

## Avacen Inc.

Avacen Grip enables a person to change their core temperature in minutes.

## Battelle

The world's largest independent non-profit R&D organization, providing innovative solutions to the world's most pressing needs through its four global businesses: Laboratory Management; National Security; Energy, Environment & Material Sciences; and Health & Life Sciences.

## Biocept

Specializes in oncology tests, specifically for circulating tumor cells.

## Biomatrix

Develops technologies for biomolecule stabilization for use in research, biobanking, diagnostics and forensics.

## BIT MedTech

Leading resource for contract development and manufacturing of life sciences instrumentation.

## CleanTECH San Diego

Nonprofit catalyzing the growth of San Diego's cleantech sector; ultimately stimulating job creation and the region's overall economy.

## CorTechs Labs, Inc.

NeuroQuant®, brain analysis software that can noninvasively detect atrophy associated with neurological diseases such as Alzheimer's.

## Creative Electron, Inc.

Medical Voice Recorder, enabling first responders to record the critical care delivered to victims.

## Cytori Therapeutics, Inc.

Provides patients and physicians with medical technologies that harness the potential of adult regenerative cells from adipose tissue.

## D&K Engineering, Inc.

Global contract R&D, engineering and manufacturing services company focused on developing and manufacturing complex electro-mechanical products and equipment.

## Daylight Solutions

Über Tuner Series Broadly Tunable Mid-IR Lasers, used for breath diagnostics of disease and analysis of molecular changes in tissues for early cancer detection.

## DD Studio

Turn-key product development firm committed to strategic design and innovation for startups to Fortune 500 companies.

## Dexcom, Inc.

Markets wireless glucose sensors, transmitter and receiver systems for real-time continuous glucose monitoring.

## Dhart Development Corporation

Breakthrough consumer treatments for nail diseases and dental issues.

## Entra Health Systems

MyGlucoHealth Wireless Bluetooth, enabled blood glucose meter and diabetes management system.

## Hypnoz Therapeutic Devices, Inc.

Jaw Elevation Device, a hands-free device to assist providers in maintaining an open airway.

## Integrated Chemistry Design, Inc.

Chirys Draw is an innovative, best-in-class iPad application for drawing publication quality molecular structures and reactions.

## KAER BioTherapeutics Corporation

SUPRAER, a compact spray drier, concentrator and delivery of high output respirable aerosols of biotherapeutics and large labile molecules.

## Kalos Therapeutics, Inc.

Developed the ANP (atrial natriuretic peptide), family of peptides as a new mechanism for cancer treatment.

## Medipacs

Micro-infusion pump based upon an expansive polymer.

## MindFlow Design

Demonstrating the value of great human centered product design and how this leads to breakthrough life sciences products and medical devices.

## Navisan

Stereo Navigator PET-Guided Breast Biopsy Accessory, used to biopsy breast lesions visible on the Breast PET scanner.

## Optimer Pharmaceuticals, Inc.

DIFICID™, treatment for Clostridium difficile bacteria, the most common hospital-acquired infection.

## Organovo

MMX Bioprinter technology provides human 3D biology with in vitro convenience.

## Otosound Products LLC

Biomedical devices targeting Tinnitus, a condition characterized by ringing in the ears caused by pathologies of the central nervous system.

## Outsource Manufacturing

Displaying medical and biomedical devices manufactured at its facility.

## San Diego & Imperial Small Business Development Center

Provides superior consulting and training that results in entrepreneurial success and economic growth and prosperity for California.

## SDSU BioScience Center

The SDSU BioScience Center is the first and only multidisciplinary center in the country to focus its research efforts on the critical nexus of infection, inflammation and cardiovascular disease.

## Southwest Fabricators

Offers contract manufacturing solutions for optimized design, precision fabrication, finishing and assembly to biotech and renewable energy OEMs.

## UC San Diego Health Systems

A pillar in the San Diego community, the health sciences campuses include the region's only academic health system, two professional schools and numerous specialty care facilities.

## Volcano Corporation

Develops, manufactures and commercializes a broad suite of devices designed to facilitate endovascular procedures, enhance the diagnosis of vascular and structural heart disease and guide optimal therapies.
