Sub-District Office, Northern District.

22nd September, 1958.

The District Officer, Headquarters, Northern District, POPONDETTA.

#### PATROL REPORT - KOKODA No.1 of 1958/59.

The patrol area covered the relatively mountaincus and sparsely populated reaches of the Chirima Valley. The Lower Chirima is between 1200° and 2000 ft altitude. This area is demarcated by the Chirima proper at ASIMBA village and here, both the hills and populace grow more frequent.

The Lower Chirima may be described as an extension of the KOKODA Mambare valley, and is an udulating plain with sparse population (164 persons in 12 hours walk) and apparently the soil is a continuation of the relatively good soil as found nearer to KOKODA, and seemingly suitable commercial cultivation.

The sparse population is not attributed to the poorness of the soil. I have been informed that due to failure to adjust to culture cottact situation-the Lower Chirima - or FOFOI group. had become decimated, from approximately 2000 people in the past 50 years - Malaria has also made considerable deprediation upon the populace, who have moved down from hills surrounding the valley floor to sites along the main valley track.

Matters concerning the area and people, i.e. health, depopulation and roads will be the subject of memos! attached to the report.

#### DIARY.

ugust,1958.

August.1958.
Thursday 21st. Started out per Land Rover to KOMO river, 7.30.a.m.
Carriers arrived 10.a.m. Better effort than previous
day when they failed to turn up at all. Arrived at KANGA
12.30. rest house satisfactory. Very could village.
However quite a few migrations in from Seiba. Heavy
storms later in day. Remained KANGA. Census & Tax Register compiled.

Friday 22nd.

Departed 0730 for Seiba. Heavy going through rivers. flooded at time of crossing. At Seiba at 1.p.m. Fair walking. Other than bridging on main stream, vehicular track appear feasible - Census and tax Register compilations. Village is nearly extinct - 14 inhabitants. Mr st have migrated to KANGA due deaths in village. Rest house, roads and village satisfactory.

Saturday 23rd. Departed Seiba 715 a.m. arriving KARUKARU at 930 a.m. Census and village inspection tax register compiled.

Departed KARUKARU 12.15 for ASIMBA arriving 2.30.p.m. Census and village inspection 13 deaths nil barths KARUKARU in last year. ASIMBA 5 deaths 1 birth.

N.M.C. absent WOITAPE. - see 16-2-3

#### PAGE. 2.

"think - I -

Sunday 24th. Patrol rested.

Monday 25th. Census Korogo and Samana conducted. Village inspected. Continued to BURI, arrived BURI 12.45.p.m. after 22 hours walk. Census and tax register compilation. Small village again little labour petential.

Tuesday 26th. No Consus in morning. Departure delayed till 9.a.m. arrived at GOROWAKU village 2.p.m. Census and tax register compilations. GOROWAKU villages requested that they remain within KOKODA sub-district and not be trabsferred WOITAPE. My 1-4-1 refer.

Wednesday 27th.

Departed Gorowaku

BURI Creek Bridge

Departed Gorowaku for Mission road inspection to BURI Creek Bridge. Road chained, new section 2 miles completed. My 24-1-1 refers. Bridge still under construction. Speck with Fr. Sorriseau and Bro. Hilaire of Eacred Heart Mission Iongai, who are supervising the work. Returned Gorowaku. Departed Gorowaku at 2.p.m. arriving KAGO 3.35. Census and tax compilation of TURA.

Thursday 28th.

Census etc of KAGO. C.N.M. Court held - one KAGO male 3 months I.H.L. assault. Departed KAGO 2.p.m. arrived IONGAI 4.30. Roads are mule tracks constructed under mission supervision.

Friday 29th. Census, tax compilations. MILI, KAFA and EFA villages. Villages satisfactory. Constable despatched to WOITAPE.

Saturday 30th. Census, tax compilations VEIVA, MAIMANI and SOGATU.

Sunday 31st.
September.
Monday 1st.

Patrol rested.

Census and tax register compilation of SINNGO thence returned to IONGAI. R.H. for night after total of 5 hours walk. Village policeman has been absent GOILALA at a dance for over 2 months. In evening constable returned ex WOITAPE. O.I.C. WOITAPE absent TAPINI, so WOITAPE visit re Chirima affairs not undertaken.

Tuesday 2nd.

Departed Iongai 0730 hours for KUAMA, en route census, inspection etc of BELAVISA and YORIBAI. Total of 42 hrs walk. KUAMA R.H. is at approximately 7,500° above sea level. One has excellent view toward Murray Pass from there, when clear. Census etc of KIKORI at KUAMA R.H.

Wednesday 3rd. Departed KWAMA 730 a.m. arrived GARIMA 10.a.n. Census and tax compilations. A few minor disputes settled without resort to Court action.

Thursday 4th. Departed GARIMA 8 a.m. to EVESA arrived 1100. Census of FORO and GERUA en route. The GERUA people are remaining in the Chirima area and have apparently given away the AUKORA valley settlement. EVESA has new village and Rest House. Quite creditable show.

Friday 5th.

Departed EVESA 7.a.m. visited, censused and inspected BOFU enroute to BURI. Patrol held up slightly by necessity of constructing bridge across Chirima at BURI. Total days' walk 62 hours.

Saturday 6th. Departed BURI 9.a.m. to ASIMBA, recompilation of census at ASIMBA thence KARUKARU for night. 4 hours walked Heavy rain falling in p.m. Carriers all from EVESA, GARIMA area.

23rd December, 1958.

The District Officer, Northern District, POPONDETTA.

#### PATROL REPORT KOKODA No. 3 of 1958/59.

#### Introduction:-

The patrol was a very swift one being only of ten days duration and purpose was collection of tax amongst the Chirima people.

This officer cut short the patrol to proceed to Rabaul for a local government cause. The patrol was of very routine nature through the high valley and no unusual incidents occured.

As general administration was not carried out, patrol diary and comments will be kept to a minimum.

#### Diary.

Thursday 13th November.

Proceeded per vehicle to KOMO river thence KANGA village for night. Tax collection KANGA. 2 hours walk.

Friday 14th November.

To SEIBA 42 hours walk tax collections thence to KARUKARU. 22 hours walk.

Saturday 15th November.

To ASIMBA, 22 hours walk tax collections. Approximately 1500 persons there gathered for feasting and dancing from Chirima and Woitape areas, approximately 300 pigs have been slaughtered to date. Tax Collections.

Sunday 16th November.

Patrol rested. Talks with various people.

Monday 17th November.

Collecting tax at ASIMBA.

Tuesday 18th. To GOROWAKU, slept night 72 hours walk.

h. To IONGAI collecting tax en route. 4t hours journey. Heavy rain falling. Severe fever attack. Wednesday 19th.

Thursday 20th. Collections IONGAI area.

To BURI, journey very slow, have apparently developed pleurisy. Friday 21st.

Saturday 22nd. To KARUKARU. Met by runner informing me to return station proceed Rabaul next Tuesday.

Sunday 23rd.

Returned to MAMBA Plantation in P.M. Met by vehicle at KOMO. Total tax collection £257-10-0. still a fair number of outstanding payments. Have not endeavoured to pay as have been at feast for several months. Final warning that if tax money not forthcoming by end of year, action would be undertaken where considered necessary.

J.J. Fordan.
a/Assistant District Officer.

KONEDOBU.

22nd April, 1959.

The District Officer, Northern District, POPONDETTA.

### PATROL REPORT No. 4 - 1958/59 - KOKODA.

Receipt of the abovementioned Patrol Report is acknowledged with thanks.

The covering memoranda adequately cover the contents of the report and no further remarks are required from this Office.

PG(A. A. Roberts), DIRECTOR.

However, since the social and economic welfare of these people is entitled to be progressed at a rate commensurate with that of native peoples in other parts of the Territory, every effort should be made to encourage the Biage in the development of their own customary lands, and to provide them with such facilities as schools and medical services etc as soon as possible.

Since, in my view, it is our duty to take administration to these people, rather than have them come seeking it, I can not agree with the Department of Agriculture's policy towards this area, as set out in paragraph 2 of your covering memorandum. I agree that encouragement in the planting of some s uitable economic crop would have a most desirable stabilising effect on the natives of this area. I will therefore take the matter up further with the District Agricultural Officer with a

NA. 30-2-1(8)/07/.

Northern District,

10th March, 1959.

The Assistant District Officer, Kokoda Sub-District,

KOKODA PATROL NO. 4 OF 1958/1959.

WA. 30-1-1/218 of 18th with February, 1959, the he abovementioned patrol own, Cadet Patrol Officer,

inistration t, I can towards

30/8/72

view to securing a more sympathetic consideration for the needs of the Biage people. I will advise you further of any progress achieved in this regard.

In relation to the educational problem in the area, I have discussed the matter with the District Education Officer, Northern District. The officer concerned has informed me that in Education Officer is shortly to be posted to Kokeda for duty, and upon his arrival there will be in a position to make recommendations conserning the extension of educational facilities in the Biage area.

Please inform Mr. Brown that I consider that he carried out his duties satisfactorily, and has reported clearly thereon; in future patrols, however, I would like to see him spend more time with the people.

c.c.
The Director,
Department of Native Affairs,
PORT MORESBY.

The original of Report on Patrol No.4 of 1958/59 (Kokoda) by Mr. B.D. Brown, together with comments thereon by the Assistant District Officer, Kokoda, is forwarded here-

The matte\_r of official encouragement of native ca\_sh-cropping (coffee production) in the Biage area will be taken up with the District Agricultural Officer, Northern District, as intimated above.

DISTRICT OFFICER. N.D.

Herewith report.

J.J. Jordan. Assistant District Officer.

Sub-District Office, KOKODA. Northern District.

12th February, 1959.

The District Officer, Eorthern District, POPONDETTA.

#### KCKODA PATROL NO.4 of 58/59.

The above report appears to have been well set out. Matters which appears to warrant comment are

(1) Native Affairs,

The desire of the ALOLA/ISURAVA people to descend into the mair KOKODA valley.

The people desire to move down some 5 hours walk onto DENIKI land for the children to attend school.

I am not in favour of such a shift as it brings the people into a malarial belt and many hours from their proper lands, and further would leave the Moresby road without maintenance or habitation for a long section. The people may also be influenced by the desire to plant cacao, and desire to move to lower land for the purpose. This will be dealt with in the next para on Agriculture.

#### (2) Agriculture,

Though it has finally been agreed upon by Agriculture that the upland people be assisted to plant highland coffee, mevertheless supplies have not been distributed and it is not known when the seed might be given out and areas lined for plantings.

Mr.K. Mayer, Agricultural Extension Officer, KOKODA informs me that he has been instructed that the BIAGE area has been sufficiently patrolled by his Department and his efforts are to be kept to the Council area. This appears to be rather hard to correlate with the agreement that the people are to be assisted to plant coffee at an early date, and I feel that the sooner coffee gardens are commenced in the area, then the sooner a stabilizing effect will come upon the peoples thoughts of shifting the village.

#### (3) Education,

The standard, or lack of same, at the ISURAVA school has been very poor, and the term "school" in an educative sense, is not warranted in respect of ISURAVA. With the coming of an Officer of Education Department to KOKODA in the near future, perhaps then, consideration could be given to the establishment of a domitory at KOKODA or BIAGE Administration schools to cater for the BIAGE pupils.

I would have preferred Mr Brown to have spent more time in the area, limited though the scope for work is there. I feel that in an Officer's early patrols, on particular, there is oft much to gained from merely sitting in villages and conversing with the people, and so gradually gaining some measure of their confidence.

From the report it appears that Mr Brown carried out a satisfactory and efficient task. Mr Brown has been requested to carry out investigations of an anthropological nature on future patrols to gain experience in such matters.

#### INTRODUCTION.

The villages visited were those of ISURAVA / ALOLA, ABUARI and HAGUTAWA, the four remaining villages in the Biage Valley which are not included in the Ilimo Local Government Council, and are situated far up the valley in the area more commonly known as the " Gap ".

The inhabitants are agriculturalists and are from the Koiari Tribe, the other members of which inhabit the Eastern Slopes of the Owen Stanley Ranges in the Central District.

The area is fully controlled and the people are quite and peaceful, no incidents warranting court action occured during the course of the patrol which, was well received by the population. DIARY OF PATROL.

To avoid repetition in the Diary, the following procedure was carried in all the villages visited :-

I. Houses, latrines and rubbish pits inspected;

Census check; Medical inspection by N. M. O. during check; Disputes and minor matters heard and settled where necessary; General discussions with villagers and Officials;

6. Gardens inspected.

#### Wednesday I4th January 1959.

Departed kokoda byLand Rover at 0800 hours for Administrati -on School arriving 0815. Departed 0915 after waiting for carriers, arrived Isurava / Alola I420.

> Rest of day and night at Isurava/Alola. Walking time 5 hours 5 minutes. I4 carriers.

#### Thursday 15th January 1959.

Departed Isurava/Alola 0920 hours, village gardens inspected en route, arrived Abuari 1030.

Rest of day and night at Abu Walking time I hour IO minutes.

I4 carriers.

### Friday 16th January 1959.

Departed Abuari 0800 arriving Hagutawa 0920. Departed Hagutawa IIOO, arrived Pelai I225 where a change of carriers was necessary. This village is in the Ilimo Council and apart from a village it was undisturbed. Departed for Kokoda I3I5 arrived same at I450 hours.

Walking time 4 hours 20 minutes.

#### Page 3.

#### NATIVE AFFAIRS.

#### (A) Native Situation.

As mentioned previously the area is fully controlled and no court cases and very few minor disputes were brought to notice. The patrol was well provided for throughout its stay and the few able bodied men evailable for carrying were readily obtained.

Apparently all patrols visiting this area are confronted with the problem of the shifting of villages, and on this occasion the villagers of Isurava/Alola and Abuari raised the question of moving to new sites.

The reason put forward for the proposed move of Isurava / Alola was that, the people thought that the children were not getting adequate schooling at the S.D.A. Mission School and consequently, wish to move into a closer proximity to the Administration School at Deniki. It could be noted noted here that the S.D.A. Mission wields quite an influence and prior to this patrol experienced Field Staff Officers have commented on fact that these moves may have been instigated by the Mission to extend their area of influence.

The people of Abuari also requested to move from their present site back to the old pre-war location as recently they have had numerous cases of sickness and attribute it to the present location.

They were advised that if the moves were thought to be warranted by the A.D.O. then they would be advised as to his decision and that they were not to move until it was decided, with reference to the fact that the Administration was against the indiscriminate shifting of established villages.

## (B) Native Agriculture and Livestock.

Gardens throughout the area were in good condition and a plentiful supply of food is assured. Agricultural Officer K. Mayer had previously passed through the same area and consequently only brief inspections were made. Sweet potato is the

#### (A) Native Situation.

As mentioned previously the area is fully controlled and no court cases and very few minor disputes were brought to notice. The patrol was well provided for throughout its stay and the few able bodied men available for carrying were readily obtained.

Apparently all patrols visiting this area are confronted with the problem of the shifting of villages, and on this occasion the villagers of Isurava/Alola and Abuari raised the question of moving to new sites.

The reason put forward for the proposed move of

Isurava / Alola was that, the people thought that the children

were not getting adequate schooling at the S.D.A. Mission School

and consequently, wish to move into a closer proximity to the

Administration School at Deniki. It could be noted noted here

that the S.D.A. Mission wields quite an influence and prior to

this patrol experienced Field Staff Officers have commented on

fact that these moves may have been instigated by the Mission

to extend their area of influence.

The people of Abuari also requested to move from their present site back to the old pre-war location as recently they have had numerous cases of sickness and attribute it to the present location.

They were advised that if the moves were thought to be warranted by the A.D.O. then they would be advised as to his decision and that they were not to move until it was decided, with reference to the fact that the Administration was against the indiscriminate shifting of established villages.

## (B) Native Agriculture and Livestock.

Gardens throughout the area were in good condition and a plentiful supply of food is assured. Agricultural Officer K. Mayer had previously passed through the same area and consequently only brief inspections were made. Sweet potato is the

#### Page 4.

the staple crop with taro and corn and suropean vegetables to a lesser degree.

Cabbage
Turnip
Deetroot
Carron
Passionfruit
Capsicum

4d per pound.

the people raised the question of coffee seed as it has been promised but as yet has not been supplied. They are a keen group of workers and it is thought that they are entitled to some co-operation from the department concerned as they have only met opposition on previous occasions due to the departments specialised policy in regards to cocoa.

which is not under the seventh Day Adventist Mission, there are quite a number of pigs which are apparently well cared for and in good condition.

In all villages talks were given as to the introduction of goats as enquiries have been made by native Affairs and it was found that they can be purchased from Fort morespy at three pounds each. The people showed the usual enthusiasm but as yet they have not made any further enquiries into the matter. Goats were chosen not only for milking but to help supplement their existing diet which is almost entirely of vegetables and it is also acceptable to their religion.

nowever apart from the already existing iterests the topography does not lend itself to many more avernes of utilization except numerous gardens which have and are being prepared for small blocks of coffee.

#### MEDICAL AND HEALTH.

The patrol was accompanied by a Native Medical Orderly who made an inspection in each village during census.

#### Isurava/Alola

Two cases of malaria, one of which was sent to mokoda for treatment.

Two cases of tropical ulcers which were also despatched to Kokoda.

Seven septic sore cases treated in village.

One case of tinia.

Abuari.

Four septic sore cases treated in the village.

Hagutawa.

One case of malaria the patient being sent to wokoda for treatment.

Two cases of septic sores treated in the village.

It can be seen from the above figures that sickness is not rife in the area and on the whole health was generally good.

mention should be made at this stage that the people seem to be prone to mararia and this should be weighed in the village movement problem as the people will in fact be moving from a relatively free area down to the lower part of the valley in which the malarial rate is fairly high and in consequence a severe outbreak may occur.

being a small area there was not a great deal to report on.

#### EDUCATION.

School was in recess at the time of the patrol and consequently attendance figures were not obtained either for the mission School or the Administration School.

The Seven Day Mission School at Isurava /Alola is in the hands of one native teacher, Nodoku Finave who received his "training" at Bautama in the Central District where he reached Standard 3. He speaks practically no English and an iterpreter was used for the conversations.

The pupils are graded in "A" and "B" groups which could not measure up to the Administration GradeI. The coverage of subjects is adequately described in Mr.J.C. William's patrol report No2 - 1956/58 coupled with his apt description as to the main purpose of the shools being there.

Due to its situation it naturally has a greater attendance than the Administration School which is over five hours walk from the villages in question.

#### KUAUS AND BRIDGES.

The only vehicular road used on the patrol was the road the through the Government Rubber Plantation which only extends as far as the Administration School near Deniki.

"rom Deniki to a point half an hours walk past Isurava/Alola the old "Kokoda Trail" is followed but at this point it branches off to the right to make the ascent through the "Gap". The remaining route is a mere track over rough and broken ground.

considering the rough nature of the terrain and the sparse population in the area there can be no reason for complaint as to the conditions of the track. An inspection was made and the possibility of developing the already existing roads to mule track standard is quite feasible, and would, if carried out, rid one of the problem of obtaining carriers as in some cases women had to carry due to the small number of able podied men in the area.

#### VILLAGES.

All villages visited had an ample number of latrines and rubbish pits, no houses warranted rebuilding. Good drinking water was readily obtained at a distance of no more than five minutes walk at any one village.

#### REST HOUSES.

The following villages have rest houses and police barracks.

Isurava/Alola: one large room with small verandah and kitchen;

present condition fair.

Abuari : a copy of the above; present condition good.

and the small number of village people could not be expected to build and maintain one. Although it was unnavoidable it is felt that insufficient time was spent amongst this group.

#### VILLAGE OFFICIALS.

#### Isurava/Alola.

Luvila / Senova the village constable handles the combined village affairs in a most satisfactory way and did everything possible to aid the patrol during its stay.ne is well liked by the village people and is a credit as a village contable.

Haowa of Isurava is a competent man and is a good Councillor.

Both the above officials were elected to hold the S. A.P.'s

'due to be granted for this area.

#### Abuari.

miuri/Guligo is the village constable for the above village and also looks after the hamlet or magutawa. Negite and Gadi are Councillors for Abuari and magutawa respectively the former at present is in prison at Kokoda. Mowever both are capable in their duties.

Miuri appears to lack the concentrated effort but appears to carrying out his work to the best of his ability.

These orric'als were also elected for S. A.P. 's.

#### CENSUS.

Only three months previously the A.D.O. Kokoda carried out the same patrol and hence only a census check in relation to tax defaulters was made. All males where there was no record of payment in the tax register were checked as to there wherespouts and four

#### Page 8.

were sent to Aokoda to pay their tax.

#### ANTHROPOLOGY.

No anthropological data was collected during the patrol.

influence in the area because of its situation and has a particularly strong influence in the above village and Abuari. However apart from these the other villages stated that they wanted no part of it.

whether the mission has achieved anything of a practical nature is devatable but the fact remains that it has gained the support of the abovementioned villages and it appears that the people lean more towards the mission than to the Government.

#### CONCLUSION.

The area is constantly patrolled and is trouble free apart from the small grievances and minor disputes that normally occur, the people being an industrious and peaceful crowd.

No outstanding incidents or events occurred.

B. D. Kow.

B. D. Brown.

Cadet Patrol Officer.

The District Officer, Northern District, POPONDETTA.

#### PATROL REPORT - KOKODA No.7/1958-59

Receipt is acknowledged.

Changes in the systems of land tenure and usufructuary inheritance rights have been reported in all sophisticated Districts - a corollary of culture contact.

Mortality ratio over the area patrolled seems very satisfactory and Administrative influence adequate at their present stage of development.

A routine patrol that calls for no further comment.

(A. Roberts)

Patrol Report - Kokoda No. 7 of 1958/59 - Mr. B. Brown, C.P.O.

Forwarded hereiwth is a report of a Patrol carried out by Mr. B. Brown, C.P.O., of the WAWONGA Census Division, Kokoda Sub-district.

The Assistant District Officer, Kokoda has given a most thorough coverage of all matters raised in the report, and no additional comment is required by this office.

Although only a miner patrol of short duration, Mr. Brown has carried it out well. In fact, having regard to his youth and inexperience, Mr. Brown's field work during his first youth as been very good and he has shown a definite aptitude for it.

G. Linsley
District Officer.

35th July, 1959.

The District Officer, Northern District, POPONDETTA

#### PATROL NO. 7/58-59.

Please find enclosed two copies of the above report by Mr Brown. C.P.O.

The comment made by Mr Brown on his page 5 re clathing is made the subject of a separate memorandum by myself (14-1-1 attached).

I have drawn attention to the remarks on the anticipated change in Wawonga land tenure in the Annual Report. The change is fairly geneal in this district and needs to be brought to your notice only - no necessity for further comment appears to me to be necessary.

Re page 7 "coffee" - I am informed by the Area Agricultural Officer that there remains plenty of time yet before the coffee will need transplanting and that he has the situation in hand.

With regard to health please be advised that Mr Gaunede left for the Wawanga area on Mr Brown's return. There commenced an epidemic of flu from which there resulted eleven deaths. It was to check this epidemic that Mr Gaunede went on patrol - the first deaths having been reported as occurring a few days after Mr Brown's patrol returned.

The wire requested by the councillor from ASISI (p.12, para 1) has been indented from Australia by the Department of Works on my request.

A further six shovels have been issued to Wawonga village officials since Mr Brown's return. My memo 30-1-1 attached refers to the subject of pack animals.

Reports on members of R.P.C. have been sent direct to Police Headquarters.

The list of taxable male absentees has been sent to the Taxation Commissioner. My recommendations re the appointment of village constables No.3 and 33 are enclosed.

Mr Brown's report is most informative and his executive action all that was required. His tax collections were correctly accounted for.

Copies of the report relative to their department have been sent to local departmental representatives of Health, Agraculture and Education. An extra copy of the remarks on Education are enclosed for the information of the D.E.O.

T.W. Leake. a/Assistant District Officer.

#### PAGE 2.

#### INTRODUCTION.

The area patrolled is situated at the South-Eastern extremity of the Kokoda Sub-District the borders of which are roughly formed by the spurs of the main Owen Stanley Range at the Southern and South-Eastern extremities and by the Kumusi River on the Eastern side. Taking the village of Emo as the hub of a wheel bush walking tracks branch out to all adjoining Districts and Sub-Districts namely those of : -

(I) The Koiari Area of the Central District and Port Moresby;

Rigo Sub-District; Tufi Sub-District;

(4) The Popondetta Sul Astrict via the Managlase Census Division.

Walking is done over " bridal paths " passing through country of a mountain not retree and due to the fact that the roads are constructed ong small watercourses progress is slow especially when heavy rain is encountered.

The Wawonga Census Division supports a total population of 938 people all are essentially agriculturists but who by the same token are divided into two separate linguistic groups, the villagers of Namanaia; Warobila; Managube and Rume a speak the Juwa dialec' whilst the villagers of Emo; Ejaro; Ujilo; Awoma and Kovio speak the Koiari dialect.

The last Native Affairs Patrol to this area was made in March 1958 on this occasion a Tax/Census was carried cut.

## DIARY OF PATROL.

# Wednesday 17th June 1959.

Departed Kokoda Statica by Landrover 68: I5 hours arriving Asisi. Inspections made vehicular and suspension bridges. Departed Asisi arriving Sirorata I3:40 hours. Visit to Anglican Mission School and talks with people.

#### PAGE 3.

#### Thursday 18th June, 1959.

Departed Sirorata for Namanaia arriving same I4:00 hours, inspection of Angara and Gorubuna en route. Village inspection and inspection of coffee nursery on arrival and talks with people at night. Heavy rain.

#### Priday 19th June, 1959.

Namanaia departing same o9:30 hours for Managues with inspection of Warobila en route. Tax/Census Managube and Kumara the latter having lined at Managube. Departed for Emo arriving same I4:20 hours, inspection of Rumara en route. Heavy rain, afternoon spent on census figures and talks with people.

#### Saturday 20th June, 1959.

Tax/Census Emo village followed by village inspection and inspection of coffee nursery. Departed for Ejaro arriving same IO:I5 hours where Tax/Census and village inspection was carried out. Departed for Awoma arriving same I2:30 hours no Tax/Census carried out at Ujilo or Awoma as it was their sabbath. Tax/Census figures completed to date.

#### Sunday 21st June, 1959.

S.D.A. Pastors to Kokoda. Departed for Kovio arriving 09:40 hours where Tax/Gensus and village inspection was carried out. Talks with the people. On return to Awoma an inspection of the coffee nursery and Tetabet Hamlet was carried out. Afternoon spent on Tax/Census and village inspection at Awoma.

## Monday 22nd June, 1959.

Tax/Census for Kovio and talks with the people.

List of all male Absentees made for inclusion in report.

Visit to Seven Day Adventist Mission School at Awoma.

Tuesday 23rd June, 1959.

Departed Maoma for Managube arriving same IO:40 hours. Inspection of Administration Aid Post and St. Mary's Anglican Mission School at Emo en route. It was noted that this

#### PAGE 4.

#### (Diary Cont.)

was the first patrol to stay at Managube for several years
eventhough the Rest House is maintained. Afternoon spent talking
to the people and compiling report.

Wednesday 24th June, 1959.

Departed Managube for Ilimo Rest House arriving
Papaki I5:40 hours where returned to Station by Landrover.

i.e. 207 there were 70 males absent at work and 6 at Mission Schools. However considering that the only means available at the present time of obtaining a cash income is through the sale of their labour there seems to be no issue for elarm.

In all cases there was no hesitation in the payment of their Personal Tax for the year and spart from Absentees all sligible males paid their tax.

Apparently it is Mission Policy, in this case with reference to the Seven Day Adventist movement at Asoma and nearby villages for followers to be adequately clad, and it was observed that their plathing was in a dirty and unsanitary condition. It to noted that although the people are observing the tenets of their religion they are in fact contravening the Marive Regulation Ordinance.

Roomowic Developments

Trial plantings of colfeehave been introduced since the last Native Affairs Patrol in 1958 and all nurseries were visited and a count made. This will be dealt with more fully under

In cornection with the above move talks were held with the people in regards to the present system of land tenure in the arealst present in comes by the clans and the initiated has usualteery rights. In accordance with policy has a contract on a finite dual contract in relation to correct proving war.

After lengthy discussions with the variable care cahowands

#### PAGE 5.

#### NATIVE AFFAIRS.

#### Native Situation.

The area patrolled was quiet and peaceful no cases were brought to notice warranting court action. The patrol was well received and at no time was there any difficulty encountered in obtaining carriers.

Absenteeism is still rather high in the area as out of a total of males between the age group of I6 years to 45 years i.e. 207 there were 70 males absent at work and 6 at Mission Schools. However considering that the only means available at the present time of obtaining a cash income is through the sale of their labour there seems to be no cause for alarm.

In all cases there was no hesitation in the payment of their Personal Tax for the year and apart from Absentees all eligible males paid their tax.

Apparently it is Mission Policy, in this case with reference to the Seven Day Adventist movement at Awoma and nearby villages for followers to be adequately clad, and it was observed that their clothing was in a dirty and unsanitary condition. It is noted that although the people are observing the tenets of their religion they are in fact contravening the Native Regulation Ordinance.

## Economic Development.

Trial plantings of coffee have been introduced since the last Native Affairs Patrol in 1958 and all nurseries were visited and a count made. This will be dealt with more fully under Agriculture.

In connection with the above move talks wre held with the people in regards to the present system of land tenure in the area. At present land is owned by the Clans and the individual has usufructury rights. In accordance with policy the question of individual ownership in relation to coffee growing was suggested.

After lengthy discussions with the various Lohia's concerned and the village people they agreed that some albowance

#### PAGE 6.

#### (Economic Development Contd.)

would have to be made for individual ownership eventhough it was a very revolutionary change.

Reference is made to the system of individual ownership in the Higaturu Council Area and if the Wawonga is eventually included in the Ilimo Native Local Government Council a parallel may be drawn in that they could adopt a similar Council Rule.

#### C. Political Developement.

At present there is no form of political developement in the area and it does not appear likely that there will be may change e.g. an extension of the Ilimo Native Local Govt.

Council or formation of another separate Council, in the immediate future. However taking actual distances into account plus the fact that a clash crop is now in the early stages of developement it would be feasible to ear that an extension of the Ilimo Native Local Government Council could be made in the future.

#### PAGE 7.

#### AGRICULTURE & LIVESTOCK.

The traditional form of shifting agriculture is practiced and in this area the gardens are particularly good. The staple food grown is yam which is supplemented by sweet potato, sugar cane and bananas whilst in the Seven Day Mission area around Awoma large quantities of pumpkins and to a lesser degree cucumbers are grownl

Due to the above Mission's influence domesticated pigs are only found in the villages from Namanaia to Emo and these are found in large numbers. Domesticated fowls are found in the Mission area.

#### Coffee.

An inspection was made of all nurseries containing the now three and a half to four and a half month old coffee seedlings and a count made. Only in one instance was it found that a garden had been prepared for transplanting and that the leuceana was not " taking " satisfactorily. Requests were also made for leuceana seed and it was only by accident that a bag of the same seed was found in the Awoma rest house.

Due to the uncertainty the people were in as to the time of transplanting and actual preparation of gardens several Village Officials were brought in to see the Agricultural Officer at Kokoda with the idea that something could be learnt by these people, who could then take this knowledge back to the villagers. These people were issued with rhizobium inoculum and shown how to prepare the actual seed.

Actual seedlings in the nurseries at present are as

follows :	Village Name	No in Nursery.
	Namanaia	456 508
	Emo	1,128
	U3110 Kovio	420
	Total	2,512

Note.

This is not making allowance for actual seeds which have not germinated to date.

#### PAGE 8.

#### EDUCATION.

Although the Sirorata Anglican Mission School is not in the Wawonga Census Division a visit to it was nevertheless made. The school is supervised by a native teacher Gilbert/Ohungapa who previously received his training at Martyr School at Agenahambo and following that taught for three years at the Anglican Mission School at Emo.

There were twenty-five names on the Roll Book and at the time of the visit there were twenty-two in attendance. On the two large blackboards provided reading, writing and numbers were taught. The children were provided with pencils and exercise books and each child also had an Oxford English Course (Reading) for Papua and New Guinea whilst the teacher also instructed from a Longman's Primer.

Instruction is in English and Grade I and II is taught the children then progress to the Anglican Mission School at Eiwo and then if satisfactory to Martyr School at Agenahambo.

School is carried out from Monday to Friday with Wednesday set aside for manual labour around the Mission and the approximate hours of instruction were as rollows. The classes commenced at nine o'clock and finished at one o'clock with a recess of half an hour at eleven o'clock.

## Wawonga Division.

There are two separate Mission Schools operating in this area.

The Seven Day Adventist Mission have a school at Awoma and this is in the charge of m Polonia/Kerea who previously attended the school for Teacher Training run by the Mission near Sogeri. He speaks little English and instruction is in the Motu Dialect although I was later informed by the European Pastor that English is also taught to a lesser degree.

A total of thirty-six attend according to the roll book Grades A and B being taught. The children are provided with slates and pencils and three large blackboard are also provided. Text books were limited to a few The Oxford English Course for Papua and New Guinea - Reading ", whilst the teacher taught numbers

#### PAGE 9.

## Education Continued.

from " Village Number Book I and II."

The pupils progress to Menari in the Central District and only recently eight boys and three girls due to the results they obtained in an Examination set by the Teacher at Awoma. It was unfortunate that this Mission Teacher departed for Sogeri the day Census was carried out as this information had to be obtained from a Mission helper.

Apparently there are three hours instruction per day from Sunday to Thursday inclusive while in the afternoon the children do manual work around the Mission grounds and in the Teacher's garden.

The second school in the area is the St.Mary's Anglican Mission School at Emo, the Head Teacher in charge of same was in Saiho Hospital at the time of the visit. He is a Certified Teacher and is aided by two Assistants. Grade I and II is taught and at the time of the visit there were approximately eighty students in attendance. Because of the isolated position apparently very few progress higher than Grade II.

The school comprises two buildings each of which is equipped with two blackboards and bush material seats and desks.

The children had a limited number of The Oxford English Course Reader and the Head Teacher apparently gave instruction from a Longman's Primer.

From the attendance figures the attitude of the people is one of encouragement as out of a total of two hundred and ninety children in the area , not alls of whom are eligible to attend, one hundred and fifty attend the two schools and progressions from them.

No requests were made for an Administration School in any of the areas and as applications have not been made to the Education Department to date concerning Registration, the Schools still remain in the exempt category.

#### PAGE 10.

#### MEDICAL & HEALTH.

An Administration Aid Post is situated at Emo and is staffed by one Aid Post Orierly. This serves the entire population of nine hundred and thirty-eight in the Wawonga Census Division. The area is infrequently patrolled as with only one Orderly most of his time is spent attending to inmates and persons requiring treatment at the Aid Post.

In the village of Awoma last April the people had an epidemic of dysentery with a total of sixteen persons dying and it was found that the Oderly in charge of Emo at the time had not even gone to the village to investigate the outbreak.

No P.H.D. representative accompanied the patrol and consequently only general observances were made. On the whole health appeared to be generally good although the peoples' resistance must be comparatively low as the majority suffer from perpetual colds.

One tropical ulcer was brought to notice and several cases of infected sores were sent to the Aid Post for treatment. The entire area is apparently fairly free from Malaria and no active cases were seen throughout the patrol.

However if staff is available a second Aid Post Orderly would alleviate the position in this area and to quote a previous Native Affairs Officer's words. "it would allow for constant patrolling by these Orderlies Throughout the area." At present it means a gap of two weeks at the Aid Post when he returns to Kokoda for supplies and during this period the entire area is unattended.

#### PAGE H.

#### MISSIONS.

There are two Missions in the area visited.

The Seven Day Adventist Mission is firmly established at Awoma and draws its followers from the villages of Kovio Awoma and Ujilo. The Mission is controlled from headquarters in the Central District and the staff at the Mission itself comprises a Native Teacher and an Assistant.

The Anglican Mission has a Station at Emo which is staffed by a Certified Native Teacher and two Native Assistants. Their field of influence extends from Ejaro to Namanaia in the Wawonga Census Division.

#### PAGE IZ.

#### ROADS & BRIDGES.

At the present time a vehicular road exists from Kokoda Station to Asisi but due to the condition of the Asisi bridge the vehicle was not taken across it - repairs had been carried out on my return. Although the suspension bridge at the Kumusi is not in the area patrolled an inspection was made and the Councillor from Asisi made a request for some heavy guage wire as the native materials being used were in constant need of repair.

## ASISI - SIRORATA - ANGARA - GORABUNA.

The track follows the Kumusi upstream for a short distance the actual road being on the edge of a plateau, then after a series of ascents and descents the Ifoi River is reached. This is crossed by a cane suspension bridge and then after a steep ascent and descent Sirorata village is reached.

From Sirorata Village the track follows the Kumusi River upstream and to Angara this is good walking. The next village encountered is Gorabuna and once again no difficulties are come across.

## GORABUNA - NAMANATA.

This is the worst section encountered the track passing over tree roots and the road mainly comprises of watercourses which quickly change to small streams when it rains. About an hours walk from Gorabuna a steep descent is made to the Sa Creek and crossing it a very steep ascent is made to the top spur of the range followed by a somewhat steep descent to Namanaia Village. Possibly this section could be avoided by detouring around the Eastern side of the range.

# NAMANAIA through to KOVIO.

Once in the Wawonga Valley the tracks are quite good and with a small amount of improvement mule track standard could be reached. Cagamu the Village Constable from Ujilo has roughly graded his road from Ujilo to Awoma and has shown what could be done providing materials are available.

#### PAGE I3.

Roads and Bridges.

Twelve spades have been issued to date expressly for roadwork with a possible eight to follow.

After comparing this area with the Chirima and the work accomplished by the Roman Catholic Mission in that area I think it is quite within limits to say the mule track standard could be achiemed.

The main problem after the initial work had been completed would be not the maintenance of the section between Gorabuna and Namanaia as continual washouts would occur and also the fact that this articular area is uninhabited.

The rest house to questions has collected and with only

#### PAGE 14.

#### VILLAGES.

In all villages conditions were generally good, each one having ample pit latrines and rubbish holes for disposal of garbage. Water supplies are good in the area in all cases the water was able to be obtained in close proximity to the rest house.

Two Villages, those of Namanaia and Kovio, were preparing to move to new sites; in both cases the site is in close proximity to the present one. Housing was good in all villages and in most there were new buildings being constructed.

#### Rest Houses.

Sirorata, Awoma :- Large two bedroom buildings in good condition.

Namanaia, Managube, Emo and Kovio :- Small two room buildings

constructed of split softwood floors and walls with bamboo

that ched roofs. All were in good condition.

The rest house at Gorabuna has collapsed and with only one available m. and two women in the village plus the fact that patrols very rarely stay there, it was not asked for it to be rebuilt.

All Police Barracks were in good condition and large enough to accomodate the needs of any patrol operating in the area.

## VILLAGE OFFICIALS.

Refer Appendix " A " attached.

#### PAGE 15.

#### TAX/CENSUS.

This was the main object of the patrol and excluding Absentees Personal Tax was collected from all eligible Males. A total of eighty-one pounds ten shillings was collected in the area however eight pounds of this total comprised Personal Tax for 1958.

In all a total of SI Total Exemptions were granted and are made up as follows.

Permanently Unfit	 _2
Village Officials	 I
Old Age	 22
Family Obligations	 6
Old Age, F/O	 6
Mission Worker	

There was a total of #O Absentees in the area comprising 25 working inside the Sub-District and 35 outside the Sub-District the remaining IO attend schools outside the Census Division.

( Refer list of Absentees at work attached.)

Absenteeism in the area is high but Village Life and Welfare does not appear to be suffering in anyway.

In the Census Return there were 5I births - 26 males and 25 females compared with 26 deaths I6 of which occured in Awoma Village to an outbreak of Dysentery. However the disappointing factor was that out of this total I4 children up to the age of thirteen years died.

Migrations in and out were mainly shifts from village to village within the area and only a very small percentage actually migrated out to another Division.

#### PAGE 16.

#### LAW & JUSTICE.

Apart from the previously mentioned case of dirty and insanitary clothes mentioned on page five no complaints or matters warranting court action were brought to notice.

There were numerous complaints of domesticated pigs destroying gardens but since the gardens were not fenced and no attempt made to do so the people were informed that no action could be taken.

#### CONCLUSION.

The patrol was/routine matter the area being quiet and peaceful with no sign of trouble encountered.

B. D. Brown

B. D. Brown. Cadet Patrol Officer.

#### " APPENDIX A "

#### VILLAGE OFFICIALS - WAWONGA CENSUS DIVISION.

#### Village Constables : -

OIBE/EMU appointed I5/XI2/5I : Emo Village.

GACAMU/OVIVI " I5/ 3 /54 : Ujilo Village.

NEKI/DABUA " I/ 5 /56 : Kovio Village.
