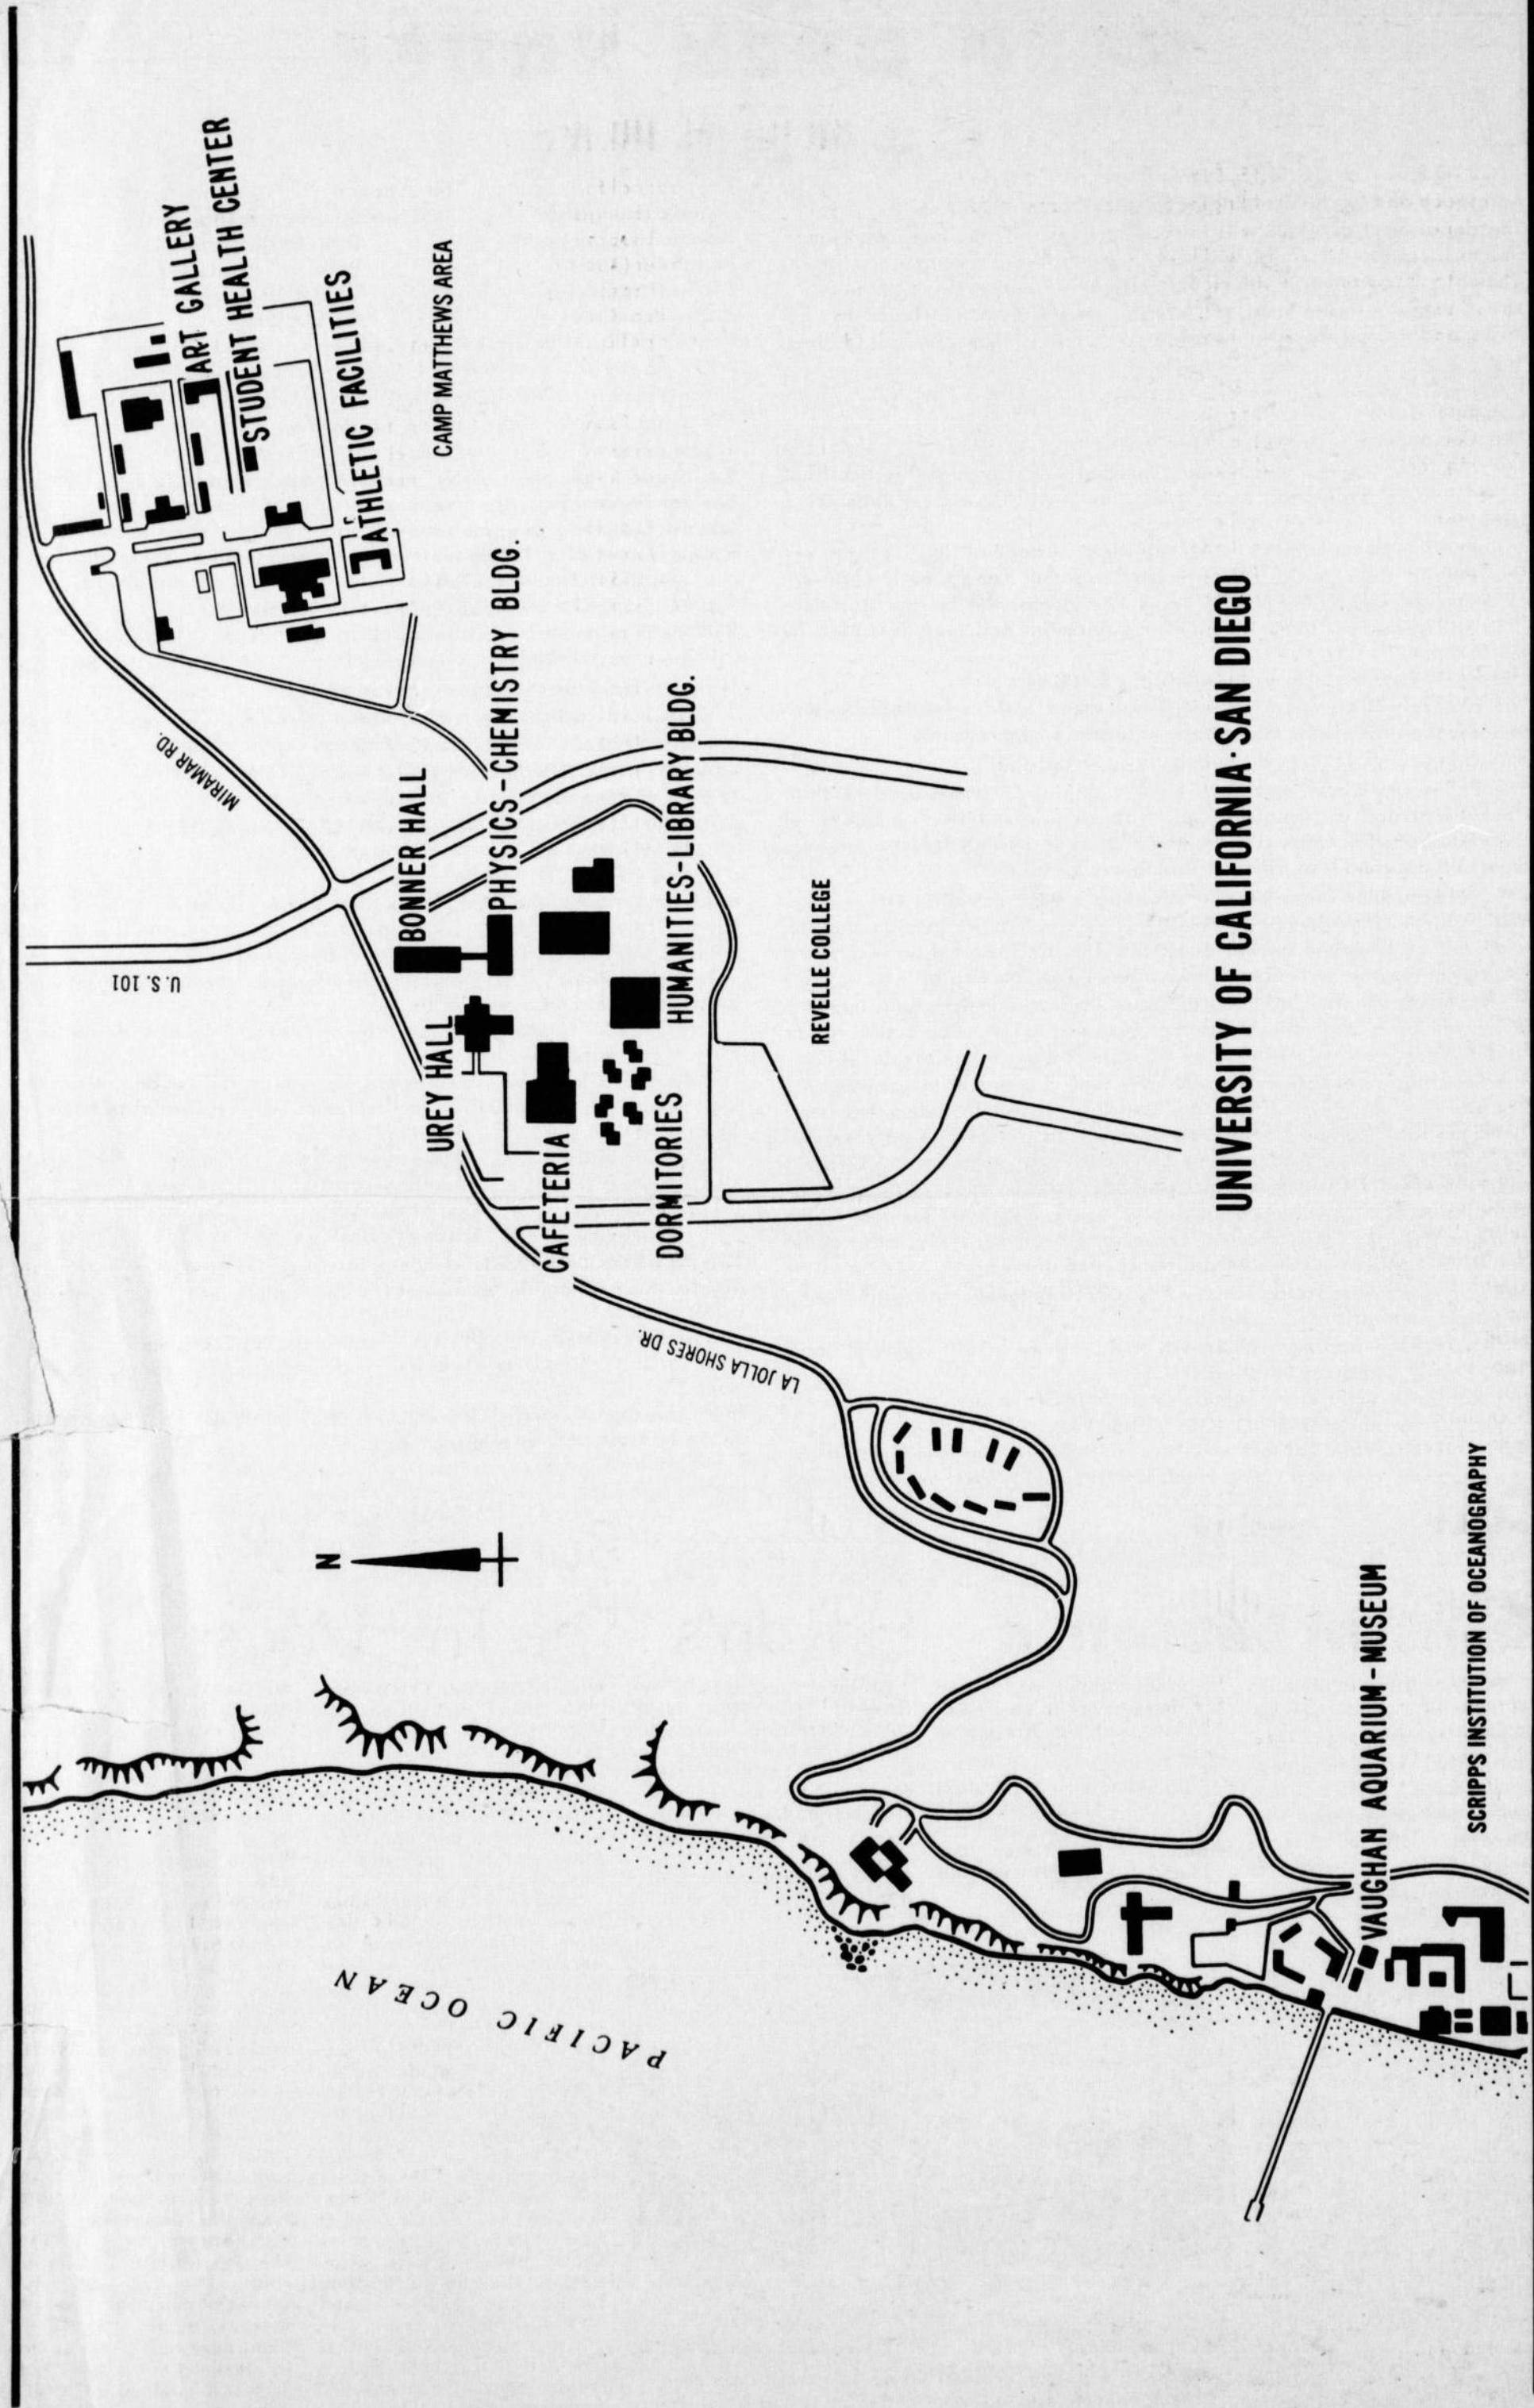

Soloists for the mass, sometimes called, "The Lord Nelson Mass" or "The Imperial Mass," will be Mary Val Marsh, soprano; Patricia Belsir, contralto; Ralph Wright, tenor; and David Loomis, baritone. The concert will be conducted by Paul V. Anderson, professor of music and director of the college symphony orchestra. Anderson described the Haydn mass as, "one of those rare works which the listener knows is a masterpiece at first hearing." "Of the twelve known Haydn masses, scholars hold that the Nelson Mass is the most dramatic and forceful and at least one writer is so bold as to say that the mass is 'arguably Haydn's greatest single composition,'" Anderson said.

Inspired by Lord Horatio Nelson's smashing defeat of Napoleon's French fleet at Abukir, Haydn wrote, "The Third (Lord Nelson or Imperial) Mass" during the summer of 1798 in a period of a month-and-a-half.

Haydn is known to have kept a chart of the Battle of the Nile (Abukir) with colored pins to indicate Nelson's progress. There is some doubt to the authenticity of the idea that the admiral's great victory inspired the whole mass. But by the time it was first performed it was being referred to as the "Nelson Mass." Some persons still maintain that it was possible for Haydn to have received word of the final victory by Nelson prior to the completion of the mass. And they believe that the news was at least the inspiration for the thunderous conclusion of the Benedictus, Anderson said.

REVELLE COLLEGE DEDICATION — Chancellor Galbraith is speaking at the Revelle College dedication. Sitting to the right of the empty chair is President Clark Kerr.

UNIVERSITY OF CALIFORNIA - SAN DIEGO

SCRIPPS INSTITUTION OF OCEANOGRAPHY

Top Profs In Row Over Woman

Professor Herbert Marcuse of the philosophy department said, "I've been in love with her for fifty years!" Professor John Stewart, Provost of Muir College, accused her of being shallow, stupid and sordid!

Who? Emma Bovary, the heroine of Flaubert's masterpiece which was part of the assigned reading for Humanities 006, "The West after the French Revolution." In a switch over the previous Humanities courses, not one but two of the best teachers on campus are teaching the course, and sitting in on each other's lectures. In the previous quarter, an equally great pair, Professor Andrew Wright of the literature department and Dr. Richard Popkin of philosophy, each took half of the students, and then "guest lectured" to the other half on specific topics.

Professor Stewart gave the two scheduled lectures on "Madame Bovary," but then unexpectedly announced the theme would be a third period devoted to the subject, a "colloquium" between Dr. Stewart and Professor Marcuse. Whether this arose of his enthusiasm for challenge by Professor Marcuse is unknown. Word of this colloquium leaked out, and the HL Auditorium was packed with non-involved students. The professors' differences with each other over Emma Bovary turned out to be less than their differences with the students.

The colloquium was a huge success, and another has been suggested for the current assignment, Dostoyevsky's "The Brothers Karamozov." Professor Marcuse gave the first lecture, saying some harsh things about Dostoyevsky and his hero, Alysha. Professor Stewart gave the second lecture. The Yul Brenner, Maria Schell film version of "The Brothers" was shown last Saturday and Tuesday evenings in support of the course. While all students were welcome, those enrolled in Humanities 006 were particularly urged to attend - in addition to reading the 913 page novel, and not in lieu of it. Professor Marcuse hinted darkly that there will be a question on the final, "Describe the ways in which the film differs from the book." An alternate question will be, "Describe the ways in which the book differs from the film."

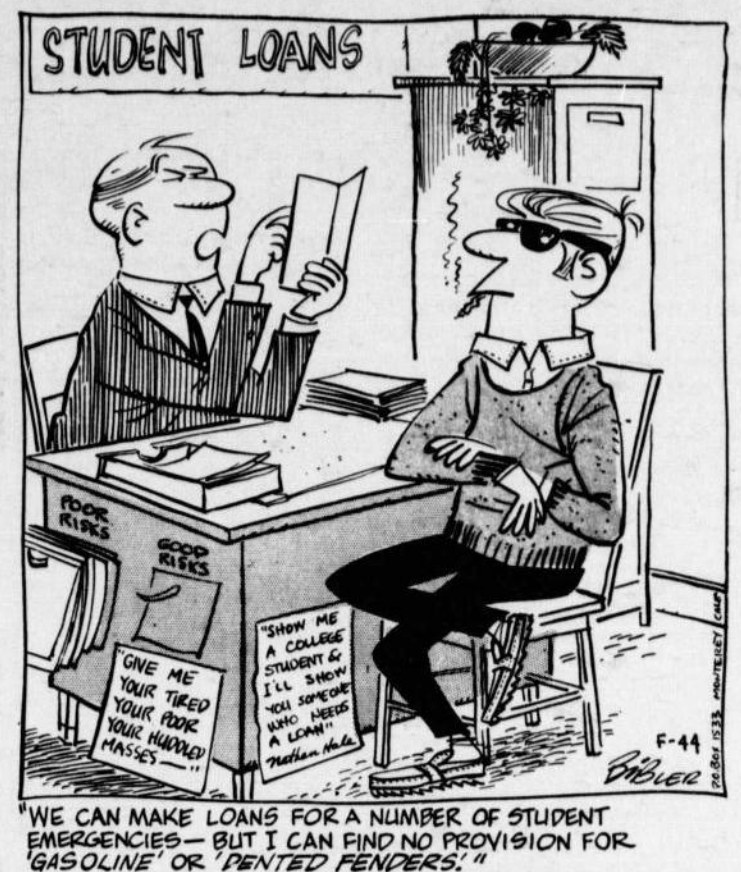

Among the residence hall problems discussed was the proposal to group students according to the visiting hours they want, with the permission of their parents. The three categories of visitation privileges are:

- i) Visitation in the suites in accordance with the present schedule of hours;
- ii) Visitation in the suites in accordance with the present schedule of hours with visitation in the rooms between 2:00 and 5:00 p.m. every afternoon;
- iii) Visitation in the suites and rooms without restriction on hours.

The committee discussed the question of requiring freshmen to live on campus. If freshmen were required to live in residence hall it might create problems of maintaining an on campus balance of freshmen to upper classmen. It was decided that there would not be sufficient space in the residence halls next year to make possible such a rule.

Curfew rules were discussed. It was proposed that freshmen women have curfew rules the same as those in effect this year. Sophomore women with less than a 2.75 GPA would also be subject to curfew. There would be no curfew for sophomore women with more than a 2.75 GPA, upper division women, or any woman over 21.

Applications from any interested women students are now being considered. It is advisable to submit them as early as possible to suite 350, Galathea Hall.

Ad Hoc Works For Cooperation

During the Winter quarter a student Ad Hoc Committee was established to create better communications between the students in the residence halls and the administration. This committee made its proposals and turned them over to the Ad Hoc Implementation Committee. This committee was set up to determine the most practical and generally acceptable uses of the original committee's proposals.

The Implementation Committee has four representatives from the residence hall students and six representatives from the administration. They are George Kurata, Peggy Apgar, Bonnie McIntyre, Dan Grindle, Provost Goldberg, Provost Stewart, Dr. Bradner, Dean Forbes, Mr. Bob Topolovac, and Mr. George Murphy.

A fourth suggestion was made concerning open hours in the suites and in the rooms. Suggested hours were as follows: Sunday: 2:00 to 6:00. Monday-Thursday: none. Friday: 7:30 to 11:00 p.m. Saturday: 1:00 to 5:00 p.m. and 7:30 to 12:00 p.m.

These proposals for open hours were presented to enough students to obtain an impression, which was unfavorable. After some discussion, the committee suggested the following open hours in rooms and suites to be discussed among the students for this week: 12:00 to 5:00 every day. 7:30 to 12:00 p.m. Friday and Saturday in men's suites only.

These suggestions were made in the hope of satisfying the student-voiced need for privacy and study in the dorms. It must be remembered, however, that these are only suggestions, not new rules.

8:30 - Evelyne Crochet, Spring Chamber Music Series, Sherwood Hall

General Council Committee Investigates Prophet Food

Last Thursday the General Council took a survey of what the students thought of the Prophet Co. food and service. The purpose of this survey was to determine whether the Food and Services Committee of the General Council should recommend the rehiring of the Prophet Co. for the coming year.

WRESTLING PRACTICE — Another one of the intercollegiate sports participated in at UCSD was wrestling.

Extended Intercollegiate Sport Activity Coming

Intercollegiate sports activities will move at a much stepped up pace next year. All intercollegiate teams will have enlarged schedules and a few new teams may be added.

This year UCSD had eight intercollegiate teams, including basketball, golf, tennis, track, cross country, wrestling, surfing, and sailing. The surfing and sailing teams had modified schedules.

Next year all schedules will be lengthened and a JVe basketball squad will be added to the list of teams. Next year there also is a chance that there will be a rugby team, a baseball team, a rowing crew, and individual swimming. These sports depend upon individual student interest.

For next year's cross country team UCSD will have its own cross country course and a quartermile track is being built for next year's track squad.

The Physical Education Department is planning to begin a varsity football team in two years.

Intramural Sports Growing With Time

Due to the large turn out for intramural sports this year, next year's intramural schedules will be bigger and there will be more facilities for the contests.

In addition to the sports of this year there will be girls' basketball, girls' singles in tennis, boys' singles in handball, and possibly girls' archery. There will probably be more co-ed sports next year because of the success it has met with this year.

For next year's use there will be two tennis courts, two basketball courts, and a grass field behind the dorms.

Construction On Gym Begins Soon

Construction for a natatorium, gym, fields, six tennis courts, and four basketball courts will begin this summer if the regents approve the plans.

Inside the gym will be, in addition to the regular basketball court and bleachers, a squash court, a handball court, a modern dance room, a wrestling room, a weight room, and a gymnastics room.

If the plans are approved bids will be accepted during the next two weeks and the gym should be completed in the fall quarter of '67.

The gym will be located behind the gas station across the road from Urey Hall.

Late Results

Last Thursday the two league leading softball teams of the UCSD intramural softball league met in a tightly contested battle. Despite the fine pitching of Lindy Montgomery the Creepy Crawlers were smashed 7-2.

Also included in next year's schedule are expanded hours in the swimming pool, an expanded sailing program, and more use of the gym facilities, which include a weight room, trampoline, ping pong table, etc.

Intercollegiate Honor Dinner

Honoring all students who participated in intercollegiate athletics this year is a dinner Wednesday night.

The dinner is scheduled for 6:00 p.m. in the South Dining room. Letters for participation in sports will not be given this year. Hopefully letters for athletic skills will be given in the near future.

New Sailing Facilities At Santa Clara Point

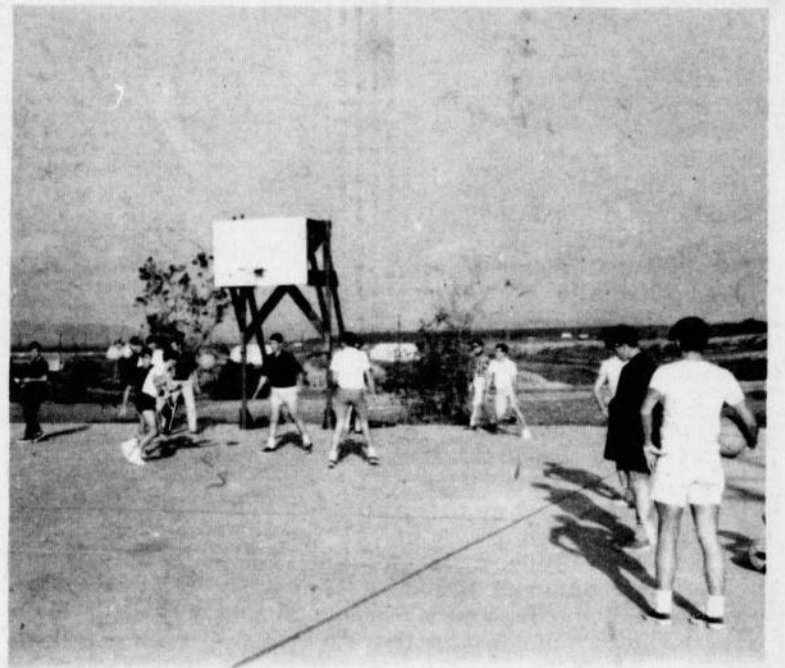

Arrangements have been made for a new sailing facility located at Santa Clara point.

All Sailing Club members, students, and staff personnel who have previously qualified may participate immediately in recreational sailing activities by coming to the Department of Physical Education and picking up their new registration card which will identify them at the Santa Clara Point facility.

The City of San Diego in conjunction with the Regents

of the University of California and the Department of Physical Education have made this sailing facility available, and all participants in the use of this area are requested to observe local regulations.

Any interested personnel who are not qualified to sail may become qualified through the sailing instruction hours on Saturday and Sunday between 11:00 a.m. and 1:00 p.m. or by special arrangements with Nick Naffack or Dave Butler.

INTRAMURAL BASKETBALL — Shown are two of the many intramural basketball teams. Intramural sports met with much success this year.

Alpha Phi Omega New Service Club

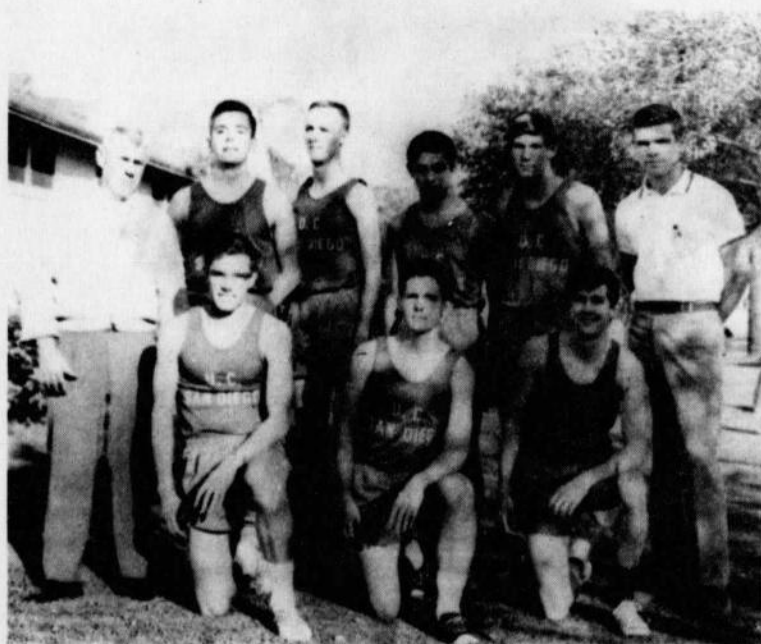

In the near future a men's service organization on campus will petition for national recognition from Alpha Phi Omega.

Based on the concept of service to the nation, the community, and the campus, Alpha Phi Omega works on the principles of the Scout Oath and laws. Membership is open to all college men, but primarily to those with past or present scout affiliation.

Responsible for the original organizational meetings

were Louis Huszar, a graduate student in Math, and Guy Jenkins, a sophomore. Elected officers are Guy Jenkins, President, Ray Tice, Vice-President, Rodney Hurst, secretary. Meetings are held on Mondays, at 5 p.m. in the Formal Lounge and are open to all interested men.

Current service projects are ushering at today's dedication, and in helping with the student Coffee Hut. Alpha Phi Omega is open to suggestions for service projects. Please contact Ray Tice or the Student Affairs Office.

UCSD TRACK TEAM — This is the first UCSD intercollegiate track team.
