

## **Three additional staff members added: Errett A. Bishop, Dr. Theodore T. Frankel, and Dr. Hubert Halkin.**

**August 17, 1965**

The appointments of three additional members to the staff of the Department of Mathematics at the University of California, San Diego, were announced today by University President Clark Kerr and San Diego Chancellor John S. Galbraith.

The appointees are Dr. Errett A. Bishop, as Professor of Mathematics, Dr. Theodore T. Frankel, as Professor of Mathematics, and Dr. Hubert Halkin, as Associate Professor of Mathematics and Associate Research Mathematician.

Dr. Bishop comes to UCSD from the University of California, Berkeley, where he advanced from Instructor in 1954 to the rank of Professor of Mathematics in 1962. Prior to his association with the University, he served in the Armed Forces and was assigned to research in ordnance work for the U. S. Army at the Bureau of Standards in Washington, D. C.

Attending the University of Chicago, Dr. Bishop received an S.B. degree in 1947, an S.M. degree in 1949, and his Ph.D. in mathematics, in 1955.

A member of the American Mathematical Society and the Mathematical Association of America, he served as a Sloan Foundation Fellow from 1958-60 and again from 1960-61. During 1961-62, while on sabbatical leave from UCB, he was a member of the Institute for Advanced Study at Princeton University. In 1964 he was appointed to the Miller Institute for Basic Research.

A popular and frequent lecturer, Dr. Bishop gave the invited address to the American Mathematical Society in 1964 and lectured at a number of scientific conferences in this country and abroad. He is the author of over 25 mathematical articles and reports.

Dr. Frankel comes to San Diego from Brown University, Providence, Rhode Island, where he has been an Associate Professor of Mathematics since 1962. Prior to his association with Brown, he taught at Stanford University and served as a member of the Institute for Advanced Study at Princeton University.

He attended the University of California, Berkeley, receiving his A.B. degree in 1950 and his Ph.D. in 1955.

A member of Sigma Xi and the American Mathematical Society, Dr. Frankel is the author of several research and technical papers.

Dr. Halkin has spent the last two years as a member of the Technical Staff of the Bell Telephone Laboratories in Whippany, New Jersey, where he did research in control theory as a consultant to the Department of Analytical and Aerospace Mechanics.

After attending the University of Liege, Belgium, where he obtained degrees in physics, mathematics and engineering, he received his M.S. degree in 1961 and his Ph.D. in 1963 from Stanford University.

Dr. Halkin is a member of the American Mathematical Society, the Society for Industrial and Applied Mathematics, the Econometric Society, the Institute of Mathematical Statistics, Sigma Xi, the Institute of Electrical and Electronics Engineers, and the American Institute of Astronautics and Aeronautics. He is the author of several publications and is presently writing *Evolutionary Processes*, a book to be issued in the series "Mathematics in Science and Engineering."
