

SAIC Makes \$4 Million Gift To The Beyster Institute At UCSD's Rady School Of Management

August 30, 2004

Lindsay Orth

The University of California, San Diego announced today a gift of \$4 million from Science Applications International Corporation (SAIC) to the Beyster Institute at the Rady School of Management.

SAIC made this gift in honor of Dr. J. Robert Beyster upon his retirement as SAIC's chairman of the board. The gift will be used to promote global entrepreneurship, employee ownership, and economic development through consulting, training and international projects at the Beyster Institute.

"Through this gift, Dr. Beyster's dedication to employee ownership will be passed along to the next generation of business leaders, while also providing many innovative opportunities for the Beyster Institute and the Rady School," said Robert S. Sullivan, dean of the Rady School.

"Dr. Beyster's dedication to employee ownership over the past 35 years and commitment to rewarding employees fairly for their efforts has been a cornerstone in SAIC's success," said Ken Dahlberg, SAIC chairman, president and chief executive officer. "The SAIC Board of Directors is pleased to approve and establish a lasting legacy honoring Dr. Beyster for all his accomplishments by making donations in his name to both the Beyster Institute and the Foundation for Enterprise Development."

Established by Dr. Beyster in 1986, the Beyster Institute's purpose is to understand, support and promote the roles of entrepreneurship and employee ownership in growing companies and in society. The Institute was integrated into the Rady School in June 2004.

SAIC is the nation's largest employee-owned research and engineering company, providing information technology, systems integration and eSolutions to commercial and government customers. SAIC engineers and scientists work to solve complex technical problems in national and homeland security, energy, the environment, space, telecommunications, health care, transportation and logistics. With annual revenues of \$6.7 billion, SAIC and its subsidiaries, including Telcordia Technologies, have more than 44,000 employees at offices in more than 150 cities worldwide. More information about SAIC can be found on the Internet at www.saic.com.

The Rady School continues UCSD's tradition of excellence, risk-taking, and breakthrough innovations, attracting the top business researchers and educators in the world. The Rady School presents an integrated approach to business and technology and emphasizes cross-boundary collaborations and programs with UCSD centers of excellence: science, engineering, medicine, economics and international relations. The charter class of executive MBA students will enroll in fall 2004, and the charter class of full-time students is slated for fall 2005.

This gift contributes to the \$1 billion fund-raising goal of The Campaign for UCSD: Imagine What's Next. Campaign priorities include supporting students and faculty through scholarships, fellowships and endowed chairs; creating and expanding academic programs; funding research endeavors and health sciences advancements; and providing innovation funds and unrestricted support. To date, UCSD has raised \$619.4 million; the campaign is scheduled to conclude in June 2007.
