Campus Directory Information

(858) 534-2230

UNDERGRADUATE

Admissions	Office of Admissions and Relations with Schools	Building 301, University Center, 0021, (858) 534-4831
Campus Tours	Office of Admissions and Relations with Schools	Price Center Theater, 0075, (858) 822-1455
Educational Opportunity Program (EOP)	Office of Admissions and Relations with Schools	Building 301, University Center, 0021, (858) 534-4831
Financial Aid (Loans and Grants)	Financial Aid Office	Building 201, University Center, 0013, (858) 534-4480
International Students' Affairs	Office of International Education	International Center, 0018, (858) 534-3730
Housing		
On-Campus	Housing Administration	Trailer 310, University Center, 0041, (858) 534-4010
Off-Campus	Office of Housing Services	Student Center Building A, 0309, (858) 534-3670
Part-Time Employment	Career Services Center	Career Services Center, 0330, (858) 534-4500
On-Campus		
Off-Campus		
Provosts		
Eleanor Roosevelt College	Eleanor Roosevelt College Admin. Building	ERC Campus, 0546, (858) 534-2247
John Muir College	H&SS Building, Room 2126	Muir Campus, 0106, (858) 534-3583
Revelle College	Revelle Provost Building	Revelle Campus, 0321, (858) 534-3262
Thurgood Marshall College	Thurgood Marshall College Admin. Building	Marshall Campus, 0509, (858) 534-4002
Earl Warren College	Computer Science and Engineering (EBU 3), Room 1100	Warren Campus, 0422, (858) 534-4350
Sixth College	Pepper Canyon Hall, 2nd Floor	University Center, 0054, (858) 822-5955
Registration	Admissions & Registrar	Building 301, University Center, 0021R, (858) 534-3150
Residence Status	Admissions & Registrar	Building 301, University Center, 0021R, (858) 534-4586
Scholarships	Financial Aid Office	Building 201, University Center, 0013, (858) 534-4480
Student Activities	University Events Office	Price Center, 0078, (858) 534-4090
Transfer Student Services	Office of Admissions and Relations with Schools	Building 301, University Center, 0021, (858) 534-4831

GRADUATE

Dean of Graduate Studies and Research	Office of Graduate Studies and Research	Building 518, Eleanor Roosevelt College, 0003, (858) 534-3555
Admissions	(Address the appropriate department of instruction.)	
Affirmative Action	Office of Graduate Studies and Research	Building 518, Eleanor Roosevelt College, 0003, (858) 534-3871
Fellowships	Office of Graduate Studies and Research	Building 518, Eleanor Roosevelt College, 0003, (858) 534-3556
Financial Aids (Loans and Grants)	Financial Aid Office	Building 201, University Center, 0013, (858) 534-3807
Graduate Women's Program	Office of Graduate Studies and Research	Building 518, Eleanor Roosevelt College, 0003, (858) 534-3555
Housing	Graduate Apartments Residential Apartments Office	9224 B Regents Road, 0907, (858) 534-2952
Teaching and Research Assistantships	(Address the appropriate department of instruction.)	

SCHOOL OF MEDICINE

Admissions	Admissions Office	162 Medical Teaching Facility, 0621, (858) 534-3880

Academic and Administrative Calendar, 2006–2007

Fall Quarter, 2006

Fall quarter begins	Monday, September 18
Instruction begins	Thursday, September 21
Veteran's Day	Friday, November 10
Thanksgiving holiday	Thursday–Friday, November 23–24
Instruction ends	Friday, December 1
Final exams	Monday–Saturday, December 4–9
Fall quarter ends	Saturday, December 9
Christmas holidays	Monday–Tuesday, December 25–26
New Year holidays	Monday–Tuesday, January 1–2

Winter Quarter, 2007

Winter quarter begins	Friday, January 5
Instruction begins	Monday, January 8
Martin Luther King, Jr. holiday	Monday, January 15
Presidents' Day holiday	Monday, February 19
Instruction ends	Friday, March 16
Final exams	Monday–Saturday, March 19–24
Winter quarter ends	Saturday, March 24

Spring Quarter, 2007

Spring quarter begins	Thursday, March 29
Cesar Chavez holiday	Friday, March 30
Instruction begins	Monday, April 2
Memorial Day holiday observance	Monday, May 28
Instruction ends	Friday, June 8
Final exams	Monday–Friday, June 11–15
Spring quarter ends	Friday, June 15
Commencement	Saturday/Sunday, June 16/17

Summer Sessions, 2007

Summer Session I begins	Monday, July 2
Independence Day holiday	Wednesday, July 4
Summer Session I ends	Saturday, August 4
Summer Session II begins	Monday, August 6
Summer Session II ends	Saturday, September 8
Labor Day holiday	Monday, September 3
Special Session	June 18–September 14

Undergraduate Admission Information and Enrollment Deadlines

	FALL QUARTER 2006	WINTER QUARTER 2007	SPRING QUARTER 2007
ADMISSION	Nov. 1-30, '05	*July 1-31, '06	*Oct. 1-31, '06
Filing period for application materials			
PRIORITY DEADLINE FOR APPLICATIONS FOR FINANCIAL AID	March 2, '06	March 2, '06	March 2, '06
ENROLLMENT (Continuing Students)	May 10-Sept. 18	Nov. 1-Jan. 3	Feb. 14-Mar. 27
Students may enroll via the Web or in person after their appointment begins.			
Students may use add cards to enroll in restricted courses.			
Students may pay fees by e-check via the Web or in person at Cashier's Office after enrolling.			
STUDENT HEALTH INSURANCE WAIVER PERIOD OPEN (ALL STUDENTS)	June 1-Sept. 11, 2006	Nov. 1-Dec. 11, 2006	Feb. 1-Mar. 11, 2007
BILLING STATEMENTS AVAILABLE ON TRITONLINK	C-8/18 N-9/5	Dec. 1	March 3
NEW STUDENT ENROLLMENT	Aug. 15-Sept. 18	Dec. 4-8	March 12-16
DEADLINE DAY TO ENROLL WITHOUT LATE FEES			
Students who have not enrolled will be assessed \$100 in late fees. (\$50 late enrollment fee and \$50 late payment fee)			
Continuing Undergraduates	Sept. 18	Dec. 20	March 27
New Undergraduates	Sept. 29	Dec. 20	April 6
QUARTER BEGINS	Sept. 18	Jan. 5	March 29
LAST DAY FOR STUDENTS WHO MET ENROLLMENT DEADLINE TO PAY REGISTRATION FEES WITHOUT \$50 LATE PAYMENT FEE			
Continuing Undergraduates	Sept. 20	Dec. 20	March 27
New Undergraduates	Sept. 29	Jan. 12	April 6
LAST DAY FOR STUDENTS ON FINANCIAL AID, SCHOLARSHIPS, AND FULL FEE WAIVERS TO NOTIFY THE CAMPUS IF NOT ATTENDING	Sept. 20	Jan. 7	April 1
LATE REGISTRATION PERIOD	Sept. 21-Oct. 6	Jan. 8-Jan. 19	Apr. 2-Apr. 13
INSTRUCTION BEGINS	Sept. 21	Jan. 8	April 2
ADD/CHANGE/DROP PERIOD	Sept. 21-Oct. 6	Jan. 8-19	April 2-13
DEADLINE TO REQUEST WAIVER OF MANDATORY HEALTH INSURANCE FEE			
Undergraduates	Sept. 11	Dec. 11	March 11
DEADLINE DAY TO PAY REGISTRATION FEES TO AVOID CANCELLATION OF CLASSES	Oct. 6	Jan. 22	April 16
FINAL DAY TO ADD COURSES	Oct. 6	Jan. 19	April 13
LAST DAY TO APPLY FOR PART-TIME STATUS	Oct. 6	Jan. 19	April 13
CHANGE/DROP PERIOD CONTINUES	Oct. 7-Nov. 27	Jan. 20-Mar. 9	Apr. 14-June 1
Last day to drop without "W."	Oct. 20	Feb. 2	April 27
Last day to change grading option, change variable units.	Oct. 20	Feb. 2	April 27
Last day to drop with "W" or final grade must be assigned.	Nov. 27	March 9	June 1
INSTRUCTION ENDS	Dec. 1	March 16	June 8
FINAL EXAMINATIONS	Dec. 4-9	March 19-24	June 11-15
FINAL DAY TO FILE "REQUEST TO RECEIVE GRADE INCOMPLETE"	Dec. 11	March 26	June 18
QUARTER ENDS	Dec. 9	March 24	June 15
COMMENCEMENT			June 16/17

* If open—contact Undergraduate Admissions for details, (858) 534-4831. Students applying for winter or spring quarter admission and also applying for financial aid are urged to apply early, as mid-year funds for winter and spring applicants may be limited to only bank loans, Federal Pell Grant, and/or Renewal Cal Grant.

Graduate Admission Information and Enrollment Deadlines

ADMISSION

Graduate admissions information is available at <http://graduateapp.ucsd.edu> and in the Graduate Studies section of this catalog. Application deadlines are specific to each graduate program and are available at <http://ogsr.ucsd.edu/admissions/programs>.

GRADUATE ENROLLMENT DEADLINES

	FALL QUARTER 2006	WINTER QUARTER 2007	SPRING QUARTER 2007
OPEN ENROLLMENT: CONTINUING STUDENTS	May 3–Sept. 18	Nov. 1–Dec. 15	Feb. 14–Mar. 23
NEW STUDENT ENROLLMENT	June 12–Sept. 18	Dec. 4–8	Mar. 12–16
APPLICATION FOR INTERCAMPUS EXCHANGE PROGRAM	Aug. 18	Dec. 6	Feb. 28
FILING APPROVED LEAVE OF ABSENCE	Oct. 6	Jan. 19	April 13
DEADLINE DAY TO ENROLL WITHOUT LATE FEES	Sept. 15	Dec. 15	March 16
QUARTER BEGINS	Sept. 18	Jan. 5	March 29
INSTRUCTION BEGINS	Sept. 21	Jan. 8	April 2
New Graduate Deadline to enroll and pay registration fees without payment of late fees	Sept. 2	Jan. 12	April 6
LATE REGISTRATION			
Last day for continuing students who met enrollment deadline to pay registration fees without \$50 late payment fee.	Sept. 15	Dec. 15	March 16
Enrollment and payment of fees after this date requires payment of \$50 for late enrollment and \$50 for late payment of fees, totaling \$100.			
FINAL DAY TO ADD OR DROP VIA THE WEB	Oct. 6	Jan. 19	April 13
DEADLINE TO CHANGE GRADING OPTION	Oct. 20	Feb. 2	April 27
DEADLINE FOR DROPPING CLASSES WITHOUT "W" APPEARING ON THE TRANSCRIPT	Oct. 20	Feb. 2	April 27
MASTER'S DEGREE			
Filing for advancement to candidacy with completion in same quarter	Oct. 6	Jan. 19	April 13
Filing approved thesis	Dec. 8	March 23	June 15
DOCTOR OF PHILOSOPHY DEGREE			
Filing draft dissertation with doctoral committee for current quarter completion	Nov. 3	Feb. 9	May 4
Filing approved dissertation and related materials	Dec. 8	March 23	June 15
DROPPING CLASSES WITHOUT PENALTY OF "F" GRADE	Nov. 27	March 9	June 1
INSTRUCTION ENDS	Dec. 1	March 16	June 8
FINAL EXAMINATIONS	Dec. 4–9	March 19–24	June 11–15
REMOVING INCOMPLETE GRADES (I) ASSIGNED IN PRIOR QUARTER	Dec. 1	March 16	June 8
QUARTER ENDS	Dec. 9	March 24	June 15
COMMENCEMENT			June 16/17
COMPLETION OF REQUIREMENTS			
Final date for completion of all requirements for degrees to be awarded at end of quarter	Dec. 9	March 24	June 15

Dates are subject to change; see quarterly schedule of classes for changes.

Introduction

History

UCSD is one of the ten campuses which make up the University of California system. The other campuses are located in Berkeley, Davis, San Francisco, Santa Cruz, Santa Barbara, Riverside, Los Angeles, Irvine, and Merced. Each has its own distinct academic and social character, and each offers programs and facilities which set it off from the others.

As a member of the ten-campus family of the University of California, UCSD is a university in scale and scope. Graduate and undergraduate programs, offered in a wide range of disciplines, lead to the bachelor's, master's, M.D., Ph.D., and Pharm.D. degrees. UCSD's Scripps Institution of Oceanography is internationally renowned, and UCSD's School of Medicine has won national acclaim for excellence. UCSD's Graduate School of International Relations and Pacific Studies is the only school of international affairs in the UC system. The UCSD Skaggs School of Pharmacy and Pharmaceutical Sciences enrolled its charter class in 2002, and the Rady School of Management enrolled Executive MBA students in 2004 and full-time students in 2005. At both the undergraduate and graduate levels, UCSD's curricula and programs have been highly ranked in recent surveys of American higher education.

UCSD enrolled its first undergraduates in 1964. Nevertheless, the campus can trace its origins in this area as far back as the late 1800s. At that time, zoologists on the Berkeley campus, seeking a suitable location for a marine field station, found La Jolla a very desirable site. The facility they established became a part of the University of California in 1912 and was eventually named the Scripps Institution of Oceanography. In the late 1950s, when the Regents of the University of California decided to situate a general campus in the San Diego region, the Scripps Institution formed the nucleus of the new campus.

Today UCSD is recognized throughout the academic world for its faculty and for its graduate and undergraduate programs. The faculty now includes eight Nobel laureates (four of whom hold joint appointments with the nearby Salk Institute); six recipients of the National Medal of Science; one winner of the Pulitzer Prize; sixty-three members of the National

Academy of Sciences; eighty-two Fellows of the American Academy of Arts and Sciences; fourteen Fellows of the American Philosophical Society; eight fellows of the Econometric Society; fourteen members of the National Academy of Engineering; five members of the International Academy of Astronautics; twenty-five members of the Institute of Medicine; and three members of the National Academy of Education.

UCSD houses a chapter of Phi Beta Kappa, the best-known honor society for the liberal arts and sciences in America. The campus is one of 265 four-year institutions selected for this distinction since the society was founded in 1776, and more than 200 current faculty and staff are members.

UCSD is a member of the Western Association of Schools and Colleges (WASC) and is fully accredited by the Senior College Commission of WASC. WASC is located at 985 Atlantic Avenue, Suite 100, Alameda, CA 94501, and may be reached at (510) 748-9001 or by fax at (510) 748-9797.

University and Community

There are certain facts about UCSD to consider in making your choice. Among them are:

- UCSD, a four-year undergraduate campus, is also a full-fledged graduate and research institution. UCSD faculty and scholars are continually involved in research and developmental projects that put this campus on the cutting edge of science, technology, and the arts and humanities.
- San Diego has become one of America's major centers for high-technology electronics and biomedical industries. Students concentrating on sciences or engineering are actively sought by these industries to fill summer jobs and career positions. Off-campus internships also are available to UCSD students in all fields of study.
- UCSD is recognized nationally as a major center for the arts and humanities, including music and theater.
- Undergraduates are offered opportunities to participate in certain research projects conducted by UCSD faculty. A number of UCSD undergraduates have developed

computer skills that have led to their employment by leading computer manufacturers, and still others have gone on to form their own software enterprises as a direct result of their UCSD training.

- UCSD's unique small-college structure encourages undergraduates to play a more active role in student government, social life, and athletics than is generally open to them in other major universities. Opportunities for involvement in student governance are especially strong as there are student governing bodies at the campus level as well as within the six individual colleges.
- Campus athletic facilities include the Recreational and Intramural Athletic Center (RIMAC), two gymnasiums, two swimming pools, and numerous tennis and handball courts. The university's recreational and intramural athletic programs are among the most varied and extensive in the nation today.

Major Fields of Study

UCSD offers a wide variety of nationally recognized majors in a broad array of fields, summarized on page 13. (For a listing of graduate programs, refer to the section of this catalog titled "Graduate Studies.")

The academic departments of UCSD are listed on page 12. Details and requirements of the various individual courses are found in the "Courses, Curricula, and Programs of Instruction" section.

UCSD has limited the number of its academic departments. For example, there is only one Department of Literature. This system has proved especially valuable to undergraduates who choose to avoid overspecialization early in their studies.

A number of special, individually oriented programs use the combined resources of two or more departments. Among these are Chinese Studies, Classical Studies, Computing and the Arts, Critical Gender Studies, Earth Sciences, Environmental Systems, Human Development, German Studies, International Studies, Italian Studies, Japanese Studies, Judaic Studies, Latin American Studies, Study of Religion, Russian and Soviet Studies, the Education Studies

Program, Third World Studies, and Urban Studies and Planning.

Engineering students may choose from a number of majors in the Department of Bioengineering (BE), the Department of Computer Science and Engineering (CSE), the Department of Electrical and Computer Engineering (ECE), the Department of Mechanical and Aerospace Engineering (MAE) or the Department of Structural Engineering (SE). All five departments seek to educate the engineer of tomorrow.

Undergraduates interested in premedicine and prelaw majors should note that a variety of departments can serve their needs. For premed students, the common choices are biology, chemistry, psychology, and bioengineering. Some students are electing double majors or are combining nontraditional majors with science majors. For prelaw students, nearly any undergraduate major will qualify a student for admission to a law school.

Should you need help in deciding on a major, many UCSD professionals are available to aid you. Among them are the deans of academic advising in the provosts' offices of the six colleges, faculty members, and departmental advisers. Additional specialists in Career Services Center and in Psychological and Counseling Services are available to help you appraise your personal aptitudes.

Summer Session

UCSD offers Summer Session, consisting of courses selected from the regular undergraduate curriculum and taught by UCSD faculty. UCSD is in transition toward state-supported year-round instruction.

The Summer Session Program offers open enrollment to UCSD students, students of other colleges and universities, qualified high school juniors and seniors, and the general public.

Summer Session courses are shorter and more intensive. Students may be able to progress more rapidly toward their degree, make up course deficiencies, or explore new areas of study.

Summer Session enrollment and registration policy and procedures are available at <http://summersession.ucsd.edu>. UC students pay a per-unit fee equivalent to the fee paid for fall, winter, or spring.

Contact summer@ucsd.edu or call (858) 534-5258.

What UCSD Does NOT Offer

Although the range and variety of programs offered at UCSD are very wide, there are certain disciplines which are not available on this campus. In some instances, the absence of a particular program reflects the academic philosophy of the UCSD campus and its faculty. In others, the absence of a curriculum is temporary, awaiting the availability of funds, personnel, or facilities before a program can be offered. In still others, programs have not been included which would, in the university's judgment, unnecessarily duplicate comparable offerings on other UC campuses or at other institutions.

Among undergraduate majors currently not available at UCSD are:

1. Business.
2. Oceanography. Although UCSD does not offer an undergraduate major in oceanography, some marine science courses are offered in the Division of Biology. Students planning to pursue oceanography at the graduate level may select from a large number of undergraduate courses in the physical, biological, and earth sciences to build a firm foundation for later graduate work. Graduate-level work in oceanography is offered by the Scripps Institution of Oceanography.
3. Nursing.
4. Industrial Arts.
5. Journalism. Although no major in journalism is offered, the Department of Literature offers a major in writing that can emphasize journalistic writing, and the development of writing skills is stressed in many disciplines. Many courses offered in the humanities and social sciences will provide the kind of broad-based preparation needed by practicing journalists. Several student newspapers are published on campus, providing ample "laboratory" opportunities for students to practice journalism.
6. Geography.
7. Physical Education. Note: UCSD does not offer athletic scholarships, and there is no intercollegiate football team at UCSD.

The Colleges of UCSD

UCSD undergraduates enjoy the benefits of a great university without the disadvantages of bigness found in many of today's mega-universities. The master plan conceived by UCSD's planners borrowed from the Oxford and Cambridge concept to provide a family of colleges, each with its own special academic and social flavor. UCSD's students gain a sense of belonging through affiliation with one of the campus's semiautonomous colleges.

There are six colleges: Revelle, John Muir, Thurgood Marshall, Earl Warren, Eleanor Roosevelt, and Sixth College. Each is independent, yet all are interrelated: all university academic and support facilities are available to all students, regardless of their college affiliation.

Each college has its own educational philosophies and traditions, its own set of general-education requirements, and its own administrative and advising staff. The objective is to give students and faculty the advantages of a small, liberal arts college combined with the best features of a major university.

Students applying to UCSD should select a college in order of their preference.

Details regarding the individual colleges are given in the "Choosing a College at UCSD" section of the catalog.

Recreation at UCSD

UCSD's undergraduate colleges are situated on a parklike site at La Jolla. La Jolla has some of the finest beaches and coves, art galleries, and other attractions in the nation.

Much of UCSD's recreational and social life centers on the waterfront, with surfing, SCUBA diving, and beach activities among the favorite diversions of UCSD students. Throughout the area, students find a variety of amusements, ranging from the small-town atmosphere of waterfront Del Mar to the primitive wilderness of Mexico's Baja California peninsula.

The city of San Diego, some twelve miles south of the campus, offers a wide range of recreational opportunities, including Old Town (California's birthplace), Sea World on Mission Bay, and the world-famous San Diego Zoo and Wild Animal Park. A year-round calendar of major league sporting events is offered in the city's Sports Arena, PETCO Park, and in San Diego Qualcomm Stadium.

There are numerous theaters in San Diego. A year-round program of contemporary and classical professional theater may be enjoyed in the Old Globe and the adjacent Cassius Carter Centre Stage, and special summer theater fare is featured on the park's outdoor Festival Stage.

On-campus entertainment includes a year-round series of movies and cultural programs, dances, chamber music, and rock-band concerts sponsored by the University Events Office. The Department of Theatre and Dance presents plays in both the 500-seat Mandell Weiss Theatre and the 500-seat Forum Theatre. The Department of Visual Arts offers a continuing series of art shows in the Mandeville Art Gallery and displays of student art in other campus galleries.

Informal meeting places on campus are hubs of student activity throughout the day and evening, among them the Muir Rathskeller, Marshall College Mountain View Lounge, and the Price Center.

Mountains, Deserts, and Beaches

Many Southern Californians enjoy the out-of-doors. The San Diego metropolitan area enjoys the most comfortable year-round climate in the United States.

Fishing opportunities are plentiful offshore in kelp beds west of La Jolla and surrounding the Coronado Islands in Mexican waters. Fresh water fishing is available in nearby lakes. An hour's drive to the east, the Laguna Mountains provide pleasure during all seasons for campers and hikers. Beyond the Lagunas lies the vast Anza-Borrego Desert with its breathtaking display of wildflowers every spring.

The peninsula of Baja California, one of the world's last great wilderness areas, stretches for 900 miles southward from the international gateway at Tijuana. It is the site every year of the grueling Baja cross-country auto race.

Sports at UCSD

Through its intercollegiate athletic and intramural programs, UCSD provides its students with one of the more extensive and competitive sports programs in the United States. UCSD fields a wide variety intercollegiate athletic teams along with several club sports teams, while the intramural program provides for student competition in a wide variety of sports in three categories of play: men, women, and coed.

Need More Information? Check the Following:

How do I apply for admission? See pages 35 and 44. (See also "Note," below.)

How much does a UCSD education cost? See "Fees and Expenses," page 48.

What's the grading system at UCSD? See page 62.

How should I decide which college to choose at UCSD? See page 13.

What services and facilities are available to students at UCSD? See page 91.

Note: An admissions packet for students interested in applying to UCSD can be obtained from any California high school or community college counselor's office, by writing to the Office of Admissions on any University of California campus, or online at www.ucop.edu/pathways/appctr.html.

Footnote 1: The teaching credential in California requires an academic major, plus professional preparation courses in education, an approved program of practice teaching or an internship, and a full year of college work beyond the baccalaureate. The UCSD Education Studies Program leads to a single subject (secondary) or multiple-subjects (elementary) credential.

Footnote 2: Law schools do not require any particular major, but they do require evidence of good scholarship in demanding subjects. Almost any undergraduate major can qualify a student for consideration by a law school. The UCSD career services staff includes professional prelaw advisers.

Footnote 3: Like law schools, medical schools do not generally demand a particular major but ask for a solid background in the sciences upon which medicine is built. Most premed students major in biology, chemistry, physics, or bioengineering, but a substantial number major in the humanities and social sciences. The UCSD career services staff includes professional premedical advisers.

Choosing a College at UCSD

One of the features that sets UCSD apart from most major universities in the United States is its family of undergraduate colleges: Revelle, John Muir, Thurgood Marshall, Earl Warren, Eleanor Roosevelt, and Sixth.

The division of the campus community into small colleges was patterned after the concept which has served Oxford and Cambridge so successfully for centuries. The planners of the UCSD campus were convinced that students learn more, and find greater fulfillment in their personal lives, when joined academically and socially with a relatively small group of students. At the same time, the advantages of size in a university, including a faculty of international renown, first-rate teaching and research facilities, laboratories, libraries, and other amenities, were to be an important part of the design.

The result was an arrangement which combined the academic advantages of a large research university with the finest features of a small liberal arts college—the UCSD college system. Each of these semi-autonomous undergraduate colleges has its own residence facilities, staff, traditions, general-education requirements, and distinctive educational philosophy. The system was inaugurated with the opening of Revelle College in 1964. In the intervening years, five more colleges—John Muir, Thurgood Marshall, Earl Warren, Eleanor Roosevelt, and Sixth—have been established. Although many American university campuses have a separate college structure, in most cases, these colleges are designed to serve specific disciplines, such as engineering or business administration. At UCSD, however, any undergraduate may select from the full range of majors available. The choice of a college is not based on your major, but on your preferences in terms of the various educational philosophies and environments offered by the colleges.

UCSD's college system allows undergraduates to choose from among six distinct general-education curricula supplementing their major requirements. These curricula range from a very structured liberal arts program to a program with a broad range of electives. By contrast, most universities offer only one general-education curriculum.

Students must rank the colleges in order of preference when applying for admission. Brief

summaries of the various college curricula and philosophies follow. Later in this section, these variations are spelled out in considerable detail, college by college.

Revelle College **Educational Philosophy**

Revelle College stresses the broad character of general education. A structured liberal arts curriculum establishes a strong educational foundation for any major. All students complete a highly respected core humanities sequence and courses in the arts and social sciences. Students either meet proficiency in a foreign language or complete the fourth quarter of college-level instruction. All students also complete sequences in calculus and science, with separate courses available for science and non-science majors. Throughout the final two years, students concentrate on developing professional competence in an academic discipline.

Revelle College is distinguished by its emphasis on specific general-education requirements and high academic standards. A high percentage of Revelle College students enroll in graduate or professional schools (law, medicine, management, etc.), graduate with double majors, design individualized interdisciplinary majors, work on a research project, and graduate with university honors.

John Muir College **Educational Philosophy**

John Muir College has established a set of general-education and graduation requirements that ensures breadth and depth of learning and encourages the students of the college to take an active role in their own intellectual development. Students complete four year-long sequences drawn from the social sciences; the natural sciences or mathematics; and two sequences out of the following three areas: the humanities, fine arts, or foreign languages. Many choices are available for each of these year-long sequences. Students complete two analytical writing courses in addition to the four year-long sequences. Muir has a one-course U.S. cultural diversity graduation requirement in addition to a minimum number of 18 upper-division four-unit courses (72

upper-division units) among the 180 units required to graduate.

Muir's general-education and graduation requirements accommodate a wide range of interests and aptitudes. Muir's academic advisers meet with students on a one-to-one basis to help students make informed decisions. The general structure and options of the general-education requirements make Muir College particularly attractive to exceptionally able and well-prepared students with well-defined or developing academic interests.

John Muir is distinguished by its atmosphere of friendliness, informality, and deep concern for the rights and welfare of others. Concern for one's fellow students goes well with Muir's educational philosophy, which stresses individual choice and development. The environment thus created fosters responsibility for informed academic decisions, consequences of academic choices, and, ultimately, well-rounded students.

Thurgood Marshall College **Educational Philosophy**

The dedicated focus of Thurgood Marshall College is the active development of the student as scholar and citizen. The college, a small liberal arts and sciences community, is characterized by an open, friendly environment in which students pursue any major in the natural and physical sciences, social sciences, engineering, humanities, and fine arts offered at the university.

The college's educational philosophy is guided by the belief that, regardless of a student's major, a broad liberal arts education must include an awareness and understanding of the diversity of cultures that comprise contemporary American society, and the richness that socio-cultural diversity brings to the lives of American people.

Integral to the Marshall experience is the unique, three-quarter core sequence, "Dimensions of Culture—Diversity, Justice, and Imagination." This interdisciplinary, issues-oriented curricular experience explores both the diversity of American experiences across race, religion, class, and gender, and also the shared resources all Americans draw on when their different identities and interests conflict. Students also choose courses in mathematics or logic, natural/physical

sciences, writing, humanities, and fine arts to fulfill general-education requirements.

In addition to the strong academic program, Thurgood Marshall College is proud of its emphasis on the student as citizen. Students are encouraged to integrate educational alternatives and public service opportunities, such as Partners at Learning (PAL), for which they earn academic credit, into their curriculum. Through PAL and other options, such as study abroad, internships, public service and leadership activities, students develop skills learned in the classroom and apply them to real-world experiences. Toward that end, the Student Leadership Program is especially designed to encourage active participation in the governance of the college and in community service.

Thurgood Marshall College's hallmark is community, where students are encouraged to be active participants in their university education and take advantage of the abundance of opportunities to learn and develop as exemplary scholars and citizens in a multicultural twenty-first century.

Earl Warren College Educational Philosophy

Earl Warren College was founded in 1974 and named in honor of the former governor of California and Chief Justice of the United States Supreme Court. Consistent with Earl Warren's principles, the college is committed to preparing students for life intellectually, socially, and professionally as responsible citizen-scholars. Warren's guiding philosophy, "Toward a Life in Balance," helps students define their individual educational and career paths. The college strives to provide all students with an experience that underscores the harmony necessary between academic and cocurricular endeavours.

Earl Warren's focus on the individual's relationship with society is reflected in the required course Ethics and Society. This class examines ethical principles and their social and political applications to contemporary issues. All students enroll in the two-quarter Warren College Writing Program, which stresses written argumentation based on primary and secondary sources. The college sponsors two interdisciplinary minors, open to all UCSD undergraduates. The law and society minor emphasizes the interrelationship of legal, social, and ethical issues in their historical context. The health care-social issues minor analyzes complex social and ethical implications of healthcare policies and delivery systems.

Additionally Warren College is home to the Academic Internship Program, which offers qualified UCSD juniors and seniors the chance to acquire valuable work experience related to academic and career interests.

Warren College's general-education requirements and academic philosophy guarantee that students will acquire both the breadth and depth necessary to successfully compete in graduate school, professional school, or the workplace. The college's requirements include a major and two additional programs of study that encompass academic areas outside of a student's major. Additional courses in formal skills and cultural diversity provide an essential educational complement. Warren students are encouraged to pursue academic internships as well as study abroad; both opportunities create well-rounded students with heightened cultural and intellectual curiosity. Earl Warren College offers students flexibility in fulfilling their general-education requirements, and provides a vibrant and welcoming home for the pursuit of rigorous academic study and personal growth.

Eleanor Roosevelt College Educational Philosophy

Eleanor Roosevelt College (ERC) emphasizes a comprehensive general education designed to prepare students to compete successfully in the global and multicultural economy of the twenty-first century. Successful professional people will need to understand their own cultural heritage as well as those of people from other societies with whom they will be interacting in their workplaces and communities.

The perspectives gained at ERC prepare students well for the future, whatever their goals and their major field of study, and whether they plan to go on to graduate school, professional school, or the worlds of science and technology, business, or the arts.

At the core of the curriculum are six courses comprising The Making of the Modern World (MMW). This interdisciplinary sequence was developed by faculty from anthropology, history, literature, political science, and sociology. It teaches students to think historically and analytically, as well as across disciplines, about both Western and non-Western societies, and the ways humans have organized their experience in different places and times.

ERC students receive exposure to natural science, quantitative methods, foreign language,

and fine arts, and each selects a geographic region for in-depth study. Interested students are encouraged and assisted in finding ways to study, work, or travel in other countries to expand their horizons.

A friendly and supportive campus community, ERC is also distinguished by its emphasis on helping each individual reach his or her full potential intellectually, and in those skills, contributing to effective participation and leadership.

As Eleanor Roosevelt wrote, "Whether or not they have made the world they live in, the young must learn to be at home in it, to be familiar with it. They must understand its history, its peoples, their customs and ideas and problems and aspirations." ERC students and graduates find themselves as much "at home" in the world as any of their generation, and more than most!

Sixth College Educational Philosophy

Sixth College opened in 2002. As the newest college at UCSD, Sixth is characterized by a spirit of creativity and collaboration. The college theme, *Culture, Art, and Technology*, embraces the rich opportunities available in new interdisciplinary approaches to learning and practice. In doing so, it bridges the divisions traditionally separating social and natural science, humanities, technology, and the arts. By piloting educational initiatives and building partnerships with such groups as the Center for Telecommunication and Information Technology (Calit2), the Center for Research in Computing and the Arts, the Jacobs School of Engineering, and the University Events Office, we are developing opportunities for our students to participate in meaningful creative learning experiences across the entire campus, as well as the larger community. A supportive yet challenging integrated learning environment, both in and out of the classroom, helps our students develop the cultural competence and understanding necessary to become fully engaged, effective global citizens in the twenty-first century.

Sixth College's theme is woven into an educational philosophy and curriculum intended to prepare students for a future that demands ethical integrity, creativity, self-understanding, critical reasoning, appreciation of the powers and implications of science and technology, and flexibility. Students will learn interactive skills and approaches needed for success in an increasingly global society: teamwork, cross-cultural understanding,

GRADUATION REQUIREMENTS IN THE UCSD COLLEGES

Unless otherwise indicated, the figures in this chart refer to the number of COURSES rather than the number of units. Most UCSD courses carry four quarter-units of credit, and a student usually takes four courses each quarter. Academic disciplines are classified as humanities/fine arts, social sciences, and mathematics/natural sciences/engineering. The term "non-contiguous" refers to a discipline that is different from that of the major. Students must meet the Entry Level Writing requirement prior to enrolling in the writing courses of their respective college. Each college's cultural diversity requirement can be fulfilled as noted by an asterisk (*) below.

GENERAL EDUCATION

REVELLE COLLEGE	JOHN MUIR COLLEGE	THURGOOD MARSHALL COLLEGE	EARL WARREN COLLEGE	ELEANOR ROOSEVELT COLLEGE	SIXTH COLLEGE
<p>HUMANITIES5 Includes intensive instruction in university-level writing.</p> <p>FOREIGN LANGUAGE ...0-4 Proficiency exam or number of courses.</p> <p>FINE ARTS1 Art, music, theatre</p> <p>PHYSICS AND CHEMISTRY4 At least one course from each area (Sequences available for science and non-science majors.)</p> <p>BIOLOGY1</p> <p>CALCULUS3 (Sequences are available for science and non-science majors.)</p> <p>SOCIAL SCIENCES3 Three lower-division courses in the social sciences chosen from an approved list, to include two courses in the same social science, and at least one course in American cultures.</p> <p>AREA OF FOCUS3 Focused on one subject noncontiguous to the major.</p>	<p>ANALYTICAL WRITING2-3 A three-course sequence in one of the disciplines from the:3</p> <p>SOCIAL SCIENCES</p> <p>A three-course sequence in either3</p> <p>MATHEMATICS (CALCULUS) OR One of the disciplines from the</p> <p>NATURAL SCIENCES</p> <p>A three-course sequence in each of TWO of the disciplines from TWO different categories.....6</p> <p>FINE ARTS HUMANITIES FOREIGN LANGUAGE</p>	<p>DIMENSIONS OF CULTURE.....3 Includes two six-unit courses with intensive instruction in university-level writing</p> <p>HUMANITIES2 Includes cultural diversity</p> <p>FINE ARTS1</p> <p>NATURAL SCIENCES3 One course each in biology, chemistry, and physics. (Courses are available for science and non-science majors.)</p> <p>MATHEMATICS AND LOGIC2 (Courses are available for science and non-science majors.)</p> <p>DISCIPLINARY BREADTH.....4 Noncontiguous to the major. Two must be upper-division; one must include writing.</p> <p>PUBLIC SERVICE (optional) The four-unit public service option may be used to fulfill one course in disciplinary breadth.</p>	<p>WRITING2</p> <p>ETHICS AND SOCIETY1</p> <p>FORMAL SKILLS2 Two courses to be selected from a list including calculus, symbolic logic, computer programming, and statistics.</p> <p>PROGRAMS OF CONCENTRATION*12 (for B.A./B.S. degrees in arts/sciences) Two programs of concentration, each typically consisting of three lower-division and three upper-division courses. Both programs must be non-contiguous to the major and to each other.</p> <p>OR</p> <p>AREA STUDIES6 (for B.S. degrees in engineering) Two area studies each consisting of three courses. One area of study in humanities/fine arts and one in social sciences.</p>	<p>THE MAKING OF THE MODERN WORLD6 Includes two six-unit courses with intensive instruction in university-level writing.</p> <p>FOREIGN LANGUAGE ...0-4 Proficiency exam or number of courses.</p> <p>FINE ARTS2 To include study of both Western and non-Western arts.</p> <p>NATURAL SCIENCES2 (Courses are available for science and non-science majors.)</p> <p>QUANTITATIVE/FORMAL SKILLS2 (Courses are available for science and non-science majors.)</p> <p>REGIONAL SPECIALIZATION3 To include at least two courses taken at the upper-division level.</p>	<p>CULTURE, ART, AND TECHNOLOGY3 Three-quarter sequence includes two (six-unit) courses of intensive instruction in university-level writing.</p> <p>INFORMATION TECHNOLOGY FLUENCY1 This requirement may be satisfied with courses from a variety of departments.</p> <p>MODES OF INQUIRY7 Two courses in social sciences, two courses in humanities, two courses in natural sciences, one course in math/logic (different options available for science and non-science majors)</p> <p>UNDERSTANDING DATA1 One course in statistical methods (different options available for science and non-science majors)</p> <p>SOCIETAL AND ETHICAL CONTEXTS2 One course in ethnic or gender studies; one course in ethics.</p> <p>ART MAKING2 Two courses in music, theatre (including dance), or visual arts.</p> <p>PRACTICUM0.5 TO 1.5 Capstone project with a four-unit course in upper-division writing.</p>

strong writing and multimedia communication skills, and information technology fluency.

All students must complete the three-quarter core sequence in Culture, Art, and Technology (CAT). The sequence, with its imbedded writing program, develops our students' abilities to achieve a reflexive understanding of themselves and their society by approaching issues and

problems from interdisciplinary perspectives. It examines the foundations, historical interactions, and future possibilities of culture, art, and technology in relation to the problems and potentials afforded by human nature and the larger environment on which we depend. The Sixth College breadth requirements build on the core approach by including courses in art making and informa-

tion technology fluency, as well as social science, humanities, natural science, mathematics and logic, and statistical methods. The curriculum culminates in a capstone experience that offers our students the opportunity to engage with the real world in a meaningful way through a self-directed, community- or team-based practicum project followed by an upper-division writing

MINOR/ADDITIONAL GRADUATION REQUIREMENTS					
REVELLE COLLEGE	JOHN MUIR COLLEGE	THURGOOD MARSHALL COLLEGE	EARL WARREN COLLEGE	ELEANOR ROOSEVELT COLLEGE	SIXTH COLLEGE
Optional Minor	Optional Minor—*One U.S. cultural diversity course to be chosen from an approved list as part of the major, optional minor, elective, or an appropriate general-education course.	Optional Minor	Optional Minor—Students may choose a noncontiguous minor in lieu of a program of concentration. *One cultural diversity in U.S. society course to be chosen from an approved list as part of the major, programs of concentration/area studies, or elective.	Optional Minor—Students may combine foreign language and regional specialization course work to create a minor focusing on a particular geographic area.	Optional Minor
MINIMUM NUMBER OF COURSES REQUIRED FOR GRADUATION					
B.A./B.S. degrees require a minimum of 46 courses (184 units); at least 15 courses (60 units) must be upper-division.	B.A./B.S. degrees require 45 courses (180 units). At least 18 courses (72 units) must be upper-division.	B.A./B.S. degrees require 45 courses (180 units). At least 60 units must be upper-division.	B.A./B.S. degrees require 45 courses (180 units). At least 15 courses (60 units) must be upper-division.	B.A./B.S. degrees require 45 courses (180 units). At least 15 courses (60 units) must be upper-division.	B.A./B.S. degrees require a minimum of 45 courses (180 units). At least 15 courses (60 units) must be upper-division.
MAJOR					
<p>NOTE: STUDENTS NORMALLY MAY PURSUE ANY MAJOR, EXCEPT FOR COLLEGE INDIVIDUALIZED MAJORS, REGARDLESS OF THE COLLEGE THEY CHOOSE. Majors are identical regardless of the student's chosen college. Most majors require twelve to eighteen upper-division courses based upon adequate lower-division preparation; such preparation may be part of the general-education requirements. <i>Majors in certain engineering programs may require as many as twenty-one upper-division courses.</i></p>					

course in which they will reflect on the significance of their practicum project for their entire educational experience at UCSD.

College Administration

The provost is a faculty member who acts as the college's chief administrative officer and academic dean. In addition to the provost, each college has a dean of academic advising and a dean of student life.

The academic departments and the college academic advising offices are designated campus units responsible for providing official academic advice and direction to undergraduate students. The college academic advising staff have primary responsibility for providing academic advice and services that assist new and continuing students in developing educational plans and course schedules which are compatible with their interests, academic preparation, and career goals.

The college academic advising offices conduct academic orientation/enrollment programs for all new students and advise continuing students

about college general-education and graduation requirements. The advising staff of each college provide general academic and curricular information, clarify academic rules and regulations, review all aspects of academic probation, monitor academic progress, assist students with decision-making strategies, and give information about prerequisites and screening criteria for majors. In conjunction with the academic departments and the Office of the Registrar, the advising offices certify students for graduation and facilitate their academic adjustment to the university.

Moreover, college academic advisers are available to counsel students about educational alternatives; selection of courses and majors; program changes; new academic opportunities; and special programs such as exchange programs, honors programs, outreach programs, etc.

With a central concern for student development, dean's staff members provide a variety of nonacademic services such as coordinating educational and social programs; overseeing residential programs; assisting students with decisions and procedures regarding withdrawal from

school; coordinating disciplinary procedures, both academic and social; and making referrals to other student services on campus. (See also section on "Student Services and Programs.")

Whatever the question or concern, the provost and his or her staff stand ready at all times to assist undergraduates.

Phi Beta Kappa

The UCSD chapter of Phi Beta Kappa elects student members on the basis of high scholastic achievement in academic programs emphasizing the liberal arts and sciences. Phi Beta Kappa was founded in 1776 at the College of William and Mary in Virginia and is the oldest, most prestigious, academic honor society in America. See also "Honors" in the index.

Honors

Each college awards honors to outstanding students on the basis of criteria approved by the Academic Senate. These honors are posted on students' transcripts and noted on their diplomas. For further details, see "Honors" in the index.

Transfer Students

Students transferring to UCSD must complete the requirements of the chosen undergraduate college. Students are strongly advised to complete all lower-division preparation for the major prior to enrollment at UCSD. The college academic advising staff will review the transfer course work for applicability to general-education and college graduation requirements. Students are encouraged to choose carefully the UCSD undergraduate college which best fits their general-education program or course work. Academic departments will review courses applicable to students' majors. See Undergraduate Admissions, Policies and Procedures, "University of California Transfer Agreement."

Revelle College, the first college on the UCSD campus, was named in honor of Dr. Roger Revelle, former university-wide dean of research and for many years director of UCSD's Scripps Institution of Oceanography. Dr. Revelle is perhaps best known for his prediction of the Greenhouse Effect.

The initiation of Revelle College in 1958 provided the faculty with the opportunity to design a complete undergraduate curriculum for some of the country's best-prepared students. The faculty asked the fundamental question, What should an educated person know? The Revelle College general-education requirements offer a specific but broad introduction to the academic disciplines of the university. A student graduating from Revelle College will have attained:

1. a basic knowledge of calculus; foreign language; the physical, biological, and social sciences; the fine arts; and the humanities
2. preprofessional competence in an academic discipline
3. an understanding of an academic area outside his or her major discipline.

Although the basic-knowledge requirement above is from a wide-range sampling of disciplines, the specific courses that satisfy the requirement are professional introductions to the subjects. For example, the humanities requirement is satisfied by a fine-tuned, five-quarter core course taught by some of the university's most respected senior faculty, and an intensive writing program is integrated into the course. The physical sciences courses require basic mathematics, and the language requirement is four courses (or the equivalent). There are two calculus sequences: One is designed for students who will use calculus in their major; the other is an overview, often taken by life sciences, social science, humanities, and art students.

General-Education Requirements

Students are encouraged to meet the general-education requirements and the prerequisites to the major early in their university career.

Freshmen with Advanced Placement credits can use many of these advanced courses to meet general-education requirements (see Advanced

Revelle College

Placement chart in "Undergraduate Admissions, Policies and Procedures"). Transfer students may meet all general-education requirements before entering by following articulation agreements with community colleges or taking, at any institution, courses which Revelle College judges approximately equivalent in content to those at UCSD.

The general-education requirements are:

1. Satisfaction of the general University of California requirements in Entry-Level Writing and American History and Institutions.
2. A five-course sequence in an interdisciplinary humanities program including two six-unit courses with intensive instruction in university-level writing. Written work is also required in the remaining (four-unit) three-quarter courses.
3. One course in the fine arts.
4. Three lower-division courses in the social sciences, chosen from an approved list, to include two courses from the same social science department and at least one course in American cultures. Selected courses available on <http://revelle.ucsd.edu>.
5. Three courses in calculus.
6. Five courses in the physical and biological sciences to include four quarters of physics and chemistry and one quarter of biology.
7. Basic conversational and reading proficiency in a modern foreign language, or advanced reading proficiency in a classical language. This requirement can be met by passage of a UCSD proficiency exam offered in a selected number of languages (in which case the result is posted to the transcript), or by completion of the fourth quarter (or third semester) of foreign language instruction with a passing grade, or with an equivalent Advanced Placement Exam score of 4 or an SAT II Language Exam score of 700 or higher.
8. Three courses in an area unrelated to the major and focused in one department, subject area, or topic.

1. UC ENTRY-LEVEL WRITING REQUIREMENT AND AMERICAN HISTORY AND INSTITUTIONS

Satisfaction of the university requirements in writing (UC Entry-Level Writing Requirement) and American History and Institutions. (See "UC Entry-Level Writing Requirement," "Undergraduate Registration," "Academic Regulations," "Humanities," and "Undergraduate Admissions, Policies and Procedures: American History and Institutions.")

2. HUMANITIES

The humanities requirement confronts students with significant humanistic issues in the context of a rigorous course. It is also an introduction to the academic disciplines of history, literature, and philosophy and provides training and practice in rhetorical skills, and particularly persuasive written expression.

Students may satisfy this requirement by completing the five-quarter interdisciplinary (history, literature, and philosophy) humanities sequence. Students must satisfy the UC Entry-Level Writing Requirement before registering for Humanities 1.

Intensive writing instruction in university-level writing is integrated in Humanities 1 and 2. Writing assignments are required in the remaining three courses.

For course descriptions, see "Courses, Curricula, and Programs of Instruction: Humanities."

3. FINE ARTS

One course is required. It serves as an introduction to creativity in theatre, dance, music, or visual arts. (See "Courses, Curricula, and Programs of Instruction: Theatre and Dance, Music, and Visual Arts.")

4. SOCIAL SCIENCES

Three lower-division courses offered by the Departments of Anthropology, Critical Gender Studies, Economics, Human Development, Linguistics, Political Science, Psychology, Sociology, or Urban Studies and Planning. At least one of these courses must be from a list approved as meeting the requirement in American Cultures (TAG students exempt).

5. CALCULUS

Three quarters of calculus are required. There are two beginning-year sequences which meet the Revelle College calculus requirement. Both sequences include integral and differential

calculus. Freshman placement in these sequences depends upon the student's preparation in mathematics. Students are urged to keep their mathematical skills at a high level by taking mathematics during their senior year in high school. (See "Courses, Curricula, and Programs of Instruction: Mathematics.")

6. NATURAL SCIENCES

The natural science courses present current developments in the fundamental concepts of modern physics, chemistry, and biology.

Students choose their five required physical and biological science courses from the following sequences depending upon their interests, prior preparation, and intended majors. The Department of Chemistry offers Chemistry 11, 12, 13 (for non-science majors), Chemistry 6A-B-C, and 6AH-BH-CH (honors). The Department of Physics offers four acceptable sequences: Physics 1A-B-C, 2A-B-C-D, and 4A-B-C-D-E, and 11A (for non-science majors). The Department of Biology offers Biology 1 or 3 or 10 (for non-science majors) to meet the Revelle biology requirement. (See "Chemistry," "Physics," and "Biology" in the "Courses, Curricula, and Programs of Instruction" section of this catalog.)

Students planning to major in a science must consult the appropriate departmental listing under "Courses, Curricula, and Programs of Instruction" to find the additional preparation needed for their major.

7. FOREIGN LANGUAGE

Revelle College students are required to demonstrate basic conversational and reading proficiency in any modern foreign language, or advanced reading proficiency in a classical language or complete the fourth quarter of foreign language instruction with a passing grade.

Modern foreign language programs are currently offered in Chinese, French, German, Hebrew, Italian, Japanese, Korean, Russian, Spanish, and classical language programs are offered in Greek, Latin, and Hebrew. Students who have preparation in other languages should contact Revelle College Academic Advising for information on a proficiency examination. This exam may also be taken by native speakers of any foreign language without further course study.

8. AREA OF FOCUS

Three courses in an area noncontiguous to the major are required. The three courses must be interrelated and should focus on some discipline, subject area, or topic. For the purposes of this requirement, the humanities/arts, the social sciences, and the natural sciences/engineering/mathematics are considered three different areas. Courses from a single department will be considered focused. Courses from more than one department should be approved prior to enrolling. The area of focus is not posted to the diploma or transcript.

These three courses may not be used on any other requirements. These courses may be upper-division or lower-division but one should keep in mind that graduation requirements stipulate that at least sixty units of all work must be from upper-division courses. The courses may be taken pass/not pass and Advanced Placement or International Baccalaureate credits may be used.

Students may complete an optional noncontiguous minor to replace this requirement, if they wish to do so.

Sample Program

FALL	WINTER	SPRING
FRESHMAN YEAR		
Foreign Language	Humanities 1	Humanities 2
Calculus	Foreign Language	Foreign Language
Natural Science	Calculus	Calculus
UC Entry-Level Writing Requirement or Fine Arts	Natural Science	Natural Science
SOPHOMORE YEAR		
Natural Science	Natural Science	Fine Arts or elective
Social Science	Social Science	American Cultures
Humanities 3	Humanities 4	Humanities 5
Major Preparation	Major Preparation	Major Preparation

* Science majors may want to take part of the social science requirement in the junior year to allow time for additional science laboratories and/or calculus.

Transfer Students

Transfer students may enter Revelle College by following community college articulation agreements which can be viewed at www.ASSIST.org or by signing up for specific Transfer Admissions Guarantee (TAG) plans or by following the Intersegmental General Education Transfer Curriculum (IGETC). However, Revelle College does not accept IGETC as satisfaction of all its lower-

division requirements. Revelle accepts IGETC courses to meet requirements with additional classes in science, calculus, and foreign language. (Students are exempt from the language requirement if they can pass proficiency in a foreign language. Note: Proficiency exams are not available in all languages. Consult Revelle College Academic Advising for more information.) Science and mathematics majors will need these additional classes in preparation (or to meet prerequisites) for their major. The additional math/science classes or language classes can be taken at the community college or after transfer to UCSD. See details on our Web site at <http://revelle.ucsd.edu/prospective/igetct.html>.

The Major

All undergraduate majors offered at UCSD are available to Revelle College students. An exceptional student who has some unusual but definite academic interest for which a suitable major is not offered on the San Diego campus may, with the consent of the provost of the college and with the assistance of a faculty adviser, plan his or her own major. The Revelle Individual Major must be submitted no later than three quarters before the student's intended graduation and be approved by the Executive Committee of the college before it may be accepted in lieu of a departmental or interdepartmental major. The faculty adviser will supervise the student's work, and the provost must certify that the student has completed the requirements of the individual major before the degree is granted.

Students who fail to attain a grade-point average of at least 2.0 in work taken in the prerequisites for the major, or in the courses in the major, may, at the option of the department, be denied the privilege of entering or of continuing in that major. Students majoring in bioengineering, bioinformatics, ICAM, CSE, ECE, or math/computer science need to be aware of additional screening for acceptance into the major.

Optional Minor

A minor is no longer required in Revelle College. However, if a student wishes to complete a Department Minor or a Project Minor and have it posted to the transcript, he or she may do so. If a student completes either of these types of minors in a field noncontiguous to that of the major, it will replace the three-course noncontiguous area of focus general education requirement.

There are two types of minors available at Revelle College:

1. Department Minor—All courses for the minor are taken in one department and they are chosen with the advice and approval of a minor adviser in that department.
2. Project Minor—A project minor focuses on a topic or period chosen by the student. The project is often interdepartmental and interdisciplinary. The program must have the approval of a minor adviser. (See Academic Regulations: Undergraduate Minors and Programs of Concentrations.)

The current university guidelines for the minor require seven courses (twenty-eight units), five of which must be upper-division. Students who entered prior to January 1, 1998, may complete their six course (twenty-four unit), three upper-division course minors.

Enhancing Your Education

Students may participate in the UC Education Abroad Program (EAP) and UCSD's Opportunities Abroad Program (OAP) while still making regular progress toward graduation. Information on EAP/OAP is detailed in the Education Abroad Program section of the UCSD General Catalog. Interested students should contact the Programs Abroad Office in the International Center and visit the Web site at <http://www.icenter/pao>. Financial aid recipients may apply aid to the program and special study abroad scholarships are readily available.

Programs are now available for sophomores, juniors, and seniors. With careful planning students should be able to fulfill some general-education, major, and/or minor requirements while studying abroad.

Pass/Not Pass Grading Option

1. No more than one-fourth of an undergraduate student's total course units taken at UCSD and counted in satisfaction of degree requirements may be graded on a Pass/Not Pass basis.
2. Courses used to satisfy the noncontiguous area of focus may be taken on a Pass/Not Pass basis. Use of Pass/Not Pass grades on the optional minor is decided by the department.
3. Courses taken as electives may be taken on a Pass/Not Pass basis.

4. The following general education courses may be taken Pass/Not Pass: American cultures, fine arts, language and area of focus. Non-science majors may take courses for the natural science requirement Pass/Not Pass.
5. Upper-division courses to be counted toward a departmental major may not be taken on a Pass/Not Pass basis. Individual departments may authorize exceptions to this regulation.

The Graduation Requirements

To graduate from Revelle College, a student must:

1. Satisfy the University of California requirements, including the UC Entry-Level Writing Requirement and American History and Institutions.
2. Satisfy the general-education requirements.
3. Successfully complete a major consisting of at least twelve upper-division courses as stipulated by the department and meet the department's major residence requirement if applicable.
4. Complete a minimum of fifteen upper-division courses (60 units).
5. Pass at least 184 units for the B.A./B.S. degree. (No more than 3.0 units of physical education, whether earned at UCSD or transferred from another institution, may be counted towards graduation.)
6. Attain a C average (2.0) or better in all work attempted at the University of California (exclusive of University Extension). Departments may require a C average in all upper-division courses used for the major and/or at least C-grades in each course used for the major.
7. Meet the senior residence requirement. (See "Academic Regulations: Senior Residence.")

Honors

Particularly well-prepared students are invited to join a freshman honors program, which includes weekly participation in small faculty seminars (Revelle 20). Acceptance into the honors program at admission is automatic for Regents Scholars and National Merit Scholars as well as those students entering with a high school GPA of 3.8 or higher and verbal and math SAT scores of 700 or higher. Admission to the program's winter quarter is offered to those who

achieve a 3.7 GPA in at least twelve graded units taken at UCSD during the fall quarter. A variety of other perquisites are also awarded. Outstanding students are individually advised to participate in small honors classes in chemistry, mathematics, physics, and social science.

Quarterly provost's honors, honors at graduation, departmental honors, and Phi Beta Kappa honors are awarded. At least five outstanding graduating seniors are honored at graduation each year with a monetary honorarium. An honors banquet is given for the top two hundred students in Revelle each spring. Seniors are selected for participation in honors seminars. For additional information, see "Revelle Honors Program" and "Honors" in the index.

John Muir College

John Muir College admitted its first students in the fall of 1967 and moved to its present quarters in 1970. The college was named for John Muir (1838-1914), a Scottish immigrant who became a famous California naturalist, conservationist, and author. Muir explored the Sierra Nevada and Alaska, and worked for many years for the cause of conservation and the establishment of national parks and forests. Please visit our Web site at <http://provost.ucsd.edu/muir>

The Character of the College

Naming a college affirms certain ideas and values. John Muir was committed to learning, self-sufficiency, and the betterment of humankind. Throughout his life he was open to new ideas and experiences which he shared with others through his many books. In keeping with his example, the college has, through its interdisciplinary studies programs, developed courses covering contemporary issues, a major or minor in critical gender studies, and minors in film studies and environmental studies. It has also established an individualized major called the Muir Special Project. And it has inaugurated an exchange program with Dartmouth College, one of the most distinguished undergraduate institutions in the United States. Each quarter about six UCSD students attend Dartmouth, while a similar number come from Dartmouth to Muir. By these and other means, the college maintains at UCSD the heritage of the remarkable man for whom it was named.

The General-Education Philosophy and Requirements

John Muir College faculty established Muir's general-education program to guide students toward a broad and liberal education while allowing them substantial choice in the development of that education. This is accomplished by granting students the responsibility and flexibility to customize to a high degree their general-education courses within a broad framework of learning.

General-education requirements at Muir College include the completion of two three-quarter sequences from the following areas:

- Social Science
- Mathematics (calculus) or Natural Sciences

In addition, two three-quarter sequences from the following areas are required:

- Fine Arts
- Humanities
- Foreign Languages

In order to tailor their general education to their personal goals, interests, and academic talents, students must complete four of the above-named areas and may choose from a list of several different approved year-long sequences in each of these areas. The freedom to choose carries with it the responsibility on the part of the student to plan carefully. Before making a final selection of courses, students should request from the Academic Advising unit of the Office of the Provost a list of general-education requirements and approved sequences. As they plan, students should be aware that:

1. Only complete sequences may be applied to the general-education requirement. Ordinarily, an entire sequence from one department is taken in one academic year.
2. Courses taken to satisfy **only** the general-education requirements and not for a major or minor may, in general, be taken Pass/Not Pass.
3. Units obtained from advanced placement may be applied toward the 180 units needed for graduation; some units may be used to fulfill some of the general-education requirements.

For students who transfer to Muir College from another institution, the general-education requirements will be interpreted in this way: two semester-courses or three quarter-courses in one subject represented on the approved list normally will be accepted as completing one of the four required sequences. After the Office of Admissions evaluates a student's transcript, the Academic Advising unit of the Office of the Provost makes an evaluation of prior work for each student at the time of his or her first enrollment.

In addition to the four year-long sequences, Muir College has the following two general-education requirements:

- **Composition Requirement:** A two-course sequence in critical thinking, rhetorical analysis, and expository writing. Freshman students fulfill this requirement with Muir College Writing 40 and Muir College Writing 50.

TAG- and IGETC-certified transfer students may have the option of completing an upper-division Muir College Writing course. The writing courses should be completed during the first year of attendance and are offered for a letter grade only.

- **U.S. Cultural Diversity Requirement:** One four-unit course exploring the diversity of the United States. A list of acceptable courses may be obtained from the Academic Advising unit of the Office of the Provost.

Pass/Not Pass Grading Option

Muir students are reminded that to take a course Pass/Not Pass, they must be in good academic standing (2.0 GPA). No more than one-fourth (25 percent) of an undergraduate student's total UCSD course units counted in satisfaction of degree requirements may be in courses taken on a Pass/Not Pass basis. All major-related courses and most minor courses must be taken for a letter grade. Students are advised to check with their major or minor department regarding restrictions or exceptions.

Enhancing Your Education

Students may enhance their undergraduate education by participating in the UC Education Abroad Program (EAP) and UCSD's Opportunities Abroad Program (OAP) while still making regular progress toward graduation. Information on EAP/OAP is detailed in the Education Abroad Program section of the UCSD General Catalog. Interested students should contact the Programs Abroad Office in the International Center and visit the Web site at <http://pao.ucsd.edu>. Financial aid recipients may apply aid to the EAP program, and special study abroad scholarships are available.

Many programs are now available for sophomores, as well as juniors and seniors. **With careful planning** students should be able to fulfill some general education, major, and/or minor requirements while studying abroad.

Major Programs and Special Projects

A Muir College student may pursue any of the approximately 125 undergraduate majors offered at UCSD. Most major programs at UCSD require a pattern of prerequisites at the lower-division level before students may enroll in upper-division major courses. **Students must**

declare a major upon accumulating ninety units. Careful planning will assure the student access to a wide range of majors. Students are strongly encouraged to consult regularly with the college academic advisers as well as departmental major advisers concerning the selection of appropriate courses so as to graduate by the 200 unit maximum limitation.

Each academic department has, in its section of this catalog, a paragraph entitled "The Major Program." **Students are encouraged to read these sections carefully**, for they indicate both the extent and the nature of courses required for the specific program. The following points are useful to keep in mind:

1. A substantial command of at least one foreign language is required by some departments (e.g., international studies, linguistics, literature).
2. Specific science courses are required by many departments. For example, the Department of Computer Science and Engineering and the Department of Electrical and Computer Engineering require Physics 2A-B-C-D or Physics 4A-B-C-D-E; the Department of Chemistry and Biochemistry requires Physics 1A-B-C, Physics 2A-B and C or D, or Physics 4A-B-C-D-E, etc.
3. The physical and life sciences, applied sciences (the School of Engineering majors) together with certain social sciences (including cognitive science and economics), require at least one year of calculus.

The Muir Special Project (MSP) major is a **B.A. degree only** and is intended for students who have specific talents and interests which are not accommodated by one of the departmental majors. Each proposal and senior thesis or project must be approved by the Muir provost. The MSP normally includes regular course work and independent study representing up to fifteen upper-division four-unit courses as well as a project or thesis. The project may be one of two kinds: creative work of some sort (e.g., a book of poetry, a collection of musical compositions), or a detailed program of study and research in a particular area. The latter results in a long paper representing a synthesis of knowledge and skill acquired. In either case, a tenured member of the UCSD faculty must serve as an adviser to a student doing the project. It should be understood that the demands of a special project major are **great**, and a project is not appropriate for a student who simply does not want the

discipline of a normal major. For a course to be included as part of a Muir Special Project, the student must earn in it a grade of C- or better. Please note: there is no MSP minor available. Further information may be obtained from the Muir Academic Advising Office.

Graduation Requirements

To receive a degree of bachelor of arts or bachelor of science, a John Muir College student must:

1. Declare graduation by completing the electronic Degree and Diploma Application. This must be done by **Friday of the eighth week** of the quarter of anticipated graduation. Students who plan to graduate at the end of a summer session must complete the above-mentioned process **early in spring quarter**. Fees may be assessed if students apply after the eighth week of the quarter of anticipated graduation. **Degrees are not automatically granted: students must file their intention to graduate online at <http://degree.ucsd.edu>.**
2. Meet the general university requirement in Entry-Level Writing (formerly Subject A). (See "Undergraduate Admissions, Policies, and Procedures.")
3. Satisfy the University of California requirement in American History and Institutions (See "Undergraduate Admissions, Policies, and Procedures.")
4. Meet the Muir College requirement in writing proficiency. This requirement asks that the student demonstrate an ability to write English according to standards appropriate for all college work. (See Muir College course listings: "The Writing Program.")
5. Fulfill the general-education requirements.
6. Fulfill the **U.S. cultural diversity requirement**.
7. To receive a B.A. or B.S. degree, students must complete a minimum of forty-five four-unit courses (**180 units**) which includes a **minimum of eighteen upper-division courses (72 units)**.
8. Show some form of concentration and focus of study. Ordinarily this is accomplished by completing a department or interdisciplinary major. Students in the college may attempt any major upon completion of the prerequisites. (The Department of Literature/Writing requires students to attain a minimum

GPA in prerequisite courses and apply for admission to majors in the departments.) Presently, freshman entry to computer science and computer engineering majors in the CSE and ECE departments is restricted. Refer to the departments for current detailed information. Students who do not choose to meet this requirement by means of a departmental or interdisciplinary major and who qualify may propose a special project major. (See the section, "Major Programs and Special Projects," above.)

9. Satisfy the residency requirement which stipulates that 36 of the last 45 units passed be taken at UCSD as a registered Muir College student. Students planning to study abroad during the senior year should be aware that they must return to complete a minimum number of twenty-four units at UCSD. Such students should see their college Academic Adviser for clarification.
10. Accumulate a grade-point average of at least 2.0 overall and in most majors. Departments may require a C average in all upper-division courses used for the major or C- grades in each course used for the major. Students should consult with their department to determine which grading regulation applies.
11. Make up all incomplete grades. Students may not graduate with "NRs," "IPs," or "Incomplete" entries on their transcript. Therefore, they should be sure that all Incompletes have been cleared and final grades have been properly recorded by the end of the quarter in which they plan to graduate.

12. Complete all requirements for the degree during the quarter in which students file to graduate. If the degree requirements are completed after the expiration of the deadline in a quarter, but before the beginning of the next quarter, students must retract their Degree and Diploma Application and reapply to graduate for the subsequent quarter.
13. Retract the electronic Degree and Diploma Application if unable to satisfy all graduation requirements, including grade changes, by the end of the proposed graduating quarter. Students will graduate at the end of the quarter in which deficiencies are satisfied.
14. **It is the students' responsibility to contact their department advisor to verify that they have satisfied departmental requirements for graduation.**

While John Muir College does not call for the completion of a minor to fulfill its requirements for the degree of bachelor of arts or bachelor of science, it does acknowledge such completion of an approved departmental minor on a student's transcript. **No upper-division courses may be used to satisfy both a major and a minor.**

Students are required to complete **twenty-eight units** of interrelated work, of which at least **twenty units** must be upper-division. Departments or programs may establish more stringent criteria than the minimum. **A formal request for the minor must be approved by the department or program and college by the quarter before graduation.**

Upon satisfaction of the graduation requirements, Muir College will recommend that the students be awarded the degree of bachelor of arts or bachelor of science (180 units, of which at least seventy-two must be upper-division).

Honors

Quarterly provost's honors, departmental honors, college honors, membership in the Caledonian Society of John Muir College, and Phi Beta Kappa honors are awarded. **Please note that graduating seniors must have letter grades for eighty units of work completed at the University of California for college honors.** For additional information, see "Honors" in the Index.

Honorary Fellows of Muir College

- *Hannes Alfven, Scientist and Nobel laureate
- *Georg von Bekesy, Psychologist and Nobel laureate
- *Oscar (Budd) Boetticher, Filmmaker
- *David Brower, Conservationist
- *Francis H.C. Crick, Scientist and Nobel laureate
- *Ernst Krenek, Composer
- *Ernest Mandeville, Philanthropist
- *William J. McGill, Educator
- *Jonas Salk, Scientist
- *Claude E. Shannon, Mathematician
- John L. Stewart, Founding Provost
- *Earl Warren, Jurist and Statesman
- *Robert Penn Warren, Poet and Novelist
- *Mandell Weiss, Philanthropist
- *Deceased

Thurgood Marshall College

Thurgood Marshall College, formerly known as Third College, was founded in 1970. From its inception, the college has enriched the lives of undergraduates with its intellectual and philosophic commitment to the development of students as both scholars and citizens. In July of 1993, the college was renamed in honor of the famous lawyer and Supreme Court Justice, Thurgood Marshall. Justice Marshall was widely known and recognized for his historic contributions to American life and dedication to breaking down barriers to education, civil rights, freedom of speech, women's rights, and the right to privacy. Thurgood Marshall College, its faculty, staff, and students are committed to furthering the ideals and dreams of Justice Marshall; accordingly, students are provided opportunities to develop as both scholars and citizens.

Thurgood Marshall's 3,800 students pursue any major in a variety of disciplines. About 40 percent choose majors in biology, the physical sciences, mathematics, and engineering; 35 percent select majors in the social sciences; and 25 percent pursue majors in the humanities and fine arts areas. One of the primary aims of the college is to prepare its students for the pursuit of a rigorous academic curriculum which in turn promotes entry into graduate/professional schools or into the career of one's choice.

Educational Philosophy

The educational philosophy of Thurgood Marshall College is guided by the belief that regardless of a student's major, a broad liberal arts education must include an awareness and understanding of one's role in society. Therefore, the distinctive core sequence, which serves as the centerpiece of the general-education requirements, emphasizes a critical examination of the human condition in our diverse American society. This three-quarter core sequence, "Dimensions of Culture—Diversity, Justice, and Imagination," challenges students to develop an informed awareness of the many cultural perspectives that have shaped American society. The core sequence is designed as an interdisciplinary, contemporary issues-oriented curricular experience that explores both the diversity of American experiences across race, religion, class, and gender,

and also the shared resources all Americans draw on when their different identities and interests conflict. Other general-education requirements include courses in mathematics, the physical and biological sciences, humanities, and the arts.

Wishing to uphold the ideals set forth by the college's namesake, Thurgood Marshall students are encouraged to develop their skills not only as scholars, but also as citizens. Therefore, it is our belief that scholarship and social responsibility are mutually compatible. In this regard, our students receive academic credit for participating in the Partners-at-Learning Program (PAL) by taking courses which train and place them as tutors and mentors in local inner-city elementary schools and high schools, as well as the on-campus model school, The Preuss School, and the Gompers Charter Middle School in Southeast San Diego. Because this activity shares importance with other academic experiences, completion of one of these specific public service courses, offered through Education Studies, satisfies an upper-division general-education requirement.

Further underpinning the educational philosophy of Thurgood Marshall College is the belief that the best preparation for a complex, interdependent, and rapidly changing world is a broad liberal arts education, complemented by in-depth study in areas of the student's choice. This educational approach has several major advantages;

1. It guarantees a basic understanding of the principal branches of knowledge: the humanities and arts, social sciences, the natural sciences, and mathematics.
2. It enables students with well-defined interests and goals to begin work in their chosen field of study as first-year students.
3. It allows students who have not decided on a major to sample an array of potential majors while simultaneously satisfying the general-education requirements of the college.

General-Education Requirements

General-education requirements are established by Thurgood Marshall College faculty to be broad and flexible enough to encourage students to integrate other alternatives, such as public service, internships, study abroad, research, special

studies, etc., into their academic program. This permits students flexibility in pursuit of their academic goals and in the practical application of their liberal arts degree, whether they wish to enter the work force or continue their education in graduate or professional school. These courses are designed to introduce students to the academic focus of the college, provide a broad liberal arts and science background, and furnish students with the academic skills and the basic knowledge necessary to pursue any departmental or interdisciplinary major.

The general-education requirements for first-year students are composed of a core sequence and a menu of choices within a liberal arts framework:

1. **DIVERSITY, JUSTICE, AND IMAGINATION:** This is a three-course interdisciplinary sequence. Two of the three courses are six-units and include intensive instruction in university-level writing. This is a required sequence for all first-year students. All courses must be completed at UCSD and taken on a letter-grade basis only. (See "Dimensions of Culture" in the departmental listings.)
2. **FINE ARTS:** One course in either music, theatre, or visual arts (non-performance).
3. **NATURAL SCIENCES:** Three courses. Choose one course each in biology, chemistry, and physics. Courses are available for science and non-science students.
4. **QUANTITATIVE/FORMAL SKILLS:** Choose two courses in mathematics or one course in mathematics or statistics and one in computing or logic. Courses are available for majors and non-majors.
5. **HUMANITIES AND CULTURE:** Two courses. Choose one course each from ethnic studies and Third World studies.
6. **DISCIPLINARY BREADTH:** Four courses. Students choose four courses from a variety of disciplinary breadth areas: humanities/foreign language; social sciences; natural sciences; math/engineering. Courses used to satisfy the disciplinary breadth requirement come from fields outside the major field of study. Two of these courses must be upper-division. At least

one upper-division course must include significant writing.

7. PUBLIC SERVICE (optional): This four-unit public service option may be used to fulfill one course in Disciplinary Breadth for any major and fulfills the upper-division writing requirement. (See "Partners at Learning" and Teacher Education Program listings.)

The Thurgood Marshall College Curriculum and Academic Affairs Committee publishes an annual fact sheet with specific course choices which may be used to meet these requirements. Contact the college academic advising office for additional information or refer to the college Web site.

Graduation Requirements

To receive a bachelor's degree from Thurgood Marshall College, a student must:

1. Satisfy the university Subject A requirement. (See "Undergraduate Admissions, Policies and Procedures.")
2. Satisfy the university requirement in American History and Institutions. (See "Undergraduate Admissions, Policies and Procedures.")
3. Fulfill the general-education requirements as described.
4. Complete a departmental or interdisciplinary major.
5. Satisfy the college residency requirement (thirty-five of the last forty-five units must be completed as a registered Thurgood Marshall College student).
6. Successfully complete a minimum of 180 units for the B.A./B.S. degree. At least 60 of these units must be completed at the upper-division level.
7. A 2.0 or better GPA is required for graduation.

Transfer Students

Transfer students have a variety of academic options available to complete lower-division general education prior to transfer. Specific details regarding appropriate general-education agreement are in the section on "Undergraduate Admissions" and through the community college. Students may also contact UCSD Transfer Student Services prior to transfer. Also, the college Web site contains pertinent information.

Majors and Minors

Majors: Thurgood Marshall College students may pursue any of the departmental or interdisciplinary majors offered at UCSD. The majority of the academic departments have established lower-division prerequisites. Generally, these prerequisites must be completed prior to entry into upper-division major courses. Many of these courses may be counted for general-education credit as well. Students are strongly encouraged to work closely with department faculty and college advisers. For details on the specific major departments, refer to the "Courses, Curricula, and Programs of Instruction" section of this catalog.

Minors are optional. However, students are encouraged to keep as many options open as possible. A minor provides an excellent opportunity to complement the major field of study.

Students are required to complete twenty-eight units of interrelated work, of which at least twenty units must be upper-division.

See your college or department for further information.

Pass/Not Pass Grading Option

1. Courses to be counted toward a departmental major or as prerequisites to the major must be taken on a letter-grade basis.
2. Only one upper-division course to be counted toward a college minor may be taken on a Pass/Not Pass basis.
3. Courses taken toward completion of the college general-education requirements, with the exception of Dimensions of Culture (Diversity, Justice and Imagination), may be taken on a Pass/Not Pass basis, while at the same time the restrictions for prerequisites to majors and courses counted toward a minor must be observed.
4. Courses taken as electives may be taken on a Pass/Not Pass basis, while at the same time the restrictions on the majors and minors must be observed.
5. No more than one-fourth of the total University of California, San Diego units may be completed on a Pass/Not Pass basis.

Honors

Quarterly provost's honors, honors at graduation, departmental honors, and Phi Beta Kappa are awarded to Thurgood Marshall College stu-

dents. For additional information see "Honors" in the Index or speak with the academic honors program adviser in the academic advising office.

Enhancing Your Education

Students are able to enhance their undergraduate education by participating in the UC Education Abroad Program (EAP) and UCSD Opportunities Abroad Program (OAP) while still making regular progress toward graduation. Information on EAP/OAP is detailed in those sections in the General Catalog. Interested students should contact the Programs Abroad Office in the International Center and visit the Web site at <http://www/center/pao>. Financial aid recipients may apply aid to the program, and special study abroad scholarships are readily available.

College-Sponsored Programs

INDIVIDUAL STUDIES MAJOR

The Individual Studies major allows students to pursue a coherent course of study not formally offered at UCSD. To apply for the major, students must have a 3.25 grade point average. A written proposal with supporting documentation from a faculty adviser, a list of prerequisite courses, and a proposed curriculum plan are required. Students pursuing this major must be goal-oriented and self-directed.

PARTNERS-AT-LEARNING PROGRAM (PAL)

Students may participate in the Partners-at-Learning Program (PAL) by taking specified Education Studies (EDS) courses which train and place them as tutors and mentors in local elementary and high schools, as well as the on-campus Preuss School, and the Gompers Charter Middle School in Southeast San Diego. Participation in the PAL program can be counted toward satisfying the Public Service option at Thurgood Marshall College. This campuswide program is open to all students in good standing and at the junior level. (See TEP in the department listing—specifically TEP 130, 134, 136, 138, and 139).

PRICE PUBLIC AFFAIRS FORUM

The Price Public Affairs Forum invites leading public figures to speak on important contemporary issues. Such wide-ranging topics as "Race and Justice in America," "Women's Role in the Workplace," and "The Modern American Family"

have been presented. These forums are open to the general public.

PUBLIC SERVICE MINOR

Thurgood Marshall College sponsors the Public Service Minor at UCSD, which encourages students to understand the history and practices of public service and to participate in the development of civic skills. This minor is open to all UCSD students in good standing. Please see "Public Service Minor" in the departmental listings.

AFRICAN-AMERICAN STUDIES MINOR

The African-American Studies Minor is an interdisciplinary program that seeks to provide comprehensive understanding and appreciation of African-American history, social politics, culture, and art. Please see "African-American Studies Minor" in the departmental listings.

THURGOOD MARSHALL COLLEGE HONORS PROGRAM

The Thurgood Marshall College Honors Program sponsors activities and events designed to introduce students to the excitement of pioneering research and innovative scholarship in all disciplines at UCSD and to create opportunities for discussion on public issues with locally and nationally known figures. (See Thurgood Marshall College Honors Program in the department listings.)

THURGOOD MARSHALL INSTITUTE

The Thurgood Marshall Institute is heavily devoted to undergraduate research. The institute has organized and supported faculty and student group research projects in the area of education and public law; hosted conferences and symposia on related issues; and trained junior and senior high school instructors in the teaching of the United States Constitution and its amendments.

UCSD-MOREHOUSE/SPELMAN STUDENT EXCHANGE PROGRAM

The UCSD-Morehouse/Spelman Student Exchange Program was established in the fall quarter of 1989. This formal exchange program was developed by Thurgood Marshall College and is open to all UCSD undergraduates. Morehouse and Spelman Colleges are located in Atlanta, Georgia.

The purpose of the program is to provide a unique opportunity for students to live and study at important institutions of higher learning that are significantly different from the social and educational environment typical of California state colleges and universities. Similarly, the exchange students coming to UCSD from Morehouse and Spelman will have an opportunity to experience an exciting and very different educational environment. See the program coordinator in the college academic advising office for additional information.

STUDENT LEADERSHIP PROGRAM

Complementary to its strong academic programs, Thurgood Marshall College is proud of its emphasis on the student as citizen. The Student Leadership Program is especially designed to encourage active involvement in the governance of the college and participation in community and public service programs. College life outside of the classroom and laboratory is a vital part of each student's undergraduate experience. The college offers a wide variety of opportunities for students to shape the nature and character of student life. This active participation allows students to develop self-confidence and strong interpersonal, organizational, and leadership skills. The friendly and outgoing manner of Thurgood Marshall students contributes to a sense of community and mutual respect. This spirit of cooperation is a college hallmark.

Earl Warren College

Earl Warren College opened in the fall of 1974, and currently enrolls more than 4,500 students. The college is named for the former Chief Justice of the United States and the only three-term governor of California. A native Californian, Justice Warren earned his college and law school degrees at the University of California. During his governorship, he served as an ex-officio member of the Board of Regents of the University of California for eleven years. He also saw public service as District Attorney of Alameda County and as Attorney General of California.

As governor during an era of lightning growth for California, Earl Warren developed the State Department of Mental Hygiene and led reforms of the prison system in California by establishing the Board of Corrections and the Prisoner Rehabilitation Act. In his final role as a public servant, he was Chief Justice of the United States Supreme Court, which, under his leadership, elaborated a doctrine of fairness in such areas as criminal justice, voting rights, legislative districting, employment, housing, transportation, and education.

The college derives its core values from Earl Warren's judicial examination of the relationship between the individual and society. All students in the college explore this critical nexus and its profound implications in the required course Ethics and Society. Earl Warren College also administers two campus-wide interdisciplinary minors, Law and Society and Health Care-Social Issues (open to all UCSD students), that further pursue the study of the college's guiding precept. The college employs the scales of justice in its logo, and the symmetry of this image led to the adoption of the college's philosophy, "Toward a life in balance." Warren College strives to encourage students in the discovery of that essential balance as responsible citizen-scholars through their years at UCSD and beyond.

Whether students wish to continue their education in graduate or professional school, to seek an immediate career, or to pursue other options, the college stands ready to assist. The Earl Warren College administration encourages students to identify their abilities and interests, examine career possibilities, and prepare for the future over the course of their undergraduate years at UCSD. The required, two-course Warren

College Writing Program provides a strong grounding in written argumentation and prepares students for the demands of creating college-level analytical papers. The Warren College Writing Center offers all Warren students extra-curricular assistance in honing their writing skills. The college-administered Academic Internship Program affords students the opportunity to explore classroom theory in a professional work environment. In addition, Earl Warren College is a strong supporter of international education and encourages students to pursue the many opportunities that are available for study abroad.

The college's students and faculty represent all disciplines offered at UCSD. Graduation requirements, which consist primarily of a major and two secondary areas of academic focus, enable students to cover a wide range of material while concentrating on specific topics in depth. The diversity of its academic program has made Earl Warren College an exciting home for students who seek flexibility in designing their own educational paths.

General-Education Requirements

The Earl Warren College faculty firmly believes that each student should have the opportunity to develop a program best suited to his or her individual interests within a framework that ensures both depth and breadth of study. All students are required to have significant exposure to the social sciences, arts and humanities, and the sciences. The faculty and staff of the college provide extensive advising on individual academic programs and possible career implications within each program. Students who enroll at Earl Warren College are required to work within the following academic plan:

Warren College Writing Program: Each student must complete a two-course sequence in writing, Warren Writing 10A-B, within four quarters following successful completion of the UC Entry Level Writing requirement for a letter grade only.

Ethics and Society: After completion of Warren Writing 10A-B, all students must complete a course titled "Ethics and Society" offered jointly by the Departments of Political Science

and Philosophy (Political Science 27/Philosophy 27). This course must be taken by the end of the second year at UCSD for a letter grade only.

Formal Skills: All students must satisfy the formal skills requirement by completing two courses chosen from an approved list that includes calculus, computer programming, statistics, and symbolic logic.

Programs of Concentration/Area Studies: These ensure a significant exposure to the three disciplines: humanities/fine arts, social sciences and sciences. All students are required to complete two focused collections of courses outside the areas of their majors.

For students other than B.S. Engineering majors, two Programs of Concentration are needed. Each program requires six courses outside the discipline of the major. A minimum of three courses must be upper division. In lieu of a Program of Concentration, a student may choose to declare a minor in a department or an interdisciplinary program.

For B.S. Engineering majors, each student must complete two Area Studies, one in the humanities/fine arts and one in the social sciences. Each of these Area Studies consists of three courses. A minimum of one course must be upper division. In lieu of an Area Study, a student may choose to declare a minor in a department or an interdisciplinary program.

All interdisciplinary Programs of Concentration and Area Studies must be approved by the Earl Warren College Academic Advising office. All minors must be approved by academic departments or programs.

Advanced Placement Credit

Advanced Placement (AP) units may be substituted for corresponding lower-division course work in a Program of Concentration or Area Study. In general, a maximum of twelve units may be applied toward a Program of Concentration and a maximum of eight units may be applied to an Area Study.

Majors

Earl Warren College students may pursue any of the departmental or interdisciplinary majors

offered at UCSD. For details on the specific major department requirements, refer to the "Course, Curricula, and Programs of Instruction" section of this catalog.

A student may declare a double major upon the approval of both academic departments and the academic advising office. If the two majors are from noncontiguous disciplines, one Program of Concentration or Area Study from the third discipline will be required. If the two majors are from the same discipline, two Programs of Concentration or Area Studies will be required from each of the remaining noncontiguous disciplines.

EARL WARREN COLLEGE INDIVIDUAL STUDIES MAJOR

This major is designed to meet the needs of students who have a definite academic interest for which a suitable major is not offered at UCSD. The student must submit a written proposal explaining the merits of the program and why it cannot be accommodated within existing UCSD majors. The proposal must first be approved by a faculty adviser and then approved by the College Executive Committee.

Minors

In lieu of a Program of Concentration or Area Study, Earl Warren students may pursue a departmental minor to fulfill general-education requirements. An approved departmental minor applied toward the general-education requirement will be posted to the student's official transcript. Upper-division courses taken for the departmental minor may not overlap with courses in the major, the Programs of Concentration, or the Area Studies.

Pass/Not Pass Grading Option

Programs of Concentration and Area Studies courses may be fulfilled by courses taken on the Pass/Not Pass basis. Major requirements and prerequisites are required to be taken on a graded basis. The total number of Pass/Not Pass units may not exceed one-fourth (25 percent) of a student's total UCSD units.

Graduation Requirements

To receive a B.A. or B.S. degree from Earl Warren College a student must:

1. Satisfy the University of California requirements in **American History and Institutions**,

and in **UC Entry Level Writing Requirement**. (See "Undergraduate Admissions, Policies, and Procedures.")

2. Fulfill the general-education requirements described above.
3. Complete one course in **Cultural Diversity in U.S. Society**, to be chosen from an approved list. This course may overlap with the major, the general-education requirements, or an elective.
4. Successfully complete a major chosen from those regularly offered at UCSD or, with permission, an Earl Warren College Individualized Study major.
5. Attain a minimum cumulative GPA of 2.0. Major GPA requirements may differ by department.
6. Satisfy the senior residency requirement that thirty-six of the last forty-five units passed must be completed as a registered Earl Warren College student.
7. Pass a minimum of 180 units for the B.A./B.S. degree. A minimum of 60 of these units must be taken at the upper-division level.

Transfer Students

For students who completed their lower-division general-education requirements at an accredited four-year college or students who completed a system-wide or campus-wide approved core curriculum in a California community college prior to entering UCSD, the only additional general-education requirements are two **upper-division courses noncontiguous to the discipline** of the major. For these students, the cultural diversity graduation requirement, #3 above, is waived. All other transfer students must complete the Earl Warren College general-education requirements. (See "Warren College" in the section "General Education Requirements.")

The Warren College Honors Program

The Warren Honors Program offers students educational, cultural, and social experiences designed to broaden their intellectual interests. The activities vary annually and are planned to foster student interaction and promote a sense of community. Entering freshmen with a high school GPA of 3.8 or above and SAT I scores of 700 reading/700 math/700 writing are eligible to

participate in the Honors Program. Students remain in the program until thirty-six units of UCSD credit are completed. After that, a cumulative GPA of 3.7 on all units completed at UCSD must be maintained to remain in the program. Students who do not qualify for the Honors Program at the time of admission, and all transfer students, may join as soon as a cumulative GPA of 3.7 is attained on twelve or more units completed at UCSD.

The Warren College Scholars Seminars

Freshmen who meet the Warren Honors Program requirements may qualify for admission to the Scholars Seminars by submitting a writing sample. Students who are invited to participate in the two interdisciplinary seminars enroll in Warren 11A-B. The seminars replace the required Warren College writing courses and must be taken for a letter grade. <http://warren.uscd.edu/academiclife/honors>.

Warren College Interdisciplinary Programs

LAW AND SOCIETY

The Law and Society Program at UCSD offers courses, speakers, and events that emphasize the interrelationship and complexity of legal, social, and ethical issues in their historical context. The interdisciplinary minor offers students the opportunity to examine the role of the legal system in society and to study specific legal issues from the perspectives of the social sciences and the humanities. Students benefit from the program by learning how to analyze and understand legal implications related to policy and decision making. The program is administered by Warren College and is open to all undergraduate students at UCSD with an interest in law. <http://warren.uscd.edu/law>.

HEALTH CARE—SOCIAL ISSUES

The Health Care—Social Issues Program at UCSD is designed to enhance student competence in analyzing complex social and ethical implications related to health care issues by offering an interdisciplinary minor, events, and speakers from a wide range of disciplines. Students gain an understanding of how the economy, culture, technology, social, and psy-

chological processes affect modern health care. The curriculum complements science, humanities, and social science majors and enriches student participation in the health care professions. The program is administered by Earl Warren College and is available to all UCSD students with a general interest in health care. <http://warren.ucsd.edu/health>.

Educational Enrichment

Students are encouraged to earn credit toward graduation by participating in a study abroad program through the University of California's Education Abroad Program (EAP). Earl Warren College offers students an option to complete an EAP Program of Concentration with an emphasis in either humanities/fine arts or social sciences.

EAP participants study in over 150 institutions in thirty-five countries. Students may choose to study abroad for a full academic year or for a shorter term. Most EAP programs require a minimum 2.5–3.0 cumulative GPA and junior standing at the time of participation.

One-Unit Undergraduate Seminar

The One-Unit Undergraduate Seminar Program is a campus-wide program administered by Earl Warren College. The purpose is to (a) foster closer interaction between undergraduate students and faculty members; and (b) introduce undergraduates to exciting areas of intellectual interest. Generally, the seminars are accessible to students at all levels with no prerequisites. Enrollments are limited to twenty-five students per seminar. Grading is Pass/Not Pass only, and each student is limited to four seminars for credit.

Academic Internship Program

Earl Warren College administers an Academic Internship Program available to students from all six colleges. The program is based on the conviction that quality education results from a combination of classroom theory and practical experience. Participants work full- or part-time for a public or private organization. Placements match students' major areas of academic study and correlate with their career goals. Students may enroll for one, four, eight, or twelve units per quarter, with a maximum of four internships and/or sixteen units of internship credit. Although most placements are in the San Diego area, the Academic Internship Program is international in scope and varied in offerings. Students might work for a senator in Washington; the governor in Sacramento; a legal-aid office in Los Angeles; a business, a T.V. station, research lab, or social service agency in San Diego; a public relations firm in London; or any number of other possibilities. Working closely with faculty advisers, students write research papers that integrate their academic backgrounds and internship experience. For more information, see listing under "Academic Internship Program."

Honors

Quarterly provost's honors, honors at graduation, departmental honors, and Phi Beta Kappa honors are awarded. For additional information, see "Honors" in the Index.

Honorary Fellow of the College

Harry N. Scheiber, Historian

Eleanor Roosevelt College

Eleanor Roosevelt is widely regarded as one of the most visionary and influential American public figures of the twentieth century, and her life and achievements continue to inspire men and women everywhere. She was one of the first to champion human and civil rights for all Americans during the Great Depression and the Second World War. After the war, she was the architect of the United Nations Universal Declaration of Human Rights. In the decades that followed, her tireless efforts to promote international understanding and human rights earned her worldwide respect and the title "First Lady of the World."

The College

Eleanor Roosevelt College (ERC) was established in 1988, and is currently home to almost 3,400 men and women. The college serves students interested in pursuing academic excellence, establishing the groundwork for future success, and becoming lifelong learners and effective world citizens.

ERC fosters the ideal of a comprehensive education that develops intellectual capacities and expands general knowledge. The core curriculum exposes students to a variety of academic disciplines, providing a foundation that is suitable for all majors, whether in the natural or applied sciences, the social sciences, or the humanities and the arts. It prepares students for opportunities to study and conduct research with UCSD faculty and scholars.

The world in which today's students will make their careers is one of rapid scientific and technological change, rich cultural diversity, and intense social and political interactions. ERC's general-education curriculum and co-curricular programs build knowledge of other cultures and skills for working in the rapidly changing environment of the twenty-first century. Students seeking careers in fields as diverse as business, law, medicine, public policy, engineering, the sciences, and the arts or humanities find ERC's curriculum and programs equally valuable and relevant.

At ERC, shared educational goals are pursued in a supportive community where students are valued and respected, where they are challenged and helped to succeed, and where they can

develop independence and confidence about their roles in society.

General Education

The general-education requirements at ERC are designed to provide all students with a broad intellectual foundation. The curriculum offers undergraduates opportunities to learn about the various fields that may be open to them, thus assuring that their choices in selecting a major, pursuing graduate study, or seeking employment will be based on clear understandings about the nature of the work and their own interests and talents.

Advanced Placement Credits

University credit may be granted for College Board Advanced Placement Tests on which a student earns a score of 3 or higher. The credit may be applied toward general-education requirements (approximately half of which can be met by Advanced Placement credit), elective units for graduation, as subject credit for use in a minor, or as a prerequisite to a major. For further details, see the advanced placement chart in "Undergraduate Admissions, Policies and Procedures."

ERC academic counselors provide information about advanced placement or courses that meet the general education requirements of the college. Students should take advantage of the counseling available in the Academic Advising Office to help them effectively incorporate the college general-education requirements into their academic program.

ERC General-Education Requirements for Students Entering as Freshmen

The Making of the Modern World (six quarters)

This interdisciplinary sequence of six courses incorporates humanities (literature, history, and philosophy) and social sciences as well as writing. The courses examine Western and non-Western societies, cultures, and state systems both historically and comparatively. *The Making of the Modern World* (MMW) is taught by faculty from

many disciplines, including anthropology, history, literature, political science, and sociology.

MMW is designed to help students search for connections—between past and present, among the societies and civilizations that have inhabited the earth, and among the ways that humans have used to make sense of their experience.

At ERC, the university writing requirement is met through MMW and relies on those courses for its content. Instruction and practice in writing, in turn, help students master the course content and analyze and synthesize the material. In all fields, written communication skills are among the most important qualifications graduates take to the job market and graduate school. Writing is assigned in MMW 2-6; the second and third quarters include intensive writing instruction and carry two additional units of credit. For more details, see "The Making of the Modern World" in the department listings.

Natural Sciences (two quarters)

Two courses are to be chosen from selected offerings in biology, chemistry, physics, and/or earth sciences.

Quantitative Methods (two quarters)

Two courses are to be chosen from selected offerings in pre-calculus, calculus, statistics, symbolic logic, or computer programming.

For students majoring in scientific fields, these courses are preparation for major study; for students who will continue their studies outside the sciences, they provide a basic understanding and appreciation of methods and developments in the fields. Many of the selected courses are designed for non-science majors.

Foreign Language (zero to four quarters)

ERC students are required to demonstrate basic conversational and reading proficiency in a modern foreign language, or advanced reading proficiency in a classical language, by completing the fourth quarter of foreign language instruction (or equivalent) with a passing grade.

Students may also complete this requirement by demonstrating advanced language ability on a special proficiency exam. Students considering this option should consult with an ERC academic counselor during their first year at UCSD.

Advanced placement scores in language or literature, and IB scores in language, may exempt students from all or part of the ERC language requirement.

College-level language study is a prerequisite for study abroad in most non-English speaking countries and enhances understanding of those societies. Students wishing to study abroad in non-English speaking countries may need to take additional language classes, and will need to take all language courses for letter grades.

Fine Arts (two quarters)

Two four-unit courses are required, to include study of both Western and non-Western music, theatre, dance, and/or visual arts. These courses help students appreciate the rich range of human expression to be found in cultures and ages other than their own.

Regional Specialization (three quarters)

Each ERC student selects three courses dealing with a single geographic region of the world. The college has defined regions broadly enough to assure course availability and narrowly enough to ensure coherence of subject matter. These courses may be chosen from offerings in humanities, social sciences, and fine arts. At least two of the three must be taken at the upper-division level. See "Minors" below about application of this course work to an optional ERC minor.

Upper-Division Writing Requirement

To demonstrate competency in written English at the upper-division level, students submit to the Academic Advising Office a paper or papers of specified lengths that were written for one or more upper-division courses and graded C- or higher. Papers are returned to students after Academic Advising Office staff certify that they meet the upper-division writing requirement.

Sample Program

A program like the sample one shown here would lead to completion of most general-education requirements during the first two years of college. Some variation will occur depending upon a student's academic preparation, choice of major, and individual interests and priorities. For example, students planning to major in science, math, or engineering will be taking many prerequisite courses for their major; those courses typically also fulfill the

general-education requirements in natural sciences and/or quantitative methods.

FALL	WINTER	SPRING
FRESHMAN YEAR		
MMW 1 foreign language fine art Entry Level Writing requirement, major, or elective	MMW 2 foreign language quantitative methods fine art	MMW 3 foreign language quantitative methods major or elective
SOPHOMORE YEAR		
MMW 4 natural science major or elective major or elective	MMW 5 natural science major or elective major or elective	MMW 6 major or elective major or elective regional specialization
JUNIOR AND SENIOR YEARS		
regional specialization (2) major course work electives		

Transferring to ERC

Transfer students may meet most ERC general-education requirements before entering UCSD if they have followed articulation agreements with community colleges, or taken courses elsewhere that ERC deems equivalent in content to UCSD courses that meet the college's requirements.

All transfer students must take three quarters of MMW, and it is recommended that the three courses be taken in sequence. Students who have not met their freshman writing requirement elsewhere must complete it by taking MMW 2 and/or MMW 3 as part of this three-course requirement.

All transfer students must also take two upper-division regional specialization courses and satisfy the upper-division writing requirement. See "Graduation Requirements" below.

Grading Options

1. No more than 25% of total UCSD units counted in satisfaction of degree requirements may be taken on a Pass/Not Pass basis.
2. Electives may be taken on a Pass/Not Pass basis except if they are to be applied to majors or minors. Check with the appropriate department or college for rules applying to specific majors or minors.
3. Courses that meet the following ERC general-education requirements may be taken Pass/Not Pass: fine arts, foreign language, natural sciences, quantitative methods, and one regional specialization course. All other

general-education courses must be taken for letter grades.

Leadership and Community

ERC students are recognized for their strong sense of community. These bonds are created in part by common classroom experiences in MMW. They also grow from shared explorations in a variety of college programs in which students take active roles: college and campus-wide student government, service to the campus and the larger community, the acquisition of leadership skills, and sports and social activities.

The college is home to UCSD's International House, which offers informative and dynamic discussions for the campus community at its weekly International Affairs Group meetings. ERC also hosts (with the Programs Abroad Office) a retreat each fall to welcome back study abroad returnees from all six colleges and assist with their re-integration into the UCSD community.

Expanding Horizons

Students whose interests extend beyond our borders are encouraged and assisted in finding opportunities to spend part of their college career in another country. There are many options, including short-term or year-long academic programs, work opportunities, and career-related internships.

At one time or another, men and women from ERC have studied in more than forty different countries in Europe, Africa, Latin America, the Middle East, and Asia.

Students on university financial aid who participate in the UC Education Abroad Program pay UCSD fees and retain their financial aid packages, which are budgeted to include study abroad expenses. In addition, there are a number of sources for scholarship aid designated for study abroad.

Majors

An ERC student may pursue any of the approximately 150 undergraduate majors offered at UCSD. Students may complete more than one major, provided they comply with all Academic Senate regulations concerning double majors. To declare a double major, a student must have accrued at least ninety but no more than 135 units, have at least a 2.50 GPA, and meet university

requirements regarding total maximum number of units earned and quarters attended at UCSD.

Most majors require the completion of specified "pre-major" or prerequisite courses at the lower-division level before enrollment in upper-division major courses. For some majors, admission to upper-division course work is contingent upon a satisfactory GPA in certain pre-major courses. Students are strongly encouraged to work closely with department advisers as well as college academic counselors to assure adequate and timely preparation for their majors.

Completion of certain majors may take more than four years or the minimum 180 units required for graduation. Time-to-graduation in other instances may be affected by a student's level of preparation for upper-division work in the major or by a decision to change major. See "The Undergraduate Program(s)" in respective department listings.

ERC Individual Studies Major

ERC offers an Individual Studies major to meet the needs of students who have defined academic interests for which suitable majors are not offered at UCSD. Students who find themselves in this situation should consult a college academic counselor at the first opportunity.

This major includes regular course work and often independent study, representing a minimum of twelve upper-division four-unit courses. A regular member of the faculty serves as adviser to the student. Students admitted to the Individual Studies major may enroll in ERC 199, an independent study course supervised by a faculty member, who tailors the content to fit the major.

Qualifying seniors pursuing an Individual Studies major may undertake an honors thesis research project (ERC 196) under the tutelage of their faculty mentor. See "Eleanor Roosevelt College" in the department listings.

Further information about an Individual Studies major may be obtained from the ERC Academic Advising Office.

Minors and ERC Special Minors

Minors are not required at ERC. However, completion of a minor can be an educational or pre-professional asset. All students have the option of completing any approved departmental or inter-departmental minor.

Alternatively, students may wish to combine foreign language course work with an associated regional specialization to earn an ERC Special Minor in, for example, Asian Studies or Middle Eastern Studies. Such minors must conform to Academic Senate policies: For students entering the University before January 1998, this means completion of at least six courses (twenty-four units), of which at least three (twelve units) must be at the upper-division level. Students entering in January 1998 or later must complete at least seven courses (twenty-eight units), of which at least four (sixteen units) must be at the upper-division level. Upper-division courses applied toward a minor may not be used to meet the requirements of the major.

Internships

As a way to combine classroom theory and practical experience, juniors and seniors are encouraged to consider internships under programs available to any UCSD student and administered by the Academic Internship Program, Career Services, or UCSD Associated Students.

Participants work for various lengths of time in enterprises that match their major interests and career goals. Most placements are local, but some are in such locations as Washington, D.C., Sacramento, Los Angeles, or London.

Working with faculty advisers, students enrolled in academic internships write research papers integrating their work experience with their formal studies, and they can earn up to sixteen units of credit in increments of four, eight, or twelve per quarter.

Graduation Requirements

To graduate with a baccalaureate degree from the University of California, an Eleanor Roosevelt College student must:

1. Satisfy two University of California requirements: the Entry Level Writing requirement in English composition and the American History and Institutions requirement. See "Undergraduate Admissions, Policies and Procedures."
2. Fulfill the ERC general-education requirements as described.
3. Complete an approved departmental or inter-departmental major, meeting all requirements as specified by the major department or program.

4. Satisfy the senior residency requirement that thirty-five of the final forty-five units must be completed as a registered UCSD student. Students studying abroad in their senior year may petition to have this requirement waived.
5. Complete and pass a minimum of 180 units for the Bachelor of Arts or Bachelor of Science degree. At least sixty of those (fifteen courses) must be at the upper-division level. The B.S. degree is awarded in biology, physics, cognitive science, chemistry, earth sciences, management science, and designated engineering and psychology programs; the B.A. is awarded in all other majors.
6. Earn a cumulative GPA of 2.0 or higher.

Honors Recognition

Students who earn a quarter GPA of 3.5 or higher are notified of having achieved Provost's Honors. Students who maintain GPAs of 3.5 or higher for a full academic year are awarded Provost's Honors certificates.

Every spring, ERC holds an academic honors recognition event to which high achieving students are invited, and graduating seniors are encouraged to invite individual faculty as their guests.

Also each spring, UCSD's chapter of the Phi Beta Kappa Society invites to membership seniors who have demonstrated outstanding academic achievement (3.65 GPA), breadth in their academic programs (including humanities, language, and quantitative methods), and good character, among other criteria. See "Phi Beta Kappa" in the index.

At Commencement, ERC graduates with extraordinarily outstanding overall academic records are named Provost's Scholars. Graduates with final cumulative GPAs equivalent to approximately the top 14 percent of UCSD graduates become eligible for University Honors and receive their degrees Cum Laude (with honors), Magna Cum Laude (with high honors), or Summa Cum Laude (with highest honors).

ERC Honors Program

The Freshman and Sophomore Honors programs at ERC have been established to provide exceptionally motivated and capable students with enhanced educational experiences in association with faculty and other honors students.

Sixth College

Selected new students are invited to enroll in the Freshman Honors Seminar. During fall quarter, students meet with a variety of faculty members to learn more about their research and about academic enrichment opportunities at UCSD. Seminar members also participate in other enriching academic and cultural events.

The Freshman Honors Seminar continues during winter quarter (and some years through spring quarter) with faculty speakers who focus on international themes. In winter (and spring) quarters, these seminars carry one unit of credit each (ERC 20). See "Eleanor Roosevelt College" in the department listings.

Sophomores who have earned cumulative grade-point averages (GPAs) of 3.5 or higher have opportunities to pursue independent study with individual faculty for credit (ERC 92). See "Eleanor Roosevelt College" in the department listings.

Additional honors opportunities are offered in MMW. Students with excellent grades in MMW 1, 2, and 3 and high cumulative GPAs are eligible to take honors sections of MMW (4H, 5H, and 6H). These students attend regular MMW lectures and meet in separate honors discussion sections. They also attend special guest lectures and enrichment activities related to course content.

At the upper-division level, students may qualify to enroll in honors programs offered by their major departments. These programs usually include research under the direction of a faculty mentor and the writing and presentation of an honors thesis.

<http://sixth.ucsd.edu>

Sixth College, the newest of UCSD's six undergraduate college draws on its theme, Culture, Art, and Technology, to meet the lifelong educational needs of students in the twenty-first century. New global challenges demand new approaches to visualization, problem solving, information handling, and communication across cultural and disciplinary boundaries. Intellectual flexibility, creative, critical thinking, ethical judgment, fluency in assessing and adapting to technological change and the ability to engage effectively in collaboration with others from a wide range of backgrounds will be critically important to our graduates. To help prepare our students for the future, Sixth College offers an integrated learning environment that emphasizes collaborative learning, creative imagination, interdisciplinary inquiry, and written, visual, kinetic and auditory investigation, argument, and expression. Students will learn to use digital as well as traditional communication and research tools. The college is committed to help students develop skills necessary for lifelong learning, including self-reflection with information technology and the crucial ability to learn from experts.

Sixth College offers students opportunities to explore its theme, Culture, Art, and Technology, both within its academic program and through non-classroom based programs that provide our students with learning, work, and research experiences both on and off campus.

Sixth College challenges students to examine the multi-dimensional interactions between culture, art, and technology, in order to imagine the future and create new forms of inquiry and communication. Teamwork, artistic expression, interdisciplinary ways of thinking and knowing, and multicultural awareness are core educational goals.

Sixth College students will be encouraged to engage with the outlying community through the practicum. More than an ethical obligation to service, such an engagement is integral to the process of learning to listen across cultures and to consider implications of diverse agencies of change. Sixth College is committed to pioneer meaningful application of evolving technologies

inside and outside the classroom. For example, wireless communication technology is incorporated into the very design of this college's physical infrastructure and curricular planning, allowing Sixth College to pioneer radically new teaching, communication, community, and lifelong learning paradigms. On campus and off, students will be linked in many ways—by digital media, by team-based course and extracurricular projects and learning exercises, by social and local community engagement (e.g., practicum project), and by diverse cultural and intellectual events that seamlessly connect many aspects of residential life and student affairs programming with the college curriculum. All these linkages help ensure that Sixth College students have the opportunity to develop, learn, and act as integral members of a sustaining local and larger community.

Culture, Art, and Technology

All students will take a three-quarter core sequence titled Culture, Art, and Technology (CAT). CAT is a highly interdisciplinary sequence integrating learning in arts and humanities, social sciences, and science and engineering. It introduces students to thinking across disciplines so they can identify interactions, recognize patterns, and provide opportunities for learning by inquiry in a collaborative environment. Exercises and instruction that develop fluency with information technology and information literacy, as well as writing and communication skills, will be embedded in the core sequence.

Practicum

Sixth College's Practicum is a capstone requirement that engages students in the creative process of our research university. Students must initiate, plan, and execute projects that connect classroom based-experiences and knowledge to the outlying community and that explicitly explore the interplay of culture, art, and technology. The practicum reflects Sixth College's commitment to form bridges within the UCSD campus units and to San Diego's communities, to engage students in communal issues and to fos-

ter students' ethical obligation to service. Such an engagement is an integral part of the process of learning to listen across cultures and to consider the implications of various agencies of change.

General-Education Requirements

The Sixth College breadth requirements have three primary goals: (1) to produce breadth of knowledge and connections across that breadth, (2) to encourage creative imagination, and (3) to accomplish these activities from an ethically informed perspective. The aim is to allow students to discover the richness of UCSD's academic life and to see relationships among the sciences, social sciences, engineering, arts, and the humanities. Because Sixth College emphasizes cross-disciplinary ways of thinking, it is critical for students to appreciate the different modes of inquiry within academic disciplines. For information about courses available to satisfy the general-education requirements, please visit the academic advising office in the Sixth Administration Building or check the Web site at sixth.ucsd.edu.

1. **Culture, Art, and Technology:** Three courses. Core Sequence CAT 1, 2, and 3. Includes two (6 unit) quarters of intensive instruction in university-level writing.
2. **Information Technology Fluency:** One course. This requirement may be satisfied with courses from a variety of departments.
3. **Modes of Inquiry:** Seven courses. Two courses in social sciences, two courses in humanities, two courses in natural sciences, one course in math/logic (different options available for science and non-science majors).
4. **Understanding Data:** One course in statistical methods (different options available for science and non-science majors).
5. **Societal and Ethical Contexts:** Two courses. One course in ethnic or gender studies AND one course in ethics.
6. **Art Making:** Two courses in literature, music, theatre (including dance), or visual arts.
7. **Practicum:** Students must complete a capstone project and an upper-division writing course in which students reflect about their practicum experience. See the Sixth College advising center for details.

Graduation Requirements

In order to graduate from Sixth College all students must:

1. Satisfy the University of California requirements in Entry Level Writing and American History and Institutions (See Academic Regulations: Entry Level Writing Requirement; and American History and Institutions).
2. Satisfy the general-education requirements including the practicum and the practicum writing requirement.
3. Successfully complete a major according to all regulations of that department.
4. Complete at least 60 units at the upper-division level.
5. Pass at least 180 units for the B.A./B.S. degree. No more than 3 units in physical education (activity) courses may count toward graduation.
6. Attain a C average (2.0) or better in all work attempted at the UC. Departmental requirements may differ. Students are responsible for checking with the department of the major for all regulations.
7. Meet the senior residence requirement. (See Academic Regulations: Senior Residence).

Transfer Students

Transfer students may meet all or most of Sixth College's lower-division requirements before entering UCSD if they have followed transfer agreements or preparation programs. Specific details regarding appropriate general-education agreements are in the catalog section on "Undergraduate Admissions." Additional resources of information for transfer students include UCSD Transfer Services, the Sixth College Web site, and the student's community college.

Majors and Minors

Majors: Sixth College students may pursue any of the departmental or interdisciplinary majors offered at UCSD. The majority of the academic departments have established lower-division prerequisites. Generally, these prerequisites must be completed prior to entry into upper-division major courses. Many of these courses may count for general-education credit as well. Students are strongly encouraged to work closely with department faculty and college advisers. For details on the specific major departments, refer to the

"Courses, Curricula, and Programs of Instruction" section of this catalog.

Minors are optional. However, students are encouraged to keep as many options open as possible. A minor provides an excellent opportunity to complement the major field of study.

Students are required to complete twenty-eight units of interrelated work, of which at least twenty units must be upper-division.

Pass/Not Pass Grading Option

Some general-education requirements may be fulfilled by courses taken on the Pass/Not Pass basis. Sixth College students are reminded that major requirements and prerequisites must be taken on a graded basis. In accordance with University Academic Regulations, the total number of Pass/Not Pass units may not exceed one-fourth of a student's total UCSD units.

Honors

In addition to the College Honors Program (see under Sixth College), there are many types of Honors at UCSD.

- **Provost Honors**—awarded each quarter based on completion of twelve graded units with a GPA of 3.5 or higher. For each year of Provost's Honors, a certificate of merit is awarded.
- **Departmental Honors**—Outstanding students often enroll in departmental honors programs, and they may receive university honors at graduation. They may also be eligible to be invited to membership by the UCSD chapter of Phi Beta Kappa, the nation's oldest, most respected academic honor society.
- **College Honors designation at graduation**—College honors awarded include: *summa cum laude*, *magna cum laude*, and *cum laude*.

Expanding Your Educational Horizons

CHICANO/A ~ LATINO/A ARTS AND HUMANITIES (CLAH) MINOR
<http://clah.ucsd.edu/>

Sixth College sponsors the CLAH minor at UCSD, which encourages students to examine the art, literature, history, music, theater, and language of Spanish-speaking people in the United

States, from the nineteenth century to the present. This minor is open to all UCSD students in good standing. Two years or equivalent college-level Spanish language instruction (may include one lower-division language course) are required.

LEADERSHIP AND COMMUNITY

<http://sixth.ucsd.edu/>

Collaboration and connectedness are central values of Sixth College. These values are reflected in Sixth's commitment to providing meaningful opportunities for students to contribute to the direction and evolution of UCSD's youngest college. Student leadership opportunities include serving on the Sixth College Student Council or in campus-wide student governance roles. Additionally, students assume leadership in the Sixth community through service as resident advisers, orientation leaders, and members of the Sixth College Executive Committee. These opportunities and others not only contribute to shaping what Sixth College is and will become, but also foster in students the development of life skills that prepare them to be effective citizens and leaders in a world of ever increasing complexity and diversity.

Undergraduate Research

Research opportunities for undergraduates at UCSD

UCSD encourages all undergraduates to become involved in the research life of the university. Every academic department has opportunities for undergraduates to work with faculty on the cutting edge research projects for which UCSD is world-renowned. Working closely with faculty, students will deepen their knowledge and skills in areas of special academic interest, while experiencing what it means to be part of an intellectual community engaged in research.

Information can be found through Undergraduate Research at UCSD: <http://ugr.ucsd.edu/>; Academic Enrichment Program: <http://aep.ucsd.edu/>, and Summer Research Opportunities http://sea.ucsd.edu/summer_research/

Pacific Rim Undergraduate Experiences (PRIME)

<http://www.pragma-grid.net/PRU/index.htm>

This undergraduate research program provides opportunities to participate in an international research and cultural experience that will prepare students for the global workplace of the twenty-first century. Students will live and work at an international host site either in Japan, Taiwan, China, or Australia, and gain greater cultural understanding of a new region.

California Institute for Telecommunications and Information Technology (Calit2)

<http://www.calit2.net/>

Ensures that California maintains its leadership in the rapidly changing telecommunications and information technology marketplace. The institute encourages undergraduate participation in its research activities and provides undergraduate summer research scholarships.

Community Work

TIES (Teams in Engineering Service)

<http://www.jacobsschool.ucsd.edu/TIES/>

TIES is a new and innovative academic program putting UCSD undergraduates and their technical and creative skills to work for San Diego non-profit organizations. Multidisciplinary teams of UCSD students design, build, and deploy projects that solve technology-based problems for community partners.

PAL (Partners at Learning)

<http://www-tep.ucsd.edu/service.shtm>

PAL is the service-learning division of UCSD's Teacher Education Program. PAL classes give UCSD students meaningful opportunities to learn about and experience issues of equity and education in San Diego's K-12 schools. Through PAL, UCSD students serve as tutors and mentors in K-12 classrooms throughout San Diego County. Each year PAL students contribute about 20,000 hours of service to underserved schools.

Cultural Enrichment

The Center for Research in Computing and the Arts (CRCA)

<http://www-crca.ucsd.edu/>

CRCA is an organized research unit of UCSD whose mission is to facilitate the invention of new art forms that arise out of the developments of digital technologies. Current areas of interest include interactive networked multimedia, virtual reality, computer-spatialized audio, and live performance techniques for computer music and graphics. Through Sixth College's partnership with CRCA students have opportunities to participate in special events, meet artists, and engage in research.

ArtPower!

<http://www.artpower.ucsd.edu/>

ArtPower!, administered through the University Events Office, brings to the UCSD campus world artists in a wide variety of genres, including music, dance, and the spoken word. Sixth College has developed a partnership with ArtPower!, providing students with opportunities to connect to and engage with professional artists in a variety of formal and informal activities.

Undergraduate Admissions, Policies, and Procedures

Programs Abroad Office (PAO)

<http://pao.ucsd.edu/pao/>

Through the Programs Abroad Office, students can take advantage of a variety of international opportunities, including study, work, volunteer, and internship programs abroad! Each year UCSD sends about 1,000 students overseas. Students may choose from the University of California's systemwide Education Abroad Program (EAP) that has educational opportunities in thirty-five countries, or from the Opportunities Abroad Program (OAP) that links students with worldwide opportunities sponsored by organizations and universities other than the University of California.

Professional Preparation

Academic Internship Program (AIP)

<http://aip.ucsd.edu/>

The program offers qualified juniors and seniors the opportunity to acquire valuable work experience related to academic and career interests. Although most internships are in the San Diego area, the Academic Internship Program is national in scope, including the popular Washington, D.C. program, and international, including the London program. An extensive library lists more than 2,000 available internships in varied settings including, but not limited to, TV and radio stations, law offices, medical research labs and clinics, government agencies, high-tech and biotech companies, engineering, advertising and public relations firms, and financial institutions. Students also can work with the internship office to set up their own positions.

Departmental Internships

Most departments offer internships for their majors; the courses are numbered 197 (see individual departments for additional information).

All communications concerning pre-applicant undergraduate admission for U.S. citizens should be addressed to:

Office of Admissions and Relations
with Schools

Student Affairs

University of California, San Diego,
9500 Gilman Drive, Dept. 0021,

Definitions

An application to the University of California, San Diego is processed and evaluated as a freshman or transfer, California resident; freshman or transfer, nonresident; or freshman or transfer, international applicant. See definitions below:

An Undergraduate Applicant

A student who wishes to complete a program of studies leading to a bachelor of arts or a bachelor of science degree.

A Freshman Applicant

A student who has graduated from high school but who has not enrolled since then in a regular session in any accredited college-level institution. This does not include attendance at a summer session immediately following high school graduation.

A Transfer Applicant

A high school graduate who has been a registered student in another accredited college or university or in college-level extension classes other than a summer session immediately following high school graduation. A transfer applicant may not disregard his or her college record and apply for admission as a freshman.

An undergraduate student can earn transfer credit upon successful completion of college-level work which the university considers consistent with courses it offers. Such credit may be earned either before or after high school graduation.

The acceptability of courses for transfer credit is determined by the Office of Admissions and Relations with Schools.

For more information regarding transferring to UCSD call or write:

A Nonresident Applicant

A student who lives outside the state of California and who is required to present a higher scholarship average than is required of California residents to be eligible for admission to the university, in addition to paying the nonresident tuition fees.

An International Applicant

A student who holds or expects to hold any nonimmigrant visa.

Educational Opportunity Programs

The Educational Opportunity Program (EOP) is a recruitment and academic support program established by the university to increase the enrollment of educationally disadvantaged and low-income students. Students are provided with pre-admission counseling, and academic and personal support services. EOP eligibility is based on family income level.

Services available to EOP students cover a broad range of needs. Recruitment and application-related services include pre-admission counseling, application fee waivers, application follow-up, and deferral of the Statement of Intent to Register fee. Academic support for EOP students is offered through the Office of Academic Support and Instructional Services (OASIS).

States, from the nineteenth century to the present. This minor is open to all UCSD students in good standing. Two years or equivalent college-level Spanish language instruction (may include one lower-division language course) are required.

LEADERSHIP AND COMMUNITY

Educational Opportunity Programs

The Educational Opportunity Program (EOP) is a recruitment and academic support program established by the university to increase the enrollment of educationally disadvantaged and low-income students. Students are provided with pre-admission counseling, and academic and personal support services. EOP eligibility is based on family income level.

Services available to EOP students cover a broad range of needs. Recruitment and application-related services include pre-admission counseling, application fee waivers, application follow-up, and deferral of the Statement of Intent to Register fee. Academic support for EOP students is offered through the Office of Academic Support and Instructional Services (OASIS).

The method of applying is online at <http://www.universityofcalifornia.edu/apply>. EOP applicants must be California residents. To apply for EOP, check the appropriate box in the UC application designated for the Educational Opportunity Program. Fill in the information requested in the application pertaining to family size and income, parental education level and occupation. This information is used in conjunction with other information from the admission application in determining eligibility for EOP.

Financial aid is available to eligible EOP students from the regular state, federal, and university sources administered through the UCSD Financial Aid Office. Although EOP eligibility does not guarantee financial aid, the low-income ceilings for EOP eligibility mean that most EOP applicants should qualify for substantial financial assistance. Financial aid information is available from the UCSD Financial Aid Office at <http://fao.ucsd.edu>. Admissions information can be sought from your high school or community college counselor or the Office of Admissions and Relations with Schools. Undergraduate Colleges and Majors

COLLEGES

Even though you may be uncertain about your major, your application for admission must include the name of the UCSD college with which you want to affiliate (Revelle, John Muir, Thurgood Marshall, Earl Warren, Eleanor Roosevelt or Sixth College). You must indicate a second and third choice in the event your first choice college closes early. Applicants may be reassigned to another college by the Office of Admissions and Relations with Schools if enroll-

ment quotas prohibit first choice. Applicants who do not indicate a UCSD college preference will be assigned a college.

In the "Choosing a College" section, which describes the educational philosophies of the six colleges at UCSD, you will find information concerning the requirements of each college. It is very important that you read that section of the catalog carefully, and that you decide which of the colleges is the right one for you.

You can also find information about UCSD's six colleges, and much more, on the Web site of the Office of Admissions and Relations with Schools (<http://admissions.ucsd.edu>).

IMPACTED MAJORS

It sometimes becomes necessary to limit enrollment in certain majors. When this occurs the affected majors will be listed in the *General Catalog* as soon as possible. When the catalog does not reflect these conditions, newly admitted students will be notified of them in the university's admissions letter. Currently, the following majors are considered impacted for freshmen: computer science, and computer engineering (within the computer science and engineering department); and computer engineering (within the electrical and computer engineering department), bioengineering and bioengineering: biotechnology. Freshmen considering applying to these majors must also select an alternate major on the UC application. Students admitted to UCSD who are not admitted directly into one of these majors will be admitted into their alternate major, provided it is not impacted.

POST-SCREENING OF ELECTRICAL ENGINEERING MAJORS

Effective fall 2006 the electrical engineering major within the Department of Electrical and Computer (ECE) Engineering is no longer considered an impacted major. Entering freshmen and transfer students who have indicated the desire to major in electrical engineering will be admitted directly to the major. Continuing UCSD students who wish to transfer into the electrical engineering major will be evaluated under the rules that are in effect for the year in which they enter the major. Effective fall 2006, to remain in good standing as an electrical engineering major, a student must complete a minimum of eight progress review courses with a C- or better during his or her first five quarters for freshmen or during the first three quarters for continuing

UCSD and transfer students. The average GPA from any six of the progress review courses, including at least two from electrical engineering progress review courses, must exceed 2.50.

The Required Review of Student Progress for Electrical Engineering majors is explained in greater detail under the Department of Electrical and Computer Engineering (ECE) section of this catalog.

PRE-MAJORS

The following majors admit freshmen to pre-major status only: bioengineering; premedical, engineering physics, human development, ICAM-visual arts, ICAM-music, literature/writing, math-computer science, visual arts-media (computing emphasis).

As a pre-major, you must satisfy all prerequisites before admission to the major. The set of conditions, determined on a department-by-department basis, and approved by the San Diego Committee on Educational Policy, is explained in detail under the department listing in this catalog.

Other departments may be approved to offer pre-majors by the Committee on Educational Policy subsequent to this publication. Please refer to "Major Fields of Study" in the introduction to the catalog.

Undergraduate Admissions

MINIMUM REQUIREMENTS

The university's minimum undergraduate admission requirements, which are the same on all University of California campuses, are based on three principles. They are: (1) the best predictor of success in the university is high scholarship in previous work; (2) the study of certain subjects in high school gives a student good preparation for university work and reasonable freedom in choosing an area for specialized study; and (3) standardized assessment tests provide a broad base for comparison, and mitigate the effects of differing grading practices.

The academic requirements for admission are minimum entrance standards. Students admitted to UCSD are chosen from a large number of highly competitive applicants, most of whom will have greatly exceeded the minimum requirements. Therefore, selection depends on additional factors.

Academic preparation is the principal basis for gaining admission to UCSD. Students are encouraged to pursue the most rigorous academic curriculum possible, including honors and Advanced Placement (AP) courses, in order to prepare for the university experience. High test scores are necessary in conjunction with strong performance in classes and a consistent pattern of courses. Overall performance must be well above minimum requirements in order to admit you to the campus and major of your choice.

UCSD Admission Policy and Selection Criteria

The undergraduate admission policy at the University of California, San Diego is designed to select a highly qualified and diverse student body. As a major public institution of higher education serving the teaching, research, and public service needs of California, UCSD strives to reflect the diversity of the population of the state. This undergraduate admission policy has been developed by the San Diego campus in compliance with the University of California Policy on Undergraduate Admissions that "seeks to enroll a student body that, beyond meeting the University's eligibility requirements, demonstrates high academic achievement and exceptional personal talent, and that encompasses the broad diversity of California."

Freshman Selection

The number of applicants to UCSD far exceeds the number of spaces available, and it has become necessary to adopt standards which are much more demanding than the minimum requirements to admit students. The San Diego campus has developed the following procedures for the selection of applicants to be admitted from its pool of eligible candidates:

COMPREHENSIVE REVIEW

All UC eligible applicants will receive a review which considers a combination of factors—academic, personal characteristics, and achievement, including:

- Uncapped grade-point average (maximum of eight semesters of approved honors, AP/IB HL, or UC-transferable college-level courses)
- Scores of all required examinations

- Number of "a-g" courses beyond the minimum specified for UC eligibility
- Eligibility in the Local Context (ELC)
- Educational environment
- Low family income
- First-generation college attendance
- Demonstrated leadership
- Special talents, achievements, and awards
- Volunteer/community service
- Sustained participation in pre-collegiate/academic development and enrichment programs
- Special circumstances and/or personal challenges

Academic achievement constitutes approximately 75 percent of the overall comprehensive review score. Applicants with the highest level of academic, personal characteristics, and achievement will be admitted in sufficient numbers to meet UCSD's enrollment goals.

Advanced-Standing Selection

Admitted applicants will be selected primarily on the basis of academic performance, as assessed by review of the GPA in all UC-transferable courses and the total number of UC-transferable units completed one full term prior to the initial quarter of attendance at UCSD.

Applicants who have satisfactorily completed sixty transferable semester units (ninety quarter units) one full term prior to the term of admission will be considered for admission. California community college applicants must have a competitive GPA (based on the strength of the applicant pool) in UC-transferable courses. Highest priority for admission is given to upper-division transfer students from California community colleges, followed by upper-division transfer students from other UC campuses, upper-division California resident transfer students from other two-year or four-year institutions, and upper-division transfer students who are not residents of California.

At least 95 percent of UCSD's transfer students come from California community colleges. A California community college applicant is defined as follows: a student who was enrolled at one or more California community college campuses for at least two terms, excluding summer sessions; the last college attended before admission to UCSD was a California com-

munity college; and the student has completed 30 semester (45 quarter) UC-transferable units at one or more California community colleges.

Admission as a Freshman Applicant

MINIMUM REQUIREMENTS

To be eligible for admission to the university as a freshman you must meet the high school diploma requirement, the subject requirement, the scholarship requirement, and the examination requirement, which are described below.

HIGH SCHOOL DIPLOMA REQUIREMENT

You must earn a diploma from a high school in order to enter the university as a freshman. The Certificate of Proficiency, awarded by the California State Department of Education upon successful completion of the High School Proficiency Examination, proficiency tests from other states, and the General Education Development (GED) certificate, will be accepted in lieu of the regular high school diploma. Subject, scholarship, and examination requirements discussed below must also be met.

SUBJECT REQUIREMENT

A student applying for admission as a freshman to the University of California must have completed a minimum of fifteen units of high school work during grades nine through twelve. At least seven of the fifteen units must have been earned in courses taken during the last two years of high school. (A one-year course is equal to one unit; a one-semester course is equal to one-half unit.)

These units must have been earned in academic or college preparatory courses, as specified below. Lists of approved courses are compiled by the UC Office of the President for high schools in California. Lists are specific to each high school and are available through your high school's counseling office, and on Web site (<http://www.ucop.edu/a-gGuide/ag/a-g/welcome.html>). A detailed description of the "a-g" requirements can be found at <http://pathstat1.ucop.edu/ag/a-g>. Applicants from high schools outside California may find the following guidelines helpful in determining acceptability of courses.

Specific "a-g" Course Requirements

(a) HISTORY/SOCIAL SCIENCE

Two units (equivalent to two yearlong courses or four semesters) are required. Course-work must include:

World History, Cultures, and Geography—

One year, which can be met by a single integrated course or by two one-semester courses; and

U.S. History/American Government

(Civics)—One year of U.S. History, or one-half year of U.S. History combined with one-half year of American government (civics)

(b) ENGLISH

Four units (equivalent to four yearlong courses or eight semesters) of college preparatory composition and literature are required. **Both reading and writing components must be included in the courses.**

Reading—Acceptable courses must require extensive reading of a variety of literary genres, including classical and/or contemporary works. Reading assignments must include full-length works. Excerpts from anthologies, articles, etc., can be supplemental but cannot constitute the main component of reading assignments.

Writing—Courses must also require substantial, recurrent practice in writing extensive, structured papers. Student must demonstrate understanding of rhetorical, grammatical, and syntactical patterns, forms, and structures through responding to texts of varying lengths in unassisted writing assignments.

(c) MATHEMATICS

Three units (equivalent to three one-year courses) of college preparatory mathematics are required. Four units are strongly recommended.

Elementary Algebra

Geometry—Courses must include topics in two- and three-dimensional geometry.

Advanced Algebra

(d) LABORATORY SCIENCE

Two units (equivalent to two one-year courses) of laboratory science are required (three

units are strongly recommended) by a course that either

1. Covers the core concepts in one of the fundamental disciplines of biology, chemistry, or physics; or
2. Has as a prerequisite of biology, chemistry, or physics, and builds upon that knowledge. Such a course may include elements of another scientific discipline.

(e) LANGUAGE OTHER THAN ENGLISH

Two units (equivalent to two one-year courses) of coursework in a single language. Three units are recommended.

Minimum Performance Objectives—

Courses should emphasize speaking and understanding, and include instruction in grammar, vocabulary, reading, and composition. At this level, emphasis should not be on the ability to describe grammatical features of the language. The minimum performance objectives after two years of high school study should be the following:

- The ability to sustain a brief conversation on simple everyday topics demonstrating good use of the whole sound system (good pronunciation), and the basic structural patterns in the present, past, and future tenses, the subjunctive, and commands.
- Summarize orally and in writing, the main points of a relatively simple reading passage not involving specialized vocabulary

Classical languages (Latin, Greek) and American Sign Language (ASL) are acceptable to fulfill the (e) requirement.

(f) VISUAL AND PERFORMING ARTS (VPA)

One yearlong approved arts course from a single VPA discipline: dance, drama/theater, music, or visual art.

Intention—To provide a meaningful experience and breadth of knowledge of the arts. Approved VPA courses must be directed at acquiring concepts, knowledge, and skills in the arts disciplines.

Prerequisites—Acceptable courses need NOT have any prerequisite courses.

Co-Curricular Work—Work outside class must be required: for example, portfolio/

performance preparation, reading, writing, research projects, and/or critical listening/viewing.

Course Standards—Courses should provide students with an experience that implements the intent of the California State Board of Education approved Visual and Performing Arts (VPA) Content Standards. Each VPA course shall sufficiently address the state content standards under all five component strands:

1. Artistic Perception
2. Creative Expression
3. Historical and Cultural Context
4. Aesthetic Valuing
5. Connection, Relations, and Application

(g) COLLEGE PREPARATORY ELECTIVE COURSES

One unit (equivalent to two semester courses) is required. Course(s) can be taken in 9–12 grades but must fall within the following subject areas: visual and performing arts (non-introductory-level courses), history, social science, English, advanced mathematics, laboratory science, and language other than English.

Intent—To encourage prospective UC students to fill out their high school programs with courses that will meet one or more of a number of objectives:

- To strengthen general study skills, particularly analytical reading, expository writing, and oral communications;
- To provide an opportunity to begin work that could lead directly into a major at the university; and
- To experience new areas of academic disciplines that might form the basis for future major or minor studies at the university.

Quality—All courses are expected to meet standards of quality similar to those required for the “a–f” requirements.

Alternatives—Courses such as political science, economics, geography, humanities, psychology, sociology, anthropology, journalism, speech or debate, computer science, computer programming, and others may also qualify. In addition,

courses that are interdisciplinary, drawing knowledge from two or more of these fields, are also acceptable. Approved alternative courses must provide academically challenging study at the same level as advanced courses in the "a-f" subject matter fields. These elective courses must be at the eleventh or twelfth grade level, have appropriate prerequisites, and present material at a sufficient depth to allow students to achieve mastery of fundamental knowledge that prepares them for university work or a future career path.

Courses Satisfying the "g" Requirement

History: Courses should enable students to establish a breadth of understanding of history and should provide an understanding of the human past, including its relation to the present. Courses should develop a student's ability to think critically, to evaluate historical data, and to analyze and synthesize evidence. All history courses should require extensive reading and writing.

Social Science: Courses should be in one of the social sciences: anthropology, economics, geography, political science, psychology, or sociology. Courses could also be interdisciplinary in nature, drawing knowledge from two or more of these fields. Course objectives should include as many of the following as are applicable to the field: (1) an understanding of the development and basic features of major societies and cultures, (2) an examination of the historic and contemporary ideas that have shaped our world, (3) an understanding of the fundamentals of how differing political and economic systems function, (4) an examination of the nature and principles of individual and group behavior, and (5) a study of social science methodologies. A social science course must include a body of basic knowledge, extensive reading, and written and oral exposition. Courses that are designed to meet state-mandated social studies graduation requirements are acceptable provided that they meet the above criteria. Courses with applied, service, or career-related content are acceptable only if those components are used to augment the strong academic content of the course.

English: Courses should require substantial reading with frequent and extensive practice in writing that is carefully evaluated and criticized, as noted in the "b" English requirement (above).

Courses in journalism, speech, debate, creative writing, or advanced-level ESL are acceptable electives if they meet the general requirements in reading and writing stated above.

Advanced Mathematics: Courses with second-year algebra as a prerequisite such as trigonometry, linear algebra, pre-calculus (analytic geometry and mathematical analysis), calculus, probability, and statistics are acceptable. A computer science course is acceptable if it fulfills the following objectives: (1) enables students to express algorithms in a standard language; (2) requires students to complete substantial programming projects; and (3) involves the study and mastery of various aspects of computer science (e.g., how computers deal with data and instructions, the internal components of a computer, and the underlying computer logic).

Laboratory Science: Acceptable courses should cover topics from the biological or physical sciences and include laboratory activities. A terminal course designed only to meet graduation requirements is not acceptable.

Language Other Than English: Elective courses in the same language used to satisfy the "e" requirement must have at least two years of the language as a prerequisite. In order for a second language other than English to qualify as an elective, at least two years of this language must be completed.

Visual and Performing Arts (VPA): Advanced courses in the Visual and Performing Arts can meet the "g - Elective" requirement, but must still address the five components of the state VPA standards. Advanced courses should enable students to understand and appreciate artistic expression and, where appropriate, to talk and write with discrimination about the artistic material studied. Courses devoted to artistic performance and developing creative artistic ability, should have prerequisites (either one year of introductory coursework or experience approved by the instructor) and should assume proficiency beyond the introductory level. Courses must require on the average the equivalent of a five-period class per week. Work outside of the class must be required (e.g., portfolio/performance preparation, reading, writing, research projects, and critical listening/viewing).

HONORS LEVEL COURSES

The University of California encourages students to take demanding advanced academic

courses in all fields. Accordingly, the grades in up to four units of eleventh and twelfth grade honors courses will be counted on a scale A=5, B=4, C=3, if these courses are certified by the high school and the University of California as offered at an honors level. Honors credit will also be given for up to two of these four units taken in tenth grade. Grades lower than C do not earn honors credit.

EXAMINATION REQUIREMENT

Freshman applicants must submit the following test scores:

- The ACT Assessment plus Writing or the SAT Reasoning Test. The verbal, mathematics, and writing scores on the SAT must be from the same sitting. Students who take the ACT must report each test score and the composite score.
- Two SAT Subject Tests in two different areas, chosen from the following: history literature, mathematics (Level 2 only), science, or language other than English.

Students applying for admission to the fall term must take these tests no later than December of their senior year, preferably earlier, to ensure that their application receives prompt and full consideration.

Note: Freshman applicants who have graduated from high school in spring 2005 or earlier are required to have taken the SAT I (or ACT) and three SAT II: Subject Tests prior to high school graduation.

If tests are repeated, the university will accept the highest score received. See your counselor for information and registration forms or write to the College Board ATP, P.O. Box 6200, Princeton, New Jersey 08541-6200; Web site: www.collegeboard.org. For ACT information, write to the ACT Registration Unit, P.O. Box 168, Iowa City, Iowa 52240; Web site: www.act.org.

WRITING REQUIREMENT

As a UC undergraduate, you must demonstrate proficiency in writing. Admitted students who do not meet the Entry Level Writing requirement (previously known as the Subject A requirement) prior to April 1 are required to achieve a passing score on the UC Analytical Writing Placement Examination (previously known as the Subject A Examination). Notice of this exam will be sent to all admitted students from the Educational Testing Service. There will be a \$65 fee.

Freshman Eligibility

CALIFORNIA RESIDENTS (MINIMUM REQUIREMENTS)

(Refer also to "Admission as a Freshman Applicant.")

Please be advised that these are minimum eligibility requirements. The San Diego campus has been unable to accommodate all minimally eligible applicants. You must exceed these requirements in order to be considered for admission. See "UCSD Admission Policy and Selection Criteria."

Eligibility Index: You must earn the required combination of GPA and college admission test scores as specified in the university's Eligibility Index. Beginning with the fall 2007 term, California applicants must earn at least a 3.0 (3.4 for nonresidents) in their "a-g" courses to meet the scholarship requirement.

Because of recent changes to the ACT and SAT tests, the index is being revised and was unavailable at press time. The new index, along with an online calculator you can use to assess your eligibility, will be available at www.universityofcalifornia.edu/admissions/scholarshipreq in late spring 2006.

NON-CALIFORNIA RESIDENTS (MINIMUM REQUIREMENTS)

(Refer also to "Admission as a Freshman Applicant" and "Freshman Eligibility: California Residents.")

Please be advised that these are minimum eligibility requirements. The San Diego campus has been unable to accommodate all minimally eligible applicants. You must exceed these requirements in order to be considered for admission. See "UCSD Admission Policy and Selection Criteria."

Scholarship: An applicant who is not a resident of California is eligible to be considered for admission to the university with a grade-point average of 3.40 or better, calculated on the required high school subjects and achieve a correlating test score indicated in the Eligibility Index (below) for Nonresidents. These subjects, referred to as "a through g," are the same for the nonresident as for the resident.

High school Advanced Placement courses and UC-transferable college courses are considered honors courses for admission purposes for non-California resident applicants. **Please note:** College entrance exams are also required of non-California residents.

Additional Preparation for University Work: Freshman Applicants

High school courses required for admission to the university are listed at the beginning of this section. This list is not intended to constitute an outline for a valid high school program. The courses listed were chosen for their value as predictors of success in the university. These required courses add up to fifteen "Carnegie" units, while graduation from high school requires from fifteen to nineteen. Courses beyond our requirements should be chosen to broaden your experience, and should fit in with your personal plans for the future.

For example, besides taking courses in chemistry, physics and biology, a science major will find more than three years of mathematics essential. A science major without a working knowledge of trigonometry and at least intermediate algebra is likely to be delayed in getting a degree. If you have an interest in languages or plan a college program with a language other than English requirement, you should have completed more than the two years of language other than English needed for admission.

The "a through g" requirements for admission are minimum entrance standards. Completing the required high school courses with satisfactory grades will not automatically prepare you for freshman work in every subject, much less in your major or program of study. Many entering students discover that they are not adequately prepared for basic courses, such as English composition and calculus, which they are expected to take in their freshman year. Also, many undergraduate majors, particularly those in sciences and mathematics, require more high school preparation than that necessary for admission.

For these reasons, you are advised to take courses that will prepare you beyond minimum levels of competence in reading, writing, and mathematics. A student who is well prepared for university work will have taken four years of English in high school, four years of mathematics, two to three years of language other than English, three years of laboratory science, two or more years of history/social science, and one or more years of visual and performing arts.

Reading: Freshman-level university work demands a great amount, and high level, of reading. Proficiency in reading and understanding techni-

cal materials and scholarly works is necessary. Learn to read analytically and critically, actively questioning yourself about the author's intentions, viewpoint, arguments, and conclusions. Become familiar and comfortable with the conventions of standard written English and with various writing strategies and techniques. Your reading experience should include original works in their entirety (not just textbooks and anthologies) that encompass a wide variety of forms and topics.

Writing: Prospective students must learn to write clearly and skillfully. You will be expected to write papers for English and many other university classes, and many exams will include essays. You will have to think critically and analyze what you learn in class and in outside reading, and present your ideas in a clear and persuasive manner. By university standards, a student who is proficient in English composition is able to: (a) understand the assigned topic; (b) select and develop a theme by argument and example; (c) choose words which clearly and precisely convey the intended meaning; (d) construct effective sentences; (e) demonstrate an understanding of the rules of standard written English; and (f) punctuate, capitalize, and spell correctly.

If you plan to attend the university, it is imperative that you take English courses in high school that require the development and practice of these skills. You must take at least four years of English composition and literature that stress expository writing: the development of persuasive critical thinking on the written page.

Mathematics: Many fields require preparation in mathematics beyond that necessary for admission to the university. Courses in calculus are included in all majors in engineering and the physical, mathematical, and life sciences, as well as in programs leading to professional degrees in fields such as medicine, dentistry, optometry, and pharmacy. Moreover, many majors in the social sciences, business, and agriculture require statistics or calculus, and sometimes both.

Most students take calculus or statistics, if required, during the freshman year. The university strongly recommends that students take four years of mathematics in high school, including pre-calculus in the senior year. Courses in mathematics should include basic operations with numerical and algebraic functions; operations with exponents and radicals; linear equations and inequalities; polynomials and polynomial equa-

tions; functions and their graphs; trigonometry, logarithms, and exponential functions, and applications and word problems.

Students who are not prepared to take calculus or statistics during the freshman year will have to take one or more preparatory mathematics classes at the university. This could affect their success in other courses and delay their entire undergraduate program.

Laboratory Science: The university requires two years of laboratory science in high school, but many majors require additional science courses. Programs in the biological sciences and some natural resource fields require high school biology, chemistry, and physics. Programs in the physical sciences, mathematics, engineering, agriculture, and the health sciences require chemistry and physics, and recommend biology.

College Credit: Freshman Applicants

There are many steps you can take to earn credit which will be applicable to your graduation from college. Some of these steps may be taken even before you graduate from high school. Among them are the following:

College Courses

Many high schools have arrangements with nearby postsecondary institutions, allowing you to take regular courses while you are still in high school. Many of these courses are accepted by the university exactly as they would be if you were a full-time college student if courses are posted for credit on the college transcript.

No matter how many college units you earn before graduating from high school, you will still apply as a freshman.

College Board Advanced Placement

The university grants credit for all College Board Advanced Placement Tests on which a student scores 3 or higher. The credit may be subject credit, graduation credit, or credit toward general-education or breadth requirements. Students who enter the university with AP credit do not have to declare a major earlier than other students, nor are they required to graduate earlier.

Students are encouraged to take AP tests when appropriate. Counselors should advise a student who is fluent in a language other than English to gain AP credit. AP test scores will not adversely affect a student's chances for admission.

The university grants credit for Advanced Placement tests as described in the AP chart in this catalog. Credit is expressed in quarter-units.

The chart also details requirements met by AP tests by college. Even if subject credit or credit toward specific requirements is not mentioned in the college lists, students receive university credit as described in the chart for all AP tests on which they score 3 or higher. If a student is exempt from a particular course at UCSD, duplication of this course does not earn academic credit.

Admission as a Transfer Applicant

UCSD welcomes transfer students. The campus' Transfer Student Services provides admissions counseling and a variety of programs and services for prospective transfer students. The university defines a transfer applicant as a high school graduate who has been a registered student in another accredited college or university or in college-level extension classes other than a summer session immediately following high school graduation. A transfer applicant may not disregard his or her college record and apply for admission as a new freshman.

Each year UCSD receives more applications from eligible transfer students than the campus can accommodate. In addition to satisfying UC minimum requirements, only transfer students who have completed ninety or more transferable quarter-units by the end of spring term are considered for admission. Priority is given to students transferring from California community colleges. See "Advanced-Standing Selection."

UCSD admits transfer applicants at the junior level only. To be competitive, applicants need to present an academic profile stronger than that represented by the minimum UC admissions requirements, and they should complete preparation for their intended field of study.

IMPACTED MAJORS

It sometimes becomes necessary to limit enrollment in certain majors. When this occurs the affected majors will be listed in the *General Catalog* as soon as possible. When the catalog does not reflect these conditions, newly admitted students will be notified of them in the university's admissions letter. Currently, the following majors are considered impacted for transfer applicants: bioengineering and bioengineering: biotechnol-

ogy; computer science, and computer engineering (within the computer science and engineering department); computer engineering (within the electrical and computer engineering department). Transfer students interested in applying to any of the above majors must select an alternate major on the UC application. Qualified applicants not admitted directly to the major will be admitted to their alternate major, provided it is not impacted.

POST-SCREENING OF ELECTRICAL ENGINEERING MAJORS

Effective fall 2006 the electrical engineering major within the Department of Electrical and Computer (ECE) Engineering is no longer considered an impacted major. Entering freshmen and transfer students who have indicated the desire to major in electrical engineering will be admitted directly to the major. Continuing UCSD students who wish to transfer into the electrical engineering major will be evaluated under the rules that are in effect for the year in which they enter the major. Effective fall 2006, to remain in good standing as an electrical engineering major, a student must complete a minimum of eight progress review courses with a C- or better during his or her first five quarters for freshmen or during the first three quarters for continuing UCSD and transfer students. The average GPA from any six of the progress review courses, including at least two from electrical engineering progress review courses, must exceed 2.50.

The Required Review of Student Progress for Electrical Engineering majors is explained in greater detail under the Department of Electrical and Computer Engineering (ECE) section of this catalog.

PRE-MAJORS

The following majors admit transfer students to pre-major status only: bioengineering: premedical, engineering physics, human development, ICAM-music, ICAM-visual arts, literature/writing, math-computer science, visual arts-media (computing emphasis).

As a pre-major, you must satisfy all prerequisites before admission to the major. The set of conditions, determined on a department-by-department basis, and approved by the San Diego Committee on Educational Policy, is explained in detail under the department listing in this catalog.

Other departments may be approved to offer pre-majors by the Committee in Educational

Policy subsequent to this publication. Please refer to "Major Fields of Study" in the introduction to the catalog.

Transfer Eligibility

CALIFORNIA RESIDENTS (MINIMUM UC REQUIREMENTS)

As a transfer applicant you must meet one of the requirements described below to be considered for admission to the university. Admission to UCSD is very competitive. You must exceed the minimum UC admission requirements.

1. If you were eligible for admission to UC when you graduated from high school—meaning you satisfied the subject, scholarship, and examination requirements, or were identified by the university during your senior year in high school as eligible under the Eligibility in the Local Context (ELC) program—you are eligible to transfer if you have a C (2.0) average in your transferable course work.
2. If you met the scholarship requirements but did not satisfy the subject requirement, you must take transferable college courses in the missing subjects, earning a C or better in each required course, and have an overall C average in all transferable course work to be eligible to transfer.
3. If you were not eligible for admission to UC when you graduated from high school because you did not meet the scholarship requirements, you must have:
 - a. Completed ninety quarter-units (sixty semester-units) of UC *transferable* college credit with a grade point average of at least 2.4, *and*;
 - b. Completed a course pattern requirement, earning a grade of C or better in each course, to include:
 - two UC transferable college courses (three semester- or four to five quarter-units each) in English composition, *and*;
 - one UC transferable college course (three semester- or four to five quarter-units each) in mathematical concepts and quantitative reasoning, *and*;
 - four UC transferable college courses (three semester- or four to five quarter-units each) chosen from at least two of the following subject areas: the arts and humanities, the social and

behavioral sciences, the physical and biological sciences.

Students who satisfy the Intersegmental General-Education Transfer Curriculum (see page 49) prior to transferring to UC may satisfy Option 3b above of the transfer admission requirements.

Transfer Eligibility

NON-CALIFORNIA RESIDENTS (MINIMUM UC REQUIREMENTS)

The minimum admission requirements for nonresident transfer applicants are the same as those for residents, except that nonresidents must have a grade-point average of 2.8 or higher in all UC transferable college course work.

Transfer Eligibility

SECOND BACCALAUREATE/LIMITED STATUS APPLICANTS

For the past several years, UCSD has not accepted applications from students who have earned a four-year degree. Please check with the Office of Admissions and Relations with Schools for information on whether applications for second baccalaureate or limited status are being accepted.

If there is a policy change, applications received by the admissions office from non-degree seeking students, or those who have earned a four-year degree, will be reviewed by the college provost's office. Limited status (non-degree-seeking) applicants and those seeking a second B.A. or B.S. will be held to the same restrictions as are other newly admitted students; fields that have restrictions for admission (such as engineering) will also be restricted to these applicants. Students will be screened according to the amount of space available in the college. Admissions will be on an individual basis, and there is no guarantee of admission to the undergraduate college or to a particular major. Applicants seeking a second B.A. or B.S. degree will be given consideration on a space-available basis with a lower priority than all other admitted students. Applicants for a second B.A. or B.S. will have **limited status** until such time as they have met the prerequisites to the major, filed a program approved by the major department and had their proposed program

reviewed and approved or disapproved by the college. Limited status students are not awarded on-campus housing.

Limited status students will be eligible to apply for a Guaranteed Student Loan if they have not exceeded the duration limit of eighteen quarters of postsecondary attendance. Academic transcripts will be required from all institutions attended prior to the Financial Aid Office's certifying of the application.

Determining Your Grade-Point Average

Your grade-point average for admission purposes is determined by dividing the total number of acceptable units you have attempted into the number of grade points you earned on those units. You may repeat courses that you completed with a grade lower than C (2.0).

The scholarship standard is expressed by a system of grade points and grade-point averages earned in courses accepted by the university for advanced-standing credit. Grade points are assigned as follows: for each unit of A, four points; B, three points; C, two points; D, one point; and F, no points.

Credit from Another College

The university gives unit credit to transfer students for courses they have taken at other accredited colleges and universities, including some extension courses. To be accepted for credit, the courses must be consistent with those offered at the university, as determined by the Office of Admissions and Relations with Schools. Applications from students who have more than 135 quarter-units (ninety semester-units) of transfer credit and meet selection criteria are considered to have excess units (senior standing). Applicants in this category may be reviewed for admission if space permits.

Many students who plan to earn a degree at the university find it to their advantage to complete their freshman and sophomore years at a California community college. Each community college offers a full program of courses approved for transfer credit. The university will award *graduation credit* for up to seventy semester- (105 quarter-) units of transferable course work from a community college. Courses in excess of seventy semester-units will receive *subject credit* and may be used to satisfy university subject requirements.

The transferability of units from California community colleges and all other postsecondary institutions is as follows: (1) the UC Office of the President determines unit transfer policies which are binding upon, and implemented by, each campus' admissions office; (2) applicability of transferred units to breadth (general-education) requirements is determined for each UCSD college by its provost (see also "Transfer Agreements" below); (3) applicability of units toward the major is determined by the appropriate UCSD academic department. Before applying to UCSD you may obtain more information on many of these matters from the Office of Admissions and Relations with Schools.

Applicants who have completed courses at a postsecondary institution outside the U.S. should have these records sent to the Office of Admissions and Relations with Schools as soon as possible. Advanced standing credit for appropriate courses will be decided on an individual basis.

Note: The University of California does not give credit for CLEP examinations.

University of California/UCSD Transfer Agreements and Preparation Programs

UCSD **strongly recommends** that transfer students complete lower-division breadth and general-education (B/GE) requirements prior to transfer. Transfer students are also strongly advised to complete all lower-division preparation for the major prior to enrollment.

The University of California, San Diego has established five transfer agreements and preparation programs. These agreements and programs, Transfer Admission Guarantee (TAG), UniversityLink, UC Transfer Reciprocity, Intersegmental General-Education Transfer Curriculum Agreement, and Articulation, allow students to fulfill all or most lower-division B/GE requirements prior to transfer.

Transfer students may fulfill their lower-division B/GE requirements with any of these agreements or programs, or they may fulfill them at UCSD. Completion of IGETC or UC Reciprocity agreements will satisfy the lower-division requirements of Earl Warren, Thurgood Marshall, Sixth, or John Muir College only. Students who follow IGETC or UC Reciprocity are welcome to apply to Eleanor Roosevelt or Revelle College. Courses completed prior to transfer will be applied

toward the college's own lower-division requirements. Revelle students must also complete the remainder of the college's requirements. Students at Eleanor Roosevelt College must complete three academic quarters of the "Making of the Modern World" sequence in addition to the IGETC or UC Reciprocity requirements. They must also complete any of the college's general education requirements which can be met by transfer coursework. The college will make every effort to apply as much transfer coursework as possible. Transfer applicants should refer to the catalog pages for individual departments' specific courses for GPA requirements.

Transfer Admission Guarantee (TAG)

UCSD has established a Transfer Admission Guarantee (TAG) program with thirty-three California community colleges. Completing the provisions of the TAG contract will guarantee admission to the term and UCSD college of choice, but not the major. Prospective students completing the provisions of the TAG contract will be guaranteed admission to UCSD and to the college of choice, but not necessarily to an impacted major. Please refer to the catalog pages of individual departments for any specific courses or GPA requirements that may exist for transfer students hoping to be admitted to an impacted major. A list of impacted majors is on page 00 of the catalog. TAG also allows students to fulfill all or most lower-division B/GE requirements prior to transfer. TAG contracts must be signed and submitted by deadlines for specific terms. TAG community college counselors can give you information regarding this program.

Participating TAG colleges are: American River, City College of San Francisco, College of San Mateo, Cosumnes, Cuyamaca, DeAnza, Diablo Valley, El Camino, Folsom Lake, Foothill, Fullerton, Glendale, Grossmont, Imperial Valley, Irvine Valley, Los Angeles Pierce, Mira Costa, Moorpark, Mount San Antonio, Orange Coast, Palomar, Pasadena City, Sacramento City, Saddleback, San Diego City, San Diego Mesa, San Diego Miramar, Santa Barbara City, Santa Monica, Santa Rosa, Sierra, Southwestern, and West Valley.

UniversityLink

UniversityLink provides guaranteed admission to high school seniors who sign an agree-

ment and successfully complete academic and program requirements at a participating community college. UniversityLink partnerships are currently established with the following colleges: Cuyamaca, East Los Angeles, Grossmont, Imperial Valley, Mira Costa, Palomar, San Diego City, San Diego Mesa, San Diego Miramar, and Southwestern.

Transfer Preparation Programs

The following avenues do not guarantee admission. However, they do allow you to fulfill your lower-division general-education requirements at the community college or other UC campus:

UC Transfer Reciprocity Agreement

Transfers who have attended any campus of the University of California and satisfied lower-division breadth and general-education (B/GE) requirements at that campus prior to transfer may consider these requirements satisfied for John Muir, Thurgood Marshall, Sixth, or Earl Warren college only. Students who follow UC Reciprocity are welcome to apply to Eleanor Roosevelt or Revelle college. Courses completed prior to transfer will be applied toward the college's own lower-division requirements. Revelle students must also complete the remainder of the college's requirements. Students at Eleanor Roosevelt College must complete three academic quarters of the "Making of the Modern World" sequence in addition to the UC Reciprocity requirements. They must also complete any of the college's general education requirements which can be met by transfer coursework. The college will make every effort to apply as much transfer coursework as possible.

Transfers in this category should obtain a "certificate of completion of GE requirements" from the campus at which these requirements were satisfied. This can be in the form of a letter or memo addressed to your UCSD undergraduate college academic advising office.

Intersegmental General-Education Transfer Curriculum Agreement

Transfers from California community colleges can fulfill the UC lower-division breadth and general-education (B/GE) requirements by completing the Intersegmental General-Education Transfer Curriculum (IGETC). Completion of IGETC will satisfy the lower-division B/GE requirements at

UCSD for Earl Warren, Thurgood Marshall, Sixth, or John Muir college only. Students who follow IGETC are welcome to apply to Eleanor Roosevelt or Revelle college. Courses completed prior to transfer will be applied toward the college's own lower-division requirements. Revelle students must also complete the remainder of the college's requirements. Students at Eleanor Roosevelt College must complete three academic quarters of the "Making of the Modern World" sequence in addition to the IGETC requirements. They must also complete any of the college's general education requirements which can be met by transfer coursework. The college will make every effort to apply as much transfer coursework as possible.

Transfers should obtain the "IGETC Certification" from their community college and submit it to the Office of Admissions and Relations with Schools. Students are encouraged to provide this certification prior to the start of classes at UCSD.

Articulation

UCSD has Articulation Agreements for general education breadth requirements with forty-four California community colleges, and major preparatory agreements for certain majors with a number of California community colleges. These agreements can be found on the ASSIST Web site (<http://www.assist.org>), which includes statewide transfer information.

International Applicants

International applicants must meet highly rigorous selection criteria for admission.

Courses at UCSD are conducted in English, and every student must have sufficient command of that language to benefit from instruction. To demonstrate such command, students whose native language is not English will be expected to take the Test of English as a Foreign Language (TOEFL). Arrangements for taking this test may be made by writing to the Educational Testing Service, TOEFL Registration Office, P.O. Box 6151, Princeton, New Jersey 08541-6151, U.S.A. Online information is available at <http://www.toefl.org>. The minimum acceptable TOEFL score is 220 (computer-based exam) or 550 (paper-based exam).

In lieu of the TOEFL, a score of 7 (academic module) on the International English Language

Testing System (IELTS) will also be accepted. Information is available at <http://www.ielts.org>.

The results of this test will be used to determine whether the applicant's command of English is sufficient to enable him or her to pursue studies effectively at UCSD. International students whose command of English is slightly deficient will be required to take an English course and, therefore, a reduced academic program.

In addition to an adequate English-language background, international students must have sufficient funds available to cover all fees; living, and other expenses; and transportation connected with their stay in the United States (see "Fees and Expenses").

International students are required to obtain health insurance for themselves and dependents who accompany them. Suitable insurance policies and additional information are available at the Student Health Service and at the International Center.

Address all communications concerning undergraduate admission of international students to the University of California, San Diego, Office of Admissions and Relations with Schools, Student Affairs, 9500 Gilman Drive, Dept. 0021, University of California, San Diego, La Jolla, California 92093-0021, email: admissionsinfo@ucsd.edu.

How to Apply for Admission

Undergraduate admissions applications are available online in the fall at the UC Pathways Web site (<http://www.universityofcalifornia.edu/apply>). Follow the accompanying directions carefully. If you choose to print and mail your application, please send it to:

University of California,
Undergraduate Application Processing Center
P.O. Box 4010
Concord, CA 94524-4010

You may apply to as many as eight campuses of the University of California on one application form.

Application Fees

The basic application fee of \$60 entitles you to be considered at one campus of the university. For each additional campus you select, you must pay an extra \$60 fee. These fees are not refundable. International nonimmigrant applicants pay a \$70 application fee for each campus selected.

When to Apply for Admission

To make sure that you will be considered for admission to the university campus(es) you want to attend, and to the major or program of study you want to pursue, you must submit your completed application during the Priority Filing Period (see below).

If you plan to apply for financial aid, university housing, or other special programs where early application is important, you must also file during this time.

Priority Filing Period

Fall Quarter 2007:

File November 1-30, 2006

Winter Quarter 2008:

File July 1-31, 2007

Spring Quarter 2008:

File October 1-31, 2007

Note: UCSD accepts winter and spring applications from Transfer Admission Guarantee (TAG) students only.

Adding a Campus

If you decide to apply to additional UC campuses after you submit your application, submit your request *in writing* to the processing service before the filing deadline. Be sure to note your application ID number, additional campus(es) to which you wish to apply, major(s), major code(s), and a check or money order for \$60 for each additional campus you select, payable in U.S. dollars to the "Regents of the University of California." International nonimmigrant applicants pay a \$70 application fee for each campus selected. You may not substitute new campus choices for your original choices. Your request will be honored only if the campus(es) you choose still has space available. The processing service will notify you as to whether your application was accepted. Do not submit a second application form; it will not be processed.

Selecting Campuses and Programs of Study

You are encouraged to approach the selection of a university campus and a program of study very carefully. You may be familiar with only one or two of the university's general campuses, probably those nearest to your home or mentioned

more frequently in the news. You should seriously consider the many different educational alternatives and programs offered by other campuses of the university before completing your application. Your counselor and the university staff in the Office of Admissions and Relations with Schools can provide you with insights that will help you in the selection process.

College Choice

The application to UCSD must include a choice of undergraduate college (Eleanor Roosevelt, Thurgood Marshall, Earl Warren, Revelle, John Muir, or Sixth) before it can be processed. Selecting alternative UCSD college choices is also advisable since each college has enrollment quotas that limit the number of new freshmen and transfer students. The Office of Admissions and Relations with Schools will select an alternate college if an alternate choice is not indicated.

Transcripts

If you are admitted for the fall term, you must arrange to have final, official transcripts sent to the Admissions Office no later than July 15. If you attended school outside the United States, see the information in the box below.

Freshman Applicants: If you are admitted you must arrange to have an official, final high school transcript (showing your date of graduation) sent to the campus where you plan to enroll. *Unless a campus requests it, do not send a sixth or seventh semester transcript.*

Transfer Applicants: If you are admitted, you will be asked to submit official transcripts from all schools and colleges you have attended, *including high school*, regardless of your length of attendance or whether you believe the credit is transferable. Some campuses may request transcripts prior to admission.

Transcript Information for Applicants Who Have Attended School Outside the United States

The Admissions Office may make a preliminary evaluation of your application based on the information you provide on your application. However, if you are admitted, the university must receive an official academic record directly from each institution you attended, beginning with

grade nine, and up to, and including, the school or college/university you currently attend.

Each academic record must list the dates you attended the institution, the titles of courses and examinations you completed, the grades (marks) you received, the credit, hours or units earned, and any degree or diploma you may have received. In the United States, the academic record is called a "transcript." It may be called by another name—such as leaving certificate, maturity certificate, bachillerato, or baccalauréat—in your country.

Because it may take some time for schools outside the U.S. to forward your records to the university, you are encouraged to send a legible photocopy of your official foreign academic records directly to the Admissions Office at each campus to which you apply. (Do not attach to your application for admission.)

The university recognizes that it may be difficult to obtain foreign records in the event of political upheaval or natural disaster; however, these situations are rare. Failure to provide official records may jeopardize your enrollment at the university.

The transcripts and other documents that you submit as part of your application become the property of the university; they cannot be returned to you or forwarded in any form to another college or university.

Checklist for Applicants

1. File an application on the University of California's Pathways Web site (<http://www.universityofcalifornia.edu/apply>) during the November filing period. Fee may be paid by credit card, or you may ask the UC application processing services to bill you by mail.
2. You must select UCSD colleges in order of preference. Be sure to sign the form.
3. Complete your personal statement.
4. Fill in the self-reported academic data and test information carefully and accurately.
5. Take the ACT Assessment plus Writing or the SAT Reasoning Test, and SAT Subject Tests (in two different areas) if you are a freshman applicant **no later than December of your senior year**. Refer to the Examination Requirement section on page 38 for full details.
6. Request that your school(s) send transcripts and other required documents directly to:

Office of Admissions and Relations
with Schools
Student Affairs
UCSD
9500 Gilman Drive, 0021
La Jolla, CA 92093-0021

Final high school transcripts, and all college transcripts for transfer students, must be on file in the UCSD Office of Admissions and Relations with Schools by July 15.

Notification of Admission

Admission—Freshmen

If you are a freshman applicant and you filed during the priority filing period, UCSD will notify you whether you have been admitted beginning mid-March and no later than March 31. All offers of admission are provisional until the receipt and verification of your test results and official final high school transcript (and college transcript, if applicable). If you are offered admission based on your self-reported academic record, official documents will be used to verify the self-reported academic data you submit. Offers of admission will be rescinded if: a) there are discrepancies between your official transcripts and your self-reported academic record; b) you do not complete the courses listed as "in progress" or "planned"; or c) you do not complete your twelfth-grade courses at the same academic level as in previous course work.

Admission—Transfer

If you are applying to transfer, UCSD will send you notification between mid-March and May 1. All offers of admission are provisional until the receipt and verification of all official transcripts. If you are offered admission based on your self-reported academic record, your official high school transcript and transcripts from all colleges attended will be used to verify the self-reported academic data you submit. Offers of admission will be rescinded if: a) there are discrepancies between your official transcripts and your self-reported academic record; b) any college or school attended is omitted from your application; c) you do not complete the courses listed as "in progress" or "planned;" or d) the specified GPA is not maintained for courses "in progress" or "planned."

Advanced Placement Credit:

EXAM AND UNITS FOR UNIVERSITY CREDIT	UCSD COURSE EXEMPTIONS (OR USE ON MAJOR)	REVELLE COLLEGE	MUIR COLLEGE
Art (Studio) • Drawing Portfolio..... 8 • 2D Portfolio..... 8 • 3D Portfolio..... 8 (8-unit maximum for all tests)	None	Fulfills fine arts requirement and 1 course of the noncontiguous area of focus or may meet 2 courses of the noncontiguous area of focus.	8 units of elective credit.
Art-History..... 8	None	Fulfills fine arts requirement and one course of the noncontiguous area of focus or may meet 2 courses of the noncontiguous area of focus.	8 units of elective credit.
Biology..... 8	Score of 4 or 5 = BILD 1 and 2 Score of 3 = Biol. 10; may take Biol. 1, 2, 3 for credit.	Score of 3, 4, or 5 meets Revelle biology requirement.	Score of 3 exempts BILD 10. Score of 4 or 5 exempts BILD 1 and 2.
Chemistry..... 8	Score of 3 = exempt Chem. 4 or 11. Score of 4 = exempt Chem. 4, 11 or 6A; may take Chem. 6AH,6BH,6CH for credit Score of 5 = exempt Chem. 6A-B-C or Chem. 11; may take Chem. 6BH,6CH for credit	Partial completion of natural science requirement.	Score of 3 exempts Chem. II. Score of 4 exempts Chem II or 6A. (May take 6AH, 6BH, and 6CH for credit.) Score of 5 exempts Chem. II or 6A-B-C. (May take 6BH and 6CH for credit.)
Computer Science • A (Java Programming)..... 2 • AB (Java Programming, and Data Structures and Object-Oriented Programming)..... 4 (4-unit maximum for both tests)	Score of 4 on A = exempt CSE 8A and 8AL; Student should take CSE 11 Score of 5 on A = exempt CSE 11 Score of 4 or 5 on AB = exempt CSE 11 Score of 5 on AB = exempt CSE 12 with departmental approval	Partial completion of noncontiguous area of focus.	2-4 units elective credit.
Economics • Microeconomics..... 4 • Macroeconomics..... 4	Score of 5 AP Micro = Econ. 1. Score of 5 AP Macro = Econ. 3. Score of 3, or 4 = elective units.	Each score of 3, 4, or 5 exempts student 1 course on social science requirement.	Score of 3, 4 clears 4 units of elective credit. Score of 5 exempts Econ. 1. Score of 3, 4 clears 4 units of elective credit. Score of 5 exempts Econ. 3.
English • Composition and Literature..... 8 • Language and Composition..... 8 (8-unit maximum for both tests)	Score of 3, 4, or 5 meets Entry Level Writing requirement.	2 courses of the noncontiguous area of focus or 8 units of elective credit.	8 units of elective credit and clears Entry Level Writing requirement. (8 units maximum for both tests)
Environmental Science..... 4	Score of 4 or 5 = exempt Earth Science 10	Elective units or may meet 1 course of noncontiguous area of focus.	Score of 4 or 5 exempts Earth Science 10.
Geography, Human..... 4	None	4 units of elective credit or may meet 1 course of noncontiguous area of focus.	4 units of elective credit.
Government and Politics • United States..... 4	Score of 3, 4, or 5 satisfies American History and Institutions. Score of 5 = exempt Poli. Sci. 10.	1 course toward social science requirement or 1 course of noncontiguous area of focus.	Score of 5 exempts Poli. Sci. 10.
Government and Politics • Comparative..... 4	Score of 5 = exempt Poli. Sci. 11.	1 course toward social science requirement or 1 course of noncontiguous area of focus.	Score of 5 exempts Poli. Sci. 11.
History • United States..... 8	Score of 3, 4, or 5 = exempt 2 quarters U.S. History: May take HILD 2A, 2B or 2C to complete sequence. Satisfies American History and Institutions.	2 courses toward social science requirement or 2 courses of noncontiguous area of focus.	Score of 3, 4, 5 exempts 2 courses in HILD 2A-B-C sequence.
History • European..... 8	None	2 courses of the noncontiguous area of focus.	Score of 3, 4, 5 exempts 2 courses of European history 3rd course by petition.
History • World..... 8	None	2 courses of the noncontiguous area of focus.	Score of 3, 4, 5 exempts 2 courses of non-Western history 3rd course by petition.
Language • French..... 8 • German..... 8 • Spanish..... 8	Score of 3 = exempt Ling. 1C/1CX. Score of 4 = exempt Ling. 1D/1DX or Lit. 2A. Score of 5 = exempt Lit. 2B.	Score of 4 or 5 meets proficiency requirement.	Score of 3 exempts LING 1B/BX and 1C/CX. Score of 4 exempts LING 1D/DX and Lit. 2A. Score of 5 exempts Lit. 2A-B. Determines placement in language sequence if student chooses that option. Same as use on major.
Latin • Latin: Virgil..... 4 • Latin: Literature..... 4	Score of 3, 4, or 5 = exempt Latin 1, 2, 3.	Usually prepares student to pass proficiency exam; 2 courses of the noncontiguous area of focus or may be used as 8 units of elective credit.	Score of 3, 4, or 5 exempts Latin 1, 2, 3.
Literature • French..... 8 • Spanish..... 8	Score of 3 = exempt Ling. 1D/1DX or Lit. 2A. Score of 4 = exempt Lit. 2B. Score of 5 = exempt Span. Lit. 2C or French Lit. 50.	Score of 3, 4, or 5 meets proficiency requirement.	Score of 3 exempts LING 10/10X and Lit. 2A. Score of 4 exempts Lit. 2A-B. Score of 5 exempts Spanish: Lit 2B-C/French/French: Lit. 2C and 50. Determines placement in language sequence if student chooses that option. Same as use on major.
Mathematics • Calculus AB..... 4 • Calculus BC..... 8 (8-unit maximum for both tests)	Score of 4 or 5 AB exam = exempt Math. 20A or 10A. Score of 3 on AB exam = exempt Math. 20A or 10A; may take 20A for credit. Score of 4 or 5 on BC exam = exempt Math. 20A, 20B or 10A, 10B. Score of 3 on BC exam = exempt Math. 20A and may take Math. 20B for credit; or = exempt Math. 10A, 10B.	AB exam = 1 course toward math requirement; BC exam = 2 courses toward math requirement.	AB: Score of 3 exempts Math. 20A or 10A. May take 20A for credit. Score of 4, 5 exempts Math. 10A or 20A. Score of 3 exempts Math. 20A and may take Math. 20B for credit or exempt Math. 10A-B. BC: Score of 4, 5 exempts Math. 20A-B or 10A-B. AB exam meets 1 course of math. option. BC exam meets two courses of math. option. Same as use on major. (8 unit maximum on both tests)
Music • Theory..... 8	None	Fulfills fine arts requirement and 1 course of noncontiguous area of focus.	8 units elective credit only.
Physics • Physics B..... 8 • Physics C Mechanics..... 4 • Physics C Electricity and Magnetism..... 4 (8-unit maximum for all three tests)	B exam = elective credit and exempt Phys. 10. C exam (Mech.) score of 3 or 4 = exempt Phys. 1A and may take Phys. 2A or 4A for credit. C exam (Mech.) score of 5 = exempt Phys.2A, 4A. C exam (E&M) score of 3 or 4 = exempt Phys. 1B and may take Phys. 2B or 4B for credit. C exam (E&M) score of 5 = exempt Phys. 2B or 4C and may take Phys. 4B for credit.	B exam = elective credit C exam = (Mech. or E&M) each 4 units can meet 1 course of the natural science requirement.	Score of 3, 4, 5 8 units of elective credit and exempts Phys. 10. Score of 3, 4 exempts Phys. 1A may take Phys. 2A or 4A for credit. Score of 5 exempts Phys. 2A or 4A. Score of 3, 4 exempts Phys. 1B may take Phys. 2B or 4B for credit. Score of 5 exempts Phys. 2A or 4A. Score of 3, 4 exempts Phys. 1B may take Phys. 2B or 4B for credit. Score of 5 exempts Phys. 2B or 4C and may take Phys. 4B for credit. Same as use on major.
Psychology..... 4	Score of 4 or 5 = exempt Psych. 1.	1 course toward social science requirement or 1 course of noncontiguous area of focus.	Score of 4 or 5 = exempt Psychology 1
Statistics..... 4	None	4 units of elective credit.	4 units of elective credit

The University of California grants credit for all College Board Advanced Placement Tests on which a student scores 3 or higher. The credit may be subject credit for use on a minor or prerequisites to a major, or credit toward general-education requirements or elective units toward graduation.

The number of units granted for AP tests are not counted toward the maximum number of credits required for formal declaration of an undergraduate major or the maximum number of units a student may accumulate prior to graduation. Students who enter the university with AP credit do not have to declare a major earlier than other students, nor are they required to graduate earlier.

Application to College and Major Requirements

THURGOOD MARSHALL COLLEGE	WARREN COLLEGE	ELEANOR ROOSEVELT COLLEGE	SIXTH COLLEGE
8 units of elective credit.	2 courses toward Visual Arts or Humanities PofC or Area Study.	1 course toward Group B fine arts requirement. 2D or 3D toward fulfillment of 1 of the 2 GE courses in Fine Art.	1 course toward Art Making.
May apply 1 course toward fine arts	2 courses toward Visual Arts or Humanities PofC or Area Study.	1 course toward Group B fine arts requirement.	1 course toward Narrative, Aesthetic and Historical Reasoning.
1 course of natural science requirement. May also apply 1 course toward disciplinary breadth if non-contiguous to major.	2 courses toward Science and Technology or Fundamentals of Bio PofC. Score of 4 or 5 meets 2 courses toward Biology or Sci & Tec PofC or Fundamentals of Biology PofC. May not take Bio 1 or 2 or BILD 10.	Score of 3, 4, or 5 fulfills the natural science requirement.	Score of 3, 4, or 5: meets 1 course toward Analytical Methodologies/Scientific Method.
May apply 1 course of natural science requirement and may apply 1 course toward disciplinary breadth if noncontiguous to major.	Score of 3 meets 2 courses toward Science and Technology PofC. Score of 4 meets 2 courses toward Science & Technology PofC; 1 course may apply toward Chemistry PofC (for Chemistry A). Score of 5 exempts Chemistry 6ABC, 6BH; only 2 courses may count toward Science and Technology PofC.	Score of 3, 4, or 5 fulfills the natural science requirement.	Score of 3, 4, or 5: meets 1 course toward Analytical Methodologies/Scientific Method.
AB exam = 1 course toward mathematics/computer/statistics requirement.	A exam: 2 units of elective credit; score of 4 on AB exam: 4 units of elective credit; score of 5 on AB exam meets 1 course toward Formal Skills requirement or Science and Technology PofC.	A exam = 2 units elective credit AB exam = 1 of 2 courses quantitative/formal skills requirement.	1 course toward Information Technology Fluency requirement.
Score of 5 may apply 1 course toward disciplinary breadth if noncontiguous to major.	Each score of 3 or 4 meets 1 course toward a Perspectives in Social Science PofC. Each score of 5 meets 1 course toward a Perspectives in Social Science or Economics PofC.	4-8 units of elective credit.	Score of 4, or 5: 1 course toward Social Analysis. Score of 3: elective credit.
8 units of elective credit.	Score of 3, 4 or 5 satisfies Entry Level Writing requirement.	8 units of elective credit.	Either test: satisfies Entry Level Writing requirement ; 8 units elective credit.
4 units of elective credit.	1 course toward Science and Technology PofC.	Meets 1 course toward natural science requirement.	1 course toward Analytical Methodologies/Scientific Method.
4 units of elective credit.	4 units of elective credit.	4 units of elective credit.	4 units of elective credit.
Score of 5 may apply 1 course toward disciplinary breadth if noncontiguous to major.	1 course toward Perspectives in Social Science PofC or Political Science PofC or Political Science Area Study (also satisfies American History and Institutions requirement).	4 units of elective credit.	Score of 4 or 5 fulfills Social Analysis requirement. Score of 3: elective credit. Political Science majors: Score of 5 required to meet major requirement.
Score of 5 may apply 1 course toward disciplinary breadth if noncontiguous to major.	1 course toward Perspectives in Social Science PofC or Political Science PofC or Political Science Area Study.	4 units of elective credit.	Score of 4 or 5 fulfills Social Analysis requirement. Score of 3: elective credit. Political Science majors: Score of 5 required to meet major requirement.
May apply 2 courses toward disciplinary breadth if noncontiguous to major.	2 courses toward History or Humanities PofC or Area Studies; may take HILD 2A, 2B, or 2C to complete sequence(s).	8 units of elective credit.	1 course toward Narrative, Aesthetic and Historical Reasoning.
May apply 2 courses toward disciplinary breadth if noncontiguous to major.	2 courses toward History or Humanities PofC or Area Study.	1 course may apply toward regional specialization. See ERC academic counselor for details	1 course toward Narrative, Aesthetic and Historical Reasoning.
May apply 2 courses toward disciplinary breadth if noncontiguous to major.	2 courses toward History or Humanities PofC or Area Study.	8 units of elective credit.	1 course toward Narrative, Aesthetic and Historical Reasoning.
May apply 2 courses toward disciplinary breadth if noncontiguous to major.	Score of 3 meets 2 courses toward a Foreign Language and Culture PofC or Area Study; score of 4 meets 2 courses toward a Foreign Language and Culture PofC or Area Study or 1 course toward a Humanities, Literature PofC and Area Study; score of 5 meets 2 courses toward a Foreign Language and Culture, Literature, or Humanities PofC or Area Study.	Score of 3=8 units of elective credit Score of 4 or 5 meets language proficiency requirement.	1 course toward Narrative, Aesthetic and Historical Reasoning.
May apply 1-2 courses toward disciplinary breadth if noncontiguous to major.	Score of 3, 4 or 5 either test meets 1 course toward Classical Studies PofC; or Humanities PofC or Area Study.	Must take the Latin Proficiency exam.	1 course toward Narrative, Aesthetic and Historical Reasoning.
May apply 2 courses toward disciplinary breadth if noncontiguous to major.	Score of 3 meets 2 courses toward a Foreign Language and Culture or 1 course toward Literature, Humanities PofC or Area Study; score of 4 meets 2 courses toward a Foreign Language and Culture or 2 courses toward Literature, Humanities PofC or Area Study; score of 5 meets 2 courses toward a Foreign Language and Culture, Literature, or Humanities PofC or Area Study.	Meets language proficiency requirement.	1 course toward Narrative, Aesthetic and Historical Reasoning.
If AB exam may apply 1 course toward math and statistical requirement. If BC exam may apply 2 courses toward math and statistical requirement.	AB exam meets 1 course of formal skill requirement; BC exam completes 2 courses formal skills requirement.	AB exam = 1 course toward quantitative/formal skills requirement. BC exam completes quantitative formal skills requirement.	AB or BC exam: 1 course toward Structured Reasoning.
1 course toward fine arts requirement and 1 course toward the disciplinary breadth requirement if non-contiguous to major.	Completes Formal Skills requirement.	1 course toward Group B fine arts requirement.	1 course toward Art Making.
B exam = 1 course of natural science requirement and 1 course toward disciplinary breadth if noncontiguous to major. 4 units of C exam = 1 course of nat. sci. requirement. 8 units of C exam = 1 course of natural science requirement and 1 course toward disciplinary breadth if noncontiguous to major.	B exam: score of 3, 4 or 5 meets 2 courses toward Science and Technology PofC; either C exam meets 1 course toward Science and Technology PofC.	B exam = 2 courses for natural science; C exam (E&M) = 1 course for natural science; C exam (Mech.) = 1 course for natural science for a total of 2 courses maximum.	Physics B or Physics C exam: 1 course toward Analytical Methodologies/Scientific Method.
May apply as 1 course toward disciplinary breadth requirements if noncontiguous to major.	1 course toward Psychology or Perspectives in Social Science P of C or Area Study.	4 units of elective credit.	1 course toward Social Analysis.
4 units of elective credit.	1 course toward Formal Skills.	1 course toward quantitative/formal skills req.	May apply toward breadth requirements

A student cannot receive credit for a UCSD course which duplicates AP credit. Where the chart says "exempt" or "equal to a UCSD course number," that course may not be taken for credit. Students who are fluent in a language other than English should not overlook the opportunity to get AP credit by taking the foreign/literature exams.

Note: Please see college academic adviser for clarification of any questions you may have.

These admission notification dates apply only to applicants who file within the priority periods. Applicants for winter and spring quarters are notified as soon as possible (within three months) following receipt of all appropriate documents.

After receipt of notification of admission:

1. Read the information in your online admission notification carefully, noting any special provision governing your admission.
2. Request that any outstanding transcripts be forwarded to the Office of Admissions and Relations with Schools by the stated deadline.
3. Complete and submit to the Office of Admissions and Relations with Schools the Statement of Intent to Register (SIR), online or by mail, and the online Statement of Legal Residence (SLR). Please note the deadline to return your SIR. If it is submitted or post-marked after this date, you may be denied enrollment due to space limitations. For fall quarter admitted students, the deadline for return of your SIR and SLR is May 1 for freshmen and June 1 for transfers.

Statement of Intent to Register (SIR)

Upon receipt of your Statement of Intent to Register (SIR), the Office of Admissions and Relations with Schools provides information to various campus offices including the Financial Aid Office, Housing and Dining Services, and your college provost. You will need the additional information from each of these offices. The \$100 nonrefundable fee (if required) accompanying your SIR is applied toward payment of the university registration fee for the quarter of your admission. International applicants outside the territorial United States are not required to submit the \$100 deposit with the Statement of Intent to Register.

Even though you may be admitted to more than one campus of the University of California, you can return SIR to only one campus.

Student Health Requirement

Entering students are required to complete a Medical History form and to send it to the Student Health Center. Forms and complete instructions are usually sent to entering students well in advance of registration, or they may be obtained at the Student Health Center. Information submitted to the Student Health Service is kept confidential and is carefully reviewed to help provide individualized health care.

Mandatory Health Insurance: The University of California has established mandatory health insurance as a non-academic condition of enrollment for undergraduates. Health insurance packages will be available for year-round coverage. The cost will be factored into grants, loans, and work-study programs offered to students who receive financial assistance. Students already covered by adequate health insurance can waive the requirement. The new campus-based insurance plans will not replace the primary medical care and referral services provided by the Student Health Service.

Hepatitis B Immunization: The California State Legislature mandates that first-time enrollees at the University of California who are eighteen years of age or younger provide proof of full immunity against Hepatitis B prior to their enrollment. All students who accept UCSD's offer of admission, and who will still be eighteen years old by the beginning of the Fall Quarter, will receive the Hepatitis B information in the mail from the campus. The immunization consists of a series of three vaccinations. You can receive further information through your health care provider or county health department.

Students are urged also to submit a physical examination form completed by their family

physician, particularly if they plan to take part in intercollegiate athletic competition. Routine physical examinations are not provided by the Student Health Service. An optional student health plan that provides additional benefits off campus may be purchased at the time registration fees are paid. Student health insurance is also mandatory for all international and graduate level students and is a condition of enrollment.

Reapplication

An application for admission is effective only for the quarter for which it is submitted. If you are ineligible for admission, or if you are admitted and do not register, you must file a new application to be considered for a later quarter. The selection criteria in effect for the new term must be met.

If you have been admitted to the university, enrolled, and paid registration fees, but did not attend, contact your undergraduate college for information on refunding your registration fees.

Fees and Expenses

The exact cost of attending the University of California, San Diego will vary according to personal tastes and financial resources of the individual. Generally, the total expense for three quarters, or a college year, is estimated at approximately \$21,000 for California residents living away from home.

It is possible to live simply and to participate moderately in the life of the student community on a limited budget. The university can assist the student in planning a budget by indicating certain and probable expenses. For information regarding student employment, loans, scholarships, and other forms of financial aid at UCSD, see "Campus Services and Facilities" in this catalog.

INTERSEGMENTAL GENERAL-EDUCATION TRANSFER CURRICULUM (IGETC)

Summary Outline

Completion of the Intersegmental General-Education Transfer Curriculum (IGETC) will permit a student to transfer from a community college to a campus in the University of California system without the need, after transfer, to take additional lower-division, general-education courses.

It should be noted that completion of the IGETC is not a requirement for transfer to UC, nor is it the only way to fulfill the lower-division, general-education requirements of UC prior to transfer. Depending on a student's major and field of interest, the student may find it advantageous to take courses fulfilling the general-education requirements of the UC campus or college to which the student plans to transfer. IGETC is applicable at Earl Warren, Sixth, Thurgood Marshall, and John Muir colleges only. Courses completed prior to transfer will be applied toward the college's own lower-division requirements. Revelle students must also complete the remainder of the college's requirements. Students at Eleanor Roosevelt College must complete three academic quarters of the "Making of the Modern World" sequence in addition to the IGETC requirements. They must also complete the remainder of the college's general education requirements.

Transfers should obtain the "IGETC Certification" from their community college and submit it to the Office of Admissions and Relations with Schools. Students are strongly encouraged to provide the IGETC certification prior to the start of classes at UCSD.

English Communication:	One course, English Composition, three semester- (four to five quarter-) units; this course is a prerequisite to Critical Thinking. One course, Critical Thinking-English Composition, three semester- (four to five quarter-) units; strong emphasis on writing; prerequisite: English Composition.
Mathematical Concepts and Quantitative Reasoning:	One course, Mathematics/Quantitative Reasoning, three semester- (four to five quarter-) units.
Arts and Humanities:	Three courses, at least one course in arts, and at least one course in humanities, nine semester- (twelve to fifteen quarter-) units.
Social and Behavioral Sciences:	Three courses in at least two disciplines or an interdisciplinary sequence, social and behavioral sciences, nine semester- (twelve to fifteen quarter-) units.
Physical and Biological Sciences:	One course in each area, at least one must include a laboratory; two courses, seven to nine semester- (nine to twelve quarter-) units.
Language Other than English:	Proficiency equivalent to two years' high school study in the same language.

ESTIMATED EXPENSES FOR UNDERGRADUATE RESIDENTS OF CALIFORNIA

Budget Category	Living With Parents	University Housing	Off Campus
Resident Fees	\$6,684.60	\$6,684.60	\$6,684.60

	\$130	\$45

Non-Resident Tuition for Undergraduates
\$18,168 + \$516 Education Fee

Note: Fees are subject to change by Board of Regents. These fee levels will be implemented if the university's budget is funded consistent with the agreement with the governor and sufficient funds are provided by the state to buy-out the fee increases previously approved by the regents.

Undergraduate Registration

Enrollment in Courses

Prior to the quarter for which they have been admitted, new students will receive information from their college regarding orientation dates, course enrollment, and fee-payment deadlines. Enrollment materials will be provided at the college provosts' offices on the days assigned for new students' registration. New freshman students admitted for the fall quarter will be invited to attend a new student orientation during the summer preceding fall quarter.

New Student Orientation/Enrollment

Orientation programs are designed to acquaint students with the nature, functions, and purposes of UCSD's college system, and to show students how to deal with a variety of requirements set by the university, college, and academic departments. Although all six colleges have the same goals for students, each has developed its own distinctive program. The professional staffs of Revelle, Muir, Marshall, Warren, Roosevelt, and Sixth Colleges have designed programs for their respective students and the students' parents.

New students will be made aware of the opportunities offered by their college and the UCSD community as a whole.

All new students are required to attend an orientation session, and they will be charged a fee for the program. Parents' attendance is optional and varies across the colleges, and a fee is typically charged. Details will be provided by the college.

Enrollment and orientation are two distinct and separate events occurring at different times. All new students, regardless of their college orientation schedule, enroll online (but not on campus) during the same enrollment period. The colleges' academic advisers guide students through this online process. Details of both the orientation and enrollment proceedings are posted on the colleges' respective Web sites after the final publicized deadline for Statement of Intent to Register (SIR), which is determined by the Office of Admissions.

In addition to the Summer Orientation, students should attend Welcome Week—the week

before the official opening of the fall quarter and the beginning of classes.

Continuing Student Enrollment

Continuing students (those currently registered or eligible to register) should refer to TritonLink for enrollment information, dates, and fee payment instructions.

Definitions

Students are considered *enrolled* when they have requested space in at least one course and space in classes has been reserved. Students are not considered *registered* until they have both enrolled in courses and paid registration fees. Waitlisting a class does not constitute enrollment.

Enrollment is processed using WebReg in TritonLink on the Web. Continuing undergraduate students are assigned a start time, after which they may enroll in classes. Start times are based on the number of units completed. Students who have completed more units will receive earlier start times than students with fewer units.

Students are responsible for all courses in which they are enrolled. Students should check TritonLink/WebReg to confirm class enrollments. Alternately, students may go to the Registrar's Office and obtain a printout of their class schedule. Students must make any necessary changes by the Add/Change/Drop process (through WebReg in TritonLink or in person at the Registrar's Office) or by appropriate withdrawal.

Adding, Changing, and Dropping Courses

After enrollment, students may make any necessary corrections to their class schedules on WebReg in TritonLink, through pre-authorization by departments, or by submitting an Add/Change/Drop Card in person to the Registrar's Office. Students may add courses through the second week of instruction, or through the fourth week of instruction with department approval. Please refer to TritonLink for appropriate approvals required.

Students may continue to change grading options through the end of the fourth week and to drop courses through the end of the ninth

week of instruction. Students who wish to drop *all* their courses are required to file an Undergraduate Withdrawal form with their college academic advising or dean's office. Please see the W (Withdrawal) grade regulation that applies after the fourth week of instruction.

Weeks

- 1-2: ADD/DROP/CHANGE Grade Option
- 2-4: DROP/CHANGE Grade Option
- 5-9: DROP ONLY—"W" recorded on transcript
- 10 and later: No changes; final grade assigned

The Undergraduate Program

The undergraduate program consists of four four-unit courses each quarter, or sixteen units per quarter, for four years. Students must complete a minimum of thirty-six units in three consecutive quarters in order to satisfy the minimum progress requirements (see "Minimum Progress" in the "Academic Regulations" section). Undergraduate students wishing to take more than twenty-two units of credit in a quarter will need their college provost's approval.

Approval for Enrollment for More than 200 Units

The minimum unit requirement for the bachelor's degree is 184 quarter-units in Revelle College and 180 quarter-units in Muir, Marshall, Warren, Roosevelt, and Sixth Colleges. A student is expected to complete the requirements for graduation within this minimum unit requirement. The bachelor of science degree may require satisfaction of additional units, depending upon the student's major. Candidates for B.S. degrees in engineering are permitted 230 units (240 for engineering majors in Revelle and Roosevelt colleges).

Under special circumstances, students may extend their undergraduate training beyond the minimum. Non-engineering students who are attempting to achieve more than 200 quarter-units will not be permitted to register without their college provost's approval. Other exceptions will be granted only for compelling academic reasons and only with the approval of the college provost and the concurrence of the Committee on Educational Policy. Transfer units applicable

toward general-education requirements or major requirements are included in the maximum unit calculation; all other transfer units are excluded. Advanced placement and international baccalaureate units are excluded. (See information regarding "Minimum Unit Limitation" in the "Academic Regulations" section of this catalog.)

Enrollment and Registration Holds

A student may have a "hold" placed on his or her enrollment or registration (payment of fees) and/or academic transcripts for the following reasons:

1. Failure to respond to official notices.
2. Failure to settle financial obligations when due or to make satisfactory arrangements with the Student Business Services Office.
3. Failure to present certification of degrees and/or status on leaving previous institution(s).
4. Failure to comply with admission conditions.

Each student who becomes subject to a hold action is given advance notice and ample time to deal with the situation. However, if the student fails to respond, action will be taken without further notice, and he or she is entitled to no further services of the university, except assistance toward reinstatement.

Undergraduate students wishing to have their status restored must secure a release from the office initiating the hold action. Reinstatement is not final until the registration process is completed.

Change of Address

UCSD has identified electronic mail as the recognized and official means of communication by which university officials, at their discretion, may send communications to students. Such communications may be sent exclusively using electronic mail. Students can use TritonLink to request and maintain their university-assigned email address.

In addition, students who change their local or permanent addresses are expected to notify the registrar's office either in writing or via TritonLink at once. Change-of-address cards are available at the Office of the Registrar, 301 University Center. Students will be held responsible for communications from any university office sent to the last address on record and should not claim indulgence on the plea of not receiving the communication.

California Residence for Tuition Purposes

TUITION FEE FOR NONRESIDENT STUDENTS

If you have not been living in California with intent to make it your permanent home for more than one year immediately before the residence determination date for each term in which you propose to attend the university, you must pay a nonresident tuition fee in addition to all other fees. The residence determination date is the day instruction begins at the last of the University of California campuses to open for the quarter—and for schools on the semester system, the day instruction begins for the semester.

LAW GOVERNING RESIDENCE

The rules regarding residence for tuition purposes at the University of California are governed by the California Education Code and implemented by Standing Orders of the Regents of the University of California. Under these rules, adult citizens and certain classes of aliens can establish residence for tuition purposes. There are particular rules that apply to the residence classification of minors. (See below.)

WHO IS A RESIDENT?

If you are an adult student (at least eighteen years of age) you may establish residence for tuition purposes in California if: (1) you are a U.S. citizen; (2) you are a permanent resident or other immigrant; or (3) you are a nonimmigrant who is not precluded from establishing a domicile in the United States. Nonimmigrants who are not precluded from establishing domicile in the United States include those who hold valid visas of the following types: A, E, G, H-1, H-4, I, K, L, O-1, O-3, or R. To establish residence you must be physically present in California for more than one year and you must have come here with the intent to make California your home as opposed to coming to this state to go to school. Physical presence within the state solely for educational purposes does not constitute the establishment of California residence, regardless of the length of your stay. You must demonstrate your intention to make California your home by severing your residential ties with your former state of residence and establishing those ties with California. If these steps are delayed, the one-year durational period will be extended until you have demonstrated both presence and intent for

one full year. Effective fall 1993, if your parents are not residents of California or you were not previously enrolled as a UC student, you will be required to be financially independent in order to be a resident for tuition purposes. Your residence cannot be derived from your spouse, registered domestic partner, or your parents.

REQUIREMENTS FOR FINANCIAL INDEPENDENCE

You will be considered "financially independent" if one or more of the following applies: (1) you are at least twenty-four years of age by December 31 of the calendar year for which you are requesting residence classification; (2) you are a veteran of the U.S. Armed Forces; (3) you are a ward of the court or both parents are deceased; (4) you have legal dependents other than a spouse or registered domestic partner; (5) you are married, a registered domestic partner, or a graduate student or a professional student, and you were not claimed as an income tax deduction by your parents or any other individual for the tax year immediately preceding the term for which you are requesting resident classification; or (6) you are a single undergraduate student and you were not claimed as an income tax deduction by your parents or any other individual for the two tax years immediately preceding the term for which you are requesting resident classification, and you can demonstrate self-sufficiency for those years and the current year; (7) your parents are residents of the State of California; (8) you reach the age of majority in California while your parent(s) were residents of this state AND the California resident parent(s) leave the state to establish a residence elsewhere AND you continue to reside in the State of California with all your ties here after your parent(s) departure. (Note: Financial dependence will not be a factor in residence status for graduate student instructors, graduate student teaching assistants, research assistants, junior specialists, postgraduate researchers, graduate student researchers, and teaching associates who are employed forty-nine percent or more of full time or awarded the equivalent in University-administered funds, e.g., grants, stipends, or fellowships at the University of California in the term for which classification is sought.)

ESTABLISHING INTENT TO BECOME A CALIFORNIA RESIDENT

Indications of your intent to make California your permanent residence can include the following: registering to vote and voting in California elections; designating California as your permanent address on all school and employment records, including military records if you are in the military service; obtaining a California driver's license or, if you do not drive, a California Identification Card; obtaining California vehicle registration; paying California income taxes as a resident, including taxes on income earned outside California from the date you establish residence; establishing a California residence in which you keep your personal belongings; and licensing for professional practice in California. The absence of these indicia in other states during any period for which you claim residence can also serve as an indication of your intent. Your intent will be questioned if you return to your former state of residence when the university is not in session. Documentary evidence is required, and all relevant indications will be considered in determining your classification.

GENERAL RULES APPLYING TO MINORS

If you are an unmarried minor (under age eighteen), the residence of the parent with whom you live is considered to be your residence. If you have a parent living, you cannot change your residence by your own act, by the appointment of a legal guardian, or by the relinquishment of your parent's right of control. If you lived with neither parent, your residence is that of the parent with whom you last lived. Unless you are a minor alien present in the U.S. under the terms of a nonimmigrant visa that precludes you from establishing domicile in the U.S., you may establish your own residence when both your parents are deceased and a legal guardian has not been appointed. If you derive California residence from a parent, that parent must satisfy the one-year durational residence requirement.

SPECIFIC RULES APPLYING TO MINORS

Divorced/Separated Parents

You may be able to derive California resident status from a California resident parent if you move to California to live with that parent on or before your eighteenth birthday. If you begin residing with your California parent after your

eighteenth birthday, you will be treated like any other adult student coming to California to establish residence.

Parent of Minor Moves from California

You may be entitled to resident status and not be required to establish financial independence if you are a minor U.S. citizen or eligible alien whose parent(s) was a resident of California who left the state within one year of the residence determination date if:

1. you remained in California after your parent(s) departed;
2. you enroll in a California public post-secondary institution within one year of your parent(s)' departure; and
3. once enrolled, you maintain continuous attendance in that institution.

Two-Year Care and Control

You may be entitled to resident status if you are a U.S. citizen or eligible alien and you have lived continuously with an adult who is not your parent for at least two years prior to the residence determination date. The adult with whom you are living must have been responsible for your care and control for the entire two-year period and must have been residing in California during the one year immediately preceding the residence determination date.

EXEMPTIONS FROM NONRESIDENT TUITION

Member of the Military

If you are an undergraduate student and a member of the U.S. military stationed in California on active duty or the spouse, registered domestic partner, or dependent child, you may be exempt indefinitely from the nonresident tuition fee. Graduate students continue to be eligible for this exception only until they have lived in California one year from the date they arrived in California with ties to the state. You must provide the residence deputy on campus with a statement from your commanding officer or personnel officer stating that your assignment to active duty in California is not for educational purposes. The letter must include the dates of your assignment to the state.

Child or Spouse of Faculty Member

To the extent funds are available, if you are an unmarried dependent child under age twenty-

one or the spouse or registered domestic partner of a member of the university faculty who is a member of the Academic Senate, you may be eligible for a waiver of the nonresident tuition fee. Confirmation of the faculty member's membership on the Academic Senate must be secured each term this waiver is granted.

Child or Spouse of University Employee

You may be entitled to resident classification if you are a full-time university employee, an unmarried dependent child, the spouse, or registered domestic partner, of a full-time university employee whose assignment is outside of California (e.g., Los Alamos National Laboratory). Your parents' or spouse's employment status with the university must be ascertained each term.

Child of Deceased Public Law Enforcement or Fire Suppression Employee

You may be entitled to a waiver of the nonresident tuition fee if you are the child, spouse, or registered domestic partner, of a deceased public law enforcement or fire suppression employee who was a California resident at the time of his or her death and who was killed in the course of fire suppression or law enforcement duties.

Dependent Child of a California Resident

A student who has not been an adult resident of California for more than one year, and who is the dependent child of a California resident who has been a resident for more than one year immediately prior to the residence determination date, may be entitled to a waiver of the nonresident tuition until the student has resided in California for the minimum time necessary to become a resident so long as continuous attendance is maintained at an institution.

Native American Graduates of a BIA High School

If you are a graduate of a California high school operated by the Federal Bureau of Indian Affairs, you may be eligible for an exemption from the nonresident fee.

Employee of a California Public School District

Any person holding a valid credential authorizing service in the public schools of the state of California who is employed by a school district

in a full-time certificate position may be eligible for a nonresident tuition waiver.

Student Athlete in Training at U.S. Olympic Training Center; ARCO

Any amateur student athlete in training at the United States Olympic Training Center in Chula Vista may be eligible for a waiver of the nonresident tuition until he or she has resided in the state the minimum time necessary to become a resident.

Graduate of California high school (AB 540)

A student who attended high school in California for three or more years (ninth grade included) and graduated from a California high school (or attained the equivalent) may be exempt from nonresident tuition.

Surviving Dependents of California Residents Killed in 9/11/01 Terrorist Attack

A student who was a dependent of a California resident who was killed in the September 11, 2001 terrorist attacks on the World Trade Center, the Pentagon Building, or the crash of United Airlines Flight 93. Eligible students must meet the financial need requirements for the Cal Grant A program.

Recipients of the Congressional Medal of Honor

Any undergraduate student who is a recipient of a Congressional Medal of Honor or who is the child of a recipient of the Congressional Medal of Honor. The recipient must be a California resident or must have been a California resident at the time of his or her death. The student may not be older than twenty-seven, and the student's annual income may not exceed the national poverty level.

MAINTAINING RESIDENCE DURING A TEMPORARY ABSENCE

If you are a nonresident student who is in the process of establishing a residence for tuition purposes and you return to your former home during noninstructional periods, your presence in the state will be presumed to be solely for educational purposes and only convincing evidence to the contrary will rebut this presumption. **A student who is in the state solely for educational purposes will NOT be classified as a resident for tuition purposes regardless of the length of his or her stay.**

If you are a student who has been classified as a resident for tuition purposes and you leave the state temporarily, your absence could result in the loss of your California residence. The burden will be on you (or your parents if you are a minor) to verify that you did nothing inconsistent with your claim of continuing California residence during your absence. Steps that you (or your parents) should take to retain a California residence include:

1. Continue to use a California permanent address on all records—educational, employment, military, etc.
2. Satisfy California resident income tax obligations. (Note: If you are claiming California residence, you are liable for payment of income taxes on your total income from the date you establish California residence. This includes income earned in another state or country.)
3. Retain your California voter's registration and vote by absentee ballot.
4. Maintain a California's driver's license and vehicle registration. If it is necessary to change your driver's license and/or vehicle registration while you are temporarily residing in another state, you must change them back to California within the time prescribed by law.

PETITION FOR RESIDENT CLASSIFICATION

You must submit petition and documentation by mail or drop off by the Registrar's Office for a change of classification from nonresident to resident status. All changes of status must be initiated prior to the first day of class for the term for which you intend to be classified as a resident.

TIME LIMITATION ON PROVIDING DOCUMENTATION

If additional documentation is required for residence classification but is not readily accessible, you will be allowed until the end of the applicable term to provide it.

INCORRECT CLASSIFICATION

If you were incorrectly classified as a resident, you are subject to a nonresident classification and to payment of all nonresident tuition fees not paid. If you concealed information or furnished false information and were classified incorrectly as a result, you are also subject to university discipline. Resident students who become nonresidents should immediately notify the campus residence deputy.

INQUIRIES AND APPEALS

Inquiries regarding residence requirements, determinations, and/or recognized exceptions should be directed to the Residence Deputy, Office of the Registrar, 9500 Gilman Drive, La Jolla, CA 92093-0021, or the Legal Analyst-Residence Matters, Office of the General Counsel, University of California, 1111 Franklin Street, 8th Floor, Oakland, CA 94607-5200. **No other university personnel are authorized to supply information relative to residence requirements for tuition purposes.**

A complete version of the regulations is available in the Office of the Registrar. Please note that changes may be made in the residence requirements between the publication of this statement and the relevant residence determination date. Any student, following a final decision on residence classification by the residence deputy, may appeal in writing to the legal analyst within thirty calendar days of notification of the residence deputy's final decision.

Payment of Registration Fees

BILLING STATEMENT AND PAYMENT INFORMATION

Registration at UCSD is a two-step process: (1) enrollment in classes and (2) payment of fees. You must enroll first so that your fees can be assessed. You can pay fees anytime after you enroll in classes. An E-Bill notice will be emailed to your UCSD email address after enrollment; however, if you wait to enroll just prior to the enrollment deadline, you will not receive an E-Bill notice. Pay by E-check on TritonLink or make checks payable to: UC Regents. Mail checks to UCSD Cashier's Office, 9500 Gilman Dr., La Jolla, CA 92093-0009. Be sure to include your student PID number on your check and include the remittance stub from TritonLink or the top portion of your billing statement. Fees are due and payable by the published deadline whether or not an E-Bill notice is received. Your current account activity and balance are available on TritonLink during normal TritonLink hours.

Your monthly billing statement from the university will list your charges and credits. Charges include registration fees, housing, parking, and other indebtedness. Credits include payments and, if you are a financial aid recipient, the funds which are disbursed through UCSD, e.g., Pell Grants, scholarships, and Stafford and

Perkins Loans. Credits will offset against the statement's charges, and you will either pay the remaining amount on the statement or receive a refund if there is a credit. If you have any questions about the entries, use the phone numbers listed online to contact the appropriate office.

E-Bill notices are sent to students' UCSD email address and up to three other authorized payers' email addresses that the student sets up on TritonLink. See www.act.ucsd.edu/go/ebill.html for more information on E-Bill.

If your fees are fully paid by financial aid or other programs and you decide not to attend UCSD, it is very important that you contact your college and initiate withdrawal/leave of absence procedures immediately. Graduate students should refer to the "Graduate Studies" section of the catalog for leave of absence or withdrawal procedures. Failure to do this may result in F grades being assigned to your courses.

Financial Aid/Credit Balances and Refunds

Student financial aid, graduate support, or fee waivers awarded to pay registration fees will be directly credited to your student account and appear on your billing statement as a credit. Financial aid will not be credited to your account until you have completed the enrollment process. Financial aid recipients are expected to be enrolled full-time. Student Business Services will refund all financial aid, including outside agency scholarships and private loans, through direct deposit. For those students who choose not to sign up for direct deposit, refund checks will be mailed to the current mailing address on TritonLink. All Federal Perkins Loan borrowers must complete the information sheet or references and Perkins Loan master promissory note. Loan funds will not be released (credited) to student accounts until the master promissory note is signed. You may complete these documents during your financial aid award and acceptance process, by going to the Student Business Services Web site: <http://sbs.ucsd.edu>, or in person at the Student Business Services Office.

Loan Counseling

It is required by federal law and/or university policy that all students receiving Perkins, Stafford (subsidized/unsubsidized), or university loans have a pre-loan counseling session wherein they are informed of the rights, obligations, and consequences attached to the loans.

These counseling sessions are called entrance interviews. These sessions can be conducted online and provide the student with an understanding of the issues involved in receiving a loan. Also, all graduating students and students who withdraw or take a leave of absence who have received a loan must have final counseling before they leave school. These sessions are called exit interviews. At this time, students are individually told how much they owe on student loans, what their repayment amounts will be, and when their repayments will begin. In both sessions, all counseling content and documentation is made available. You may complete your exit interview by going to the Student Business Services Web site: <http://sbs.ucsd.edu>, or in person at the Student Business Services Office. Please call (858) 822-4SBS for more information.

Registration and Other Payments through the Central Cashier's Office

Registration payments must be made by mail, E-check, or in the Cashier's Office drop box as early as possible. The Central Cashier's Office receives payments for *all* university debts. The mailing address of the Cashier's Office is: Central Cashier's Office, UCSD, 9500 Gilman Drive, La Jolla, CA 92093-0009. (Make checks or money orders payable to UC Regents.)

INDEBTEDNESS COUNSELING AND STUDENT BUSINESS SERVICES HOLD RELEASES

Entering college for the first time can be an overwhelming experience. And part of that experience is learning to handle your own finances. Most students have no real problem, but sometimes things can get out of control. Student Business Services staff members will counsel you on campus indebtedness which you may have already incurred and how to prevent such conditions in the future. It is the policy of the University of California that no student can continue in the next academic quarter if that individual owes the university money. Consequently, when a student owes the university money, an automatic **hold** prevents him or her from future registration, and from receiving financial aid and transcripts until the bill is paid. It is recognized that there are occasional problems and situations which may be taken into account. On occasion, after counseling, the Student Business Services Office may authorize a Time Payment Agreement (TPA) with a student.

TRITON REGISTRATION INSTALLMENT PLAN

The UCSD Triton Registration Installment Plan (TRIP) is available for students who desire an alternative method of financing their registration fees on a short-term basis. All students in good financial and academic standing are eligible for the program, except for those students whose financial aid or graduate support will pay their registration fees. A prerequisite to apply for the program is enrollment for the term. The Triton Registration Installment Plan allows registration fees to be paid in up to three installments each quarter. On a three-month plan, the first payment is required by the quarterly registration due date. The remaining payments are itemized on the student's next two monthly UCSD Billing Statements. There is a \$30 per quarter nonrefundable application fee for California residents and a \$45 quarterly nonrefundable application fee for nonresidents that must be submitted with the first payment. This fee is used strictly to offset the costs of the program. Students may enroll online using TritonLink.

LOCATION

The Student Business Services (SBS) Office is located in Building 201 in the University Center, across the street from the Office of Admissions and Registrar. The Central Cashier's Office is at the intersection of Myers and Rupertus Drives in Building 401 University Center.

OFFICE HOURS

The Central Cashier's Office is open from 8:00 a.m. until 4:00 p.m. Monday through Friday.

The Student Business Services Office is open from 8:00 a.m. until 4:30 p.m. Monday through Friday, except on Thursday, when the office opens at 10:00 a.m.

DEADLINES AND PENALTY FINES

Students should refer to TritonLink for actual deadline dates.

All prior delinquent debts must also be paid. Health insurance is mandatory for all students, both graduate and undergraduate, as a condition of enrollment. All students will be assessed the cost of the policy provided by the campus. Undergraduates who already have adequate health insurance should access TritonLink to request a waiver of this premium. An additional charge will be made for failure to pay required fees or deposits by the dates announced in this

catalog and on TritonLink. Please note that students who enroll in courses but fail to pay fees by the published deadline will be assessed a late payment fee. Students who fail to enroll in courses prior to the enrollment deadline will be assessed a late enrollment fee and a late payment fee. Currently these fines are \$50 each. (See "Miscellaneous Expenses" on the next page.)

With the exception of appeals to the legal analyst regarding a student's residence classification, no claim for remission of fees will be considered unless such claim is presented during the fiscal year to which the claim is applicable.

Receipts are issued for all payments made in person at the Central Cashier's Office, and these should be carefully preserved. No student will be entitled to a refund except after surrender to the Cashier's Office of the student's original receipt, if issued, or cancelled check or money order receipt.

EXEMPTION FROM FEES

Except for miscellaneous fees and service charges, no fees of any kind are assessed any surviving child of a California resident who was an active law enforcement or active fire suppression official and who was killed in the performance of active duties or died as a result of an accident or injury caused by external violence or physical force incurred in the performance of such duties.

No fees of any kind are assessed a student who was a dependent of a California resident who was killed in the September 11, 2001 terrorist attacks on the World Trade Center, the Pentagon Building, or the crash of United Airlines Flight 93. Eligible students must meet the financial need requirements for the Cal Grant A program. No fees of any kind are assessed any undergraduate student who is a recipient of a Congressional Medal of Honor or who is the child of a recipient of the Congressional Medal of Honor. The recipient must be a California resident or must have been a California resident at the time of his or her death. The student may not be older than twenty-seven, and the student's annual income may not exceed the national poverty level.

Students who believe themselves entitled to one of these exemptions must apply for a fee exemption at the Office of the Registrar before registering. Without this authorization, students will not be permitted to register without pay-

ment of the entire fee. Graduate students should apply to the dean of Graduate Studies.

NONRESIDENT TUITION

Students who have not established and maintained California residence for at least one year immediately prior to the residence determination date for the term during which they propose to attend the university, and who do not otherwise qualify for resident classification under California law, are charged, along with other fees, a nonresident tuition fee each quarter. The residence determination date is the day instruction begins at the last of the University of California campuses to open for the quarter. Final classifications are made by the residence deputy, who is located in the registrar's office, on the basis of a Statement of Legal Residence completed by the student and signed under oath. Prospective students who have questions regarding their residence status should consult the *General Catalog* or contact the residence deputy.

UNIVERSITY REGISTRATION FEE

The university registration fee is \$765 per year for undergraduates and must be paid at the time of registration. It covers services that benefit the student and are complementary to, but not a part of, the instructional program, and it includes recreational activities, student organizations, and the Student Health Service. No part of this fee is refunded to students who do not make use of these privileges.

In addition, there is a campus activity fee of \$63 per year for undergraduates, a university center fee of \$112.50 per year for all students to be used for the construction and operation of the student centers, and a \$276 per year recreational facility fee. Note: Fees are subject to change. Please refer to TritonLink for the most current fee information.

EDUCATIONAL FEE

The educational fee was established by the regents for all students beginning fall quarter 1970. The educational fee is a charge assessed against each registered student to cover part of the cost of the student's education at the University of California. The educational fee is \$5,868 per year for resident undergraduates and \$6,426 per year for nonresident undergraduates. The educational fee may be reduced by one-half for students approved on part-

time status. Note: Fees are subject to change. Please refer to TritonLink for the most current fee information.

MANDATORY HEALTH INSURANCE

All undergraduate, graduate, professional, and international undergraduates are required to have health insurance as a condition of enrollment. Undergraduates are automatically enrolled in the Undergraduate Student Health Insurance Plan (USHIP). The Graduate Student Health Insurance Plan (GSHIP) provides coverage for graduate and professional students. USHIP and GSHIP premiums are automatically assessed and paid with registration fees each quarter. For full information, including the plan brochures, click on "about USHIP Plan" and "about GSHIP Plan" or contact the Student Insurance Office at (858) 822-5981 or (858) 534-2123.

MISCELLANEOUS EXPENSES, FEES, FINES, AND PENALTIES

Books and supplies average about \$469 per quarter. However, students should be aware of the following possible expenses:

Statement of Intent to Register fee (new undergraduate)	\$100
Application fee (each campus)	
Domestic	60
International	70
Duplicate Photo I.D. Card	15
Transcript of record	6
Verification of Student Data/Status	6
Muir Activity (per quarter)	7
Eleanor Roosevelt (per quarter)	5
Revelle Activity (per quarter)	7
Sixth College Activity (per quarter)	8
Thurgood Marshall Activity (per quarter)	2
Warren College Activity (per quarter)	4
Late enrollment	50
Return check collection	35
Return e-check collection	35
Late payment of fees (late registration)	50
Duplicate diploma	25
Statement late charge	25

(See also "Withdrawal from the University.")

Note: Fees are subject to change. Please refer to TritonLink for the most current fee information.

RETURNED CHECK POLICY

Several facilities at UCSD accept personal checks for payments and/or cash. Any individual who writes checks with insufficient funds will be subject to all legal action deemed appropriate

by the university. In addition, anyone who writes to the university three or more checks that are subsequently returned will have their check writing privileges permanently revoked.

PARKING

Students who park motor vehicles on the campus are subject to parking fees. Parking permits may be purchased through TritonLink or at the parking office in the Gilman parking structure. A copy of the campus parking regulations may be obtained from the cashier at the time of permit purchase.

Part-Time Study at the University of California

GENERAL POLICY

1. Degree programs in the university may be open to part-time students wherever good educational reasons exist for so doing.
2. No majors or other degree programs will be offered only for part-time students, except as specifically authorized by the Academic Senate.
3. For the purposes of this statement of policy and procedures, the following definition applies:

A part-time undergraduate student is one who is approved to enroll for ten units or fewer, or an equivalent number of courses, per quarter.

ADMISSIONS AND ENROLLMENT

1. The same admissions standards that apply to full-time students will apply to part-time students.
2. Approval for individual students to enroll on a part-time basis will be given for reasons of occupation, family responsibilities, health, or, for one quarter only, graduating senior status.
3. Approval to enroll as a part-time student shall be given by the appropriate dean or provost.
4. Students must apply for part-time study prior to the end of the second week of the quarter

and must be enrolled in ten or fewer units at that time (*including* any units taken through UCSD Extension) to qualify for reduced fees.

PROCEDURES

Students must apply for part-time status on the Part-Time Study application form available at their colleges *prior to the end of the second week of the quarter*. Approval for part-time study is granted for one academic year only—fall through spring quarters, winter through spring quarters, or spring quarter only. Students must reapply for approval each fall quarter and substantiate reasons for request. Approval for part-time study will automatically exempt students from the thirty-six unit-per-year minimum progress requirement. Students who are receiving financial assistance should contact their college financial aid office regarding eligibility requirements.

REDUCED FEES

Undergraduate students who have been approved for part-time study and who are enrolled in ten units or fewer at the end of the second week of classes are eligible for a reduction of one-half of the educational fee and one-half of nonresident tuition, if applicable. Students who drop to ten or fewer units after this date will receive no reduction, and any student who receives a reduction in fees will be billed for the difference if the number of units increases to ten and one-half or more anytime in the quarter.

Undergraduates enrolled in Education Abroad and other special programs are excluded from this reduced fee policy. Employees of the university enrolled as students in the Employee Program have fees reduced by waiver from the Personnel Office and are not eligible to receive this further reduction. Extension courses taken by students in the Complimentary Enrollment Program *will* be included in the unit count whether or not the credit is accepted as part of a university degree program. Questions concerning this policy may be addressed to the Office of the Registrar.

Academic Regulations

Undergraduate Degree Requirements

Each of the undergraduate colleges on the San Diego campus has specific requirements for a degree. (See "Choosing a College at UCSD.")

Changes in Requirements

When a change in graduation requirements is introduced, it is implemented so that continuing students (as defined below) are not substantially hindered in the orderly pursuit of their degrees. Since changes in requirements vary greatly in character, this principle will have different implications for different changes. For purposes of this policy, 'continuing students' are those who began higher education at UCSD or elsewhere before the change. Colleges and departments may deny protection under this policy to a student who has interrupted his or her education for more than two years.

Students transferring to UCSD from another UC campus who have completed their lower-division general-education requirements at a UC campus are considered to have met UCSD's lower-division general-education requirements at Thurgood Marshall College, Warren College, Sixth College, and John Muir College. A letter certifying satisfaction of general education requirements under the UC reciprocity agreement must be sent to the Academic Advising Office of the student's college. UCSD upper-division general education requirements must be satisfied. (See "Graduation Requirements" for each undergraduate UCSD college.)

Students transferring to UCSD from California Community College campuses may elect to satisfy their lower-division general-education and breadth requirements prior to transfer by completing general-education/breadth requirements using the UCSD Articulation Agreement on file at the California Community Colleges; following the Intersegmental General Education Transfer Agreement; or signing a TAG (Transfer Admission Guarantee) contract and completing TAG requirements prior to entering UCSD. See "New University of California Transfer Agreements" in the "Undergraduate Admissions, Policies and Procedures" section of this catalog.

Requirements for the Bachelor's Degree

All course work required for a degree must be completed by the end of the quarter filed for graduation.

Every candidate for a bachelor's degree must have completed a major.

1. A major shall require the equivalent of twelve or more upper-division courses (forty-eight or more units).
2. Requirements for majors shall be determined by departments and programs, subject to the approval of the Committee on Educational Policy.
3. **Double Majors:** With the approval of both departments or programs and of the college provost, a student may declare a double major after reaching junior level (90 UC units) and no later than 135 units, with a minimum cumulative grade point average of 2.50.
 - a. A student with a double major must fulfill the separate requirements of each major, and the equivalent of at least ten upper-division courses (forty units) must be unique to each major. Courses taken in fulfillment of lower-division requirements may overlap to any degree.
 - b. The two majors may not be within the School of Engineering, nor, except with the approval of the Committee on Educational Policy, within a single department.
 - c. A student who has declared a double major is not subject to the maximum-unit limitations of Regulation 600.C. and may accrue up to 240 units.
 - d. A student with a double major may graduate only upon completion of all requirements for both majors. Both majors will be noted on the student's transcript and diploma. If the two majors lead to different degrees (B.A. and B.S.), that fact will be noted on the transcript, and the two degree designations will appear on one diploma.
 - e. A student who has declared a double major may graduate in one major upon

completion of all requirements for that major, but may not continue in the University for completion of the second major.

4. An undergraduate student must have declared a major or pre-major upon completion of ninety units.

Other requirements for graduation shall be determined by the colleges in conformity with universitywide regulations and subject to approval by the San Diego Division of the Academic Senate.

American History and Institutions

A knowledge of American history and of the principles of American institutions under federal and state constitutions is required of all candidates for the bachelor's degree. This requirement may be met in any one of the following ways:

1. By having passed with a grade of C or better one high-school unit in American history, or one-half high-school unit in American history and one-half high-school unit in civics or American government.
2. By completing with a grade of P or C- or better any one-quarter course of instruction accepted as satisfactory by the Committee on Educational Policy and Courses. Any of the following courses are suitable for fulfilling the requirement: HILD 2A-B-C, HILD 7A-B-C, or any course listed under HIUS (other than HIUS Colloquia); Political Science 10, 100A, 100B, 100C, 102C, 102H, 104A, 110EA-EB, 110J, 142A; and Ethnic Studies 112A-B, 125, 130, 131, 149, 167, 170A-B.
3. By presenting proof of having received a score of 550 or more on the SAT II Subject Test of the College Entrance Examination Board (CEEB) in American History.
4. By presenting proof of having received a grade of 3 or higher on the Advanced Placement Test in American History administered by the Educational Testing Service, Princeton, New Jersey.
5. By presenting proof of having satisfied the present requirement as administered at another collegiate institution within the state.

6. By presenting proof of successful completion of an acceptable one-quarter or one-semester course, with a grade of C or better, in either American history or American government at a community college within the state.
7. By presenting proof of successful completion of an acceptable one-quarter or one-semester course, with a grade of C or better, in either American history or American government at a recognized institution of higher education, junior college included, in another state.
8. An alien attending the university on an F-1 or J-1 student visa may, by showing proof of temporary residence in the United States, petition for exemption from this requirement through the office of his or her college provost.

**UC ENTRY LEVEL WRITING REQUIREMENT
(FORMERLY SUBJECT A: ENGLISH
COMPOSITION)**

The University of California requires all undergraduate students (including international students) to demonstrate a minimum proficiency in English composition (the Entry Level Writing requirement). This proficiency can be demonstrated by:

1. Submitting a score of 680 or better on either the Writing Test, English Composition, or the English Composition with Essay Test, SAT II Subject Tests of the College Entrance Examination Board (CEEB) (Note: not to be confused with the verbal portion of the Scholastic Assessment Test [SAT I]); or
2. Submitting a score of 3, 4, or 5 on the CEEB Advanced Placement Test in English; or
3. Submitting a score of 5 or better in the International Baccalaureate Higher Level examination in English (Language A only); or
4. Submitting proof of completion, prior to enrollment at UCSD, of an acceptable transfer-level college course of four quarter-units or three semester-units in English composition with a grade of C or better; or
5. Writing a passing essay on the UC Analytical Writing Placement Exam (which is *required* of all students who have not otherwise met the requirement). This exam is administered statewide during May and on campus at the start of fall quarter. This examination may be taken only once.

6. Achieving a minimum score on the ACT Assessment Writing Test (English/Writing score).

All students who have not previously satisfied the Entry Level Writing requirement must take the UC Analytical Writing Placement Exam prior to enrollment at UCSD. Students who fail this examination must enroll each quarter in an approved Entry Level Writing requirement course until they satisfy the Entry Level Writing requirement. Students satisfy the requirement by achieving a grade of C or better in SDCC 1 (English Composition—

Entry Level Writing Requirement) and by passing the Entry Level Writing Requirement Exit Examination at the end of SDCC 1. The exit examination is administered by the Basic Writing Office. Students whose performance on the Analytical Writing Placement Exam indicates they need work in English as a Second Language must enroll in ESL courses for three quarters (or until released by the ESL director) before enrolling in SDCC 1. Students must enroll in SDCC 1 (or ESL) during their first quarter of residence at UCSD. For further information on SDCC 1, refer to "Entry Level Writing Requirement" in the catalog section "Courses, Curricula, and Programs of Instruction." For further information on ESL, see "English as a Second Language" in the catalog section "Courses, Curricula, and Programs of Instruction."

The Entry Level Writing requirement must be satisfied during a student's first year of residence. Students will be barred from enrollment at the university if they fail to satisfy the Entry Level Writing requirement by the end of their third quarter of enrollment at UCSD. (Exception: Students in need of ESL course work may have up to three extra quarters of residence in which to satisfy the Entry Level Writing requirement.) Students will not be allowed to enroll in university-level writing courses at UCSD until the Entry Level Writing requirement has been satisfied.

Students who have been barred from enrollment because of failure to satisfy the Entry Level Writing requirement will be allowed to present evidence of further work in composition. If the Basic Writing Office director approves, these students may take an Entry Level Writing requirement examination a final time. Students performing successfully on this final examination will be eligible to apply for re-enrollment at the university.

For further information about the UC Entry Level Writing requirement or the Proficiency Test, please visit the Basic Writing Office, 3232 Literature Building, or call (858) 534-6177.

Senior Residence

Each candidate for the bachelor's degree must complete thirty-five of the final forty-five units in residence in the college or school of the University of California in which the degree is to be earned.

Under certain circumstances exceptions may be granted by the provost, such as when a student attends classes on another UC campus as an approved visitor or participates in the UC Education Abroad, the UCSD Opportunities Abroad, Dartmouth, Spelman, Morehouse, or University of New Mexico exchange programs.

Note: Courses taken through the UCSD Extension Concurrent Enrollment Program will not apply toward a UCSD student's senior residency requirement. For further details see "Graduation Requirements" in the Index.

Maximum Unit Limitation

1. An undergraduate student may register for no more than 200 course units. An exception is permitted for candidates for B.S. degrees in engineering, for whom the limits are 240 units in Revelle and Roosevelt Colleges and 230 units in all other colleges. Other exceptions will be granted only for compelling academic reasons and only with the approval of the college provost and the concurrence of the Committee on Educational Policy.
2. Transfer units applicable toward general-education requirements or major requirements are included in the maximum unit calculation; all other transfer units are excluded. Advanced Placement and international baccalaureate units are excluded.

Special kinds of study—e.g., laboratories, reading programs, studio work—may be required in addition to the basic course work in given curricula.

Graduation Credit for Physical Education Courses

No more than three units of physical education, whether earned at UCSD or transferred from another institution, may be counted toward graduation.

Undergraduate Minors and Programs of Concentration

A minor curriculum—or “minor” for short—is a set of courses on a well-defined subject. For students entering after January 1, 1998: a minor shall consist of at least twenty-eight units, of which at least twenty units must be upper-division. For sound academic reasons and with the approval of the Committee on Educational Policy, a minor may be established with fewer than twenty upper-division units. All minor curricula must be approved by the Committee on Educational Policy and be published in this General Catalog. A student may not apply toward the minor any upper-division course that has been used to satisfy the requirements of his or her major curriculum. A student's successful completion of a minor curriculum will be recorded on his or her transcript at graduation.

Certain colleges require their students to complete one or more “programs of concentration” before graduation, and the courses or types of courses acceptable for programs of concentration are determined by the faculty of the college or a subcommittee thereof. A program of concentration is not necessarily a minor. Indeed, a program of concentration is a minor only if it meets the criteria in the above paragraph, and only then may it be listed on a student's transcript as a minor. Otherwise it will be recorded as a concentration at graduation.

Honors

COLLEGE HONORS AT GRADUATION

The Academic Senate has established the following standards for award of college honors at graduation:

There shall be a campus-wide requirement for the award of college honors at graduation. No more than 14 percent of the graduating seniors on campus shall be eligible for college honors. Normally, no more than the top 2 percent shall be eligible for summa cum laude and no more than the next 4 percent for magna cum laude, although minor variations from year to year shall be permitted. The remaining 8 percent are eligible for cum laude. The ranking of students for eligibility for college honors shall be based upon the grade-point average. In addition, to be eligible for honors, a student must receive letter grades for at least eighty quarter-units of course work at the University of California. Each

college may award honors at graduation only to those who are eligible to receive college honors.

DEPARTMENT HONORS

Each department or program may award honors to a student at graduation in accordance with the following criteria:

1. The student must have completed a *special* course of study within the department or program. The requirements for this *special* course of study shall be approved by the divisional Committee on Educational Policy and published in the catalog. The requirements must include 8–12 units of supervised research or other creative activity leading to the preparation of a paper or other appropriate project. Public presentation of the project, through performance, participation in the undergraduate research conference, or other appropriate means, shall explicitly be encouraged.
2. The department or program shall establish formal procedures and criteria for application and admission to the program, which shall normally include a GPA of 3.5 in the major as a prerequisite. Students with a GPA lower than 3.5 may be admitted by exception if they show promise of success in research or creative activity.
3. Each student whose project earns the equivalent of a grade of “B” or better and who has maintained a GPA of at least 3.25 in the major shall be entitled to the designation “with distinction” on the diploma after the departmental or program name. Subject to the approval of the Committee on Educational Policy, each department or program shall establish criteria for the award of the designations “with high distinction” and “with highest distinction.”

Honors awarded by departments may be designated on the diploma by the words “with distinction,” “with high distinction,” and “with highest distinction” after the departmental or program name. Currently the departments and majors listed below are approved to award honors to graduating seniors: Anthropology, Biology, Chemistry, Chinese Studies, Classical Studies, Cognitive Science, Communication, Critical Gender Studies, Earth Sciences, Economics, Electrical and Computer Engineering, German Studies, History, Human Development, International Studies, Japanese Studies, Judaic Studies, Linguistics, Literature, Management Science,

Muir Special Project, Music, Philosophy, Physics, Political Science, Psychology, Roosevelt Individual Studies, Sociology, Study of Religion, Theatre and Dance, Urban Studies and Planning, and Visual Arts.

PROVOST HONORS

Provost honors are awarded quarterly based upon the completion of twelve graded units with a GPA of 3.5 or higher with no grade of D, F, or NP recorded for the quarter.

PHI BETA KAPPA

Phi Beta Kappa is the oldest and most prestigious academic honor society for undergraduates in the liberal arts and sciences in America. UCSD is one of only 265 four-year institutions that have been granted chapters since the society was founded in 1776. In addition, there are approximately fifty active PBK alumni associations in major cities around the country.

More than 200 UCSD faculty and staff were initiated at their own undergraduate colleges, and they make up the local chapter, Sigma of California. Each spring the campus chapter elects student members on the basis of high scholastic achievement and breadth of academic background. The minimum criteria for membership, evaluated at the end of winter quarter, include:

1. Successful completion of at least 160 quarter-units by the time of consideration and at least junior standing.
2. Cumulative GPA of 3.65 or higher for work at UCSD. GPAs from transfer work are considered, but the GPA at UC must be at least 3.65, as must the overall GPA. (Juniors are rarely invited into Phi Beta Kappa, and they are held to higher standards, including a minimum GPA of 3.80.)
3. A minimum of five courses in the humanities or equivalent subjects, explicitly excluding performance or studio courses as required by the National Society.
4. At least one year of college-level course credit in a second language or officially demonstrated equivalent literacy and proficiency.
5. At least one year of college-level course credits in mathematics, quantitative science, logic, or statistics (not all science courses fulfill this requirement).
6. Full-time enrollment at UCSD for at least two years (or completion of at least 70 graded credits at UCSD).

As required by the National Society of Phi Beta Kappa, when they consider a student for membership the reviewers examine the excellence of the individual's academic record, the breadth and quality of the courses taken, and evidence that the student has pursued a serious line of work and is of good character. Invitations to membership are sent simultaneously by email and by letter to each student's permanent address, as maintained by the student on TritonLink. Letters are sent in mid-May, and initiation takes place in early June.

Application for Degree

Undergraduate seniors are required to file a Degree and Diploma Application form with their college academic advising office. Students should check with their college academic advising office for exact deadlines. Advising and counseling sessions should take place well before the quarter of graduation to ensure all degree requirements will be satisfied. Applications not on file by the deadline are subject to special approval. Students who have not completed all degree requirements by the end of the quarter filed for graduation must file a new application. Failure to file this petition may delay the graduation date and receipt of diploma.

Specific Regulations

Progress toward Degrees

In order to apply the units of a course toward unit requirements for a degree, a student must receive an A, B, C, D, P, or S grade in the course. (Plus or minus suffixes (+/-) may be affixed to A, B, and C.) Further, an undergraduate student must have a 2.0 or higher grade-point average (GPA) to receive a bachelor's degree, and a graduate student must have a 3.0 or higher GPA to receive a higher degree.

Probation

An undergraduate student is subject to academic probation if at the end of any term his or her GPA for that term or his or her cumulative GPA is less than 2.0.

Subject to Disqualification

An undergraduate student is subject to academic disqualification from further registration if at the end of any term his or her GPA for that

term is less than 1.5 or if he or she has completed two successive terms on academic probation without achieving a cumulative GPA of 2.0. Continued registration of an undergraduate who is subject to disqualification is at the discretion of the faculty of the student's college or its authorized agent (generally the provost/Office of the Provost).

If a student is not currently in scholastic good standing or has been denied registration for the next ensuing quarter on the date on which he or she left the university, a statement of his or her status shall accompany his or her transcript. A student who has been disqualified from further registration at the University of California may not register for UCSD courses through Summer Session, through UCSD Extension by way of the concurrent enrollment mechanism, or in UCSD Extension courses offered at the 100 level. Students receiving financial assistance should refer to information in the Financial Aid section of this catalog. Unique scholarship eligibility requirements must be met.

Minimum Progress

A full-time undergraduate student is subject to disqualification from further registration if he or she does not complete thirty-six units in any three consecutive quarters of enrollment. Continued registration of an undergraduate who is subject to disqualification due to lack of minimum progress is at the discretion of the faculty of the student's college or its authorized agent (generally the provost/Office of the Provost).

Eligible students may file for an exemption from the minimum progress requirement by completing the Part-time Study application and receiving college approval prior to the end of the second week of the quarter. (See "Part-time Study at the University of California.")

Double Majors

See "Requirements for the Bachelor's Degree" in this section.

Repetition of Courses

Repetition for credit of courses not so authorized by the appropriate Committee on Courses is allowed subject to the following limitations:

1. A student may not repeat a course for which a grade of A, B, C, I, P, or S is recorded on his or her transcript. (Plus or minus suffixes (+/-) may be affixed to A, B, and C.)
2. Courses in which a grade of D or F has been awarded may not be repeated on a P/NP or S/U basis. (Graduate students must petition and receive approval in-advance to repeat a course for credit.)
3. Undergraduate students may repeat a course in which a grade of NP has been awarded for a P/NP or letter grade, if applicable. Graduate students may repeat a course in which a grade of U has been awarded on an S/U basis only.
4. Repetition of a course for which a student's transcript bears two or more entries with grades among D, F, NP, or U requires approval of the appropriate provost or dean.
5. All grades received by a student shall be recorded on the student's transcript. A student may receive degree credit for a course only once, unless the course has been approved for repetition.
6. The first sixteen units of courses that have been repeated by an undergraduate student and for which the student has received a grade of D, F, or NP, shall not be used in grade-point calculations, unless the course is repeated by a student who has admitted to or been found guilty of academic dishonesty; in which case, the units for both the initial course and the repeated course shall be counted in grade-point calculations.

Note: Although the University of California grade-point average will not include these repeated courses, other institutions/graduate programs, and agencies may recalculate the grade-point average to reflect all assigned grades.

Special Studies Courses

Subject to the limitations below, a student may earn credit for supervised special studies courses on topics of his or her own selection. An undergraduate taking one or more special studies courses must complete an application for each such course before the start of the course.

COURSE NUMBER

Ordinarily, special studies courses are numbered 97, 98, or 99 for lower division and 197, 198, or 199 for upper division. The 97 and 197 courses are for individually arranged field studies. The 98 and 198 courses are for directed group study. The 99 and 199 courses are for individual independent study.

LIMITATIONS

1. Enrollment requires the prior consent of the instructor who is to supervise the study and the approval of the department chair. The applicant shall show that his or her background is adequate for the proposed study.
2. A student must have completed at least thirty units of undergraduate study at UCSD and must have attained a UCSD grade-point average of at least 3.0 to enroll in a lower-division special studies course, and at least ninety units of undergraduate study and must have attained a grade-point average of at least 2.5 to enroll in an upper-division special studies course.
3. A student may enroll for no more than a total of four units of 98, 99, 198, and 199 Special Studies courses in one term.
4. Except as may otherwise be authorized by the CEP Subcommittee on Undergraduate Courses (e.g., for honors programs), only a grade of P or NP is to be assigned for undergraduates enrolled in any special studies course.
5. Subject to the approval of the CEP Subcommittee on Undergraduate Courses, a department may impose additional limitations on its supervised special studies courses.

EXCEPTIONS

On the advice of the instructor(s) and the department chair concerned, the provost of a student's college may authorize exceptions to the limitations (2) and (3) listed above.

PROCEDURES

1. Students must complete an "Application for UCSD Special Studies Course Enrollment," available in department offices and via TritonLink, and secure instructor and department chair approval.
2. Students must submit an approved form to the Office of the Registrar to enroll in a special studies course.

Undergraduate Assistance in Courses

An undergraduate instructional apprentice is an undergraduate student who serves as an assistant in an undergraduate course under the supervision of a faculty member. The purpose of the apprenticeship is to learn the methodology

of teaching through actual practice in a regularly scheduled course.

GUIDELINES

1. An undergraduate instructional apprentice shall be an upper-division student. He or she shall be involved only with lower-division courses.
2. Students are not permitted to assist in courses in which they are enrolled.
3. An undergraduate instructional apprentice must have a minimum grade-point average of 3.0. Departments may establish higher grade-point average requirements.
4. The faculty instructor is responsible for course content and for maintaining the overall quality of instruction, including supervision of undergraduate instructional apprentices. The faculty instructor is responsible for all grades given in the class.
5. The instructor is expected to meet regularly with the undergraduate instructional apprentice to evaluate the student's performance and to provide the direction needed for a worthwhile educational experience.
6. An undergraduate instructional apprentice may receive credit on a Pass/Not Pass basis only (through registration in a 195 course), subject to approval by the Committee on Educational Policy.
7. A student may not be an instructional apprentice more than once for the same course for credit.
8. A student may not be an instructional apprentice in more than one course in a quarter.
9. The total credit accumulated as an apprentice shall not exceed eight units.

PROCEDURE

All departments/programs using undergraduate instructional apprentices shall submit to CEP a description of the role of the undergraduate instructional apprentice, as part of the petition for approval. Any deviation from the guidelines above must be explained and justified in a memo accompanying the petition. Any major change in the function or duty of the apprentice in a course should also be approved by CEP.

All UGIA applications must be received and approved by the CEP prior to the start of the quarter in which the student is to apprentice.

Writing Requirements

A student may register in an upper-division course only if the student has satisfactorily completed the writing requirement of his or her college or has obtained the consent of the instructor of the upper-division course. The requirement is waived for a student who has been admitted as a transfer student and has not completed three quarters of residence at UCSD.

Final Examinations

Final examinations are obligatory in all undergraduate courses except laboratory courses, or their equivalent, as individually determined by the Committee on Courses.

Each such examination shall be conducted in writing whenever practical and must be completed by all participants within the announced time shown in TritonLink under *Calendars and Exam Schedules*. These examinations may not exceed three hours in duration.

In laboratory courses, the department concerned may, at its option, require a final examination subject to prior announcement in TritonLink under *Calendars and Exam Schedules*.

Religious Accommodation

It is the policy of the university to make reasonable efforts to accommodate students having bona fide religious conflicts with scheduled examinations by providing alternative times or methods to take such examinations. If a student anticipates that a scheduled examination will occur at a time at which his or her religious beliefs prohibit participation in the examination, the student must submit to the instructor a statement describing the nature of the religious conflict and specifying the days and times of conflict.

1. For final examinations, the statement must be submitted no later than the end of the second week of instruction of the quarter.
2. For all other examinations, the statement must be submitted to the instructor as soon as possible after a particular examination date is scheduled.

If a conflict with the student's religious beliefs does exist, the instructor will attempt to provide an alternative, equitable examination which does not create undue hardship for the instructor or for the other students in the class.

Policy on Final Examinations

- a. Academic Senate Regulations specify that final examinations are required in all undergraduate courses, unless an exception has been approved by CEP or the CEP Subcommittee on Undergraduate Courses. Final examinations are, however, normally not required in laboratory courses.
- b. Final examinations may not be given at any time before examination week without explicit approval of CEP.
- c. Although the instructor may give a final examination at an alternative time during final examination week with the approval of CEP, students must be permitted to take an equivalent examination at the originally scheduled time if they so desire.
- d. An instructor may administer an examination at an alternative time if a valid reason is given by the student for not taking the regularly scheduled examination. Valid reasons include: serious illness and family disasters. Rescheduling as a result of a religious obligation is governed by the UCSD Policy on Religious Accommodation.
- e. No student may be excused from assigned final examinations.
- f. A final examination must, whenever practicable, be written and must be completed by all participants within a previously announced time limit.
- g. Final examinations in non-laboratory courses may not exceed three hours duration.
- h. No instructor may require a "take-home" final examination be turned in before the date and hour at which the examination for the course was scheduled by the Registrar's Office.
- i. Faculty members (including visiting faculty) must be available to students during final examination week up to the time when the final examinations of their courses are given and, physically present in the examination room for the entire final examination, except in special cases when an exam is given in more than one room. In cases where the approved absence of a course instructor cannot be avoided, the department chair or program director must seek CEP approval to designate another faculty member to administer the final examination. Nevertheless, faculty course instructors themselves must assign grades for the courses they teach.

- j. CEP will not recommend approval of faculty absences during finals week unless arrangements to administer the final examination have been worked out in advance with the department chair or program director.

Policy on Midterm Examinations

- a. Faculty are obliged to have posted in the *Schedule of Classes* the date and time of any midterm which is to be given outside of the regularly scheduled class hours.
- b. Additionally, any midterm given outside of the regularly scheduled class hours must be announced in a syllabus distributed to the class at the beginning of the quarter.

Retention of Examination Papers

Instructors are required to retain examination papers for at least one full quarter following the final examination period, unless the papers have been returned to the students.

Credit by Examination

Credit by examination may be authorized and given by the instructor for a course with the concurrence of the student's provost (or dean). The examination will cover work for the entire course.

The student requesting credit by examination must not have already received a grade or a W in the course.

The student requesting credit by examination must be registered and in good academic standing.

A part-time student who, by registering to take a course credit by examination, surpasses the number of units allowed for part-time status, must register and pay fees as a full-time student.

If credit by examination is authorized, the student will receive a grade of A+, A, A-, B+, B, B-, C+, C, C-, D, or F unless the student's petition for examination specifies the grade to be Pass or Not Pass. The student's record will indicate that the course was attempted through credit by examination.

Use of Student Petition

For exceptional circumstances, students may request approval for variances to regulations and policies. This should be done by filling out an Undergraduate Student Petition (available on TritonLink, in the provosts' offices, or the Office of the Registrar), securing the necessary approvals,

and filing the petition with the appropriate department or college academic advising office.

Grading Policy

Grades in undergraduate courses are defined as follows: A, excellent; B, good; C, fair; D, poor; F, fail; I, incomplete (work of passing quality but incomplete for good cause); and IP (In Progress). The designations P (Pass) and NP (Not Pass) are used in reporting grades for some undergraduate courses. P denotes a letter grade of C- or better. A blank grade indicates no record or no report of grade was received from the instructor. W is recorded on the transcript indicating the student withdrew or dropped the course sometime after the beginning of the fifth week of a quarter.

Note: Students who drop certain laboratory courses after the second scheduled meeting period will receive a W grade.

Instructors have the option of assigning plus (+) and minus (-) suffixes to the grades A, B, and C. This option became available as of fall 1983.

Grade Points

For each student, the registrar will calculate a grade-point average (GPA) over courses taken at any campus of the University of California, not including Extension courses. Grade points per unit will be assigned as follows: A=4, B=3, C=2, D=1, F=0. When attached to the grades of B and C, plus (+) grades carry three-tenths of a grade point more per unit. The grade of A+, when awarded, represents extraordinary achievement but does not receive grade-point credit beyond that received for the grade of A. When attached to the grades of A, B and C, minus (-) grades carry three-tenths of a grade point less per unit than the unsuffixed grades. Courses in which an I, IP, P, NP, S, U, or W grade has been awarded will be disregarded in grade-point calculations. A graduate student's GPA will be calculated over courses taken while in graduate standing.

Grade	Grade Points	Grade	Grade Points
A+	4.0	C+	2.3
A	4.0	C	2.0
A-	3.7	C-	1.7
B+	3.3	D	1.0
B	3.0	F	0
B-	2.7		

The grade-point average is computed by dividing the total number of grade points earned by the total unit value of letter-graded courses completed.

At the end of each quarter, the instructor of each course will assign a letter grade to each student who was enrolled in that course at the end of the ninth week of instruction on the basis of the work required for the entire course. An I grade may be assigned if appropriate.

Changes in Grades

All grades except I and IP are final when filed by instructors on end-of-term grade reports. However, a final grade may be corrected when a clerical or procedural error is discovered. No change of a final grade may be made on the basis of revision or augmentation of a student's work in the course. No term grade except Incomplete may be revised by further examination. No grade may be changed after one calendar year from the time it was recorded. Petitions for exceptions are referred to the Committee on Educational Policy.

No Report/No Record

A blank entry appearing on student transcripts in lieu of a grade indicates that no grade was assigned by the instructor. A blank entry will lapse automatically into an F, NP, or U if not replaced by a final grade by the last day of instruction of the subsequent quarter.

Pass/Not Pass

The Pass/Not Pass option is designed to encourage undergraduate students to venture into courses which they might otherwise hesitate to take because they are uncertain about their aptitude or preparation. Consistent with college policy, an undergraduate student in good standing may elect to be graded on a P/NP basis in a course. No more than one-fourth of an undergraduate student's total UCSD course units may be graded on a P/NP basis. Departments may require that courses applied toward the major be taken on a letter-grade basis. Enrollment under this option must take place within the first four weeks of the course. A grade of Pass shall be awarded only for work which otherwise would receive a grade of C- or better. Units passed shall be counted in satisfaction of degree requirements, but such courses shall be disregarded in determining a student's grade-point average.

If students wish to change their selected grading option after enrolling, they may use WebReg in TritonLink, or complete an Add/Change/Drop card and file it at the Registrar's Office. The last day to change grading options is the end of the fourth week of instruction.

Only a grade of P or NP is to be assigned for courses numbered 97, 98, 99, 195, 197, 198, and 199. Subject to the approval of the CEP Subcommittee on Undergraduate Courses, departments may impose additional limitations or restrictions.

Only a grade of P or NP is to be assigned an undergraduate student's work in a noncredit (0-unit) course.

Note: See "Choosing a College at UCSD" section for further information regarding the P/NP grading option.

The W Grade

When a student withdraws from the university or drops a course, other than a laboratory course, between the beginning of the fifth week of instruction and the end of the ninth week of instruction of a quarter, the registrar will assign a W to the student for each course affected. Only the registrar may assign a W.

Note: Students who drop certain laboratory courses after the second scheduled meeting period will receive a W grade.

Courses in which a W has been entered on the student's transcript will be disregarded in determining a student's grade-point average.

ADDING AND DROPPING COURSES AND THE W GRADE

A student may, with the approval of the instructor (and adviser, if required), add a course to the study list before the end of the second week of instruction of a quarter.

A student may drop a course before the end of the ninth week of instruction via TritonLink, after first notifying the instructor and/or department.

A student who wishes to drop all courses is required to file an Undergraduate Request for Withdrawal form with the college academic advising or dean's office.

1. A course dropped before the end of the fourth week of instruction will not appear on the student's transcript.

Note: Students who drop certain laboratory courses after the second scheduled meeting period will receive a W grade.

2. If a student drops a course after the end of the fourth week of instruction and before the end of the ninth week of instruction, the registrar will assign a final grade of W to the student for that course.
3. A student may not drop a course after the end of the ninth week of instruction.

When an instructor has assigned a grade in a course in accordance with the Academic Senate policy on Integrity of Scholarship prior to the end of the ninth week of instruction, that grade may not subsequently be changed by dropping the course or withdrawing from the university.

WITHDRAWING FROM SCHOOL AND THE W GRADE

A student may withdraw from the university before the end of the ninth week of instruction of a quarter.

1. If a student withdraws before the end of the fourth week of instruction, no course entries will appear on the student's transcript for that quarter.

Note: Students who drop certain laboratory courses after the second scheduled meeting period will receive a W grade.

2. If a student withdraws after the end of the fourth week of instruction and before the end of the ninth week of instruction, the registrar will assign a final grade of W to the student for each course in which the student was enrolled at the beginning of the fifth week of instruction.
3. Each student will receive a final grade for each course in which the student was enrolled at the end of the ninth week of instruction of the quarter.

When an instructor has assigned a grade in a course in accordance with the Academic Senate policy on Integrity of Scholarship prior to the end of the ninth week of instruction, that grade may not subsequently be changed by dropping the course or withdrawing from the university.

The In Progress (IP) Grade

For exceptional and compelling reasons, a course extending over more than one quarter may be authorized with the prior approval of the Committee on Educational Policy and

Courses (for undergraduate courses) or the Graduate Council (for graduate courses). In such courses an evaluation of a student's performance may not be possible until the end of the final term. In such cases the instructor may assign the provisional grade IP (in progress).

IP grades shall be replaced by final grades if the student completes the full sequence. The instructor may assign final grades, grade points, and unit credit for completed terms when the student has not completed the entire sequence provided that the instructor has a basis for assigning the grades and certifies that the course was not completed for good cause. An IP not replaced by a final grade will remain on the student's record.

In calculating a student's grade-point average, grade points and units for courses graded IP shall not be counted. However, at graduation, courses still on the record as graded IP must be treated as courses attempted in computation of the student's grade-point average in assessing a student's satisfaction of Senate Regulation 634.

The Incomplete (I) Grade

Academic Senate regulations state that the Incomplete grade (I) for undergraduates shall be disregarded in determining a student's grade-point average, except at point of graduation, when students must have an overall 2.0 (C) on all work attempted at the University of California. All work required for a degree must be completed by the end of the quarter the student filed for graduation. Students requesting an I grade the last quarter before graduation may have their graduation date delayed.

Undergraduate students whose work is of non-failing quality but incomplete for good cause, such as illness, must file a Request to Receive/Remove Grade Incomplete form.

Graduate students enrolled in graduate courses may request instructors to assign the grade of "Incomplete" in order to be permitted to complete required work within the following quarter. If the required work is not submitted by the end of the quarter following so that the grade can be reported by the instructor, the grade will automatically be changed to one of "Failure" by the registrar. Graduate students must file a Request to Receive/Remove Grade Incomplete form.

1. Students should complete their portion of the request form, including the reason they are requesting the Incomplete, and provide

appropriate documentation to support their request (e.g. doctor's note). The deadline for filing an Incomplete shall be no later than the first working day after final examination week.

2. The instructor has the option to approve or disapprove the request and should state on the form *how* and *when* the I is to be completed. If approved, the instructor submits the form with term grade reports.
3. Students must complete the work to remove the Incomplete on or before the date agreed upon with the instructor and in time for the instructor to assign a grade **before the end of finals week the following quarter.**
4. Failure to complete this work within the regulation time limit will result in the Incomplete lapsing to a *permanent* F, NP, or U grade.

A student who has received an I grade should not re-enroll in the course to make up the missing work. If the student were to re-enroll, the course would be considered a repeat and would not remove the prior quarter's Incomplete, which would lapse to a permanent F, NP, or U grade.

INTENDED USE OF THE INCOMPLETE

The Incomplete is intended for use when circumstances *beyond a student's control* prohibit taking the final exam or completing course work.

The Incomplete is *not* intended as a mechanism for allowing a student to retake a course. A student who has fallen substantially behind and needs to repeat a course can drop the course prior to the end of the ninth week of classes. Otherwise, the instructor should assign the appropriate final grade (D, F, NP, or U, for example).

An Incomplete may not be used simply to allow a bit more time for an undergraduate student who has fallen behind for no good reason. An I may be granted *only* to students who have a legitimate excuse. Examples of unacceptable reasons for approving an Incomplete include the need to rewrite a paper; the demands of a time-consuming job; the desire to leave town for a vacation, family gathering, or athletic contest; the desire to do well on GRE tests; and the like.

EXTENSION OF INCOMPLETE

For justifiable reasons, such as illness, students can petition to extend the Incomplete past one quarter. Petitions to extend the

Incomplete must be submitted to the Academic Senate or the dean of OGSR (for graduate students), and must have the prior approval of the instructor and the department chair. Requests for extensions must be submitted before the Incomplete grade lapses to an F, NP, U grade. The extension cannot be made retroactively.

An I grade may be replaced upon completion of the work required by a date agreed upon with the instructor, but no later than the last day of finals week in the following quarter. If not replaced by this date, the I grade will lapse into an F, NP, or U grade, depending upon the student's initial grading option.

Student Copy of Final Grades

At the end of each quarter students should check TritonLink for grade information. Grades are usually available ten working days after the end of final examinations. Students should examine their record for accuracy and report any omissions or errors to the Office of the Registrar immediately.

Transcript Requests

Application for an official transcript of record to be sent to another party or institution should be submitted to the registrar several days in advance of the time needed. An application for a transcript must bear the student's signature. Please refer to the UCSD Registrar's Web site at www.registrar.ucsd.edu for the most current transcript information.

Grade Appeals

- A. 1. If a student believes that nonacademic criteria have been used in determining his or her grade in a course, he or she may follow the procedures described in this regulation.
2. *Nonacademic criteria* means criteria not directly reflective of academic performance in this course. It includes discrimination on political grounds or for reasons of race, religion, sex, or ethnic origin.
3. Appeals to this committee [see (B)(4)] shall be considered confidential.
- B. 1. The student must attempt to resolve the grievance with the instructor within the first month of the following regular academic quarter.

2. If the grievance is not resolved to the student's satisfaction, he or she may then attempt to resolve the grievance through written appeal to the department chair or equivalent, who shall attempt to adjudicate the case with the instructor and the student within two weeks.
3. If the grievance still is not resolved to the student's satisfaction, he or she may then attempt to resolve the grievance through written appeal to the provost of the college, the dean of Graduate Studies, or the dean of the School of Medicine, who shall attempt to adjudicate the case with the instructor, the chair, and the student within two weeks.
4. If the grievance is not resolved to the student's satisfaction by the provost or dean, the student may request consideration of the appeal by the CEP Subcommittee on Grade Appeals (hereinafter called the Committee) according to the procedures outlined below. This request must be submitted before the last day of instruction of the quarter following the quarter in which the course was taken.
 - C. 1. The student's request for Committee consideration should include a written brief stating the nature of the grievance, including copies of any and all documents in his or her possession supporting the grievance. The submission of the brief to the Committee places the case before it and restricts any change of the challenged grade to a change initiated by the Committee, unless the Committee determines that all other avenues of adjudication have not been exhausted.
 2. Upon receipt of the student's request, the Committee immediately forwards a copy of it to the instructor, the department chair or equivalent, and the provost or dean with a request for written reports of their attempts to resolve the complaint.
 3. The Committee, after having determined that all other avenues of adjudication have been exhausted, shall review the brief and the reports to determine if there is substantial evidence that nonacademic criteria were used.
 - a. If the Committee finds substantial evidence that nonacademic criteria were used, it shall follow the procedure in paragraph (D) below.
 - b. If the Committee decides the allegations are without substance, it shall serve written notification of its findings to the complainant and to the instructor within two weeks. Within ten days the complainant or the instructor may respond to the findings. If there are no responses, or if after consideration of such responses the Committee sustains its decision, the grade shall not be changed.
 - D. 1. If the Committee determines that there is evidence that nonacademic criteria were used, it shall interview any individual whose testimony might facilitate resolution of the case. The complainant shall make available to the Committee all of his or her work in the course which has been graded and is in his or her possession. The instructor shall make available to the Committee all records of student performance in the course and graded student work in the course which is still in his or her possession. At the conclusion of the case each document shall be returned to the source from which it was obtained.
 2. The Committee shall complete its deliberations and arrive at a decision within two weeks of its determination that evidence of the use of nonacademic criteria had been submitted. A record of the Committee's actions in the case shall be kept in the Senate Office for three years.
 3. If the allegations of the complainant are not upheld by a preponderance of the evidence, the Committee shall so notify the complainant and the instructor in writing. Within one week of such notification, the complainant and the instructor shall have the opportunity to respond to the findings and the decision of the Committee. If there are no responses, or if after considering such responses the Committee sustains its decision, it shall so notify the complainant and the instructor in writing and the grade shall not be changed.
 4. If the Committee determines that nonacademic criteria were significant factors in establishing the grade, it shall give the student the option of either receiving a grade of P or S in the course or retroactively dropping the course without penalty. A grade of P or S awarded in this way shall be acceptable towards satisfaction of any degree requirement, even if a minimum letter grade in the course had been required, and shall not be counted in the number of courses a student may take on a P/NP basis. If the student elects to receive a grade of P or S, the student may also elect to have a notation entered on his or her transcript indicating that the grade was awarded by the divisional grade appeals committee.
 - a. The Committee shall serve written notification of its finding and its decision to the complainant and the instructor. The complainant and the instructor may respond in writing to the findings and the decision of the Committee within one week of such notification.
 - b. If there are no responses, or if after considering such responses the Committee sustains its decision, the grade shall be changed; the Committee shall then instruct the registrar to change the grade to P or S or, if the student elected the drop option, to retroactively drop the course from the student's record. Copies of the Committee's instruction shall be sent to the complainant and the instructor.
 - E. These procedures are designed solely to determine whether nonacademic criteria have been used in assigning a grade, and if so to effect a change of that grade.
 1. No punitive actions may be taken against the instructor solely on the basis of these procedures. Neither the filing of charges nor the final disposition of the case shall, under any circumstances, become a part of the personnel file of the instructor. The use of nonacademic criteria in assigning a grade is a violation of the Faculty Code of Conduct. Sanctions against an instructor for violation of the Faculty Code may be sought by filing a complaint in accordance with San Diego Division By-Law 230(D). A complaint may be filed by the student or by others.
 2. No punitive actions may be taken against the complainant solely on the basis of

these procedures. Neither the filing of charges nor the final disposition of the case shall, under any circumstances, become a part of the complainant's file. The instructor may, if he or she feels that his or her record has been impugned by false or unfounded charges, file charges against the complainant through the office of the vice chancellor for Student Affairs, the dean of Graduate Studies, or the associate dean for Student Affairs of the School of Medicine.

UCSD Policy on Integrity of Scholarship

Integrity of scholarship is essential for an academic community. The university expects that both faculty and students will honor this principle and in so doing protect the validity of university intellectual work. For students, this means that all academic work will be done by the individual to whom it is assigned, without unauthorized aid of any kind. Instructors, for their part, will exercise care in planning and supervising academic work, so that honest effort will be upheld.

The following policies apply to academic course work for both undergraduate and graduate students. A separate policy exists governing integrity of research. Medical students are governed by policies specified in the *Handbook for School of Medicine Advisers and Students*, as formulated by the School of Medicine Committee on Educational Policy.

INSTRUCTORS' RESPONSIBILITY

At the beginning of the term the instructor shall state in writing (e.g., in the syllabus, information sheets, or Web site) what graded assignments and exams will be required of students. If there are any course-specific rules required by the instructor for maintaining academic integrity, the instructor shall also inform students in writing what kinds of aid and collaboration, if any, are permitted on graded assignments and exams. The UCSD Policy on Integrity of Scholarship states the general rules for student integrity.

STUDENTS' RESPONSIBILITY

Students are expected to complete the course in compliance with the instructor's standards. No student shall engage in any activity that involves

attempting to receive a grade by means other than honest effort, for example:

No student shall knowingly procure, provide, or accept any unauthorized material that contains questions or answers to any examination or assignment to be given at a subsequent time.

No student shall complete, in part or in total, any examination or assignment for another person.

No student shall knowingly allow any examination or assignment to be completed, in part or in total, for himself or herself by another person.

No student shall plagiarize or copy the work of another person and submit it as his or her own work.

No student shall employ aids excluded by the instructor in undertaking course work.

No student shall alter graded class assignments or examinations and then resubmit them for regrading.

No student shall submit substantially the same material in more than one course without prior authorization.

A student acting in the capacity of an instructional assistant (IA), including but not limited to teaching assistants, readers, and tutors, has a special responsibility to safeguard the integrity of scholarship. In this role the student functions as an apprentice instructor, under the tutelage of the responsible instructor. An IA shall equitably grade student work in the manner agreed upon with the course instructor. An IA shall not make any unauthorized material related to tests, exams, homeworks, etc., available to any student.

Responsibility for Disposition of Cases of Academic Dishonesty

The responsibility for maintaining the standards of academic honesty rests with two university authorities: the faculty and the administration. Under the Standing Orders of the Regents, discipline is the exclusive responsibility of the campus administration, while authority over courses and curricula is delegated to the faculty through the Academic Senate. When a student has admitted to or has been found guilty of a violation of the standards of academic honesty, two separate actions shall follow.

- (1) The instructor shall determine the student's grade on the assignment and in the course as a whole. Any breach of academic honesty may be considered grounds for failure in the course, although less serious consequences may be incurred in less serious circumstances.
- (2) The appropriate administrative authority shall impose a disciplinary penalty. For undergraduates, the appropriate administrative authority is the Council of Deans of Student Affairs. For graduate students, the appropriate administrative authority is the assistant dean of Graduate Studies. Sanctions will be imposed in accordance with guidelines authorized by the Committee on Educational Policy.

Procedures for Disposition of Cases of Academic Dishonesty

The procedure for disposition of cases of academic dishonesty is divided into three phases (A. initial phase; B. decision and resolution phase; C. appeals phase):

A. The Initial Phase

When an instructor has reason to believe that a student has violated UCSD's Policy on Integrity of Scholarship, the instructor should proceed in one of two ways:

- I. Call the student to a meeting to discuss the suspected violation. If the instructor decides that there is evidence of academic dishonesty, he or she must report the suspected violation to the Office of the Student Conduct Coordinator (SCC) in the Office of Student Policies and Judicial Affairs (SPJA).
- II. Notify the SCC directly that there is a suspected violation of academic integrity.

Once the SCC has been notified by the instructor, the SCC shall notify the appropriate dean that a student is suspected of a violation of academic integrity and initiate record keeping to track the disposition of the case. For graduate students, the appropriate dean is the assistant dean of Graduate Studies. For an undergraduate student who is alleged to have acted alone or in concert with students from his or her own college, the appropriate dean is the dean of Student Affairs of the student's college. If students from more than one college are allegedly

involved in the same incident, the SCC will direct the case to the chair of the Council of Deans of Student Affairs. The chair will then appoint one of the deans to proceed with the case for all students, regardless of college.

The dean shall contact the instructor and discuss the evidence in the case. If the instructor decides to proceed with the charges, the dean shall notify the student of the charges in writing and inform the student of the procedures for processing cases of academic dishonesty under the UCSD Policy on Integrity of Scholarship and where to obtain advice and assistance, such as from Student Legal Services. If the instructor is absent, the instructor's department chair or program director may represent the instructor.

B. The Decision and Resolution Phase

The student shall have ten (10) business days following notification by the dean to meet with the dean to discuss the charges and possible administrative penalties. The student shall then decide whether:

- I. to accept the charge of academic dishonesty, or
- II. to deny the charge of dishonesty and to proceed to a formal hearing

Consequences of each of these decisions are presented below. If the student fails to respond to the written notification of alleged misconduct and does not meet with the dean, he or she shall be presumed to have taken decision I.

Decision I (Student accepts charge of academic dishonesty): If an undergraduate makes decision I, the dean shall notify the SCC of the student's decision. The SCC shall notify the instructor and, if the course has been completed, request a grade assignment. The instructor shall assign a grade for the course and notify the SCC of the grade.

The dean shall also make a recommendation of any administrative penalty to the Council of Deans of Student Affairs. The Council of Deans of Student Affairs shall decide the administrative penalty and notify the SCC of the decision. Notification to the SCC of the administrative penalties should take no longer than 30 business days from the time the dean is notified by the SCC of the charge.

Within (10) ten business days of being notified by the Council of Deans of Student Affairs, the SCC shall notify the student, the dean, and the instructor of the administrative penalty. Once the course has been completed and the SCC has been notified of the grade by the instructor, the SCC will notify the student, the dean, and the Registrar of the grade.

If a graduate student makes decision I, the assistant dean of Graduate Studies shall decide the administrative penalty and the instructor shall decide the course grade. Both shall notify the SCC of their decisions. The SCC shall then notify the student, the dean, and the Registrar of the grade, and the instructor of the administrative penalty.

A record of the administrative penalty shall be maintained in the office of the appropriate dean, the Council of Deans, and the SCC. A statement of the final disposition of the case shall be sent by the SCC to the chairperson of the department or program in which the violation occurred.

Decision II (Student denies charge and requests a formal hearing): If the student denies having committed the alleged act of academic dishonesty (decision II), he or she must submit a written request for a formal hearing to the appropriate dean within ten (10) business days of being notified of the charges by the dean. The dean shall transmit the written request to the SCC. Within thirty (30) calendar days after receipt of the request, the SCC shall schedule a formal hearing of the case by the Academic Dishonesty Hearing Board ("Hearing Board"). The SCC shall provide at least ten (10) business days' notice to the student and the instructor of the time, date, and location of the hearing. The SCC shall be available to advise the instructor of the procedures and options for presentation of the case and, if the instructor so chooses, to present the case to the hearing board.

The Standing Hearing Board shall be composed of three faculty members appointed by the Academic Senate, one graduate student appointed by the assistant dean of Graduate Studies, one upper-division undergraduate student appointed by the vice chancellor of Student Affairs, and a college dean, who shall serve as the presiding officer. Members shall normally serve a two-year term. The presiding

officer shall conduct the hearing and advise the hearing board on procedure, but shall not vote. If the student is enrolled in the same college as the presiding dean, a dean from another college shall serve as the presiding officer.

The hearing board shall be governed by the general UCSD rules of procedural due process. When standing members are not available, the formal hearing may be conducted with alternates appointed from the appropriate panel as listed below. To proceed with the hearing, however, the hearing board must have three of the faculty members present, at least one of which must be a member of the standing board. The SCC shall select alternates to the hearing board from the following panels:

1. A panel of ten faculty members appointed by the Academic Senate Committee on Committees.
2. A panel of upper-division (junior or senior) undergraduate students, one from each college, to be appointed by the college dean. Members of this panel must have completed at least one year on a standing judicial board at UCSD.
3. A panel of five graduate students to be appointed by the assistant dean, OGSR.

The hearing board shall hold a formal hearing and decide on the basis of a preponderance of the evidence whether the student engaged in academic dishonesty. In cases in which the hearing board deems that expert advice is essential to its judgment, the hearing board, in consultation with the Committee on Committees, may appoint an ad hoc committee to advise it. The ad hoc committee shall consist of three faculty members with knowledge of the field in question. The members of the ad hoc committee shall be present at the hearing and shall advise the hearing board during the board's deliberations. The final judgment on the case shall rest with the hearing board. Within five (5) business days from the date on which the hearing is completed, the presiding officer shall forward the hearing board's findings to the appropriate dean, with copies to the SCC, department chairperson or program director, the instructor, and the accused student.

If the student is found guilty of academic dishonesty, the appropriate administrative

authority (for undergraduate students the Council of Deans of Student Affairs; for graduate students the assistant dean of Graduate Studies) shall then decide the administrative penalty and shall inform the student in writing within ten (10) business days after receipt of the notice of the hearing board's final judgment. They shall also notify the instructor, the SCC, and the department chair or program director. The instructor shall then assign a grade for the course and notify the SCC of the grade within ten (10) business days. The SCC shall notify the student, the dean, and the Registrar of the grade.

If the hearing board finds the evidence insufficient to sustain the charge of academic dishonesty, the administrative authority and the instructor shall dismiss the matter without further action against the student, who shall be permitted either to complete the course without prejudice or to withdraw from it. The student shall notify the SCC of his or her decision, and the SCC shall notify the Registrar of the student's decision. If the student withdraws from the course, it shall not be listed on his or her transcript.

C. The Appeals Phase: (Section I describes the appeal of the judgment of the hearing board, and Section II describes appeals of the academic action, administrative penalty, or both.)

- I. **Appeal of the Judgment of the Hearing Board:** If the hearing board sustains the charge of academic dishonesty, an undergraduate student may appeal the judgment by writing to the Council of Provosts. Appeals must be made within five (5) business days of formal notification of the final disposition of the case. The Council of Provosts will consider the appeal within ten (10) business days from the date of appeal.

A graduate student or IA may submit an appeal to the dean of Graduate Studies.

The basis for appeal of the hearing board's judgment shall be: (i) that the standards of procedural fairness were violated, e.g., that the student did not have sufficient opportunity to present his or her side of the case; or (ii) that there exists newly discovered important evidence that has substantial bearing on the findings of the

hearing board. If the appeal is sustained, the case shall be referred back to the hearing board for a new hearing. Except for such appeals, the judgment of the hearing board shall be final.

- II. **Appeal of the Academic Action, Administrative Penalty, or both:** Within five (5) business days of receipt of the SCC's notification, the student may appeal the instructor's grade assignment, or the administrative officer's administrative penalty, or both, by submitting a written request as provided below:

Request for Modification of Academic Action: A request for review of the grade assignment may be directed to the CEP Subcommittee on Grade Appeals. If the case has been heard by the hearing board, the CEP Subcommittee on Grade Appeals shall receive the report of the hearing board and accept its findings as to the facts of the case.

Request for Reduction of Administrative Penalty: An appeal of the appropriate authority's administrative penalty shall be directed by an undergraduate student to Council of Provosts. The Council of Provosts will evaluate the student's appeal and make a final decision within ten (10) business days of receiving the appeal. An appeal by a graduate student shall be directed to the dean of Graduate Studies.

Policies for Student Records and Timeline Extensions

Once an instructor has decided to proceed with a charge of academic dishonesty, he or she will refrain from assigning a course grade for the student until the charge has been resolved. If the course concludes before the charge is resolved, the instructor will assign an "IP" on the course grade sheet for the student's grade and will indicate in the memorandum column that this IP is for a "Pending Charge of Academic Dishonesty." Academic Records will note in attached text to the course (i.e., not on the student's transcript) that the hold is for a "Pending Charge of Academic Dishonesty." The student's transcript will show an "IP" for the course until the charge is resolved. While a hold is in effect, the student shall not drop the course. The faculty hold shall

not be removed by the Registrar until notification from the SCC, who shall release the hold once the charge is resolved and a grade has been assigned by the instructor. If a passing grade is assigned and a conflict arises with a duplicate, cross-listed, or equivalent course taken after the charge has been recorded, the SCC will direct the Registrar to drop the student from the duplicate course or remove the grade for the duplicate course from the student's record.

If the student accepts the charge of academic dishonesty or is found guilty by the hearing board, the grade assigned by the instructor will be counted in the student's GPA even if the course is retaken. Academic Records will permanently note in text attached to the course (i.e., not on the student's transcript) that the grade was given as a result of "Academic Dishonesty."

If the student withdraws from UCSD before the final disposition of the case, the following policy shall govern. If the student is found to have committed an act of academic dishonesty, and the instructor assigns him or her a final grade in the course, this grade shall be permanently entered on the transcript. If the administrative penalty is dismissal, the transcript shall bear a notation that readmission is contingent upon the approval from the chancellor. Any administrative penalty less severe than dismissal shall be imposed when the student returns to the university.

If a case of suspected academic dishonesty is also the subject of an administrative inquiry under the Policy on Integrity of Research, then the senior vice chancellor for Academic Affairs, in consultation with the hearing board, may make such modifications in procedure as are necessary to coordinate the two inquiries.

If the final decision in the case results in dismissal of the student, a record of the case and its outcome shall be established in the office of either the vice chancellor for Student Affairs or the dean of Graduate Studies, depending on the registration status of the student. If the administrative penalty is suspension or dismissal, the fact that the student was suspended or dismissed for academic dishonesty must be posted on the academic transcript for the duration of the penalty.

The director of SPJA may extend any timelines in this policy when practical exigencies so dictate. If a delay is imposed, the affected individuals will be notified.

Reporting, Record Keeping, and Review of this Policy

The SCC shall report annually to the Academic Senate Committee on Educational Policy, the Council of Provosts, and the vice chancellor for Student Affairs on the number and character of misconduct, the pattern of decision-making (contested or uncontested), the severity of sanctions, both administrative and academic, and other relevant matters as decided by the Committee on Educational Policy.

Special Programs

Education Abroad Program and the Opportunities Abroad Program

Please refer to the "Courses, Curricula, and Programs of Instruction" section of this catalog, where the Education Abroad Program and the Opportunities Abroad Program are described in full.

Intercampus Transfer (ICT)

An undergraduate in good academic standing who is now, or was previously, registered in a regular session at any campus of the University of California and has not since registered at any other institution may apply for admission as a transfer in the same status to another campus of the university.

HOW TO APPLY

Intercampus transfers must complete the University of California Undergraduate Application form. These forms are available in the Office of the Admissions. You may apply to one or to as many as nine UC campuses of the university using one application form. Send your completed application to:

University of California
Admissions Application Processing Service
P.O. Box 23460
Oakland, CA 94623-0460

Mail only your application form, fees, and essay to the processing service address above. Send your transcripts, test scores, and all other correspondence relating to your application directly to the Admissions Office at the university campus(es) to which you apply. The processing service will not forward them.

You may apply online using Pathways: www.ucop.edu/pathways.

APPLICATION FEES

The basic application fee entitles you to apply to one university campus. If you apply to more than one campus, you must pay an additional fee for each campus you select. These fees are not refundable.

WHEN TO APPLY

Priority dates for filing applications for inter-campus transfer are identical to the application filing dates for new students: fall, November 1-30; winter, July 1-31; and spring, October 1-31. UC Berkeley fall semester, November 1-30.

A campus will accept applications after the priority period only if it still has openings. If you apply after the priority filing period to a campus that is no longer accepting applications, the Admissions Application Processing Service will notify you by mail that your application will not be forwarded to that campus. In this case, you may receive a full or partial refund of the application fee.

Please note: UCSD does not accept applications for winter and spring quarters. Consult the application for undergraduate admission for information regarding other campuses.

Intercampus Visitor (ICV)

Qualified undergraduates may take advantage of educational opportunities on other campuses of the University of California as an Intercampus Visitor (ICV). This program is designed to enable qualified students to take courses not available on their home campus, to participate in special programs, or to study with distinguished faculty members on other campuses of the university. Students who meet the following requirements should complete an application available in the Office of the Registrar.

1. An undergraduate student must have completed at least one year in residence on the home campus and have maintained a grade-point average of at least 2.0 (or equivalent) to apply as an intercampus visitor.
2. Approval of the appropriate provost office is required.
3. Some UC campuses have additional requirements. See the application for requirements and deadlines.

If students meet the above conditions, they should complete the ICV application form and return it to the Office of the Registrar on the home campus, on or before the appropriate deadlines. The ICV application is subject to approval of both the home and host campuses.

A nonrefundable fee is charged for each ICV application.

Simultaneous Enrollment of UCSD Students at other UC Campuses

UCSD students may enroll in classes at another UC campus for the same term providing the student:

- Has completed one quarter as a matriculated student at UCSD
- Is enrolled and paid for a minimum of twelve units for the current term at UCSD and maintains this status
- Is in good standing
- Has the appropriate academic preparation as determined by the host campus.

Financial aid is available only through UCSD. Students eligible for veterans, rehabilitation, social security, and other federal, state, or county benefits must secure eligibility certification through the UCSD financial aid office. Units taken at both campuses may be combined to establish full-time enrollment for financial aid.

ROTC

UCSD does not have an ROTC program. Students may, however, with the permission of their college, enroll in ROTC courses at another institution in conjunction with completing their degree programs at UCSD.

ROTC courses are conducted on the campuses of the University of San Diego and San Diego State University. Further information on these programs may be obtained from the ROTC adviser at the Aerospace Studies Department, (619) 594-5545, and the Military Science Department, (619) 594-4943, at San Diego State University, or the Department of Naval Science, (619) 260-4811, at the University of San Diego.

Absence/Readmission to the University

Undergraduate students absent for no more than one quarter are considered to be continuing students and should contact the Office of the Registrar for registration information.

Students in good academic standing who are absent for **two or more consecutive quarters** must file an application for readmission no later than four weeks prior to the beginning of the quarter at the Office of the Registrar, 301 University Center. A nonrefundable fee is charged.

Students in good academic standing who were absent for **three quarters or more**, must consult with a college academic adviser before enrollment to ensure adherence to graduation requirements.

Students who were on probation or subject to dismissal the last quarter of attendance at UCSD may be required to consult with an academic adviser prior to approval of the readmit application and establish a contract before enrollment.

Students who were dismissed from UCSD, but have subsequently met the conditions stipulated in their original dismissal letter, must consult with an academic adviser and establish a quarterly contract before readmission and enrollment.

Students who attended another institution since leaving UCSD must submit official transcripts for all academic work completed. This work must be of passing or higher quality.

In the case of major departments with approved screening criteria, students may be readmitted as pre-majors.

Withdrawal from the University

Enrolled or registered (paid fees) students who wish to withdraw either prior to or during the quarter are required to complete the Undergraduate Application for Withdrawal. The form should be filed with the student's college academic advising or dean's office. These forms serve two purposes: 1) a means to provide a refund of fees, if appropriate (see below); 2) automatic withdrawal from classes (see also "The W Grade"). Students considering withdrawing are urged to consult with their respective college. The colleges recognize that there are many reasons for students withdrawing from the university.

Refund Policy

NEW UNDERGRADUATE STUDENTS

Prior to the first day of instruction, the registration fee is refunded minus the statement of intention to register fee.

REFUND SCHEDULE

The following schedule of refunds is effective beginning with the first day of instruction and refers to calendar days (including weekends):

0-1 days	2-7 days	8-18 days	19-35 days	36 days and over
100 percent	90 percent	50 percent	25 percent	0 percent

(Subject to Change)

The effective date of withdrawal used in determining the percentage of fees to be refunded is the date indicated on the withdrawal form by the college academic advising or dean's office.

RETURN OF TITLE IV FEDERAL STUDENT AID

Financial aid recipients may be required to return some or all of their aid at the time of withdrawal. This requirement applies only to undergraduate students who withdraw prior to completing 60 percent of the quarter. Questions about financial aid repayment should be directed to the Financial Aid Office.

Auditing

Interested individuals, including registered students, are permitted to audit courses only with the explicit and continuing consent of, and under such rules as may be established by, the faculty member in charge of the course. The instructor is not obligated to devote time to the work of individuals not officially enrolled in the course. All persons auditing are required to abide by university policies and campus regulations.

Graduate Studies

At the University of California, San Diego all programs leading to master's degrees and to doctoral degrees (other than the M.D.) are under the jurisdiction of the Graduate Council and are administered by the Office of Graduate Studies and Research.

The combined administrative responsibility for graduate studies and for research reflects the intention of the San Diego campus to emphasize the research character of graduate education. Doctoral and most master's degrees are the culmination of creative effort and attest to the ability of the recipient to continue original inquiry. In addition to requiring original research, most of UCSD's graduate programs expect their students to obtain teaching experience.

Much of the training that UCSD offers takes place outside the classroom—not only in seminars but in independent research and in tutorial work. Students can benefit from the many visitors from other universities; there are opportunities to study at other campuses of the University of California; and many students become involved in the research activities of UCSD's research institutes and centers. La Jolla has become one of the most important intellectual centers of the West. Not only has UCSD attracted many of the world's great scholars, but other research institutions located nearby such as the Salk Institute for Biological Studies, the Burnham Institute, and The Scripps Research Institute have enhanced the area's reputation.

The Nature of Graduate Instruction

Graduate courses demand, on the part of both instructor and student, a capacity for critical analysis and a degree of research interest beyond those appropriate for undergraduate study. These courses generally carry a number in the 200 series and may be conducted in any of several ways: (1) as advanced lecture courses; (2) as seminars in which faculty and students present critical studies of selected problems within the subject field; (3) as independent reading or study under faculty supervision; or (4) as research projects conducted under faculty supervision. Graduate courses numbered 400–499 are designed for professional

programs and may not be used to satisfy minimum graduate course requirements for degrees other than the specific degree program for which they are offered. Courses at the upper-division level (100–197) may be taken in partial satisfaction of the requirements for an advanced degree.

Graduate students may take lower-division courses (1–99) for a letter grade, but grades earned in those courses will not be considered in their overall grade-point average (GPA) for the purpose of determining good standing, except for students in the M.P.I.A. program who may take lower-division language courses for a letter grade and for inclusion in their GPA for the purpose of determining good standing.

The graduate student is accorded considerable liberty in choice of courses as long as minimum departmental core course, departmental requirements and grading standards, and residency requirements are met.

Administration

The Office of Graduate Studies and Research

The Office of Graduate Studies and Research is administered by the dean of Graduate Studies, who is responsible for graduate admissions; graduate degree programs; the administration of fellowships, traineeships, and other graduate student support; the development of new programs; and the maintenance of common standards of high quality in graduate programs across the campus.

The dean reports to the senior vice chancellor of Academic Affairs and to the Graduate Council, on the administration of graduate affairs.

The Graduate Council

The Graduate Council is a standing committee of the San Diego Division of the Academic Senate composed of faculty and graduate students. The primary function of the council is to exercise overall responsibility for graduate study programs and to implement systemwide policies, procedures, requirements, and standards.

The Graduate Adviser

The graduate adviser in a department, group, or school is the faculty member to whom graduate students direct requests for information about graduate study in a particular program.

The graduate adviser's duties include:

1. Advising the dean on admission of graduate students.
2. Advising graduate students regarding their programs of study and other matters pertinent to graduate work.
3. Appointing individual advisers for each graduate student.
4. Approving official study lists.
5. Acting on the petitions of graduate students.
6. Insuring that adequate records are maintained on all graduate students in the department, group, or school, and supplying relevant information as requested by the dean.
7. Assisting the dean of Graduate Studies in the application of university regulations governing graduate students, graduate study, and graduate courses.
8. Advising the chair of the department and the dean of Graduate Studies about developments of the graduate program in the department, group, or school.

Graduate Student Association

The Graduate Student Association (GSA) is the officially recognized graduate student government at UCSD. It represents all graduate and medical students—including those at Scripps Institution of Oceanography, the Graduate School of International Relations and Pacific Studies, Rady School of Management, the School of Medicine, and the School of Pharmacy and Pharmaceutical Sciences—in academic, administrative, campus, and university matters. The GSA Council, composed of six executive officers and representatives from each department, group and school, nominates graduate student representatives for appointment to campus governing bodies and committees, including the Graduate Council, the Registration Fee Committee, and the systemwide Student Body Presidents' Council.

The GSA also sponsors projects and social activities designed to improve the academic and social lives of students. Meetings are open to all graduate, School of Pharmacy, and School of Medicine students.

For more information contact the GSA at (858) 534-6504.

Graduate Student Diversity

The University of California, San Diego actively recruits and admits qualified students to graduate programs who will enhance the diversity of UCSD graduate programs.

UCSD recognizes the value to students, faculty, staff, and the community in having a campus which reflects the full richness and talents of the people of California. Diversity is viewed as a campus strength and a critical component of higher education. The campus has a firm commitment to recruit and admit graduate students from all demographic groups including students from traditionally underrepresented backgrounds.

The Graduate Student Affairs Unit in the Office of Graduate Studies and Research provides an array of counseling and advocacy services to assist U.S. citizens and permanent residents in applying to graduate school, obtaining financial support, and successfully completing graduate degree programs.

UCSD offers the San Diego Fellowship Program, which is designed to increase campus diversity. The fellowship provides two awards: The San Diego Fellowship and the Eugene Cota-Robles Fellowship. Incoming students who have overcome significant economic, educational, or social hardship in pursuit of their education or whose presence would enhance campus or departmental diversity in other ways are eligible to apply for awards through the San Diego Fellowship Program. Refer to the Fellowship and Traineeship section for more details.

In addition, a limited number of graduate student fellowships are available in specific science disciplines through the National Science Foundation, Alliance for Graduate Education and the Professoriate (AGEP) Program.

For assistance and further information about special opportunities for underrepresented students, contact the assistant dean, Office of Graduate Studies and Research, 518 University Center, (858) 534-3555 or (858) 534-3678.

Career Services for Graduate Students

The Career Services Center offers a wide range of programs and services to assist graduate students with their career planning and job search needs. Individual career counseling is available on both an appointment and drop-in basis. In addition, workshops and special events are regularly offered covering such areas as resume writing, job search strategies, and nonacademic employment options. The Career Services Center houses a career reference library containing information on employers, job listings, alumni contact list, salaries, sample resumes, and publications pertinent to graduate students' career issues. An online database and Internet access computer lab is also available to assist in placement efforts. For more information, see the "Career Services" section of this catalog or visit the Career Services Office.

General Requirements for Higher Degrees

Courses and Grades

Only upper-division and graduate courses in which a student is assigned grades A, B, C (including plus [+] or minus [-]), D, or S are counted in satisfaction of the requirements for all doctoral and master's degrees. An Incomplete grade, as well as an NR, will automatically lapse to an F or U if it has not been removed when the final report for the degree is approved by the Office of Graduate Studies and Research. (See also "Grades.")

Undergraduate language courses and courses in the 400 series are only used for degree credit in the program for the M.P.I.A. degree offered by the Graduate School of International Relations and Pacific Studies. For course information see the section on "International Relations and Pacific Studies" elsewhere in this catalog.

Registration in the Final Quarter for the Award of the Degree

A student completing course work, using university facilities including the library, or making any demands upon faculty time (other than final reading of the thesis or dissertation, or administering the comprehensive or doctoral examination), must register in the final quarter in which

the degree is to be conferred. Students who need only to submit their theses or dissertations, or to take the comprehensive or final examination may pay a filing fee in lieu of registration in the final quarter (see "Filing Fee").

Master Degrees

Master of Advanced Study (M.A.S.)

The University of California offers graduate professional degree programs leading to the master of advanced study (M.A.S.) degree. This degree meets the needs of working professionals continuing in educational programs. While some M.A.S. programs are tailored to career advancement, other programs enable individuals to pursue new career directions or advanced study in the liberal arts. Each M.A.S. program accommodates flexible, part-time, academically qualified working adults who cannot be full-time students. All M.A.S. degree programs must be in conformity with one of the following two plans: Plan I. Thesis Plan or Plan II. Comprehensive Examination Plan. Pending program approval, an alternative capstone plan is a third option. Specific degree requirements, curriculum, and other details are available with each individual program.

Master of Arts (M.A.) and Master of Science (M.S.)

The master of arts and master of science degrees are offered under two plans: Plan I. Thesis, and Plan II. Comprehensive Examination. Since some departments offer both plans, with varying unit requirements, students should consult with their advisers before selecting a plan for completion of degree requirements.

Master of Business Administration (MBA)

The MBA is a professional degree that provides distinguished education in the theory and practice of management. The program provides a comprehensive education in the fundamental disciplines of business coupled with a focus on the business and management issues faced by technology and innovation driven companies. Students interested in becoming managers and leaders in such companies and in understanding the role that technologies play in driving the

global business marketplaces will be well suited for the Rady School of Management. For degree requirements and curriculum, please refer to the school.

Master of Education (M.Ed.)

The Education Studies Program offers a master of education (M.Ed.)/multiple subject credential to authorize teaching grades K-6, and a master of education (M.Ed.)/single subject credential for teaching grades 7-12 is offered in the subject areas of biology, chemistry, geoscience, English, mathematics, and physics. Degree requirements, curriculum, and other details regarding the program may be obtained from the Education Studies Program.

Master of Engineering (M.Eng.)

Several departments in the School of Engineering offer the master of engineering (M.Eng.). The M.Eng. is a terminal degree designed to address the technical needs of engineers. Degree requirements, curriculum, and other details regarding the program may be obtained from the Department of Electrical and Computer Engineering and the Department of Bioengineering.

Master of Fine Arts (M.F.A.)

The master of fine arts degree is offered in the Departments of Theatre and Dance, and Visual Arts under a modified thesis plan. A short written thesis that may be regarded as a position paper, presenting a descriptive background for the student's work, is required. There is no written final examination, but great weight is given to the candidate's final presentation and the oral defense of the thesis.

Master of Pacific International Affairs (M.P.I.A.)

The Master of Pacific International Affairs Program provides training for those interested in pursuing professional careers in international affairs and international management with an emphasis on the countries of the Pacific Rim. For degree requirements and curriculum, please refer to the International Relations and Pacific Studies description under the catalog listings of programs of instruction.

Programs of Study

PLAN I: THESIS PLAN

A minimum of at least thirty-six quarter-units are required: eighteen units in graduate courses, including a minimum of twelve units in graduate-level courses in the major field; twelve additional units in graduate or upper-division courses; and six units in research course work leading to the thesis. Consult your department for specific unit and course requirements.

Following advancement to candidacy, the student electing Plan I must submit a thesis. The thesis committee, appointed by the chair of the department or group and approved by the dean of Graduate Studies, consists of at least three faculty members, with at least two from the candidate's major department.

Information covering thesis preparation is contained in the publication, *Instructions for the Preparation and Submission of Doctoral Dissertations and Masters' Theses*, which can be found on the Web site www.ogsr.ucsd.edu/studentpublications/bluebook/. The completed thesis is submitted to the thesis committee for review.

When all members of the committee have approved the thesis, a Final Report of the Thesis for the Master of Arts or Master of Science Degree under Plan I must be completed. The candidate submits the thesis to the Office of Graduate Studies and Research and upon approval by the dean of Graduate Studies, files the thesis with the university archivist who accepts it on behalf of the Graduate Council. Acceptance of the thesis by the archivist with a subsequent second approval by the dean of Graduate Studies represents the final step in the completion of all requirements by the candidate for a master of arts or master of science degree on the San Diego campus.

PLAN II: COMPREHENSIVE EXAMINATION PLAN

A minimum of at least thirty-six quarter-units are required: twenty-four units in graduate courses, including a minimum of fourteen units in graduate-level courses in the major field; and twelve additional units in graduate or upper-division courses. Consult your department for specific unit and course requirements.

Apprentice Teaching

A maximum of six units of 500-level courses (apprentice teaching) may be credited toward the degree requirements.

Academic Residence

The minimum residence requirement is three academic quarters, at least one of which must follow advancement to candidacy. Academic residence is met by satisfactory completion of six units or more per quarter, some of which must be graduate level.

A candidate must be registered in the quarter in which the degree is to be awarded. (See "Registration in the Final Quarter for the Award of the Degree.")

Advancement to Candidacy

After completing all preliminary requirements of the major with a GPA equivalent to 3.0 in upper-division and graduate course work undertaken, a total of no more than eight units of F and/or U grades, and a minimum of two quarters or more of residency, the student may file an Application for Candidacy for the Thesis or Comprehensive Examination, Plan I or II, for the Master of Arts or Master of Science Degree. An Application for Candidacy must be filed no later than two weeks after the first day of the quarter in which degree requirements are to be completed. (See "Academic Calendar.")

Following advancement to candidacy, the student electing Plan II must pass a comprehensive examination administered by the major department. A Final Report of the Comprehensive Examination for the Master of Arts or Master of Science Degree under Plan II is used to report successful completion of the examination requirement.

Transferring Credit

With the approval of the major department and the dean of Graduate Studies, upper-division and graduate course work completed with a grade of B- or better while in graduate standing at another campus of the University of California may be accepted in satisfaction of one of the three quarters of residence and up to one-half of the quarter-units of credit required for the master's degree at UCSD.

On the recommendation of the major department and with the approval of the dean of Graduate Studies, a maximum of eight quarter-units

*The master's degree may be awarded to students pursuing work toward the Ph.D. after fulfillment of the appropriate requirements. See appropriate section of catalog.

§ Students who have completed some graduate study at UCSD and have been admitted to a doctoral program may apply for this interdisciplinary program.

**UCSD undergraduates in the junior or senior year may apply to their respective departments for admission to the integrated B.S./M.S. degree program. A similar program is available to UCSD undergraduates in several of the engineering and science specialties. Consult department personnel and/or catalog departmental listing for complete information.

*** Pending approval.

of credit for work completed with a grade of B- or better in graduate standing at an institution other than the University of California may be applied toward a master's degree at UCSD. Courses used must be taken prior to matriculation at UCSD.

In any case, no more than a total of one-half of the units required for a master's degree may be transferred in from any UC or other institutions. Courses used for a previous degree may not be transferred. A letter from the institution from which the courses are being transferred will be required stating the courses were not used toward another degree.

Course work approved for transfer credit will not be included in calculating a student's grade-point average, regardless of the source.

Program of Study

PLAN III: MODIFIED THESIS PROGRAM

Seventy-two quarter-units for Visual Arts and ninety quarter-units for Theatre, with a GPA equivalent to 3.0 in upper-division and graduate course work undertaken, are required for a master of fine arts degree. Information covering thesis preparation is contained in the publication, *Instructions for the Preparation and Submission of Doctoral Dissertations and Masters' Theses*, which can be found on the Web site www.ogsr.ucsd.edu/studentpublications/bluebook/. The completed thesis is submitted to the thesis committee for review.

Following the filing of an Application for Candidacy for the Modified Thesis, Plan III, the candidate must submit a thesis. The thesis committee, appointed by the chair of the department and approved by the dean of Graduate Studies, consists of four faculty members; three from the department and one, preferably tenured, from outside the department.

When all members of the committee have approved the thesis, a Final Report of the Modified Thesis Examination, Plan III, for the master of fine arts degree must be completed. Approval by the dean of Graduate Studies and subsequent acceptance of the thesis by the university archivist, Special Collections, represents the final step in the completion of all requirements by the candidate for a master of fine arts degree on the San Diego campus.

Academic Residence

The minimum residence requirement is six academic quarters for Visual Arts and eight academic quarters for Theatre, at least one of which must follow advancement to candidacy in either program. Academic residence is met by satisfactory completion of six units or more per quarter, some of which must be graduate level. The entire residence requirement must be satisfied at UCSD.

A candidate must be registered in the quarter in which the degree is to be awarded. (See "Registration in the Final Quarter.")

Advancement to Candidacy

After completing all preliminary requirements of the department with a GPA equivalent to 3.0 in upper-division and graduate course work undertaken, a total of no more than eight units of F and/ or U grades, and a minimum of five quarters of residency, the student may file an Application for Candidacy for the Modified Thesis, Plan III, for the Master of Fine Arts Degree. An application for candidacy must be filed no later than two weeks after the first day of the quarter in which degree requirements are to be completed. (See "Academic Calendar.")

Graduate Work Completed Elsewhere

In exceptional circumstances, a student may be given a leave of absence for the purpose of studying elsewhere. While appropriate credit may be allowed for course work completed elsewhere with a grade of B or better in a graduate program, the period involved will not reduce the UCSD academic residence requirement of six academic quarters for visual arts and eight quarters for theatre.

Doctoral Degrees

Doctor of Audiology (Au.D.)

The Au.D. is a professional doctoral degree offered jointly with San Diego State University (SDSU). The four-year degree program is designed for individuals who intend to specialize in clinical practice and to meet professional standards requiring a clinical doctorate as the entry-level degree for a certified audiologist. Graduates of this program will have the knowledge base,

research exposure, and advanced clinical skills to enter the workforce in any setting, and be prepared to function as independent audiology professionals in the expanding health care arena. For degree requirements and curriculum, please refer to the Audiology section in the catalog.

Doctor of Education (Ed.D.)

The Ed.D. is a professional degree in which regional professional educators gain content knowledge as well as specific skills related to instructional leadership within the K-12 and postsecondary educational community. Advanced Ed.D. students will conduct research on professional practice within their own institution addressing specific local problems that have national implications for education. For degree requirements and curriculum, please refer to the Education Studies Program section in this catalog.

Doctor of Musical Arts (D.M.A.)

The DMA degree emphasizes the dual preparation for professional careers in the performance of contemporary music, as well as in the equally demanding area of teaching these skills on an advanced level. Candidates for this degree are expected to demonstrate musical excellence, artistic maturity, and the capability for doing original scholarly work. For degree requirements and curriculum, please refer to the Department of Music description under the catalog listings of programs of instruction.

Doctor of Philosophy (Ph.D.)

The doctor of philosophy degree is a research oriented degree which requires individual study and specialization within a field or the establishment of connections among fields. It is not awarded solely for the fulfillment of technical requirements such as academic residence and course work. Candidates are recommended for the doctorate in recognition of having mastered in depth the subject matter of their discipline and having demonstrated the ability to make original contributions to knowledge in their field of study. More generally, the degree constitutes an affidavit of critical aptitude in scholarship, imaginative enterprise in research, and proficiency in communication, including—in most departments—practice in teaching.

Program of Study

The student's program of study is determined in consultation with the adviser who supervises the student's activities until the appointment of the doctoral committee. A doctoral program generally involves two stages.

The first stage requires at least three quarters of academic residence and is spent in fulfilling the requirements established by the Academic Senate and by the major department, group, or school. When the department considers the student ready to take the qualifying examination, it arranges for the appointment of a doctoral committee. Immediately upon passing the qualifying examination administered by the doctoral committee, the student advances to candidacy.

The second or in-candidacy stage is devoted primarily to independent study and research and to the preparation of the dissertation. A minimum interval of three quarters of academic residence must elapse between advancement to candidacy and the filing and final defense of the dissertation.

Foreign Language Requirements

Some doctoral programs require candidates to demonstrate language proficiency in one or more languages as part of the formal requirements for the degree. In these cases, the testing of proficiency is the responsibility of the department, group, or school concerned.

Doctoral Time Limits

All graduate students in doctoral programs are subject to campus policy on time limits to their degree. Each graduate program has three time limits pertaining to students' academic progress toward the doctoral degree:

(1) the registered time by which a student must advance to doctoral candidacy; (2) the registered time during which a doctoral student is eligible for support; and (3) the registered time by which a student must complete all doctoral requirements. Students will not be permitted to continue in doctoral status beyond the pre-candidacy and total registered time limits. Students will not be permitted to receive UCSD-administered financial support beyond the support limit. Information about these time limits is given in the descriptions of each department's graduate program in this catalog and departmental publications.

University policy requires that graduate students be continuously registered—unless on an approved leave of absence—from the first quarter of enrollment to completion of degree requirements. (See "Continuous Registration" and "Leave of Absence.")

For purposes of calculating when precandidacy and total registered time limits are reached, accrued time is the elapsed time from first enrollment as a graduate student at UCSD less (a) time withdrawn or on approved leave of absence, and (b) time between completion of one graduate program at UCSD and first registration in another. For the support time limit, a maximum of three quarters of approved leave or withdrawal may be deducted from elapsed time in calculating accrued time. Time spent in graduate study at another institution or University of California campus prior to beginning graduate study at UCSD will not count toward accrued time, with the exception of students entering the doctoral program in electrical engineering, computer science, or music who have earned a master's degree in that discipline. All of the following will count toward accrued time: time spent at UCSD as a master's, non-degree, or intercampus exchange graduate student; time spent on leave beyond three quarters; time spent between completion of or withdrawal from a graduate program at UCSD and re-registration in the same field of study. Precandidacy and total registered time limits will not accrue during periods of leave of absence and/or withdrawal in excess of three quarters.

Further information may be obtained from departmental graduate coordinators or the Office of Graduate Studies and Research.

Academic Residence

The minimum residence requirement for a doctoral degree is six quarters, three of which must be in continuous academic residence at UCSD. Residency is established by the satisfactory completion of six units or more per quarter, at least some of which must be at the graduate level. Joint doctoral students meet the UCSD academic residency requirement by successfully completing a minimum of thirty-six units of course work at UCSD.

A candidate must be registered in the final quarter in which the degree is to be awarded. (See "Registration in the Final Quarter.")

The Doctoral Committee

At least three weeks prior to a scheduled qualifying examination, the department requests approval for the appointment of the doctoral committee by the dean of Graduate Studies. This committee conducts the qualifying examination, supervises the preparation of and passes upon the dissertation, and administers the final examination.

The committee consists of five or more officers of instruction, no fewer than four of whom shall hold professorial titles of any rank. The committee members shall be chosen from two or more departments/programs; at least two members shall represent academic specialties that differ from the student's field and one of these two must be a tenured UCSD faculty member from another department. Consult the departmental graduate coordinator or the Office of Graduate Studies and Research for further details.

Reconstituted Doctoral Committee

For a variety of reasons a doctoral committee may need to be reconstituted. The request for reconstitution of the membership of a doctoral committee must be submitted on a reconstitution form to the dean of Graduate Studies by the chair of the candidate's major department, group, or school no less than two weeks prior to the qualifying examination or defense of the dissertation. The request must include departmental affiliation of the members of the proposed reconstituted committee and the reason(s) for requesting the change.

Qualifying Examination and Advancement to Candidacy

The doctoral committee administers the qualifying examination and authorizes the issuance of the Report of the Qualifying Examination and Advancement to Candidacy. Formal advancement to candidacy requires the student to pay a candidacy fee to the cashier prior to submitting the form to the dean of Graduate Studies for approval. Students must maintain a GPA equivalent to 3.0 or better in upper-division and graduate course work undertaken with a total of no more than eight units of F and/or U grades in order to take the qualifying examination and advance to candidacy.

If the committee does not issue a unanimous report on the examination, the dean of Graduate Studies shall be called upon to review and present the case for resolution to the Graduate Council, which shall determine appropriate action.

Dissertation and Final Examination

A draft of the doctoral dissertation should be submitted to each member of the doctoral committee at least four weeks before the final examination. The form of the final draft must conform to procedures outlined in the publication, *Instructions for the Preparation and Submission of Doctoral Dissertations and Masters' Theses*, which can be found on the Web site www.ogsr.ucsd.edu/studentpublications/bluebook/.

The doctoral committee shall supervise and pass on the candidate's dissertation and conduct the final oral examination which shall be public and so announced.

If the committee does not issue a unanimous report on the examination, the dean of Graduate Studies shall be called upon to review and present the case for resolution to the Graduate Council, which shall determine appropriate action.

The Report of the Final Examination and Filing of the Dissertation for the Doctoral Degree form is initiated by the department, group, or school, signed by members of the doctoral committee, and the chair of the (major) department, group, or school.

The candidate submits the dissertation to the Office of Graduate Studies and Research and, upon approval by the dean of Graduate Studies, files the dissertation with the university archivist, who accepts it on behalf of the Graduate Council. Acceptance of the dissertation by the archivist, with a subsequent second approval by the dean of Graduate Studies, represents the final step in the completion by the candidate of all requirements for the doctoral degree. All dissertations and theses submitted in partial satisfaction of doctoral or master's degree requirements shall be catalogued with the university library, and dissertations shall be submitted to University Microfilms, Inc., for publication.

Candidate in Philosophy Degree

In several departments, as approved by the Graduate Council, the intermediate degree of candidate in philosophy (C.Phil.) is awarded to stu-

dents upon advancement to candidacy for the Ph.D. degree. The minimum residence requirement for this degree is three quarters of continuous academic residence at UCSD. The C.Phil. degree cannot be conferred simultaneously with or following the award of a Ph.D. degree.

Letter of Completion

The Office of Graduate Studies and Research will direct the Office of the Registrar to issue a Letter of Completion to a graduate student who has completed all requirements for a higher degree but whose diploma has not yet been issued.

Postgraduate Appointments

A UCSD graduate student is not eligible for any UCSD postdoctoral appointment until all requirements for the doctoral degree have been completed. Such appointments may begin after the university archivist has accepted the dissertation and the Office of Graduate Studies and Research has accepted the final report.

Special Degree Programs

Graduate Programs in the Health Sciences

The university offers research training programs in the health sciences leading to the doctor of philosophy degree. The purpose of these graduate programs is to prepare students for careers in research and teaching in the basic medical sciences. Program requirements are flexible, consisting of graduate courses and supervised laboratory or clinical investigation. Graduate programs in the health sciences are offered by (1) regular campuswide departments with activities related to the health sciences, for example, the Departments of Bioengineering, Biology, Chemistry and Biochemistry, and Psychology and (2) interdisciplinary groups of faculty drawn from the School of Medicine and from campuswide departments or from San Diego State University.

The following departments or interdisciplinary graduate groups provide research-training opportunities in the biomedical sciences and should be contacted directly for further information: biomedical sciences, biochemistry (in either biology or chemistry and biochemistry), bioengineering, bioinformatics, biology, biophysics,

chemistry, clinical psychology, molecular pathology, neurosciences, physics, psychology, public health (in either epidemiology or health behavior), and the Scripps Institution of Oceanography.

Ph.D.-M.D. Program

Students may meet the requirements for both the Ph.D. and M.D. degrees in programs offered jointly by the School of Medicine and the graduate programs in the health sciences. In most cases, students are first admitted to the School of Medicine and may then apply for admission to a relevant graduate program. However, those students who wish to be considered for admission to the Medical Scientist Training Program (MSTP) may apply for admission to the School of Medicine and the MSTP concurrently.

Elements of the first two years of the medical school curriculum satisfy many of the requirements of the graduate program, but additional courses will be required. Thus, the student must complete requirements for the Ph.D. in accordance with the regulations of a department or a group and must in addition meet the requirements for the professional degree. Students interested in such programs should consult the associate dean for Student Affairs, School of Medicine.

Joint Doctoral Programs

Certain departments of the University of California cooperate with similar departments on the several campuses in the California State University System to offer joint programs of study leading to the doctoral degree. At UCSD, joint doctoral programs in audiology, biology, chemistry, clinical psychology, language and communicative disorders, engineering sciences (applied mechanics), mathematics and science education, and public health (in either epidemiology or health behavior) are currently offered in conjunction with San Diego State University, and in educational leadership in conjunction with San Diego State University and California State University, San Marcos. A Ph.D. in drama and theatre is offered in conjunction with University of California, Irvine. Applicants interested in these joint programs should consult the Departments of Biology, Chemistry and Biochemistry, Communicative Disorders, Mechanical Engineering, Psychology, Surgery, Theatre and Dance; or the Office of the Dean, College of Engineering; or the Center for Research in Mathematics and Science

Education; or the School of Public Health at San Diego State University. Joint doctoral students meet the UCSD academic residency requirement by successfully completing a minimum of thirty-six units of course work at UCSD.

Special Programs

Intercampus Exchange Program for Graduate Students

A graduate student registered on any campus of the University of California, who wishes to take advantage of educational opportunities for study and research available on another campus of the university, must apply to become an intercampus exchange student on that UC campus. UCSD students must have completed at least one quarter of study and be in good standing prior to beginning an exchange.

Informal arrangements between departmental faculty on the two campuses must be undertaken prior to submission of a student's application to assure that space in desired courses, seminars, or facilities will be available.

No later than four weeks prior to the opening of the term on the host campus, a student must complete the Application for Intercampus Exchange Program for Graduate Students available at the Office of Graduate Studies and Research. This application, approved by the student's departmental graduate adviser and the graduate dean of the home campus, is forwarded for approval by the department and the graduate dean on the host campus.

Students participating in an intercampus exchange must pay all required fees and enroll as appropriate at the home campus. Evidence of fee payment, at the home campus, must be presented to enroll in classes at the host campus.

An exchange student is not admitted to graduate standing at the host campus, but is considered a graduate student in residence at the home campus. Grades obtained in courses taken by the student enrolled in the intercampus graduate student exchange program are transferred to the home campus for entry on the student's official record. Library, health center, and other student privileges are extended by the host campus.

Off-Campus Study

(Other than Intercampus Exchange Program)

If the research and study program of a graduate student requires being off campus for extended periods of five weeks or more, the student may apply for off-campus study. During such periods a student is required to remain a registered student at UCSD and to carry twelve units of course work or research.

If the off-campus study is outside the state of California, one-half of the registration fee may be waived. All required fees including, but not limited to the full educational fee, student center fee, recreation facility fee, health insurance fee, and nonresident fee, if applicable, must be paid.

A graduate student who holds a fellowship, traineeship, or a research assistantship and desires to study off campus may do so under the following circumstances: The student must have completed at least one year of graduate study at UCSD, obtained the approvals of the academic department and the dean of Graduate Studies, and agreed to comply with the rules and regulations governing the award or appointment.

Regulations concerning accepting additional awards or compensation for appointments as outlined under the financial assistance section apply to off-campus study as well as on-campus study.

UCSD Extension

Students wishing to offer UCSD Extension course work taken **prior** to admission at UCSD as a graduate student in partial satisfaction of requirements for a master's degree must file a General Petition with the Office of Graduate Studies and Research. Acceptance of such course work is subject to the regulations on "Transferring Credit" (which are described elsewhere in this catalog) the recommendation of the major department, and approval of the dean of Graduate Studies, and will be considered upon satisfactory completion of course work in a regular session.

COMPLIMENTARY ENROLLMENT

Through a reciprocal agreement with UCSD Extension, a limited number of spaces in extension classes are open to full-time graduate students (registered for twelve units or more) in good standing without payment of additional fees. The number of spaces available for each quarter varies. The student must obtain a UCSD Application for Enrollment from the Office of

Graduate Studies and Research and personally secure the necessary approvals. Course work taken through Complimentary Enrollment cannot be used in partial satisfaction of requirements for a master's degree, nor can it be used toward the twelve unit full-time enrollment requirement.

Education Abroad Program

Graduate students may apply to study at most Education Abroad Program (EAP) host institutions, provided that they meet EAP requirements and have completed at least one year of graduate work prior to departure, are in good standing, and have the support of their academic department and graduate dean.

Costs vary according to location.

Students pay fees to the University of California and are enrolled at UCSD while abroad. Full academic credit is received for courses satisfactorily completed.

At UCSD, complete information and application forms for the various overseas campuses may be obtained from the Programs Abroad Office, International Center, University Center, 0018 or on the Programs Abroad Web site <http://orpheus.ucsd.edu/icenter/>. In addition, the Programs Abroad Office also offers information and advisory services to graduate and undergraduate students interested in pursuing other activities involving study, research, work, or travel abroad.

For a detailed list of the countries with EAP study centers, see also Education Abroad Program in the chapter titled "Courses, Curricula, and Programs of Instruction." Study abroad information is also available online by accessing the EAP Web site <http://www.eap.ucsb.edu>.

Postdoctoral Education

Postdoctoral education emphasizes scholarship and continued research training for individuals who have recently completed a doctoral degree. The postdoctoral scholar conducts research under the general oversight of a faculty mentor in preparation for a career position in academe, industry, government, or the nonprofit sector.

The Office of Graduate Studies and Research has responsibility for the administrative management of the Postdoctoral Scholar Program. Interested candidates should directly contact the department, research unit, or faculty member for information on available positions or training opportunities. The department or research unit initiates all appointments.

Postdoctoral scholars are eligible for the UC Postdoctoral Scholar Benefits Program, academic photo identification card, and access to campus resources (library, recreation facilities, etc.).

Fees

The following schedule of fees is anticipated for the 2006-07 academic year:

FEES PER QUARTER*

	Resident	Non-Resident
Tuition	\$	\$4,898.00
Registration	245.00	245.00
Educational	2,054.00	2,143.00
Student Center	37.50	37.50
Recreational Facilities	92.00	92.00
Graduate Student Assoc.	12.00	12.00
Health Insurance	430.00	430.00
Totals	\$2,870.50	\$7,857.50

Miscellaneous Fees and Fines

Students should also be aware of the following charges:

Application fee for admission	
Domestic	\$60
International	80
Duplicate Photo-ID card	10
Petition for Readmission	40
Advancement to Candidacy for Ph.D.	50
Transcript of Record	5
Late payment of fees (Late registration)	50
Late enrollment	50
Late and retroactive Add/Drop	3
Returned check collection	25
Filing fee	119
UCSD Statement Late Charge	25

* Subject to change without notice. Updated information regarding fees may be found on the Web site https://ogsr.ucsd.edu/financialinfo/gradstudent/tuition_fees/index.htm.

All receipts for payments made to the cashier, whatever their nature, should be carefully preserved. Not only do they constitute evidence that financial obligations have been discharged, but they may be required to support a claim that certain documents or petitions have been filed.

**Fees for graduate students approved for enrollment in a half-time program (not to exceed six units) may be reduced by one-half of the Educational fee and one-half of nonresident tuition for nonresidents.

California Residency and the Nonresident Tuition Fee

Each new student entering UCSD is required to submit a Statement of Legal Residence to the Office of the Registrar. No tuition is charged to students classified as residents of California. Nonresidents, however, are required to pay a quarterly tuition fee.

A complete statement covering California residence requirements, determination of residence for tuition purposes, and/or recognized exceptions appears in the section "Residence Requirements" or on the Web site <http://registrar.ucsd.edu/ver2/info/residency/nonres.html>. Additional information may be obtained from the Campus Residence Deputy, Office of the Registrar, Building 301, University Center. No other university personnel are authorized to supply information relative to residence requirements for tuition purposes. Students seeking to establish California residency for tuition purposes are advised to review the requirements and deadlines. Adherence to the published deadlines is the responsibility of each student and is essential. Exceptions to waive or extend deadlines are not considered.

To the extent funds are available, subject to change, waiver of nonresident tuition may be granted to spouses and dependent, unmarried children under age twenty-one of university faculty members who are qualified for membership in the Academic Senate. Inquiries should be directed to the Office of the Registrar or the Academic Senate Office.

University Registration Fee

The university registration fee is a quarterly fee required of all registered students, and it must be paid at the time of the student's registration. This fee is for services which benefit the student and are complementary to, but not part of, the regular instructional programs of the university. No part of this fee is refunded to students who do not make use of these services; however, students who petition and are approved for out-of-state study will receive a waiver for one-half of the registration fee. Exemption from this fee may be granted to surviving children of certain deceased California fire fighters or police officers. Students who believe they may qualify for an exemption on this basis must consult with the Student Financial Services Office, Building 201, University Center, for a ruling.

Student Health Services and Insurance Plans

The Student Health Service (SHS) is a nationally accredited health care facility providing primary health care for no or minimal charge during the academic year for all students who pay the university registration fee. Students with the Student Health Insurance Plan (SHIP) in the spring have access to the SHS during the summer at no additional charge. Students without SHIP may be seen in the summer for a modest fee. Additional information on the wide variety of services available at SHS is available via the Web at <http://studenthealth.ucsd.edu>.

SHS provides primary health care to all students with SHIP. Access to SHIP benefits requires written SHS referral except in cases of emergency care or care 150 miles out of the UCSD area.

The Student Health Insurance Program (SHIP)

SHIP is a mandatory year-round insurance plan for graduate and professional students unless a waiver has been granted (see WAIVERS). Students must be enrolled in SHIP for the spring quarter in order to retain coverage through summer. Three quarterly payments will provide year-round coverage under SHIP. The spring quarter premium extends insurance coverage through the summer quarter. Benefits and additional information may be viewed at the Web site <http://studenthealth.ucsd.edu>.

Premium payment for SHIP is due with the payment of the registration fee. Premiums for students holding graduate academic appointment titles for a full academic term at 25 percent time or greater will be paid directly by the university. Premiums for most students holding fellowships and training grants are also paid directly. Loans to cover premiums may be available for students who receive need-based financial assistance.

For first-year students arriving on campus prior to the start of the academic calendar year, it is highly recommended that the student review current insurance status and purchase short term coverage if necessary. Insurance information may be obtained by calling the insurance counselor at (858) 534-2123.

REFUNDS

No premium refunds are permitted, except when a student withdraws on or prior to the first day of classes, in which case a full refund of the

premium will be made and coverage for that quarter will be canceled effective from the first day of the quarter. If an insured enters the armed forces, a pro-rata refund of premium paid will be made upon request. Refunds for all other fees are subject to the Refund Fee Schedule published in the *Schedule of Classes*. That refund schedule is effective beginning on the first day of the quarter and counts all calendar days. Students cannot expect exceptions to this schedule, regardless of the circumstances of the leave of absence/withdrawal request.

LEAVE OF ABSENCE

A student is eligible to be enrolled in SHIP when on approved leave of absence for a total of one academic quarter. A student on approved leave is responsible for his or her health insurance enrollment, premium payment, and Student Health Service fee payment. Enrollment in SHIP is through the Student Health Insurance Office.

WAIVERS

Students already insured under a policy containing benefits equal to or better than SHIP may be eligible for SHIP waivers for up to one academic year. Documents required for a waiver are: 1) student's written request, 2) proof of present insurance and premium payment to the end of the quarter, 3) a copy of the summary of insurance benefits, and 4) a copy of the insurance identification cards. Submit written requests with all required documents directly to UCSD, Student Health Insurance Office, 9500 Gilman Drive, Dept. 0061, La Jolla, CA, 92093-0061 no later than the last business day of the first week of the quarter. The insurance coordinator will mail final decisions regarding waiver requests to the student.

Educational Fee

The educational fee was established as a required fee for all students beginning with the fall quarter 1970. It is used to cover a variety of educational costs as determined by the regents. The educational fee may be reduced by one-half for students enrolled in six units or fewer (see "Part-time Study").

Student Center Fee

Every student is required to pay a student center fee each quarter.

Recreation Facility Fee

Every student is required to pay a recreation facility fee each quarter.

Reduced Fee Enrollments

1. One-half of the established registration fee may be waived for graduate students whose research or study requires them to remain outside the state of California for five weeks or more of the quarter. Students must file a General Petition for this privilege. The reduction pertains to one-half of the registration fee only. A student must pay, in addition, all required fees including, but not limited to, the educational fee, student center fee, recreation facility fee, health insurance fee, and nonresident tuition fee, if applicable.
2. Graduate students approved for enrollment in a half-time program (not to exceed six units) are eligible for a reduction in fees of one-half the educational fee, and, if applicable, one-half of the nonresident tuition fee.
3. A full-time employee who is not subject to nonresident tuition, who has worked full time for the university for at least six months prior to the latest date that registration will be accepted, and who meets the admission requirements of the university is eligible for two-thirds reduction of both the university registration fee and the university educational fee for up to nine units or three regular session university courses per quarter, whichever is greater. An employee so registered is ineligible for the services and facilities of the Counseling Center, recreation facilities, or the Student Health Services, other than those services to which the employee is regularly entitled (University of California Staff Personnel Policy 260.23). Authorization for this privilege is secured from the Staff Personnel Office for staff employees, or from the Academic Personnel Office for individuals on academic appointments.

NOTE: In accordance with Academic Senate regulations, no voting member of the San Diego Division of the Academic Senate shall be recommended for a higher degree from UCSD unless the dean of Graduate Studies shall have certified that all requirements for that degree have been met prior to the appointment to a rank carrying the voting privilege.

Filing Fee

A student registered in the immediately preceding quarter, or on an approved leave of absence who has completed all requirements except for the final reading of the dissertation or thesis or the taking of the final examination is eligible to petition to pay a filing fee in lieu of registering and paying all required fees in the final quarter. The filing fee applies to both residents and nonresidents. Students must apply for this privilege by means of a General Petition.

Refund of Fees

Students who withdraw from the university during the first five weeks of instruction (35 calendar days) may receive partial refunds of fees, excluding health insurance, if applicable. The date of withdrawal, as related to the fee refund schedule, shall be the date on which notice of withdrawal is submitted to the Office of Graduate Studies and Research (OGSR). See Schedule of Classes for schedule of refunds.

Parking Fee

Students who park motor vehicles, including motorcycles, on the campus are subject to parking fees. (See "Parking," in chapter entitled "Campus Services and Facilities.")

Penalty Fees

Penalty fees (see "Fees"), are charged for failure to comply with normal deadline dates. To avoid such fines, students should fulfill all requirements in advance of the deadlines listed in the Schedule of Classes.

Transcript Fees

Students may obtain transcripts of their UCSD records from the Office of the Registrar for \$6 for each copy. Transcripts must be requested several days in advance of date needed.

Late Fees

Students are responsible for meeting quarterly enrollment and registration (fees payment) deadlines which are published on TritonLink, in the Schedule of Classes, and a variety of student-directed Web sites and publications. A \$50 late fee will be assessed for late enrollment and/or late registration up to \$100 total. Late enrollment automatically causes late registration as payments cannot be credited to a student's account

until enrollment occurs. Late fee waivers are rarely granted and only in extenuating and verifiable circumstances. Only certain staff in the Office of Graduate Studies and Research (OGSR) are authorized to grant waivers.

Financial Assistance

Several kinds of financial assistance are available to graduate students at UCSD. These include fellowships and traineeships; assistantships in teaching, language instruction, and research; scholarships in full or partial payment of tuition and/or fees; and loans and grants-in-aid. Further details about these awards/appointments may be obtained from departmental, group, or school offices.

Descriptions in this section deal entirely with awards administered directly by the university.

Applicants for financial assistance should note the following: "Pursuant to Section 7 of the Privacy Act of 1974, applicants for student financial aid or benefits are hereby notified that mandatory disclosure of their Social Security number is required by the University of California to verify the identity of each applicant. Social Security numbers are used in processing the data given in the financial aid application; in the awarding of funds; in the coordination of information with applications for federal, state, university, and private awards or benefits; and in the collection of funds and tracing of individuals who have borrowed funds from federal, state, university, or private loan programs."

Fellowships and Traineeships

Regents Fellowships, offered to students with excellent academic and research qualifications, provide a stipend of \$18,000 for nine or ten months, plus tax-free resident fees and nonresident tuition, if applicable. These awards may be supplemented with a partial graduate student researcher or research fellowship from available departmental resources. The amount of the supplement varies by department.

The San Diego Fellowship is designed to increase the quality of education and research by enhancing campus diversity. Currently it provides a minimum stipend of \$1,250 per month plus resident fees and one year of nonresident tuition. These awards are usually given for two years. Academic departments are responsible for two additional years of support for the Ph.D., D.M.A.,

or Ed.D. students awarded this fellowship. Look online at <http://ogsr.ucsd.edu/fellowships/> for further information.

The seven most outstanding nominees for the San Diego Fellowship are awarded the Cota-Robles Fellowship. Fellows receive an \$18,000 stipend plus fees for two years. Non-resident fellows are eligible for a tuition scholarship in their first year. Doctoral fellows are guaranteed comparable departmental support for at least two additional years.

The Alliance for Graduate Education and the Professoriate (AGEP) program is funded by the National Science Foundation (NSF). This fellowship is awarded to eight eligible graduate students in selected programs in science, mathematics, and engineering. For further information, look online at <http://ogsr.ucsd.edu/agep/index.htm>.

All other fellowship stipends are established by the department, group, or school and may vary in tenure from one to twelve months and in any amount up to a maximum of \$3,000 per month. Fellowships awarded for one, two, or three quarters will also provide tax-free resident fees and nonresident tuition, if applicable. Awardees must register for twelve units of upper-division and graduate-level work each quarter and must remain in good academic standing, as described under "Standards of Scholarship" of this catalog.

Fellows and trainees on twelve-month tenure are required to devote full time to graduate study and research during the summer as well as during the academic year. A brief resume of proposed summer graduate study or research, approved by the appropriate adviser, must be filed with the dean of Graduate Studies before the end of the spring quarter preceding the summer portion of the fellowship or traineeship tenure.

Some fellowships and traineeships offer the privilege of participation in the teaching or research programs of the university.

The principal types of fellowships/scholarships at UCSD are the following:

1. Regents Fellowships
2. San Diego and Cota-Robles Fellowships
3. Research Fellowships
4. U.S. Public Health Service Predoctoral Traineeships
5. Fee Scholarships

6. Tuition Scholarships

7. Tuition and Fee Scholarships

Assistantships

Graduate students may be appointed by UCSD on a part-time basis as graduate student researchers and teaching assistants.

Graduate students enrolled full-time (twelve units or more) may be appointed up to 50 percent time (twenty hours/week) during the academic year and 100 percent time during the summer months, although most departments limit support to 50 percent time year-round. Students enrolled for less than full-time (one to eleven units) are eligible, at the discretion of the department, for 25 percent time appointments. Appointees must remain in good academic standing, as described under "Standards of Scholarship."

Graduate students who are appointed as graduate student researchers are eligible for remission of tuition and fees if they have a minimum 25 percent appointment for the entire quarter for which tuition and fees are paid, or the dollar equivalent; have an appointment effective with the first week of instruction in the quarter for which tuition and fees are paid; and are within the time limits for support described earlier in this section.

Teaching assistants and others appointed on academic titles at 25 percent time or more for the quarter are eligible for payment of partial fee remission of 100 percent of the annual education and registration fees and 100 percent of the Graduate Student Health Insurance fee.

Graduate students appointed as teaching assistants, associates, readers or tutors (ASE'S) are represented by the Association of Student Employees/UAW under a collective bargaining agreement with the University of California. All salary payments under these titles are subject to a deduction for union membership dues or agency fee deduction for students who choose not to become members of the union. The university/UAW Agreement can be retrieved electronically at <http://ogsr.ucsd.edu/ase/index.htm>

All graduate students who are U.S. citizens and appointed as teaching assistants or graduate student researchers or are employed by the university in other positions are required by the California Constitution to sign the State Oath of Allegiance. In addition, all graduate student appointees and employees are required by university policy to sign the university's Patent Agreement.

Copies of both documents may be obtained from the student's academic department.

Taxability of Awards

Under the 1986 Tax Reform Act, the taxability of awards is as follows:

1. *Fellowships and Scholarships.* The portion of the stipend used for tuition, fees, books, and course-related expenses required of all students in the course are *not* taxable income. The portion of a stipend used for other purposes are taxable income.
2. *Graduate Student Researchers and Teaching Assistants.* All compensation is taxable income.
3. Payment of tuition and fees under the Graduate Student Researcher Tuition and Fee Remission program and payment of partial fee remission and graduate student health insurance for those appointed 25 percent time or more as teaching assistants or other academic titles, is nontaxable income.
4. *Grants for Travel to Scholarly Meetings and for Graduate Student Research Expenses.* May be taxable.

Students are advised to review available tax materials and make their own decisions about tax withholding, reporting of income, excluding income from taxation, and filing required tax forms. UCSD departmental and central administrative staff are not able to advise students on individual tax matters.

Graduate student fellowships, scholarships and traineeships are not subject to withholding for taxes under the Federal Insurance Contribution ACT (FICA). The salary of graduate students appointed as Teaching Assistants and Graduate Student Researchers, Readers, or Tutors, or who are employed on campus is exempt from FICA if the students are registered for a minimum of 6 units each quarter (including summer). Nonresident aliens on F-1 and J-1 visas are, by federal law, exempt from FICA.

Application Procedures

Entering students. The online application form for graduate admissions is used to apply for any of the following: fellowships, traineeships, scholarships, and assistantships (teaching, language, or research).

In order for an applicant to be considered for the ensuing academic year, all supporting materials must be received by the department appli-

cation deadline. No assurance can be given that requests for fellowships, traineeships, or scholarships can be processed after stated deadlines. Requests for assistantships may be accepted after the deadline, but most departments offer assistantships at the same time they consider applications for fellowships. Therefore, applicants for these appointments are strongly urged to submit their requests as early as possible.

Continuing and returning students. Consult with their departments.

Award Notification

The awarding of fellowships and similar awards for the following academic year will be announced not later than April 1. UCSD subscribes to the agreement of the Council of Graduate Schools of the United States, under which successful applicants for awards are given until April 15 to accept or decline such awards. An award accepted from one of the member universities may be resigned at any time through April 15. However, an acceptance given or left in force after that date commits the student not to accept another appointment without first obtaining formal release for that purpose.

Loans and Grants-in-Aid

An excellent package of grants-in-aid, work-study, and loans is available to graduate students who show evidence of financial need as determined by analysis of a completed Free Application for Federal Student Aid (FAFSA).

See section on financial assistance in chapter entitled "Campus Services and Facilities."

Time Limits for Graduate Student Support

For Ph.D. and D.M.A. students, all financial support administered by UCSD (including fellowships, scholarships, and appointment but excluding loans) is restricted to students who are within their departmental support time limits (see "Ph.D. Time Limits" and description of each department's graduate program).

M.F.A. and M.P.I.A. students can be supported for a maximum of ten quarters. M.A. and M.S. students can be supported for a maximum of seven quarters.

Fellowships and Research Awards from Outside the University

In addition to fellowships, traineeships, and loans administered by the university, other types

of graduate student support are available through federal agencies and private foundations. Students wishing to explore such sources of support for their studies at UCSD are urged to consult one of the many directories available in the reference section of Geisel Library, the fellowship listings provided via the Graduate Studies World Wide Web site (<http://ogsr.ucsd.edu>), the Community of Science Web site (www.cos.com), other Web sites dedicated to graduate fellowships, and through the reference departments of other large libraries. Most application deadlines occur in the fall or early winter. Among the many organizations which award fellowships to students at UCSD are the Department of Defense; the Ford Foundation; the Hertz Foundation; Institute of International Education; the National Aeronautics and Space Administration; the National Science Foundation; the Social Science Research Council; and, the Woodrow Wilson National Fellowship Foundation.

General Policies and Requirements

Integrity of Scholarship

See "UCSD Policy on Integrity of Scholarship" in the Academic Regulations section of this catalog.

Student Conduct

Graduate students enrolling in the university assume an obligation to conduct themselves in a manner compatible with the university's function as an educational institution. Rules concerning student conduct, student organizations, use of university facilities, and related matters are set forth in *UC San Diego Campus Regulations Applying to Campus Activities, Organizations, and Students*. Copies are available online at <http://ugr8.ucsd.edu/judicial> and at the Office of Graduate Studies and Research, and the Office of Judicial Affairs.

Student Appeals

ACADEMIC APPEALS

The faculty of a department or program has primary responsibility for maintaining the excellence of graduate programs, and it is in the best position to judge its students' academic performance. Consequently a graduate student appeal of an academic decision should first be made to

the individual faculty member who made the decision. If this does not result in a resolution that is satisfactory to the student, he or she may appeal to the department or program chair. Graduate students may appeal a course grade or Ph.D. or master's qualifying or final exam result only if he or she believes that nonacademic criteria were applied in determining the course or exam grade. A student who wishes to appeal a course grade or exam result should follow the procedure described in "Grade Appeals" in the "Academic Regulations" section of the *UCSD General Catalog*.

NON-ACADEMIC APPEALS

Graduate students may appeal actions of departments, programs, individual faculty members, departments, or administrators relating to a student's academic program or financial support if they believe that:

1. due process was not followed in arriving at a decision
- OR
2. personal prejudice affected the judgment rendered.

A non-academic appeal may be submitted to the individual faculty member or administrator within one month of the date of learning of the action or the date that the student should have reasonably known of the action. If an appeal to an individual faculty member or administrator is not resolved to the student's satisfaction, he or she may then submit a written appeal to the department or program chair, who shall attempt to adjudicate the case with the faculty member or administrator and the student within two weeks.

If the appeal is not resolved to the student's satisfaction at the department or program level, he or she may then attempt to resolve the matter through written appeal to the dean of Graduate Studies, who will attempt to adjudicate the case within two weeks. The dean may take the appeal to the Graduate Council for review, which may extend the time required to reach a final resolution.

The student's request for the dean's review should include a written statement describing the nature of the grievance, along with copies of any and all documents in his or her possession supporting the grievance. Students are encouraged to contact the assistant dean for Student Affairs in the Office of Graduate Studies and Research for assistance with the appeal process.

EMPLOYMENT APPEALS

Students holding an academic appointment, such as graduate student researcher, are subject to the Academic Personnel Manual Policy 140. A copy of this policy is available in the Office of Graduate Studies and Research or it may be viewed online at <http://www.ucop.edu/acadadv/acadpers/apm-140.pdf>. Appeals by teaching assistant, readers, and tutors are covered by the ASE/UAW contract that may be viewed at <http://ogsr.ucsd.edu/ase/index.htm>.

OTHER APPEALS

Grievances concerning violations of student rights are covered by the Student Conduct Code grievance procedures, which are available online at http://ugr8.ucsd.edu/judicial/23_00.htm#23.10. Examples of violations of students' rights include those affecting rights to privacy or protection from discrimination. These grievances are handled by the Office of Student Policies and Judicial Affairs, (858) 534-6225, studentconduct@ucsd.edu.

Students who disagree with an instructor's response to his or her request for disability accommodation may appeal the faculty decision or action to the CEP Subcommittee on Appeals for Accommodation of Students with Disabilities and Steps for Academic Accommodation, as provided at <http://www-senate.ucsd.edu/manual/Appendices/app3.htm>. A student's appeal of a grade based on disability discrimination follows the Grade Appeal Process for resolution. A student's challenge of any other action based on an alleged disability discrimination, must be lodged in accordance with Student Grievance procedures in the Student Conduct Code.

Student rights grievances should be made promptly to the decision-maker, if known to the student. If an appeal to an individual faculty member or administrator is not resolved to the student's satisfaction, he or she may submit a written appeal to the appropriate committee, governmental body, unit manager, supervisor, or designated representative for review and disposition. Such appeal must be made not later than one hundred (100) calendar days from the date of the incident causing the grievance. If the appeal at this level is not resolved to the student's satisfaction, the appeal may be continued as described in the Student Conduct Code procedures referenced to above.

Appeal and other rights for students accused of violating UCSD policies and procedures are outlined in the Student Conduct Code http://ugr8.ucsd.edu/judicial/22_00.html.

Exceptions

A student may request an exception to the normal procedures and requirements governing graduate studies by submitting a General Petition, available from the department. The petition must state clearly the reasons for requesting the exception and bear all required approvals before being submitted to the Office of Graduate Studies and Research.

Within twelve months of action by UCSD with which the student disagrees, such as denial of a right to withdraw, dropping or adding a class, or other decisions related to the student's transcript, a student may petition the dean of Graduate Studies for review. Petitions pertaining to matters that occurred in excess of twelve months in the past are submitted to the Committee on Educational Policy of the UCSD Academic Senate through the dean of Graduate Studies.

Requests for exceptions to time limits require a letter of explanation and support from the student's research adviser, and support and justification from the program's graduate adviser and endorsement by the department or group chair. Such requests are submitted to the Graduate Council through the dean of Graduate Studies. Exceptions to the time limits policy are granted only in the case of truly exceptional and unavoidable circumstances.

Grades

Standards of Scholarship

Only upper-division, graduate, and professional courses in which grades of A, B, C (including plus [+] or minus [-]), D, or S (Satisfactory) are earned can be counted in satisfaction of the requirements for a higher degree.

A student's grade-point average (GPA) is computed by dividing the total number of grade points earned by the total unit value of graded upper-division, graduate, and professional courses undertaken at UCSD with the exception of those undertaken in UCSD Extension. Grades of S, U, I, IP, NR, and W are excluded in computing a grade-point average. Lower-division course work units are not used in computing a graduate

student's grade-point average or in satisfying program requirements for a higher degree, with the exception of language courses taken by students in the M.P.I.A. program.

Each department or group prepares, not later than the second week of each spring quarter, a detailed, written evaluation of each of its doctoral or M.F.A. students. These evaluations are designed to inform students of their progress and to improve communications between faculty and graduate students. Evaluations are discussed with students who may elect to add written comments before signing the copy of the evaluation sent to the Office of Graduate Studies and Research. A student's signature on the evaluation indicates knowledge of the assessment but does not necessarily signify agreement.

To be in good standing academically a graduate student must meet departmental standards including a satisfactory spring evaluation, maintain a GPA of 3.0 or the equivalent in upper-division, graduate, and professional course work, and must not have accumulated more than a total of eight units of F and/or U grades overall, unless departmental standards specify more stringent grade requirements.

Good standing is a requirement for:

1. Holding academic and staff appointments.
2. Holding fellowship, scholarship, or traineeship appointments.
3. Participating in the Education Abroad Program (EAP)
4. Advancing to candidacy for a graduate degree.
5. Going on leave of absence.
6. Receiving a graduate degree from UCSD.

Graduate students who are not in good standing for any reason are subject to probation and/or disqualification from further graduate study.

Grading System

The grade of A+, when awarded, represents extraordinary achievement but does not receive grade-point credit beyond that received for the grade of A. The grades of A, B, and C may be modified by plus (+) or minus (-). When attached to the grades of B and C, plus (+) grades carry three-tenths of a grade point more per unit, and when attached to A, B, and C, minus (-) grades carry three-tenths of a grade point less per unit. Grades and grade points are described as follows:

Grade	Grade Points per Unit
A+	4.0
A Excellent	4.0
A-	3.7
B+	3.3
B Good	3.0
B-	2.7
C+	2.3
C Fair	2.0
C-	1.7
D Poor	1.0
F Fail	0.0
S Satisfactory (equivalent to B- or better)	0.0

Grade	Description
U	Unsatisfactory
I	Incomplete—but work of non-failing quality*
IP	In Progress (provisional grade; replaced when full sequence is completed)
W	Withdrawal (assigned when withdrawing or dropping a course beginning fifth week to end of ninth week of instruction)

* Requires Request to Receive Grade Incomplete form to be initiated and completed by the student, approved by the instructor, and filed with the department prior to the end of finals week. The Incomplete grade will lapse to F or U if not made up by the last day of finals week in the following quarter.

All grades except Incomplete and In Progress are final when entered in an instructor's course report filed at the end of the quarter.

While grades of U are not computed in a grade-point average, they are not considered satisfactory grades for students on appointment, nor are they considered to be evidence of satisfactory progress on the part of any student. Therefore, a student whose record bears more than eight units of U and/or F grades in upper-division, graduate, or professional course work may not be eligible to continue on appointment and may be subject to academic probation or disqualification.

Changes in Grades

All grades except I and IP are final when filed by the instructor unless a clerical or procedural error is discovered.

No change of a final grade may be made on the basis of revision or augmentation of a student's work; no term grade except Incomplete

may be revised by further examination; and no grade may be changed after one calendar year from the time the grade was recorded.

Repetition of Courses

A student assigned a grade of D, F, or U may petition to repeat the course on the same grading basis for which it was first taken. That is, a course in which a grade of D or F has been received may not be repeated on an S/U basis. Conversely, a course in which a grade of U has been awarded may not be repeated on the basis of a letter grade. Degree credit for a course will be given only once, but the grade assigned for each enrollment shall be permanently recorded. Only the grade received in the repetition of the course will be used in calculating the overall grade-point average for the first sixteen units repeated. For additional units repeated, the grade assigned for each enrollment shall be used in calculating the grade-point average.

No Report/No Record

A blank entry appearing on student transcripts in lieu of a grade indicates that the student's name appeared on a grade report but no grade was assigned by the instructor. A blank entry will lapse automatically into an F or U if not removed or replaced by a final grade by the last day of instruction of the subsequent quarter, and will be computed in the student's GPA.

I (Incomplete)

The grade of I may be assigned by an instructor only when the student's work is of passing quality but is incomplete. The student must complete and submit to the instructor the form, Request to Receive Grade Incomplete and Removal of Grade Incomplete, which will contain both the reason for requesting the grade I and the conditions to be met before the Incomplete can be replaced with a final grade. The Incomplete must be made up, the grade assigned, and the completed form filed with the Office of the Registrar no later than the end of final examination week the following quarter.

Incomplete grades assigned in the quarter before a graduate student withdraws or takes an approved leave of absence must be replaced by a final grade before the end of the academic quarter following to prevent the Incomplete from lapsing to F or U.

IP (In Progress)

An IP is assigned in a sequential course which extends over more than one quarter, and the evaluation of a student's performance may not be possible until the end of the course. A student who has dropped out without completing the entire sequence may be assigned final grades and unit credit for any quarter(s) completed, provided that the instructor has a basis for assigning the grades and certifies that the sequence was not completed for good cause. An IP not replaced by a final grade will remain on the student's record. Courses graded IP are not used in calculating a student's grade-point average until graduation. At that time course units still graded IP on a student's record must be treated as units attempted in calculating the GPA; **thus units graded IP will have the same effect on the overall GPA as an F or U.**

S/U (Satisfactory/Unsatisfactory)

The minimum standard of performance for a grade of Satisfactory shall be the same as the minimum for a grade of B-.

With the approval of the Graduate Council, departments may offer graduate courses in which graduate students may elect to be evaluated on an S/U basis and courses in which S/U grading shall be the *only* grading option. Grading options for a given course are identified in course listings in the *UCSD General Catalog*.

In addition, and with the approval of the department and the instructor concerned, graduate students may elect to have the following courses graded on an S/U basis: any upper-division or lower-division course taken (provided they have obtained approval of the instructor and the department), and any graduate or upper-division course outside their major department. If departmental requirements have been fulfilled for advancement to candidacy for the doctoral degree, graduate students may take any course on an S/U basis.

Selection of S/U as a grading option **must be made in the first two weeks of a quarter.** Units graded Satisfactory shall be counted in satisfaction of degree requirements but shall be disregarded in determining a student's grade-point average. No credit shall be allowed for work marked Unsatisfactory.

W (Withdrawal)

Students who discontinue graduate study any time during a quarter without formally withdrawing will receive failing grades for all course work undertaken. Formal withdrawal requires filing a Leave of Absence, Extension and/or Withdrawal form prior to leaving campus with the Office of Graduate Studies and Research after receiving departmental approval and all other approvals listed on the form. When a student withdraws before the end of the fourth week of instruction, no course entries will appear on the transcript for that quarter. Students who withdraw from the university or drop a course between the beginning of the fifth week of instruction and the end of the ninth week of instruction will be assigned a W (Withdrawn) by the registrar for each course affected.

Courses in which a W has been assigned will be disregarded in determining a student's grade-point average.

Final Grades

Students may access their full UCSD graduate academic record on TritonLink in the academic history module. The student must have his/her PID and PAC numbers to access TritonLink. If lost or misplaced, the PAC number may only be obtained from the Office of the Registrar (OAR) after providing proof of identification; the PID may be obtained through the departmental graduate program coordinator or the OAR. While grade reports submitted by instructors at the end of the quarter are generally considered final, **students should carefully examine their grade report or transcript for omissions and clerical errors and consult with instructors and the Office of the Registrar to clarify any discrepancies.**

Admission Requirements

Academic

Applicants for graduate admission must present official evidence of receipt of a baccalaureate degree from an accredited institution of higher education or the equivalent, with training comparable to that provided by the University of California. A minimum scholastic average of B or better is required for course work completed in upper-division, or prior graduate study.

Admission Policies

Duplication of Advanced Degrees

Normally, duplication of advanced academic degrees, M.A., M.S., Ph.D., is not permitted. A duplicate academic degree is one at the same level, e.g., a second master's degree or second Ph.D., regardless of the discipline or the specialization awarding the degree. A professional degree at the master's or doctoral level, e.g., Au.D., Ed.D., M.B.A., M.Ed., M.F.A., M.P.I.A., M.D. Pharm.D., is not regarded as a duplicate of an academic degree.

Students who already hold an advanced degree may be admitted to UCSD to pursue a second advanced degree at the same level only under limited circumstances, and only with the consent of the Graduate Council. Recognizing that there are circumstances in which it is appropriate for a student to pursue a second degree, the Graduate Council will consider the following criteria when reviewing requests for permission to do so at UCSD.

1. The degree already held by the student must be in a fundamentally different disciplinary field from the department to which the student is applying. A request for permission to be admitted to a degree program at UCSD should document this clearly, and should indicate the differences both in intellectual training and in qualification for future employment that the second degree would confer.
2. The department or program considering the applicant must make a clear case that there is no other way at UCSD for the student to obtain the same outcome for future employment prospects, e.g., by pursuing a master's program or post-doctoral study rather than a second Ph.D.

If the decision of the Graduate Council is that the student should be admitted to a particular department or program for a master's degree alone, the student is barred from requesting permission to continue for a Ph.D. in that department or program.

Non-Degree Study

There is no "student-at-large" classification at UCSD; application for admission must be made to a specific department or group. Applicants who wish to enroll for "course work only" within

a department or group and who do not intend to pursue a higher degree at UCSD may request admission for non-degree study. Applicants for non-degree study must satisfy all admission requirements and are not eligible for fellowships or assistantships. Non-degree status is granted for up to one year; students may petition the dean of Graduate Studies for a second year of non-degree status.

Part-Time Study, Including Half-Time

Students who enroll in fewer than twelve graduate or upper-division units each quarter are considered part-time students. International students on F1 or J1 visas must be enrolled full-time each quarter. Students who are approved by their major department and by the dean of Graduate Studies for enrollment in a program of half-time study (maximum of six units or fewer) for reasons of occupation, family responsibilities or health, may be eligible for a reduction in fees. All other part-time students (7-11 units) pay the same fees as full-time students.

Part-time study may be pursued in several masters' programs and a few doctoral programs at UCSD. In all instances, part-time students must satisfy the same admission requirements as full-time students and are eligible, at the discretion of a department, for appointment to 25 percent time teaching or research assistantships. Admitted students must file the petition for half-time study with the Office of Graduate Studies and Research no later than the last day of the second week of the quarter to be eligible for a fee reduction.

Application Procedures

When to Apply

Each graduate program sets a unique application deadline. Most deadlines are set between December and February. A few programs accept applications for winter and spring admissions. For specific deadlines refer to the online application instructions at <http://ogsr.ucsd.edu> or contact the specific program office. Applicants need not have completed their undergraduate programs prior to applying.

How to Apply

UCSD encourages the use of the online application and payment of the nonrefundable application fee by credit card. The online application can be accessed at <http://ogsr.ucsd.edu> where detailed instructions for completion of the application are provided. If a paper mail-in application is necessary, it must be obtained from the academic department where the applicant is applying.

Additional program and application information can be obtained from each graduate program office. Access the UCSD Web site <http://ucsd.edu> and the appropriate program's graduate study information. Telephone numbers and campus addresses are listed with the department information in this catalog. The Graduate Admissions Application includes application for a fellowship, traineeship, scholarship, or assistantship. The primary documents required in support of an application are listed below. Each program may require additional documents.

Social Security Number Disclosure

Pursuant to the Federal Privacy Act of 1974, applicants are hereby notified that disclosure of their Social Security number is mandatory. The Social Security number entered on the application for graduate admission may be used as the applicant's identification number for part of the UCSD graduate student record keeping system. A personal identification (PID) number will also be assigned by the UCSD student information system for record-keeping purposes. This record-keeping system was established prior to January 1, 1975 pursuant to the authority of the Regents of the University of California under Art. IX, Sec. 9 of the California Constitution.

Required Supporting Documents

All supporting documents, including letters of recommendation, should be completed using the online system. Any additional supplemental materials are mailed directly to the applicant's prospective major department.

ACADEMIC RECORDS

Applicants must request that official transcripts of all previous academic work, including certification of degrees received or documentation of status upon leaving each institution, be forwarded to their prospective major department. Only official records bearing the signature

of the registrar and the seal of the issuing institution will be accepted. Applicants with academic work in progress who expect to complete a degree program before the intended date of enrollment at UCSD must submit evidence of degree conferral and a final academic record, as soon as they are available. The undergraduate degree must be completed prior to the start of graduate study.

SPECIAL NOTE TO INTERNATIONAL APPLICANTS

In all applications for graduate admission, official records bearing the signature of the registrar or other responsible academic officer and the seal of the issuing institution are required. However, true copies, facsimiles, or photostatic copies of foreign academic records will be accepted if, after the copies have been made, they have been personally signed and stamped by an educational official of the issuing institution, who certifies that they are exact copies of the original document. Properly signed copies should be sent instead of irreplaceable original documents. Unless academic records are issued in English by the institution itself, certified English translations must accompany official documents written in a language other than English.

Foreign academic records should show all courses attended each year, examinations passed, seminars completed, and grades or marks received in all institutions where formal records are maintained. Official evidence of degree conferral must also be supplied, together with evidence of rank in class if possible.

GRADUATE RECORD EXAMINATIONS (GRE) SCORES

Most graduate programs require that applicants take the GRE. Contact the specific program for further information. Applicants who are applying for admission to a department, group, or school which requires that they take the GRE should do so as early as possible to insure the timely receipt of their score results. Applicants must take the GRE no later than fall in order to meet most departmental deadlines for admission. Consult the GRE Information & Registration Bulletin or the GRE Web site <http://gre.org> for further information. Only official scores sent to UCSD by E.T.S. will be accepted for admission.

To facilitate the processing of applications for admission, applicants may forward to their proposed major department, group, or school a

copy of their GRE examination score as soon as it is received, since official copies are not always immediately received by the appropriate department at UCSD.

LETTERS OF RECOMMENDATION

Applicants should arrange to have three letters of recommendation submitted online to UCSD. If paper letters are necessary they must be mailed to the prospective major department, group, or school. (Recommendation forms can be printed from the online application site). It is most important that letters of recommendation be completed by individuals in a position to analyze an applicant's abilities and academic or professional promise.

INTERNATIONAL APPLICANT FINANCIAL STATEMENT

Foreign applicants are required to certify that they possess sufficient funds to cover all fees, transportation, and living expenses during the first academic year of graduate enrollment at UCSD. An International Applicant Financial Statement, for the purpose of indicating the amount and source of funds available for graduate study, is forwarded to foreign applicants upon admission into a graduate program. A written summary of present and future financial resources must be provided before visa forms can be granted.

Opportunities for employment on or off campus, are extremely limited, and foreign applicants should not base their educational plans on the hope of finding employment after arriving in the United States.

Admissions

Examination Information

There are a variety of internationally administered examinations which may be taken to meet requirements for admission to graduate study or to satisfy certain requirements for advanced degrees. Several examinations of importance to UCSD applicants are listed here.

ENGLISH LANGUAGE TEST

All international applicants whose native language is not English and whose undergraduate education was conducted in a language other than English must take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) exam

and submit their test scores to the Office of Graduate Admissions.

The minimum TOEFL score for admission is 550 for the paper-based test (PBT), 213 for the computer-based test (CBT), or 80 for the Internet-based test (IBT). The minimum IELTS score is 7.0. Applicants admitted with low scores may be required to take an English proficiency test upon arrival at UCSD and to enroll in an English course until the required proficiency is attained.

Application: Information and forms are available online at <http://toefl.org>, or from TOEFL Services, P.O. Box 6151, Princeton, NJ 08541-6151, or from United States embassies, consulates, and related centers.

TEST OF SPOKEN ENGLISH (TSE)

The Test of Spoken English helps foreign students provide a reliable measure of proficiency in spoken English. This test is highly recommended for foreign applicants who wish to be considered for a teaching assistantship. Test information is available at <http://tse.org>.

Admission and Registration

Official admission to graduate study at the university is contingent upon review of an applicant's record, receipt of final undergraduate transcript showing degree(s) awarded, receipt of official transcripts of all attended institutions, an affirmative recommendation by the prospective department, group, or school, and action by the Office of Graduate Studies and Research. The dean of Graduate Studies or the prospective major department, group, or school may deny admission if an applicant's scholastic record is undistinguished, if the preparation is judged inadequate as a foundation for advanced work, or in the event that no further students can be accommodated for a given quarter. **Only the official Certificate of Admission from the dean of Graduate Studies constitutes formal approval of admission to a graduate program at UCSD.**

Official notification of admission by the dean of Graduate Studies will be sent well in advance of the beginning of the quarter for which application has been made. Applicants should call their prospective major department, if formal notification is not received four weeks prior to the beginning of the quarter for which they applied.

Admission to graduate standing does not constitute registration for classes. A student is not officially registered for classes until the entire registration procedure is completed each quarter. Information and all necessary registration materials will be available at department offices approximately two weeks before the opening of the quarter (see "Academic Calendar").

Deferral and Reapplication

Applicants who are admitted but decide not to register in the quarter for which they first apply may request deferral of their application for a later quarter within the same academic year or the academic year immediately subsequent. Application for admission of an approved deferred applicant for the subsequent academic year may be made by submitting a statement of activities and official transcripts of any academic work undertaken since the first application to the department or group. Admission is not guaranteed to previously admitted applicants who have an approved deferral. In no case are application files retained for more than four consecutive academic quarters from the date of first application. Application after this period may be made only by completing a new application and providing all necessary documents, including payment of the graduate application fee.

Students who are denied admission must submit a new application and fee together with required documentation in order to be considered for admission in another academic year.

Readmission

A graduate student whose status has lapsed because of an interruption in registration must petition his or her department for readmission at least eight weeks prior to the first day of the quarter in which reenrollment is intended. **Do not complete an Application for Admission.** Students must submit supplementary transcripts of all academic course work undertaken since last enrolled at UCSD, pay a readmission fee of \$60, and complete a General Petition and a supplementary Statement of Activities. In addition, a Statement of Legal Residence is required for all students returning after an absence of two quarters or more.

Readmission is not automatic.

Registration Requirements and Procedures

All students must enroll and pay fees on or before the deadline dates established by the Office of the Registrar for each quarter to avoid paying late fees. Enrollment materials are obtained at the major department. (See Schedule of Classes for current deadlines.)

Full-Time Student

A full-time student is required to be registered for twelve units each quarter of each academic year until the completion of all requirements for the degree, including the filing of the thesis or dissertation.

Part-Time Student

A part-time student is enrolled in fewer than twelve units a quarter but is admitted as a regular student. A part-time student must pay full fees unless approved by the dean of Graduate Studies to enroll in half-time status for six units or fewer. A student must file the petition for half-time study with the Office of Graduate Studies and Research no later than the last day of the second week of the quarter to be eligible for reduced fees. (See "Admissions Policies-Part-Time Study.")

Schedule of Classes

Detailed information on registration and enrollment procedures is contained in the quarterly *Schedule of Classes*, found on the Office of Admissions and Records home page on the World Wide Web: <http://tritonlink.ucsd.edu>. **It is the responsibility of each graduate student to keep informed of and meet all enrollment and registration (fee payment) deadlines.**

Priority Enrollment

CONTINUING STUDENTS

Continuing graduate students may enroll in classes through WebReg or by coming to the Registrar's office any time during the quarterly enrollment period. A Personal Access Code (PAC) number is issued to graduate students by the Office of the Registrar. Students may also use WebReg to add, change, and drop classes. Students who do not use WebReg may complete Add/Drop Cards and file them with

the Office of the Registrar any time during enrollment periods.

Complete instructions for enrolling by WebReg or Add/Drop Cards can be found in the quarterly *Schedule of Classes* and on TritonLink.

Confirmation of classes is immediate by WebReg. Students must officially withdraw from a course to avoid receiving a failing grade.

NEW STUDENTS

New students are given academic advising in their respective academic departments and enroll just prior to or at the beginning of their first quarter at UCSD.

Student Photo-Identification Card

A validated Student Photo-Identification Card is the official ID for registered students and entitles the student to library privileges, a student health card, and use of other university facilities, as well as for purchasing tickets and/or admission to certain university events and voting in student body elections. Registration is validated electronically via the Campus ID card magnetic strip. Quarterly fees are required to be paid for registration validation.

If the Student Photo-Identification Card is lost, students may obtain a duplicate at the Campus Card Services Office, 508 University Center.

Registration Procedures

Students are considered enrolled when they have requested at least one course and space in it has been reserved. Every effort will be made to enroll students in their preferred class sections. Students are not considered registered until they have both enrolled in classes and paid registration fees.

Payment of Registration Fees

Please refer to the "Payment of Registration Fees" section in the "Undergraduate Registration" portion of this catalog or the quarterly *Schedule of Classes* which outlines procedures for payment of registration fees.

Note to Fellowship, Scholarship, or Traineeship Holders:

The first billing statement will be sent to each enrolled student about one month prior to the start of each quarter. Fees and tuition awarded to pay registration fees will be credited to the graduate student's account and appear on the

statement as a payment or credit. Each award recipient should carefully check the amounts listed on the statement against the graduate award letter and contact the Office of Graduate Studies immediately if there is a discrepancy. Graduate students with partial fee and/or tuition awards will be required to pay the balance by the fee deadline to complete their registration.

Fellowship, scholarship, or traineeship holders must enroll in and maintain full-time enrollment status (at least twelve units per quarter).

Note to Students on Academic Titles:

Students appointed 25 percent time or more as graduate student researchers on the tuition and fee remission program will have the amount of their required tuition/fees credited to their account prior to the beginning of the quarter. This payment will also appear on the student's university billing statement.

Students appointed 25 percent time or more as teaching assistants, associates, and readers or tutors guaranteed by the hiring department to work at least 110 hours (25 percent) for the quarter will have partial fee remission (including remission of the health insurance fee) credited to their university account prior to the beginning of the quarter. Students who are readers and/or tutors who are not guaranteed 25 percent time at the beginning of the quarter, but subsequently work 110 hours or more, are issued refunds for partial fee remission at the end of the quarter.

Teaching assistants appointed 25 percent time or more are eligible to apply for the TA Fee Deferment program. Under this program, the balance of resident fees (but not tuition) is deducted from the second and third check each quarter.

During the fall quarter only, teaching assistants and graduate student researchers appointed 25 percent time or more may be eligible to apply for the TA/GSR Loan program.

For additional information, contact your graduate department or the Office of Graduate Studies and Research.

Full-time graduate study and support requires enrollment in a minimum of twelve units each quarter.

Continuous Registration

All graduate students are required to be registered each quarter until all degree requirements have been completed, including filing of the

thesis or dissertation and the final examination, or to be on an approved leave of absence.

A student who fails to register or to file an approved leave of absence form by the registrar's deadline date (no later than the end of the second week each quarter) will be assumed to be withdrawn from UCSD and will be dropped from the official register of graduate students. In addition, all outstanding Incomplete grades, and NRs assigned by the registrar, will lapse to F's or U's unless cleared by the end of the current quarter. A student who is on leave of absence or who has withdrawn from the university is not entitled to withdraw books from the library or to use other university facilities or faculty time. A student who is withdrawn must petition for readmission to resume study at a later date, pay the nonrefundable readmission fee, and be considered for readmission with all others requesting admission to that quarter.

Doctoral degree candidacy will lapse for graduate students who fail to register and are not granted a formal leave of absence. To be reinstated to candidacy, a graduate student must be readmitted, enroll and register, be readvanced to candidacy, and pay the candidacy fee.

Late Registration/Deadline and Penalty Fees

Students will be assessed late fees if not enrolled and registered by the registrar's published deadlines outlined in this catalog and the quarterly *Schedule of Classes*. Please refer to the "Graduate Admission Information and Enrollment Deadlines" portion of this catalog or to the quarterly *Schedule of Classes* for additional information.

A student who has not completed registration (enrolled and paid fees) by the deadline for change of program **must petition for permission to register late and will pay late fees totaling \$100**, regardless of the source of fees payment.

A student whose registration in classes is cancelled for non-payment of fees and seeks reinstatement will be assessed both the late enrollment (\$50) and late registration fees (\$50), currently totaling \$100, regardless of the source of fees payment.

Students are advised to consult the quarterly *Schedule of Classes* for current deadline dates.

Changes in Course Selection

Add/Drop Cards reflecting changes in class enrollment must be filed with the Office of the Registrar in order for the student to receive credit for added courses and be relieved of responsibility for dropped courses.

Add/Drop Cards must be completed in full and include correct course information and course codes as listed in the current *Schedule of Classes*.

After enrolling in courses, a graduate student may add courses, change sections of a given course, or change grading options up to the end of the second week of instruction without fee by completing an Add/Drop Card available at the Office of the Registrar. Students may also use WebReg. Students in some programs must obtain approval of their graduate adviser or department. See *Schedule of Classes*, "Changes of Programs." Any requests to the dean of Graduate Studies for exception to this policy require written explanation and instructor verification of attendance/course work completion to date.

A graduate student may drop a class up to the end of the ninth week of classes by filing an Add/Drop Card with the registrar, **after** first notifying the instructor, and obtaining the approval of the graduate adviser or department and the dean of Graduate Studies. If the course is dropped before the end of the fourth week of classes, no course entry will appear on the student's transcript. Courses dropped after the end of the fourth week of instruction and before the end of the ninth week of instruction will remain on the transcript as permanent entries showing course number and title, and the registrar will assign a final grade of *W*, signifying *Withdrawal*.

Students may not drop courses after the end of the ninth week of instruction and will receive the earned grade or an Incomplete, if applicable. When a grade in a course has been assigned in accordance with the Academic Senate policy on Integrity of Scholarship, a student may not subsequently change that grade by dropping the course or withdrawing from the university.

Enrollment Limits

A full-time graduate student in a regular quarter is expected to enroll in twelve units of upper-division or graduate course work with the exception that in the Graduate School of International Relations and Pacific Studies the

normal course load is sixteen units. A student who wishes to take units in excess of these limits must obtain the approval of the graduate adviser or department chair.

Graduate students holding half-time appointments as graduate student researchers, teaching assistants, language assistants, readers, or other employment titles, or who receive support from traineeships, fellowships, or scholarships paid through the university or directly to the student, must enroll and register for twelve units of upper-division and/or graduate course work and research each quarter.

Teaching units (500 series) above the full-time program of twelve units are not considered an overload.

Graduate students approved for half-time study are limited to a maximum of six units of upper-division or graduate course work each quarter.

Changes of Name or Address

Students must file official change of name or address forms with the Office of the Registrar. Students are advised to also notify their major department, group, or school.

Leave of Absence/Extension

A student who discontinues graduate study with the intention of resuming during a later quarter, with department approval, files a formal Leave of Absence, Extension and/or Withdrawal form prior to leaving the campus. Graduate students must have completed at least one quarter of academic residence and be in good standing (GPA 3.0 minimum or equivalent and no more than eight units of U or F) to be granted a leave. All graduate students are limited to a maximum of three quarters of leave and/or withdrawal.

Prior to the end of the second week of instruction of the quarter in which the leave is to begin, a student must complete a Leave of Absence form and obtain required signatures as listed under the clearance section of the form, and the approvals of the graduate adviser, chair of the (major) department, group, or school, and dean of Graduate Studies. **Fee refund will be subject to the refund schedule published in the quarterly *Schedule of Classes* (see section on "Withdrawal").** A graduate student who enrolled in classes before requesting a Leave of Absence must also request a withdrawal from course work for the quarter of leave to avoid paying fees for that quarter. Graduate students

may request an extension of an approved leave prior to the expiration of the leave, up to the maximum of three quarters in all degree programs. For an extension of an approved leave, the student must complete a new leave of absence form and obtain the signatures of the graduate adviser, chair of (major) department, housing, and dean of graduate studies.

PARENTING LEAVE

A graduate student who is bearing a child, who has primary responsibility for the care of an infant immediately following birth, a child under the age of five, or adoption of a child under age five, and is in good academic standing will be granted, on request, a one-quarter extension of all unexpired doctoral time limits. During the quarter in which childbirth or adoption occurs, the graduate student may choose one of the following registration options:

1. Continue registering as a full-time graduate student and retain eligibility for support.
2. Reduce to part-time status (less than twelve units) and be eligible for up to 25 percent time employment on campus.
3. Take a leave of absence.

After the quarter in which childbirth or adoption occurs, a graduate student who has primary responsibility for caring for a child up to the age of five will be granted, on request, a leave of absence for the purpose of caring for the child for a maximum of two quarters (or three quarters, if a one-quarter extension has not been granted for the quarter in which childbirth or adoption occurred).

The total amount of time for which graduate students may receive extensions of time limits for parenting or childbearing may not exceed three quarters in a graduate student's career at UCSD. Approved leaves for childbearing and parenting will not count in the three-quarter leave limit available to all graduate students.

A student who has a long-term loan is considered to be out of school while on a leave of absence and **must set up an exit interview with the Loan Records Office before leaving the campus.** Since rules and regulations pertaining to such loans are complex, it is to the student's advantage to determine loan requirements prior to seeking a leave of absence.

A student on leave of absence may not (1) be employed by UCSD, UCSD Medical Center or UC Extension, or hold a fellowship, traineeship, or similar appointment administered by the university, (2) use university facilities, (3) complete a qualifying examination for advancement to candidacy, or (4) place demands on faculty, including discussion of thesis or dissertation work, either directly or by correspondence, during the period of leave.

A student may remain in student housing while on an approved leave of absence providing he or she has been a full-time student (twelve units or more) for three consecutive quarters immediately prior to the leave of absence and is eligible for university housing.

Students must return all borrowed library material if requesting a leave of absence or withdrawing.

Any student on an approved Leave of Absence must contact their major department to be reinstated and cleared for enrollment and registration.

A new Statement of Legal Residence is required for all graduate students **returning from a leave of absence of two quarters or more.**

Withdrawal

A student withdrawing from the university must obtain a Leave of Absence, Extension and/or Withdrawal form and secure appropriate signatures. The approved form must be filed with the Office of Graduate Studies and Research.

Students who withdraw during the first thirty-five days of instruction will receive refunds of fees in proportion to the number of *elapsed calendar days since the first day of instruction.* **The date of withdrawal used in calculating the refund shall be the date on which the approved notice of withdrawal is submitted to the Office of Graduate Studies and Research.**

A registered student who stops attending classes and fails to file a Leave of Absence, Extension, and/or Withdrawal form will receive a grade of F or U in each course, thus jeopardizing eligibility for readmission.

Return of Title IV Federal Student Aid

Financial aid recipients may be required to return some or all of their aid at the time of withdrawal. This requirement applies only to undergraduate students who withdraw prior to completing 60 percent of the quarter. Questions about financial aid repayment should be directed to Student Financial Services Office.

Bar from Registration/Nonacademic

After suitable warning, a student may be barred from further registration for a variety of nonacademic reasons, including failure to comply with official notices, to settle financial obligations when due, to provide final undergraduate transcripts, or other related matters.

Bar from Registration/Academic

Academic disqualification is determined by the dean of Graduate Studies in consultation with the student's department, and normally relates to: unsatisfactory academic performance, e.g., failure to maintain a grade-point average of 3.0 or better; failure to meet departmental criteria of performance; failure to advance to candidacy or complete the degree within established time limits; accumulation of more than eight units of F or U grades; or failure to comply with conditions set at the time of admission to a graduate degree program.

Campus Services and Facilities

Academic Services and Programs

Academic Advising

The college academic advising offices and the academic departments are the designated campus units responsible for providing official academic advice and direction to undergraduate students. The college academic advising offices and departments have primary responsibility for academic advice and services that assist new and continuing students to develop educational plans and course schedules which are compatible with their interests, academic preparation, and educational and career goals.

COLLEGE ADVISING OFFICES

Revelle College, Admin. Building, Mail Code 0321, (858) 534-3490

John Muir College, 2126 H&SS, Mail Code 0106, (858) 534-3580

Thurgood Marshall College, Admin. Building, Mail Code 0509, (858) 534-4110

Earl Warren College, Computer Science and Engineering (EBU 3), Mail Code 0422, (858) 534-4350

Eleanor Roosevelt College, Admin. Building, Mail Code 0546, (858) 534-9864

Sixth College, Pepper Canyon Hall, 2nd Floor, Mail Code 0054, (858) 822-5955

Specifically, the college academic advisers conduct academic orientation/enrollment programs for all new students and advise new and continuing students about college general education and graduation requirements. The advising staff of each college provides general academic and curricular information, clarifies academic rules and regulations, reviews all aspects of academic probation, monitors academic progress, assists students with decision-making strategies, and provides information about major prerequisites as well as criteria for departments that screen students. In conjunction with the academic departments and the Office of the Registrar, the advising offices certify graduation and generally facilitate students' academic adjustment to the university.

Moreover, academic advisers are available to counsel students about educational alternatives, selection of courses and majors, program changes, new academic opportunities, and special programs such as exchange programs, honors programs, outreach programs, etc.

See your college academic adviser for assistance with academic concerns or referral to appropriate academic support units.

Academic Computing Services

Help Desk

1313 Applied Physics and Mathematics,
Muir College
(858) 534-3ACS (3227)

Administration and Director's Office

1141-1161 AP&M
(858) 534-4050
<http://acs.ucsd.edu/>

Academic Computing Services (ACS) plays a variety of computing roles at UCSD. Among these are support of instructional computing, management of the main academic network, hardware repair, and administration of software site licenses.

Student Computing

The main function of ACS is to provide facilities for instructional computing. In addition to timesharing systems, ACS maintains over 1800 workstations of various types available across campus. These include Windows, Macintosh, and UNIX workstations located in public areas, computer labs, and libraries.

A wide variety of software is available on various platforms, including general word processing, spread sheet and Web site design applications; compilers and program development tools; special purpose packages for electronic design, mechanical engineering, animation, statistics, genetic studies, and symbolic mathematics.

Beyond instructional computing, ACS provides facilities to students for popular activities such as email, personal Web sites, and other network-based communications. Incoming students receive personal account information at Orientation.

ACS has student assistants who are available at scheduled times in computer labs to help students use the facilities. These assistants complement other forms of support such as guidance from instructors and teaching assistants, and online documentation.

ACS provides both instructional and extracurricular computing services to students through a single "personalized" account. The goal is to make computing more convenient and flexible, and to allow students to pursue academic computing interests on their own initiative.

Network Operations

(858) 534-1857
<http://www-no.ucsd.edu>

Network Operations plays a major role in the management of campus computer networks and services, including the student residential network (ResNet), the campus wireless network, a dial-in modem service, Web proxy, Internet connectivity, Active Directory, the campus email gateway, and an email registry of campus members and affiliates.

Students can obtain more information about ResNet at <http://resnet.ucsd.edu> and can obtain support at that Web site or by calling (858) 822-2800.

Wireless access is available in most campus buildings and common spaces. A UCSD network login and a wireless network card are required to attach to the network. For more information, students should see <http://resnet.ucsd.edu> (Wireless Network).

To use campus dial-in lines, UCSD users must sign up and pay for dial-in service. Users will also need a network security username and password. Incoming students have these issued automatically.

Network Operations can assist you in connecting your computer to make use of Internet services, including checking email, managing spam, and subscribing to UCSD mailing lists.

For more information, email userserv@ucsd.edu. Dial-in billing questions may be directed to (858) 822-2900.

Software Licensing and Distribution

(858) 534-9676
<http://software.ucsd.edu>

ACS manages agreements with several software vendors under which UCSD departments are able to license and obtain software at a discount. For more information, email software@ucsd.edu.

Desktop Support

(858) 822-0047
<http://desktop.ucsd.edu>

The ACS Desktop Support Program provides assistance on a fee-for-service basis to UCSD departments, as well as to residence hall customers. Services include installation, configuration, and repair of Windows and Macintosh workstations; Windows and Novell Netware server support. For more information, email desktop@ucsd.edu.

Instructional WWW Development Center

(858) 822-3315
<http://iwdc.ucsd.edu>
<http://courses.ucsd.edu>

ACS' Instructional WWW Development Center manages most course Web sites, including WebCT. The IWDC provides instructional Web site creation, development assistance, and training for faculty. The IWDC offers more extensive services on a recharge basis, including departmental and UCSD-affiliated group Web hosting and fee-for-service Web-related programming. For more information, email iwdc@ucsd.edu.

Computer Repair and Installation

(858) 534-4057
<http://cri.ucsd.edu>

Computer Repair and Installation provides computer and printer maintenance and repair for over 1800 workstations and printers in various labs across campus. ACS Computer Repair and Installation also provides the UCSD community with expert hardware repair and upgrade support. They have professional certified full-time staff with extensive repair service and upgrade experience. They repair and upgrade most computer and printer products and are available for network installation and repair. Their goal is to provide UCSD faculty, staff, and students with an efficient and cost effective solution for all their hardware needs. For more information, email cri@ucsd.edu.

Academic Enrichment Programs/Student Educational Advancement/Student Affairs

Student Center Building B, 2nd Floor

Mail code 0311
(858) 534-1774

Dedicated to providing UCSD undergraduates with research and other academic enrichment experiences beyond the classroom.

PROGRAM DESCRIPTIONS:

Faculty Mentor Program

The Faculty Mentor Program offers valuable research experience to juniors and seniors who want to prepare for graduate or professional school. Participants work as research assistants to UCSD faculty members for at least ten hours per week for two quarters. Students receive four units of 199 independent study credit each quarter, attend seminars on various topics, including how to write and present a research paper, and receive graduate school and fellowship information. At the conclusion of the program, students present their research papers at the annual Faculty Mentor Program Research Symposium.

Health and Medical Professions Preparation Program

HMP³ assists students in their undergraduate preparation for careers in the health professions. These include medicine, dentistry, pharmacy, veterinary, public health, nursing, and others. The program provides students with activities and resources including preprofessional seminars, review course scholarships, volunteer placement information, peer discussion series, and mentorship opportunities. Participants have access to a library of information on summer and postbaccalaureate programs, upcoming conferences, health professional schools, etc. The program also serves as a clearinghouse for information about other campus resources available to the pre-health professional student.

Summer Research Program

The Summer Research Program offers a paid, full-time research experience to students who are interested in preparing for careers in research or university teaching. As research assistants, students work on their faculty mentor's projects for at least thirty hours per week. Students are trained in research skills, how to write and present a research proposal or paper, and how to prepare for the Graduate Record Examination (GRE). At the conclusion of the program, students present their papers at the annual UCSD Summer Research Conference.

McNair Program

The McNair Program is a U.S. Department of Education initiative designed to serve low-income, first-generation college students and underrepresented minorities who are interested in pursuing a Ph.D. It is a rigorous one-year program of scholarly activities that includes participation in the Faculty Mentor Program and the Summer Research Program. In addition, participants receive training in how to write and present a scholarly paper, preparation for the GRE, and assistance with the graduate school application process. All participants have the opportunity to present a paper at a minimum of two research conferences.

CAMP Science Program

The CAMP Science Program is funded by the California Louis Stokes Alliance for Minority Participation in Science, Engineering, and Mathematics (CAMP) grant from the National Science Foundation. This program is designed to provide support and advancement opportunities to ethnically underrepresented students who are seeking bachelor's degrees in the sciences, mathematics, engineering, and technology. Participants in this program may attend informational and skill-building workshops, tour UCSD laboratories, local companies and research institutes, attend local and/or national conferences, participate in a book exchange program, attend study break dinners and coffee with faculty events, and are eligible to earn book scholarships. In addition, students are encouraged to participate in academic year and/or summer research, and pursue graduate school.

Computer Science, Engineering, and Mathematics Scholarship (CSEMS)

The Computer Science, Engineering, and Mathematics Scholarship (CSEMS) is a two- or four-year program providing research and outreach opportunities to low-income, academically talented students in the Jacobs School of Engineering and the Department of Mathematics. The chief objectives of the program are to promote full-time enrollment and degree completion.

University of California Leadership Excellence through Advanced Degrees (UC LEADS)

The University of California Leadership Excellence through Advanced Degrees (UC LEADS) is a selective two-year research program for under-

graduates majoring in science, engineering, or mathematics. Students receive stipend support for two summers of research and support for travel to conferences, membership in professional associations, and other research-related activities. UC LEADS participants work on well-defined projects under the supervision of faculty mentors. The UC LEADS experience will prepare students to be competitive applicants for admission to doctoral programs, preferably within the UC system, and eventually to assume leadership positions in society.

Undergraduate Research Conference

The UCSD Undergraduate Research Conference is an annual event where more than 100 students who have written outstanding research papers are invited to present their research. Invitation is by faculty nomination. Students present their papers at small roundtable discussions led by a faculty presider.

Education Abroad Program (EAP)

International Center (corner of Gilman Drive and Library Walk)

Mail code 0018

(858) 534-1123

<http://programsabroad.ucsd.edu>

The Education Abroad Program provides students enrolled at the University of California an opportunity for an intercultural experience at UC centers located in Australia/New Zealand, Africa, Asia, Europe, Latin America, and North America, while allowing normal progress toward a degree.

The program is described in detail in the "Courses, Curricula, and Programs of Instruction" section of this catalog under the "Education Abroad" heading.

International Scholar Team

International Student and Scholar Office

International Center

(Corner of Gilman Drive and Library Walk)

Mail code 0018

(858) 534-3730 phone

(858) 534-0909 fax

<http://icenter.ucsd.edu>

Four international scholar advisers, several support staff, and an outreach and volunteer coordinator make up the International Scholar Team, which operates under the umbrella of the International Student and Scholar Office (ISSO). The International Scholar Team is the official representative of UCSD for all matters concerning

international scholars at UCSD and is exclusively authorized to represent UCSD in routine administrative filings with U.S. Citizenship and Immigration Services. It is also responsible for reporting changes of information in SEVIS, and guiding UCSD as needed to comply with other institutional requirements.

The International Scholar Team provides assistance to UCSD academic departments and ORUs in their efforts to recruit, employ, and serve international faculty, researchers, and postdoctoral fellows. Services include information and advising to support departments with their plans to hire and retain international employees and scholars, preparation of petitions to U.S. Citizenship and Immigration Services, employment authorization, etc.

The International Scholar Team provides one-on-one advising services directly to international scholars and their dependents on I-94 status compliance, international travel, financial planning, and health insurance; help for parents in finding and learning about schools and their requirements; and other matters of an immigration, regulatory, practical, or personal nature. The International Scholar Team provides application and filing support for social security numbers, drivers' licenses, taxes, various immigration forms, etc.

Finally, the Friends of the International Center play a leading role in concert with the International Scholar Team to provide additional outreach, hospitality, and learning services and programs—especially for international scholars and their families.

International Student Team

International Student and Scholar Office

International Center

(Corner of Gilman Drive and Library Walk)

Mail code 0018

(858) 534-3730 phone

(858) 534-0909 fax

<http://icenter.ucsd.edu>

The International Student Team includes one international student adviser, a SEVIS adviser, several support staff, and an outreach and volunteer coordinator—all operating under the umbrella of the International Student and Scholar Office (ISSO). The International Student Team works closely with the offices of Admissions (undergraduate and graduate) to provide assistance to all international students at UCSD in an effort to support their legal stay in

the United States, as well as their academic and community-based success while here at UCSD. Services include official check-in, new student orientation, one-on-one advising on applying for an I-20 or DS-2019, applying for a visa, I-94 status compliance, employment authorization, international travel, financial planning, health insurance, planning future activities in the United States, other matters related to immigration or regulations, and in general on practical or personal issues. The International Student Team also provides application and filing support for social security numbers, drivers' licenses, taxes, various immigration forms, etc.

The International Student Team is the official representative of UCSD for all matters concerning international students at UCSD and is exclusively authorized to represent UCSD in routine administrative filings with the U.S. Citizenship and Immigration Services. It is also responsible for reporting changes of information in SEVIS, and guiding UCSD as needed to comply with other institutional requirements. The International Student Team is an important resource for academic advisers, and others providing support services to international students.

Finally, the Friends of the International Center play a leading role in concert with the International Student Team to provide additional outreach, hospitality, and learning services and programs.

OASIS (Office of Academic Support and Instructional Services)

3rd Floor, Center Hall

Mail code 0045

(858) 534-3760

The Office of Academic Support and Instructional Services (OASIS) provides a variety of services to maximize student performance and retention at the University of California, San Diego.

MISSION

The mission of OASIS is to assist UCSD students in reaching their full potential by developing an appreciation for learning. OASIS strives to facilitate learning by concentrating on learners, and supporting their academic, intellectual, and personal growth at UCSD. Services are designed to assist students to develop the academic skills to excel in their subject matter at UCSD and eventually in graduate or professional school.

SERVICES

A description of services offered each quarter is available at the OASIS office on the third floor of Center Hall. All students in any of the five colleges are eligible for OASIS services. Underrepresented students are strongly encouraged to use OASIS services in order to maximize their valuable contribution to UCSD.

The Academic Transition Program

The Academic Transition Program coordinates a residential Summer Bridge Program and professional and academic transition counseling for freshmen at UCSD. A variety of academic support and personal development activities are offered to facilitate a smooth transition from high school to UCSD's fast-paced quarter system.

The Math and Science Tutorial Program

The Math and Science Tutorial Program is designed to support students in their desire to excel in mathematics and science courses. The program offers workshops for mathematics, physics, biology, chemistry, engineering, and economics courses.

The Language Program

Students whose first language is not English are assisted in the Language Program. In addition, students doing academic work in Spanish, French, and other foreign languages can participate in Language Program tutorial sessions conducted by bilingual staff. Language Program services include group or individual intensive reading and writing sessions, workshops on grammar and mechanics, and individual conferences where feedback on drafts of writing in the languages is provided.

The Student Support Services Program

The Student Support Services Program is a comprehensive U.S. Department of Education initiative designed to support the academic efforts of participating students. The program seeks to maximize the achievement and development of eligible students, particularly those who have been traditionally underrepresented due to race or ethnicity, gender, disability, and/or economic status. Student Support Services also strives to enhance each program participant's eligibility for entrance to graduate and professional schools and to foster an institutional climate which will support the success of program participants. The program consists of intensive individual tutoring,

professional counseling, peer mentoring, and various cultural enrichment activities.

Study Management Program

The Study Management program equips students with strategies and techniques for more efficient and enjoyable learning. Study strategies are provided for freshmen, transfer, and continuing UCSD students with a focus on undergraduates. Study Management Program staff assist students in developing and/or refining skills in areas including time management, active listening, note taking techniques, forming/conducting study groups, concentration/memory development, active reading techniques, test preparation, and exam strategies. Services are provided through workshops and individual conferences with peer tutors or professional staff.

The Research and Evaluation Program

Administered jointly by the Office of the Assistant Vice Chancellor for Student Educational Advancement and OASIS, the Research and Evaluation Program maintains data about students using OASIS services and conducts research projects which examine a particular problem or issue related to OASIS services. In addition, longitudinal studies of the effect of services on student users are undertaken, such as follow-up studies on the retention of Summer Bridge students. Evaluation activities that are essential to the provision of effective services to students are also the responsibility of this program.

TEP 116—The Psychology of Teaching

OASIS offers a four-unit, upper-division course that provides instruction to all OASIS student staff members on the teaching-learning process. The course is designed to balance lectures and readings with supervised, practical experience.

Office of International Education

International Center
(corner of Gilman Drive and Library Walk)
Mail code 0018
(858) 534-3730
<http://icenter.ucsd.edu/>

The International Center houses the offices of the international student and scholar advisers and advisers for the Education Abroad Program and the Opportunities Abroad Program, as well as the Programs Abroad Resource Library. In addition, the center has American English tutors available to international students, scholars and

spouses, and houses the office of all the community volunteers who provide a wealth of hospitality programs to international students, scholars, and spouses, including language tutors and host families.

The staff and community volunteers as well as the International Club also sponsor a variety of international/intercultural programs and services for all members of the UCSD community. These include lectures, language exchanges, linkages with international faculty specialists, and weekly international cafe lunches which are open to the entire campus.

Opportunities Abroad Program (OAP)

International Center (corner of Gilman Drive and Library Walk)
Mail code 0018
(858) 534-1123
<http://programsabroad.ucsd.edu>

The Opportunities Abroad Program (housed in the Programs Abroad Office, along with the Education Abroad Program) facilitates participation in programs abroad sponsored by institutions other than the University of California. OAP offers a resource library and advisory services enabling UCSD students to choose study, work, internship, and educational travel abroad programs best suited to their individual needs. Programs are available for students in all majors, for periods ranging from a quarter to a full academic year. Students participating in approved academic programs abroad transfer credit back to UCSD. They receive assistance with this as well as application, financial aid, predeparture, and re-entry issues through the OAP. Special study abroad scholarships are also available. Students participating in non-academic programs generally do not earn credit but in some instances may arrange to do so, for example, through the Academic Internship Program.

San Diego Supercomputer Center (SDSC)

Mail code 0505
(858) 534-5000 (general inquiries)
(858) 534-5100
www.sdsc.edu

Over the past two decades, the San Diego Supercomputer Center (SDSC) has enabled science and engineering discoveries through

advances in computational science and high-performance computing. Data is an overriding theme in SDSC activities. By developing and providing data cyberinfrastructure, the center acts as a strategic resource to science, industry, and academia, offering leadership in the areas of data management, grid computing, bioinformatics, geoinformatics, and high-end computing. The mission of SDSC is to extend the reach of the scientific community by providing data-oriented technology resources above and beyond the limits of what is available in the local laboratory, department, and university environment. SDSC is an organized research unit of UCSD with a staff of scientists, software developers, and support personnel, primarily funded by the National Science Foundation (NSF).

Over the years, SDSC has served more than 10,000 researchers at 300 academic, government, and industrial institutions in the United States and around the world. Today, these scientists and engineers increasingly rely on the availability of integrated data cyberinfrastructure tools such as hardware, software, and human support to drive research and education. Cyberinfrastructure provides a broad and useful spectrum of integrated technologies to support increasingly complex, data-intensive, and collaborative scientific endeavors.

When an application's or research project's technological needs outgrow the capabilities of their home environment, cyberinfrastructure extends the reach of the scientist by providing needed storage, high-speed networking, archiving and preservation, high-performance computing, and other resources remotely. SDSC provides both the tools and the facilities that integrate a user's home environment with a high-end, resource-rich, remote environment. Users can take advantage of SDSC's visualization, interdisciplinary expertise, and other resources to extend their home environments and accomplish their goals.

To meet the modern scientist's and engineer's extreme data needs, the center provides an integrated set of software and user services including:

- an internationally renowned environment for data management, mining, curation, analysis, visualization, access and preservation, as well as leadership-class storage technologies
- a broad spectrum of software tools, portals, workbenches, and packages integrated to

enable users to develop and deploy complex applications

- professional user services that enable users to make the most out of cutting-edge hardware, software, and information resources
- a range of collaboration vehicles for working with partners on strategic and community applications, data collections, and projects
- an advanced cyberinfrastructure laboratory that provides an environment for designing, developing, and testing software and hardware systems at scale
- Data Central, a computational and storage infrastructure for community data collections. The Data Central team helps researchers from a wide variety of scientific domains to manage, mine, analyze, publish, and share datasets

Along with these tools, SDSC also offers users full-time support including 24-hour helpdesk services, code optimization, training, portal development, and a variety of other services.

SDSC was founded in 1985 with a \$170 million grant from the National Science Foundation's Supercomputer Centers program. From 1997 to 2004, SDSC extended its leadership in computational science and engineering to form the National Partnership for Advanced Computational Infrastructure (NPACI), teaming with approximately forty university partners around the country.

SDSC collaborates with eight partners—including the National Center for Supercomputing Applications at the University of Illinois, Argonne National Laboratory, the Center for Advanced Computing Research at the California Institute of Technology and the Pittsburgh Supercomputing Center—in the TeraGrid project. This multiyear effort builds and maintains the world's most powerful and comprehensive distributed computational infrastructure for open scientific research.

The demanding research problems that are being tackled by the scientists using SDSC's cyberinfrastructure tools are numerous and diverse. A few key programs focus on understanding the origin of the universe, visualizing earthquakes, providing data management for disaster recovery organizations, modeling proteins, simulating the human nervous system, and predicting climate changes.

COMPUTATIONAL RESOURCES

NSF funding along with grants from the NIH and other sources keep SDSC's computational resources at the state of the art and support a variety of software development projects led by faculty and staff members. SDSC computational resources include the following:

- DataStar is a 15.6 teraflops IBM Power 4 based supercomputer with total shared memory of 7 terabytes. DataStar is among the top supercomputers in the world and is targeted at large-scale, data intensive scientific research applications.
- Under the TeraGrid program, SDSC operates a large IA-64 based cluster with a total peak speed of 4 teraflops. This system is part of the national TeraGrid system connected to the other TeraGrid partners by a 40-Gbps cross-country backbone network.
- SDSC has more than one petabyte of online disk storage as well as 6 petabytes of archival tape storage capacity, one of the world's largest data storage installations.
- Meteor is a Linux cluster with 200 Intel processors, the biggest Linux/Intel cluster on campus. Meteor is devoted to UCSD research.
- Sun Enterprise SunFire 15000 is a 72-processor system with 288 GB memory attached to SDSC's storage area network.
- RockStar is a 128-node Sun Fire V60x supercomputer used for cluster management research.
- A visualization laboratory features advanced display systems, facilities for producing solid 3-D models of geometric data sets, and a suite for producing professional-quality videotapes of visualized research results.
- Data Central, a computational and storage infrastructure for community data collections.

RESEARCH ALLOCATIONS, RESOURCES, AND SUPPORT

UCSD faculty and students are eligible for free allocations of time on SDSC's supercomputers, data, and other resources. Such allocations can support research projects or class curricula. Undergraduate and graduate students may obtain time through requests submitted by their advisers. All proposed projects must be nonproprietary. Requests for relatively small amounts of time (such as for class accounts or student projects) can be submitted any time and are reviewed shortly after receipt. To apply for

larger amounts of time, requests must be submitted prior to the quarter in which the allocation is to begin (quarters begin January 1, April 1, July 1, and October 1). Allocations are typically made for twelve-month periods. See www.sdsc.edu/user_services/allocations.

The Academic Associates Program (AAP), formerly known as the Block Grant Program, was started in 1995 to give University of California researchers free access to SDSC's state-of-the-art resources. Resources include supercomputer time, high-performance storage, software and technical support, training, and workshops. Any UC researcher can request supercomputing time or storage resources online at www.sdsc.edu/user_services/aap. Administrators are available at each UC campus to help researchers with any questions or problems regarding the Academic Associates Program. For more information, contact Subhashini Sivagnanam, AAP liaison, at sivagnan@sdsc.edu or (858) 822-3662.

All researchers with access to SDSC's resources are supported by SDSC's consulting staff, who are available online (www.sdsc.edu/user_services/consulting), by phone, or by email: 9 a.m.–5 p.m. (Pacific Time), Monday–Friday. Researchers and students with accounts are welcome to attend SDSC's periodic training workshops (www.sdsc.edu/user_services/training).

ADDITIONAL OPPORTUNITIES FOR THE CAMPUS COMMUNITY

SDSC offers the following additional opportunities for UCSD faculty, staff, and students:

- Access to high-performance computers through UCSD classes—Many UCSD classes make use of the SDSC resources, providing a hands-on way to learn about high-performance computing. Check class listings for biology, chemistry and biochemistry, computer science and engineering, mechanical and aerospace engineering, Scripps Institution of Oceanography, and UCSD Extension.
- Seminars—SDSC hosts a wide variety of seminars on topics of interest to the high-performance computing and computational science community. Most are open to the UCSD community (www.sdsc.edu/CSSS).
- Publications—SDSC publishes a science magazine, *EnVision*, which is free to the campus community. For subscriptions, please contact

Gretchen Rauen, gretchen@sdsc.edu, (858) 534-5111.

- Part-time and full-time employment—SDSC posts part-time and full-time professional job openings at the UCSD Career Services Center, or see <http://www.sdsc.edu/jobs>. Typical jobs are in research programming support, scientific writing, computer operations, and reception work.
- Tours—SDSC offers a tour for the public. Reservations are recommended and can be made by contacting the reception desk, (858) 534-5000. Special-interest tours for education and industry groups can be arranged by contacting Apryl Bailey at tours@sdsc.edu.

Additional information about SDSC can be obtained from the SDSC Web site (www.sdsc.edu) or by calling SDSC at (858) 534-5000.

UCSD Extension—Extended Studies and Public Programs

extension.ucsd.edu
UCSD Campus
9600 North Torrey Pines Road
Mail code 1076H
(858) 534-3400
email: unex-reg@ucsd.edu
fax: (858) 534-8527

UCSD Extension is contributing to the transformation of the San Diego region through professional education and training and high-profile programs focused on cultural enrichment and regional economic development. This integrated approach to improving the quality of life in San Diego, and beyond, helps to build to a highly competitive workforce, a growing economy, and an unstoppable creative community.

For students interested in lifelong learning, Extension offers more than fourteen areas of study in fields ranging from the life sciences and engineering to arts and business leadership. Course work may be pursued across San Diego, online, at work, and overseas. A variety of learning formats are available including individual courses, certificates, lecture series, and intensives.

Extension's outreach programs are designed to improve the region's economy through entrepreneurial development, research, public forums, and civic conversations. Programs include the Border Health Education Network, Global CONNECT, San Diego Dialogue, and UCSD-TV.

To learn more, visit our Web site at extension.ucsd.edu—where there's always something new™.

CONTINUING EDUCATION: AREAS OF STUDY— EXTENSION.UCSD.EDU

ART, MUSIC, AND PHOTOGRAPHY

Courses and workshops offered in art history, drawing, mixed media, painting, film, digital photography, harmonics, guitar, piano, and the annual UCSD Jazz Camp. For more information, call (858) 964-1051.

BIOLOGICAL, PHARMACEUTICAL, AND MARINE SCIENCES

Courses and intensive programs offered in computer aided drug design, medicinal chemistry, computational biology and bioinformatics, drug discovery and development, regulatory affairs, quality assurance and control, biotechnology manufacturing, proteomics, microarrays, and biomedical product development. For more information, call (858) 882-8027.

BUSINESS

Courses offered in accounting, business management, communication, enterprise management, facilities management, finance, fraud examination, fundraising and development, human resources management, international business, marketing, meeting management, project management, purchasing and supply management, real estate, and urban planning. If you are a full-time student, consider the Undergraduate Certificate in Business or the graduate-level certificate in Technology Business Creation. For more information, call (858) 882-8006.

DIGITAL MEDIA AND WEB DESIGN

Courses offered in computer-aided design, graphic design, and multimedia and Web site design and development. An 18-month daytime or 24-month evening program is also available for digital design, Web development, multimedia, marketing practices, and portfolio creation. Internships available. For more information, call (858) 622-5739.

EDUCATION

State-approved credential programs offered in Adult Education/Vocational Education, as well as state-approved certificate programs in

Cross-Cultural Language and Academic Development (CLAD), Reading and Education of the Gifted and Talented (GATE). Certificate programs and supplementary authorizations courses are offered for Teaching Mathematics and Science. Additional certificates are Teaching English to Speakers of Other Languages (TESOL), Community College Instructor, and Educational Therapy. For more information, call (858) 964-1045.

ENGINEERING

Courses offered in communications engineering, wireless communications, RF engineering, network technologies, embedded computer engineering, systems engineering, semi-conductor design, VLSI digital design, CDMA engineering, open source engineering, manufacturing engineering, thermoplastic injection molding, and SensorNets. Also, certificate programs in New Product Development, Lean Enterprise, Six Sigma, Green/Black Belt, and Professional Engineering Reviews. For more information, call (858) 622-5762.

ENGLISH LANGUAGE STUDIES

Courses and workshops offered in academic writing, intermediate business writing for non-native speakers, conversation improvement, grammar/vocabulary building, pronunciation and fluency, and accent reduction. For more information, call (858) 534-0049.

FOREIGN LANGUAGES AND TRAVEL STUDY

Courses offered in Arabic, Chinese (Mandarin), French, German, Italian, Japanese, Korean, Persian, Portuguese, Russian, Spanish, and translation and interpretation. Short-term Spanish language immersion programs abroad are available for adults. For more information, call (858) 964-1050.

HEALTH CARE AND BEHAVIORAL SCIENCES

Courses offered in clinical trials, health care leadership and management, evidence based medicine, medical coding, emergency department nursing, case management, nurse re-entry program, legal nurse consulting, fitness instruction and exercise science, and lactation education. In behavioral sciences courses offered in alcohol and drug abuse counseling, art therapy, gerontology, and play therapy. For more information, call (858) 964-1010.

HUMANITIES AND WRITING

Courses offered in copyediting, creative writing, feature writing, history, politics and culture, literature, technical communication, and theatre. Special programs such as Revelle Forum at the Neurosciences Institute round out a diverse and unique set of offerings in the San Diego area. For more information, call (858) 964-1051.

LAW

Courses offered in bankruptcy law, business law, domestic relations law, civil litigation, evidence law, California litigation procedures, and law office procedures. Also offered are an ABA-approved paralegal program and a Professional Certificate in Intellectual Property. For more information, call (858) 882-8008.

LEADERSHIP AND MANAGEMENT DEVELOPMENT

Advancing Into Management (AIM) is a program designed for individuals who are moving into leadership roles. For experienced managers taking on new levels of responsibility, programs include the Leadership and Management Program for Technology Professionals (LAMP), Healthcare Executive Leadership Program (HELP), Athena for executive women in technology industries, and the Executive Program for Scientists and Engineers (EPSE). Entrepreneurs and others will find of interest courses in biotech business development, writing business plans, financing start-ups, IT governance, business process optimization and ERP essentials, six sigma, lean enterprise, and global supply chain management programs. For more information, call (858) 964-1336.

OCCUPATIONAL HEALTH AND SAFETY

Courses offered through the OSHA Training Institute in occupational health and safety for general industry and construction: hazardous materials, respiratory protection, fall arrest systems, industrial hygiene, ergonomics, and more. A professional certificate in Occupational Health and Safety is also available. For more information, call (858) 605-0109.

TECHNOLOGY

Courses offered in data management and analysis, software engineering, data warehousing, biological database design, data modeling, data mining, security engineering, Web analytics, Web services, Oracle, Microsoft Access, network-

ing, BioJava, Perl for bioinformatics, C/C++, C#, J2EE, Java, Visual Basic, UNIX/Linux, and .NET. For more information, call (858) 622-5740.

HOW TO ENROLL

Online: extension.ucsd.edu/registration
By phone: (858) 534-3400

In person:

La Jolla
9600 N. Torrey Pines Road, Bldg. C
La Jolla, CA 92093
(858) 534-3400

North County
Carmel View Office Plaza
15373 Innovation Drive
Carmel Mountain Ranch, CA 92128
(858) 451-7474

Sorrento Mesa
AT&T Wireless Building
6925 Lusk Blvd.
San Diego, CA 92121
(858) 882-8000

Concurrent registration: Permits individuals who are not officially matriculated UCSD students to enroll for credit in regular UCSD courses. Offered on a space-available basis with the approval of the course instructors. For more information, call (858) 534-3400.

Complimentary enrollment: UCSD Extension offers a limited number of complimentary enrollments to full-time UCSD students who may enroll in one free course of up to \$270 (students must pay anything over that amount) on a first-come, first-served basis. For more information, call (858) 534-3400.

REGIONAL ECONOMIC AND COMMUNITY DEVELOPMENT

Academic Connections

www.academicconnections.ucsd.edu

Academic Connections provides students with access to the resources of a research university. This program gives motivated students the opportunity to explore different fields of study, pursue their interests, and better prepare for a university experience. A combination of summer residential programs, year-round academies, and distance education courses will extend the reach of the university, better serving the San Diego community and beyond.

Border Health Education Network

www.extension.ucsd.edu/borderhealth

The Border Health Education Network provides education and training services for health care professionals based in the binational California and Baja California region. The Border Health Education Network works closely with the San-Diego Tijuana Border Initiative, UCSD School of Medicine and UCSD Medical Center, San Diego Dialogue, State of California Office of Border Health, as well as many other organizations, hospitals, and health care groups throughout the border region.

Global CONNECT

www.globalconnect.ucsd.edu

Global CONNECT links and engages networks of individuals and organizations committed to building international technology-based enterprises. Global CONNECT's focus is on the role of research institutions, regional incubators, and initiatives that support innovation and entrepreneurship. Global CONNECT is active in three areas: research and analysis on the dynamics of regional innovation, the provision of technical assistance to regions interested in developing technology commercialization programs, and education and training in areas essential to science-based business clusters. Global CONNECT manages a membership network of more than forty regions from around the globe. The membership shares best practices through international meetings, business-to-business activities, and a Web site.

Helen Edison Lecture Series

www.helenedison.ucsd.edu

The Helen Edison Lecture Series presents free public lectures on issues advancing humanitarian purposes and objectives. Past speakers have included John Kenneth Galbraith, Noam Chomsky, Luis Valdez, Toni Morrison, Carlos Fuentes, and Robert McNamara.

San Diego Dialogue

www.sandiegodialogue.org

The San Diego Dialogue is a center of research on cross-border economic and social issues, as well as a convener of community forums on issues shaping the San Diego-Baja California region. The Dialogue also addresses issues related to infrastructure and public policy and provides the kind of technical assistance, education, and training that helps improve our regional futures.

A primary focus of the San Diego Dialogue is the Cross-Border Innovation and Competitiveness

Initiative. Its focus is to help the region become more globally competitive in key science and technology sectors by leveraging cross-border assets and capabilities. Areas of focus include: the biomedical industry, software, semi-conductor manufacturing, marine biotechnology, and automobile and aerospace manufacturing.

UC Professional Development Institute

www.ucpdi.ucsd.edu

The UC Professional Development Institute (UCPDI) is a leader in delivering standards-based professional development institutes and training materials focused on the needs of K-12 English learners. UCPDI's primary goal is to improve and accelerate student achievement. UCPDI is one of only two providers approved by the state of California to offer standards-based intervention programs for English learners.

UCSD Economics Roundtable

www.econ.ucsd.edu/roundtable

The UCSD Economics Roundtable is a forum for more than 2,000 San Diego business and community leaders to exchange ideas and information with world class economists and financial experts. The UCSD Economics Roundtable has hosted several prominent guests including Ben Bernanke, Board of Governors of the Federal Reserve System, and Robert Shiller, professor of economics at Yale University.

Osher Lifelong Learning Institute (OLLI)

www.olli.ucsd.edu

The Osher Lifelong Learning Institute (OLLI) rekindles the zest for life for retired San Diego professionals. OLLI is a membership organization that inspires conversations between interesting people about stimulating topics, offering twenty different programs each quarter. Subjects include archaeology, science, tai chi, computing, live musical performances, literature, foreign languages, and master courses and lectures from UCSD faculty members.

UCSD Summer Session

www.summersession.ucsd.edu

UCSD summer session allows all levels of students—from high school to graduate school—to take a class for credit at UCSD. More than 400 academic courses are offered every summer. UCSD students quickly benefit from summer session by accelerating progress towards their degree; enrolling in courses that are difficult to

enter during other parts of the year; and by enhancing career prospects.

UCSD-TV

www.ucsd.tv

UCSD-TV, the only broadcast television station operated by the University of California, is an Emmy® winning, non-commercial station that extends the resources of the university to the greater San Diego community and partners extensively with regional civic, cultural, and arts institutions in programming. UCSD-TV broadcasts on UHF Channel 35, Cox Communications, and Time Warner Cable. Programs from UCSD-TV and other University of California campuses are broadcast nationwide on UCTV and on demand.

MORE ON UCSD EXTENSION

Also see UCSD Extended Studies and Public Programs under "Campus Resources."

The UCSD Libraries

<http://libraries.ucsd.edu>

The UCSD Libraries, a campuswide network of libraries serving programs of study and research in many fields, include the Arts Libraries (Art and Architecture Library, Film and Video Library, Music Library), the Biomedical Library, the Center for Library & Instructional Computing Services (CLICS), the International Relations and Pacific Studies Library, the Mandeville Special Collections Library, the Medical Center Library, the Science and Engineering Library, the Scripps Institution of Oceanography Library, and the Social Sciences and Humanities Library.

The Libraries serve as physical and virtual centers for study, reading, and scholarship at UCSD. Their collections and services support undergraduate and graduate instructional programs, as well as advanced research. While each library may have varying rules and varying hours, all are open to all members of the UCSD community. Most libraries extend hours during final exam periods.

The Libraries' Web site offers access to information about the Libraries and to digital services and collections, including the book catalog, e-journals, e-books, databases, and materials assigned for classes. New resources and services are added continually. The Libraries have an ongoing commitment to acquiring and offering materials in digital form. For materials not found at UCSD, the Libraries offer several quick and easy ways to

borrow materials from other UC campuses and other universities.

Research assistance is available online and at each of the campus libraries and is designed to assist students and faculty with their course needs and research activities. Through their Instruction and Outreach Programs, the Libraries offer a variety of orientation and instructional opportunities intended to help students succeed in their academic and personal pursuits. Group tours of any of the libraries can be arranged.

COMBINED UCSD LIBRARIES STATISTICS, 2005

Volumes	3,149,836
Periodical and other serial publications received	
Total	31,065
E-journals	16,622
E-books	103,438
Database subscriptions	296
Graphic materials	123,102
Maps	143,629
Microforms	3,201,291
Audio and video materials	133,953
Slides and other pictorial items	319,036

THE ARTS LIBRARIES

<http://artslib.ucsd.edu>

Art and Architecture Library

West Wing, Geisel Library
Mail code 0175F
(858) 534-4811

The Art and Architecture Library's collections support the study of the visual arts and architecture and includes 83,338 volumes, 255,672 slides, and 450,000 digital images available through ARTstor. Collection strengths include art history, performance and environmental art, photography, painting, sculpture, digital art, and architectural design, theory, and history, urban design, and landscape architecture. The Visual Reserves collections (slides and digital images) provide visual materials for on-campus instructional purposes.

Film and Video Library

West Wing, Geisel Library
Mail code 0175Q
(858) 534-8074

The Film and Video Library collection includes over 11,539 DVDs, videos, film prints, and laser discs. Collection strengths include feature films,

documentaries, experimental film, and the Factual Film archive. Moving image materials on course reserve are available at the Film and Video Reserves service point.

Music Library

West Wing, Geisel Library
Mail code 0175Q
(858) 534-8074

The Music Library's collections include 29,679 volumes, 50,781 scores, and 88,016 recordings (music and spoken word) on CD, tape, LP, and CD-ROM. Collection strengths include materials supporting the study of twentieth- and twenty-first century music and music theory. Digital Audio Reserves (DAR) provides access to course reserve materials, and the Database of Recorded American Music (DRAM) contains 7,500 digital sound files.

BIOMEDICAL LIBRARY AND MEDICAL CENTER LIBRARY

Library Walk at Osler Drive
Mail code 0699
(858) 534-3253
<http://biomed.ucsd.edu>

The services and collections of the Biomedical Library and its branch Medical Center Library support the teaching, research, and patient care programs of the UCSD School of Medicine, the Skaggs School of Pharmacy and Pharmaceutical Sciences, the Division of Biological Sciences, and UCSD Healthcare. The Libraries combined collection of over 239,000 volumes and access to more than 4,000 current serials, over 3,000 in electronic form, provides in-depth access to the biomedical literature for UCSD students, faculty, and clinicians. The Medical Center Library is located in Hillcrest at the UCSD Medical Center, mail code 8828, (619) 543-6520.

CLICS (Center for Library & Instructional Computing Services)

Galbraith Hall
Mail Code 0318
(858) 822-5427
<http://clics.ucsd.edu>

CLICS has a twofold purpose. It gives students access to a wide range of online scholarly and reference sources along with software applications (e.g., Matlab, Eudora, Web browsers) and its staff teach approximately 4,000 students per

year how to do research to complete their course assignments. It is a place for students from all of the colleges to mingle and collaborate on group assignments. There are 182 computers and 11 group study rooms distributed on two floors in a general purpose computer lab setting, available to all enrolled UCSD students. Collections include reference, computer manuals, popular reading, and magazines. CLICS is open twenty-four hours, seven days a week during exam week.

INTERNATIONAL RELATIONS AND PACIFIC STUDIES LIBRARY

Robinson Complex, Bldg. 3
Mail code 0514
(858) 534-7785
<http://irpslibrary.ucsd.edu>

The IR/PS Library features materials on contemporary political, economic, and business affairs in East Asia, Latin America, and the rest of the Pacific Basin region (123,101 volumes, 132,338 microfiches).

THE MANDEVILLE SPECIAL COLLECTIONS LIBRARY

West Wing, Geisel Library
Mail code 0175S
(858) 534-2533
<http://orpheus.ucsd.edu/speccoll/>

The Mandeville Special Collections Library houses rare books, manuscripts, archives, original art, and other primary materials (250,000 books, 32 million manuscripts) which support specialized UCSD research and instructional programs. Areas of strength include experimental American poetry, the Spanish Civil War, Baja California, early voyages of exploration to the Pacific, twentieth-century science, Melanesian anthropology, California history, Dr. Seuss, and the history of UCSD. Students are encouraged to use the collections for their academic endeavors.

SCIENCE AND ENGINEERING LIBRARY (S&E)

East Wing, Geisel Library
Mail code 0175E
(858) 534-3258
<http://scilib.ucsd.edu>

S&E Library print collections and online resources cover astronomy, chemistry, computer science engineering, mathematics, and physics to support research needs of UCSD students,

faculty, and staff. Reference, interlibrary loan services, group study rooms, computers and wireless Internet access are available. S&E provides course reserve materials for upper-division undergraduate and graduate courses in the physical sciences and engineering. S&E librarians have expertise in finding numeric property data, standards, patents, and other science and technology information.

SCRIPPS INSTITUTION OF OCEANOGRAPHY LIBRARY

Mail code 0219
(858) 534-3274
<http://scilib.ucsd.edu/sio>

Scripps Institution of Oceanography Library is one of the largest marine science libraries in the world. It has outstanding collections in marine biology, oceanography, climatology, and marine technology, and also specializes in geology, geophysics, and zoology.

SOCIAL SCIENCES AND HUMANITIES LIBRARY

Geisel Library
Mail code 0175R
(858) 534-3336
<http://sshl.ucsd.edu>

The Social Sciences and Humanities Library (SSHL) provides services and collections to support the teaching and research of students and faculty in the social sciences and humanities disciplines. Services and collections are designed for all levels, from first-year students to seasoned scholars. The library provides a complete range of public services including reference and research support, a comprehensive instructional program, and access to collections at UCSD and across the world. Print and electronic course reserves for faculty-assigned course readings are also available. Collections comprise 1.5 million printed volumes, access to local San Diego, California, and U.S. government information, GIS, maps, social science databases, and full-text electronic resources.

Student Services and Programs

Vice Chancellor, Student Affairs

Building 112 University Center
Mail code 0015
(858) 534-4370
<http://vcsa.ucsd.edu>

The Office of the Vice Chancellor of Student Affairs is responsible for the overall quality of life at UCSD for undergraduate and graduate students. The office provides coordination and direction to more than two dozen student service departments and works closely with other components of the campus to ensure that programs, services, policies, and procedures foster the development of students and the achievement of their academic and career goals.

Career Services Center

Located on Library Walk
Mail code 0330
(858) 534-3750
<http://career.ucsd.edu>

The Career Services Center (CSC) helps students and alumni with virtually any career-related concern and offers a wide range of programs and services throughout the year. Online registration at <http://career.ucsd.edu> is required to use the center.

Exploring Career Options: Career advisers meet one-on-one with students to guide them through the phases of career development. Self-assessment tools, panel presentations, occupational resources, and networking programs are available to help students explore career options and determine career goals. CSC's Career Information Library features career books, CDs, and videos, as well as computers for accessing career information on the Internet.

Internship Resources: All students are encouraged to gain practical work experience through internships. CSC is a one-stop shop for internship resources, information, and opportunities. Services include advising, workshops, internship listings, and the Internship SuperSite at <http://career.ucsd.edu>. The Internship Resource Library includes internship directories, career-specific internship books, and computer stations to help students find local, regional,

and national internships, including the UCDC Program in Washington, D.C.

Graduate and Professional School

Preparation and Admission: All students considering an advanced degree in any field after graduation from UCSD should visit CSC for advice and information on schools, admission requirements, applications, reference letters, tests, essays, fellowships, and interviews. Advisers assist students interested in any field of professional and graduate education, including medicine, law, business, teaching, and other health fields. Resources include over 2,000 professional and graduate school catalogs, directories, and brochures. Recruiters from across the country attend CSC's Professional and Graduate School Info Fair and Law School Info Fair each fall.

Job/Internship Listings: CSC lists thousands of internships and part-time and full-time job listings year-round, including on-campus and off-campus work-study and non-work-study jobs. To access the listings, you must: 1) be currently enrolled at UCSD; or newly enrolled and have returned the UCSD Statement of Intent to Register; and 2) complete the online registration at <http://career.ucsd.edu>. Students are required to update their registration each academic year.

Job Search Preparation and Networking: Services include job search programs, resume and curriculum vitae critiques, and practice interview workshops. Professional association and networking contacts are available for job search advice and career information. CSC presents a series of networking events each spring to connect students with professionals.

Job Fairs and On-Campus Interviewing: CSC presents a Science & Technical Job Fair (fall), Winter Job Fair and Spring Job Fair each year featuring recruiters from a variety of employers. Recruiters also conduct interviews on campus at CSC for career positions and internships.

Graduate Student Services: CSC offers special workshops and resources for master's and Ph.D. students seeking academic or nonacademic careers. Resources include job search handbooks and a UCSD alumni contact list of nearly 700 Ph.D. recipients.

Alumni Services: University of California alumni are eligible to use all CSC programs and services. Alumni registration fee required.

Online Resources: The CSC Web site features helpful resources and links, in-depth information, and easy-to-print publications for UCSD

students and alumni, faculty and staff, parents, and recruiters.

Calendar of Events: CSC offers a variety of information sessions, group workshops, and special presentations. A quarterly calendar is available online and at CSC.

For more information and building hours, call (858) 534-3750 or go to <http://career.ucsd.edu>.

College Dean of Student Affairs' Offices

Revelle, Mail code 0321, (858) 534-3492
<http://revelle.ucsd.edu>

Muir, Mail code 0106, (858) 534-3587
<http://muir.ucsd.edu>

Marshall, Mail code 0509, (858) 534-4390
<http://marshall.ucsd.edu>

Warren, Mail code 0422, (858) 534-4731
<http://warren.ucsd.edu>

Roosevelt, Mail code 0546, (858) 534-2237
<http://roosevelt.ucsd.edu>

Sixth College, Mail code 0054, (858) 822-5953
<http://sixth.ucsd.edu>

The offices of the college deans of student affairs perform many functions. They provide help, advice, counseling, and referral for students and parents in many areas including commuter, transfer, and residential matters. The deans' offices develop and coordinate activities such as Orientation, Welcome Week, commencement; leadership and co-curricular learning opportunities; decisions about remaining in or withdrawing from school; college disciplinary matters; involvement in student governments; community service/volunteer opportunities; planning social, educational and cultural activities; assisting students with disabilities; and assisting in hearing procedures regarding grievances.

Contact your college dean of student affairs' office for assistance, particularly if you do not know which university office or resource would best be able to assist you with your problem or concern.

Dining Services

Administration: Muir Commons Annex
Mail code 0122
(858) 534-7587
<http://hds.ucsd.edu>

Students, faculty, staff, and members of the public are welcome at all UCSD Dining Services

restaurants. Eleven locations serve a variety of high-quality and ethnically diverse food. Each offers a comfortable dining atmosphere with unique menus and convenient hours ranging from 7:00 a.m. to 1:00 a.m. Sample menus are online at <http://hds.ucsd.edu>.

UCSD's college residence program includes housing space and a Dining Plan of 1,800 Dining Dollars per year, which can be used at any Dining Services location.

A Non-Resident Dining Plan is also available, offering a convenient, affordable dining option for off-campus students. For more information about Dining Plans, go to <http://hds.ucsd.edu/diningplan>.

TritonPlus, the campus debit account, offers an easy, convenient, and secure way to shop and dine at over forty locations, on and off campus. For more information, go to tritonplus.ucsd.edu.

Students use their official UCSD Campus Card to access Dining Dollars and TritonPlus.

Additional dining options on campus include six fast-food restaurants and a convenience store located at the Price Center; the Food Co-op and Grove Caffe at the Student Center; and Ché Cafe on Revelle campus. In addition, a limited selection of food may be purchased at portable food carts, convenience stores, and vending machines throughout UCSD.

Disabilities, Office for Students with (OSD)

202 University Center
(858) 534-4382 (Voice/TDD)
(858) 534-4650 (Fax)
<http://osd.ucsd.edu>

The Office for Students with Disabilities (OSD) facilitates student independence, self-advocacy, and academic success through access to campus programs, services, and facilities. OSD works with students, academic departments, and the colleges on development of effective planning and adaptation. OSD serves as a liaison to UCSD academic departments, the campus community, and off-campus disability-related agencies. Service coordination may include disability management counseling, note takers, sign language interpreters, real-time captionists, readers, typists, library/laboratory assistants, special equipment loans/minor repair, priority registration/enrollment assistance, on-campus housing coordination, exam accommodations, intra-campus transportation/parking coordination, and refer-

als. College learning skills seminars (including memory strategies, note-taking, test taking, time management, and study skills) are offered on an individual and small group basis in collaboration with OASIS. In addition, OSD provides disability awareness through maintenance of a resource library of books, periodicals, articles, films, video formats, an online quarterly newsletter, *Aware*, and in conjunction with CADRE, annual disability awareness events.

Students who have been diagnosed as having a disability and have some correlated limitation should consult promptly with a qualified specialist at the Office of Students with Disabilities (OSD), as only students registered with OSD are eligible for accommodation in classes. In order to implement an OSD-approved accommodation for examinations or assignments, students must meet with the course instructor within the first two weeks of the quarter and present a certificate from OSD recommending the appropriate accommodations.

If the student's disability has been certified by OSD, the course instructor should accommodate the student's needs. Faculty are not responsible for determining what accommodations are appropriate for a particular student. If an instructor is presented with a claim of a disability by a student who has not been certified by OSD, the course instructor should refer the student to OSD and not become personally involved in diagnosing or evaluating the seriousness of the disability. OSD is available to assist instructors in providing accommodation. If for any reason an instructor cannot meet the request, the department chair and OSD should be promptly consulted.

The full text of the Policy on Students with Disabilities and steps for Academic Accommodation have been posted to the Academic Senate Web site (as an Appendix to the San Diego Division Regulations), at the following address: <http://www-senate.ucsd.edu/apxtoc.html>.

Ethics and Spirituality, The Center for

Building 201 University Center
Mail code 0081
(858) 534-2521

The Center for Ethics and Spirituality promotes dialogue on moral, ethical, spiritual and theological issues, questions, and concerns. Professional

staff provides secular consultation, counseling, and education for the campus community.

Financial Aid

All financial assistance for undergraduate and medical students and need-based aid for graduate students is administered by the Financial Aid Office (FAO). Information relating to graduate student support in the form of fellowships and assistantships is presented in the catalog section entitled "Graduate Studies."

The Financial Aid Office, which also includes the Undergraduate Scholarship Office and the Office of Veterans' Affairs, is located in University Center 201 and can be contacted at the phone numbers below.

Financial Aid Office	(858) 534-4480
Scholarship Office	(858) 534-3263
Veterans Affairs	(858) 534-4480
Medical School	
Financial Aid	(858) 534-4664

Our email addresses are: finaid@ucsd.edu, scholarships@ucsd.edu, vao@ucsd.edu (Veterans Benefits).

Other information about our services and programs is available on our Web site: <http://www.ucsd.edu/finaid>.

Applications and requests for information should be addressed to the Financial Aid Office, 0013, 9500 Gilman Drive, La Jolla, California 92093-0013.

No student should leave the university for financial reasons before exploring all possible avenues of assistance with a Financial Aid Office counselor. *All information contained herein is intended to serve as a general guide and is subject to change due to new and revised federal, state, and University of California regulations and procedures.*

Applying for Financial Aid

A student is eligible for financial aid if she or he:

1. Is a United States citizen or eligible noncitizen.
2. Has a valid social security number.
3. Is not in default on a federal student loan or has made satisfactory arrangements to repay it.
4. Does not owe money back on a federal student grant or has made satisfactory arrangements to repay it.
5. Is registered with Selective Service (males at least eighteen years old, unless not required).

6. Is enrolled at UCSD (minimum of six units per quarter) in a degree or certificate program. Limited status students (non-degree/non-certificate) enrolled in a course of study necessary to be accepted in a degree or certificate program are only eligible for one year of Federal Stafford Loan(s). After one year, these limited status students are not eligible for any financial aid funding.

7. Is making satisfactory academic progress for financial aid recipients.

Students must maintain Satisfactory Academic Progress as a condition for maintaining eligibility for financial aid. For UCSD undergraduate financial aid recipients the standards are thirty-six units (or an average of twelve units per quarter for full-time enrollment) and an overall grade-point average of 2.0 during the current academic year and the following summer (similar unit requirements apply to graduate students who must maintain a 3.0 minimum GPA). Undergraduate students are considered for all financial aid sources up to their fifth year of college attendance (except for Cal Grants) and limited funding up to their sixth year. For graduate student duration requirements and for more detailed information on UCSD's Satisfactory Academic Progress standards for students enrolled full-time in a degree program, please see our Web site at www.ucsd.edu/finaid. For policy information on *approved* part-time status students, limited status and extension students, please contact the Financial Aid Office.

For evaluation of financial need, all applicants must submit a *Free Application for Federal Student Aid (FAFSA)* or *renewal FAFSA* and, if requested, copies of the 2005 federal income tax returns, and any other required documents. The *FAFSA* form should be filed by March 3, 2006, the UCSD priority filing date, with the appropriate processing agency and must indicate the University of California, San Diego (list Federal School Code 001317) to receive a processed copy of the *FAFSA*. Late applicants will be considered for limited aid.

Receiving Financial Aid

UC financial aid for students with demonstrated financial need is funded by a combination, or "package," of gift and self-help aid. Grants and scholarships are awards that do not have to be repaid. Self-help aid may consist of a loan, which does have to be repaid, or a work-study award, earned by working a part-time job while

attending school, or a combination of both. UCSD ensures that students in similar circumstances receive similar packages. Grant funds are directed to the most needy students. Students who are nonresidents of California should note that need-based financial aid funds are not sufficient to meet the additional cost of nonresident tuition (\$17,304 during 2005-06). The family should be prepared to provide this amount from their own personal resources or educational loan programs. The various types of aid and programs which may be included in need-based packages are listed below:

Federal Pell Grant

The Federal Pell Grant program is designed to provide financial assistance to undergraduates attending postsecondary educational institutions. Amounts range from \$400-\$4,050 for 2006-07.

University of California Grant Program

The University of California Grant Program provides grants to undergraduate and graduate students.

Federal Supplemental Educational Opportunity Grant (SEOG)

SEOG awards are federally funded and are available only to undergraduates. Awards may range from \$100 to \$4,000 per academic year.

Cal Grants (Undergraduate)

Cal Grants are awarded by the California Student Aid Commission to undergraduate California residents. All resident applicants for UCSD aid are required to apply for a Cal Grant. To be considered as a new winner, the *FAFSA* or *renewal FAFSA* and the GPA Verification Form must be postmarked prior to March 3, 2006. Current recipients must file a *FAFSA* or a *renewal FAFSA* each year to have their award renewed.

Repayable Scholarships/Fellowships for Teaching Credential Students

The Cal Grant T is awarded by the California Student Aid Commission to students who have been accepted into the Teaching Credential Program. The Governor's Teaching Fellowship (GTF) Program is administered by the California State University system. Those wishing to apply need to contact the UCSD Teacher Education Program at (858) 534-1680.

Work-Study

Federal and state work-study awards are employment programs that provide funds for student employment by the university or by public and private profit/nonprofit organizations. The work-study program provides experience in many fields, including experimental sciences, library work, recreation, computer sciences, peer counseling, and office work. Pay ranges from minimum wage and above. Job listings and referrals are provided through the Career Services Center.

Federal Perkins Loans

This loan carries a 5 percent interest rate. Students begin paying both the principal and the interest nine months after ceasing to be enrolled at least half-time.

Federal Subsidized Stafford Loans

The annual maximum allowed during the first year of undergraduate study is \$2,625. Sophomores can borrow an annual maximum of \$3,500, and the yearly limit for juniors and seniors is \$5,500, with an undergraduate cumulative maximum of \$23,000. Graduate students may borrow up to \$8,500 per academic year with an aggregate sum up to \$65,000, including the amount borrowed as an undergraduate. The interest rate for new borrowers is variable, not to exceed 8.25 percent. The 2005-06 rate was 5.3 percent.

The federal government pays (subsidizes) the interest on the student's behalf during in-school (enrolled in six units or more), grace, and authorized deferment periods. Repayment of principal and interest begins six months after the borrower leaves school or ceases to be enrolled as a half-time student.

Federal Unsubsidized Stafford Loans

Students who do not have financial need eligibility for the maximum Federal Stafford Loan may borrow under this program. The annual maximum and interest rate are the same as the Subsidized Stafford Loan. Independent undergraduates may borrow an additional \$4,000-\$5,000 annually; graduate students may borrow an additional \$10,000 annually. The maximums include amounts borrowed under the Federal Stafford Loan program. Aggregate maximums are \$23,000 for dependent undergraduates, \$46,000 for independent undergraduates, and \$138,500 for graduate students. The interest is

not paid on the student's behalf. Interest begins accruing immediately after disbursement, but payment of principal and interest may be deferred until six months after ceasing to be enrolled for six units or more. The amount borrowed cannot exceed the cost of education minus other financial aid resources (including other need-based loans).

Federal PLUS Loans for Parents

Parents of dependent undergraduate students are eligible to borrow under this program if they have no adverse credit history and meet program eligibility requirements. The interest rate for this loan is variable, but not to exceed 9 percent. In 2005-06, the interest rate was 6.1 percent. Parents are eligible to borrow up to the cost of education minus other financial aid (including other loans). The first payment is due within sixty days after disbursement by the lender.

Triton Registration Installment Plan (TRIP)

The UCSD Triton Registration Installment Plan (TRIP), administered by the Student Business Services (SBS), is a monthly payment arrangement and is available for students who desire an alternative method of financing their registration fees on a short-term basis. All students in good financial and academic standing are eligible for the program, except for those students whose financial aid or graduate support will pay their registration fees by the quarterly registration fee due date. A prerequisite to applying for the program is enrollment for the term. The TRIP allows registration fees to be paid in up to three installments each quarter. On a three-month plan, the first payment is required by the quarterly registration due date. The remaining payments are itemized on the student's next two monthly UCSD Billing Statements. There is a \$30 nonrefundable quarterly fee that must be submitted with the application to the Billing Services unit of the Student Business Services Office. This fee is strictly used to offset the costs of the program. For further information, please contact the Billing Services Unit at (858) 534-6806, or online at: <http://sbs.ucsd.edu>.

Short-Term Emergency Loans

The limited emergency loan funds, administered by the Financial Aid Office, are loaned in small amounts to help students in critical short-term emergencies, and usually must be

repaid within thirty days. There currently is a service charge of \$20 per emergency loan, and students must be enrolled in at least six units. Registration fees must be paid prior to applying. Applications and further information are available from the Financial Aid Office.

Federal Tax Credits

Two federal tax credits may benefit you or your parents, if the grants and scholarships you receive do not fully cover your fees. Both tax credits are tied to the tuition and fees paid for college.

The Hope Scholarship Credit (up to \$1,500) is available for the first two years of at-least-half-time enrollment in postsecondary education.

The Lifetime Learning Credit (up to \$1,000 per tax year) is available for postsecondary enrollment at any level.

To find out more about these tax credits, consult your tax adviser or visit the U.S. Dept. of Education Web site www.ed.gov/inits/hope/ and the "Where Do You Want To Go" section on TritonLink.

Graduate Financial Assistance

See catalog section titled "Graduate Studies" for additional types of financial assistance available to graduate students.

THE UNDERGRADUATE SCHOLARSHIP PROGRAM

The purpose of the Undergraduate Scholarship Program at UCSD is to recognize outstanding achievement, to encourage academic excellence, and to offer support to meritorious students.

Scholarships are awarded on a competitive basis by the UCSD Faculty Committee on Undergraduate Scholarships and Honors. **Merit** scholarships are awarded on the basis of academic excellence. **Restricted** scholarships are awarded based on one or more additional criteria or restrictions such as financial need, study in a particular major, or leadership. Students who are awarded scholarships restricted by financial need must file a Free Application for Federal Student Aid (FAFSA) in order to receive the award. Additionally, undergraduate research scholarships are offered to current students which enable them to pursue special studies and projects under faculty supervision.

Scholarship Sponsors

UCSD is actively engaged in developing new scholarship opportunities. Many of these awards were established through the generous support of individual sponsors, foundations, businesses, and community organizations. Every gift toward undergraduate scholarships is appreciated and appropriately recognized. Further information about supporting scholarships at UCSD may be obtained from Kim Signoret-Paar, director of Student Affairs Development. Ms. Signoret-Paar may be reached at (858) 822-1536. Her address is 9500 Gilman Drive # 0937, La Jolla CA 92093-0937.

Scholarship Web Site

You may view a listing of scholarships, financial aid resources, and information on outside agency scholarship opportunities on the UCSD Financial Aid Office (FAO) Web page at: <http://www.ucsd.edu/finaid>.

Scholarship Office Address

The Scholarship Office is part of the UCSD Financial Aid Office and is located in Building 201, University Center, 9500 Gilman Drive, La Jolla, CA 92093-0013 at the corner of Gilman Drive and Myers Drive. Office hours are from 8:00 a.m. to 4:30 p.m., Monday through Friday except Thursdays, open 10:00 a.m. to 4:30 p.m. For additional information regarding the scholarship program, contact the Scholarship Office at scholarships@ucsd.edu or (858) 534-3263.

HOW TO APPLY FOR SCHOLARSHIPS

Entering Students

The University of California Application for Undergraduate Admission and Scholarships is also used to apply for the UCSD Regents and other entering freshmen undergraduate scholarships. No other paperwork is required. The application is submitted in November for the following academic year. Because scholarships are awarded to entering students on a very competitive basis, students should carefully comply with instructions on the UC Application for Undergraduate Admission and Scholarships to ensure full consideration for all eligible scholarships. Entering students who receive a scholarship from UCSD will be notified in writing before May 1. We regret that we are unable to mail denial notification letters to other applicants.

Current UCSD Students

Current UCSD students apply for scholarships annually during winter quarter for the following fall quarter by filing the UCSD Continuing Student Scholarship Application. This application is available online via TritonLink in February and is due in March. Current students who receive a scholarship from UCSD will be notified in writing by the end of June. Students who do not receive an award will not be notified due to the large volume of applications.

UCSD Undergraduate Scholarships

The scholarships listed below are generally available at UCSD. Although every effort is made to present the most accurate information, this listing is subject to change due to federal, state, and university funding limitations, and changes in policy or law.

Entering Freshman Awards

Alumni Regents Scholarships: The Alumni Regents Scholarship is awarded to Regents Scholars who have demonstrated outstanding leadership. The UCSD Alumni Association invites all Regents Scholars to submit an essay regarding their leadership experiences. This award supplements the standard Regents Scholarship award.

Recipients receive a \$2,500 award per year, guaranteed for two years, as long as the student maintains a 3.0 cumulative GPA and thirty-six units per year. The award will be renewed in the junior and senior years provided the academic criteria are met, and the student verifies their continued leadership involvement while attending UCSD. If Regents Scholars do not receive this award in their freshman year, students can submit an application in subsequent years. As part of the program, the UCSD Alumni Association offers all Regents Scholars special access to alumni networking programs.

James Avery Scholarship: Awarded to an African-American student pursuing studies in the performing or visual arts at Thurgood Marshall College. This is a four-year award up to \$4,000, paid in the amount of up to \$1,000 annually.

Black Alumni Scholarship: Awarded to entering African-American students based on academic merit. This is a four-year award up to \$4,000, paid in the amount of up to \$1,000 annually.

Chancellor's Scholarship: Awarded to outstanding entering freshmen on the basis of academic achievement, and other factors, which may include the personal essay, financial need, extra-curricular and community activities, educational environment, and first-generation college attendance. As a Chancellor's Scholar, students will receive the following undergraduate benefits: extended housing benefits (provided housing deadlines are met) and priority registration for four years as a UCSD scholar; and participation in the Study Abroad and Faculty Mentor Programs. This is a four-year undergraduate award, up to \$20,000, paid in the amount of up to \$5,000 annually.

The following scholarships are part of the Chancellor's Scholarship Program: Ernest N. Carter Hispanic Scholarship for Engineers, Hispanic Scholarship Council Scholarship, Charmaine and Maurice Kaplan Scholarship, Elizabeth Stupp Kohl Scholarship for Women Engineers, Madge E. Lawhead Scholarship, S. Falck Nielsen Scholarship, Parker Foundation Scholarship, Ann Parode Scholarship, Rose Foundation Scholarship, and Shimotori Memorial Scholarship.

Clayton H. Brace Scholarship: Awarded to an entering student with an interest in communications. This is a one-year award. The award amount varies.

CREATE Undergraduate Scholarship: Awarded to entering freshmen who have graduated from a San Diego high school participating in the UCSD CREATE program. The amount and term of the award varies.

Herbert Greenberg Memorial Scholarship: Awarded to entering freshmen based on academic merit and demonstrated financial need. The award amount and term varies.

Kelly J. Kolozsi Scholarship: This outside agency scholarship is awarded to students in the following priority: (1) Graduates of Menlo Atherton High School; (2) graduates of a high school in the Sequoia Union High School District. Preference is given to students diagnosed with a learning disability. This is a one-year award. The award amount varies. The recipients are chosen by the Kolozsi Scholarship Selection Committee.

McFarland Scholarship: Awarded to Native-American entering freshmen based on academic merit. This is a four-year award up to \$10,000, paid in the amount of up to \$2,500 annually.

Dr. A.R. Moossa Scholarship: Awarded to a pre-medical student who plans a career as a physician, who has financial need, is a full-time student with at least a 3.0 GPA. This is a four-year award up to \$8,000, paid in the amount of up to \$2,000 annually.

National Merit University-Sponsored Scholarships: Entering Students: Beginning in fall 2006, UCSD no longer sponsors entering freshmen for National Merit Scholarships. Continuing Students: UCSD will fund students currently awarded a university sponsored National Merit Scholarship for the duration of their eligibility. All renewal students must meet the renewal eligibility requirements set by the National Merit Corporation. If students are receiving a university-sponsored National Merit award over the \$500 honorarium, these students must submit the Free Application for Federal Student Aid (FAFSA) each year to verify their financial need status. If the FAFSA is not submitted, the student will receive only the \$500 honorarium.

Sheila Owens-Collins Scholarship: Awarded to an African-American student pursuing studies in the life sciences. This is a four-year award up to \$4,000, paid in the amount of up to \$1,000 annually.

George Parker Memorial Scholarship: Awarded based on financial need to students who were orphaned for at least three years prior to the age of 18, and/or who were raised in foster care for at least three years immediately prior to the age of 18. Students must show evidence of orphan or foster care status. This is a renewable award, paid in the amount of up to \$2,000 annually.

Mary Pillot Scholarship: Awarded to meritorious graduates of San Jose High School Academy, as nominated by the high school principal. This is a one-year award up to \$500.

Ray and Betty Ramseyer Scholarship: Awarded to an entering student with an interest in the social sciences. This is a four-year award up to \$4,000, paid in the amount of up to \$1,000 annually.

Regents Scholarship: The Regents Scholarship is the most prestigious scholarship awarded to outstanding entering freshmen on the basis of academic achievement. This scholarship is offered to entering freshmen for four undergraduate years. If a student is offered the Regents Scholarship and has financial need, the student will receive additional scholarship and/or grant funds up to the amount of demonstrated need for four academic years, excluding non-resident

tuition costs. Entering freshmen applying in the 2006-07 academic year without documented financial need will receive a four-year honorarium of \$8,000, paid at \$2,000 per year for the four years of their appointment at UCSD. Entering freshmen apply for the Regents Scholarship through the admissions application. UCSD Regents Scholars are also eligible for certain undergraduate privileges and recognitions such as preferred class enrollment, extended housing benefits for four years (providing housing deadlines are met), UCSD college of choice at time of admission, extended student library privileges, and honors program.

Roger and Ellen Revelle Scholarship: Awarded to entering freshmen based on academic merit. This is a four-year award up to \$20,000, paid at up to \$5,000 annually.

Senior Gift Scholarship: This scholarship was established by UCSD graduating seniors and seeks to recognize outstanding freshmen and transfer students who have proven community service and philanthropic spirit, and who have financial need. This is a one-year award and the amount varies up to \$1,000.

Ludwig & Ada Strauss Scholarship: Awarded to an academically outstanding entering freshman with demonstrated financial need. This is a one-year award up to \$4,000.

Awarded to Students Transferring from Community Colleges

Engelhorn Family Scholarship: The Engelhorn Family Scholarships are awarded to transfer students who are participants in the UniversityLink or TAG program, have high financial need, with a preference for students who are first-generation college students. This is a two-year award, paid in the amount of up to \$2,000 annually.

Current Student Awards

Alumni Leadership Scholarship: Awarded to full-time students who will be juniors in 2006-07, with a 3.0+ GPA, demonstrated financial need, and demonstrated campus or community leadership during UCSD undergraduate years. This is a two-year award, up to \$2,000 annually.

In addition to the above scholarships, additional Alumni Leadership Scholarships have been made possible by individual donors. These scholarships may have additional criteria. Please

see Scholarship Web site for more information: Bay Area Alumni Scholarship, Gregory T. Bryan Scholarship, Kevin T. Hart Memorial Scholarship, Violet and Matthew N. Lehrer Scholarship, Joseph H. Lima Scholarship, Karen Moraghan Scholarship, Vickerman/Munoz Family Scholarship, Walsh Chacon Malone Scholarship, Waxman Family Scholarship.

Christopher B. Arrott—Gay, Lesbian & Bisexual Scholarship: Awarded to gay, lesbian, or bisexual undergraduate students with a record of active service and involvement in the gay, lesbian, and bisexual community. This is a one-year award up to \$1,000.

Charles and Clara Ash Scholarship: Awarded to students with demonstrated financial need. This is a one-year award. The award amount varies.

BAE SYSTEMS Scholarship: Awarded to full-time students who are seniors in the 2006-07 academic year, with a 3.2+ GPA, majoring in computer science, applied mathematics, computer or electrical engineering with a computer sciences emphasis, are U.S. citizens and plan to pursue a career in computer science in San Diego. This is a one-year award up to \$5,000.

Errett Bishop Scholarship: Awarded to upper division mathematics majors with financial need. Preference given to graduating seniors. The award amount varies up to \$3,000.

The Darcy C. and Robert Bingham Scholarship: Awarded to full-time students who are in good academic standing and are employed with UCSD Recreation, UCSD Student Affairs, or UCSD. Students must work for an average of ten hours per week during the three-quarter academic year at UCSD, and must have worked at least one quarter prior to the submission of their application. This is a one-year award up to \$1,500.

Boeing Engineering Scholarship: Awarded to full-time students majoring in electrical engineering, mechanical engineering, aerospace engineering, computer science, or computer engineering, who have demonstrated high financial need. This is a one-year award up to \$2,000.

Tom Bond Revelle College Scholarship: Awarded to Revelle College students who will be seniors in 2006-07, have a 3.7+ GPA, and participated in significant extracurricular campus activity. This is a one-year award up to \$1,000.

Braille Transcribers Guild: Awarded to students who are legally blind, or have substantial, uncorrectable vision loss, registered with the UCSD

Office for Students with Disabilities. This award amount and term varies.

Julia Brown Undergraduate Scholarship: Awarded to full-time juniors or seniors in the 2006–07 academic year, who intend to pursue a career in the health sciences (including medicine, research, and public health). The award is based on academic merit and financial need. This is a one-year award up to \$5,000.

CK and Jenny Cheng CSE/ECE Scholarship: Awarded to undergraduate students majoring in computer science and engineering or electrical and computer engineering at the UCSD Jacobs School of Engineering, based on academic merit. The scholarship is a one-year award of approximately \$300.

Conexant Systems Scholarship: Awarded to full-time students majoring in electrical engineering, computer engineering, or computer science, with junior or senior standing in 2006–07, who will graduate no earlier than December 2007. Potential candidates have an interest related to the semiconductor industry, possess a minimum 3.3 GPA, and are able to work in the United States. This is a one-year award up to \$5,000.

Thomas E. Curtis Scholarship: Awarded to juniors or seniors in the 2006–07 academic year, majoring in the fields of biology, chemistry, or physics, who also demonstrate interest in the larger world around them, with leadership-level involvement outside the classroom, and have a minimum 2.75 GPA. This is a one-year award. The award amount varies, up to \$2,000.

Richard L. and Fern W. Erion and Laidlaw-Erion Scholarships: Awarded to full-time UCSD students who will be seniors in 2006–07, with demonstrated financial need, as determined by information submitted on their 2006–07 FAFSA or renewal FAFSA. The award amount varies, up to \$2,000.

Brython P. Davis Scholarship: Awarded to current students whose parent is or was a regular member of the U.S. Navy or Marine Corps. This is a one-year award. The award amount varies.

Klara D. Eckart Scholarship: Awarded to current students in the fields of computation, mathematics, or physics. This is a one-year award. The award amount varies, up to \$1,000.

The Willis and Jane Fletcher Foundation and P and G Company Scholarship: This outside agency scholarship is awarded to a graduate of a San Diego County high school with demonstrated financial need. This is a one-year award up to \$2,500.

Jaye Haddad Memorial Scholarship: Awarded to students who have been diagnosed with cancer, with Acquired Immune Deficiency Syndrome, with AIDS-related conditions, or to students with physical disabilities. This is a one-year award up to \$1,000.

E. Coke Hill Scholarship: Awarded to students with demonstrated financial need. This is a one-year award. The award amount varies.

Irvine Memorial Scholarship: Awarded to students based on academic merit. This is generally a one-year award. The award amount varies.

Jeffrey R. Leifer Scholarship: Awarded to current students who have demonstrated financial need and academic merit, are the first generation in their family to attend college, and graduated from California high schools that historically are underrepresented at UC campuses. This scholarship has been established through the generous contributions of Jeffrey R. Leifer. As a student at UCSD, he served as associated student body president and founded International Student Pugwash, a worldwide organization dedicated to issues surrounding ethics, technology, and society. This is a one-year award and the amount varies, up to \$1,000.

Alice Marriott Scholarship: Awarded to students with demonstrated financial need. This is a one-year award. The award amount varies.

Thurgood Marshall College Scholarship: Awarded to students enrolled in Marshall College who have a 3.2 GPA by the end of spring quarter, and have completed a minimum of seventy-two graded quarter units. Transfer students need thirty-six graded UCSD units with a 3.2 GPA and 3.5 cumulative GPA in advanced standing work. Seniors who apply should have a minimum of thirty-six units remaining to be completed in the academic year the scholarship is awarded with a minimum 3.2 cumulative GPA. This is a one-year award up to \$1,500.

Marx and Marshall—Gay and Lesbian Scholarship: Awarded to gay and lesbian students with a record of active service and involvement in the gay, lesbian and bisexual community. This is a one-year award. Preference will be given to students with financial need. The award amount is up to \$1,000. Recipients may reapply.

LaVerne Noyes Scholarship: Awarded to current students who have demonstrated financial need and are descendants of U.S. World War I Veterans (defined as four months of service in the

U.S. military prior to November 11, 1918). This is a one-year award. The award amount varies.

Sven Peterson Memorial Scholarship: Awarded to a current freshman or sophomore, UCSD Warren College student, enrolled full-time, majoring in an area other than engineering or life sciences. The recipient must have been placed on the college provost's honors list at least one quarter during his or her academic career in advance of applying for the award and must maintain a 3.0 cumulative GPA. This award is up to \$3,000 per year and may be renewable.

QUALCOMM Scholarship: Awarded to students who are juniors in the 2006–07 academic year, majoring in electrical engineering, computer engineering, or computer science with at least a 3.15 GPA. Special consideration is given to students who have been a San Diego resident for three or more years, who are willing to consider an internship at QUALCOMM, or who have volunteered a minimum of four hours per month at a K–12 educational institution. This is a one-year award up to \$5,000.

Tenie Remmel Memorial Scholarship: Awarded based on academic merit and demonstrated financial need to a full-time student in the Division of Physical Sciences. This is a one-year award of up to \$1,000.

Gary C. Reynolds Scholarship: Awarded to students who will be juniors or seniors in 2006–07, who are mathematics-computer science majors, who show exceptional promise for making future contributions in their field of study. The amount of this award varies up to \$2,000.

Elizabeth W. Russell Scholarship: Awarded to students who will be juniors or seniors in 2006–07 who are pursuing studies in studio art, art history, or art criticism/theory. The award amount varies.

Bevan Schroeder Memorial Scholarship: Awarded to students majoring in computer science engineering. Selection is based on academic merit, financial need, and involvement in campus activities. This is a one-year award up to \$1,000.

Malcolm R. Stacey Memorial Scholarship: Awarded to Jewish students in the following priority: 1) undergraduate who is an orphan and preparing for graduate study in aeronautical engineering, 2) undergraduate in the field of aeronautical engineering, 3) a student in the division of engineering, and 4) a student in any

field of study. This is a one-year award. The award amount varies.

William H. Stout Scholarship: Awarded to students based on academic merit. This is a one-year award. The award amount varies.

Russ Ty—Gay and Lesbian Scholarship: Awarded to gay and lesbian students based on academic merit and financial need. This is a one-year award. The award amount is a maximum of \$1,000.

Visual Arts Endowment Scholarship: Awarded to full-time current students, with the intent to support talented undergraduates majoring in visual arts. This is a one-year award up to \$4,000.

If you have any questions regarding graduate scholarships, they should be directed to the Office of Graduate Studies at (858) 534-3555.

UNDERGRADUATE RESEARCH SCHOLARSHIPS

These special awards are for current undergraduate students who wish to engage in special studies or research projects under faculty supervision. The work must be above and beyond the normal course of study. The subject matter does not have to be related to the student's major, minor, or other course work. These are one-year awards; however, a student may submit a new application each year for consideration. Awards are up to \$3,000.

Applications are available from the UCSD Financial Aid Office in February and are due in April. Winners are notified by the middle of June. All recipients are required to submit a brief final summary report, including details of how the funds were used. Also, the sponsoring faculty member must submit a review and appraisal of the results of the project.

Amylin Pharmaceuticals, Inc. Summer Research Scholarship will give consideration to juniors or seniors in 2006–07, majoring in biology or bio-engineering. Please note the project must be completed during summer 2006 and the student report and faculty assessment is due Monday, October 23, 2006. This is a one-year award up to \$2,500.

David Marc Belkin Memorial Research Scholarship will give preference to those proposals designed to pursue special studies and projects in the general areas of environmental and ecological issues. The award amount varies up to \$3,000.

Chancellor's Research Scholarship will give consideration to proposals regardless of project topic. The maximum award amount is \$3,000.

Dynes/Hellman Research Scholarship will give preference to those proposals designed to pursue special studies and projects in physics. This is a one-year award up to \$3,000.

David Jay Gambee Memorial Research Fellowship will give preference to proposals which involve the student as an active citizen in university governance, the local community, or national and international affairs. Also receiving preference are proposals which lead to a heightened awareness of the relationship between environment and society. Service in the community through volunteer activities or participation in programs related to the Institute on Global Conflict and Cooperation is encouraged. The award amount varies up to \$3,000.

Doris A. Howell Foundation Research Scholarship will give consideration to juniors or seniors in the 2006–07 academic year whose proposals are designed to improve the physical, mental, spiritual and behavioral health, and/or well-being of women, with a preference given to applications that study the prevention of disease such as diabetes, obesity, cancer, etc. Proposals may encompass all areas related to women's health including biological, medical, cultural, economic, behavioral, psycho-social, or cross-cultural influences. The essay must describe how the project specifically addresses women's health or well-being. The Howell Foundation for Research in Women's Health is a not-for-profit spin-off of Soroptimist International of La Jolla. The maximum award is \$2,500.

SCHOLARSHIPS FOR STUDY ABROAD

UCSD students study abroad through the UC Education Abroad Program (EAP) and the UCSD Opportunities Abroad Program (OAP). In addition to the UCSD scholarships listed above, study abroad students may also qualify for special awards restricted to EAP and OAP participants. All of the scholarships listed below require a separate application through the International Center, unless otherwise indicated.

For more information about these scholarships and other outside opportunities for study abroad, contact the Programs Abroad Office at the International Center at (858) 534-1123 or via email to: abroad@ucsd.edu.

Betty Tate International Scholarships: Awarded based on financial need and students must have a minimum 2.8 GPA.

Chris Borton Memorial Study Abroad Scholarships: Awarded on the basis of academic merit and without consideration of financial need.

EAP Scholarships: Awarded primarily on the basis of financial need.

Eleanor Roosevelt College (ERC) Scholarships: Awarded to ERC students with financial need. Applicants should apply through ERC.

Ernest Mort International Scholarship for Revelle: Awarded to Revelle students studying abroad.

Fliesbach International Study Scholarship: Awarded to students majoring in visual arts, anthropology, theatre, or dance.

Friends of the International Center: Awarded predominantly on academic merit, with some consideration of financial need.

Judaic Studies Scholarship: Awarded to students bound for Israel, with preference given to students with a major or minor in Judaic studies. Applicant should apply through the Department of Judaic Studies.

So Family Endowed Undergraduate Scholarship: Awarded to students going to China, Hong Kong, and/or Taiwan.

INTERNSHIP PROGRAMS

University of California President's Washington D.C. Scholarship: Awarded to students on internship in Washington D.C. with financial need and a 3.0 GPA. Applicants should apply through the Academic Internship Program Office. Telephone (858) 534-4355 or the UC/DC Program Office, telephone (858) 534-2705.

International Center

(Corner of Gilman Drive and Library Walk)

Mail code 0018

Phone: (858) 534-3730

Fax: (858) 534-0909

Facility reservation: (858) 534-6442

<http://icenter.ucsd.edu/>

The International Center assists U.S. students going abroad, as well as international students, scholars, and families, and facilitates interaction among all UCSD students, faculty, and staff with international interests. The International Center's

mission is to promote and support international exchange and education, and to:

- Provide the UCSD community with experiences that foster global perspectives, cross-cultural competence, and appreciation for diversity.
- Support UCSD international students, scholars, and study-abroad participants with services that enhance the quality of their intercultural experience and contribute to their academic success.
- Facilitate UCSD's participation in global scholarship and international educational exchange.

The International Center is made up of four distinct offices: the Programs Abroad Office (PAO); the International Student and Scholar Office (ISSO); the Friends of the International Center (the Friends); and, to coordinate all the activities that take place at the International Center, the Business Office. Each office has its own focus.

PAO serves the needs of all UCSD students. It helps those thinking about study abroad to learn about the options available, and it guides students through the process of applying to an exchange program, going on the exchange, and returning. Orientation and advising are offered at every step of the way.

ISSO focuses exclusively on the needs of all international students and scholars at UCSD. It provides services to help internationals navigate the regulatory maze all the way through completion of the program, from getting a visa and complying with I-94 regulations to getting employment authorization, paying taxes, and traveling internationally.

Finally, the Friends are a dedicated group of community volunteers who work together with staff to create programs and outreach activities to support our students and scholars in their efforts to succeed, and to enrich the experiences of internationals and their dependents while at UCSD. Among some of the most successful outreach and volunteer programs at the International Center are the Friday Cafes, the Friends' Resale Shop (raising over \$20,000 annually for international education), language tutoring, Wednesday Morning Coffee (for spouses), the energetic International Club, and many, many others.

Housing

COMMUTER STUDENT SERVICES

Commuter Student Services is a rental listing referral and housing information resource center. This office receives and maintains up-to-date available rentals from people in the community within the various areas near campus. The rental listings include individual houses, apartments, and condos, as well as roommates, rooms in private homes, and work-exchange situations.

The university is located in the midst of a resort area that results in relatively high rent in the coastal towns of San Diego: Del Mar and Solana Beach to the north of campus, La Jolla, and Pacific Beach to the south. A general rule of thumb: the closer to the beach, the higher the rent.

Available through this office are helpful landlord/tenant materials such as: leases, room rental agreements, bus schedules, wall maps, a courtesy phone for local calling, and a variety of house-hunting aids.

Our Web site is useful for students and others unable to come into the office. Search through up-to-date rental listings and available roommates on our online database. Downloadable rental agreement forms are available. Links to local papers allow access to the classifieds. In addition, answers to frequently asked questions ease anxiety regarding a housing search.

Services are available to registered students, staff, faculty, and alumni of the University of California only. You must show a current UC ID card or official Letter of Acceptance to receive rental contacts. Rental referrals are not mailed, faxed, or given out over the telephone. The office staff will be happy to assist you with any housing questions or concerns. Our office is located in the Student Center, Building A, Suite 200-202 on the second floor.

ON-CAMPUS HOUSING

Housing and Dining Administrative Services
Building 310 University Center

Mail code 0055

(858) 534-4010

Web site: <http://housing.ucsd.edu>

email: housinginfo@ucsd.edu

UNDERGRADUATE RESIDENTIAL HOUSING

Each college houses students in residence halls and/or apartments that are part of a single housing system on campus. While facilities at each college are occupied primarily by students registered at that college, students from other colleges may also be residents.

Residence Halls and Apartments

Residence halls are arranged in suites of eight to eleven students who share a study/living room and restroom facilities. Apartments are self-contained units with kitchens, bathrooms, living areas, and combinations of two, three, or four bedrooms. Typically four to five students share an apartment. While incoming freshmen are generally assigned space in residence halls, high demand for on-campus housing has resulted in the assignment of apartment spaces for many incoming freshmen. Rooms are furnished and provide ample space for effective studying, sleeping, and storing of personal belongings, books, and clothes.

Each college's resident dean makes specific room assignments in early September when the majority of spaces are filled. Housing and Dining Administrative Services Office administers all other details related to housing contracts.

General Information

The *Living On Campus Housing Application Instructions Information Brochure* was mailed in mid-March to all who were admitted to UCSD. Only online applications were accepted and students were given instructions on how to apply for on-campus housing via TritonLink. To be eligible for on-campus housing, the Housing Application and the Statement of Intent to Register form must have been received by the specified deadline dates. On-campus housing spaces are filled according to the date the housing application was received in the Housing and Dining Administrative Services Office. The priority system is explained in detail in the *Living On Campus Housing Brochure*.

Housing application deadline for fall 2006-07 was May 4, 2006 for incoming freshmen. Due to high demand, transfer students will not receive on-campus housing. For the best selection of

housing closest to campus, contact the UCSD Off-Campus Housing Office. Web site address: <http://offcampushousing.ucsd.edu> email: offcampushousing@ucsd.edu

The Housing and Dining Administrative Services Office recommends that freshmen, not offered housing by the first of June, call (858) 534-4010 for further information.

AFFILIATED HOUSING (OFF-CAMPUS)

The University of California, San Diego Affiliated Housing Team operates several housing complexes in an effort to provide the highest level of flexibility when selecting your residence.

Mesa Residential Apartments (located minutes off campus) are designed to house single graduate or medical students, couples with or without children, and single parents. Residents must be enrolled full-time in a degree-granting program or Education Studies. The Mesa Residential Apartments offer unfurnished one-, two-, and three-bedroom units. Each unit features carpeting, blinds/drapes, range/oven, and refrigerator. In addition, apartments are pre-wired for cable television and feature private patios or balconies.

Gas and water are included in rent. Residents are required to pay electricity. The community is a parklike setting, and amenities include community rooms, coin-operated laundry rooms, co-op garden plots, storage space for each apartment, ample parking, playgrounds for children, and an outdoor sports area, providing courts for tennis, basketball, and volleyball.

Coast Apartments community consists of 106 apartments within eleven buildings on eleven and a half acres. Coast Apartments is a two-story walk-up garden community consisting of wood frame construction and composite roofs laced with pebbles.

Apartment interior features include: front patio, private balcony, carpet, blinds, range, refrigerator, cable television, and Ethernet connections.

The community offers free parking, bicycle racks, a laundry facility, picnic tables, a community room, and beautifully sculptured landscaping where the relaxed atmosphere of coastal living can be enjoyed.

Coast Apartments is designed to house graduate students, medical students, couples with or without children, and single parents. Residents must be enrolled full-time in a degree-granting program or Education Studies. Roommates must also meet these eligibility requirements.

La Jolla Del Sol, a condominium-style community owned by UCSD in San Diego's Golden Triangle, just minutes from campus, is designed to house UCSD faculty, staff and graduate/ medical students.

Each one- and two-bedroom apartment has a full-size washer and dryer, refrigerator, dishwasher, range/oven, ceiling fan, and private patio or balcony. Second- and third-floor apartments have wood burning fireplaces and assigned covered parking. Unassigned parking is also available for all residents. All apartments are prewired for cable.

Residents can enjoy the use of two heated pools with adjoining spas, two lighted tennis courts, and a fitness center and community room. Doyle Community Park is across the street, and local malls and grocery stores are within walking distance. Apartments are assigned on an individual basis.

SINGLE GRADUATE HOUSING (ON CAMPUS)

Single Graduate Apartments (located on the Warren Campus) are designed to house unmarried graduate and medical students without children. Residents must be enrolled full-time in a degree-granting graduate or medical course of study, or participating in Education Studies. Single Graduate Apartments all have four single bedrooms and a shared living room, dining room, kitchen, and bath area. Units are fully furnished with the exception of personal linen and cooking utensils. All utilities are included in the rental rate. All units have cable TV included at no extra charge and optional connections to the campus computer system for a fee. All spaces are available on a twelve-month lease. This is a non-smoking facility.

NOTE: All policies and procedures concerning the operation of Affiliated Housing, the eligibility for housing, and the application process are subject to change without notice.

For more detailed information on any of the above housing facilities and/or to apply, please visit our Web site: www.hds.ucsd.edu/hsgaffil.

Affiliated Housing Operations

Psychological and Counseling Services

Central Location:
190 Galbraith
Mail Code 0304
(858) 534-3755
<http://www.ucsd.edu/psychserv>

Psychological and Counseling Services provide professional assistance with a wide array of personal difficulties that may interfere with academic success. Specific concerns for which students often seek assistance include loneliness and isolation, homesickness, parent/family/partner conflict, difficulty studying, concentrating or test-taking, challenges in interpersonal relations and communication, educational/career concerns, identity issues, sexuality, depression, and anxiety. Students often consult with counselors when experiencing a variety of life issues, transitions, or emotional situations. In order to enhance the UCSD student experience, Psychological and Counseling Services professionals also offer consultation to the university at large regarding a wide range of student issues.

Individual counseling, psychotherapy, marriage or relationship counseling, family sessions, and many issue-focused groups are provided to support the emotional and social growth of students. During the course of a year, special forums, psychotherapy groups, support groups, and psycho-educational groups are offered to students according to their needs and the demand for services. Listings are posted quarterly on the Web site.

Psychological and Counseling Services are geared toward developing a positive and robust mental health climate in the university community. The emphasis is on helping students maintain healthy lifestyles so that they may enjoy a sense of wellness, express themselves with confidence, manifest their creativity and productivity, manage stress successfully, and engage in interpersonal relations as they achieve their career goals.

Psychological and Counseling Services staff are clinical and counseling psychologists and psychologists-in-training. Student peer counselors present programs concerning a variety of topics to student groups throughout the year. In order to provide greater accessibility, the service has offices in all colleges in addition to the central location. Services are available to any currently enrolled undergraduate or graduate

student, and appointments can be arranged by contacting the central office. The counseling relationship is private and confidential.

Recreation

RIMAC
Mail code 0529
(858) 534-4037
<http://recreation.ucsd.edu>

Campus Recreation provides UCSD students with quality recreation programs. They are designed to meet leisure-time needs and interests through on-campus programs offering clubs, intramural sports, recreation classes, outings, and a myriad of activities and special event programming. Our goal is to provide opportunities promoting a lifetime of health-conscious options.

FACILITIES

RIMAC with arena, gymnasium, weight room, racquetball and squash courts, and equipment room.

Main and Recreation Gymnasia

Main Gym Weight Room

Indoor 25-Yard Natatorium Pool and Spa

Outdoor 50-Meter Canyonview Pools and Spa

Outback Indoor Climbing Center

UCSD Challenge Course

Tennis Courts

Playing Fields

Canyonview Weight Room

Golf Driving Range

Mission Bay Aquatics Center

Spanos Training Facility with weight training equipment, martial arts studio, and trainers' facility

Running and Jogging Track

Par Courses

Sand Volleyball Courts

Outback Adventures equipment rentals

INTRAMURAL SPORTS

The Intramural Sports Program at UCSD is a balanced blend of team and individual sports activities that are designed to meet the diverse needs of the campus community. Sports offered include flag football, floor hockey, tennis, basketball, softball, soccer, bowling, volleyball, tube water polo, badminton, and dodgeball.

RECREATION CLUBS

Recreation Clubs are special-interest activity clubs open to the entire campus community. The

clubs are designed to bring together people with common interests. Students may join or begin new recreation clubs and participate in the workouts, meetings, social gatherings, and special events that are part of the RecClub structure.

SPORT CLUBS

Sport Clubs are those teams that compete on an intercollegiate basis but without many of the restrictions of the formal Intercollegiate Athletic Teams. The clubs offer students the opportunity to become involved in somewhat less traditional competitive sports, while still enjoying the travel to and competition against other institutions. Teams include badminton, dance sport, dance team, triathlon, equestrian, water ski, cycling, lacrosse, sailing, surfing, rugby, alpine ski/snowboard racing, ice hockey, and ultimate disc.

RECREATION CLASSES

Recreation classes provide students and the university community an opportunity for non-credit, nongraded instruction in a range of physical and leisure activities. The program includes professional instruction in everything from cardio and conditioning, tennis, weight training and swimming to karate, gymnastics, dance, and yoga.

OUTBACK ADVENTURES

Outback Adventures (outdoor recreation program) is a passport to adventure and the great outdoors. The program offers fun, full-service trips (transportation, meals, instruction, equipment) in backpacking, rock-climbing, canoeing, kayaking, mountain-biking, and other outdoor pursuits. The Outback Adventures director will also arrange customized trips. In addition, the program offers instructional workshops, a resource library of maps and park information, and a camping and outdoor equipment rental service that includes downhill skiing and snowboard equipment, camping equipment, and game equipment. Outback also runs the indoor climbing center, with facilities for beginning to advanced climbers, rentals, and instruction as well as the UCSD Challenge Course, offering leadership and team building workshops.

AQUATICS

UCSD Campus Recreation Aquatics encompasses a wide range of aquatic activities. Student users can participate in competitive and training programs in swimming and water polo. Masters

Programs in swimming, running, and triathlon provide an intensive competitive and training experience. Special events scheduled throughout the year range from student social activities to international team competitions. Additionally, an extensive recreational lap swim program is maintained to accommodate daily users from the campus and community.

INFORMAL RECREATION

Informal recreation provides individuals and groups of students the opportunity to make use of any and all of the physical activity facilities at UCSD. From jogging on the par course to shooting hoops in the gym, or playing racquetball in RIMAC, "open rec" time allows students to develop their own leisure activities.

MISSION BAY AQUATIC CENTER

Located on Santa Clara Point in Mission Bay, this facility and its programs provide students with an exclusive opportunity to participate in all aspects of aquatic recreation. From highly structured classes to equipment rentals, MBAC is a "first class" operation—(858) 488-1036.

PERSONAL WELLNESS

Our weightroom and Personal Wellness programs offer a free student personal wellness program with small groups and personalized comprehensive fitness program for sixty students each quarter. Nutrition counseling, personal fitness assessments, and massage therapy are also offered.

INTERCOLLEGIATE ATHLETICS AT UCSD

<http://athletics.ucsd.edu>

With 23 intercollegiate teams to choose from the UC San Diego Athletics program provides students with varying interests the opportunity to participate in a highly-competitive program. As a non-scholarship institution, UCSD's Tritons have competed in the NCAA Division III, achieving national prominence in nearly every sport. In 1998, UCSD won the Sears Directors' Cup, which is awarded to the nation's top overall athletics program in the NCAA Division III. In the fall of 2000, UCSD moved to Division II and immediately captured an NCAA Championship in Women's Soccer while finishing runner-up in the NCAA Water Polo Championship.

Triton teams have captured 94 first-, second-, and third-place national finishes, led by Women's

Volleyball's seven titles. Women's Soccer has won six championships, followed by Women's Water Polo with five, Women's Tennis with four, Men's Soccer with three and Men's Golf with one national championship. Individually, 90 Tritons have won national championships while a remarkable 800 have earned All-American Recognition. Tritons have been named Academic All-Americans on 140 occasions and 20 student-athletes have been awarded the prestigious NCAA Postgraduate Scholarship.

Sports offered for men and women include basketball, crew, cross country, fencing, soccer, swimming and diving, tennis, track and field, volleyball, and water polo. Men's baseball, men's golf, and women's softball are also offered.

With the move to Division II, most teams now compete in the California Collegiate Athletic Association, widely considered to be the top Division II athletic conference in the country.

In addition to athletic competition, UCSD students may get involved through support groups, game management, and internships. The UCSD Pep Band has grown steadily in recent years and is a fixture of spirit at all basketball and volleyball events. In 1999, the Triton Tide made its debut as a student booster club, and students may also join the UCSD Cheerleaders, the UCSD Twirl Flag Team, or the UCSD Dance Team. In addition to the student groups, Triton Athletic Associates, a booster group of parents, alumni, and friends assists UCSD Athletics with much-needed financial support. Students interested in a firsthand experience in the operations of an athletics program should check into opportunities to work in game management, which provides the staff for all home athletic events, or inquire about internships within the Athletics Department.

Student Office of Human Relations (SOHR)

Main Gym, Floor 2, Room 224
(858) 534-6708
<http://sohr.ucsd.edu>

The Student Office of Human Relations (SOHR) serves as an interpersonal and intergroup relations resource center, providing programs and services on issues relating to hate/bias incident reporting, anti-bias education/prevention programs, intergroup dialogue education, and mediation of student intergroup conflicts, as well as supporting initiatives that promote a

positive campus climate for all members of the UCSD community.

Student Health Service

Mail code 0039
(858) 534-3300
<http://studenthealth.ucsd.edu>

Student Health Service (SHS) is accredited by the American Association for Ambulatory Health Care, Inc. (AAAHC). Our purpose is to promote and preserve the health and well-being of all registered students so that they may pursue their academic goals. Our staff of physicians, nurse practitioners, registered nurses, medical assistants, health educators, and other medical professionals is committed to helping students maintain healthy lifestyles. SHS is conveniently located along Library Walk west of the Price Center and south of Geisel Library. For more information about SHS and services offered, access our Web page at <http://studenthealth.ucsd.edu>.

General medical appointments are provided **at no charge** to all registration-paying students during the academic quarters. There is a \$10 access fee for urgent care and first aid for students enrolled in the Student Health Insurance Plan (SHIP) and a \$20 access fee for those not enrolled in SHIP. Summer access to SHS is at no additional charge for students enrolled in SHIP. Continuing students not enrolled in SHIP are charged a summer health fee to access Student Health Service.

Reduced fees are charged for pharmaceuticals, contraceptives, travel immunizations, and laboratory tests sent to our reference lab. If you are enrolled in SHIP, many fees are covered. There is a \$10 co-payment for lab and a \$20 co-payment each for X-ray, specialty appointments, and nutrition counseling for students without SHIP. A vision clinic is available at modest fees and offers eye glasses, designer frames, lenses, sunglasses, contacts, and eye exams. Students enrolled in SHIP are eligible for additional discounts.

Although undergraduate, graduate, medical, and international students may have unlimited visits with SHS, students requiring medical or surgical care from practitioners, hospitals, or clinics other than SHS should be prepared to assume the cost of such care. SHIP provides benefits for ambulance, emergency room, hospitalization, most outpatient services, surgery, and major medical expenses with a **written SHS**

referral (applies when the student is within a 100-mile radius of UCSD; outside the 100-mile radius a referral is not needed for services). SHIP also includes benefits for a dental plan, pharmaceuticals, and discounts at the SHS Vision Clinic. The cost for SHIP is factored into grants, loans, and work-study programs offered to students who receive financial assistance. The fee for SHIP is paid by the university for graduate and professional students holding academic appointments of 25 percent time or more.

Students covered by private health insurance that meets university waiver criteria can opt out of SHIP by completing the waiver application online through TritonLink prior to posted deadlines. Waivers are processed each academic year. For additional changes, requests, and information, contact the Student Health Insurance office. The campus-based insurance plans do not replace the primary medical care and referral services provided by the Student Health Service.

Brochures describing the Student Health Insurance Plan, limitations, exclusions, and open enrollment periods are available at Student Health Service and through the SHS Web page at <http://studenthealth.ucsd.edu>. The insurance coordinators are available to assist students with any questions at (858) 534-2124.

Student Policies and Judicial Affairs

Building B, Student Center
Mail code 0329
(858) 534-6225
<http://ugr8.ucsd.edu/judicial>

Student Policies and Judicial Affairs (SP&JA) consists of the administration of student judicial affairs, which includes campus-wide coordination of student conduct, including graduate students, monitoring of compliance requirements, with applicable federal and state laws, and university policies and campus regulations, such as Right to Privacy as it affects students. In addition, the director also serves as the liaison to Campus Counsel and UC General Counsel for Student Affairs and other student-related legal matters and policy questions, and provides advice and recommendations for their disposition. Other programs encompassed by SP&JA include the Student Legal Services (SLS) Office, Student Office for Human Relations (SOHR), Student Conduct Coordinator (SCC), and the Center for Ethics and Spirituality.

Student Legal Services

Building B, Student Center
Mail code 0329
(858) 534-4374
<http://sls.ucsd.edu>
email: sls@ucsd.edu

Student Legal Services (SLS) provides advice to UCSD students in legal matters. It prepares and drafts legal documents for students seeking to represent themselves in court. These include Petitions for Dissolution, Name Change, Immigration Petitions, and Restraining Orders. Student Legal Services also counsels and prepares students for *in pro per* court appearances, i.e., Small Claims, Municipal, Traffic, and Misdemeanor Arraignment hearings. As SLS cannot represent students, if such representation is deemed necessary the student is referred to an outside attorney or agency specializing in that particular area of the law. SLS conducts twenty legal education workshops on a wide variety of topics each quarter. Through its Community Law Project, SLS provided pre-law students with service learning opportunities in underprivileged, underrepresented San Diego communities. Additionally, SLS advises the Phi Alpha Delta Law Fraternity, the Minority Law Foundation, and UCSD Mock Trial.

Student Safety Awareness & Sexual Assault Resource Center

Main Gym, Room 216
Mail code 0372
(858) 534-5793
<http://studentsafety.ucsd.edu/>
email: studentsafety@ucsd.edu

The Student Safety Awareness & Sexual Assault Resource Center (SARC), established in 1988, is the primary resource for educational programs on rape, sexual assault, and interpersonal violence prevention for UCSD students. SARC co-sponsors the R.A.D. (Rape Aggression Defense) self defense workshops with the Police Department and the Women's Center. In addition, SARC offers: (1) crisis intervention for student victims of rape, sexual assault, dating violence, and stalking, (2) accompaniment through the police, hospital, and judicial process, and (3) confidential counseling for student victims, family, and friends. If a sex offense occurs, staff explains the victim's options to report to law enforcement and/or student judicial affairs and to utilize other resources, i.e., medical assistance,

campus and community counseling, and student services.

University Centers

The facilities, services, and programs of the University Centers at UCSD complement the teaching and research functions of the university. Both the Price Center and the Student Center provide opportunities for students and the campus community to meet, relax, dine, and enhance their experiences outside the classroom or lab.

THE PRICE CENTER

Mail code 0076
Administration office: (858) 534-7666
Web site: theuniversitycenters.ucsd.edu

The centrally located, modern facilities of the Price Center are home to a variety of services geared to the needs of students and the campus community. The Price Center is the place for eating, studying, surfing the Internet, running errands, and catching the latest feature film at the Dolby Digital sound equipped movie theatre. With its computer resources, the Sun God Lounge is a perfect place to study. Services located in the Price Center include the university bookstore, a copy and technology center, a travel agency, a post office, a game room, a Ticketmaster outlet, and a flower stand. Many afternoons, sounds of bands and socializing fill the patio in the plaza. An equally vibrant indoor food court has a variety of fast-service restaurants such as: Wendy's, Subway, Round Table Pizza, Jamba Juice, Shogun of La Jolla, Rubio's Baja Grill, Panda Express, and Espresso Roma. A large ballroom hosts major exhibits, conferences, meetings, concerts, and dances throughout the year. Fifteen state-of-the-art conference/meeting rooms are available for use by the campus community. Professional catering and high-tech audio and visual services can also be arranged. The Price Center is also home to many student organizations. In addition, the offices of Campus Tours, Volunteer Connection, Associated Students, University Events Office, and the Office of Student Organizations and Leadership Opportunities are located in the Price Center.

THE STUDENT CENTER

Student Center Services
Mail code 0323
Administration office: (858) 534-8929
Web site: theuniversitycenters.ucsd.edu

Nestled among the eucalyptus trees, the wood exterior of the Student Center stands in contrast to the modern marble of the Price Center. The casual atmosphere and unique blend of services make the Student Center a special place. The main building is home to The General Store, Groundwork Books, and the Food Co-op. These are UCSD's own brand of student-run cooperatives. The UCSD Guardian newspaper, KSDT radio station, and SRTV are located here along with several student organizations and alternative campus media. The Student Center is a popular study spot with academic services such as A.S. Soft Reserves, A.S. Lecture Notes, and plenty of comfortable outdoor study areas. There are also conference/meeting rooms, two ATMs, and the UCSD Bike Shop, which sells, repairs, and maintains bikes and bike accessories. The Commuter Student Services and Off-Campus Housing Office, which advocates for the needs of commuter students and helps students find off-campus housing, is located on the second floor. Next to the main building is The Stage at the Pub where dances, concerts, and many other events occur. The Stage is connected to Porter's Pub which serves lunch, dinner, and microbrew beer. Students, faculty, staff, alumni, and community members learn the art of neon, pottery, glass blowing, and other crafts in classes offered at the Crafts Center. The work of artists from around the world is exhibited at the adjacent Grove Gallery. Nearby, specialty coffees, light cuisine, and an occasional musical performance are served up in the patio setting of the Grove Caffe, one of the most beautiful places on campus. Just south of the Student Center on the Revelle campus is the Ché Café, which serves a vegetarian menu at very affordable prices.

STUDENT INFORMATION CENTER (EDNA)

Price Center
Mail code 0076
Administration Office: (858) 534-3362 (EDNA)
Web site: theuniversitycenters.ucsd.edu

Located in the Price Center Plaza next to the theatre lobby, the information desk serves the campus community by providing information and a variety of other services benefiting the students, faculty, and the general public.

STUDENT GOVERNMENTS

Associated Students
Third Floor, Price Center

Mail code 0077

A.S.: (858) 534-4451

Hours: 8:00 a.m.– 4:30 p.m. Monday–Friday

<http://as.ucsd.edu>

Graduate Student Association

Student Center A

First Floor, room 132

Mail code 0353

GSA: (858) 534-6504

Hours: 9:00 a.m.–5:00 p.m., Monday–Friday

<http://weber.ucsd.edu/~gsa>

The Associated Students (A.S.) and the Graduate Student Association (G.S.A.) provide students with practical leadership experience in the areas of programming, financial planning, lobbying, and in the development of programs and services that are designed to meet the students' needs. The Associated Students (A.S.) operates A.S. Lecture Notes, A.S. Soft Reserves, A.S. Challenge Course, A.S. Microwave/Refrigerator Rentals, A.S. Volunteer Connection, A.S. Undergraduate Scholastic Grants, A.S. Safe Ride, A.S. Academic Success Program, A.S. SRTV, KSDT Radio, Grove Caffe, and the Holiday Airport Shuttle. The A.S. has an official liaison with the A.S. Student Initiated Outreach and Recruitment Commission (SIORC), A.S. Alliance, A.S. Women's Commission, A.S. Triton Tide, All-Campus Commuter Board, and the A.S. All-Campus Transfer Student Association. The A.S. also sponsors a wide variety of programming events including speakers, concerts, and festivals.

The G.S.A. takes a proactive stance on graduate concerns in the areas of housing, TA/RA work-related issues, and mandatory health insurance. The Student Government staff works with the A.S. and the G.S.A. in providing logistical, accounting, and programmatic advice. The student leaders and staff of the A.S., the G.S.A., and the Student Government Services office encourage you to get involved and take part in the many leadership opportunities available at UCSD.

STUDENT ORGANIZATIONS AND LEADERSHIP OPPORTUNITIES

Price Center

Mail code 0078

(858) 534-0501

<http://solo.ucsd.edu>

The office of Student Organizations and Leadership Opportunities strongly supports the notion that the university must provide learning experiences for students both within and out-

side the classroom. Participating in leadership workshops, seminars, conferences, and in any of the over 400 student organizations is an integral part of the university experience. With so many organizations to choose from, there is bound to be one that sparks individual interest. If not, students can start their own organization! Registration for student organizations begins in the fall and continues throughout the academic year. The advisers are here to assist in selecting an organization or in starting one.

In addition, leadership seminars are organized to help strengthen the leadership potential of students. Listed below are some of the training programs we schedule each year:

- Improving interpersonal skills
- Public relations
- Interviewing techniques
- Fund raising
- Team building
- Running effective meetings
- Time management
- Careers in student affairs
- Budget management
- Motivation
- Stress management
- Ethics
- Publicity/advertising
- Recruiting volunteers
- Diversity

We invite you to stop by the Student Organizations Center on the third floor of the Price Center to learn more about student organizations and leadership opportunities!

University Events Office

Price Center, Third Floor

Mail code 0078

(858) 534-4090

<http://ueo.ucsd.edu>

The University Events Office (UEO) is a multifaceted professional arts and events organization of UCSD with an outstanding reputation for bringing nationally and internationally recognized artists to the campus and local community. Our performances and events offer exceptional opportunities for discovery and participation in a variety of artistic disciplines that reflect our culture and challenge our understanding of the world in which we live. The University Events Office's performance programs include:

- ArtPower! performing arts season

- RIMAC rock, hip-hop, and pop concerts
- University-wide cultural celebrations
- Sneak previews (advance film screenings)

As the central campus resource for events, UEO serves as the adviser to the Associated Students (AS) Programming Office. UEO also advises campus event planners on budgeting, marketing, negotiation and contracting, and provides production planning and technical assistance for major campus events.

The UCSD Box Office, the central campus box office managed by UEO, provides ticket sales for campus events as well as events on the Ticketmaster system. The Box Office sells passes for area theatres, theme parks, and more.

The University Events Office is a department of Student Affairs at UCSD.

ARTPOWER! AT UC SAN DIEGO

Price Center, Third Floor

Mail code 0078

(858) 534-TIXS

<http://www.artpower.ucsd.edu>

The university's critically acclaimed performing arts season features artists of national and international renown in music, dance, and spoken word from October through May. ArtPower! provides exciting opportunities for the UCSD and San Diego communities to engage in discovery and dialogue with creative innovators in the arts. Performances by Bill T. Jones/Arnie Zane Dance Company, David Sedaris, and Emerson String Quartet have provided art power to UCSD. ArtPower! is a program of the University Events Office.

UCSD BOX OFFICE

Price Center Plaza

Mail code 0078

(858) 534-TIXS

<http://boxoffice.ucsd.edu>

The UCSD Box Office provides the UCSD and San Diego communities with full service ticketing to the best of arts and entertainment on and off campus. Tickets to ArtPower! performances, RIMAC rock/pop concerts, amusement park tickets, and a host of other fun-filled activities are available for purchase at the box office in person, by phone, or online. The UCSD Box Office is a program of the University Events Office.

Veterans' Affairs

Located in the Financial Aid Office
Building 201 University Center
Mail code 0013
(858) 534-4480
<http://www.ucsd.edu/finaid>

ELIGIBILITY

The following persons may be eligible for veterans' educational benefits:

Chapter 35

1. Sons, daughters, spouses, and surviving spouses of veterans who died, or are permanently and totally disabled as the result of a service-connected disability, or persons missing in action, or captured in line of duty by a hostile force.

Chapter 30

2. A person who entered active duty for the first time after June 30, 1985, and served continuously for three years.

Chapter 1606

3. Persons who have a six-year obligation to serve in the Selected Reserve signed after June 30, 1985.

CalVet College Fee Waiver

4. California Veterans' Dependents College Fee Waiver Program: A student who is the child of a deceased veteran or veteran with a service-connected disability may receive a waiver of registration and educational fees. Eligibility is determined by individual county veterans' services offices.

OTHER SERVICES

In addition to certifying paperwork to initiate a student's veterans' benefits, the Financial Aid Office staff can answer questions about check problems or other programs administered by the Veterans Administration such as tutorial assistance and VA work-study, or can provide you a phone number so that you can make an inquiry to the Veterans Administration Regional Office.

Upon admission to the university, please contact the Financial Aid Office to request certification of VA educational benefits, or notify the office of your eligibility for the CalVet waiver.

Other Services and Programs

UCSD Alumni Association

202 University Center
Mail code 0083
(858) 534-3900
email: alumni@ucsd.edu
<http://www.alumni.ucsd.edu>

The UCSD Alumni Association was formed in 1964 by a small group of early graduates, and it has grown today to represent over 100,000 alumni. Our mission is to foster a lifelong, mutually beneficial relationship of alumni and students with UCSD. The association works to provide alumni with continued access to the resources of the university, communicate UCSD news and happenings, and facilitate a network for alumni and student interaction.

The Alumni Association awards undergraduate scholarships, recognizes outstanding alumni, faculty, and students, assists the university with legislative advocacy, and brings alumni together in social, educational, and networking forums in San Diego and across the nation. The association publishes @UCSD magazine and hosts an active online community.

Increasingly, the Alumni Association is providing current students with access to alumni as a resource for social, career, and community connections. When students become members of the association they maximize their interaction with this larger community of alumni. Offerings include career mentoring, skills development training, and support for student organizations and activities.

Student and alumni members have access to campus discounts and privileges, networking and volunteering opportunities, educational travel programs, a subscription to all alumni publications, and discount cards for UCSD and community activities.

Art Galleries

UNIVERSITY ART GALLERY

Mandeville Center, Room 101
Mail code 0327
(858) 534-2107
<http://www.universityartgallery.ucsd.edu>

The University Art Gallery presents four exhibitions each year with an emphasis on contemporary works. Painting, sculpture, and pho-

tography are joined by newer art forms such as performance art, installation works, and video art, giving visitors a chance to experience the full range of contemporary artistic expression. Recent exhibitions have included: Edward Burtynsky and Stéphane Couturier, *Altered States: Landscape Transformations in the Wake of Progress*; Doug Hall, *In Finite Spaces*; Eleanor Antin, *The Last Days of Pompeii*; and Luis Gispert: *Loud Image*.

Gallery hours are from 11:00 a.m. to 4:00 p.m., Tuesday through Saturday. The gallery is closed Sundays, Mondays, and school holidays. There is no admission charge.

MANDEVILLE ANNEX GALLERY

Mandeville Center, Room B-118
Mail code 0327

The Mandeville Annex Gallery is for Visual Arts undergraduate art exhibitions. A new exhibition is mounted each week of the quarter. Included in the exhibition schedule are individual, group, and class shows. Gallery hours are from 12:00 noon to 5:00 p.m., Monday through Friday. There is no admission charge.

VISUAL ARTS GRADUATE GALLERY

Visual Arts Facility, Room 309
Mail code 0084
<http://visarts.ucsd.edu>

The six-building complex houses the Visual Arts Graduate Gallery. First-year review shows and M.F.A. exhibitions will be mounted each week of the quarter. Gallery hours are from 12:00 noon to 5:00 p.m., Monday through Friday. There is no admission charge.

Child Development Center

Mail code 0962
(858) 552-2500
<http://admissions.ucsd.edu>

The UCSD Early Childhood Education Center serves the children of students, staff, faculty, and the community at large. Age requirements are eleven months and walking through kindergarten. A young infants program (four months to walking) is expected to be available in spring 2006. State subsidy is available for income-eligible staff and full-time students on a limited basis. Only full-time enrollment is offered, 7:30 a.m. to 5:00 p.m., Monday through Friday. Breakfast, lunch, and afternoon snack are included in the cost. For further information or

to visit, call the Childcare Center's office at (858) 552-2500 between 7:30 a.m. and 5:00 p.m.

As an alternative, the Infant Toddler Referral Program aids campus families in locating licensed home-care providers for children from six weeks through preschool ages. For assistance, call (858) 552-2500 during office hours or leave a recorded message for a return call.

Crafts Center

Mail code 0338
(858) 534-2021
<http://www-crafts.ucsd.edu>

Located in the center of the campus, the Crafts Center offers studio and art/crafts instructional facilities in ceramics, photography, jewelry, drawing, neon, glassblowing, and other crafts. The center provides personal enrichment and creative educational opportunities to individuals wishing to develop artistic skills in an active studio-classroom situation.

The Grove Gallery is a part of the center, and offers ongoing exhibits of contemporary crafts and ethnic arts. The Grove Gallery Store sells an international selection of handmade crafts and other decorative accessories.

Registration for Crafts Center activities takes place the first week of every quarter at the center. Specific classes, schedules, and course fees information can be obtained by calling (858) 534-2021 or <http://www-crafts.ucsd.edu>.

UCSD Cross-Cultural Center

Building 510, Mail Code 0053
(858) 534-9689, Fax (858) 822-0173
cccenter@ucsd.edu
<http://ccc.ucsd.edu>

Established in May of 1995, the UCSD Cross-Cultural Center (CCC) functions as a campus community center committed to creating space for dialogue while also maintaining an environment conducive to the recruitment and retention of students, staff, and faculty from underrepresented backgrounds.

The CCC offers programs and services specifically designed to reflect UCSD's commitment to excellence, scholarship, and community through cross-cultural interactions. The center's focus areas include: faculty, staff, and student exchanges, educational materials and resources, student outreach and retention activities, speakers, film series, community outreach, support and discussion groups, and leadership development.

Imprints

<http://imprints.ucsd.edu>

YOUR UCSD PRINT RESOURCE CENTER

Self-serve copies, full color copies, fax service, posters, lamination, large format, plus a large variety of other printing and binding services are available. Price Center Imprints is open evenings and weekends. In addition to standard services, computer workstations are available on a rental basis with both black and white and color laser printer options.

Campus Locations:

- Campus Services Complex, Bldg. A, (858) 534-3020
- Geisel Library, Main Flr (858) 534-2534
- Price Center, Upper level (858) 822-4422
- University Center, Bldg. 201, (858) 534-7050

Triton Plus Card, Library photocopy card, cash, and check payment accepted. Visa and MasterCard accepted at Price Center and Geisel Library locations.

Transportation and Parking Services

Located in the Gilman Parking Structure
Mail code 0040
(858) 534-4223
<http://parking.ucsd.edu>

Transportation and Parking Services, (T&PS) sponsors a variety of programs and services designed to help students living at UCSD without a car. An extensive network of shuttles spans the campus and also serves several off-campus locations. A special sticker can be affixed to a UCSD ID card, free of charge, allowing unlimited rides on San Diego Transit buses within a two-mile radius of campus. T&PS offers a free holiday shuttle service to the airport, helping students get home during breaks. For information, route maps, or schedules, please telephone (858) 534-RIDE, or check our Web site at parking.ucsd.edu.

A number of money-saving rideshare programs have been developed for commuting students. Carpool, vanpool, rail, bicycle, and subsidized transit programs feature terrific additional

incentives including a free emergency ride home and complimentary parking. For program details, call Rideshare Operations at (858) 534-RIDE.

If you choose to bring a car to campus, be aware that a parking permit is required on UCSD property, Monday through Friday, 7:00 a.m. to 11:00 p.m., unless otherwise posted. (A short grace period during September's Welcome Week allows parking in student spaces without a parking permit.) Parking permits can be obtained at the Parking Office (858) 534-4223, or by accessing TritonLink.

Student spaces are defined by yellow squares, student ("S") parking permits are valid in these yellow spaces at all times. After 4:30 p.m. weekdays, all UCSD permits are upgraded and become valid in spaces marked with green ("B") or red ("A") squares, and metered (no fee required) spaces. Permits are not required on campus Saturday and Sunday, unless otherwise posted. Student permits are never valid in spaces marked "A" Permit Required, 24 Hours a Day, 7 Days a Week, or in any other 7/24 parking space.

T&PS has a Motorist Assistance Program which provides battery jumps, help with lock outs, flat tire inflation, or a lift to the nearest station to buy gas for drivers stranded on campus. Call (858) 534-8108.

If you have questions about T&PS, purchasing a permit, or parking at UCSD, please telephone a service representative at (858) 534-4223, visit our Web site: parking.ucsd.edu or stop by the Parking Office, located in the Gilman Parking Structure (entrance on Russell Lane).

Student Mail Services

Campus Services Complex, Bldg. A
Mail code 0047
(858) 534-7098
<http://www-bfs.ucsd.edu/mails/>

The Student Mail Services provides Monday through Friday distribution of mail to resident students during the academic year. Hours of operation are 8:00 a.m. to 4:00 p.m. Stamps and various other U.S. Postal commodities can be purchased.

The UCSD Bookstore

Located in the Price Center Complex
9500 Gilman Drive
La Jolla, CA 92093-0008
<http://bookstore.ucsd.edu>
Monday–Thursday 8:00 a.m.–7:00 p.m.
Friday 8:00 a.m.–6:00 p.m.

Saturday 10:00 a.m.–5:00 p.m.
 Open most Sundays during the academic year
 12:00 noon–5:00 p.m.
 For holidays and extended hours at the
 beginning of each quarter, phone or check:

Course Materials/Textbooks

Required and recommended course materials for undergraduate and graduate classes are stocked at the UCSD Bookstore, along with additional supplementary study aids.

Course materials for UCSD Extension courses are stocked in the Extension section of the UCSD Bookstore; they can also be ordered online via the Bookstore's Web site at <http://bookstore.ucsd.edu/books/extension/index.htm>. Extension course materials ordered via the Web may be shipped, held for pick-up in La Jolla, or delivered for pick-up at the North County or Sorrento Mesa Extension centers.

Online Look-Up: Undergraduate, graduate, and Extension course materials lists, along with prices and availability, may be viewed online the same day they are entered into the Bookstore's database once the feature is activated for each term. For graduate and undergraduate classes, within the Schedule of Classes on UCSD's TritonLink, click on the red book icon for the desired section. For Extension course materials lists, use the look-up/purchase feature at <http://bookstore.ucsd.edu/books/extension/index.htm>.

Faculty: Each quarter, the UCSD Bookstore sends a memo to faculty requesting course materials information ("adoptions") for the upcoming quarter. Faculty can submit adoptions directly to the Course Materials Department at the UCSD Bookstore, through the various academic departments, or via the Bookstore's Web site at <http://bookstore.ucsd.edu/books/textbooks/coursematerials.htm>. Faculty should submit their adoptions before the quarterly deadline to ensure that the course materials can be stocked before classes begin. Information about and links to other campus instructional support services (library eReserves, course Web pages, A.S. Soft Reserves, Imprints, etc.), are at <http://coursematerials.ucsd.edu/>.

Textbook Reservation Service (TRS)

At the beginning of every fall quarter, the UCSD Bookstore offers a convenient textbook reservation service (TRS). Beginning mid-June, students can submit reservations via the Bookstore's Web site at <http://bookstore.ucsd.edu/trs>.

Custom Publishing

As part of the UCSD Bookstore's mission to serve the UCSD community as an essential academic resource, the course materials department provides custom-printed course materials, including out-of-print and out-of-stock books, journal and newspaper articles, syllabi, anthologies, lab manuals, and original works. To ensure compliance with legal requirements involving reproduced printed materials, the Bookstore secures all necessary copyright permissions. Faculty should submit adoptions for custom-printed materials along with their other adoption requests.

Digital Course Content

Acting in concert with other instructional support departments on campus, the Bookstore can assist faculty in locating digital materials and making them available to UCSD students.

Textbook Sell-Back

During the first week and finals week of each quarter, the UCSD Bookstore provides a sell-back service allowing students to sell their textbooks for cash. If a title is being used in the upcoming term, students may receive up to half the new price of the book.

Book Information

The book information department's experienced staff of booksellers can help find just the right book from among the impressive selection of general, technical, scientific, and medical books stocked at the UCSD Bookstore. Booksellers can also research any title that is in print in the United States by accessing databases that contain information on hundreds of thousands of additional titles. They are happy to special order books that are not available in the store and receive them quickly too. Ask about rush order service. In addition to offering in-store service, booksellers take orders and answer inquiries via phone, fax, and email and can assist with searching for books and placing orders on their Web site: bookstore.ucsd.edu, which shows availability of more than 140,000 titles contained in their database. To search for and order from more titles, the Bookstore offers two additional Web sites: BookSense, for trade and technical books and the UCSD Medical Web store for medical books.

General, Scientific, and Technical Books

The general, scientific, and technical department contains books from hundreds of different publishers. To support the academic mission of the university, a wide array of academic disciplines in the arts and humanities, social sciences, languages, mathematics, science, and engineering are represented. Strong general interest sections in categories such as fiction, travel, reference, and children's books complete the selection. Find excellent values in the bargain books section and on discounted bestsellers. All general, scientific, and technical books are discounted 10 percent during "Happy Hours" from 4:00 p.m.–close every Wednesday. Check availability of titles in the store online at bookstore.ucsd.edu. The home page provides the opportunity to search and order from among two million additional titles, and explore their partner stores, BookSense for trade and technical books, and the UCSD Medical Web store for discounted medical books.

Medical Books and Instruments

The UCSD Bookstore is proud of its partnership with the medical community at the university and in the San Diego area. It has long been recognized as the primary resource for an up-to-date, comprehensive selection of medical books

and instruments. In the store, find medical textbooks for the UCSD School of Medicine and UCSD School of Pharmacy along with more than 5,500 reference titles in nearly one hundred medical categories. A large selection of medical instruments is available along with lab coats, clinical jackets, scrubs, and unique medical gift items. All medical books and instruments are discounted 5 percent during "Happy Hours" from 4:00 p.m.–close every Wednesday. Check availability of medical titles in the store online at bookstore.ucsd.edu. For a larger selection of medical titles, search the UCSD Medical Web store accessed from the home page. This Web site features more than 90,000 titles and offers up to a 5 percent discount on medical and nursing books as well as medical supplies and instruments.

Faculty Authored Books

The UCSD Bookstore is pleased to display and sell recent publications authored by UCSD faculty. Inside the bookstore find books shelved in a special Faculty Author section and in the categorical section that applies. Look for a selection of recently published titles on display at the Faculty Club. Faculty members with a new book they would like the UCSD Bookstore to stock should contact the store using one of these methods: (858) 534-3149; (800) 520-7323; bookstore.ucsd.edu/friends/faculty/authorrequestform.htm.

Gifts and Clothing

Visit the gifts and clothing department and discover an exciting selection of UCSD insignia merchandise, as well as seasonal, trendy, and everyday clothing and gift merchandise. You can shop for bath and body products as well as home décor, jewelry, and sandals. While in the store or online, check out the alumni, parent, and graduation sections. In-store events for this department include the spring break sale, grad fair, and holiday sale, all of which bring a mini mall shopping experience to campus. Shop online: bookstore.ucsd.edu/clothing, or call to find out about the latest arrivals, custom insignia orders, and quantity discounts (800) 520-7323 (READ).

Supplies: School, Art, Office, and Residence Halls

The bookstore caters to UCSD's office, school, art, and residence hall supply needs as well as professor required art, engineering, and lab

supplies. Students living in the residence halls have a selection of linens, towels, shower caddies, picture hangers, trash cans, white/cork boards, extension cords, T.V. cables, batteries, and much more to get their rooms set up in style. Call (858) 534-3786 for a copy of the Super Catalog featuring over 30,000 office, art, school, and residence hall supplies. Special orders are easy to place and usually arrive within one to two days. For some of the most common supplies, shop online: bookstore.ucsd.edu/supplies. Custom orders and quantity discounts are available.

Electronics

Brand name calculators, CD players, and voice recorders such as Hewlett Packard, Texas Instruments, Sharp, Sony, and Panasonic are always in stock at the bookstore. This department is full of fun and useful gadgets and accessories.

Computers

The extremely knowledgeable staff of the UCSD Bookstore Computer Center is available to assist those who wish to purchase computers, printers, digital cameras, peripherals, and supplies. Educational pricing is offered for full-time UCSD students, extension students (certificate courses), faculty, and staff on Macintosh and PC software and hardware. Special orders are encouraged for products that may not be stocked. The UCSD Bookstore One Stop Shopping (BOSS) system was created to allow ordering computer products online: bookstore.ucsd.edu/computers/index.htm.

Computer Repair

At very reasonable prices the bookstore's computer center repair shop accepts in-warranty repairs for: Apple, Dell, IBM, and Sony notebooks, and desktops.

In addition, they repair almost all out-of-warranty computers and printers including PC clones. They do not repair out-of-warranty monitors. To receive service bring your system to the bookstore computer center. The average repair is three to five days.

Special Orders

Books, gifts, clothing, office and art supplies, medical instruments, computer hardware and software can be special ordered at any time. Call us to request a personal shopper.

BIRCH AQUARIUM AT SCRIPPS BOOKSHOP

2300 Expedition Way
La Jolla, CA 92093-0207
Monday–Sunday 9:30 a.m.–5:00 p.m.
(858) 534-8753
(Closed Thanksgiving Day, Christmas Day,
and New Year's Day)

The Aquarium Book and Gift Shop has been operated by the UCSD Bookstore since August 1994. Its goal is to support the education and community service missions of the Scripps Institution of Oceanography and the Birch Aquarium at Scripps. The bookshop has an exciting selection of educational books concerning the geological, biological, and physical sciences and how they interact with the sea. A dazzling variety of children's books and educational toys are available to children of all ages who have interest in the ocean and its marine life. Other popular items are guides to scuba diving and snorkeling, tide pool guides, San Diego tourist guides, and maps. The bookshop's selection of souvenirs and gifts is fun-loving with a wide-ranging selection of T-shirts, sweatshirts, postcards, calendars, DVDs, stuffed animals, jewelry, and lots more. Visit the Web store at bookstore.ucsd.edu/aquarium.

THE SUNSHINE STORE

Monday–Thursday 7:00 a.m.–9:00 p.m.
Friday 7:00 a.m.–6:00 p.m.
Saturday 9:00 a.m.–5:00 p.m.
Most Sundays 12:00 noon–5:00 p.m.

Visit the Sunshine Store for all your favorite groceries and needs including: frozen, microwavable, and packaged meals, snacks, soda, fresh sandwiches and salads, juice, coffee, tea, ice cream, sandwiches, donuts, candy, international foods and snacks, health and personal products, cleaning supplies, and household essentials. Film and film processing are available with specials running throughout the year. Join the Coffee Club (buy ten cups, get the eleventh cup free)! Library-safe mugs are sold here, as well as scarions, blue books, batteries, daily newspapers, and munchies when everything else is closed on campus! Established in April 1979 as an auxiliary operation of the UCSD Bookstore, the Sunshine Store is a busy annex located next to the UCSD Bookstore on the ground floor of the Price Center plaza.

RETURN/REFUND POLICY

The UCSD Bookstore strives for complete customer satisfaction. Should any product you select from the UCSD Bookstore fail to meet your expectations, they will respond to your concern and assist you in an exchange, refund, or credit whenever possible within the guidelines that apply to their specific merchandise categories.

- All categories of refundable merchandise require an original receipt to obtain a refund.
- Undergraduate, graduate, and Extension textbooks must be accompanied by the cash register receipt and meet the conditions and timeframes printed on the bookmark that accompanies the receipt.
- Books used for School of Medicine and School of Pharmacy and Pharmaceutical Sciences courses must be returned within fourteen days from the date on the receipt.
- General interest, technical, and medical books may be returned for refund, exchange, or credit within fourteen days if they are in resalable condition and are among the titles currently carried in the UCSD Bookstore.
- Nonrefundable/nonexchangeable merchandise: medical instruments, Medical (MDTEST), other testing (REFEXM) books, magazines, umbrellas, undergarments, and clearance books.
- Computer hardware and software refund policies are available in the computer department.
- For supply department electronics, original packaging and cash register receipt are required for refund or exchange.

- Calculators may be returned for a full refund or store credit within fourteen days of purchase if they are unopened and in resalable condition. Refunds will not be given for opened calculators.

Business, (858) 534-4357

<http://police.ucsd.edu>

The UCSD Police Department protects life and property through the enforcement of local, state, and federal laws. The police department strives for a safe campus environment, where the educational and research pursuits of the university can be realized.

The Police Department provides continuous twenty-four-hour-a-day police patrol to protect the campus community, along with the dispatching of emergency fire and ambulance services.

In addition, student residential areas are provided with additional security with on-site residential security officers (RSOs) during the evening and early morning hours.

CLERY CAMPUS CRIME REPORT

For information concerning campus crime statistics, crime reporting, policies and practices pertaining to campus security, and/or crime prevention tips, please visit the UCSD Police Department's Web site—Crime/Victim Information located at www.police.ucsd.edu.

CRIME PREVENTION PROGRAM

(858) 534-3644

The Police Department's Crime Prevention Program offers a variety of information to the campus community on crime prevention methods. Pamphlets and informative seminars are available.

COMMUNITY SERVICE OFFICER PROGRAM

(858) 534-9255

CSOs are students employed by the UCSD Police Department. They provide a variety of services related to crime prevention and campus safety. One of the services is the safety ESCORT program, which is available every evening from 5:00 p.m. to 1:00 a.m. They also provide security for campus events and facilities. For more information contact the program coordinator at (858) 822-1130.

LOST AND FOUND

(858) 534-4361

The Police Department serves as a central repository for lost and found articles. Lost and found items should be taken to the police station. The station is open twenty-four hours daily.

U.S. Neighborhood Post Office

2.425 Price Center

Mail code 0047

(858) 534-1164

<http://www-bfs.ucsd.edu/mails/>

The Price Center Post Office is a contract station operated under the rules and regulations of the U.S. Postal Service. Stamps, money orders, and other postal items may be purchased and mailed at this location Monday–Friday, 8:30 a.m. to 5:00 p.m. P.O. Box rentals are available in various sizes.

Organized Research Units (ORUs) are academic units the University of California has established to provide a supportive infrastructure for interdisciplinary research complementary to the academic goals of departments of instruction and research. The functions of ORUs are to facilitate research and research collaborations; disseminate research results through research conferences, meetings, and other activities; strengthen graduate and undergraduate education by providing students with training opportunities and access to facilities; seek extramural research funds; and carry out university and public service programs related to ORUs' research expertise. The senior staff of these units are faculty members in related academic departments. Institutes and centers currently in operation at UCSD are described below.

In addition, the university is formally and informally affiliated with various private research organizations such as the Institute of the Americas, The Salk Institute for Biological Studies, Howard Hughes Medical Institute, Ludwig Institute for Cancer Research, and The Burnham Institute.

Universitywide Institutes/ Organized Research Units

California Space Institute (Cal Space) was established in 1979 as a multicampus organized research unit of the University of California (UC). Cal Space maintains centers on several campuses, which support and conduct pure and applied space-related science and technological research and development. Specific areas of investigation include the following:

Remote Sensing—acquisition, processing, and application of observations by satellites or other remotely automated instruments to study the Earth and its changing environment. The primarily satellite-based investigations study the greenhouse effect, global warming, hydrological cycle, land surface processes, air-sea interactions, radiation, and cloud dynamics.

Climate—interdisciplinary scientific research that applies space observations and numerical modeling techniques to fundamental issues of climate prediction and global change caused by both natural and human forces within the atmosphere, the oceans, and on land surfaces.

Space science and engineering—investigations of both the solar system and universe, and the development of automation and robotic systems for space exploration. Current investigations include the study of comets, asteroids, the solar wind, and cosmic background radiation. Space observations are often conducted with instruments and techniques designed by Cal Space researchers.

Education—promotion of undergraduate and graduate education in the interdisciplinary fields of climate and global change, and space science and engineering. The Cal Space-led state-wide consortium (California Space Grant Consortium) was designated in 1989 as a Space Grant College by NASA's Office of Education. The program expands leadership in the development and application of space resources through research and hands-on space projects, fellowship funding, and educational outreach activities. The California Space Grant Program works with NASA Centers and the aerospace and high technology industries to strengthen its educational objectives.

Institute of Geophysics and Planetary Physics (IGPP) was established in 1960 and named the Cecil H. and Ida M. Green IGPP in 1994. It is a multicampus research unit of the University of California, headquartered at UC Riverside, with branches at UCSD, UCI, UCLA, UCSC, as well as Los Alamos and Lawrence Livermore National Laboratories. The present facility includes the Roger and Ellen Revelle Laboratory and the Judith and Walter Munk Laboratory. Present research concentrates on the study of crustal dynamics by measurements of gravity, tilt, displacement, and strain in both continental and oceanic environments; of regional seismicity and linear and nonlinear earthquake and explosion source mechanisms; of the variability of the earth's geomagnetic field and its generation by the geodynamo; of the spherical and aspherical structure of the earth by measurements of free oscillations, surface waves, and travel times; of seafloor tectonics using marine geophysical methods; of linear and nonlinear theoretical and computational fluid dynamics; of the variable mesoscale structure of the oceans and global ocean warming by acoustic tomography; of the structure of the oceanic crust and lithosphere by seismic and electromagnetic

measurements on the ocean bottom and at the ocean's surface through seismic multichannel methods; of sea-floor and planetary topography and gravity using satellite methods; of nonlinear dynamics applied to geomorphology; and of tides, waves, turbulence, and circulation in the oceans; of surface change caused by tectonic activity, or climate change using satellite Interferometric Synthetic Aperture Radar (InSAR), as well as airborne and spaceborne laser altimetry. The institute operates a global network of some forty broadband seismometers, the IDA (International Deployment of Accelerometers) Array, with ten of these stations in the former Soviet Union which are telemetered by satellite to the institute; a crustal strain and seismic observatory at the Cecil and Ida Green Piñon Flat Observatory near Palm Springs; a scientific wireless network in California with SDSC, the High Performance Wireless Research and Education Network (HPWREN); a southern California network of Global Positioning System (GPS) satellite geodetic sites operated by the Scripps Orbit and Permanent Array Center (SOPAC) and the California Spatial Reference Center (CSRC); an acoustic network in the Pacific for measuring ocean temperature variability; a modern 3D data visualization facility; a 5m, X-band satellite receiving antenna for satellite remote sensing; a national Ocean Bottom Seismograph Instrument Pool (OBSIP); and telemetered seismic arrays in Kirghizia, and two locations in California. The institute does not grant degrees, but makes its facilities available to graduate students from various departments who have chosen to write their dissertations on geophysical problems. Undergraduate students are involved in independent research projects and as laboratory assistants. Members of the institute staff now hold joint appointments with the Departments of the Scripps Institution of Oceanography, and Applied Mechanics and Engineering Sciences. Support for visiting scholars and grant matching funds is provided through an endowment to the Cecil and Ida Green Foundation for the Earth Sciences.

The University of California Institute on Global Conflict and Cooperation (IGCC) is a multicampus research unit serving all ten UC campuses and the UC-managed Lawrence

Berkeley, Lawrence Livermore, and Los Alamos National Laboratories. IGCC is based at the Graduate School of International Relations and Pacific Studies (IR/PS) at UCSD, whose faculty provides IGCC's leadership.

IGCC's mission to educate the next generation of international problem-solvers and peacemakers is carried out through teaching activities and research and public service opportunities. Scholars and researchers from inside and outside the UC system, government officials, and students from the United States and abroad have participated in IGCC projects.

IGCC's initial research focused on averting nuclear proliferation through arms control and confidence-building measures between the superpowers. Since then, its research program has diversified to encompass several broad areas of inquiry: regional relations, international environmental policy, ethnic conflict, terrorism, and international trade and policy issues. In addition, receipt of a prestigious NSF award in 2002 for a program to train the next generation of nuclear policy experts has led to a rekindling of interest in research on traditional security issues.

IGCC supports research and teaching on the causes of international conflict and opportunities to promote cooperation through its annual fellowship and grant cycle. IGCC's development office provides an additional resource for UC aculty seeking foundation funding for their projects. IGCC also serves as a liaison between the academic and policy communities through its Washington, D.C. office, located in the UC Washington Center (UCDC). The Washington, D.C. office administers

a graduate internship program in international affairs and the IGCC Dissertation/Foreign Policy Fellow Program. Interns and fellows are placed with governmental and nongovernmental organizations involved in international policy. The Washington office also sponsors policy seminars to showcase UC faculty research results and to provide opportunities for interaction between professors and policymakers.

IGCC's annual **NEWSWired** provides an overview of the previous year's research, funding, awards, projects, meetings, workshops, colloquia, news, and publications. **POLICYPacks** provide concise summaries of IGCC research programs for the policy community. A new annual journal, **IGCCReview**, will feature articles addressing the

policy implications of IGCC research conducted by senior UC faculty.

IGCC receives primary support from the regents of the University of California. Additional funding has been provided by the U.S. Departments of Energy, State, and Defense, the U.S. Institute of Peace, the National Science Foundation, the Japan-U.S. Friendship Commission, and Japan's National Institute for Research Advancement (NIRA). IGCC has also received important support from foundations such as the Japan Foundation Center for Global Partnership (CGP), the Carnegie Corporation of New York, The John D. and Catherine T. MacArthur Foundation, the William and Flora Hewlett Foundation, the Markle Foundation, the Smith Richardson Foundation, and the Rockefeller Foundation.

For more information about IGCC and its research programs, including full-text publications and downloadable **POLICYPacks**, visit the IGCC Web site at <http://www-igcc.ucsd.edu>. IGCC publications can also be downloaded from the California Digital Library's E-Scholarship Repository at <http://repositories.cdlib.org>.

The **White Mountain Research Station (WMRS)** was established as a UC multicampus research unit in 1950 to support high-altitude research. The station includes four laboratory facilities located over a 3,000m (10,000 vertical ft.) altitude transect, ranging from the floor of the Owens Valley to White Mountain at over 14,000 feet above sea level. Located on the western edge of the Great Basin, WMRS also provides access to three major biogeographic regions (Sierra Nevada and White/Inyo montane, Mojave desert, and Great Basin desert), and geologically rich and diverse field sites. WMRS has evolved into a major multidisciplinary research and teaching institution in eastern California, and hosts programs in archaeology and anthropology, atmospheric and space sciences, biological and medical sciences, ecology, conservation and natural resource management, geological, hydrological, and earth sciences.

WMRS facilities include: (1) Owens Valley Laboratories with classrooms, offices, dormitories, and food services for up to seventy people outside the Sierra resort town of Bishop, (2) a newly renovated lodge, cabins, classrooms, and laboratories for fifty people in the Bristlecone pine forest at Crooked Creek (3,094m altitude) (3) the Nello Pace Laboratory and Mount Barcroft facilities (3,801m altitude), which can house thirty-five peoples, and (4) the 450-square-foot Summit Laboratory on

White Mountain peak (4,342m altitude), making it the highest research lab in North America.

All of the laboratories are linked by a high-speed wireless internet connection providing instant access between campus-based laboratories and remote-sensing projects in the field. The Owens Valley Laboratory includes a modern molecular biology and genetics laboratory used to study adaptations to the environment and management of the majestic—but endangered—Bighorn sheep. A geographic information system (GIS) laboratory that houses the USGS-funded "Eastern Sierra Geospatial Data Clearinghouse" is used by scientists and government agencies for natural resource research and policy decisions. WMRS also hosts a Center for Astrophysics and Cosmology at Barcroft and "The Deepest Valley Interagency Plant Propagation Center."

WMRS hosts more than 3,000 users from over 100 institutions per year for research, teaching, and conferences. Research occurs year-round with access to the high-altitude labs at Barcroft via snowmobile. Summer is the busiest time at WMRS, with undergraduate internships, graduate students supported by WMRS Fellowships in residence, plus students and faculty from other universities around the world. Educational uses include several geology field courses and a NSF-funded Research Experience for Undergraduates program. WMRS sponsors professional and post-graduate training courses, annual professional society meetings, a community lecture series, an annual Open House at Barcroft in August, and offers published proceedings from symposia on the environmental science in the region.

Campuswide Institutes

The AIDS Research Institute
<http://ari.ucsd.edu>

Established in 1996 and formally opened in 1997, the AIDS Research Institute (ARI) serves as the conduit for the UCSD Programs in HIV Infection and AIDS, in which AIDS researchers in all university departments and our associated institutions can collaborate on research, with the objective of developing new approaches to the prevention, diagnosis, and the treatment of HIV/AIDS.

UCSD faculty have made major advances in our understanding of how the virus works, how it causes disease, how to treat HIV infection and

its complications, and the impact of HIV infection on nationwide health and healthcare costs. In addition to the 104 faculty members from 19 departments, the UCSD Program in HIV Infection and AIDS is internationally recognized for its contributions to science and patient care, and is ranked among the top ten AIDS programs in the country.

ARI programs include:

- The Center for AIDS Research (CFAR)
- The Adult AIDS Clinical Trials Group (AACTG)
- The Pediatric AIDS Clinical Trials Group (PACTG)
- The California NeuroAIDS Tissue Network (CNTN)
- The Study of the Ocular Complications of AIDS (SOCA)
- The Acute Infection and Early Disease Research Program (AIEDRP)
- The California Collaborative Treatment Group (CCTG)
- The HIV Neurobehavioral Research Center (HNRC)
- The Southern California Primary Infection Program
- The HIV Costs and Services Utilization Study (HCSUS)
- The VA Quality Enhancement Research Initiative for HIV (QUERI-HIV)
- The San Diego AIDS Education and Training Center (AETC)
- The Owen Clinic, providing primary health care services
- The Antiviral Research Center (AVRC)
- The UCSD Mother, Child, and Adolescent Program

The institute sponsors seminars and workshops as well as offering developmental grants to new investigators in the area of human immunodeficiency virus (HIV) and acquired immune deficiency syndrome (AIDS) related research.

Together with research and development the ARI is fully committed to serve as a community resource for information and assistance regarding infection, treatment, and education in HIV and AIDS. We are here to serve as the regional resource for all aspects pertaining to HIV and AIDS and, as a leader in research and education, to treat the infected and prevent the uninfected from becoming infected.

The **California Institute for Telecommunications and Information Technology (Calit2)** (<http://www.calit2.net>), an organized research unit, conducts research on the future of telecom-

munications and information technology and how these technologies will transform a range of applications important to the economy and citizens' quality of life. These application areas include: environment and civil infrastructure, intelligent transportation, digitally enabled genomic medicine, new media arts, and disaster response.

Calit2, a partnership between UCSD and UCI, is one of four institutes established in December 2000 through the California Institutes for Science and Innovation (Cal ISI) initiative. It is funded by a state capital grant, federal research grants, industry, and foundations.

Calit2 unites faculty, students, and industrial and community partners into multidisciplinary teams with expertise drawn from two dozen academic departments at both campuses. These teams integrate individuals' deep expertise to enable larger-scale studies than those typically led by single investigators.

Emerging technologies are prototyped in the context of Calit2 "living laboratories," pushing traditional research one step beyond scholarly publication to building and testing integrated systems under real-world conditions on and beyond the two participating campuses. Research professionals at leading California telecommunications, computer, software, and applications companies are active partners in the more than 50 projects supported by Calit2.

The institute's goal is to develop technology approaches that will benefit society and spur the state's economic development, building on the explosive growth in bandwidth and connectivity provided by the wired and unwired Internet.

Two new facilities constructed at UCSD and UCI feature unique capabilities, shared resources, extreme bandwidth, and reconfigurable space.

The 215,000-square-foot facility at UCSD, completed in the summer of 2005, is home to a wide range of projects at the intersection of science, engineering, and the arts. The building is a physical manifestation of this multidisciplinary research agenda: It includes clean rooms for nanofabrication, digital theatres in a range of sizes and capabilities to support new media arts and scientific visualization, test and measurement labs for circuit design, smart spaces for experiments in augmented reality, transmission and networking testbeds for wireless and optical communications experiments, and labs for designing systems on a chip. The building juxta-

poses people and programs in uncommon proximity to maximize the potential benefit arising from experts in different disciplines working together.

A 120,000-square-foot building dedicated at UCI in November 2004 is equipped throughout with high-speed wireless Internet access, a Voice-over-IP phone system, and customized *ad-hoc* in-house networks. In addition, in a collaborative effort with the U.S. Geological Survey, the facility employs more than 40 seismic sensors to measure ground and building motion with the same system. The facility also boasts a 3,700-square-foot clean room, a large-scale visualization laboratory, and labs for network research, optical devices, nanotechnology measurement, and media arts.

Calit2 has developed research and education partnerships with academic and industrial leaders in telecommunications and information technology across the nation and around the world, including Europe, North and South America, the Pacific Rim, and Southeast Asia. Calit2 is helping prepare students for the global workplace of the twenty-first century by supporting summer internships with researchers in Australia, Japan, Taiwan, China, and Thailand, and recently signed an e-learning collaborative agreement with India.

Calit2 has also established a global dedicated optical network with partners in the U.S., Netherlands, Japan, and Korea, which allows real-time collaboration between faculty and students in multiple research laboratories.

Through Calit2, students complement their course work by working on large-scale, multidisciplinary, team-oriented projects that conduct research, establish prototype technologies, and test those technologies in the field. The experience they gain makes them especially valuable to potential employers, including Calit2 industrial and community partners.

The **Institute for International, Comparative, and Area Studies (IICAS)** was created in 2001 to promote research on international, comparative, and cross-regional topics. Building on the substantial existing strengths of UCSD in international studies, IICAS coordinates and supports the research of faculty in departments, area studies programs, and the Graduate School of International Relations and Pacific Studies. It is closely associated with undergraduate and graduate education in international studies, including Eleanor Roosevelt College and the

international studies major, whose program offices are housed within the institute.

IICAS has three principal initial roles. First, it serves as a research catalyst, fostering and incubating interdisciplinary and cross-area research groups and projects. Activities have included the launch of a European Studies initiative, a faculty research project on states at risk, and a multiyear, interdisciplinary research workshop examining the empire-to-nation transition. Second, IICAS coordinates and provides services for existing and new international and area studies programs in development and events planning and coordination. It also encourages new programs in international and area studies. In this role, IICAS has co-sponsored campus-wide panels and seminars that address critical international issues. Third, the IICAS director and advisory committee advise the senior vice chancellor for academic affairs on campus priorities and appointments in international studies. IICAS' Office of International Academic Exchange and Protocol (IAEP) also provides campus-wide services in support of UCSD's international contacts, including international visitors, requests for affiliation agreements, and collaborative international research projects.

The **UCSD Institute of Molecular Medicine (IMM)**. Our mission is: *Integration of Molecules and Medicine*—to create an Olympic village for translational medicine in the San Diego biomedical community, *Innovation at Disease Interfaces*—to lead in the cross-fertilization between diverse human diseases and disciplines, *Interdisciplinary Training* to mentor many of the highest caliber physician-scientists from the United States and abroad, and *International Programs* to offer global outreach to Europe and Asia through innovative collaborations and partnerships. IMM is designed to provide a unique research and training atmosphere for undergraduate students, medical students, graduate students, Ph.D. students, M.D. fellows, and M.D./Ph.D. fellows with a scientific focus on molecular medicine in the post-genome era. The Institute of Molecular Medicine was established in June 2000 as an organized research unit at UCSD, and has been designed as a Center Without Walls to encourage interactive, interdisciplinary, educational, and research opportunities in the growing field of molecular medicine. The faculty members of this institute are committed to creating and maintaining a collaborative environment that will ensure the rapid development of novel, biologically targeted therapies to enhance

the lives of the patients of tomorrow. The institute is now in its second phase of development, and the program is being reassessed and expanded. The institute is composed of IMM Affinity Groups that bring together basic scientists, physician scientists, and clinical researchers around specific topics relevant to translational medicine. Some of the affinity groups either already constituted or in the planning stage include: Stem Cell Biology and Medicine, which includes four subgroups—neurosciences, cardiac, vascular biology, and technology; Extreme Oxygen Group; Robotics and Simulation in Surgery; Cardiac Bioengineering; and Inflammation.

The Institute of Molecular Medicine is based on the vision that a new era in human health and drug discovery lies at the borders between curiosity-driven science and tomorrow's medical therapies.

The **Institute for Neural Computation (INC)** The institute's research projects are directed at understanding the modes of functioning of nervous systems through direct observation, experimental investigation, and modeling of neural structures; uncovering cognitive principles through psychological experimentation and parallel distributed-processing models; applying neural computation to the solution of major technological and scientific problems; and ultimately building a new generation of massively parallel computers based on the principles of neural computation.

The central premise of the INC is that these diverse research efforts cannot be adequately achieved independently; instead significant progress will come through the joint efforts of researchers in the relevant disciplines, including neuroscience, philosophy, psychology, cognitive science, physics, mathematics, economics, electrical and computer engineering, computer science and engineering, radiology, and linguistics.

Faculty from the UCSD Departments of Biology, Computer Science and Engineering, Cognitive Science, Economics, Philosophy, Neurosciences, and Radiology, and the Salk Institute for Biological Studies are actively involved in the institute's activities. The institute has a training program in cognitive neuroscience, an active visitors program and an industrial affiliates program with ongoing joint research projects. The institute sponsors a seminar series, the annual Rockwood Memorial Lecture, and several scientific workshops and conferences annually.

The goal of the Swartz Center for Computational Neuroscience, an off-campus lab of the INC, is to observe and model how functional activities in multiple brain areas interact dynamically to support human awareness, interaction, and creativity. Research in the center involves development of computational methods and software, experimental methods and equipment; collection and analysis of human cognitive experiments; and collaborations to analyze data collected by other groups in such experiments.

The Machine Perception Laboratory, another activity of the INC, seeks to gain insights into how the brain works by developing embodied systems that solve problems similar to those encountered by the brain. The lab focuses on systems that perceive and interact with humans in real time using natural communication channels (e.g., visual, auditory, and tactile information). To this effect lab personnel are developing perceptual primitives to detect and track human faces and to recognize facial expressions. Developing such systems requires a multidisciplinary approach that combines mathematical modeling, machine learning techniques, computational modeling of brain function, and behavioral experiments. Applications include personal robots, automatic tutoring systems, and automatic assessment of affective disorders.

Other projects include research on human movement disorders, automatic speech recognition, autism, social cognition, how sensory information is represented in the cerebral cortex, how memory representations are formed and consolidated during sleep, and how visuomotor transformations are adaptively organized.

The **Institute for Nonlinear Science (INLS)** promotes interdisciplinary research and graduate education in the development and application of contemporary methods in the study of nonlinear dynamical systems. Using a common mathematical language, faculty and students from disciplines as diverse as physics, mathematics, oceanography, biology and neuroscience, mechanical and electrical engineering, and economics pursue the implications of generic characteristics of nonlinear problems for their subjects. Each year the institute sponsors several long- and short-term senior visitors from the University of California and elsewhere and provides, through funds from external funding agencies, support for approximately ten graduate students to work on Ph.D. dissertations concerned with nonlinear problems. Also associated with INLS are approximately

twenty full-time research scientists and postdoctoral researchers.

The core of INLS activities is composed of (1) joint research among faculty and students across disciplinary lines and (2) lecture series and working seminars designed to convey recent research progress and to stimulate new investigations. Through contracts with external agencies the INLS supports experimental, numerical, and theoretical studies of nonlinear dynamics and chaos in neurophysiology, investigations in nonlinear fluid dynamics and pattern formation, studies (jointly with the University of California, Los Angeles and Stanford University) of applications of chaos in communications, as well as in the nonlinear dynamics of granular materials.

INLS has developed joint research programs with universities, research institutes, and commercial companies in areas of common interest. It actively works with colleagues at UCLA, Stanford, Cal Tech, Argonne National Laboratory, ST Microelectronics, Time Domain Inc., and Randle Corporation. These affiliations provide new research horizons and realistic opportunities for technology transfer.

Institute for Pure and Applied Physical Sciences (IPAPS) is an interdisciplinary research unit which brings together faculty and researchers in physics, chemistry, engineering, and Scripps Institution of Oceanography. The institute is concerned with fluids and materials. Specific subjects of research include superconductivity, ferromagnetism, semiconductor heterostructures, solid surfaces, plasma physics, hydromagnetics, turbulence, fluid mechanics, laser physics, and numerical analysis.

Within the IPAPS is the Center for Interface and Materials Science (CIMS), which emphasizes interdisciplinary collaborative research on the properties of surfaces, thin-layered composites, and novel materials, as well as their technological applications. With centralized space and equipment, CIMS brings together faculty and research staff from the Departments of Physics, Applied Mechanics and Engineering Sciences, Chemistry and Biochemistry, Electrical and Computer Engineering, and the Scripps Institution of Oceanography.

The **Kavli Institute for Brain and Mind (KIBM)** is a virtual environment unhampered by disciplinary boundaries, providing scientists with opportunities for effective interdisciplinary integration of research and knowledge. KIBM will transcend traditional disciplinary barriers to fos-

ter new discourse among scientists, accelerating discoveries about the connections between mechanism and behavior.

KIBM's mission is to support research that furthers our understanding of the origins, evolution, and mechanisms of human cognition, from the brain's physical and biochemical machinery to the experiences and behaviors called the mind. KIBM leverages UCSD's preeminence in such fields as neuroscience, biology, cognitive science, psychology, and medicine, along with the extensive resources of the broader La Jolla scientific community, to extend its position as the pacesetter in brain-mind research and education, and as a vibrant hub for dissemination of its discoveries to advance science and benefit humankind.

To achieve its mission, KIBM provides funding for innovative research to focus on ideas that bridge different levels of organization of brain and mind, and for distinguished scientists to visit San Diego to broaden our interdisciplinary research on brain-mind issues.

Faculty from UCSD's Departments of Neurobiology, Cognitive Science, Neuropharmacology, Neuroscience, Philosophy, Psychiatry, Psychology, and Radiology; and scientists from the Salk Institute for Biological Studies, the Neurosciences Institute, and The Scripps Research Institute participate in KIBM research, lectures, and workshops.

The **Sam and Rose Stein Institute for Research on Aging (SIRA)** is an ORU committed to the development of the latest advances in biomedical and behavioral science knowledge, and their application to issues of successful (healthy) aging and the prevention and reduction of the burden of disability and disease in late life. Established in 1983 as the first ORU on aging within the University of California system, the unit consists of more than 120 faculty members with outstanding track records in research and encompassing a wide range of expertise. These faculty members represent multiple departments within the UCSD School of Medicine, ranging from bioengineering and family and preventive medicine to neurosciences and psychiatry. Over the past two decades, the SIRA has made major contributions to research, research training, and dissemination of information to the San Diego, national, and international community in geriatrics and gerontology. It has funded more than 75 pilot grants for junior faculty during critical stages of their careers, and funded more than 100 undergraduate and medical students interested in

aging research. In 2005, the SIRA was awarded a grant from the National Institute on Aging (NIA) to conduct summer research training of medical students from around the country, with a focus on healthy aging. In this program, students are paired with experienced scientists from UCSD and provided an opportunity to conduct hands-on research by pursuing basic science, clinical, or health services projects. In addition, the SIRA has also recently targeted its pilot grant awards to junior faculty pursuing research projects pertaining to successful aging. Along with its Web site (<http://sira.ucsd.edu>), the SIRA publishes a monthly newsletter, *Healthwise*, which is distributed to more than 2,000 individuals and organizations. The monthly SIRA Public Lecture Series has resulted in over 250 public lectures provided by SIRA faculty on topics of interest to the general public, with the lectures also broadcast on UCSD-TV. The SIRA Grand Rounds and Geriatric Journal Club further enhance the multiple venues provided to educate professionals and the general public on age-related topics. Under the leadership of Dilip Jeste, M.D., director of the SIRA since 2003, the SIRA has launched comprehensive, longitudinal, bio-psycho-social studies of successful (or healthy) aging. Scientists at the SIRA believe that studying health and well-being and how and why people age without significant mental, physical, or social impairment should be at least as important as studying why people become ill. In the coming years, the SIRA will strive to become a national and international resource on successful aging and impact people's ability to age well. For more information, contact us at 858-534-6299 or steininstitute@ucsd.edu or visit our Web site at <http://sira.ucsd.edu>.

Whitaker Institute of Biomedical Engineering (WIBE). In November 1991, UCSD established the Institute for Biomedical Engineering (IBME) as an ORU.

The goal of the institute is to foster research at the interfaces of engineering, biology, and medicine by promoting and coordinating interdisciplinary interactions among faculty and students.

Dr. Shu Chien, university professor of bioengineering and medicine, has served as the director since its inception. Starting with thirty members, the institute now has over one hundred faculty and research scientists from the Schools of Engineering, Medicine, Natural Sciences, and Biological Sciences, and the Scripps Institution of

Oceanography (SIO), as well as members of neighboring institutions, including the Burnham Institute, the Salk Institute for Biological Sciences, and The Scripps Research Institute.

As of July 1, 1999, with approval of the Governing Board of the Whitaker Foundation and the University of California, the name of the institute was changed to the Whitaker Institute of Biomedical Engineering (WIBE).

The WIBE facilitates academia-industry cooperation. We hold regular research seminars, workshops, and symposia to promote information exchange, generate new ideas and projects, and foster interdisciplinary training of graduate students and postdoctoral fellows.

From 1991 to 1997, the WIBE was located in the Engineering Building Unit 1 (EBU1). With the completion of the Science and Engineering Research Facility (SERF) in 1997, the WIBE and its core facilities, such as the confocal microscope, computer and imaging, and flow cytometry facilities, now reside in the SERF building. Since 2003, WIBE has also established facilities for atomic force microscopy and fluorescence resonance energy transfer in the newly completed Powell-Focht Bioengineering Hall.

The WIBE identified "tissue-engineering science" as the first major research thrust, using the principles and methods of engineering and life sciences for the understanding of structure-function relationships in normal and pathological tissues and the development of biological substitutes to restore, maintain, or improve tissue functions. The major areas of tissue engineering science pursued in WIBE involve the heart, blood vessels, blood, lung, kidney, liver, pancreas, muscle, bone, cartilage, tendon, ligament, skin, nerve, brain, retina, and cochlea.

The WIBE enhances research in molecular and cellular bioengineering, molecular biomechanics, and targeted molecular delivery based on engineering principles. The current overarching theme is integrative bioengineering, spanning the spectrum from molecular to organismal levels and integrating engineering and biomedical sciences.

WIBE research and training activities focus on cancer, diabetes, myocardial infarction, hypertension, atherosclerosis, peripheral vascular diseases, hemolytic anemias, pulmonary diseases, renal diseases, hepatobiliary diseases, inflammation, AIDS, burns, trauma, shock, retinopathies, tympanic membrane perforation, orthopedic disorders, and sports injuries. Coordinated engi-

neering and biomedical research allows generation of quantitative information and novel investigative approaches. The goal is to improve the methods of prevention, diagnosis, and treatment of diseases.

Research activities at the WIBE are coupled with educational programs in the Department of Bioengineering. The Bioengineering Program was established in 1966 as a joint venture between the School of Medicine (SOM) and the Department of Applied Mechanics and Engineering Sciences (AMES). In July 1994, the program evolved into a Department of Bioengineering, the first established by the University of California system among its ten campuses. The Department of Bioengineering is one of five departments in the Jacobs School of Engineering (JSOE) and an affiliated department in the SOM.

Undergraduate student enrollment increased from less than 100 prior to 1987 to 950 today. There are 150 graduate students, about 100 studying for Ph.D. and 50 for M.S. and M.Eng. degrees. Bioengineering graduate students win awards and fellowships at the national level. The Bioengineering Graduate Student Group holds a series of annual graduate bioengineering symposia, for which they are solely responsible, as well as the annual breakfast with industry, and other industry-liaison activities. Graduate students benefit in their interdisciplinary training by having joint advisers from different fields.

UCSD has other graduate educational programs related to biomedical engineering in JSOE, SOM, Biological Sciences and Natural Science. M.D./Ph.D. training at UCSD is administered by the Medical Scientist Training Program in SOM, with active participation of bioengineering faculty and graduate students.

The Biomedical Engineering Program has approximately 30 postgraduate fellows. Many receive joint training between bioengineering and other departments to pursue research related to biomedical engineering. These young scientists make important contributions to the academic environment at UCSD.

The Project on Glucose Monitoring and Control is a unit within the WIBE. Its goal is to develop and evaluate new approaches, both natural and engineered, to achieve ideal blood glucose control and metabolic management in diabetes and related diseases. The project brings together researchers and clinicians from bioengineering, electrical engineering, computer science, and medicine, as well as extramural collaborators.

The project serves as a nucleus for information exchange, development of new sensor and medication delivery approaches, and development and evaluation of diabetes control strategies.

The Bioengineering Programs in the ten campuses in the University of California (UC) system have formed a Multi-campus Research Unit (MRU) to foster collaborations in research and education. The WIBE is the unit participating in this MRU on behalf of UCSD. In August 2004, the MRU was officially approved by the UC Office of the President as the Bioengineering Institute of California (BIC), with its headquarters at UCSD and Dr. Shu Chien as the director. BIC has held an annual UC system-wide Bioengineering Symposium and sponsored the collaborative implementation of Web-based teaching materials on various subjects in bioengineering. <http://wibe.ucsd.edu/>

Centers

The Rebecca and John Moores UCSD Cancer Center (CC), active in the fight against cancer since 1979, is a National Cancer Institute-designated Comprehensive Cancer Center. The specific goals of the Cancer Center are to enhance the present level of basic research, increase collaborative research, increase the application of basic science to solve clinical problems through translational research, disseminate new knowledge to oncology professionals and scientists in the San Diego community, enable the biomedical industry to transfer new technology to the clinical setting, develop a strong effort in cancer prevention and control, and educate and train undergraduate and postgraduate physicians, and basic scientists. Under the auspices of a Cancer Center Support Grant from the National Cancer Institute, there are seven active program areas within the Cancer Center. These include Cancer Biology, Cancer Genetics, Cancer Prevention and Control, Cancer Pharmacology, Cancer Symptom Control, Translational Oncology, and Viral Malignancy. Shared resources at the Cancer Center include Biostatistics, Clinical Trials, Data Compilation and Analysis, Digital Imaging, DNA Sequencing, Flow Cytometry, Histology and Immunohistochemistry, Microarray, Molecular Pathology, Nutrition, Radiation Medicine, and Transgenic Mouse.

Research and educational grants support the training of postdoctoral fellows and medical students. The Clinical Trials Office coordinates clini-

cal research trials involving cancer patients at UCSD and is the focal point for a large Oncology Outreach Network which provides state-of-the-art protocol treatment opportunities for patients in a broad geographic area. Patient care activities of the Cancer Center are located in the Combined Oncology Clinic at the Theodore Gildred Facility and in UCSD Medical Center, both located in Hillcrest, and at the Oncology Clinic of the Perlman Ambulatory Care Center and in UCSD Thornton Hospital, both located in La Jolla. Basic research activities of the Cancer Center are carried out at a variety of other locations on or adjacent to the La Jolla campus. Total membership of the Cancer Center exceeds 260 laboratory investigators and clinical physicians from twenty-two academic departments. The research funding for Cancer Center members exceeds \$180 million. Construction is currently underway on the university's east campus to erect a five-story, 270,000-square-foot building to unite many of the center's essential programs and services; it is scheduled for completion in early 2005.

The **Center for Astrophysics and Space Sciences (CASS)** is an interdisciplinary research unit established in 1979. The center brings together academic and research staff from the Departments of Physics, Chemistry, and Electrical and Computer Engineering. Research is conducted in the scientific areas of theoretical cosmology, computational astrophysics, observational cosmology, interstellar medium, star formation; solar observational and theoretical studies; X-ray and gamma-ray astrophysics; experimental and theoretical magnetospheric and space plasma physics; and cosmochemistry, including the chemistry of interstellar matter.

CASS provides a jointly shared facility which has office, laboratory, and computer space to enhance the interchange of expertise. Researchers in CASS have access to many University of California observing facilities, including the 2 Keck 10m telescopes, Lick Observatories, and Keck Telescopes, and have contributed experiments to many major NASA space missions including the Hubble Space Telescope and the Rossi X-Ray Timing Explorer. Associated with CASS are included seventeen faculty, about twenty-five Ph.D.-level research staff, twelve graduate students, and thirty technical and administrative support personnel.

The center's facilities, faculty, and research staff are available to graduate students in the Departments of Physics, Electrical and Computer Engine-

ering, and Chemistry who have chosen to write their dissertation on subjects of research encompassed by CASS. Graduate and undergraduate courses in astrophysics, astronomy, and space sciences are developed and taught by the academic staff of CASS. The total yearly budget is about \$5 million, mostly from federal funding sources.

The **Center for Comparative Immigration Studies (CCIS)** is an interdisciplinary, multinational research and training program devoted to comparative work on international migration and refugee movements. Its primary missions are to conduct comparative (especially cross-national) and policy-oriented research, train academic researchers, students, and practitioners, and disseminate research conducted under its auspices to academics, policymakers, and NGOs through research seminars, conferences, publications, the Internet, and the mass media. CCIS seeks to illuminate the U.S. immigration experience through systematic comparison with other countries of immigration, particularly in Europe and the Asia-Pacific region.

The Center promotes research in the following areas: (1) the causes, dynamics, and consequences (economic, political, and sociocultural) of international migration, including low-skilled and high-skilled migrant workers and refugees; (2) the determinants and outcomes of laws and policies to regulate immigration and refugee flows; (3) transnational relationships (economic, political, cultural, ethnic) between immigrant sending and receiving countries; (4) the impact of international migration on citizenship, national identity, and ethnic relations; (5) immigrant rights, advocacy, and social services; (6) immigrant political mobilization and participation; (7) the socioeconomic, political, and cultural interactions of immigrants with native-born residents of receiving countries.

CCIS hosts visiting predoctoral and postdoctoral research fellows, and conducts an annual field research project on Mexican migration to the United States. The Center's Forced Migration Laboratory conducts research in San Diego's refugee communities originating in sub-Saharan Africa, the Middle East, Central America, and Southeast Asia. The laboratory promotes interaction between academic specialists in refugee studies and practitioners, aimed at identifying and disseminating best practices for refugee resettlement. The center has an active publications program consisting of monographs, anthologies, and working papers. Funding is

provided by the University of California, private foundations, and international agencies.

A number of graduate research assistantships are available. Applications for graduate study in any of the disciplines covered by CCIS should be directed to the academic department in which graduate study is to be undertaken.

The overall objective of the **Center for Energy Research (CER)** is to provide an academic research unit for interdisciplinary interactions among UCSD faculty, research staff, and students aimed at promoting and coordinating energy research and education. Approximately sixty-one faculty, staff, and students are affiliated with the CER. The goals of the CER are complementary to academic departments of instruction and research with an emphasis on bridging the various disciplines related to energy research on the campus. Emphasis is currently on combustion and fusion energy research. The CER will also provide a vehicle for developing other dimensions of energy research, including energy policy research. The specific goals of the CER are: (1) to provide an inter-departmental coordinating function for energy research groups and projects at UCSD, (2) to enhance the prospects of extramural research funding involving interdepartmental and multi-disciplinary collaborations in energy research, (3) to promote the visibility of energy topics in undergraduate and graduate programs at UCSD, (4) to provide a mechanism for interacting with other institutions involved in energy research with particular attention to potential industrial partners, and (5) to promote the visibility of energy research at UCSD to potential sponsors and funding agencies.

A number of graduate research assistantships are available. Applications for graduate study in any of the disciplines covered by the CER should be directed to the academic department in which graduate study is to be undertaken.

The **Center for Environmental Research and Training (CERT)** coordinates the broad range of environmental research activities across the university. Departmental participation includes the Departments of Anthropology, Chemistry and Biochemistry, Economics, Division of Biological Sciences, School of Engineering, School of Medicine, Scripps Institution of Oceanography, the Center for U.S.-Mexican Studies, and the Graduate School of International Relations and Pacific Studies. This extensive group offers an opportunity to address environmental issues across traditional disciplinary boundaries. This

opportunity is particularly crucial for understanding the complex interactive nature of global and regional environmental issues. The CERT also provides an interface for interaction with environmental agencies outside the university, including the environmental technology sector and governmental agencies.

The **Center for Human Development (CHD)** is an interdisciplinary, research-centered unit designed to meet the growing needs for interdisciplinary exchange on issues related to human development. The goal of CHD is to provide a forum for interdisciplinary exchange that creates dialogue between members of diverse disciplines. The Center is organized around five structurally distinct components, but with integrated functions. Each function is designed to serve a specific set of needs and to make unique contributions to the larger enterprise. These components are the following: (1) research support and infrastructure, (2) enrichment of human development's instructional counterparts—the undergraduate Human Development Program and a proposed interdisciplinary graduate program, (3) dissemination activities focused on but not limited to local community needs, (4) public policy analysis, and (5) assessment activities. In addition, the Center serves as a focal point for research, evaluation, and assessment activities associated with the campuswide Center for Research in Educational Equity, Assessment, and Teaching Excellence (CREATE).

The **Center for Human Information Processing (CHIP)** is a research facility for the study of the neural and cognitive mechanisms underlying human perception, thought, and emotion.

CHIP has two missions—a practical one and a theoretical one. The practical goal is to help develop new therapeutic approaches for the treatment of neurological and psychiatric patients (e.g., stroke and childhood autism). The theoretical agenda is to understand the neural basis of human behavior—the question of how the activities of millions of tiny wisps of protoplasm in the brain gives rise to all the richness of our conscious experience and the complexity of our cognitive processes.

It is ironic that even though we now have a vast amount of factual information about the brain, even the most basic questions about the human mind remain unanswered. How does the human brain create and respond to art? Why do we enjoy music? How are metaphors represented

in the brain? What is "body image" and why does it get distorted in Anorexia nervosa? How did language evolve? Or even more basic questions such as: How do we see color? Can we pay attention to only one thing at a time? How do we recognize faces so effortlessly?

CHIP has become well known for tackling questions such as these experimentally. CHIP has played a major role in the emergence of such new disciplines as "neuro-ethics," "neurotheology," "neuroeconomics," "neuro-aesthetics," and "neuro-epistemology."

CHIP has four divisions, each operating with the common goal of furthering our understanding of human cognitive processes and the neurological bases of these processes. The subdivisions are: brain and perception division, the cognitive processes division, the division of neuropharmacology and alternative medicine, and the language processing division.

CHIP provides facilities for visiting scholars and supports workshops, conferences, and brown-bag discussion groups centering on the theoretical and empirical issues in each of these areas.

The **Laboratory of Comparative Human Cognition (LCHC)**: Each member of LCHC pursues forms of critical empirical research, which aim to understand how human variation can be an asset in understanding human nature in its social and historical contexts. We use a range of methods to throw into relief the contingency of culturally inflected social practices, and the implications of those practices for human development. In keeping with the critical ethos of our orientation, we often use strategies that actively engage us in the settings we investigate. We take an ecological approach, looking at systems that include meditating tools, people, representations, institutions, and activities. We are especially interested in the collective accomplishment of knowledge practices—cognition, learning, play, remembering (and forgetting), teaching, research, and the design of new social practices. Collectively, our research spans all ages. At the same time, because the institutionalization of social practices holds an important place in our studies, specific projects often take the form of educational or workplace research. In both domains, the place of discourses, economics, and technologies in the development of social relations of power, and their implications for change over time, are scrutinized. We find

comparisons across these realms a powerful source of insight and theoretical development. The LCHC published fifteen volumes of *The Quarterly Newsletter of the Laboratory of Comparative Human Cognition*. It now publishes a journal, *Mind, Culture, and Activity: An International Journal*. The LCHC also coordinates an international electronic discussion (<http://communication.ucsd.edu/MCA/Mail/index.html>) that currently includes more than 400 researchers from sixteen countries. The LCHC conducts a weekly seminar and workshops focused on special topics, including cutting-edge research reports from members of an interdisciplinary, international group of LCHC alumni who visit periodically. Our seminars and research seminars are open to all members of the academic community and our community partners.

The **Center for Iberian and Latin American Studies (CILAS)** coordinates and promotes Latin American and Iberian research and service activities for faculty and students in all departments at the university and outreach programs for the San Diego community. It sponsors multi-disciplinary colloquia, conferences, projects and publications, collaborations and exchanges with Latin American institutions, as well as library expansion. The center is currently launching new initiatives in the areas of public health; democracy, civil society, and citizenship; and cultural studies. The center also hosts visiting scholars, and it awards grants and fellowships each year to promising graduate students.

The **Center for Magnetic Recording Research (CMRR)** (<http://cmrr.ucsd.edu>) is an organized research unit whose mission is to advance the science and technology that will serve as the foundation for the information-storage devices, systems, and applications of the future. This mission is achieved in partnership with private foundations, industrial and government sponsors, through the combination of an ambitious research agenda that reflects a shared vision of the participating organizations, and a research-driven program of education and professional training for the future leaders in information-storage technology.

CMRR draws upon the wide range of intellectual interests and resources at UCSD, with participating faculty from departments in the Jacobs School of Engineering, the Division of Physical Sciences, and the Graduate School of International Relations and Pacific Studies, as well as

researchers in the UCSD Materials Science and Engineering Program, the San Diego Supercomputer Center, and the California Institute for Telecommunications and Information Technology (Calit2).

The center supports five endowed professorial chairs. Research programs address fundamental problems in nanoscale storage technology, including recording physics and micromagnetics, nano-patterned magnetic materials and structures, mechanical interfaces and tribology, servo control systems, signal-processing techniques, and error-control coding. Related projects explore storage mechanisms based upon novel nano-structures, optical holography, and spintronic materials. System-level research topics include object-based storage paradigms, "intelligent" storage devices, and data security.

Graduate and undergraduate student researchers, post-graduate researchers, professional scientists, and visiting scholars representing international academic institutions and industrial laboratories contribute to a research and educational environment that is dynamic and varied.

As part of the center's mission to educate future leaders in the vital information-storage industry, faculty members teach specialized classes at the undergraduate and graduate levels that train students in the theoretical methods and experimental techniques underlying advanced magnetic recording technology. Real-world research opportunities are also available to students through academic-year and summer internships with selected sponsors. In addition, the center contributes to the continuing education of professionals in the storage industry through regular seminars, research reviews, and focused workshops.

CMRR also supports a world-class information center for information-storage technology that provides a range of services to sponsors, resident researchers, and students. These services include licensed database searching, patent searching, document retrieval, and expedited access to proprietary technical resources.

The **Center for Molecular Agriculture (CMA)** promotes research and education in plant genetics and plant molecular biology with an eye to the application of that research to the improvement of crops. Crop improvement cannot any longer rely exclusively on traditional plant breeding methods

but requires the application of new technologies that include but are not limited to genetics and genomics, informatics, molecular gene isolation, and plant transformation. The CMA brings together researchers from UCSD and the Salk Institute and is a resource for the entire San Diego community. It provides a focal point for interaction with the local and statewide agricultural biotechnology industry. The Center wishes to play an active role in the debate about the safe cultivation and use of genetically modified crops.

The **Center for Molecular Genetics (CMG)** promotes molecular genetic research and the training of graduate students and postdoctoral fellows in the biological, chemical, and biomedical sciences. The center's research incorporates studies in both model systems and humans that share a focus on dissecting the molecular basis of human diseases. The latest techniques of gene isolation and manipulation, as well as the genetic transformation of both cells and organisms, are applied to major problems in biology and medicine. The center serves as a resource for the entire UCSD campus for molecular genetic techniques, materials, and facilities. The CMG also is host to seminar series, conferences, and workshops that encourage cross-disciplinary interactions among biomedical and bioinformatic investigators.

The **Center for Networked Systems (CNS)** was formally established as an organized research unit at UCSD in 2005. CNS is pursuing a portfolio of large and small multidisciplinary projects designed to develop key technologies and frameworks for networked systems. Each project attacks a critical technical problem or framework and all contribute to our technical capability to build robust, secure, manageable, and open networked systems. CNS combines its research talents and strengths in partnership with key industrial leaders—achieving the critical mass and relevant focus necessary to accelerate research progress and create key technologies, framework, and systems understanding for robust, secure networked systems and innovative new applications. CNS is focusing its initial efforts in four key research areas:

- **Robustness:** Understanding networked system properties which enable flexible connection (composition) and sharing of networks, grids, and networked system applications while ensuring predictable performance, reliability, quality, and efficiency.

- **System and Application Security:** Technologies and architectures which enable applications and networked systems to be secured or protected against unauthorized use, observation, or denial of service.
- **Manageability:** Technologies and architectures which reduce the effort required to understand, design, operate, use, and administer networked systems.
- **Application/End-User Quality:** Technologies and architectures which provide both capabilities and understanding of application performance and end-user quality of experience, particularly in large-scale and open systems.

The **Center for Research in Biological Structure (CRBS)** is an organized research unit that exists to provide human resources, high-technology equipment, and administrative services to researchers engaged in fundamental research on cell structure and function relationships, particularly those involved in central nervous system processes, cardiovascular networking, and muscular contraction. CRBS scientists investigate these processes through invention, refinement, deployment of sophisticated technologies, especially

- High-powered electron microscopes that reveal three-dimensional cell structures
- State-of-the-art X-ray crystallography and magnetic resonance analysis that provide detail on protein structures at high resolution
- Laser-scanning and Confocal light microscopes that reveal molecules tagged with fluorescent markers as they traffic within cells and pass transfer signals within and between cells
- High performance computing and grid-based integration of distributed data

CRBS facilitates an interdisciplinary infrastructure in which people from biology, medicine, chemistry, and physics can work with those from computer science and information technologies in collaborative research. CRBS researchers share interests in the study of complex biological systems at many scales, from the structures of enzymes, proteins, and the body's chemical communications network at atomic and molecular levels, to an organism's physiology, strength, and support at cellular and tissue levels.

The CRBS infrastructure integrates resources for high-performance computing, visualization

and database technologies, and the grid-integration of large amounts of archival storage data. The California Institute for Telecommunications and Information Technology (Cal-IT²) and the San Diego Supercomputer Center (SDSC) are collaborators in simulating the activity of biological systems, analyzing the results, and organizing the growing storehouse of biological information.

The aims of CRBS researchers are met in interdisciplinary research efforts of major federally funded research efforts that are presently the heart of CRBS:

- BIRN, the Biomedical Informatics Research Network <http://www.nbirn.net> tests new modes of large-scale biomedical science. BIRN builds infrastructure and technologies to enable large-scale biomedical data mining and refinement.
- NCMIR, the National Center for Microscopy Imaging Research <http://www.ncmir.ucsd.edu> specializes in the development of technologies for improving the understanding of biological structure and function relationships spanning the dimensional range from 5nm³ to 50µm³.
- NBCR, the National Biomedical Computation Resource <http://nbcrc.ucsd.edu> conducts, catalyzes, and advances biomedical research by harnessing, developing, and deploying forefront computational, information, and grid technologies.
- JCSG, the Joint Center for Structural Genomics <http://www.jcsg.org> creates new technologies to drive high-throughput structure determination. The Bioinformatics Core at UCSD is responsible for target selection, sample tracking, information management, structure validation and deposition, and poststructural analysis. Through these functions, the group provides the integrated informatics backbone required for the successful operation of JCSG.

CRBS researchers also have significant roles in collaborations with

- PRAGMA, Pacific Rim Applications and Grid Middleware Assembly, <http://www.pragma-grid.net> establishes sustained collaborations and advances the use of grid technologies in applications throughout the Pacific Region to allow data, computing, and other resource sharing.
- Optiputer, <http://www.optiputer.net>, involves the design and development of an infrastruc-

ture to integrate computational, storage and visualization resources over parallel optical networks using lambda switching communication mechanisms.

CRBS is an entity evolving as research evolves. It was established in 1996 to involve researchers from disciplines across UCSD, the School of Medicine, the Salk Institute for Biological Studies, Calit², and SDSC, including bioengineering, biology, chemistry, computer science, mathematics, neurosciences, pharmacology, psychiatry, and physics, and forges interactions with biotechnology and biocomputing companies for technology transfer. Interaction, collaboration, and multiscale research produce new perspectives, reveal fruitful research topics, lead to the development of new technologies and drugs, and train a new generation of researchers in biological systems.

The **Center for Research in Computing and the Arts (CRCA)** is an organized research unit of UCSD whose mission is to facilitate the creation of new forms of art that arise out of the developments of digital technologies. Current focus areas include networked multimedia, virtual reality, computer-spatialized audio, and live performance techniques for computer music and graphics.

As the University of California's oldest arts research center, CRCA pursues innovative approaches to the arts, crossing disciplinary boundaries with the humanities, engineering, and the sciences. Faculty members devise new modes of artistic practice through their liaisons with international cultural institutions, high-tech industries, and interdisciplinary collaborations.

CRCA coordinates the New Media Arts layer of the California Institute for Telecommunications and Information Technologies [Calit²] at UCSD. The center's cultural research activities are considered a model "living laboratory" for Calit² provocatively, and critically, pursuing new cultural forms and social engagements provided by developments in IT and telecommunications.

CRCA provides the support framework for a broad range of approaches to artistic, scholarly, and technological development that is at the basis of our digitally transformed culture. We actively encourage the investigation of what constitutes the potent cultural acts of our time and the viable mechanisms that should be engaged to create them. More information about the center, its researchers, public events, and the process for engagement, can be found at <http://crca.ucsd.edu>.

The **Center for Research in Language (CRL)** emphasizes the combination of theoretical and experimental approaches to language study. The research is interdisciplinary and draws upon the fields of cognitive science, communication, communication disorders, computer science, human development, linguistics, neurosciences, psychology, and radiology.

The center's facilities accommodate laboratory research projects by the faculty and graduate students; facilities include a number of high-performance work stations, a computer laboratory, extensive equipment for audio recording and analysis, and equipment for psycholinguistic experimentation.

Current research projects include studies of language and cognitive development in children; language impairment in children and adults; word and sentence processing in bilinguals; studies of American Sign Language; cross-linguistic studies of language structure; development of neurally inspired parallel processing models of speech perception; first-language acquisition; cross-linguistic comparisons of language acquisition and aphasia; research on the integration of grammatical analyses and theories; a project to collect large-scale text corpora in electronic form; and a study of expectancy generation in sentence processing. The center administers an NIH pre- and postdoctoral training grant, "Language, Communication and the Brain." CRL has also entered into several institutional agreements with research institutions in Europe, Asia, and the Americas, providing for the exchange of personnel and support for projects of mutual interest. An ongoing workshop series presents a broad range of experimental approaches to the study of language. The center publishes a monthly electronic newsletter.

The Project in Cognitive and Neural Development is an activity of CRL. Its purpose is to provide a forum for interdisciplinary research on brain and cognition in human children, including research on the neural bases of language and communication. The studies focus on typically developing children and on children with language impairments, Down syndrome, or autism spectrum disorders. The researchers use a wide range of behavioral and neuroimaging methods to yield new information about the interaction between experience and brain development. The results of these studies have important implications for education and clinical practice. The project brings

together faculty and research staff from the UCSD Departments of Cognitive Science, Human Development, Neuro-sciences, Psychology, and Radiology; the San Diego State University Departments of Psychology and the School of Speech and Hearing Sciences; and the Salk Institute for Biological Studies.

The **Center for U.S.-Mexican Studies (CUSMS)**, established in 1979, is the nation's largest program devoted to the study of Mexico and U.S.-Mexican relations. It supports research in the social sciences and history, graduate student training, publications, and public education activities that address the full range of problems affecting economic and political relations between Mexico and the United States.

Through its visiting researchers program, the center each year sponsors the research of predoctoral and postdoctoral scholars, who spend three to nine months in residence. Typically, people from Mexico receive over half of these awards, which are made through an open, international competition. Other visiting fellows come from Europe, Canada, East Asia, and the rest of Latin America. The center's permanent academic staff also conducts long-term studies of Mexico's competitiveness in the global economy, Mexican financial markets, the impact of remittances on development, political change and the administration of justice in Mexico, environmental problems in Mexico and the U.S.-Mexico borderlands, Mexican immigration to the U.S., and new forms of North American economic integration. The center publishes much of the research conducted under its auspices.

Each summer, the center conducts a seminar in studies of the United States for twenty-three to twenty-five Latin American social scientists and nonacademic professionals.

The center's interdisciplinary Research Seminar on Mexico and U.S.-Mexican Relations, which meets throughout the academic year, features presentations of recent research by scholars from throughout the United States, Mexico, and other countries. In addition, several research workshops on specialized subjects are held each year.

The center has an active public education program, which includes frequent briefings for journalists, public officials, and community groups.

The **Glycobiology Research and Training Center (GRTC)** seeks to facilitate and enhance glycobiology research and training throughout California. Current faculty membership includes

many UCSD faculty from several departments across the School of Medicine, SIO, and the general campus as well as adjunct faculty at nearby institutions. Affiliate members include interested scientists in the La Jolla area as well as faculty from several other UC campuses and some other California institutions of higher learning.

Glycobiology is the study of the structure, biosynthesis, and biology of sugar chains (called oligosaccharides or glycans) that are widely distributed in nature. All cells and many proteins in nature carry a dense and complex array of covalently attached glycans. These are often found on cellular and secreted macromolecules, in an optimal position to modulate or mediate events in cell-cell and cell-matrix interactions that are crucial to the development and function of a complex multicellular organisms. They can also mediate interactions between organisms (e.g., between host and parasite). Simple rapidly turning-over protein-bound glycans are also abundant in the nucleus and cytoplasm, where they appear to serve as regulatory switches. The development of a variety of new technologies for exploring the structures of these glycans has recently opened up this new frontier of molecular biology.

The GRTC (<http://grtc.ucsd.edu>) seeks to foster interactive research in glycobiology by coordinating the availability of state-of-the-art instrumentation and expertise in the structural analysis of glycans through a Glycotechnology Core Resource (glycotech.ucsd.edu), increasing intellectual and collaborative interactions by organizing symposia, joint programs and seminars, coordinating joint applications for extramural support, improving access to relevant informatics, and facilitating the transfer of basic glycobiology research to practical applications. The Center also strongly emphasizes graduate, postgraduate, and medical student education in glycobiology, including contributions by the faculty to core curricula, as well as to elective courses and journal clubs.

The **San Diego Supercomputer Center (SDSC)** has enabled science and engineering discoveries through advances in computational science and high-performance computing for the past two decades. Data is an over-riding theme in SDSC activities. By developing and providing data cyberinfrastructure, the center acts as a strategic resource to science, industry, and academia, offering leadership in the areas of data management, grid computing, bioinformatics,

geoinformatics, and high-performance computing. The mission of SDSC is to extend the reach of the scientific community by providing data-oriented technology resources above and beyond the limits of what is available in the local laboratory, department, and university environment. SDSC is an organized research unit of UCSD with a staff of scientists, software developers, and support personnel, primarily funded by the National Science Foundation (NSF). Two key SDSC projects include the Geoscience Network (GEON) and the Science Environment for Ecological Knowledge (SEEK). GEON weaves together separate informational strands into a unified fabric that enables the discovery of data relationships within and across Earth science disciplines.

SEEK uses SDSC's computational science resources to provide the computational and data-management components of UCSD's strong environmental informatics program. Reflecting the dramatic increase in humankind's ability to change the environment, the study of environmental informatics is increasingly critical to California. SDSC and UCSD are building and supporting a program that spans scales from the molecular level to entire populations, accurately modeling the impact of population on the environment.

In addition, SDSC pursues data management activities such as digital library initiatives, data-system standardization, and opportunities to impact large-scale data mining, analysis, and knowledge synthesis with academic, federal, and commercial partners. SDSC's high-end computing unit is leading a national effort to understand and deploy the most capable computational environments and to make those environments easily accessible and usable by scientific communities—locally, nationally, and globally. SDSC maintains leadership in critical strategic capabilities, including chemistry, parallel applications and performance modeling, scientific visualization, and increasing collaborations with the social sciences.

Researchers involved in SDSC's integrative biosciences area are developing projects to understand how cellular behavior emerges from the molecular level, how tissue behavior emerges from the cellular level, and so on up to the level of the organism. SDSC is collaborating in this area with the UCSD School of Medicine, the Center for Research in Biological Structure, The Scripps Research Institute, the Salk Institute for Biological Studies, and local biotech and pharmaceutical

companies. SDSC also is focusing on large-scale collaborative bioscience projects worldwide using an infrastructure based on high-performance computation and analysis of massive amounts of data.

Major academic researchers around the country use the powerful computing resources at SDSC to make breakthroughs in diverse areas of science—from astronomy and biology to chemistry and particle physics.

SDSC's state-of-the-art computational resources and support include DataStar, a 15.7 teraflops (trillion floating point operations per second) supercomputer with a total shared memory of seven terabytes. DataStar is among the top supercomputers in the world. DataStar is used by researchers in academia and industry to conduct large-scale, data-intensive scientific research applications that involve extremely large data sets or have stressful input/output requirements.

SDSC collaborates with eight partners—including the National Center for Supercomputing Applications at the University of Illinois, Argonne National Laboratory, the Center for Advanced Computing Research at the California Institute of Technology, and the Pittsburgh Supercomputing Center—in the TeraGrid project. This multiyear effort builds and maintains the world's most powerful and comprehensive distributed computational infrastructure for open scientific research. The TeraGrid integrates more than 110 teraflops of computing power through a cross-country network backbone that operates at 40 gigabits per second. The storage facilities at SDSC alone include more than one petabyte of high-speed disk and six petabytes of archival storage capacity, one of the world's largest academic storage installations.

SDSC hosts huge digital collections, including visualizations of earthquake simulations, disaster-recovery records, astronomical images from the 2-Micron All Sky Survey, images from the Art Museum Image Consortium, Chinese text from the Pacific Rim Digital Library Alliance, and tomographic images of the human brain. The data technology is also being used to prototype persistent digital archives for the National Archives and Records Administration and other government agencies with huge data archives.

The Cooperative Association for Internet Data Analysis (CAIDA) at SDSC engages Internet providers, vendors, and users in engineering and technical collaborations to promote a more robust, scalable Internet infrastructure. CAIDA

works with the community to develop and transfer tools and technologies that provide engineering and other insights relating to the operation and evolution of the Internet infrastructure. CAIDA works with providers and researchers to refine Internet traffic metrics, foster shared research environments, and encourage the development and testing of advanced networking technologies.

SDSC's Applied Network Research group is currently conducting two Internet research projects. The first involves the National Laboratory for Applied Network Research (NLNR), an NSF-supported collaboration to provide technical, engineering, and traffic analysis support for NSF's High Performance Connections sites and the nation's high-performance network infrastructure.

The second activity of the Applied Network Research group is the High Performance Wireless Research and Education Network (HPWREN), a collaboration with SIO that created a noncommercial, prototype, high-performance, wide-area wireless network in San Diego County.

Projects

The goal of the **African and African-American Studies Research Project (AAASRP)** is to facilitate faculty, postgraduate, and graduate research in the areas of Africa and African diaspora studies in the social sciences and the humanities, and to foster the comparative, cross-national, and interdisciplinary dimensions of research, with a core group of scholars drawn from several fields in the social sciences and humanities. These research efforts are linked directly to larger local and international community concerns.

The project sponsors visiting scholars, focused research groups, a seminar, and symposia. Faculty from seven university departments are involved. The project oversees the African Studies Minor. The project is also part of the UC Systemwide Consortium of African Studies Programs and the national Association of African Studies Programs. It provides the basis for the establishment of an organized research unit on African and African-American Studies at a later time. For more information, contact the AAASRP office at (858) 822-0265.

The **Project for Explaining the Origin of Humans** is a broad-based multidisciplinary coalition of investigators in the La Jolla area (from

UCSD as well as institutions from the surrounding area and around the world) who are interested in defining and explaining the evolutionary origins of humans and in generating testable hypotheses and new agendas for research regarding this matter. Areas of current interest include primate genetics and evolution, paleoanthropology and hominid origins, mammalian and primate neurosciences, primate biology and medicine, the roles of nature and nurture in language and cognition, human and primate society and culture, comparative primate reproductive biology, geographic, environmental and climatic factors in hominid evolution, as well as general theories for explaining humans. The group includes UCSD faculty from the Departments of Anthropology, Biology, Chemistry and Biochemistry, Cognitive Science, Linguistics, Medicine, Neurosciences, Oceanography, Pathology, and Psychology. A listing of participants can be found at <http://origins.ucsd.edu>.

The **Project in Display Phosphor Research** provides a forum for research on the synthesis, characterization, and processing of phosphors for high definition display applications. The project brings together faculty and researchers from the UCSD Departments of Chemistry and Biochemistry, Mechanical and Aerospace Engineering (MAE), and Electrical and Computer Engineering (ECE). The project was organized in 1992 in order to expand collaboration with other colleagues at UCSD and to extend research efforts to address both near-term and future research issues concerning phosphor materials and advanced displays.

The **Project in Econometric Analysis (PEA)** is concerned with the analysis of economic and financial data and with techniques for modeling relationships between economic variables and testing economic theories. As economic variables have properties not generally found in other fields, standard procedures from mainstream statistics are often not appropriate. The field of econometrics has been developed to deal with these issues. Its importance is indicated by its effect on the methodologies in other social sciences, such as political science and empirical history, and the fact that several Nobel Prize winners in economics have been econometricians. In fact, the 2003 Nobel Prize in economics was awarded to Clive Granger and Robert Engle, two of the founders of the PEA.

The Project in Econometric Analysis (PEA) supports the work of an active group of researchers

and provides opportunities for productive interaction among faculty and students. Areas of active research include financial econometrics, non-linear time series modeling, properties of neural network models, the theory of economic forecasting and various actual applications including evaluations of models and forecasts in finance and economics. The PEA allows links with workers from other universities in this and other countries. In 2000–2001 and 2001–2002 the project had visitors from Europe, Asia, North America, and Australia; some were senior and some were pre- and post-doctoral students. Faculty members and graduate students associated with the project presented their research at workshops and conferences worldwide. In addition, PEA facilitates the submission of grant proposals to outside agencies.

The **Project in Geometry and Physics (PGP)**, established in 1987, provides opportunities for increased collaboration between mathematicians and physicists. The project hosts several scientific meetings each year and also sponsors a number of research seminars with distinguished scientists from inside and outside the UCSD community.

The **Project on International Affairs (PIA)** is one of the international programs within the Institute on International, Comparative, and Area Studies, focusing on economic and political interactions between states. The project serves to promote interdisciplinary research on international politics and international economics; disseminate current research to UCSD faculty and students; provide a multidisciplinary focal point for research and programming; and enhance campus and community understanding of international political and economic affairs.

The **Project on Responsible Conduct of Research Education (RCR Education Project)** was created in 2003 to promote RCR education both at UCSD and nationally. To achieve this goal, the RCR Education Project is facilitating the formation of an independent Responsible Conduct of Research Education Consortium (RCREC). The RCREC will provide leadership to the research community in promoting education in the responsible conduct of research.

The RCR Education Project and the RCREC are intended to be a broad-based coalition, representing medical, social, and behavioral research, and public and private institutions. Through these collaborations, the RCR Education Project will lay the foundations for the RCREC to advance programs of

RCR education, develop RCR education standards, certify or identify programs that meet those standards, facilitate the exchange of RCR education programs among research institutions, and develop outcome measures to evaluate the success of the endeavor. Specific objectives of the RCREC are to: 1) promote RCR education as a central responsibility for any institution involved in research; 2) develop clear definitions for RCR education, including goals, standards, competencies, and methods for evaluating the effectiveness of programs; 3) assist institutions, RCR programs, and investigators in identifying and developing RCR education curricula and resources; 4) facilitate discussion and collaboration among federal agencies, public and private research institutions and organizations, professional societies, and businesses in developing, coordinating, and sharing new and existing RCR educational programs within the research community; and (5) identify and overcome barriers to fulfilling RCR educational needs and requirements.

The **Public Policy Research Project** was established to facilitate interdisciplinary research and educational opportunities in public policy and business-government interaction. Through conferences, focused research groups, and lecture series, the project acts as a catalyst for interaction among economists, political scientists, moral philosophers, historians, cognitive scientists, anthropologists, and sociologists. The project supports programs that: (1) help faculty obtain funding that are engaged in policy-related research, (2) conduct research apprenticeships for doctoral students working on research projects dealing with issues and processes of public policy, and (3) provide technical support and arrange faculty-proposed conferences within the scope of the project's mission statement.

Natural Reserve System (NRS)

The **Natural Reserve System (NRS)** was founded to establish and maintain significant examples of California's diverse ecosystems and terrain. These reserves are used for teaching and research in all disciplines, from geology and environmental sciences to anthropology and art. Faculty and students of the University of California and other institutions are encouraged to use any of the thirty-four reserves in the system

for serious academic pursuits. The San Diego campus administers the following four reserves:

Dawson Los Monos Canyon Reserve: This 218-acre reserve is located in the cities of Carlsbad and Vista in north coastal San Diego County. Its young, stream-cut valley contains a year-round creek with precipitous north- and south-facing slopes. The major habitat types are Southern Riparian Woodland, Diegan Coastal Sage Scrub, Perennial Coastal Stream, Coast Live Oak Woodland, Mixed Grassland of native bunchgrass and introduced annuals, and South Coastal Mixed Chaparral. This area is also of unique and significant historical and archaeological value. A small field station provides opportunities for small laboratory classes, overnight stays, and on-site research.

Elliott Chaparral Reserve: Located ten miles to the east of campus, this 107-acre reserve, adjacent to the large expanse of Marine Corps Air Station Miramar that is undeveloped, features Chamise Chaparral typical of the Southern California coastal plain and a large stand of mature planted eucalyptus. It is readily available during a normal three-hour lab period or for term paper-length field studies as well as for more lengthy projects.

Kendall-Frost Mission Bay Marsh Reserve: This sixteen-acre reserve, together with the city of San Diego's contiguous Northern Wildlife Preserve, constitute the last remaining forty acres of tidal salt marsh on Mission Bay and one of the few such wetlands remaining in Southern California. It is recognized for the habitat it provides for several rare and endangered birds including the light-footed clapper rail, Belding's savannah sparrow, and the California least tern, as well as many resident and migratory shorebirds and waterfowl, and several fish species. An on-site trailer houses limited residential and laboratory facilities, and extensive facilities exist within ten miles on the UCSD main campus and at the Scripps Institution of Oceanography. There are opportunities for studying restoration ecology of upland and tidal habitats.

Scripps Coastal Reserve: This reserve consists of disjunct shoreline and cliff-top (or "knoll") portions. The shoreline part consists of the 67 acre San Diego Marine Life Refuge extending seaward 1,000 feet from the high tide line, and surrounding the Scripps Institution of Oceanography (SIO) Pier. Habitats include sandy beach and submerged plain, to 60 feet below mean

lower low water, seasonally exposed cobble beach, rocky reef, pier pilings, and upper submarine canyon ledges. Habitats of the clifftop knoll and canyons include coastal sage scrub, maritime succulent scrub, southern coastal mixed chaparral, and disturbed grassland. The latter is particularly suitable for ecological restoration experiments. This reserve is enhanced by the availability of the laboratories and facilities of adjacent SIO and the main San Diego campus.

Rady School of Management

Robert S. Sullivan, Ph.D., *Dean*

UCSD's School of Management was established in 2001 and was named the Rady School of Management in January 2004. It matriculated its first M.B.A. degree students in fall 2004 into the FlexMBA, a program for executives and working professionals, and its first full-time M.B.A. students in the fall of 2005. The school is pioneering the education of tomorrow's business leaders through an innovative curriculum led by internationally recognized faculty. The school leverages UCSD's strengths as a preeminent research institution, especially its outstanding programs in science, engineering, medicine, economics, and international relations.

Currently located in Pepper Canyon Hall on the UCSD campus in La Jolla, the Rady School of Management has broken ground on a new facility, which will be located north of Eleanor Roosevelt College. Occupancy is planned for spring 2007.

At steady state, targeted for 2011-12, the school will enroll approximately 1000 students in full-time and part-time M.B.A. programs; 50 Ph.D. students; and 150 undergraduates. Unlike conventional M.B.A. programs, Rady's program targets students from diverse cultural backgrounds who have an understanding and appreciation of the ways science and technology are transforming business and the world.

Degree Programs

The school offers the FlexMBA, an M.B.A. degree program specifically designed for working professionals, and a full-time M.B.A. program.

The school's M.B.A. programs emphasize the business issues faced by innovation-driven organizations, with a particular interest in the science- and technology-driven innovation and change. They provide a thorough grounding in the fundamentals of business and management in a global environment and build on this with a distinctive curriculum focused on the implications of management principles and business realities for organizations driven by science, technology, and innovation. Special emphasis is placed on the ways in which ideas and innovations move into the marketplace. The school's M.B.A. programs enable students to develop:

- knowledge of business fundamentals and their application to real-world situations
- analytical skills for evaluating information and making rigorous decisions
- an understanding of organizations and of the skills essential to collaborating with and managing people effectively
- an integrated understanding of the complex global, technological, and governmental environments in which organizations operate
- advanced abilities to assess the implications of cutting-edge scientific and technological developments for business and to move ideas from development to the marketplace
- effectiveness in communication, collaboration and teamwork, and leadership
- a commitment to ethical behavior and to integrity in business practice

The FlexMBA is designed to meet the educational needs of working professionals who have gained or anticipate gaining managerial or leadership roles in their organizations. The Full-Time M.B.A. is designed for those in early or mid-career seeking career growth or change.

The school also offers non-degree executive education for executives and working professionals. Information on executive education course offerings is available on the school's Web site.

Faculty

Under the leadership of founding Dean Robert S. Sullivan, the Rady School is attracting faculty members who are world-renowned experts in their respective fields. Information on faculty is available on the school's Web site.

For further information, refer to the Rady School of Management Web site at <http://rady.ucsd.edu/> or contact M.B.A. Admissions at (858) 534-0864 or by email at MBAAAdmissions@ucsd.edu.

The School of Medicine

The faculty of the School of Medicine is committed to nurturing and reinforcing the attributes that are important in the making of a doctor—dedication, compassion, and intellectual curiosity.

The goal of the medical school curriculum, clinical experience, and faculty-student interactions is to develop well-trained, objective, and conscientious physicians prepared for the changing conditions of medical practice and continuing self-education. Students acquire understanding of the basic medical sciences and clinical disciplines and are encouraged to choose their own areas of interest for eventual development into careers in the broadly diversified medical community. Required course offerings are designed to provide students with a broad background suitable for general practice, and all students are trained in the delivery of primary care.

The School of Medicine accepted its charter class in 1968. The founding faculty drew upon the strength of UCSD's existing basic science departments rather than recreating such departments for the new school. Today this unique relationship continues with faculty from campus departments joining faculty from the School of Medicine's fourteen departments in teaching the core courses in medicine. Both preclinical and clinical courses are taught by UCSD faculty physicians who also have active patient case-loads. Courses are continually evaluated and updated by interdisciplinary course committees.

An honors, pass, fail grading system puts the emphasis on mastering the knowledge students need to practice medicine. The honors grade is not used in the first quarter of year one (only) to allow students to make a smooth transition to medical school. The honors grade is not used to rank the class numerically but to acknowledge students who have demonstrated superior academic performance. Students receive individual evaluations written by the faculty.

Students at the UCSD School of Medicine are encouraged to explore a variety of clinical, laboratory, and community-based experiences.

UCSD facilities are the main sites for clinical education and are licensed for 500 beds. The majority of UCSD inpatients are admitted at UCSD Medical Center-Hillcrest, where a number of Regional Care Centers are located, including

San Diego and Imperial Counties' only Level I Trauma Center. The UCSD Ambulatory Care Center is located across the street from the hospital tower.

In July 1993, a 120-bed general medical-surgical hospital, The John M. and Sally B. Thornton Hospital, opened at UCSD Medical Center-La Jolla which is located on the La Jolla campus. Adjacent to the Thornton Hospital is the Perlman Ambulatory Care Center and the Shiley Eye Center.

The Veterans Affairs Medical Center, located adjacent to the School of Medicine campus in La Jolla, also is an important training site. The UCSD School of Medicine's partnership with Children's Hospital and Health Center enables students to treat a significant number of the region's pediatric patients.

Outpatient experiences include private medical practice, community clinics, and home visitation programs. Students see patients in many of San Diego's most modern hospitals and outpatient facilities, as well as in some of the disadvantaged neighborhoods of San Diego and Baja California, Mexico.

In all of their clinical experiences, UCSD medical students have an opportunity to see how physicians work as a team with physician assistants, nurses, nurse practitioners, laboratory technicians, social workers, physical and occupational therapists, pharmacists, and other health care professionals to provide health care. In many cases they also can see how the trend toward "managed care" affects both patients and the practice of medicine.

There are many opportunities for students to participate in cutting-edge research in laboratories of UCSD School of Medicine researchers, as well as in the laboratories of scientists from the general UCSD campus, the Veterans Affairs Medical Center, The Salk Institute, Scripps Clinic and Research Foundation, and some of the many private biomedical research companies in the region.

The medical school curriculum provides flexibility so that the individual needs and goals of each student can be met. The curriculum is divided into two major components: the core curriculum and the elective programs.

Elective opportunities constitute a substantial portion of classes during the first two years and close to 50 percent during the last two years. The core curriculum of the first two years is designed to provide each entering student an essential understanding of the fundamental disciplines underlying modern medicine. The core curriculum of the last two years is composed of the major clinical specialties taught in hospital settings, outpatient situations, and relevant extended-care facilities.

A Medical Scientist Training Program provides the opportunity for a limited number of students to earn both the M.D. and Ph.D. degrees over a six- to seven-year period of study.

The School of Medicine cooperates with the San Diego State University Graduate School of Public Health (SDSU-GSPH) in assisting interested students who wish to pursue a Master's Degree in Public Health (M.P.H.) while enrolled in medical school. Students can also receive an M.P.H. at other schools of public health, although a formal agreement exists only with the SDSU-GSPH.

The UCSD School of Medicine and the Department of Family and Preventive Medicine jointly offer a Master of Advanced Studies (MAS) in the Leadership of Healthcare Organizations. The degree program permits a student to complete the Doctor of Medicine (M.D.) curriculum and studies leading to a Master's Degree in the Leadership of Healthcare Organizations in a total of five years.

Each student is expected to develop an individualized program of independent study in conjunction with a faculty member and to describe it in writing.

Freshman student enrollment is 122, and a total of 541 medical students were enrolled in 2005-06.

Selection Factors

Selection is based upon the nature and depth of scholarly and extracurricular activities undertaken, academic record, performance on the MCAT, letters of recommendation, and personal interviews.

The Admissions Committee gives serious consideration only to those applicants with above

average GPA values and MCAT scores.

The School of Medicine is seeking a student body with a broad diversity of backgrounds and interests reflecting our diverse population.

A complete catalog and information on the foregoing programs are available on the school's Web page <http://meded.ucsd.edu/Catalog/>.

For additional information about the UCSD School of Medicine and its programs, write or call:

Programs for Prospective Medical Students

UCSD offers no special premedical major. An undergraduate student considering medicine as a career may choose any major or concentration area leading to the bachelor's degree, provided that he or she elects those additional courses which the medical school of his or her choice may require for admission. Admission requirements differ among medical schools, but most desire a solid foundation in the natural sciences—biology, chemistry, physics, mathematics—and a broad background in the humanities, social sciences, and communication skills. A premedical/dental advisory program is available through the campus-wide Career Services Center.

MASTER OF ADVANCED STUDIES (MAS) IN LEADERSHIP OF HEALTHCARE ORGANIZATIONS

The UCSD Department of Family and Preventive Medicine in the School of Medicine offers a Master of Advanced Studies (MAS) in the Leadership of Healthcare Organizations. The degree is designed to meet the needs of health care professionals who have clinical and executive or management responsibilities. All courses will be held in the late afternoon, evenings, and weekends for the convenience of working professionals. Extension's EdVantage provides administrative support for the program. Further information on the degree program may be obtained by contacting UCSD.

The Skaggs School of Pharmacy and Pharmaceutical Sciences

The newest health sciences professional school on the UCSD campus is the Skaggs School of Pharmacy and Pharmaceutical Sciences. Approved by the regents in summer 2000, the charter class of students was enrolled in fall 2002. Students study an innovative curriculum dedicated to educating future pharmacy practitioners to provide the pharmaceutical care needs of our growing and increasingly diverse society. The goal of the doctor of pharmacy curriculum is to prepare students to be leaders in the profession of pharmacy and to provide them with the tools to practice effectively in a wide variety of currently existing and potential future roles in academia, hospitals and clinics, long-term facilities and home care, government, health policy, the pharmaceutical industry, and innovative community pharmacy practice settings. It is expected that the emerging fields of pharmacogenomics and bioinformatics will have a profound influence on the future practice of pharmacy, and that graduates of the UCSD School of Pharmacy and Pharmaceutical Sciences will be in an excellent position to bring these advances to the patient care setting.

Future growth in enrollment in the Skaggs School of Pharmacy and Pharmaceutical Sciences is planned for thirty students in the class entering in 2004 and sixty students in 2007. The Pharmaceutical Sciences Building, which will house the administrative, teaching, and research activities of the school, is scheduled for occupancy in fall 2005. Until these facilities are available, enrollment will be limited to a maximum of thirty students in each class. Once the building is available for occupancy, the entering class size is planned to increase to sixty students.

Rather than duplicate existing departments on the UCSD campus and in the School of Medicine, the founding faculty of the school draw upon the strengths of the basic and biomedical science departments that have provided an outstanding education to undergraduate, graduate, and medical students for more than thirty years. Faculty from campus departments and the School of Medicine join School of Pharmacy and Pharmaceutical Sciences faculty in teaching the preclinical courses in the curriculum. Clinical faculty, who are active practitioners in a variety of medical center, community, and industry locations,

provide both classroom instruction as well as guidance of students during advanced pharmacy practice clinical experiences.

During the first years of implementation, the curriculum will be dynamic, under constant review, and using faculty and student input, updated by interdisciplinary faculty committees. Presently, the four-year curriculum leading to the doctor of pharmacy degree is designed as follows:

In the first year, students are enrolled in courses in anatomy and histology, pharmaceutical chemistry, pharmaceuticals, bioinformatics, law and ethics, biostatistics and an introduction to the practice of pharmacy. Students gain their first exposure to patient care by working alongside medical students in UCSD sponsored, student-run, free medical clinics in San Diego. In the second year, pharmacy and first-year medical students are concurrently enrolled in courses that serve as a foundation for understanding disease and disease management. In this unique environment, pharmacy and medical students study cell biology and biochemistry, organ physiology, pharmacology, neurosciences and endocrinology, reproduction and metabolism, laboratory medicine, and health policy. This is another step in developing the collegial relationship they encounter in the patient-care setting. Courses, specific to the needs of pharmacy students, such as additional course work in pharmacology, drug study design, and pharmacy practice are also provided. The third year focuses on the application of the information learned in the previous years with additional course work in microbiology, pharmacology, drug information, pharmaceutical chemistry, pharmaceuticals, and pharmacogenomics. A major course sequence in drug therapeutics begins the process of applying the knowledge gained in the basic sciences to the clinical management and care of patients. The fourth year is devoted entirely to advanced pharmacy practice clinical experiences where students learn to apply the skills and knowledge obtained in the curriculum in a variety of patient care settings. Many of these advanced practice experiences take place at UCSD-affiliated medical centers, such as UCSD Medical Center—Hillcrest, UCSD Medical Center—La Jolla, the Veteran's

Administration Medical Center in La Jolla, and San Diego Children's Hospital and Medical Center. In addition, many other health care facilities throughout the region are utilized. Not only do students participate in the care of patients in many of the most modern medical facilities in the San Diego area, but they also learn to appreciate the challenges faced in providing care to some of the less advantaged citizens of the region. Both classroom elective courses as well as advanced practice experience electives provide flexibility for the student to explore the many facets of the profession and provide an opportunity for the curriculum to meet a particular student's educational goals and objectives.

The San Diego region ranks third in the nation in the development of new biotechnology. The school is developing relationships with this burgeoning biotechnology industry, which is adjacent to the UCSD campus. There are advanced practice and research experiences available to students in these exciting new areas of practice.

The common required and elective course work taken by pharmacy and medical students and advanced practice clinical experiences where medical and pharmacy students work closely together have been created to foster the development of cooperation between the professions as well as to develop an appreciation for the unique roles that each professional provides in the care of patients.

For the past twenty-five years, UCSF School of Pharmacy students have been enrolled in advanced practice clinical activities at UCSD Medical Centers. This long-standing relationship is continuing. The two schools are utilizing distance-learning facilities to enhance communication and to share educational and research experiences between students and faculty on the two campuses.

Selection Factors

The Admissions Committee seeks a diverse pool of applicants who have demonstrated strong academic ability in both the required prerequisite course work and in their entire academic career as well as a wide breadth of extracurricular interests. In addition, the committee selects applicants for matriculation who have

demonstrated the personal qualities of intelligence, maturity, integrity, dedication to the ideal of service to society, and who are best suited for meeting the educational goals of the school. The ability to express oneself clearly in both oral and written English is essential. The School of Pharmacy and Pharmaceutical Sciences is committed to admitting students with diverse cultural, economic, and social backgrounds. Although grade-point average is an important factor, it is not the sole criterion for acceptance. In addition to intellectual and academic competence, the Admissions Committee considers communication skills, leadership ability, community service, and health care-related experience. Preference for admission is afforded to California residents when all other selection factors are equal, and consideration at this time is given only to applicants who are either United States citizens or permanent residents.

All students are enrolled in the full-time, four-year professional program leading to the doctor of pharmacy degree (Pharm.D.). No students in advanced standing, transfer students from other schools of pharmacy, or part-time students are accepted. All students enter at the first-year level.

The faculty of the School of Pharmacy and Pharmaceutical Sciences is exploring the implementation of a seven-year B.S./Pharm.D. program and a Pharm.D./Ph.D. program. As development of each program matures, information will be made available on the School of Pharmacy Web site. It is not anticipated that the programs will be ready for student enrollment until fall 2005.

Scripps Institution of Oceanography

Scripps Institution of Oceanography is one of the oldest, largest, and most important centers for marine science research, graduate training, and public service in the world. Its preeminence in the marine sciences is reflective of its excellent programs, distinguished faculty and research scientists, and outstanding facilities.

Scripps Institution was founded in 1903 as an independent biological research laboratory, which became an integral part of the University of California in 1912. At that time, the laboratory was given the Scripps name in recognition of donors Ellen Browning Scripps and E. W. Scripps.

In all, Scripps occupies fifty-five buildings on 170 acres along the Pacific coastline below the mesa on which UCSD is located. Its staff numbers approximately 1,000, including more than 200 graduate students. The institution's annual expenditures exceed \$133 million.

Research at Scripps encompasses physical, chemical, biological, geological, and geophysical studies of the oceans. Among the hundreds of research programs that may be under way at any one time are studies of air-sea interaction, climate prediction, earthquakes, the physiology of marine animals, marine chemistry, beach erosion, the marine food chain, the ecology of marine organisms, the geological history of the ocean basins, and the multidisciplinary aspects of global change and the environment.

Scripps operates four ships and one floating instrument platform for oceanographic research in support of programs by Scripps researchers as well as oceanographers from other institutions throughout the world. Cruises range from local, limited-objective trips to far-reaching expeditions in the world's oceans.

Investigations supported by contracts and grants, primarily federal, cover a wide latitude of marine research. The general research effort is conducted by five divisions: Climate Research Division, Geosciences Research Division, Integrative Oceanography Division, Marine Biology Research Division, and Physical Oceanography Research Division. The diversity of Scripps's work is extended by special purpose laboratories and multidisciplinary centers: Marine Physical Laboratory, Center for Marine Biotechnology and Biomedicine, Center for Atmospheric Sciences,

Center for Marine Biodiversity and Conservation, Center for Observations, Modeling and Prediction at Scripps, Center for Earth Observations and Applications, and Scripps Genome Center.

The La Jolla laboratory of the University of California's Cecil H. and Ida M. Green Institute of Geophysics and Planetary Physics, and UC's California Space Institute, although organizationally separate, are closely affiliated with Scripps.

Other specialized groups are also located on campus. The California Sea Grant College Program, a systemwide program with thirty to fifty projects and approximately forty trainees supported on California campuses and in several specialized research units, is headquartered at Scripps. The Southwest Fisheries Science Center (SWFSC), located near the Scripps campus, is one of thirty major laboratories and centers operated by the National Marine Fisheries Service, a component of the National Oceanic and Atmospheric Administration of the U.S. Department of Commerce. Also, the Inter-American Tropical Tuna Commission is colocated at SWFSC.

A ship operations and marine technical support unit provides essential services and facilities to all research units of the institution.

The Birch Aquarium at Scripps provides a wide variety of educational courses in the marine sciences for students from primary grades to high school level. UCSD students may become involved in work-study programs or serve as volunteers or aquarist trainees. A limited number of students can be accommodated for a four-unit course in independent study by arrangement with a faculty member and the aquarium director. The facility's resources include natural habitat groupings of marine life from local and Gulf of California waters; many of these marine groups are on display in the aquarium. The museum exhibits present basic oceanography concepts and explain research undertaken at Scripps. The aquarium is open from 9:00 a.m. to 5:00 p.m. daily.

Scripps's educational program has grown hand in hand with the research programs. Instruction is on the graduate level, and students are admitted as candidates for a Ph.D. degree. Academic work is conducted through an organizational segment of the institution known as the

Graduate Department of Scripps and its eight curricular groups: biological oceanography, physical oceanography, marine biology, geological sciences, marine chemistry and geochemistry, geophysics, climate sciences, and applied ocean sciences. Approximately ninety professors are complemented by an academic staff of more than 200 research scientists, many of whom have a regularly scheduled role in the instructional program. Many Scripps scientists also teach courses in undergraduate programs such as biology, earth sciences, and environmental systems.

Students enter oceanography with extremely varied interests and backgrounds—naturalists, explorers, engineers, and theorists from the United States and many foreign countries. One thing they have in common, however, is that they come to Scripps with a very strong understanding of science. Most students select positions as research assistants when they enter the program—a practice that not only gives them an early involvement with research, but also provides salaries. The student-faculty ratio at Scripps is about two to one; consequently, classes are small, and the student has the opportunity to work closely with his or her thesis adviser. Oceanography is an interdisciplinary field that allows for informal exchange and interaction on a variety of levels.

While at Scripps, students have for their use some of the nation's most sophisticated and complete special laboratories and facilities for oceanographic studies covering a wide range of disciplines from biology and physiology to geophysics and atmospheric sciences. The Hydraulics Laboratory features a 90-foot stratified flow channel and a 150-foot wind-wave channel, and the Unified Laboratory Facility has scanning electron microscopes and other high-precision instruments. Among the many computer resources is access to the San Diego Supercomputer Center. The Scripps Library is the University of California's major collection of marine science materials, with outstanding collections in oceanography, marine biology, and marine technology. It also specializes in atmospheric sciences, fisheries, geology, geophysics, and zoology. The various marine life

Graduate School of International Relations and Pacific Studies

and geological specimens housed at Scripps form a vast "library" of oceanographic resources available for investigations. Two underwater research areas that are part of the UC Natural Reserve System are adjacent to the Scripps campus. During a student's tenure at Scripps, he or she will have the opportunity to go to sea on any of Scripps's four research vessels as well as those from other oceanographic institutions.

The combination of a large scientific staff and extensive facilities at Scripps provides an extraordinary opportunity for each student to enjoy close contact with existing oceanographic concepts and active participation in research.

See "Scripps Institution of Oceanography" in "Courses, Curricula, and Programs of Instruction" for further details on study programs, requirements, degrees, and courses.

www.siograddept.ucsd.edu

The Graduate School of International Relations and Pacific Studies (IR/PS), at the University of California, San Diego was created in 1986 as the University of California's first professional school of international affairs. The school is unique in its geographical focus on the Pacific (the Americas and Asia). IR/PS is the only professional program in the United States to concentrate exclusively on the diverse political and economic systems of this region.

The school's programs have been developed in response to the increasing importance of the Pacific in global economic and political affairs. When the school was founded, the globe was still locked in the Atlantic-centric world of the Cold War. Today, we see the emergence of nations such as China, Brazil, Korea, Singapore, and Mexico as important players in a globalized world. As a result, professionals who can understand and work in complex international environments are needed in both the public and private sectors. While previously looking to Europe as the site of its primary commercial, financial, and strategic interests, the United States is now shifting its attention westward toward the Pacific—a likely source of both extraordinary prospects and substantial challenges in this century. These changes create both a need and an opportunity: a need for new programs of training and research in international affairs and an opportunity for a new school of international affairs to develop a distinctive, modern program that links professional training with international competence and gives greater prominence to the Pacific.

The school's primary objectives are to prepare students with an interest in this region for positions of leadership in business, government, journalism, diplomacy, public service, and other fields; to serve as a center of excellence for research on regional economic, political, social, technological, and security issues; and to promote dialogue on Pacific region issues of common concern.

1. The degree programs provide students with professional training for careers in international affairs and management, including jobs in industry, government, international organizations, foundations, academia, and research institutes. Students receive broad training across professional areas, enabling those

seeking careers in government to appreciate the interests of the private sector and those planning business careers to understand decision-making in public organizations. The program combines core course work in applied social sciences with professional subjects with courses, language training classes, and regional studies to provide students with the skills and knowledge to work effectively on Pacific region issues in the private, public, or nonprofit sectors.

2. IR/PS serves as a center for research on issues of common concern to the nations of the Pacific. Since the region has become a focal point of economic and security relations, the demand for information and research centered on this dynamic region has increased. Consequently, IR/PS is home to several renowned research institutes and programs, including the Institute on Global Conflict and Cooperation, the Center for U.S.-Mexican Studies, and the Information Storage Industry Center. In addition, the school supports collaborative relationships within the UCSD community by partnering with institutions such as Scripps Institution of Oceanography, the Institute of the Americas, and the new Rady School of Management.
3. As part of the University of California, the school plays an important role in developing public awareness and understanding of the Pacific region. Programs of public outreach, including visiting lecturers, research seminars, and roundtable discussions, add to the information available to citizens and interest groups about international issues that affect their lives.

Degree Programs

The degrees offered by the school include a professional Master of Pacific International Affairs (M.P.I.A.), a Ph.D. in Political Science and International Affairs offered jointly with the Department of Political Science, and a Ph.D. in Economics and International Affairs offered jointly with the Department of Economics. Training emphasizes international relations, economics and management, public policy, country and regional studies, and languages of the region.

Mid-career and other executive certificate programs are also offered by IR/PS. In particular, the Global Leadership Institute (GLI) is designed for working professionals seeking additional study in international management, international relations, and comparative public policy. Participants in the program spend up to an academic year at IR/PS beginning in mid-September and ending in mid-June. Under the auspices of the program, associates have the opportunity to further internationalize their knowledge and experience as well as enhance their professional development in such areas as finance, accounting, quantitative methods, econometrics, and long-range strategic planning. The program of study is tailored to individual interests under the guidance of the program's director and faculty advisers.

The M.P.I.A. program is distinctive in several ways. The program:

1. Exposes students to the perspectives of both private business and public policymaking.
2. Offers specialized training in international politics, economics, management, environmental policy, public policy, and international development.
3. Provides language training necessary for professionals specializing in the countries of the Pacific.
4. Requires students to focus their studies on the politics, culture, economics, and language of one Pacific country or region.
5. Creates a laboratory for comparative analysis of economic management, foreign relations, policymaking, and development in the diverse nations of the Pacific.

The Ph.D. in International Affairs is offered only in conjunction with either the Ph.D. in political science or the Ph.D. in economics. These Ph.D. programs are designed for students who seek a

rigorous training in a discipline (either economics or political science) along with a specialization in a specific policy area and regional expertise. Ph.D. students are required to demonstrate knowledge of a language linked to their regional specialization.

The M.P.I.A. and Ph.D. programs are distinct and separate. There is little overlap in the structure or requirements of the two programs because their objectives are very different. The master's program provides professional training for graduates who will pursue international careers in management, government, and other fields. The doctoral program offers an academic education to a small number of students who will pursue international careers requiring advanced research capabilities at universities, corporations, government agencies, consulting firms, or other research organizations.

However, the master's and doctoral programs do share a common intellectual framework. Both the M.P.I.A. and Ph.D. curriculums are designed to bring the theories, methods, and insights of various disciplines together to analyze policy issues of the Pacific and to blend the perspectives of public policy makers and private managers. The same faculty members teach and advise students in both programs.

The Faculty

The school has attracted an interdisciplinary faculty from such fields as economics, management sciences, international relations, comparative politics, public policy, and linguistics. The various programs draw upon and contribute to research which focuses on the regions of the Pacific and on major issues that affect the region.

The school places special emphasis on research in and teaching of topics of particular

importance to the program. These topics currently include:

1. Studies of the Pacific as a system, including the interaction of the countries and regions within it (e.g., Latin American-Japanese economic relations, U.S. relations with both East Asia and Latin America, and the placement of the Pacific in the global system of international relations, both contemporary and historical).
2. Studies in international economics, management, and finance, including such subject areas as international competition, comparative industrial organizations, international trade and development, industrial relations, technological innovation, international financial structures, policies, institutions, and historical patterns of development.
3. Comparison of the trajectories of socioeconomic development among the countries of Asia and Latin America, including the exploration of differences and similarities in state-society relations, culture, entrepreneurship, linkage to the global economy, and geopolitical position.
4. Comparative analysis of patterns of policymaking in the countries of the Pacific region to understand how different governmental structures, economic systems, and social group interests shape the policy process and influence policy choices in such areas as budget allocation, regulation of industry, and foreign trade.

For further information, contact the Office of Admissions, Graduate School of International Relations and Pacific Studies, UCSD, 9500 Gilman Drive, La Jolla, CA 92093. (858) 534-5914, email: irps-apply@ucsd.edu, Web site: <http://www-irps.ucsd.edu>.

Key to Course Listings

Courses numbered 1 through 99 are lower-division courses and are normally open to freshmen and sophomores. Courses numbered 87 are Freshman Seminars.

Courses numbered 100 through 199 are upper-division courses and are ordinarily open only to students who have completed at least one lower-division course in the given subject, or six quarters of college work.

Courses numbered 200 through 299 are graduate courses and are ordinarily open only to students who have completed at least eighteen upper-division units basic to the subject matter of the course.

Courses numbered 300 through 399 are professional courses for teachers, which are specifically designed for teachers or prospective teachers.

Courses numbered 400 through 499 are other professional courses.

Sample Course Listing:

100 (see above) Title of Course (4) (number of quarter hours or units of credit)

Course Description. Prerequisites: [listed]. (F) [Quarter the course is taught].

Academic Internship Program

OFFICE: Literature Building, Second Floor,
Warren College
<http://aip.ucsd.edu>

THE PROGRAM

The Academic Internship Program (AIP) offers qualified juniors and seniors the opportunity to acquire valuable work experience related to academic and career interests. Although most internships are in the San Diego area, the Academic Internship Program is national in scope, including the popular Washington, D.C. program, and international, including the London program. Housing arrangements and orientations are parts of both programs. An extensive library lists more than 4,000 available internships in varied settings including, but not limited to, TV and radio stations, law offices, medical research labs

and clinics, government agencies, high-tech and biotech companies, engineering, advertising and public relations firms, and financial institutions. Students also can work with the internship office to set up their own positions.

The program operates all four quarters; students intern a minimum of ten hours per week and may receive upper-division credit. Students may enroll in a maximum of four internships and/or earn sixteen units of internship credit during the course of their junior and senior years. The number of units earned corresponds to the number of hours worked, actual job description and the length of a research paper/project. The research paper/project and relevant readings comprise the academic component of the program, which is directed by a faculty adviser selected by the student. All internships require assigned faculty advisers and program evaluations. All students earn grades of P/NP and receive transcript notations.

The AIP serves students from all six colleges and handles all undergraduate majors. Students planning to participate in the Academic Internship Program should apply at least one quarter before they want to be enrolled in the program, or two quarters prior to a Washington, D.C. or London internship. Students planning to set up their own out-of-town internships are encouraged to apply two quarters in advance. In cooperation with AIP and UCSD's Programs Abroad Office, students also may participate in, and earn academic credit for, other established internships abroad.

To be eligible for the program, students must have completed at least ninety units of credit with some related upper-division course work and have a minimum 2.5 GPA at the date of application.

197. Academic Internship Program (1-12)

Individual placements for field learning which are integrated with academic programs will be developed and coordinated by the program. A written contract involving all parties will include learning objectives, a project outline, and means of supervision and progress evaluation, and must be received prior to the beginning of the internship. Prerequisites: consent of instructor and submission of a written contract.

The Minor

The African American Studies Minor is an interdisciplinary minor which is designed to lead to an understanding of the unique attitudes, evolution, circumstances, and experiences of African Americans. The *Core Requirement* sets the stage for the formation and codification of an African American intellectual and political tradition into the twentieth century. The *History and Context* selection of courses focuses on the formation of identity through the lens of history and media. *Politics and Society* involves students in an investigation of the contest between that forming identity and the social systems of urbanization, politics, and class stratification. *Representation and Voice* courses provide for a selection of performing and fine arts experiences as representations of African American culture.

CORE COURSES (choose ONE COURSE from the list below)

HIUS 138/ETHN 167. African American History in War and Peace, 1917–Present (4)

HIUS 139/ETHN 149. African American History in the Twentieth Century (4)

HISTORY and CONTEXT (choose TWO COURSES from the list below)

ETHN 105/USP 104. Ethnic Diversity and the City (4)

ETHN 140. Language and American Ethnicity (4)

ETHN 151. Ethnic Politics in America (4)

ETHN 152. Law and Civil Rights (4)

ETHN 160. Black Politics and Protest, 1850-1941 (4)

ETHN 161. Black Politics and Protest Since 1941 (4)

ETHN 163. Leisure in Urban America (4)

ETHN 164/MUS 153. African Americans and Mass Media (4)

ETHN 165. Sex and Gender in African American Communities (4)

ETHN 166. The Black Press and Social Change (4)

ETHN 184. Black Intellectuals in the Twentieth Century (4)

ETHN 187. Black Nationalism (4)

HILD 7A. Race and Ethnicity in the United States (4)

HIUS 135B/ETHN 170B. Slavery and the Atlantic World (4)

HIUS 164/264/ETHN 181. Topics in Comparative History of Modern Slavery (4)

HIUS 165/ETHN 182. Segregation, Freedom Movements, and the Crisis of the Twentieth Century (4)

HIUS 166. Topics in Southern History (4)

HIUS 175. Crime, Law, and Society in the United States, 1600-1900 (4)

HIUS 176. Race and Sexual Politics (4)

HIUS 183/ETHN 159. Topics in African American History (4)

POLITICS and SOCIETY (choose TWO COURSES from the list below)

ANLD 23. Debating Multiculturalism: Race, Ethnicity, and Class in American Society

COCU 182. Black Popular Music (4)

COCU 123. Black Women Filmmakers (4)

POLI 100H. Race and Ethnicity in American Politics (4)

POLI 100J. Race in American Political Development (4)

POLI 108. Politics of Multiculturalism (4)

Soc/C 139. Social Inequity: Class, Race, and Gender (4)

Soc/D 187S. The Sixties (4)

USP 103/HIUS 148. U.S. Cities in the Twentieth Century (4)

USP 104/ETHN 105. Ethnic Diversity and the City (4)

USP 132/ETHN 107. African Americans, Religion, and the City (4)

REPRESENTATIONS and VOICE (choose EIGHT UNITS from the list below)

LTEN 148. Genres in English and American Literature (4)

LTEN 183/ETHN 172. African American Prose (4)

LTEN 184/ETHN 173. African American Poetry (4)

LTEN 185/ETHN 174. Themes in African American Literature (4)

LTEN 188. Contemporary Caribbean Literature (4)

LTWR 100. Short Fiction (4)

LTWR 102. Poetry (4)

LTWR 120. Personal Narrative (4)

MUS 95G. Gospel Choir (2)

MUS 95JC. Jazz Chamber Ensembles (2)

MUS 95JL. Large Jazz Ensemble (2)

MUS 126/ETHN 178. Blues: An Oral Tradition (4)

MUS 127A/ETHN 179A. Jazz Roots and Early Development (4)

MUS 127B/ETHN 179B. Jazz since 1946: Freedom and Form (4)

MUS 131. Jazz Improvisation Performance (4)

TDMV 136. Dances of the World (formerly TDHA 132) (4)

TDAC 120. Ensemble (formerly THAC 120) (4)

VIS 1. Introduction to Art Making: Two-Dimensional Practices (4)

VA126DN. African and Afro-American Art (4)

Students interested in either taking African American Studies courses or completing the minor are encouraged to discuss their interests and develop a course of study with an affiliated faculty member of the program at their earliest convenience. See the Marshall College Provost's Office for further information.

African Studies Minor

OFFICE: 135 Social Science Building,
Thurgood Marshall Campus

PARTICIPATING FACULTY

Professors

Zeinabu Davis, M.F.A., *Communication*
Bennetta Jules-Rosette, Ph.D., *Sociology*,
Director

Thomas E. Levy, Ph.D., *Anthropology*
Maria Polinsky, Ph.D., *Linguistics*
Edward Reynolds, Ph.D., *History*, *Emeritus*
Marc J. Swartz, Ph.D., *Anthropology*, *Emeritus*

Associate Professors

Robert Cancel, Ph.D., *Literature*
Ivan Evans, Ph.D., *Sociology*
Clark Gibson, Ph.D., *Political Science*
Robert Horwitz, Ph.D., *Communication*
Sharon Rose, Ph.D., *Linguistics*

Assistant Professors

Boatema Boateng, Ph.D., *Communication*
Karen Ferree, Ph.D., *Political Science*
Jeremy Prestholt, Ph.D., *History*

African studies is an interdisciplinary minor that covers African topics and issues through a coordinated set of courses offered in the Departments of Anthropology, Communication, Ethnic Studies, History, Literature, Music, Political Science, Sociology, Theatre and Dance, and Visual Arts. In addition to the offerings at UCSD, opportunities for further study in Africa and Europe are available through the University of California Education Abroad Program, with programs in Ghana and South Africa as well as at the National University of Côte d'Ivoire, the Université de Paris V, the Université de Bordeaux II, and study abroad programs offered through other U.S. universities. A number of African languages are available through the UCSD Department of Linguistics. Students may take independent study units and tutorials with faculty in the program to learn the languages of their respective areas of interest. In addition, students are encouraged to participate in special seminars and presentations offered annually by the African and African-American Studies Research Project. Students may take the seminars for credit by signing up for a 198/199

with a qualified African studies professor. A minor in African studies consists of seven total courses. Students may take no more than four courses in any one department. Also, a minimum of one course each from of the following three groups is required: Group A—Traditional Cultures and Premodern Africa, Group B—African Society and Politics, and Group C—African Expressive Culture.

The **African studies minor** provides students with a broad background in African history, societies, culture, and politics. Please contact Professor Bennetta Jules-Rosette in the Department of Sociology (Social Science Building, Rm. 471), (858) 534-4790 or the African Studies Office at (858) 822-0265 for more information. Quarterly course offerings are subject to change. Interested students should consult the program faculty for an up-to-date list.

COURSES

Group A: Traditional Cultures and Premodern Africa

- ANRG 104. Traditional African Societies and Cultures (4)
 Com/Cul 118. Oral History (4)
 Ethnic Studies 142. Languages of Africa (4)
 HIAF 110. History of Africa to 1880 (4)
 HIAF 120. History of South Africa (4)
 HIUS 135. Slavery and the Atlantic World (4)

Group B: African Society and Politics

- ANGN 183. Chiefdoms, States, and the Emergence of Civilizations (4)
 Com/Cul 179. Colonialism and Culture (4)
 Ethnic Studies 157. Ethnic Conflict in the Third World (4)
 HIAF 111. Modern Africa since 1880 (4)
 HIAF 130. African Society and the Slave Trade (4)
 HIAF 140. Economic History of Africa (4)
 HIUS 136. Slavery and Freedom in Nineteenth-Century U.S.: Images and Realities (4)
 Political Science 132A. Political Modernization Theory (4)
 Political Science 135A. Ethnic Conflict in the Third World (4)
 Political Science 136B. Comparative Politics and Political Culture (4)
 Soc C/148C. Power, Culture, and Social Revolt (4)
 Soc C/157. Religion in Contemporary Society (4)
 Soc D/158. Islam in the Modern World (4)
 Soc D/188A. Community and Social Change in Africa (4)
 Soc D/188J. Change in Modern South Africa (4)

Group C: African Expressive Culture

- Com/Cul 127. Folklore and Communication (4)
 Com/Cul 146. Culture and Thought (4)
 Com/Cul 179. Colonialism and Culture (4)
 Ethnic Studies 176. Black Music/Black Text: Communication and Cultural Expression (4)
 LTGN 130. Novel and History in the Third World (4)
 LTGN 132. African Oral Literature (4)
 LTGN 133. Introduction to Literature and Film of Modern Africa (4)
 LTGN 185. Literature and Ideas (4)
 LTGN 186A-B-C. Modernity and Literature (4-4-4)
 LTEN 187. Black Music/Black Text: Communication and Cultural Expression (4)
 LTEN 188. Contemporary Caribbean Literature (4)
 MUS 13AF. World Music/Africa (4)
 MUS 111. World Music Traditions (4)
 MUS 126. Introduction to Oral Music (4)
 MUS 127A-B. Music of Black Americans (4-4)
 Soc A/105. Ethnographic Film and Media Methods (6)
 Soc D/187. African Societies Through Film (4)
 TH/HS 109. Modern Black Drama (4)
 TH/HS153. Dance History-Jazz Dance & Related Ethnic Studies (4)
 Visual Arts 126A. African and Afro-American Art (4)
 Visual Arts 127B. Western & Non-Western Rituals & Ceremonies (4)
 Visual Arts 127D. Primitivism and Exoticism in Modern Art (4)
 Visual Arts 128E. Topics in Non-Western Art (4)

Anthropology

Associated Faculty

- Edwin L. Hutchins, Ph.D., *Professor, Cognitive Science*
 Martha Lampland, Ph.D., *Associate Professor, Sociology*
 Paula F. Levin, Ph.D., *Senior Lecturer S.O.E., Teacher Education Program*
 Christena Turner, Ph.D., *Associate Professor, Sociology*
 Lisa Yoneyama, Ph.D., *Associate Professor, Literature*

Anthropology is a humanistic social science dedicated to understanding the worldwide diversity of social institutions and cultural traditions. Because there is increasing awareness of the importance of sociocultural factors in domestic and international relations, a bachelor's degree in anthropology has become accepted as a valuable preparation for careers in law, medicine, education, business, government, and various areas of public service. Anthropology majors can qualify for a California teaching credential from UCSD through the Teacher Education Program. The department offers a full range of courses in cultural, social, linguistic, psychological, and biological anthropology, as well as archaeology. Courses include offerings which focus on specific societies or regions of the world as well as

more theoretically oriented materials. The department offers undergraduate minor and major programs, a senior thesis program, an undergraduate internship program, and a graduate program leading to the doctoral degree. Students may also enroll in a Field School when available.

The Undergraduate Program

Lower-Division

Lower-division offerings in anthropology are concentrated mainly in the core series, ANLD 1, 2, 3. These courses are designed to provide a comprehensive orientation to the ideas and methods of anthropological investigation and a familiarity with case materials from a number of different societies and historical periods.

Students who intend to major or minor in archaeological anthropology are advised to take ANLD 3.

Students who intend to major or minor in biological anthropology must take ANLD 2 (or equivalent), which is prerequisite to most upper-division biological anthropology courses.

ANLD 23, which may not be offered every year, satisfies the campus-wide requirement for a course in American Cultures.

Students who have already completed ANPR 105, 106, and 107 may not receive academic credit for ANLD 1.

Other lower-division courses are offered from time to time and will vary from year to year.

The Minor

Students may choose a minor in general anthropology, archaeological anthropology, or biological anthropology. Each consists of seven anthropology courses. At least five courses must be upper-division; at least four should be taken at UCSD. The list of courses offered for each minor is available from the undergraduate coordinator. Transfer credits from other anthropology departments are usually accepted. Education Abroad Program credits are acceptable at the discretion of the undergraduate adviser.

The Major

To receive a B.A. degree with a major in anthropology, the student must meet the requirements of Revelle, John Muir, Thurgood Marshall, Earl Warren, Eleanor Roosevelt College,

or Sixth College including the following requirements of the Department of Anthropology:

1. A minimum of twelve four-unit upper-division courses in the Department of Anthropology must be completed.
2. ANPR 105, 106, and 107 must be completed (included as three of the twelve courses required under No. 1, above). All or some of the courses in this sequence are prerequisites for some other upper-division courses. This sequence consists of:
 - 105 Social Anthropology
 - 106 Cultural Anthropology
 - 107 Psychological Anthropology
3. No courses taken in fulfillment of the above requirements may be taken on a Pass/Not Pass (P/NP) basis. (An exception is made for some courses accepted from other schools and for **one** independent study course (199), **or one** directed group study course (198), **and a** combination of **one** internship seminar (ANBI 187A, C or ANPR 187B) with the corresponding academic internship project (AIP 197). However, this exception does not extend to ANPR 105, 106 and 107, or to transfer credits accepted in lieu of them. These must be taken for a letter grade.)
4. For the B.A. degree, a minimum average of 2.0 is required, both as an overall average in all anthropology courses and in the ANPR 105-106-107 sequence considered separately.
5. At least seven of the upper-division courses submitted for the major must be taken at the University of California, San Diego. The seven normally must include ANPR 105, 106, and 107. A transfer course may be accepted in lieu of one of these "core" courses, if, in the opinion of the undergraduate adviser, the content is substantially the same. In no case will transfer credit be accepted in lieu of more than one of these courses.
6. Majors are required to obtain a background in basic statistical techniques. Cognitive Science 14, Psychology 60, Math 11, and BIEB 100 are recommended as courses to fulfill this requirement.

The Major in Anthropology with Concentration in Archaeology

The department offers an additional B.A. degree, "Anthropology with Concentration in Archaeology." This degree requires the following:

1. The Anthropology Core Sequence: ANPR 105, 106, 107.
2. The Archaeology Core Sequence: ANGN 181, 182, 183.
3. An additional upper-division course in socio-cultural anthropology.
4. Five elective courses, three of which must be in archaeology, and the remaining two can be either from offerings in archaeology or in related disciplines. A handout listing these courses is available from the department's undergraduate coordinator. Students are encouraged to participate in the department's Archaeological Field School (ANPR 194) opportunities in the eastern Mediterranean region and San Diego county.

The Major in Anthropology with Concentration in Biological Anthropology

The department offers another B.A. degree, "Anthropology with Concentration in Biological Anthropology." This degree requires the following:

1. The Core Sequence: ANPR 105, 106, 107.
2. Five four-unit anthropology courses identified as biological anthropology courses; ENVR 110 may be substituted for one of these. A handout listing these courses is available from the department's undergraduate coordinator.
3. Four four-unit courses in the Department of Biology; ECON 131 may be substituted for one of these. Courses which are applicable are also listed in the biological anthropology handout.
4. Items 3 through 6 in the above section ("The Major in Anthropology") also apply to the major in anthropology with concentration in biological anthropology.

Senior Thesis Program

The senior thesis is prepared during two successive quarters of ANPR 196, senior thesis research, and is counted as two of the twelve upper-division courses required for a major. Students are admitted to the program by

invitation of the faculty. Under normal circumstances, eligibility for the program requires the student (1) to have completed eight upper-division courses, including the core sequence, and (2) to have achieved grade point averages of at least 3.6 both overall and in the anthropology major by the end of the junior year. Some of these requirements may be waived by vote of the faculty. During the first quarter of the program (fall quarter), students select their research topic and write a preliminary paper. Those who receive a B+ or better will be invited to continue in the program and complete a thesis on the chosen topic by the end of the winter quarter. The thesis will be evaluated by a committee consisting of the thesis adviser and one other faculty member appointed by the department chair in consultation with the thesis coordinator. The thesis adviser has the sole responsibility for the grade the student receives in the winter quarter. The reading committee advises the faculty on the merit of the thesis for departmental honors. A senior thesis is required in order to be considered for department honors at commencement.

Students who wish to be considered for the Senior Thesis Program should notify the department's undergraduate adviser by the second week of the spring quarter prior to the senior year.

Internship Program

The department sponsors an internship program that allows students to gain academic credit for supervised work in the Museum of Man, the San Diego Zoo, or the Wild Animal Park. The three tracks of the program allow internship experience in (1) biological anthropology, (2) ethnology and archaeology at the museum, or (3) primate behavior and conservation at the Zoo or Wild Animal Park. A combination of on-campus and on-site supervision makes these courses intellectually provocative but practical and applied. They are an especially valuable complement to a major or minor in anthropology. One four-unit internship (AIP 197) taken with the corresponding two-unit internship seminar (ANBI 187A, C and ANPR 187B) can be counted as one of the twelve upper-division courses for the anthropology major or minor. Applications to these programs are accepted during the first seven weeks of the quarter before the one in which the internship is to be done.

Academic Enrichment Programs

Faculty Mentor Program

The program offers research experience to any junior or senior with a GPA of 2.7 or higher who wants to prepare for graduate or professional school. Participants work as research assistants to UCSD faculty members during the winter and spring quarters. Students present their research papers at the Faculty Mentor Research Symposium at the conclusion of the program in the spring.

Summer Research Program

The program offers full-time research experience to underrepresented (i.e., minorities, women, and low-income, first-generation college) students who are interested in preparing for careers in research or university teaching. Juniors and seniors who have a 3.0 GPA or above and plan to attend graduate or professional school are eligible to participate.

Education Abroad Program

One of the best ways to understand the concept of "culture" is to live in a different culture for a time. Anthropology majors are encouraged to participate in the UC Education Program (EAP) or UCSD's Opportunities Abroad Program (OAP). Students considering this option should discuss their plans with the faculty undergraduate adviser before going abroad, and courses taken abroad must be approved for credit to the major by the adviser upon return. More information on EAP and OAP is provided under the Education Abroad Program in the UCSD General Catalog. Interested students should contact the EAP staff in the International Center.

The Graduate Program

The Department of Anthropology offers graduate training in social, cultural, linguistic, and psychological anthropology; anthropological archaeology; and biological anthropology. The graduate program is designed to provide the theoretical background and the methodological skills necessary for a career in research and teaching anthropology at the university level,

and for the application of anthropological knowledge to contemporary problems. It is assumed that all students enter with the goal of proceeding to the doctoral degree.

Admission to the graduate program occurs in the fall quarter only.

Any decision to waive a requirement for either the master's degree or the Ph.D. must be made by a majority of the faculty.

Graduate Advising

One member of the departmental faculty functions as the graduate adviser and is referred to as the Director of Graduate Studies. The role of graduate adviser is to inform students about the graduate program, approve individual registration forms, and give assistance with respect to administrative matters.

First-Year Mentors

Each first-year student is assigned a faculty mentor in the student's subdiscipline. Students are encouraged to meet regularly with their mentors for course planning and guidance in meeting specific requirements and recommendations for their subdiscipline.

After completion of the requirements for the master's degree, the chair of the student's doctoral committee serves as the student's major adviser.

Evaluation

In the spring of each year, the faculty evaluate each student's overall performance in course work, apprentice teaching, and research progress. A written assessment is given to the student after the evaluation. If a student's work is found to be inadequate, the faculty may determine that the student should not continue in the graduate program.

The Master of Arts Degree

Students entering the doctoral program must complete a master's degree before continuing toward the doctorate. Entering students who already have a master's degree in anthropology are not permitted by university regulations to receive a second social science or related-field master's degree, but are required by the department to complete the requirements for the master's degree. Rare exceptions may be made on a

case-by-case basis by the consent of the majority of the faculty and approval of the Office of Graduate Studies and Research.

Requirements for Master's Degree

Required Courses:

- 230 Departmental Colloquium
(4 quarters, 1 unit each)
- 281A-B Introductory Seminars
(1 unit each)
- 295 Master's Thesis Preparation
(1-12 units)

Four core courses, as specified in the following sections.

Core Course Offerings

Six core courses are offered in the graduate program in anthropology:

- ANGR 280A. Core Seminar in Social Anthropology (4 units)
- ANGR 280B. Core Seminar in Cultural Anthropology (4 units)
- ANGR 280C. Core Seminar in Psychological Anthropology (4 units)
- ANGR 280D. Core Seminar in Anthropological Archaeology (4 units)
- ANGR 280E. Core Seminar in Biological Anthropology (4 units)
- ANGR 263. The Anthropology of Language and Discourse (4 units)

(Note: Although not in the 280 series, ANGR 263 is a core seminar. It is also open to graduate students from other departments, with instructor's permission. It may be offered in alternate years.)

All students must take at least four of these six core courses by the end of their second year in the program (and preferably during the first year) as a requirement for receiving the master's degree or for equivalent advancement in the program. The subfields specify particular choices among these core offerings for the students admitted to their respective tracks, as detailed below. The department strongly encourages all students in all subfields to take additional core courses as elective seminars to complete their program.

Anthropological Archaeology core requirements:

280A (Social Anthropology); and

280D (Anthropological Archaeology); and

280E (Biological Anthropology); and

One of the remaining three core courses in anthropology.

Biological Anthropology core requirements:

280E (Biological Anthropology); and

280D (Anthropological Archaeology); and

Two of the remaining four core courses in anthropology, selected in consultation with the student's assigned mentor.

Sociocultural Anthropology, Psychological Anthropology, and Linguistic Anthropology

All students in Sociocultural Anthropology and its allied fields of Psychological and Linguistic Anthropology will take at least four core courses, selected as follows and with the consent of the individual student's faculty mentor. Students identifying two or more areas of concentration must satisfy the requirements of each of these areas.

Core requirements for students in the General Sociocultural track:

280A (Social Anthropology); and

280B (Cultural Anthropology); and

280C (Psychological Anthropology) or 263 (The Anthropology of Language and Discourse); and

280D (Anthropological Archaeology) or 280E (Biological Anthropology).

Core requirements for students in the Psychological Anthropology track:

280C (Psychological Anthropology); and

280D (Anthropological Archaeology) or 280E (Biological Anthropology); and

Two of the following:

280A (Social Anthropology),

280B (Cultural Anthropology),

263 (Anthropology of Language and Discourse).

Core requirements for students in the Linguistic Anthropology track:

263 (Anthropology of Language and Discourse); and

280D (Anthropological Archaeology) or 280E (Biological Anthropology); and

Two of the following:

280A (Social Anthropology),

280B (Cultural Anthropology),

280C (Psychological Anthropology).

Master's Thesis

Students must complete a master's thesis of roughly sixty pages that will be due on the first day of the winter quarter of the student's second year. They must have completed three quarters of course work in order to begin writing a master's thesis. By the end of the spring quarter of the student's first year, he or she will have a master's committee in consultation with whom he or she will design the thesis. The graduate adviser will be responsible for organizing the masters' committees. The thesis will be literature based but will have its own argument, and will not simply be a review of the literature.

An option open only to anthropological archaeology and biological anthropology students is to make the literature-based thesis (defended by the beginning of the winter quarter of the second year) one component of a larger project involving the collection of original data. Data collection could begin in the summer after the student's first year and analysis of it could continue after the master's thesis has been defended. If the thesis includes the analysis of original data that must be shipped back from the field, the student would write the thesis during the winter quarter and hand it in on the first day of the spring quarter.

Elective Courses

Four elective, letter-grade courses are required. These courses can be undergraduate or graduate seminars. At least two of these elective courses must be within the anthropology department. Other electives may be taken outside of the department with the approval of the department chair or the graduate adviser.

The Doctoral Degree

Continuation in the doctoral program is granted to students who have satisfactorily completed the master's program and who have completed courses and the master's thesis at a level of excellence that indicates promise of professional achievement in anthropology.

Requirements for Doctoral Degree

1. Required Courses

In order to achieve candidacy, students must complete two additional letter-grade electives beyond the four required for the master's.

2. Research Methods

Students are required to develop a plan for their training in research methods and present it to the anthropology department faculty on their proposed dissertation committee in the spring quarter of their second year.

3. Apprentice Teaching

In order to acquire teaching experience, each student is required to serve as a teaching assistant for at least one quarter anytime during the first four years of residency. This experience may take place either in our department or in any teaching program on campus. The relevant course in the anthropology department is ANGR 500: Apprentice Teaching, taken for four units and S/U grade. Upon petition, this requirement may be waived by the anthropology faculty.

4. Foreign Language

Unless a student is planning on fieldwork in English-speaking areas, knowledge of one or more foreign languages may be essential for the successful completion of a Ph.D. in anthropology at UCSD. Students will determine specific language requirements for their degree in consultation with the faculty and their doctoral committee.

5. Formation of the Doctoral Committee

All students must choose the chair of their doctoral committee by the end of their second year. They must choose two more internal members of the doctoral committee by the end of the fall quarter of their third year. In consultation with the chair of the doctoral committee, two faculty members from outside the department (one of whom must be tenured) should be added to the committee by the end of the winter quarter of the third year.

Anthropologists in other departments who are identified by the faculty may serve as either inside members or outside members of the committee. However, there must be at least two inside members from within the department, and only one outside member may be an

anthropologist. The final composition of the committee is approved by the Office of Graduate Studies and Research.

The chair of the doctoral committee serves as the student's adviser for the remainder of the student's program.

6. The Fieldwork Proposal

Advancement to candidacy will be based on the submission of two to three position papers and a research proposal. The position papers are intended as a way for students to demonstrate competence in particular areas of theory, methods, and/or regional studies that are significant to the dissertation research project. The number of the position papers and the specific topics they address are to be formulated in consultation with the student's committee chair and, as appropriate, with other members of the student's dissertation committee. It is expected that the position papers will amount to some fifty to sixty pages and that the research proposal will be in the twenty- to thirty-page range. Students should enroll in directed reading courses (ANGR 298) during the quarters in which they are writing the position papers. Additionally, students should also enroll in ANGR 296A-B during the quarters in which they are writing their dissertation research proposal. A maximum of three quarters is allowed for the preparation of both the position papers and proposal. The position papers, research proposal, and oral examination for advancement to candidacy must be completed no later than the end of the spring quarter of the student's fourth year.

7. Advancement to Candidacy

Advancement to doctoral candidacy must take place no later than the end of the spring quarter of the fourth year. This requires the successful completion of all course work requirements, the position papers, the dissertation research proposal, and an oral qualifying examination administered by the student's committee. The proposal and position papers must be turned into the student's committee at least three weeks prior to the examination.

Upon petition, students may advance to candidacy as early as the spring quarter of the third year, if all candidacy requirements noted earlier have been satisfied by that time. This requires the agreement of the graduate adviser, the student's dissertation adviser, and other members of his or her committee.

Successful completion of this examination marks the student's advancement to doctoral candidacy. These exams will be open to the extent that university regulations allow.

8. Dissertation and Dissertation Defense

Upon completion of the dissertation research project, the student writes a dissertation that must be successfully defended in an oral examination conducted by the doctoral committee and open to the public. This examination may not be conducted earlier than three quarters after the date of advancement to doctoral candidacy. A full copy of the student's dissertation must be in the hands of each of the student's doctoral committee members four weeks before the dissertation hearing. An abstract of the student's dissertation must be in the hands of all faculty members ten days before the dissertation defense. It is understood that the edition of the dissertation given to committee members will not be the final form, and that the committee members may suggest changes in the text at the defense. Revisions may be indicated, requiring this examination to be taken more than once. Acceptance of the dissertation by the university librarian represents the final step in completion of all requirements for the Ph.D.

9. Time Limits

Precandidacy status is limited to four years. Candidates for the doctorate remain eligible for university support for eight years. Instructional support (teaching assistantships, readerships, and tutors) is limited to six years (eighteen quarters). The doctoral dissertation must be submitted and defended within nine years. This is in accordance with university policy. *Normative time, which is the expected time to complete all requirements for the Ph.D., is six years for anthropology students.*

Introduction to Required Core Courses

ANGR 280A. Core Seminar in Social Anthropology. Core seminar focuses on individual action and social institutions.

ANGR 280B. Core Seminar in Cultural Anthropology. Core seminar focuses on personal consciousness and cultural experience.

ANGR 280C. Core Seminar in Psychological Anthropology. Core seminar focuses on

motives, values, cognition, and qualities of personal experience.

ANGR 280D. Core Seminar in Anthropological Archaeology. Integral part of the training for graduate students focusing on Anthropological Archaeology. It is one of a set of core anthropology courses available to graduate students; required of anthropological archaeology students but open for students in other subfields.

ANGR 280E. Core Seminar in Biological Anthropology. This seminar will examine the central problems and concepts of biological anthropology, laying the foundation for first-year graduate students in Biological Anthropology as well as providing an overview of the field for graduate students in other areas of anthropology.

ANGR 281A-B. Introductory Seminars. These seminars are held in the first two quarters of the first year of graduate study. Faculty members will present an account of their current research and interests. When appropriate, a short preliminary reading list will be given for the particular lecture.

ANGR 263. Anthropology of Language and Discourse. Examines the theoretical and methodological foundations and principal research questions of Linguistic Anthropology, providing the fundamentals for graduate study in this area. Required for students specializing in Linguistic Anthropology, and open to other students. *Prerequisite: graduate standing in anthropology or consent of instructor.*

NOTE: Not all anthropology courses are offered every year. Please check the quarterly UCSD Schedule of Classes issued each fall, winter, and spring, for specific courses.

The Melanesian Studies Resource Center and Archive

These facilities embody the substantial interests in the Pacific Basin that are represented on the UCSD campus and the special prominence of the UCSD Department of Anthropology in the study of cultures and societies of Oceania and especially of Melanesia. In cooperation with the UCSD libraries, the Melanesian Studies Resource Center and Archive has two major projects. First, there is an ongoing effort to sustain a library collection of monographs, dissertations, government

documents, and journals on Melanesia that make UCSD the premier center for such materials in the United States. Second, there is an endeavor to collect the extremely valuable unpublished literature on Melanesia, to catalog such materials systematically, to produce topical bibliographies on these holdings, and to provide microfiche copies of archival papers to interested scholars and to the academic institutions of Melanesia. This innovative archival project is intended to be a model for establishing special collections on the traditional life of tribal peoples as dramatic social change overtakes them. In the near future, anthropological research on tribal peoples will take place largely in archives of this kind. These complementary collections will support a variety of research and teaching activities and are already attracting students of Melanesia to this campus.

The Melanesian Studies Resource Center and Archive are directed by members of the Department of Anthropology faculty, in collaboration with Geisel Library.

The Archaeological Research Laboratory

Archaeology laboratories were established at UCSD in 1995. The present facilities are geared to the study of lithics, ceramics, biological remains, and other small finds retrieved on faculty expeditions in the old and new worlds, including Belize, Israel, Jordan, and Peru. Multimedia research, AutoCAD, and other computer based studies are carried out in the lab. Undergraduate and graduate students are encouraged to participate in lab studies.

The Biological Anthropology Laboratory

The biological anthropology laboratories have twin missions in teaching research. They house collections of modern skeletal material and fossil hominid casts used for teaching both at the lab and in local outreach presentations. The primary research focus involves a large collection of histological sections and computerized images of living and postmortem human and non-human primate brains that were obtained through magnetic resonance scans. These are reconstructed in 3D using state-of-the-art equipment for comparative analysis and study of the evolution of the

human brain. Undergraduate and graduate student involvement in the lab is welcomed.

The Anthropology of Modern Society Faculty Research Group

The Anthropology of Modern Society is a project of graduate training and research dedicated to the critical study of modernity and its counterpoints. The group is concerned with the changing nature of membership in modern society. Its participants focus on issues of citizenship and democracy, social formations in tension with the nation-state, modern subjectivities, social and religious movements, governmental rationalities and public works, transnational markets and migrations, relations of local to global processes within the current realignments of regional, national, and transnational sovereignties, and the social life of cities as making manifest these kinds of concerns. Participants are committed to reorienting anthropological theory and ethnographic practice towards such contemporary social and political problems. Guiding this project is the group's interest in combining critical theory with a comparative and empirically grounded study of cases to constitute an anthropology of modernity.

Director: James Holston, Department of Anthropology, (858) 534-0111.

COURSES

For course descriptions not found in the 2006–2007 General Catalog, please contact the department for more information.

Note: Not all courses are offered every year. Please check the quarterly *Schedule of Classes* for specific courses issued fall 2006, winter 2007, and spring 2007.

ANTHROPOLOGY: LOWER-DIVISION

ANLD 1. Introduction to Culture (4)
An introduction to the anthropological approach to understanding human behavior, with an examination of data from a selection of societies and cultures.

ANLD 2. Human Origins (4)
An introduction to human evolution from the perspective of physical anthropology, including evolutionary theory and the evolution of the primates,

hominids, and modern humans. Emphasis is placed on evidence from fossil remains and behavioral studies of living primates. *Prerequisite for upper-division biological anthropology courses.*

ANLD 3. World Prehistory (4)

This course examines theories and methods used by archaeologists to investigate the origins of human culture. A variety of case studies from around the world are examined. *(Recommended for many upper-division archaeology courses.)*

ANLD 5. The Human Skeleton (4)

This course will introduce students to all the bones in the body with an emphasis on function by detailing areas of muscle attachment and bone shape.

ANLD 7. The Paradox of Social Life (4)

Humans being as selfish as they are, how can they live together? Beginning with the imagined "social contract," an examination of a variety of societies aims at showing the basis for the unlikely fact of human sociability.

ANLD 23. Debating Multiculturalism: Race, Ethnicity, and Class in American Societies (4)

This course focuses on the debate about multiculturalism in American society. It examines the interaction of race, ethnicity, and class, historically and comparatively, and considers the problem of citizenship in relation to the growing polarization of multiple social identities.

ANLD 42. The Study of Primates in Nature (4)

Major primate field studies will be studied to illustrate common features of primate behavior and behavioral diversity. Topics will include communication, female hierarchies, protocultural behavior, social learning and tool use, play, cognition and self-awareness. *(Prerequisite for several upper-division biological anthropology courses.)*

ANLD 87. Freshman Seminar (1)

The Freshman Seminar Program is designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminars are offered in all campus departments and undergraduate colleges. Topics vary from quarter to quarter. Enrollment is limited to 15-20 students, with preference given to entering freshmen. *Prerequisites: none.*

ANLD 90. Undergraduate Seminar (1)

The seminar will focus on a variety of issues and special areas in the field of anthropology. The seminar will meet a total of eight hours during the quarter.

**ANTHROPOLOGY:
PROGRAM COURSES**

ANPR 105. Social Anthropology (4)

A systematic analysis of social anthropology and of the concepts and constructs required for cross-cultural and comparative study of human societies. *Prerequisite: upper-division standing. (Required for all majors in anthropology.)*

ANPR 106. Cultural Anthropology (4)

A web of problematic meanings lies behind social relationships and institutional frameworks. This perspective plays an important role in the discussion of human affairs. Course considers the concept of culture in anthropology as a particularly forceful statement of

such a perspective. *Prerequisite: upper-division standing. (Required for all majors in anthropology.)*

ANPR 107. Psychological Anthropology (4)

Interrelationships of aspects of individual personality and various aspects of sociocultural systems are considered. Relations of sociocultural contexts to motives, values, cognition, personal adjustment, stress and pathology, and qualities of personal experience are emphasized. *Prerequisite: upper-division standing. (Required for all majors in anthropology.)*

ANPR 187B. Intern Seminar in Ethnography and Archaeology (2)

Seminar complements students' research in the Academic Internship Program in ethnography and archaeology at the Museum of Man. Readings and discussions focus on problems in the analysis of material culture and classifications of artifacts and site excavations. Research paper required. *Prerequisites: ANPR 106 and simultaneous enrollment in Warren 197: Ethnography Archaeology-Museum of Man. (P/NP grades only.) Department approval required.*

ANPR 194S. Middle East Archaeological Field School (12)

The archaeological field school will take place in Jordan. It is an introduction to the design of research projects, the techniques of data collection, and the methods of excavation. Includes post-excavation lab work, study trips, and field journal. *Prerequisite: upper-division standing or consent of instructor.*

ANPR 195. Instructional Apprenticeship in Anthropology (4)

Course gives students experience in teaching of Anthropology at the lower-division level. Students, under direction of instructor, lead discussion sections, attend lectures, review course readings, and meet regularly to prepare course materials and evaluate examinations and papers. Course not counted toward minor or major. *Prerequisites: consent of instructor and department stamp, upper-division standing, grade of A in course to be taught or equivalent.*

ANPR 196A. Thesis Research (4)

Independent preparation of a senior thesis under the supervision of a faculty member. Completion of this course with a grade of at least B+ is a prerequisite to ANPR 196B. *Prerequisites: students will be admitted by invitation of the department. Department approval required.*

ANPR 196B. Thesis Research (4)

Independent preparation of a senior thesis under the supervision of a faculty member. Students begin two-quarter sequence in fall quarter. *Prerequisite: completion of ANPR 196A with grade of B+ or better.*

ANPR 197. Field Studies (4)

Individually arranged field studies giving practical experience outside the university. *Prerequisites: consent of instructor and department approval required. (P/NP grades only.)*

ANPR 198. Directed Group Study (2-4)

Directed group study on a topic or in a field not included in the regular departmental curriculum by special arrangement with a faculty member. *Prerequisites: consent of instructor and upper-division standing. (P/NP grades only.) Department approval required.*

ANPR 199. Independent Study (2-4)

Independent study and research under the direction of a member of the faculty. *Prerequisites: consent of instructor. (P/NP grades only.) Department approval required.*

**ANTHROPOLOGY:
BIOLOGICAL ANTHROPOLOGY**

These courses can be counted for the biological anthropology minor or concentration.

ANBI 100. Special Topics in Biological Anthropology (4)

Course usually taught by visiting faculty in biological anthropology. Course will vary in title and content. When offered, the current description and title is found in the current *Schedule of Classes* and the anthropology department Web site. (Can be taken a total of four times as topics vary.)

ANBI 101. Special Topics in Bio-Medical Anthropology (4)

Course usually taught by visiting faculty in bio-medical anthropology. Course will vary in title and content. When offered, the current description and title is found in the current *Schedule of Classes* and the anthropology department Web site. (Can be taken a total of four times as topics vary.)

ANBI 110. Perspectives on Human Evolution (4)

Special seminar for students who wish to explore advanced topics in biological anthropology. Course focus will change year to year. May be repeated one time for credit. *Prerequisites: upper-division standing, ANLD 2, one other course in biological anthropology, or consent of instructor. Department approval required.*

ANBI 116. The Evolution of Primate Reproduction (4)

This course examines reproductive biology and its evolution among the Order Primates. Lectures cover the hormonal control of sexual and parental behavior, the evolution of mating systems, mating tactics, and sexual selection. Human reproduction is considered in the comparative perspective. *Prerequisites: upper-division standing, ANLD 2: Human Origins or comparable, or consent of instructor.*

ANBI 132. Conservation and the Human Predicament (4)

(Same as BIEB 176.) Interdisciplinary discussion of the human predicament, biodiversity crisis, and importance of biological conservation. Examines issues from biological, cultural, historical, economic, social, political, and ethical perspectives emphasizing new approaches and new techniques for safeguarding the future of humans and other biosphere inhabitants. *Prerequisite: upper-division standing, ANLD 2 or consent of instructor.*

ANBI 140. The Evolution of the Human Brain (4)

Introduction to the organization of the brain of humans and apes. Overview of the theoretical perspectives on the evolution of the primate cortex and limbic system. Exposure to contemporary techniques applied to the comparative study of the hominoid brain. *Prerequisite: upper-division standing.*

ANBI 141. The Evolution of Human Diet (4)

The genotype of our ancestors had no agriculture or animal domestication, or rudimentary technology. Our modern diet contributes to heart disease, cancers, and diabetes. This course will outline the Natural Diet

of Primates and compare it with early human diets. *Prerequisite: upper-division standing.*

ANBI 142. The Primate Skeleton (4)

This course will compare long bones, head, and torso shape in tree-living and ground-living primates. The emphasis is on correlating locomotion with bone shapes. *Prerequisite: ANLD 42: The Study of Primates in Nature*

ANBI 143. The Human Skeleton (4)

Learn the bones of your body; how bone pairs differ even within the body, between men, women, ethnic groups; how nutrition and disease affect them. Course examines each bone, its relation with other bones and muscles that allow your movements. *Prerequisite: upper-division standing.*

ANBI 144. Human Anatomy (4)

This course will introduce students to the internal structure of the human body through dissection tutorials on CD ROM. *Prerequisite: ANLD 5: The Human Skeleton or related course.*

ANBI 145. Bioarchaeology (4)

How are skeletal remains used to reconstruct human livelihoods throughout prehistory? The effects of growth, use, and pathology on morphology and the ways that skeletal remains are understood and interpreted by contemporary schools of thought. *Prerequisite: ANLD 5: The Human Skeleton, related course, or consent of instructor.*

ANBI 146. Stable Isotopes in Ecology (4)

The stable isotopes of carbon, nitrogen, oxygen, and hydrogen in animal tissues, plant tissues, and soils indicate aspects of diet and ecology. The course will introduce students to this approach for reconstructing paleo-diet, paleo-ecology, and paleo-climate.

ANBI 147. American Creationism (4)

Over the last several decades in North America an attack has been directed toward organic evolution as the explanation for the origin of life, especially as it relates to humans. The course will review the history of the movement and its implications.

ANBI 148. Primate Behavioral Ecology (4)

The course examines various behaviors (e.g., group formation, dispersal, parenting, coalition formation) from a comparative and evolutionary perspective. Observational methodology and analytical methods will also be discussed. Lab sections are required. *Prerequisites: upper-division standing. ANLD 42. Strongly recommended: BIEB 100, Biometry or comparable statistics course, and BIEB 164, Sociobiology.*

ANBI 159. Biological and Cultural Perspectives on Intelligence (4)

Attitudes toward other individuals (and species) are often shaped by their apparent "intelligence." This course discusses the significance of brain size/complexity, I.Q. tests, communication in marine mammals and apes, complex behavioral tactics, and the evolution of intelligence. *Prerequisites: upper-division standing, any one of the following: ANLD 2, 42, BILD 3, or consent of instructor.*

ANBI 161. Human Evolution (4)

Interpretation of fossil material—its morphology, variation, phylogenetic relationships, reconstruction of ecological settings and cultural patterns of early human life—demands the integration of many disciplines. Lectures cover major stages of human evolution, time

ranges, distribution, archaeology, and distinctive morphology. *Prerequisite: ANLD 2 or consent of instructor.*

ANBI 173. Cognition in Animals and Humans (4)

(Previously titled: The issues of consciousness in animals and humans.) The last divide between humans and other animals is in the area of cognition. A comparative perspective to explore recent radical reinterpretations of the cognitive abilities of different primate species, including humans and their implications for the construction of evolutionary scenarios. *Prerequisite: upper-division standing, ANLD 2 or introductory course in evolution/animal behavior or consent of instructor.*

ANBI 175. Modeling the Behavior of our Early Ancestors (4)

Models of human evolution combine science and myth. This course examines methods used in reconstructions of human evolution. Models such as "man the hunter" and "woman the gatherer" are examined in light of underlying assumptions, and cultural ideals. *Prerequisite: upper-division standing, ANLD 2 or equivalent.*

ANBI 187A. Intern Seminar in Physical Anthropology (2)

Seminar complements students' research in the Academic Internship Program in physical anthropology at the Museum of Man. Readings and discussions focus on anatomy, pathology, and classification and x-ray analysis of skeletal remains. Research paper required. *Prerequisites: ANLD 2 and simultaneous enrollment in Warren 197: Physical Anthropology-Museum of Man. (P/NP grades only.) Department approval required.*

ANBI 187C. Intern Seminar in Ethology (2)

Seminar complements students' research in the Academic Internship Program at the San Diego Wild Animal Park and/or Zoo. Focus on problems of analysis in observational study of animal behavior and conservation in relation to ethological studies. Research paper required. *Prerequisites: ANLD 2 and one upper-division course in animal behavior, either in anthropology or biology. To qualify, must be last-quarter junior or senior with a 3.3 GPA. Simultaneous enrollment in Warren 197: Ethology Zoo. (P/NP grades only.) Department approval required.*

ANTHROPOLOGY: GENERAL

ANGN 100. Special Topics in Socio-Cultural Anthropology (4)

Course usually taught by visiting faculty in socio-cultural anthropology. Course will vary in title and content. When offered, the current description and title is found in the current *Schedule of Classes* and the anthropology department Web site. (Can be taken a total of four times as topics vary.)

ANGN 101. Special Topics in Anthropological Archaeology (4)

Course usually taught by visiting faculty in anthropological archaeology. Course will vary in title and content. When offered, the current description and title is found in the current *Schedule of Classes* and the anthropology department Web site. (Can be taken a total of four times as topics vary.)

ANGN 103. The Archaeology of Hunters-Gatherers (4)

Course examines current theoretical issues in the field of hunter-gatherer archaeology. Considerable emphasis is given to ethnographic and ethno-archaeological sources for understanding such topics as prehistoric hunter-gatherer adaptations, culture change, social

organization, and inter-group interaction. *Prerequisite: ANLD 3 recommended.*

ANGN 104. Anthropology of Fantasy (4)

A theoretical examination of the sources and relationships of public and private fantasy, based on cross-cultural studies of dreams, myths, and ritual.

ANGN 108. Archaeology of the UCSD Campus (4)

Our campus houses some of the earliest human settlements in North America. This course reviews the archaeology, climate, and environment of the sites and outlines research aimed at understanding the lives of these early peoples. *Prerequisite: upper-division standing. Permission of instructors.*

ANGN 111. Psychoanalysis and Religion (4)

With special attention to the relationship between theory and data, this course deals with the psychoanalytic approaches to the study of religion through a close examination of key ethnographic and historical studies of religious systems and experience. *Prerequisite: upper-division standing.*

ANGN 112. Language, Identity, and Community (4)

This course examines the use of language difference in negotiating identity in bilingual and bidialectal communities, and in structuring interethnic relations. It addresses social tensions around language variation and the social significance of language choices in several societies.

ANGN 114. Culture and Human Values (4)

The role of values in human society will be analyzed. Class work will include projects to develop ways of measuring values, as well as collecting and analyzing data.

ANGN 117. Culture and Communication in Education (4)

(Previously titled Anthropology of Education.) The ways in which language and culture influence educational goals and processes. Cultural and sociolinguistic explanations of school successes and failures are examined. *Prerequisite: upper-division standing.*

ANGN 119. Archaeological Field and Lab Class (8)

The archaeological field and laboratory class will take place at San Elijo Lagoon, San Diego County. It is an introduction to the research design of interdisciplinary projects, the technique of data collections, the methods of excavation and post-excavation lab work. *Prerequisite: none.*

ANGN 120. Anthropology of Religion (4)

Explores religious life in various cultures. Topics addressed include the problem of religious meaning, psychocultural aspects of religious experience, religious conversion and revitalization, contrasts between traditional and world religions, religion and social change. *Prerequisite: upper-division standing.*

ANGN 121. Digital Archaeology: GIS Foundations (4)

Concerns modern archaeological data with Geographic Information Systems and performing spatial analysis. Lectures and lab exercises—learn spatio-temporal analysis techniques with interactive online computer mapping. Hands-on skills with ArcView, GIS, and several ArcView extensions. *Prerequisite: none.*

ANGN 122. Advanced Digital Archaeology Lab (4)

Expands GIS knowledge in group project meetings and discussions interspersed with lectures on more advanced topics integrating GIS and digital archaeology. Student GIS projects will be converted into

interactive online presentations integrating maps, text documents, and archaeological imagery. *Prerequisite: permission of instructor.*

ANGN 125. Gender, Sexuality, and Society (4)

How are gender and sexuality shaped by cultural ideologies, social institutions, and social change? We explore their connections to such dimensions of society as kinship and family, the state, religion, and popular culture. We also examine alternative genders/sexualities cross-culturally. (**Note:** Students who have taken ANRG 117: Gender Across Cultures may not take this course for credit.)

ANGN 128. The Anthropology of Medicine (4)

We examine the medical profession, the sick and the healers, and culture as communication in the medical event through aspects of medical practice and medical research of medicine as well as primitive and peasant systems. *Prerequisite: upper-division standing.*

ANGN 130. The Political Economy of Early Empires (4)

Archaeological and textual evidence for selected early empires of pre-Columbian America and the Ancient Near East will be used to illuminate cross-cultural similarities and differences in the ways complex pre-capitalistic societies acquired, produced, exchanged, and distributed wealth. *Prerequisite: upper-division standing. ANLD 3: World Prehistory is recommended.*

ANGN 135. Bodies and Boundaries: Symbols in Ritual and Everyday Life (4)

This course looks at symbols in sacred and mundane spheres of life. Topics include ritual and religious symbolism; the symbolism of gender, sex, and body; representations in popular culture; and the manipulation of symbols to establish and transgress boundaries.

ANGN 149. Language in Society (4)

After a brief introduction to linguistic concepts, the course covers the relations between culture and language, how languages reflect culture, how languages change, language and social life, language and political policy.

ANGN 151. Political Anthropology (4)

Humans are goal seekers, some with public goals. Course considers ways goals are pursued, which are desirable, and how this pursuit is carried out at the local level with attention to the parts played by legitimacy and coercion.

ANGN 160. Nature, Culture, and Environmentalism (4)

Course examines theories concerning the relation of nature and culture. Particular attention is paid to explanations of differing ways cultures conceptualize nature. Along with examples from non-western societies, the course examines the western environmental ideas embedded in contemporary environmentalism.

ANGN 163. Evolution of Technology (4)

(Formerly titled Technological Revolutions and Evolution) While not really existing outside the social order, technological systems are basic to civilization. Across six millennia, this course examines their growth—complex, largely indeterminate, and marked by irregular spurts of acceleration. While comparative, it concentrates on England and America.

ANGN 167. Rituals and Celebrations (4)

Explores the nature and significance of ritual. The course will examine religious rituals, civic festivals, and popular celebrations. Topics include ritual symbolism, social and psychological aspects of ritual, life cycle rites, urban festivals, ritual theory.

ANGN 170. Research Design in Anthropological Archaeology (4)

This course trains students to design, implement, and conduct research in anthropological archaeology. Writing and presenting work in progress will take place in a seminar like forum. *Prerequisite: junior/senior standing.*

ANGN 172. Life-History Seminar and Practicum (4)

Examines life-history research as a method for understanding the cultural and psychological experience of people. Combines reading of life-histories with training in life-history research methods. Students develop a life-history project, conduct interviews, and analyze data. *Prerequisites: upper-division. ANPR107 or concurrent enrollment in ANPR 107. Consent of instructor.*

ANGN 173. General Theory (4)

This course will consider theories in anthropology and related fields which treat culture, society, and personality as causal factors in explaining human action. Emphasis will be on the propositional structures of such theories rather than the comparison of particular theorists.

ANGN 181. Foundations of Archaeology (4)

(Formerly Anthropological Archaeology) As part of the broad discipline of anthropology, archaeology provides the long chronological record needed for investigating human and social evolution. The theories and methods used in this field are examined. (Archaeology core sequence course.) *Prerequisite: ANLD 3 is recommended.*

ANGN 182. Origins of Agriculture and Sedentism (4)

Varying theoretical models and available archaeological evidence are examined to illuminate the socio-evolutionary transition from nomadic hunter-gathering groups to fully sedentary agricultural societies in the Old and New World. (Archaeology core sequence course.) *Prerequisite: ANLD 3 is recommended.*

ANGN 183. Chiefdoms, States, and the Emergence of Civilizations (4)

The course focuses on theoretical models for the evolution of complex societies and on archaeological evidence for the development of various pre- and protohistoric states in selected areas of the Old and New Worlds. (Archaeology core sequence course.) *Prerequisite: ANLD 3 is recommended.*

ANGN 184. Archaeology, Anthropology, and the Bible (4)

The relationship between archaeological data, historical research, the Hebrew Bible, and anthropological theory are explored along with new methods and current debates in Levantine archaeology. *Prerequisite: upper-division standing.*

ANGN 189. The Anthropology of the End of the World: Millenarian Movements Across Cultures (4)

Course focuses on historical and contemporary millenarian movements in the western and non-western world. Topics addressed include origins, role of prophets, conceptions of time, relation to politics and influence on social change. Examples include Christian and non-Christian movements.

ANTHROPOLOGY: REGIONAL

ANRG 104. Traditional African Societies and Cultures (4)

Attention to three main sociopolitical types of societies: egalitarian hunting and gathering groups,

loosely organized agricultural and herding groups, and centrally organized kingdoms. Representatives are considered, and societies from all parts of sub-Saharan Africa studied intensively. *Prerequisite: upper-division standing.*

ANRG 106. Study Abroad: Ancient Mesoamerica (4)

Introduction to the archaeology of Mesoamerica, taught through visits to important ancient cities and museums of Mexico and Central America. Complementary to ANLD 13 and ANRG 125. Itinerary and subject will vary, so course may be taken more than once. *Prerequisite: consent of instructor ONLY.*

ANRG 108. Hinduism (4)

An anthropological introduction to Hinduism, focusing on basic religious concepts and practices. Topics include myth, ritual, and symbolism; forms of worship; gods and goddesses; the roles of priest and renouncer; pilgrim-ages and festivals; the life cycle; popular Hinduism, Tantrism. *Prerequisite: upper-division standing.*

ANRG 113. The Mysterious Maya (4)

The archaeology, anthropology, and history of the Maya civilization, which thrived in Mexico and Central America from 1000 B.C. until the Spanish conquest. (Formerly numbered ANLD 13: The Mysterious Maya.) *Prerequisite: upper-division standing.*

ANRG 114. Urban Cultures in Latin America (4)

This course examines four interrelated and historically structured themes of urban culture in Latin America: the role of cities in organizing national space and society; immigration and race; modernism; and popular culture as new religion, music, and film.

ANRG 114-XL. Foreign Language Discussion—Urban Cultures in Latin America (1)

Students will exercise advanced foreign language skills to discuss materials and the correspondingly numbered anthropology language foreign area course. This section is taught by the course instructor, has no final exam, and does not affect the grade in the course, ANRG 114. Urban Cultures in Latin America. *Prerequisite: Concurrent enrollment in ANRG 114.*

ANRG 115. The Foundation for Social Complexity in the Near East (4)

This course critically examines the theoretical models and archaeological evidence of nascent social complexity and inequality in the Near East. The time period under consideration encompasses the shift from generalized hunting and gathering through complex hunter-gatherers to large-scale agricultural communities.

ANRG 116. Prehistory of the Holy Land (4)

(Formerly The Archaeology of Society in Syro-Palestine). Israel is a land-bridge between Africa and Asia. Course highlights the prehistory of the Levant and its interconnections from the Paleolithic period to the rise of the earliest cities in anthropological perspective. *Prerequisite: upper-division standing.*

ANRG 118. Global Islam (4)

Course aims to understand the diverse ways in which Muslims give meaning to their religion and use it as a framework to understand the world. *Prerequisite: upper-division standing.*

ANRG 121. The Archaeology of South America (4)

This course will examine archaeological evidence for the development of societies in the South American

continent. From the initial arrival of populations through to the Inca period and the arrival of the Spaniards. *Prerequisite: upper-division standing.*

ANRG 122. Peoples and Cultures of the Middle East (4)
This course explores the living structures, family and gender relations, economy, and religion in the Middle East. We will especially focus on how people come to terms with recent transformations such as nationalism, literacy, globalism, and Islamism. *Prerequisite: upper-division standing.*

ANRG 125. The Aztecs and Their Ancestors (4)
Introduction to the archaeology of the ancient culture of Mexico from the early Olmec culture through the Postclassic Aztec, Tarascan, Zapotec, and Mixtec states. Agriculture; trade and exchange; political and social organization; kinship networks; religious system, ideology, and worldviews. *Prerequisite: upper-division standing.*

ANRG 128. The Inca: Empire of the Andes (4)
The history and culture of the Inca Empire of South America and its fatal encounter with the west. Archaeological excavations, sixteenth- and seventeenth-century accounts, and ethnographies of present-day peoples of the Andes are explored. *Prerequisite: upper-division standing or permission of instructor.*

ANRG 128-XL. Foreign Language Discussion: The Inca (1)
Students will exercise Spanish foreign language skills to discuss topics related to the Inca. This is a corequisite of ANRG 128.

ANRG 132. Modernity in Brazil (4)
Construction of Brazilian modernity through four perspectives: Liberalism among slave-owning elites compared with democratic citizenship among contemporary poor, millenarian religions; construction of the urban periphery by residents; and a modernist theory (antropofagia) about authentic versus imported culture. *Prerequisite: upper-division standing.*

ANRG 143. Indigenous Peoples of Latin America (4)
Indigenous peoples in the Americas have long been dominated and exploited. They have also resisted and reworked the powerful forces affecting them. This course will trace this centuries-long contestation, focusing on ways anthropological representations have affected those struggles. *Prerequisite: upper-division standing.*

ANRG 150. The Rise and Fall of Ancient Israel (4)
(Previously titled: The Archaeology of Israel in the Iron Age.) The emergence and consolidation of the state in ancient Israel is explored by using archaeological data, Biblical texts, and anthropological theories. The social and economic processes responsible for the rise and collapse of ancient Israel are investigated. *Prerequisite: upper-division standing, ANLD 3 is recommended.*

ANRG 170. Traditional Chinese Society (4)
Course examines major institutions and culture patterns of traditional China, especially as studied through ethnographic sources. Topics include familism, religion, agriculture, social mobility, and personality. *Prerequisite: upper-division standing.*

ANRG 173. Chinese Popular Religion (4)
The religious world of ordinary precommunist times, with some reference to major Chinese religious tradi-

tions. *Prerequisite: upper-division standing. Background in pre-modern Chinese history is recommended.*

ANRG 182. Ethnography of Island Southeast Asia (4)
This is an introduction to the diverse cultures of island and peninsular Southeast Asia, including those of Indonesia, the Philippines, and Malaysia. We look at ritual, politics, gender, popular culture, and social change in agrarian and urban societies. *Prerequisite: lower-division anthropology or consent of instructor.*

ANTHROPOLOGY: GRADUATE

ANRG 200. Culture and Social Structure (4)
Culture and social structure are central concepts for understanding behavior but their relationship and joint use present problems which will be examined with the aim of increasing their explanatory power. *Prerequisite: graduate standing.*

ANRG 201. Special Topics in Anthropological Archaeology (4)
Course usually taught by visiting faculty in anthropological archaeology. Course will vary in title and content. When offered, the current description and title is found in the current *Schedule of Classes* on TritonLink, and the anthropology department Web site. (Can be taken a total of four times as topics vary.)

ANRG 202. Olmec and Maya Archaeology (4)
Course examines the birth of Olmec and Maya civilizations in the Formative period, the rise of city states during the Early Classic, the decline of the Classic Maya, and the resurgence of the Postclassic period. *Prerequisite: graduate standing in anthropology.*

ANRG 211. Psychoanalysis and Religion (4)
With special attention to the relationship between theory and data, this course deals with psychoanalytic approaches to the study of religion through a close examination of key ethnographic and historical studies of religious systems and experience. *Prerequisite: graduate standing.*

ANRG 219. Seminar in Political Anthropology (4)
The focus here is "politics," broadly constructed, in various societies. Analysis is from the perspective of the resources deployed by all involved, including but not limited to power, with emphasis on the role of culture and social structure. *Prerequisite: graduate standing*

ANRG 223. Anthropological Interviewing (4)
The course teaches techniques of long-term, intensive interviewing in fieldwork settings with an emphasis on psychodynamic inference and its usefulness in different cultural settings. *Prerequisite: graduate standing in anthropology.*

ANRG 224. Advanced Topics in the Anthropology of Gender (4)
A critical analysis of ethnographic and theoretical texts focusing on the sociocultural study of gender. We will also draw on studies of gender and feminist theory from other disciplines (e.g., history, philosophy) to illuminate issues relevant to anthropology. *Prerequisite: graduate standing in anthropology or permission of instructor.*

ANRG 226. Ethnography of Christianity (4)
Directed to graduate students planning ethnographic work in Christian societies, this course explores variations in the interpretation and expression of

Christianity using historical and ethnographic sources. *Prerequisite: graduate standing or consent of instructor.*

ANRG 230. Department Colloquium (1)
A forum to present work by faculty, students, and guests. Course will be offered quarterly. *Prerequisite: graduate standing in anthropology. (S/U grades only.)*

ANRG 231. The Social and Cultural Works of Sigmund Freud (4)
In this seminar we shall examine Freud's works on culture, gender, morality, religion, sex, society, and the arts, and assess their contemporary anthropological relevance. *Prerequisite: graduate standing.*

ANRG 234. Dynamics of Culture (4)
Examination of the actual operation of culture with attention to the importance of cultural Products and social structures. Course goal is to develop skill in understanding the influence, direct and indirect, of culture and behavior. *Prerequisites: graduate standing*

ANRG 237. Enduring Issues in Anthropological Theory (4)
The seminar focuses on a number of fundamental issues that have long been at the core of inquiry and explanation in the discipline including the place of the individual in society, the role of values, the effects of group structure, and the ways in which cultures change. *Prerequisite: none.*

ANRG 238. Citizenship and the Nation State (4)
This course examines various conceptions of citizenship, nation, and state and considers their historical development as fundamental to the organization of most contemporary societies. It covers a range of theoretical readings, recent debates, and case studies. *Prerequisite: graduate standing.*

ANRG 251. Ethnographies of Modern Society (4)
This seminar explores the experience and representation of modernity through ethnography. Readings will highlight such issues as: the social dynamics of the city; postcoloniality; globalization and transnationalism; the politics of culture; contemporary religious movements; and gender and modernity. *Prerequisite: graduate standing or permission of the instructor.*

ANRG 256. Seminar on Brain Evolution (4)
We will review the neural basis of cognition in humans and other primates. Neurobiological findings will be related to contributions from various sub-fields of anthropology. Brain/mind associations will be explored in the context of hominid evolution. *Prerequisite: graduate student in anthropology or consent of instructor.*

ANRG 257. Mind, Self, and Identity (4)
This seminar critically examines social, cultural, and psychological theories of the person, and their relationship to conceptions of the person found in moral political and religious discourses. It explores the role of concepts of the person in ethnographic research. *Prerequisite: graduate standing in anthropology.*

ANRG 258. Analytical Methods in Archaeology (4)
Specialized scientific techniques are increasingly important to archaeology. This seminar examines chronometric date techniques, site-formation processes, and geoarchaeology and pedology, chemical analyses of soils, zooarchaeology, palaeoethnobotany, and how land-use strategies can be inferred from archaeological remains. *Prerequisite: graduate standing.*

ANGR 260. Psychodynamic Anthropology (1)

The focus of the seminar will be on the relation between psychodynamic models and culture and society. Readings and discussion. *Prerequisite: graduate standing. (S/U grades only.)*

ANGR 263. Anthropology of Language and Discourse (4)

Examines the theoretical and methodological foundations and principal research questions of Linguistic Anthropology, providing the fundamentals for graduate study in this area. (Required for students specializing in Linguistic Anthropology as one of their four core courses. Open as an elective course to others.) *Prerequisite: graduate standing.*

ANGR 264. Culture, Power, and the State (4)

This seminar examines distinct theoretical approaches to the contested concepts of culture, power, and the state. We will read fundamental theoretical texts and current ethnographies to examine how cultural beliefs, nationalist ideologies, and ethnic relations shape subjectivities and identities. *Prerequisite: graduate standing.*

ANGR 265. Cultures of Late Capitalism (4)

Radical transformations shifted the boundaries between what is considered political and apolitical, public and private, and legitimate at the turn of the twenty-first century. This class studies how these developments shape and are shaped by local political structures. *Prerequisite: graduate standing.*

ANGR 266. Classics in "Culture and Personality" (4)

This seminar will examine the classic studies of "Culture and Personality," such as Cora DuBois' study of Alor and Gregory Bateson's and Margaret Mead's study of Bali, which laid the foundation for the psychodynamic approach to psychological anthropology. *Prerequisite: graduate standing.*

ANGR 267. The Anthropology of Ethics (4)

This course examines ethical and moral ideas and their relation to other aspects of culture. It also considers how attention to the ethical dogma can provide a foundation for rethinking social scientific theories of culture and practice. *Prerequisite: graduate standing.*

ANGR 268. Anthropology of Cities (4)

Although cities are fundamental sites of emergent social relations and cultural forms, the anthropological study of modern urban society remains problematic. This seminar aims to develop an anthropological understanding of cities, focusing on recent ethnographies, methodological problems, and theoretical debates. *Prerequisite: graduate standing.*

ANGR 269. Current Readings on Latin America (4)

This is a graduate reading seminar focusing on new anthropological works about Latin America. We will cover a wide range of critical current issues, including poverty, the state, gender, race/ethnicity, indigenous politics, memory, and violence. *Prerequisite: graduate standing.*

ANGR 273. General Theory (4)

This seminar will be concerned with theories that attempt to construct an integrated account of personality, culture, and society, and how such general theories can be applied to the modern world. Classic and current theorists of modernization will be examined.

ANGR 278. Evolutionary Perspective on Cognition (4)

This seminar examines key issues in (human and non-human) primate cognition using perspectives from primate behavior, cognitive ethology, primate and human evolution, and human cognitive science. Topics include tool use, imitation, language, culture, tertiary relations, theory of mind, and models of mind. *Prerequisite: open to graduate students in anthropology and other departments and to advanced undergraduates with instructor's approval.*

ANGR 279. Special Topics in Language and Society (4)

Selected topics in the anthropology of language, such as linguistic ideology, language and identity, multilingualism, discourse analysis. Topics will vary from year to year, and the course may be repeated with instructor's permission. *Prerequisite: graduate standing.*

ANGR 280A. Core Seminar in Social Anthropology (4)

Core seminar focuses on individual action and social institutions. *Prerequisite: graduate standing in anthropology or consent of instructor.*

ANGR 280B. Core Seminar in Cultural Anthropology (4)

Core seminar focuses on personal consciousness and cultural experience. *Prerequisite: graduate standing in anthropology or consent of instructor.*

ANGR 280C. Core Seminar in Psychological Anthropology (4)

Core seminar focuses on motives, values, cognition, and qualities of personal experience. *Prerequisite: graduate standing in anthropology or consent of instructor.*

ANGR 280D. Core Seminar in Anthropological Archaeology (4)

Seminar focuses on the development of archaeological theory. Required of archaeological and biological anthropology graduate students; sociocultural students may take this course to fulfill core distribution requirement. *Prerequisite: graduate standing in anthropology or consent of instructor.*

ANGR 280E. Core Seminar in Biological Anthropology (4)

This seminar will examine the central problems and concepts of biological anthropology, laying the foundation for first-year graduate students in Biological Anthropology as well as providing an overview of the field for graduate students in other areas of anthropology. *Prerequisite: graduate standing in anthropology or consent of instructor.*

ANGR 281A-B. Introductory Seminar (1)

These seminars are held in the first two quarters of the first year of graduate study. Faculty members will present an account of their current research and interests. When appropriate a short preliminary reading list will be given for the particular lecture. *Prerequisite: first-year graduate standing in anthropology.*

ANGR 283A. Fieldwork Seminar (4)

A seminar given to acquaint students with the techniques and problems of fieldwork. Students carry out ethnographic field research in a local community group under faculty supervision. *Prerequisite: anthropology graduate students or consent of instructor.*

ANGR 286. Topics in Anthropological Archaeology (4)

Seminar examines the central problems and concepts of archaeological anthropology, laying the foundation for first-year graduate students. Also provides an overview of the field in other areas of archaeology. Entire anthropological archaeology faculty and gradu-

ate students participate. *Prerequisite: graduate standing in anthropology.*

ANGR 287. Human Biology and Social Policy (4)

Several important issues relate to social interpretations of human biological variation (e.g., race, sex, sexual orientation), putative universals (e.g., violence), and origins (creation or evolution). Seminar explores the thesis that biosocially trained anthropologists can contribute to educating people about these debates. *Prerequisite: graduate standing in anthropology.*

ANGR 288. Archaeology Practicum (12)

Field and laboratory training for graduate students in archaeology. Students will design and implement archaeological fieldwork or analyze data collected in the field. *Prerequisite: permission of the instructor.*

ANGR 290. Primate Social Behavior/Neural Correlates (4)

Explores the interplay between primate brain and primate social behavior from the perspectives of neuropsychology, cognitive ethology, and primate field studies. Issues in social cognition will include attention and gaze, working memory, emotions, awareness, and theory of mind. *Prerequisite: graduate standing or consent of instructor.*

ANGR 291. Archaeology of Highland Mexico (4)

Survey of Mesoamerican archaeology focusing on highland Mexico. Topics covered: settling of Mesoamerica, agricultural origins, development of social complexity, rise of cities, emergence of large-scale states. *Prerequisite: graduate standing.*

ANGR 292. Social Evolution/Iron Age Levant (4)

The Iron Age (ca. 1200-586 BCE) represents the rise of small secondary states throughout the southern Levant. Seminar explores these archaic states through ideology, technology, subsistence, trade and social organization based on archaeological data, historical texts, and anthropological models. *Prerequisite: graduate standing.*

ANGR 293. Primate Socioecology (4)

Course examines theories for the causes of sociality in primates. Implications for our understanding of human evolution are considered. *Prerequisite: graduate standing or permission of instructor.*

ANGR 295. Master's Thesis Preparation (1-12)

The student will work on the master's thesis under the direction of the departmental committee chair. The course will be taken in the student's second year. *Prerequisites: graduate student in anthropology and permission of master's thesis chair. (S/U grades only.)*

ANGR 296A. Fieldwork Proposal Preparation (4)

The student will work in cooperation with his or her departmental committee to develop a research proposal for the doctoral research project. *Prerequisites: graduate standing in anthropology and permission of departmental committee chair. (S/U grades only.)*

ANGR 296B. Fieldwork Proposal Preparation (4)

The student will work in cooperation with his or her departmental committee to develop a research proposal for the doctoral research project. *Prerequisites: advanced graduate standing in anthropology and permission of departmental committee chair. (S/U grades only.)*

ANGR 297. Research Practicum (1-4)

Supervised advanced research studies with individual topics to be selected according to the student's special interests. *Prerequisite: for anthropology graduate students who have returned from their field research. (S/U grades permitted.)*

ANGR 298. Independent Study (1-4)

Supervised study of individually selected anthropological topics under the direction of a member of the faculty. *Prerequisite: graduate standing. (S/U grades only.)*

ANGR 299. Dissertation Research (1-12)

Prerequisite: Ph.D. candidacy in anthropology. (S/U grades only.)

ANGR 500. Apprentice Teaching (4)

Anthropology graduate students participate in the undergraduate teaching program during one quarter anytime in the first four years of residence. Teaching may be in the anthropology department or other departments or programs on campus. Equivalent to duties expected of a 50 percent T.A. Enrollment in four units documents the Ph.D. requirement. (S/U grades only.) *Prerequisite: graduate student in anthropology.*

ANGR 501. T.A.ing in Sixth College/C.A.T. (4 or 6)

Consideration and development of pedagogical methods appropriate to undergraduate teaching in the interdisciplinary Sixth College Core Sequence, Culture, Art, and Technology under supervision of Core Program faculty, with assistance of the Core Program director, associate director for the Writing Program and the associate director of the Thematic program. (S/U grades only.) *Prerequisite: Anthropology graduate student teaching for the C.A.T./Sixth College Writing Program.*

Applied Mechanics and Engineering Sciences (AMES)

The Graduate Program

Applied Ocean Science (AOS) is an interdepartmental Ph.D. program with a focus on the interface between ocean exploration and technology. It is administered by an interdepartmental group composed of members of the faculties of cooperating departments: the Graduate Department of the Scripps Institution of Oceanography (SIO), the Department of Mechanical and Aerospace Engineering (MAE), the Department of Structural Engineering (SE), and the Department of Electrical and Computer Engineering (ECE).

This interdepartmental curriculum combines the resources of these departments to produce oceanographers who are knowledgeable about modern engineering and instrumentation, as well as marine oriented engineering scientists who are familiar with the oceans. Since physical, chemical, geological, and biological aspects of the oceans and all forms of engineering may be involved, the curriculum provides maximum flexibility in meeting the needs of each individual student.

Candidates for admission should apply directly to one of the departments participating in the Applied Ocean Science program, listing Applied Ocean Science as an area of specialization. The choice of department should be based on the individual student's planned area of major emphasis. Applicants will be expected to meet the admission requirements of the department to which they have applied.

The program is primarily directed toward the Ph.D. degree. However, both the candidate of philosophy and master of science degree (either Plan I, thesis, or Plan II, comprehensive examination) also will be offered under special circumstances. Students applying for a terminal master's program should be aware of any special requirements for the department to which they apply.

The degrees completed under this program in the Department of SIO will carry the title "Oceanography." Those degrees completed in the other cooperating departments will have the parenthetical title "(Applied Ocean Science)" appended to the appropriate authorized title.

COURSES

All students enrolled in the program are required to take or demonstrate proficiency in the following core courses or their equivalent:

SIO 210 (Physical Oceanography)

SIO 240 (Marine Geology)

SIO 260 (Marine Chemistry)

SIO 280 (Biological Oceanography)

MAE 294A-B-C (Methods in Applied Mechanics) or

Math. 210A-B-C (Mathematical Methods in Physics and Engineering) or

SIO 203A-B-C (Methods of Applied Analysis)

The students are expected to enroll in the Applied Ocean Science Seminar (SIO 208) throughout their period of residency. This seminar will make use of outside speakers, faculty members, and students in presenting various topics on applied ocean science and related

fields. It provides a central forum in which all AOS students can participate. In addition to these basic requirements, the student will be subject to whatever additional requirements are prescribed by his or her department.

Course work occupies much of the first one and one-half to two years of graduate study. During this period there are numerous opportunities for students to investigate the research programs of the various research groups on the campus, and cultivate association with professors and research groups which can provide support and guidance for thesis research in their selected field of specialization. In consultation with an adviser, students will plan a curricular path of courses which will adequately prepare them in their field of specialization. The courses may be selected from the entire catalog of courses available on the UCSD campus or where appropriate from other UC campuses and other universities.

Audiology

Joint Doctoral Program between San Diego State University and the University of California, San Diego

Erik Vilre, M.D., Ph.D.

Erika M. Zettner, Ph.D.

Professional Doctorate in Audiology (Au.D.)

A professional doctorate in audiology (Au.D.) is offered jointly by San Diego State University (SDSU) and the University of California, San Diego (UCSD). The Au.D. program is a four-year graduate degree program designed for individuals who intend to specialize in clinical practice and to meet professional standards requiring a clinical doctorate as the entry-level degree for a certified audiologist. Graduates of this program will have the knowledge base, research exposure, and advanced clinical skills to enter the workforce in any setting, and will be prepared to function as independent audiology professionals in the expanding health care arena. The program encompasses academic, clinic, and research experiences in audiology and otology, through the combined resources from the Department of Speech, Language, and Hearing Sciences at SDSU and the Department of Surgery (Otolaryngology) in the School of Medicine at UCSD. More information about the program and admission can be found on the Web site, <http://chhs.sdsu.edu/slhs/audmain.php>.

Faculty members of the cooperating institutions teach courses, provide clinic instruction and research experiences, and are available as members of joint doctoral committees and advisers for student doctoral projects.

Admissions

Students will apply to the Au.D. Joint Doctoral Program through SDSU. It is expected that students will come into this program from a variety of different science backgrounds, including communicative disorders, biological and physical sciences, engineering, psychology, nursing, or a pre-med curriculum. Applicants for admission to the Au.D. program must meet the general requirements for admission to both universities with classified graduate standing as outlined in the respective catalogs. Applicants must also meet the special requirements of this program. These include (a) overall grade-point average of 3.20 or better in undergraduate courses and in any graduate courses completed; (b) submission of scores on the GRE with satisfactory performance on both quantitative and verbal portions of the examination; (c) prerequisite completion of at least one course in statistics, three courses

in biological/physical sciences, two courses in behavioral/social sciences, and one course in American Sign Language. Deficiencies in these areas may be completed after admission to the program if approved by the admissions committee.

Applicants must submit transcripts of all post-secondary coursework, three letters of recommendation from former or current professors, supervisors, or other appropriate persons able to judge their academic potential, and an applicant essay (statement of purpose) indicating their interests and strengths relative to their career objectives. Details of these requirements will be made available with the application form. Assuming that students meet the requirements for admission outlined above, each student admitted to the program will have a program advisor evaluate their preparation in view of their needs and career goals, as well as professional certification requirements.

Applicant files are reviewed as a group by an admissions committee composed of Au.D. program faculty from each campus. Other Au.D. program faculty may review files and make recommendations to the admissions committee. Given the limited number of spaces available (ten new admissions each year are anticipated, subject to available facilities), the admissions committee will select the best-qualified applicants to fill the available spaces. No minimum set of qualifications will guarantee an applicant admission to the program. The admissions committee will make recommendations for admission to the graduate deans from each campus.

Students seeking admission to the Au.D. program should consult the program's Web site or contact the Au.D. program directors for more information, online applications, and application instructions. A complete application requires the following:

- appropriate application form
- applicant essay (detail provided in application packet)
- transcripts of academic work complete
- results of Graduate Record Examination
- three letters of recommendation

Students will be admitted to the Au.D. program only in the fall semester (first year is at SDSU). Complete applications must be received by January 20 to be considered for the program beginning in the following fall semester.

Post Master's Degree Admissions: Students admitted to the Au.D. program with a master's degree in audiology will be expected to complete the four-year Au.D. curriculum. However, some students may have had a master's preparation in audiology in which some of the course work was similar to some of the foundation courses in the Au.D. program. Upon entering the program, each individual will be assessed to determine competencies/knowledge in material that would put them on par with expectations for the Au.D. program. For some of the foundation core courses offered the first year at SDSU, e.g., Audiology 705, 710, 725, students may be given credit for the courses or be required to substitute a Doctoral Special Study (Audiology 798) course for one or more of these courses to ensure competencies or remediate deficiencies if approved by the program faculty. Credit for some of the first year clinic units may also be approved based on work experience; however, a full-complement of expected clinical skills must be demonstrated.

REQUIREMENTS FOR THE AU.D. DEGREE

Upon admission to the program, each student will be assigned a faculty adviser. The faculty adviser will help the student select a program of study to meet all program requirements. The Au.D. program is a four-year program, including summer semesters (summer semester between year two and year three may be optional if the requirements are satisfied in other ways). An exact unit minimum is not specified due to the mixing of semester units (SDSU) and quarter units (UCSD) and differences in clinical hours at different settings; however, the program is approximately 134 semester-equivalent course units. All students in the Au.D. program will fulfill the following requirements. Any alternative method of fulfilling these requirements requires advanced written permission from the program directors.

Residency

After formal admission to the Au.D. program, the student must complete a minimum of course hours equivalent to one year's full-time enrollment at each campus. The definition of residence must be in accord with the regulations of San Diego State University and the University of California, San Diego. The program is designed to be shared between the two campuses. The first year is entirely at SDSU, the second year is

entirely at UCSD, and the third year will have options from both campuses. The fourth year of the program will be a full-time clinical externship at a program-approved clinic agency or site. Both campuses will share equally in the academic, clinic, and research components of the program.

Courses

The program for each student will consist of prescribed set of courses, with the first year of courses entirely at SDSU and the second year of courses entirely at UCSD. The student's faculty advisor will approve any changes to the standard curriculum.

Clinic

Each student will progress through a variety of clinical experiences involving patient assessment and management throughout their program of study. Clinic experiences will require concurrent enrollment in clinic courses appropriate for the campus in which they are doing the clinical work. These supervised clinical experiences are completed in the SDSU Audiology Clinic, UCSD Otology Clinics, and in community field sites. Clinic courses may be repeated as needed and require adviser approval prior to enrollment. Prior to the fourth year externship, each student will obtain approximately 500 hours of clinic experience. A minimum of 2,000 clinical hours is required by the end of the program.

- **Clerkship in Otology.** All students will have at least one quarter of a clinical rotation with otology staff associated with UCSD. Students will accompany otology faculty during their clinics, surgeries, and receive training in one or more of the following areas—clinical otology, pre-and post-operative assessment of patients, pharmacology related to otology, design and implementation of clinical trials with balance disorders, and pediatric otology.
- **Clinical Staffings.** In addition, all students will be required to regularly participate in formal clinical case study/staffing experiences. At SDSU, these clinical staffings include student and faculty presentations and discussions of interesting cases seen in their clinics. At UCSD, these staffings include, the Chairman's Conference, where Au.D. students/residents and medical staff discuss otological problem cases and disorders and the Neurotology Conference, where UCSD and community physicians, and students/residents discuss

cases dealing with neurological diseases and vestibular disorders.

- **Fourth-Year Externship.** The fourth-year externship is a full-time clinical experience in an approved agency/site. These externships may require a competitive interview process by the agency. Externship sites may be in other parts of the country. All students in their fourth-year externship must also enroll in the online clinical seminar at SDSU each semester.

Research Practicum

Each student will spend at least two semesters or quarters participating in research being done by program faculty. Students are encouraged to spend time in two different laboratories (one on each campus) with different methodologies. Students will not be conducting independent research, but will actively participate in data collection and analysis at the discretion of the lab director. Students must enroll in the research practicum course for the appropriate campus.

Examinations

All students in the program will be evaluated at the following levels:

- **First Year.** Students must have achieved a 3.0 grade-point average on all core and elective courses during the first year, and have appropriate clinical skills as determined by the student's clinic supervisors. The student's ability to integrate the academic material and clinic procedures appropriate for the end of the first year will be assessed through a first year qualifying exam. This examination will be a written examination to be taken at the end of the spring semester. The first year qualifying exam may be repeated once following additional directed study by the student's adviser. Students must pass the first year evaluation in order to enroll in second year courses.
- **Second Year.** Students must have achieved a cumulative grade-point average of 3.0 on all core and elective courses, and have appropriate clinical skills as determined by the student's clinic supervisors. The student's ability to integrate the academic and clinic procedures appropriate for the end of the second year will be assessed through a second year qualifying examination. This examination will be a written examination to be taken at the end of the spring quarter. The second year qualifying examination may be repeated once

following additional directed study by the student's adviser. Students must pass the second year evaluation in order to enroll in third year courses.

• **Comprehensive Examination.** At the end of the third year, and after advancement to candidacy (see below), the student will take a comprehensive examination, which has an integrative written component and a practical component involving clinical procedures. The comprehensive examination must be passed before a student can be registered for the externship.

Advancement to Candidacy

Candidates will be recommended for advancement to candidacy after successfully completing all course, laboratory rotation, and clinic requirements for Year 1 and Year 2 (with a minimum grade-point average of 3.0), satisfactory performance on the first and second year evaluations, and approval of the doctoral project proposal. Students cannot enroll in the doctoral project course, take the comprehensive examination, or register for their externship until advanced to candidacy. The program's executive committee recommends students eligible for advancement to candidacy to the graduate deans of both institutions

Doctoral Project

Each student will complete an innovative doctoral project. The doctoral project can take the form of a number of different options, e.g., a research-based investigation, evidence-based position paper, critical literature review with applications to clinical problem solving, grant proposal, development of a clinical protocol based on published research findings, or other projects proposed by the student that are accepted by the committee. The project should be designed to allow an opportunity to demonstrate critical thinking on clinical issues. Each student will select a doctoral project committee comprised of two Au.D. program faculty (one from each campus) and a faculty member external to the program. The chair of the committee can be from either campus. The executive committee will approve each student's doctoral project committee. All doctoral projects will be written in a format approved by the student's doctoral project committee. The student's final written document will be approved by the stu-

dent's doctoral project committee. Each student will enroll in the appropriate doctoral project course depending on the campus in which their committee chair resides.

The Doctor of Audiology (Au.D.) degree will be awarded jointly by the Regents of the University of California and the Trustees of The California State University in the names of both cooperating institutions.

Funding for graduate students cannot be guaranteed, although every effort will be made to provide some financial support for as many students as possible, through graduate/teaching assistantships, research grants, clinical traineeships, and/or scholarships. Financial support will be awarded consistent with the policies of the two universities. Tuition and fees will be charged in accordance with the extant policies at the campus in which the student is matriculated in a given year.

COURSES

For course descriptions not found in the 2006–2007 General Catalog, please contact the department for more information.

AUD 236. Preceptorship in Neuro-Otology (2)

Observations in UCSD Otology clinic. Learn about procedures for taking histories and performing clinical examinations, patient treatment, and patient education from otologists. *Prerequisites:* second-year Au.D. student or consent of instructor.

AUD 255. Anatomy and Physiology of the Auditory and Vestibular Systems (4)

Detailed anatomy of the auditory and vestibular systems, including the ultra-structure, histology, and neuronal connections of the systems. In addition, physiological responses that underlie the actions of each system are described, from the cellular to the systems levels. *Prerequisites:* second-year Au.D. student or consent of instructor.

AUD 256. Pathophysiology of the Auditory and Vestibular Systems (4)

Physiological and anatomical substrates of auditory and vestibular disorders including influences of neurological disorders. Topics include peripheral and central disorders, congenital disorders due to infections, as well as acquired ototoxic, noise-induced, infective, autoimmune, age-associated disorders, and traumatic disorders. *Prerequisites:* AUD 255 or consent of instructor.

AUD 257. Ear Diseases and Treatment (3)

Differential diagnosis and treatment of auditory and vestibular disorders, audiological components of neuro-otology, as well as interactions between the audiologist and neuro-otologist in a clinical setting. *Prerequisites:* second-year Au.D. student or consent of instructor.

AUD 263. Physiological and Behavioral Tests of Vestibular Function (4)

Clinical evaluation of vestibular function, using techniques such as caloric and rotational electronystagmography and posturography. The interpretation of clinical findings and implications for rehabilitative strategies will be covered. The course will include observation of testing in otology clinic settings. *Prerequisites:* second-year Au.D. student or consent of instructor.

AUD 264. Auditory and Vestibular Development and Genetics (3)

Embryology and functional development of the auditory and vestibular systems, from their initial appearance to adult function. Inherited disorders of these two sensory systems are also addressed, including phenotypic description and genetic basis. Genetic counseling and the potential for gene therapy are also discussed. *Prerequisites:* second- or third-year Au.D. student or consent of instructor.

AUD 270. Newborn Hearing Screening and Management (3)

This course describes procedures and requirements for newborn hearing screening, and the detection and clinical management of congenital auditory disorders. Observations of newborn screening in a neonatal ICU environment. *Prerequisites:* second- or third-year Au.D. student or consent of instructor.

AUD 271. Temporal Bone Anatomy (4)

Detailed anatomy of the temporal bone, including surgical approaches. Participation in dissecting a human cadaver temporal bone specimen, and observation of medical residents/staff learning to perform surgical drilling of temporal bone under the supervision of experienced otologic surgeons. Radiographic and magnetic resonance imaging of the temporal bone will be described and discussed. *Prerequisites:* second- or third-year Au.D. student or consent of instructor.

AUD 275. Intraoperative Monitoring (3)

Methods and procedures required for monitoring of evoked auditory responses in the operating room. The indications for the use of intraoperative monitoring and difficulties unique to this setting. The course will include the opportunity to observe auditory potential monitoring in the operating room. *Prerequisites:* second- or third-year Au.D. student or consent of instructor.

AUD 276. Cochlear Implants and Other Implantable Sensory Aids (3)

Theory and practice of cochlear implantation with focus on audiological management of patients after implantation. Current concepts regarding the activation of primary auditory neurons by electrical stimulation and indications for cochlear implantation and surgical procedures are described. *Prerequisites:* second- or third-year Au.D. student or consent of instructor.

AUD 284. Clinical Practice in Audiology II (1-4)

Applications of clinical procedures to patient assessment. Includes clinical observation, interaction with otologists, and supervised patient care involving diagnostics and hearing aid evaluations in the UCSD audiology clinics. This course may be taken more than once. *Prerequisites:* open to second- or third-year doctoral students or consent of instructor. One quarter unit represents 3 to 4 hours per week. Must also be concurrently enrolled in AUD 291.

AUD 291. Clinical Case Studies/Staffing (1)

Presentations and discussion of clinical cases and issues related to clinical practice. Students' clinical

experiences are discussed relative to medical and audiological assessment and management. This course may be taken more than once. *Prerequisite: second- or third-year Au.D. student or consent of instructor. Must be taken more than once.*

AUD 296. Research Practicum (3)

Participation in specific faculty research activities. Become familiar with research methods and objectives of a faculty's research project. Participate in data collection and analysis at the discretion of the faculty investigator. *Prerequisite: second- or third-year Au.D. student and consent of instructor.*

AUD 298. Independent Research (3)

Independent research on topics relevant to audiology, consisting of literature review, data collection. Faculty supervision and mentoring on practical elements of research design and methodology. The course will consist of laboratory experience, focused on practical elements of research and design and methodology. *Prerequisite: consent of Au.D. program adviser and consent of faculty mentor.*

AUD 299. Doctoral Project (3)

Individual investigation and preparation of the doctoral project for the Au.D. degree will be performed under the supervision of an experienced research mentor. *Prerequisite: advancement to candidacy in the Au.D. program.*

Biochemistry

Students wishing to major in biochemistry should refer to programs offered by the Division of Biological Sciences, which has an undergraduate major in biochemistry and cell biology, or the Department of Chemistry and Biochemistry, which has an undergraduate major in biochemistry/chemistry.

Both the Division of Biological Sciences and the Department of Chemistry and Biochemistry offer graduate programs with specialization in biochemistry. Those programs are described in the biological sciences and chemistry and biochemistry sections of this catalog.

Bioengineering

See Engineering, School of.

Bioinformatics

The explosion in biological knowledge spawned by various genome projects has created entirely new fields and industries, and a need for a new cadre of trained computational biologists who are familiar with biology, mathematics, chemistry, and computer sciences. A new interdisciplinary undergraduate major has been created beginning in fall 2001 leading to B.S. degrees with a major or specialization in bioinformatics. The major involves the Division of Biology and the Departments of Bioengineering, Chemistry and Biochemistry, and Computer Science and Engineering as well as researchers at the San Diego Supercomputer Center. This major is designed to provide career opportunities for B.S. graduates, as well as opportunities for future advanced training at the graduate level. Bioinformatics will have a tremendous impact upon our understanding of cellular functions, protein structure and design, evolutionary biology, regulatory networks, and the molecular basis of disease.

Admissions

Students wishing to pursue a study in bioinformatics may select from majors offered by the Division of Biology, or the Departments of Bioengineering, Chemistry and Biochemistry, and Computer Science and Engineering. A major in bioinformatics is available within each of the listed departments and divisions. All the participating departments have a substantially common curriculum, but each has its own emphasis through its electives, and there are some differences in the core requirements. There is a limited number of seats available campuswide and admission into the bioinformatics premajor and major will be based on academic excellence and preparation as measured by GPA and a written statement. Currently, the combined number of premajors is limited to 75 and the number of majors is limited to 50. These limits may change from time to time. The major, its specific requirements, and the screening criteria are listed in the corresponding catalog sections of the Division of Biology, Department of Bioengineering, Department of Chemistry and Biochemistry, and Department of Computer Science and Engineering.

Program Focus

The Interdisciplinary Bioinformatics Graduate Program draws upon the expertise of affiliated faculty from the Division of Biological Sciences; Departments of Bioengineering, Chemistry and Biochemistry, Computer Science and Engineering, Mathematics, Physics, and Psychiatry; the Biomedical Sciences Graduate Program.

The University of California, San Diego is a premier research institution that has fostered interdisciplinary research since its inception. Specifically, bioengineering (at the interface of biology, medicine, and engineering), neuroscience (at the interface of biology and medicine), biophysics (at the interface of chemistry, biology, and physics), and cognitive science (at the interface of medicine and computer science) are all nationally ranked interdisciplinary graduate research programs. This has led to growth and innovation in many new areas of science and engineering research and the training of an exceptionally high caliber of graduate and postdoctoral students.

In recent years, bioinformatics has been identified by the UCSD administration as one of the most important growth areas for the campus. Several recent new faculty hires have been targeted in bioinformatics-related fields. UCSD has also seen a significant increase in the research activity associated with bioinformatics across the traditional disciplines.

Development of the Field and Departmental Strength in the Field

We are witnessing the birth of a new era in biology. The ability to decipher the genetic code of living organisms is dramatically changing our understanding of the natural world and promises to improve substantially the quality of human life. Recent advances in technology have led to the creation of a new interdisciplinary science—genomics. In simple terms, genomics is the reading and understanding of the blueprints for life. Understanding how genomes work requires sophisticated computer-based information handling tools (*bioinformatics*), and new high throughput technologies for understanding the function of genes on a genome-wide scale (*functional genomics*).

Bioinformatics characterizes the flow of information in living systems and can be schematically represented by the following:

The most pressing problem in the post-genome sequencing era will be to understand the integrated functions of thousands of genes. Dealing with this problem will require an interdisciplinary research structure dedicated to developing intellectual and human capital in bioinformatics and genome science. Due to the complexity of this new paradigm in biology, i.e., understanding the organization, evolution, and function of whole genomes rather than single genes, entirely new sets of tools and human resources will be necessary. Thus, future developments in genomics, and the applications that derive from genomics, will be dependent upon the scientific progress at the interface of three major disciplines—biology, engineering, and computer science. In addition to the scientific advances required to understand the functions of genomes, the accelerated growth of modern biology warrants revolutionary changes in academic curricula.

Each department represented in this program participates in various interdisciplinary graduate programs in addition to providing very strong intradisciplinary graduate training. One example is the La Jolla Interfaces in Science program (LJIS), a campus- and mesa-wide fellowship opportunity sponsored by the Burroughs Wellcome Fund. LJIS supports exploration of interfaces between the biological and biomedical sciences and the physical, computer, and mathematical sciences at UCSD, The Scripps Research Institute (TSRI), the Salk Institute, and the San Diego Supercomputer Center.

Bioengineering, consistently ranked among the top three programs nationally by *U.S. News and World Report*, has several new faculty hires in the area of bioinformatics and computational biology and has identified bioinformatics as a major area of focus.

Biological Sciences, a premier division at UCSD, will spearhead the interdisciplinary, undergraduate specialization in bioinformatics and is planning to hire new faculty in bioinformatics fields.

Biomedical Sciences, is an interdisciplinary Ph.D. program, based in the School of Medicine, with tracks in pharmacology, physiology, and cellular and molecular medicine. It will be closely linked to the planned new School of Pharmacy and Pharmaceutical Sciences. In addition to a strong computational biology presence amongst its faculty, there are plans to hire more faculty whose main interests are in computational pharmacogenomics and bioinformatics.

Chemistry and Biochemistry, the home of the Molecular Biophysics Training Grant, is highly recognized for its strong computational biology program with plans to further expand in chemo and bioinformatics areas.

Computer Science and Engineering is unique in having a critical mass of faculty whose research interests focus on biology. These faculty have very strong collaborative research interactions with biology, chemistry, and engineering researchers. CSE is currently recruiting for a senior faculty member with computational biology expertise.

Mathematics has expressed strong interest in building in the area of bioinformatics with emphasis on statistics and probability. This focus is one of fundamental importance for the future of bioinformatics, and the department is committed to both hiring new faculty and launching new courses in statistics pertinent to bioinformatics.

Physics is the home of leaders in the field of computational statistical mechanics applied to biology and provides the foundation for sophisticated modeling of complex biological systems. Physics also plans to recruit new faculty members whose research focus will be on development of information/theory-based models of biological systems.

Admissions Requirements

Admission is in accordance with the general requirements of the graduate division. Candidates will have an interdisciplinary persuasion to work across computers, biology, medicine, and engineering; with an undergraduate degree majoring in any of the disciplines in biological science, physical science, computer science, mathe-

tics, or engineering with a strong background in quantitative sciences and biology.

Admission review will be on a competitive basis based on the applicants' undergraduate track record, Graduate Record Examination General Test (GRE) scores, and other scholastic achievements. Attention will also be given to the motivation and career plans of the applicant candidates. Special attention will be given to the quantitative and analytical section scores of the GRE. The applications will be screened and evaluated by the Admissions Committee with input from all program faculty. In addition, applicants must submit a completed UCSD Application for Graduate Admission (use major code BF75), official transcripts (English translation must accompany official transcript written in other languages), TOEFL scores (required ONLY for all international applicants whose native language is not English and whose undergraduate education was conducted in a language other than English), and three letters of recommendation from individuals who can attest to the academic competence and to the depth of the candidates' interest in pursuing graduate study.

Acceptance letters to incoming students will indicate academic areas in which the Admissions Committee believe the individual is deficient and suggestions for remedial materials to be examined prior to the fall quarter may be provided.

For further admission information and/or to request an application packet, students should contact the bioinformatics graduate coordinator via email at bioinfo@ucsd.edu or at (858) 822-4948. You may also visit our Web site at <http://www.bioinformatics.ucsd.edu>.

Foreign Language Requirement

Competence in one or more foreign languages is encouraged but not required.

Curriculum

Specific fields of emphasis:

- biological data and analysis tools
- sequence analysis
- genomic analysis
- statistical methods for bioinformatics

The Interdisciplinary Bioinformatics Graduate Program is organized around a formal course requirement consisting of three quarters of course work, with enrollment in four four-unit courses each quarter. One four-unit course in each quarter

will be a research rotation in the laboratory of a program faculty mentor. The remaining nine courses will include four compulsory core courses and five courses to be chosen from a list of electives approved by the Course Committee.

The electives are intended to maximize the flexibility of the program, but at least one course must be chosen from the biology field and one from the computer science and engineering field. The faculty adviser(s) will pay particular attention to deficits in the background of each student and will assist in making appropriate course choices from the elective fields. Students electing to take any of the undergraduate courses listed in these fields will receive an additional course component in order to make it equivalent to a graduate level course. Students have the option to test out of a field by passing an exam designed by the faculty committee. This exam will fulfill one of the breadth requirements of the program.

It is the general policy of the program to be as adaptable as possible to the needs of the individual student. The faculty advisory committee will work closely with students to identify what might be lacking in a particular curriculum program.

Core Training Courses

- Bioinformatics I: Biological Data and Analysis Tools (Pharm 201)
- Bioinformatics II: Sequence and Structure Analysis—Methods and Applications (BENG 202/CSE 257A)
- Bioinformatics III: Genomic Analysis (BENG 203)
- Bioinformatics IV: Statistical Methods in Bioinformatics (Math 283)

PROGRAM ELECTIVES

(Each student will select from five of the eight elective fields below. One must be from the biology field and one from the computer science field. For each elective, multiple course options currently available are listed).

Elective 1: Biochemistry

- BENG 230: Biochemistry
- BIBC 100: Structural Biochemistry
- CHEM 114A: Biochemical Structure and Function
- CHEM 213: Chemistry of Macromolecules
- CHEM 218: Macromolecular Biochemistry

Elective 2: Data Structures

- CSE 100: Data Structures
- CSE 200: Computability and Complexity
- Math 176A: Computer Implementation of Data Structures

Elective 3: Algorithms

- CSE 101: (also Math 188) Design and Analysis of Algorithms
- Math 173: Mathematical Software Scientific Programming

Elective 4: Information Retrieval, Databases and Data Mining

- CSE 132A: Database System Principles
- CSE 133: Information Retrieval
- CSE 254: Machine Learning

Elective 5: Molecular Genetics

- BICD 100: Genetics
- BIMM 100: Molecular Biology
- BIBC 116: Evolution of Genes and Proteins
- BGGN 220: Advanced Molecular Biology
- BGGN 223: Advanced Genetics

Elective 6: Cell Biology

- BICD 110: Cell Biology
- BICD 130: Embryos, Genes, and Development
- BIOMED 210: Cellular Biology
- BIOMED 212: Cellular and Molecular Pharmacology
- BGGN 222: Advanced Cell Biology

Elective 7: Physics and Engineering

- BENG 253: Biomedical Transport Phenomena
- BENG 275: Computational Biomechanics
- PHYS 210A: Equilibrium Statistical Mechanics or higher

Elective 8: Mathematics and Statistics

- Math 174: Numerical Methods in Science and Engineering
- Math 181E: Mathematical Statistics
- Math 280A: Probability Theory

EXAMPLE 1-SAMPLE PROGRAM (YEAR 1)

A student with an undergraduate background in biology might make the following course selections:

YEAR 1

FALL	WINTER	SPRING
Bioinformatics I	Bioinformatics II	Bioinformatics III Bioinformatics IV
	CSE 100 BENG 275	CSE 101
Test out- Chem. 114A		Test out- BICD 110
Elective	Elective Research Rotation	Elective Research Rotation

EXAMPLE 2-SAMPLE PROGRAM (YEAR 1)

A sample program for a student with an undergraduate degree in computer science and engineering might be structured as follows:

YEAR 1

FALL	WINTER	SPRING
Bioinformatics I	Bioinformatics II	Bioinformatics III Bioinformatics IV
	BIOMED 210	Chem. 213
Test out - CSE 101	Math 280A	Elective
Elective	Elective	Test out - CSE 132A
	Research Rotation	Research Rotation

YEAR 2

All students, regardless of their background and elective track, will be expected to begin working in the laboratory of their choice by the second year. Additionally in Year 2, students will begin preparing for their qualifying examination and will participate in advanced seminar courses and journal clubs identified by program faculty.

End of Year 2 through 5

- Spring of Year 2: Qualifying Examination
- Spring of Year 3: Advance to Candidacy
- End of Year 5: Ph.D.

In summary, in addition to three quarters of research rotations, students must complete the four compulsory bioinformatics core courses; and, either test out of, or select at least five courses from the eight elective areas.

Research Rotations

Each student in the graduate program will participate in three research rotations, at least two of which will be in the laboratory of mentors other than the thesis directors. The purpose of the research rotation will be to train the students in research methodology in specific bioinformatics areas. At the end of the research rotation period, the student will submit a written report that will be evaluated by the faculty mentor in whose laboratory the project was carried out.

The report will also be sent to the Qualifying Examination Committee who will take this into consideration in the assessment of the student for admission to candidacy.

Seminars, Informal Courses, Group Meetings, and Symposia

As well as formally structured courses and research rotations, graduate students will have access to seminars, group meetings, and informal sessions during which they will have frequent opportunities to interact closely with faculty mentors and to present their research plans, problems, and findings. In addition to weekly bioinformatics seminars, the graduate program will launch monthly student/faculty meetings at which students can present their research findings and discuss their progress. Graduate students will also be expected to organize an annual symposium where they will invite leading researchers to UCSD for one-day talks and discussions.

Besides the activities noted above, UCSD as a premier research institution has many excellent seminar programs sponsored by each research department and organized research group. Several interdisciplinary programs facilitate research meetings. Notable ones include the La Jolla Interfaces in Sciences (LJIS) Program, the Neurosciences Program, the Molecular Biophysics Program, the Whitaker Institute for Biomedical Engineering, the San Diego Supercomputer Center, and the Structural Genomics Program. LJIS, for example, is an extremely successful interdisciplinary program sponsoring stimulating and state-of-the-art seminars. LJIS recently sponsored a well-received symposium on Post-Genomic Bioinformatics. Many program faculty are involved in several of the areas mentioned above, and the bioinformatics graduate program benefits from all of these additional programs and symposia.

Research Training

Students, upon completion of the appropriate course work, will be given research orientation lectures by the bioinformatics program faculty. Each graduate student will participate in a research experience in the laboratory he or she selects to carry out the research rotation. During this period students will become acquainted with scientific methodology for designing experiments, analyzing the results, organizing the data, conducting research in a responsible manner, preparing oral and poster presentations of research results, and writing scientific papers.

Upon successful completion of the Qualifying Examination (described in the following section), graduate students will choose their research project from the many possibilities offered in the program and begin to work on a research problem with their faculty advisers. In consultation with their mentors, students will formulate the research activity that will lead to their dissertation. Graduate students will have the opportunity to do internships in the local bioinformatics/biotechnology industry if the thesis project is of mutual interest to a corporate sponsor and the thesis advisers. The research program is designed with two key objectives in mind: (1) to provide a truly interdisciplinary research training at the interface area between biology and computer science and engineering; and (2) to address fundamentally strong research problems that will lead to the advancement of the field of bioinformatics. We anticipate that every graduating student will emerge as a highly trained bioinformatician who can either pursue an academic career by choosing optimal postdoctoral research positions or enter the next generation biotechnology/biopharmaceutical industry.

It is our belief that active research under proper tutelage is the best means of training and that the foundations of a good graduate training program rest on an outstanding faculty group, an excellent student body, and a strong and well-coordinated research program. Each of the faculty members in this program has expertise and interests that will contribute importantly to the Interdisciplinary Bioinformatics Graduate Program. Participating faculty have pooled their resources in terms of laboratories, and the knowledge and experience to ensure the success of the program. Through daily contact with faculty and other research colleagues, students will learn to develop critical and creative thinking skills, scientific methodology, and a sound knowledge of research problems.

Second-Year Qualifying Examination

The Bioinformatics Second-Year Qualifying Examination (BQE) is designed in an innovative manner to test the ability of students to think analytically and in an interdisciplinary manner. This method was suggested by students of the program during the first two years after inception.

Students are expected to come up with a research problem different from the one he or she may have been working on with a faculty

adviser and write a proposal that can be defended at the oral examination to a faculty committee appointed by the chair of BQE. The written document is expected to be in the form of a proposal to NSF or NIH, where the student provides the specific aims of the project, the background for and significance of the problem chosen, some preliminary results and/or observations and specific details on the design of the research. The student is tested on his or her ability to formulate and design the problem as well as on the interdisciplinary nature of the approach. Once the student passes the oral portion of the exam, the student is deemed to be qualified for advancing into Ph.D. thesis research in bioinformatics. The student can schedule this examination at any time of the year, but with two provisions. First, the student should have completed all the required and most of the elective courses assigned, and second, the examination should be taken before the student completes his or her second year in the program. At the time of BQE, the student should have decided on his or her two mentors/research advisers, and should have discussed with them about joining their laboratories and obtaining guaranteed funding for the duration of research as long as he or she is in good academic standing. The BQE Oral Examination Committee will discuss these specifics and other program requirements with the students at the oral examination.

Advancement to Ph.D. Candidacy

Upon completion of formal course requirements, each student will be required to take a written and oral qualifying examination that will admit the student to the candidacy of the Ph.D. program. In advance of the qualifying examination, each student, in consultation with his or her faculty adviser(s), will establish a dissertation committee of five faculty members. The committee will consist of three faculty, at least two of whom are affiliated with the bioinformatics program, and two other faculty from departments affiliated with the program, or who are themselves members of the program faculty. At least two of the five committee members must be from a department other than the committee chair's department and at least one of these two must be tenured. The thesis advisers will have the major responsibility for the student's research and dissertation.

It is anticipated that each student will complete the qualifying examination before the end

of the second year of his or her tenure, but no later than the end of the third year. The student is expected to join a research laboratory for completing a thesis dissertation no later than the beginning of the second year of tenure.

Thesis and/or Dissertation

Each graduate student in the program will work on a bioinformatics thesis project under dual mentorship of the program faculty. At UCSD, the University Qualifying "Candidacy/Senate" Examination is a requirement for a graduate student to complete satisfactorily, once a thesis project has been decided upon and the student has established a thesis committee in consultation with his or her faculty research advisers. It is deemed after this examination that the student is formally advanced to Ph.D. candidacy and eligible to graduate provided he or she completes his or her dissertation. It is strongly recommended except in special circumstances that the student complete this examination prior to the end of the first three years in the program. The format for this examination is consistent with the highest standards held by peer universities. The student should write a detailed candidacy report in the format of NIH proposals where it is expected that each specific aim will approximately form a chapter in the dissertation. The student should ensure that there is initial progress and the research design and methods are spelled out unambiguously. While the size of this document may vary, it is expected to be at least twenty-five to thirty pages. Any publications/supplementary material may be attached. The student should form the examination committee in consultation with his or her faculty research advisers, and the committee should be in a position to advise the student on his or her dissertation topic. The committee constitution shall be in accordance with the rules of the program and UCSD. The student is advised to choose a committee whose members will be in the best position to advise and will serve arguably as the toughest, albeit constructive, critics of the research so as to maximize the quality of the dissertation. The report should be interdisciplinary and should have input from both thesis advisers. The format for the report should conform to the Bioinformatics Program requirements and not those of the parent department(s) of the mentor(s)/faculty research adviser(s). It is expected that the student will meet at least annually with the committee to update the members on his or her progress. As a partial fulfillment for the Ph.D. degree,

the student will submit a complete dissertation to be evaluated by a doctoral committee chosen by his or her mentors in consultation with the bioinformatics steering committee. The doctoral dissertation will be submitted to each member of the doctoral committee at least four weeks before the final examination. The student will defend his or her final thesis after the committee's evaluation and will pass or fail depending on the committee's decision. The entire graduate program is expected to be completed within the proposed timeline of the program.

Final Examination

Bioinformatics graduate students will defend their thesis in a final oral examination. The exam will consist of (1) a presentation of the thesis by the graduate student, (2) questioning by the general audience, and (3) closed door questioning by the thesis committee. The student will be informed of the exam result at the completion of all three parts of the oral examination. The final report of the doctoral committee will be signed by all members of the committee and the final version of the dissertation will conform to the procedures outlined in the publication, *Instructions for the Preparation and Submission of Doctoral and Master's Theses*.

Teaching Requirement

Each graduate student admitted to the Ph.D. program in bioinformatics is mandated to serve as a teaching assistant (TA) for at least two quarters. This will aid in preparing the students for a teaching career. In addition, each student will make periodic research presentations to the graduate program students/faculty. Students will also discuss their progress at the annual program meeting to be held each year. It is anticipated these formal presentations will serve as valuable training in preparing the student for a teaching career.

Bioinformatics graduate students will also participate in additional TA training provided by the Office of Graduate Studies and Research through the Center for Teaching Development (CTD).

Financial Support

It is expected that all students admitted into the Ph.D. program in bioinformatics will receive financial assistance subject to their continuance and performance in the program. The assistance will be provided from (1) departmental financial commitments, (2) university financial commit-

ments, (3) teaching assistantships, (4) research assistantships, and (5) NIH-funded graduate training grant.

Employment Prospects

There is enormous demand from industry for trained professionals in bioinformatics. The pharmaceutical industry, agrobusiness, and biotechnology companies often look to academia for people with the appropriate interdisciplinary skills. There is also a great need for academic faculty who have broad, interdisciplinary training, because much of the success of the next generation of undergraduate and graduate students will depend on their ability to master materials in several disciplines. Competition for people skilled in bioinformatics is so intense that salary offers are being driven sky-high and there is concern that the universities—few of which are training students in the field—are rapidly being depleted of the best researchers.

A report from the Working Group of Biomedical Computing of the NIH recognized the shortage of biologists with appropriate computing expertise and called for strong NIH support of cross-disciplinary education and training.

Ph.D. Degrees with a Specialization in Bioinformatics

Currently, UCSD offers Ph.D. degrees with a specialization in bioinformatics from the participating departments listed in this section. Students are admitted into one of the departmental graduate programs and satisfy the requirements of both the departmental and the interdisciplinary bioinformatics graduate program. If you are interested in the Ph.D. degree with a specialization in bioinformatics, please consult with the Student Affairs Office of the department you are interested in to obtain further information on admission and individual program requirements.

Further Information

Division of Biological Sciences Required Review of Student Progress

Freshmen

Entering students who have indicated the desire to major in biology (with the exception of bioinformatics) will be admitted directly to the biology major of their choice. To remain in good standing the student must complete a minimum of eight of the following courses (or equivalent) during their first five quarters at UCSD:

BILD 1, BILD 2, BILD 3
Chemistry 6A-B-C
Math 10A-20A, 10B-20B, 10C-11-20C
Physics 1A-2A, 1B-2B, 1C-2C
Chemistry 140A-141A, 140B-141B
BICD 100
BIBC 103

A student's best six grades from the eight courses listed will be used to calculate a GPA which must be at least a 2.5. If a student fails to complete the required courses, or to obtain the required minimum GPA, they will be dismissed from the biology major.

(Note: These are the minimal requirements to remain in the major, and do not satisfy all of the lower-division requirements of any biology major. Please consult the section regarding your particular major to ensure that you satisfy all lower-division and upper-division requirements.)

Continuing Students

Continuing UCSD students who wish to transfer into the major will be evaluated under the rules that were in effect the year in which they entered the university.

Transfer Students

Entering students who have indicated the desire to major in biology (with the exception of bioinformatics) will be admitted directly to the biology major of their choice. To remain in good standing the student must have completed eight of the following courses, or course equivalency, prior to transfer to UCSD:

BILD 1, BILD 2, BILD 3

Chemistry 6A-B-C

Math 10A-20A, 10B-20B, 10C-11-20C

Physics 1A-2A, 1B-2B, 1C-2C

Chemistry 140A-141A, 140B-141B

BICD 100

BIBC 103

A student's best six grades from the eight courses listed will be used to calculate a GPA which must be at least a 2.5. If a student fails to complete the required courses, or to obtain the required minimum GPA, they will be dismissed from the biology major. Transfer students who do not meet these requirements will be allowed a maximum of three quarters to satisfy any unmet requirements. Transfer students are therefore strongly encouraged to complete these requirements at their community college. (**Note:** These are the minimal requirements to remain in the major, and do not satisfy all of the lower-division requirements of any biology major. Please consult the section regarding your particular major to ensure that you satisfy all lower-division and upper-division requirements.)

Exceptions

The division will accept petitions from students to remain in the major with less than the required GPA or course work, and the success of such petitions will be evaluated based upon academic promise that is not reflected in the GPA. Exceptions might also be made to accommodate students who showed exceptional promise in laboratory experimentation, or students who had overcome extraordinary hardship while taking the required courses.

Division of Biological Sciences Laboratory Requirement

Freshmen

The Division of Biological Sciences requires students in all biology majors, with the exception of bioinformatics, to take one biology lab before the end of the sophomore year.

Continuing Students

Continuing UCSD students who wish to transfer into the major will be evaluated under the rules that were in effect the year in which they entered the university.

Transfer Students

The Division of Biological Sciences requires students in all biology majors, with the exception of bioinformatics, to take one biology lab before the end of the sophomore year. Transfer students may petition to have community college course work cover the lab requirement. Transfer students whose community college laboratory course is determined to be equivalent in content to an existing biology lab will have completed the requirement upon transfer. Transfer students are therefore strongly encouraged to complete this requirement at their community college. Transfer students who do not meet this requirement at the time of transfer may petition the division for an extension.

Division of Biological Sciences Residency Requirement

To receive a bachelor of science degree in biology from UCSD, all biology majors, including transfer students, must complete at least forty-eight or more units of upper-division course work.

To receive a bachelor of science degree in biology from UCSD, all students must complete at least nine upper-division biology courses (each course must be at least four units) in the Division of Biological Sciences while officially enrolled at UCSD. (Students participating in the Education Abroad Program (EAP), and courses at other UC campuses, may petition up to three of these courses to count toward their residency minima.) Biology courses completed through the UC Extension program (concurrent enrollment) will not be counted toward this residency requirement.

Satisfactory Progress

All students admitted into a biology major must maintain satisfactory progress in order to remain in a biology program. If the GPA in biology courses for such a student falls below 2.0, he or she will be placed on probation during the quarter after the average fell below the line. If the GPA is not brought above the 2.0 level during the quarter on probation, the student will be dropped from the major.

Prerequisites

All students are expected to have completed all prerequisites prior to enrolling in any biology course. Please visit the student affairs office or consult our Web page for the most current information. Prerequisites are enforced in all courses and must be taken for a letter grade. Students who have satisfied the prerequisites of a class at another college may need to be pre-authorized to enroll. Please come to the biology student affairs office (1128 Pacific Hall) BEFORE your priority enrollment to be pre-authorized.

Enrollment in Biology Classes by Non-Biology Students

Because biology is a popular major, enrollment in some lower-division and upper-division biology courses is limited to biology majors, and those majors for which biology courses are required for graduation. Every effort will be made, on a space available basis, to enroll students from other majors in those biology lecture and laboratory courses which may be required for post-graduate study.

Concurrent Enrollment in Biology Courses

For more information on concurrent enrollment, please call (858) 534-3400 or email concurrent@ucsd.edu.

Enrollment process for biology courses:

- Select the biology course(s) you wish to enroll in. Be sure that you've completed the prerequisites.
- Attend class starting the first day of the quarter and continue attending. During the beginning of the third week, obtain the instructor's signature on the concurrent enrollment add card (available at the UCSD Extension Student Services office). Please note that instructors

are not required to admit you to the course, and that enrollment is on a space-available basis.

- If you have a signed add card, take it to Biology Student Affairs for a department stamp. Space in the course will be verified at this time. Please note that even if the instructor has signed the add card, if space is not available, the card will not be stamped.
- Return your completed UCSD concurrent enrollment card to the Extension Student Services office with your enrollment fee. Submit one card per class. Concurrent enrollment is closed after the third week of the quarter.

Note: Students enrolling in a biology course will not incur a \$50 late fee if enrolling during the third week.

Readmission to a Biology Major

Students who were absent for six quarters or more, and who have been readmitted to UCSD, must adhere to the major requirements in effect at the time of readmission or those subsequently established.

Readmitted students may petition to follow the major requirements in effect at the time they left UCSD. These petitions will be reviewed on a case-by-case basis.

Grade Requirements for the Majors

The minimum GPA requirement (for both the major and overall UC) for graduation is 2.0. D grades in courses required for the major are acceptable, providing that the student's major GPA and overall UC GPA is at least 2.0. Students who received D and/or F grades should contact one of the Division of Biological Sciences undergraduate advisers to determine the effect of such grades on their GPAs. The biology major GPA calculation is based on upper-division courses required for the major. (Upper-division courses from other UCs, other UCSD departments, and EAP which have been approved via petition to count toward the major are counted into the major GPA. Other transfer courses do not count toward the UC or major GPA.) All courses, required for any of the eight majors, must be taken for a letter grade with the exception of BISP 195, 196, 197, or 199.

Students with Transfer Credit

All courses (including prerequisites) taken at other institutions must be reviewed by the Division of Biological Sciences before they can be applied toward any major requirement. Students must obtain approval from the Biology Student Affairs office prior to taking courses outside of UCSD (for example, students wishing to take a Chem. 6BL equivalent at another institution must consult with Biology Student Affairs *before enrolling in the substitute course*). In addition, any student wishing to satisfy a major requirement with upper-division transfer work (with the exception of organic chemistry) must first submit an Undergraduate Petition. Contact Biology Student Affairs (1128 Pacific Hall) for specific information regarding transfer documentation and petition procedures.

The Division of Biological Sciences requires that students take the full content equivalencies to UCSD series in math, chemistry, and physics. The Division of Biological Sciences will follow the respective department's recommendations for equivalency. In some cases, attaining full content equivalency will require a student to complete more than two semesters in a subject. If the courses a student took do not provide full content equivalency, s/he will be required to complete the lacking material at UCSD or at a community college where the material is equivalent.

Programs Abroad

The Division of Biological Sciences strongly encourages students to participate in the Education Abroad Program (EAP) or the UCSD Opportunities Abroad Program (OAP). It is very important that students who plan to participate in the UC Education Abroad Program (including the Costa Rica Tropical Ecology program) or the UCSD Opportunities Abroad Program obtain the name of a faculty adviser from the Biology Student Affairs Office in order to discuss the proposed program of study. For most EAP programs, it is strongly recommended that biology majors complete biochemistry (BIBC 100 or 102) and genetics (BICD 100) and their prerequisites before going abroad. For more information, please visit <http://programsabroad.ucsd.edu>.

Special Studies Courses

For information on requirements and application procedures for special studies courses, stu-

dents should go to the Biology Student Affairs Office (1128 Pacific Hall) or visit the Web site at http://biology.ucsd.edu/undergrad/BISP_info.html

How to apply special studies courses toward your biology major:

- Two quarters of BISP 194 (topics must vary) may count as one upper-division elective for any biology major.
- One quarter of BISP 195 may count as an upper-division elective for any biology major.
- One quarter of BISP 196, 197, or 199 may count as an upper division elective for any biology major.
- *Biochemistry/Cell Biology, General Biology, Human Biology, and Physiology/Neuroscience*
The second consecutive quarter of BISP 196 or 199, taken in the same research laboratory, may be petitioned to substitute for one of the upper-division elective lab requirements. The second quarter of BISP 196 or 199 must be complete prior to petitioning. Students are required to submit an undergraduate petition and summary of research to Biology Student Affairs.
- *Microbiology, Molecular Biology, Ecology/Behavior, and Evolution*
The second consecutive quarter of BISP 196 or 199, taken in the same research laboratory, may be petitioned to substitute for one of the upper-division required laboratory courses. The content of the BISP 196 or 199 must be equivalent to the content covered in the required lab in order to be approved. The second quarter of BISP 196 or 199 must be complete prior to petitioning. Students are required to submit an undergraduate petition and summary of research to Biology Student Affairs
- Subsequent quarters of BISP 195, 196, 197, or 199 may be applied toward college and university requirements.

Note: Students who are approved to use a BISP 196 or 199 to satisfy a lab requirement cannot also use BISP 196, 197, or 199 to satisfy an upper-division elective requirement.

BISP 194—Advanced Topics in Modern Biology

Advanced Topics in Modern Biology is a two-unit topics course taught at a high level and open to upper-division students only. The course content

will vary. Students should consult the quarterly *Schedule of Classes* for topics and descriptions.

BISP 195—Introduction to Teaching in Biology

Being a teaching assistant is an important task and can provide students with experience and faculty contact which can be valuable when applying for graduate school. Students who are interested in being an undergraduate tutor should have received a strong grade in the course which they want to teach, have an overall GPA of at least 3.0, and have taken at least ninety total units. Students should apply very early in the quarter prior to the quarter they wish to teach. Applications will be accepted beginning the second week of the quarter prior to the quarter in which the student wishes to teach. All undergraduate tutor applications are online and may be accessed through the biology Web site, <http://www.biology.ucsd.edu/undergrad/index.html>.

BISP 196—Honors Thesis in Biological Sciences

Students in any one of the eight biology major programs who have a 3.7 grade-point average or above in upper-division science courses, the biology major, and overall UC at the end of their junior year are eligible to undertake the honors thesis. This program covers the senior year of undergraduate study and involves a maximum of twelve units of senior thesis research (BISP 196) taken in addition to the major requirements for graduation. (Four units of senior thesis research BISP 196 are to be taken during three consecutive quarters.) Research is conducted under the supervision of a faculty member of the Division of Biological Sciences only and cannot be performed in the research labs of other departments such as the School of Medicine, SIO, etc. If there are any questions as to which faculty members are eligible, students should consult with Biology Student Affairs. The research will culminate in a senior thesis and an oral report (see below). Students who complete the program satisfactorily will have "Distinction in Biology" recorded on their transcript. Students who fail to make satisfactory progress will be advised to withdraw from the program. Students may also withdraw voluntarily from the program. Grades for BISP 196 are P, NP, or I only.

APPLICATION TO THE HONORS THESIS PROGRAM

1. Students interested in the program who are eligible as of the end of the spring quarter of their junior year (the fourth quarter prior to graduation) need to find a Division of Biological Sciences faculty member willing to act in the capacity of thesis adviser and inform the Biology Student Affairs Office of their intent.
2. After an adviser is selected, the student and the adviser should complete the Special Studies application form and research plan (available on the biology Web site).
3. The application form and research plan should then be submitted to the Biology Student Affairs Office. The deadline for submitting this form is the end of the eighth week of the quarter prior to the quarter the research will begin.
4. The application will be submitted to the honors thesis coordinator after eligibility has been determined.
5. If the student is approved for admission to the program, he or she will then be authorized to register for BISP 196.

Entry into the second and third quarter of the program will require submission to the honors thesis adviser of a written report in which the student summarizes the data obtained in the previous quarters. A brief oral interview with the student on this report can also be expected. If the progress made appears reasonable for an honors student, then the 196 petition will be signed. If not, the student may be dropped from the program. Completion of the program will require a final written report by the student at the end of the third quarter in addition to an oral presentation in the middle of the quarter to a suitable group of faculty and students, including the honors thesis adviser.

BISP 197—Biology Internship Program

The Division of Biological Sciences, in collaboration with local biotech industries, created Biotechnology Internship Opportunities (BIO). The mission of BIO is to provide biology majors with an opportunity to participate in research in an industrial setting. We believe that working as an intern in the private sector will enrich a student's educational experience. Students will gain valuable insight into the relationship between theory and practice, and hence, a better

understanding of the relevance of course work in their major. Most importantly, students will learn the importance of outstanding oral and written communication skills. This course may be counted as one of the upper-division electives for a biology major, providing that no other special studies courses have already been counted toward the major. Information on BIO may be accessed through the undergraduate biology Web site, <http://biointern.ucsd.edu>.

To enroll in BISP 197, students must have accrued at least ninety-quarter units with an overall UC GPA of at least 3.0.

There will be one weekly scheduled meeting lasting up to 1.5 hours. Attendance and participation at these meetings are mandatory and will affect the grade a student receives. There will be three formal oral and three written presentations, interspersed with informal discussions of progress achieved. All written reports must be done with the input of the industry and must have that mentor's signature. Grading will be based on the formal and informal written and oral presentations, as well as input from the industry mentor.

BISP 199—Individual Research for Undergraduates

Individual Research BISP 199 is intended to provide interested and qualified biology students with an opportunity to work closely with faculty and professionals in their chosen field and can be a valuable contribution to the student's preparation for graduate school or career goals. To enroll in BISP 199, students must have accrued at least ninety quarter-units with an overall UC GPA of at least 3.0. Students may select for their instructor any professor at UCSD, but the BISP 199 application must be submitted for approval to the Division of Biological Sciences. The deadline to apply for BISP 199 is the eighth week of the quarter prior to the quarter in which the research will begin.

AIP 197—Academic Internship Program

Because the undergraduate research conducted through the Academic Internship Program is generally done at a site not affiliated with the UCSD Division of Biological Sciences, students who wish to request that an AIP 197 course be counted toward their major must submit an Undergraduate Petition for their request. Biology faculty will review the student's research and ascertain the project's compatibility with the

student's academic goals and major requirements. Please be advised that an AIP 197 may not be approved toward major requirements. If an AIP 197 course is approved for the student's major, no other special studies course (BISP 196, 197, or 199) can be used toward the major. For further information, please see <http://aip.ucsd.edu>.

Major Programs in Biological Sciences

For more information, please see biology's Web page, <http://www-biology.ucsd.edu/>.

The UCSD Division of Biological Sciences is structured around the different levels of biological organization—biochemical, cellular, physiological, and ecological. The research and teaching of the division emphasize the fundamentally important processes that occur at each of these levels. With a solid foundation in these processes future training and study in any area of biology is possible, from plant breeding to genetic counseling, from medical microbiology to ecological epidemiology, from veterinary science to cancer research. The UCSD campus is situated among some of the finest research institutions in the world. The Division of Biological Sciences is fortunate in having close ties with the Scripps Institution of Oceanography, the Salk Institute of Biological Studies, and the Scripps Clinic and Research Foundation, all of which open interesting avenues for motivated students.

The division offers eight different major programs, each of which provides an excellent background for future graduate or professional study. They are (1) biochemistry and cell biology, (2) biology with a specialization in bioinformatics, (3) ecology, behavior, and evolution, (4) general biology, (5) human biology, (6) microbiology, (7) molecular biology, and (8) physiology and neuroscience. The requirements of each of the majors are designed to meet the needs of a different group of students. These requirements are quite concordant, reflecting the division's philosophy that familiarity with certain basic aspects of the subject is fundamental to all specialized understanding. Bachelor of science degrees granted in each of these majors will be so designated.

The Student Affairs Office (1128 Pacific Hall) administers the undergraduate biology program for all six colleges. For complete details regarding

policies and procedures pertaining to the biology programs, please contact Biology Student Affairs.

Biochemistry and Cell Biology Major

Please refer to the "Division of Biological Sciences Required Review of Student Progress" notice detailed earlier in the Division of Biological Sciences section of this catalog.

This major is designed to provide students with the fundamental courses required for entry into a school of medicine or into postgraduate training in a wide variety of areas of biological and biomedical sciences: biochemistry, biophysics, genetics, molecular biology, cell biology, developmental biology, microbiology, virology, human biology (physiology, metabolism, genetic disorders), cancer biology, pharmacology, and others. The emphasis is on basic principles which help us understand those processes unique to living organisms at the molecular level.

The program includes two required upper-division biology laboratory courses to provide practical experience with modern techniques and useful technology for those seeking positions as lab technicians in clinical and basic research laboratories. The opportunity to select four elective courses allows students either to seek a still broader background in a variety of biology courses or to begin specialization in a chosen field of study.

Lower-Division Requirements

BILD 1 and 3 (Note: BILD 2 is not required, but is a prerequisite for many upper-division courses.)

Chemistry 6A-B-C and 6BL

Mathematics 10A-B, and 11 or 10C or 20A-B-C

Physics 1A/1AL, 1B/1BL, 1C/1CL or 2A-B-C, and one lab

Upper-Division Requirements

1. Organic Chemistry (Chemistry 140A and 140B or 141A and 141B)
2. Organic Chemistry (Chemistry 143A) or Physical Chemistry (Chemistry 105A)
3. Structural Biochemistry (BIBC 100) or Physical Biochemistry (BIBC 110) or Physical Chemistry (Chemistry 126)

4. Metabolic Biochemistry (BIBC 102)
5. Biochemical Techniques (BIBC 103)
6. Genetics (BICD 100)
7. Cell Biology (BICD 110)
8. Molecular Biology (BIMM 100)
9. One of the following seven courses: BIBC 104 (Biochemistry and Biotechnology of Plants), BIBC 110 (Physical Biochemistry), BIBC 120 (Nutrition), BIBC 130 (Marine Biochemistry), BICD 118 (Pathways of Intracellular Protein Trafficking and Compartmentation), BIMM 118 (Pharmacology), BIMM 130 (Microbial Biochemistry)
10. One upper-division biology lab to be chosen from the following: BIBC 105, BICD 101, 111, 123, 131, 133, 145, BIMM 101, 103, 121, 127, 141, BIPN 105, 145, or Chemistry 143C.
11. Four additional upper-division biology courses (each course must be at least four units) taken through the UCSD Division of Biological Sciences are required.

Note: For more information on how the BISP 194, 195, 196, 197, or 199 can count toward major requirements, please see the previous section "Special Studies Courses."

The following courses offered by the Department of Chemistry and Biochemistry are recommended as electives for the biochemistry and cell biology major: Chemistry 115, 116, 122, 124, 126, 127. Please note that these courses will not count towards the Division of Biological Sciences residency requirement and must be petitioned.

Bioinformatics Specialization in the Division of Biological Sciences

This major offers a rigorous, interdisciplinary training in the new and rapidly-evolving field of bioinformatics within the Division of Biological Sciences. Bioinformatics refers to advanced computational and experimental methods that model the flow of information (genetic, metabolic, and regulatory) in living systems to provide an integrated understanding of the systems properties of model organisms. For a detailed understanding of the large amount of qualitative and quantitative data that is currently accruing, the bioinformatician of the future must have a substantial mastery in biology, chemistry, mathematics,

physics, and computer sciences. This interdisciplinary specialization will be offered by three other departments (computer science and engineering, chemistry, and bioengineering), each with their own set of requirements and electives. The program offered by the Division of Biological Sciences is aimed at a student interested in applying, and to some extent developing, tools of bioinformatics for the study of biological systems. Students will receive a B.S. degree in Biology with a Specialization in Bioinformatics. This degree will prepare students for graduate studies in biological and biomedical sciences, or provide excellent opportunities in the biomedical, pharmaceutical, biotechnology, and bioinformatics industries.

Admission

Because the number of pre-majors and majors will be limited as described in the section on bioinformatics, student demand may exceed capacity. Therefore, admission to the specialization is not guaranteed and will be based on academic excellence, as described below. Since bioinformatics is an interdisciplinary major, a steering committee involving faculty from the participating departments will select among the best candidates applying and recommended through each department, while insuring active participation of the departments and divisions offering the major.

Freshmen

Entering freshmen will go through a two-stage process to be admitted to a bioinformatics program. Students should enter the division as a declared major in some subdiscipline offered by the division (e.g., molecular biology, general biology, etc.) Freshmen can choose to apply for a bioinformatics pre-major after completing the following courses by the end of their first year. Admission will be based primarily on the GPA in the following courses, but also on a written statement, completion of the other listed requirements and overall academic excellence:

BILD 1
Chemistry 6A
Math 20B
Math 20C

Pre-bioinformatics majors can then choose to apply for admission to the bioinformatics major after competing CSE 11 and CSE 12 by the end

of their sophomore year. Admission to the bioinformatics major within each department or division will be based on the GPA in all six screening courses. The final decision on admission to the pre-major and major will be made by the bioinformatics Steering Committee, in consultation with the departments.

If a student applies for admission to the bioinformatics specialization but is not selected after completion of the screening courses, that student will be eligible to remain in the specialization or major to which they were admitted initially. Students with undeclared majors may also apply to the bioinformatics specialization, but in the event they are not selected for this competitive major, they may choose any other major in biology as long as they satisfy the requirements of that major.

Continuing Students

Students who have not declared the bioinformatics pre-major, but who have completed the screening courses, may apply for entry to a bioinformatics program after six quarters (the end of the sophomore year). They will be admitted on a space-available basis, after pre-majors have been screened for admission to the major.

Transfer Students

Applicants seeking admission to a bioinformatics major must have completed the following courses with a strong GPA that is competitive with that of UCSD students applying for entry into this specialization:

a year of calculus (equivalent to Math 20A-B-C)
a year of general chemistry, with lab (equivalent to Chem 6A-B-C and 6BL)
the highest level programming course offered at the community college (equivalent to CSE 11 and 12)
at least one semester of biology (equivalent to BILD 1 and BILD 2)

Those who have not completed the equivalent courses may be admitted as pre-majors, using the same criteria that apply for UCSD students, and will be allowed a maximum of three quarters to complete pre-major requirements. Transfer students are therefore encouraged to complete these requirements at the community college.

If a student applies for admission to a bioinformatics specialization but is not selected after completion of the screening courses, that

student will remain eligible for specialization or major to which they were originally admitted.

Lower-Division Requirements

Mathematics 20A-B-C, 20F and
Mathematics 15B or CSE 21
Chemistry 6A-B-C and lab
Physics 2A-B-C
BILD 1 and 2
BILD 94
CSE 11, CSE 12 (Students may take the slower paced version, CSE 8A + CSE 8B, instead of CSE 11.)

Upper-Division Requirements

1. Organic Chemistry (Chemistry 140A-B)
2. Advanced Data Structure (CSE 100 or Mathematics 176)
3. Design and Analysis of Algorithms (CSE 101 or Mathematics 188)
4. Metabolic Biochemistry (BIBC 102) or Biochemical Energetics and Metabolism (Chemistry 114B)
5. Biochemical Techniques (BIBC 103)
6. Physical Biochemistry (BIBC 110) or Physical Chemistry (Chemistry 127)
7. Genetics (BICD 100)
8. Cell Biology (BICD 110)
9. Molecular Biology (BIMM 100) or Molecular and Cellular Biochemistry (Chem 114D)
10. Recombinant DNA Lab (BIMM 101)
11. Molecular Sequence Analysis (BIMM 181)
12. Biological Databases (BIMM 182)
13. Applied Genomic Technologies (BENG 183)
14. Computational Molecular Biology (BIMM 184)
15. Bioinformatics Lab (BIMM 185)
16. Probability and Statistics (Math 186)
17. Three additional upper-division biology courses (each course must be at least four units) taken through the UCSD Division of Biological Sciences are required.

Ecology, Behavior and Evolution Major

Please refer to the "Division of Biological Sciences Required Review of Student Progress" notice detailed earlier in the Division of Biological Sciences section of this catalog.

This major includes the fields of population biology, ecology, conservation biology, animal behavior, population genetics, biogeography, and evolution. These fields have in common a focus on evolutionary processes and whole organisms in relation to each other and to their environments. Research careers in ecology, behavior, and evolution can be found in universities, government agencies, and the biotechnology industry. More applied careers for ecologists are equally varied: recent graduates now work in forestry and wildlife management, as ecological consultants for U.S. and foreign governments and private industry, as teachers, or in new fields such as ecological medicine and epidemiology, environmental design and planning, and conservation biology. Because organismal biology spans such a wide variety of topics, this major has been designed to provide the basic fundamentals while allowing maximum flexibility within the general topic areas.

Lower-Division Requirements

BILD 1, 2, and 3

Chemistry 6A-B-C. Laboratories in chemistry are not required.

Mathematics 10A-B, and 11 or 10C or 20A-B-C

Physics 1A/1AL, 1B/1BL, 1C/1CL or 2A-B-C

Upper-Division Requirements

1. Genetics (BICD 100)

2. Biometry (BIEB 100)

This course is a prerequisite for several core courses and should be taken in the first or second year.

3. Introductory Ecology (BIEB 102)

4. Evolution (BIEB 150)

5. Seven core courses to be chosen from BIEB 121-180 are required. At least two of these courses must be laboratory or field courses (BIEB 121, 131, 165, 167, and/or 179). Laboratory courses may be taken concurrently with

the prerequisite lecture course if *Biometry (BIEB 100)* has been taken. Note that some of the courses may not be offered every year. For that reason, it is recommended that students take as many required courses as possible when the courses are offered. Students who take the intensive EAP field courses in tropical biology offered in Costa Rica or marine biology in Australia will receive credit toward their degree. All EAP courses must be petitioned upon return. Consult the Education Abroad Program Office at the UCSD International Center for details.

6. Three additional upper-division courses (each course must be at least four units) in biology or other departments are required. EBE-related courses are offered in mathematics, chemistry, environmental systems, earth sciences, economics, biological anthropology, urban studies (GIS), some other social science departments, and in the graduate programs at SIO (marine biology and oceanography) and IR/PS. *Students are required to meet the Division of Biological Sciences residency requirement.* Courses to be completed outside of the Division of Biological Sciences **must be petitioned** (prior to enrollment) to satisfy this requirement. EBE students whose graduate education or careers require biochemistry should take Organic Chemistry 140A, 140B, and Metabolic Biochemistry (BIBC 102) to satisfy this three-course requirement.

Note: For more information on how the BISP 194, 195, 196, 197, or 199 can count toward major requirements, please see the previous section "Special Studies Courses."

General Biology Major

Please refer to the "Division of Biological Sciences Required Review of Student Progress" notice detailed earlier in the Division of Biological Sciences section of this catalog.

This program allows the most diversified exposure to biology of any of the majors offered by the Division of Biological Sciences. It is designed for students with broad interests who do not wish to be constrained by the specialized requirements of the other majors and who desire maximum freedom to pursue their particular educational goals.

Lower-Division Requirements

BILD 1, 2, and 3

Chemistry 6A-B-C and BL

Mathematics 10A-B, and 11 or 10C or 20A-B-C

Physics 1A/1AL, 1B/1BL, 1C/1CL or 2A-B-C and one lab

Upper-Division Requirements

1. Organic Chemistry (Chemistry 140A and 140B or 141A and 141B)

2. Metabolic Biochemistry (BIBC 102)

3. Genetics (BICD 100)

4. Two upper-division biology labs to be chosen from the following: BIBC 103, 105, BICD 101, 111, 123, 131, 133, 145, BIEB 121, 165, 167, 179, BICD 101, 103, 121, 127, BIPN 105, or 145.

5. Seven additional upper-division biology courses (each course must be at least four units) taken through the UCSD Division of Biological Sciences are required.

Note: For more information on how the BISP 194, 195, 196, 197, or 199 can count toward major requirements, please see the previous section "Special Studies Courses."

Although students are free to design upper-division curricula which meet their individual educational goals, Molecular Biology (BIMM 100) and Cell Biology (BICD 110) are strongly recommended for those contemplating applying to graduate or professional schools.

Human Biology Major

This major is designed to provide students with the fundamental courses required for entry into: schools of medicine, veterinary medicine, dentistry, and pharmacy; Ph.D. programs in the biomedical sciences; and biotech research, teaching, medical technology, patent law, physical therapy, nutrition, and nursing. The core classes required of all human biology majors provide the student with the basic principles that help us understand normal human physiology and the molecular basis of human disease. The course options in Human Physiology, Human Disease, and Biomedical-related laboratories provide the students with educational breadth while still allowing them considerable flexibility in tailoring their course of study to suit their educational goals.

Lower-Division Requirements

BILD 1 and 3 (Note: BILD 2 is not required, but is a prerequisite for many upper-division courses.)

Chemistry 6A-B-C and 6BL

Physics 1A/1AL, 1B/1BL, 1C/1CL or Physics 2A-B-C and one lab

Mathematics 10A-B, and 11 or 10C or 20A-B-C

Upper-Division Requirements

1. Organic Chemistry (Chemistry 140A and 140B or 141A and 141B)
2. Organic Chemistry Lab (Chemistry 143A)
3. Metabolic Biochemistry (BIBC 102)
4. Genetics (BICD 100)
5. Molecular Biology (BIMM 100)
6. Molecular Basis of Human Disease (BIMM 110)
7. Mammalian Physiology I (BIPN 100)
8. Three courses from the following two groups, Human Physiology and Human Disease. At least one course must be taken from each group.

Human Physiology

Nutrition (BIBC 120)

Embryos, Genes, and Development (BICD 130)

Human Reproduction and Development (BICD 134)

Immunology (BICD 140)

Endocrinology (BICD 150)

Mammalian Physiology II (BIPN 102)

Biology of Exercise (BIPN 108)

Cellular Basis of Learning and Memory (BIPN 148)

Human Disease

AIDS Science and Society (BICD 136)

Topics in Human Genetics (BICD 170)

Virology (BIMM 114)

Pharmacology (BIMM 118)

Bacteriology (BIMM 120)

Medical Microbiology (BIMM 124)

Biology of Cancer (BIMM 134)

9. Two of the following lab courses:

Biochemical Techniques (BIBC 103)

Signal Transduction Lab (BIBC 105)

Cell Biology Lab (BICD 111)

Embryology Lab (BICD 131)

Developmental Biology Lab (BICD 133)

Laboratory in Molecular Medicine (BICD 145)

Recombinant DNA Techniques (BIMM 101)

Microbiology Lab (BIMM 121)

Animal Physiology Lab (BIPN 105)

10. At least two other upper-division courses (each course must be at least four units) offered by the UCSD Division of Biological Sciences. Recommended courses include additional courses from the Human Physiology and Human Disease lists in section 8 above and BICD 110 (Cell Biology), BIEB 154 (Molecular Evolution), and BICD 118 (Pathways of Intracellular Protein Trafficking and Compartmentation).

Note: For more information on how the BISP 194, 195, 196, 197, or 199 can count toward major requirements, please see the previous section "Special Studies Courses."

Microbiology Major

Please refer to the "Division of Biological Sciences Required Review of Student Progress" notice detailed earlier in the Division of Biological Sciences section of this catalog.

The microbiology major is designed to prepare students for graduate studies and for professional careers in a variety of health-related programs. The specialization in microbiology can provide the basic background for work in medical technology, or for further training in public health or other health-related specialties. The program is also designed to provide a foundation for graduate studies in microbiology, virology, and a variety of allied fields as well as for medical and dental school.

Lower-Division Requirements

BILD 1 and 3 (Note: BILD 2 is not required, but is a prerequisite for many upper-division courses.)

Chemistry 6A-B-C and BL

Mathematics 10A-B, and 11 or 10C or 20A-B-C

Physics 1A/1AL, 1B/1BL, 1C/1CL or 2A-B-C and one lab

Upper-Division Requirements

1. Organic Chemistry (Chemistry 140A-B or 141A-B)
2. Organic Chemistry Laboratory (Chemistry 143A)
3. Metabolic Biochemistry (BIBC 102)
4. Biochemical Techniques (BIBC 103)

5. Genetics (BICD 100)

6. Immunology (BICD 140)

7. Molecular Biology (BIMM 100)

8. Virology (BIMM 114)

9. Bacteriology (BIMM 120)

10. Laboratory in Microbiology (BIMM 121)

11. Medical Microbiology (BIMM 124)

12. Three additional upper-division biology courses (each course must be at least four units) taken through the UCSD Division of Biological Sciences are required. Other courses of special interest to microbiology majors are listed below:

Cell Biology (BICD 110)

Regulation of Gene Activity in Eucaryotic Cells (BIMM 112)

Microbial Genetics (BIMM 122)

Recombinant DNA Techniques (BIMM 101)

Note: For more information on how the BISP 194, 195, 196, 197, or 199 can count toward major requirements, please see the previous section "Special Studies Courses."

Molecular Biology Major

Please refer to the "Division of Biological Sciences Required Review of Student Progress" notice detailed earlier in the Division of Biological Sciences section of this catalog.

The program for molecular biology is designed to provide an intensive exposure to the theoretical concepts and experimental techniques of molecular biology. The concepts and techniques of molecular biology are the foundation for the studies of all aspects of biology in modern time. A focus on molecular biology, therefore, provides an excellent preparation for a wide range of advanced studies including basic research, medicine, bioengineering, and biotechnology. Considerable emphasis is placed on chemistry, biochemistry, and genetics for students enrolled in the program. As such, it is recommended for those students who have a particularly strong interest in this field of study.

Lower-Division Requirements

BILD 1 and 3 (Note: BILD 2 is not required, but is a prerequisite for many upper-division courses.)

Chemistry 6A-B-C and BL

Mathematics 20A-B-C

Physics 1A/1AL, 1B/1BL, 1C/1CL or 2A-B-C, and one lab

Upper-Division Requirements

1. Organic Chemistry (Chemistry 140A-B or 141A-B)
2. Organic Chemistry Laboratory (Chemistry 143A) or Physical Chemistry Laboratory (Chemistry 105A)
3. Structural Biochemistry (BIBC 100)
4. Metabolic Biochemistry (BIBC 102)
5. Biochemical Techniques (BIBC 103)
6. Genetics (BICD 100)
7. Cell Biology (BICD 110)
8. Molecular Biology (BIMM 100)
9. Recombinant DNA Techniques (BIMM 101)
10. Regulation of Gene Activity in Eukaryotic Cells (BIMM 112)
11. Microbial Genetics (BIMM 122)
12. Four additional upper-division biology courses (each course must be at least four units) taken through the UCSD Division of Biological Sciences are required. Attention is drawn to BICD 120, BICD 122, BICD 140, BIMM 110, and BIMM 114.

Note: For more information on how the BISP 194, 195, 196, 197, or 199 can count toward major requirements, please see the previous section "Special Studies Courses."

Physiology and Neuroscience Major

Please refer to the "Division of Biological Sciences Required Review of Student Progress" notice detailed earlier in the Division of Biological Sciences section of this catalog.

This major provides a program for studying the bodily and neural functions of complex organisms. A student may concentrate upon a more specialized area of study, such as neurobiology, animal physiology, or endocrinology.

This major is designed to provide students with the fundamental courses required for entry into medical school, graduate school in biological or neural sciences, or entry into other health-related professions such as nursing, dentistry,

veterinary medicine, pharmacy, physical therapy, physical education, agriculture, and wildlife management.

Lower-Division Requirements

BILD 1 and 3 (Note: BILD 2 is not required, but is a prerequisite for many upper-division courses.)

Chemistry 6A-B-C and BL

Mathematics 10A-B, and 11 or 10C or 20A-B-C

Physics 1A/1AL, 1B/1BL, 1C/1CL or 2A-B-C, and one lab

Upper-Division Requirements

1. Organic Chemistry (Chemistry 140A, 140B, or 141A, 141B)
 2. Organic Chemistry Laboratory (Chemistry 143A)
 3. Metabolic Biochemistry (BIBC 102)
 4. Genetics (BICD 100)
 5. Molecular Biology (BIMM 100)
 6. Four from the following eight courses: Mammalian Physiology I (BIPN 100) Mammalian Physiology II (BIPN 102) Comparative Physiology (BIPN 106) Cellular Neurobiology (BIPN 140) Systems Neurobiology (BIPN 142) Developmental Neurobiology (BIPN 144) Computational Neurobiology (BIPN 146) Cellular Basis of Learning and Memory (BIPN 148)
 7. One of four laboratories (BICD 131, BICD 133, BIPN 105, BIPN 145)
 8. One upper-division biology lab to be chosen from the following: BIBC 103, 105, BICD 101, 111, 123, 131, 133, 145, BIEB 121, 131, 165, 167, 179, BIMM 101, 103, 121, 127, BIPN 105, 145. This requirement may include a lab from number 7 that has not already been taken by the student.
 9. Three additional upper-division biology courses (each course must be at least four units) taken through the UCSD Division of Biological Sciences are required and may include the above (numbers 6-8) if not already taken.
- Note:** For more information on how the BISP 194, 195, 196, 197, or 199 can count toward major requirements, please see the previous section "Special Studies Courses."

Minor in Biological Sciences

To receive a minor from the Division of Biological Sciences, a student must complete at least seven four-unit biology courses (for a total of at least twenty-eight units of course work).

Lower-Division Requirements

BILD 1 and 3

or

BILD 10 and 3

Upper-Division Requirements

- Any five upper-division biology courses offered by the Division of Biological Sciences at UCSD
- Students may apply transferable biology courses from another institution toward the lower-division requirements, after obtaining approval from the UCSD Division of Biological Sciences.
- No courses taken outside of the Division of Biological Sciences may be applied toward the biology minor.
- All courses must be taken for a letter grade.
- The minimum GPA requirement for the biology minor is 2.0 in the upper-division courses.
- Advanced placement (AP) biology scores may be applied toward the minor.
- BISP 195 may not be used toward the biology minor. One quarter of BISP 196, 197, or 199 may be counted toward the minor.
- Students may not minor and major in the Division of Biological Sciences.

Secondary School Biology Teaching

UCSD's biological sciences division is committed to the education of future biology teachers and offers an excellent preparation for teaching biology in secondary schools. If you are interested in earning a California teaching credential from UCSD, contact the Teacher Education Program for information about the prerequisite and professional preparation requirements. It is recommended that you contact TEP and the Biology Student Affairs Office early in your academic career to help you plan a suitable biology curriculum. If you plan to get your credential at

another institution, keep in mind that a broad education in biology is the best preparation to become a teacher.

We suggest that students take courses in plant and animal biology, microbiology, ecology, population biology, evolution, marine biology, genetics, and biochemistry. Courses in cellular and molecular biology are also advisable. After completion of BILD 1, 2, and 3, a suggested program of upper-division courses would be: BIBC 100 or 102, BICD 100, 120, 130, BIEB 102, 150, BIPN 106, SIO 275B. This would give you as a prospective teacher the required breadth of education.

Integrated Bachelor's/ Master's Degree Program

An integrated program leading to a bachelor of science degree and a master of science degree in biology is offered to those undergraduate students who are enrolled in any of the major programs offered by the Division of Biological Sciences at UCSD. Qualified students are able to obtain the M.S. degree within one year following receipt of the B.S. degree. Students interested in applying to this program should meet with the BS/MS adviser in the Biology Student Affairs Office BEFORE the end of their junior year.

The program is open only to UCSD undergraduates. The Division of Biological Sciences does not have financial aid available for students enrolled in this program.

Eligibility and Enrollment

To be eligible, students must have completed the first two quarters of their junior year in residence at UCSD and must have an overall UC GPA of at least 3.0. Students' major GPA should be at least 3.3. Students must demonstrate excellent performance in upper-division biology core courses during their undergraduate program to be eligible to enroll in biology graduate core courses.

It is the responsibility of the prospective B.S./M.S. student to select a faculty member (from the Division of Biological Sciences) who would be willing to serve as the student's adviser and in whose laboratory the student would complete at least twenty-four units of research over a two-year period. The units of research which must be completed during the student's senior undergraduate year, must be taken IN ADDITION to the requirements for the bachelor's degree. These

units will count toward the requirements for the master's degree only. Students must complete six consecutive quarters of research to fulfill the research component of the program. Any deviation from this plan, such as a break in enrollment for one or more quarters, will be cause for the student to be dropped from the program.

Students who have been approved (by both the Division of Biological Sciences and the UCSD Office of Graduate Admissions) for the program must enroll in a Special Studies Course, BISP 199 (senior year) or BGGN 271 (graduate year), for each, and every, quarter of participation in the B.S./M.S. program. Students can obtain the appropriate course code and division stamp at the Biology Student Affairs Office.

Research work (BGGN 271) will be credited toward the B.S./M.S. program requirements only if it is completed during the time a student is officially enrolled at UCSD and has paid tuition for that quarter.

Requirements for the Master of Science Degree

1. Completion of six consecutive quarters of research during the senior undergraduate year and the graduate year.
2. Completion of at least thirty-six units of graduate course work (BGGN 200-level or higher, or approved [via petition] graduate courses offered by related departments at a similar level) during the graduate year. The course of study must be approved by the faculty adviser.
3. Twelve of the thirty-six units must be in courses other than BGGN 271 (BGGN 297 and BGGN 299 may not be used to satisfy this requirement).
4. Serve as a graduate teaching assistant.
5. Maintenance of a grade-point average (both overall and in the major) of at least 3.0 for all course work, both cumulatively and for each quarter of enrollment in the B.S./M.S. program. If the student's GPA falls below 3.0 (for either overall or in the major), he or she will be automatically dropped from the program.
6. Completion of a thesis, with an oral presentation to, and approval of, a three-member Thesis Committee. A student may have any regular faculty at UCSD or any adjunct faculty as their adviser and chair of their Thesis Committee. The Thesis Committee must con-

tain at least two regular faculty from the Division of Biological Sciences and no more than one adjunct faculty can serve on the committee. If an adjunct faculty serves as chair of the Thesis Committee, one of the biology members must serve as co-chair.

7. At least three complete, separate, and consecutive quarters of residency as a graduate student which will commence the quarter immediately following the quarter in which the B.S. degree is awarded. (Note: The summer session is not considered an official quarter during the graduate year.)
8. Students who have been approved for the B.S./M.S. program must provide the Office of Graduate Admissions with a copy of their official UCSD transcripts with the B.S. degree posted, PRIOR TO THE COMMENCEMENT OF THE GRADUATE YEAR IN THE PROGRAM.

Non-Degree Program

The Division of Biological Sciences will accept applicants into the non-degree program for a maximum of one year only. Qualified applicants must have at least a 3.0 GPA in their upper-division work to be accepted. Justification will not be made for those who fall below the GPA minimum.

Students who wish to apply to the UCSD biological sciences Ph.D. program at a later date should not apply for this program. However, students who have applied to graduate or medical schools elsewhere, but have not yet been accepted, are welcome to apply.

Once accepted into this program, the student has graduate status for the academic year. Courses may be taken on the undergraduate or graduate level with consent of the instructor. Students will not be assigned faculty advisers and must make their own academic plans.

The Doctoral Program

Graduate studies for a Ph.D. degree in the Division of Biological Sciences in affiliation with the Salk Institute are oriented mainly toward the development of the capacity for independent research and for teaching in the biological sciences.

The requirements for entrance to graduate study in the Division of Biological Sciences are flexible, but a strong background in mathematics, chemistry, and physics is recommended.

Formal course work and opportunities for dissertation research include most basic areas of experimental biology, with emphasis in the general areas of biochemistry, biophysics, cell biology, developmental biology, genetics, immunology, molecular biology, neurobiology, plant molecular biology, ecology, behavior and evolution, virology, and cancer biology.

During the first year of graduate study, each student undertakes a research project in the laboratory of each of four to six different faculty members, and is expected to spend a major portion of his or her academic time on this project. The laboratories are selected by the student in consultation with the first year adviser to provide a broad view of the research interests of the division. The student is also expected to enroll in the first-year graduate biology sequence which includes advanced material in genetics, developmental biology, plant biology, neurobiology, molecular biology, cell biology, virology, and immunology. Students are also required to complete a minimum of twelve units of BGGN 500 (Apprentice Teaching in Biology.) A program of further study, including seminars and courses appropriate to a student's background and interests, is arranged through consultation between the student and the faculty. Much reliance is placed on informal instruction through early and close association of the student with the faculty and research staff, and through regular seminars. After becoming familiar with the research activities of the faculty through the laboratory rotation program, the student begins work on a thesis research problem of his or her choice no later than the end of the first year. The student is free to choose for the thesis adviser a regular member of the UCSD faculty or an adjunct member of the Division of Biological Sciences faculty. The student is required to have completed a two-part examination in order to be admitted to candidacy for the Ph.D. degree. The purpose of the examinations is for the student to demonstrate competence in the field of major interest and in related fields of biology. The major remaining requirement for the Ph.D. degree is the satisfactory completion of a dissertation consisting of original research carried out under the guidance of a faculty member.

Close collaboration with members of the Department of Chemistry and Biochemistry is a vital and stimulating aspect of the biology program. Additional strength and breadth in biology are gained by collaborating with the

Department of Marine Biology of the Scripps Institution of Oceanography, with The Scripps Research Institute, and with the Salk Institute for Biological Studies.

Divisional Ph.D. Time Limit Policies

Students must be advanced to candidacy by the end of four years. Total university support cannot exceed seven years. Total registered time at UCSD cannot exceed seven years.

Specialization in Computational Neurobiology

Students interested in computational neurobiology may apply to the Division of Biological Sciences. These young scientists are trained in the broad range of scientific and technical skills essential to understand the computational resources of neural systems. Students in this program have the opportunity to join labs of faculty from several participating departments, including the Departments of Neurosciences, Cognitive Science, and ECE.

Joint Doctoral Program with San Diego State University

The Division of Biological Sciences at UCSD participates in a joint graduate program with the Department of Biology at SDSU, primarily in the areas of cell and molecular biology, and leading to the Ph.D. degree in biology. Graduate student participants in the joint doctoral program are required to spend one year enrolled at UCSD; thesis research is carried out under the supervision of the SDSU faculty.

Information regarding admission is found in the current edition of the San Diego State University Graduate Bulletin.

COURSES

For course descriptions not found in the 2006–2007 General Catalog, please contact the department for more information.

NOTE: The division will endeavor to offer the courses as outlined below; however, unforeseen circumstances sometimes mandate a change of scheduled offerings, especially the quarter offered (F,W,S). The follow-

ing schedule is tentative for the academic year 2006–2007 only. It should not be assumed that the same schedule will continue after this academic year. Students are strongly advised to check the Schedule of Classes or with the division's Student Affairs Office (1128 Pacific Hall) before relying on the following schedule. Courses required for the major may be scheduled on the same day and/or same time. This is of particular importance in planning schedules for graduation requirements.

Students who have satisfied the prerequisites for courses at another college or by AP credit may need to be pre-authorized to register for the course. Please come to the Biology Student Affairs Office before your registration time to be authorized. If the class is full please place your name on the waitlist and attend the first class meeting.

Students who do not attend the first thirty minutes of the first scheduled meeting (be it lab or lecture) will be considered not enrolled in the course and may be administratively dropped. Prior written notification to the instructor regarding an anticipated absence will ensure a space. However, responsibility for officially dropping the lab from the registrar's records belongs to the student.

IF A STUDENT DROPS A LAB COURSE AFTER THE END OF THE SECOND SESSION, THE DIVISION WILL REPORT A "W" FOR THE COURSE.

LOWER-DIVISION

BILD 1. The Cell (4)

An introduction to cellular structure and function, to biological molecules, bioenergetics, to the genetics of both prokaryotic and eukaryotic organisms, and to the elements of molecular biology. Three hours of lecture and one hour of recitation. *Prerequisite: BILD 1 (F,W,S)*

BILD 2. Multicellular Life (4)

An introduction to the development and the physiological processes of plants and animals. Included are treatments of reproduction, nutrition, respiration, transport systems, regulation of the internal environment, the nervous system, and behavior. Three hours of lecture and one hour of recitation. *Prerequisite: BILD 1. (F,W,S)*

BILD 3. Organismic and Evolutionary Biology (4)

The first principles of evolutionary theory, classification, ecology, and behavior; a phylogenetic synopsis of the major groups of organisms from viruses to primates. Three hours of lecture and one hour of lab. *Prerequisite: none.* Note: E.B.E. majors should complete this course during their first year at UCSD. (F,W,S)

BILD 7. The Beginning of Life (4)

An introduction to the basic principles of plant and animal development, emphasizing the similar strategies by which diverse organisms develop. Practical applications of developmental principles as well as ethical considerations arising from these technologies will be discussed. *Prerequisite: none.* (S)

BILD 10. Fundamental Concepts of Modern Biology (4)

An introduction to the biochemistry and genetics of cells and organisms; illustrations are drawn from microbiology and human biology. Three hours of lecture and one hour of discussion. This course is designed for non-biology students and does not satisfy a lower-division requirement for any biology major. Note: Students may not receive credit for BILD 10 after receiving credit for BILD 1. (F,W,S)

BILD 12. Neurobiology and Behavior (4)

An introduction to the organization and functions of the nervous system; topics include molecular, cellular, developmental, systems, and behavioral neurobiology. Three hours of lecture and one hour of discussion. This course is designed for non-biology students and does not satisfy a lower-division requirement for any biology major.

BILD 16. History of Life (4)

Life has a very long history on earth and this course will chronicle patterns of biological diversity from its origin over 3 billion years ago to the present day. Topics covered will include methods for reconstructing the history of life on this planet, the origin and evolution of major groups of plants and animals, dinosaur paleobiology, past environmental changes and their effects on species and communities, and extinctions. We will also explore how insights from the past can be used to understand how present and future environmental changes will impact biological diversity. This course is designed for non-biology majors.

BILD 18. Human Impact on the Environment (4)

Course will focus on issues such as global warming, species extinction, and human impact on the oceans and forests. History and scientific projections will be examined in relation to these events. Possible solutions to these worldwide processes and a critical assessment of their causes and consequences will be covered. *Prerequisite: none.* (S)

BILD 20. Human Genetics in Modern Society (4)

Fundamentals of human genetics and introduction to modern genetic technology such as gene cloning and DNA finger printing. Applications of these techniques, such as forensic genetics, genetic screening, and genetic engineering. Social impacts and ethical implications of these applications. This course is designed for non-biology students and does not satisfy a lower-division requirement for any biology major. Note: Students may not receive credit for BILD 20 after receiving credit for BICD 100. (F)

BILD 22. Human Nutrition (4)

A survey of our understanding of the basic chemistry and biology of human nutrition; discussions of all aspects of food: nutritional value, diet, nutritional diseases, public health, and public policy. Three hours of lecture and one hour of discussion. This course is designed for non-biology students and does not satisfy a lower-division requirement for any biology major. Note: Students may not receive credit for BILD 22 after receiving credit for BIBC 120. (S)

BILD 24. Biology of Human Reproduction (4)

The topics covered are: sexual development in embryo and fetus, the nature and regulation of changes at puberty, the functioning of the mature sexual system. Three hours of lecture. This course is designed for non-biology students and does not satisfy a lower-division requirement for any biology major. Note: Students may not receive credit for BILD 24 after receiving credit for BICD 134. (W)

BILD 26. Human Physiology (4)

Introduction to the elements of human physiology and the functioning of the various organ systems. The course presents a broad, yet detailed, analysis of human physiology, with particular emphasis towards understanding disease processes. Three hours of lecture and one hour of discussion. This course is designed for non-biology students and does not satisfy a lower-division requirement for any biology major. (F)

BILD 30. The Biology of Plagues: Past and Present (4)

An introduction to diseases caused by viruses, bacteria, and parasites, and the impact of these diseases on human society. Topics include the biology of infectious disease, epidemiology, and promising new methods to fight disease. Three hours of lecture and one hour discussion. This course is designed for non-biology majors and does not satisfy a lower-division requirement for any biology major. (Note: Students may not receive credit for BILD 30 after receiving credit for BIMM 120.) (S)

BILD 32. Biomedicine/Cancer (4)

An introduction to molecular, cellular, and immunological aspects of cancer and a consideration of the sociological and psychological impact of cancer on the individual and general society. Three hours of lecture. This course is designed for non-biology students and does not satisfy a lower-division requirement for any biology major. Note: Students may not receive credit for BILD 32 after receiving credit for BIMM 134.

BILD 36. AIDS Science and Society (4)

An introduction to all aspects of the AIDS epidemic. Topics include the epidemiology, biology, and clinical aspects of HIV infection; HIV testing; education and approaches to therapy; and the social, political, and legal impacts of AIDS on the individual and society. In order to count for their major, biology majors must take the upper-division course, BICD 136.

BILD 87. Freshman Seminar (1)

The freshman seminar program is designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshmen seminars are offered in all campus departments and undergraduate colleges, and topics vary from quarter to quarter. Enrollment is limited to fifteen to twenty students, with preference given to entering freshmen. (F,W,S)

BILD 90. Undergraduate Seminar (1)

This seminar is restricted to lower-division undergraduate students (freshmen and sophomores). The course introduces current biological topics. The topics vary with instructors and for each quarter. Examples of topics which may be discussed are: wildlife conservation, signalling within and between cells, mapping the human genome, etc. This course does not satisfy any requirement for the biology major, biology minor, or college general/education.

BILD 92. Professional Topics (1)

This seminar will introduce students to the various subdisciplines and their research methodology in the biological sciences. Emphasis will be on bioinformatics, neurophysiology, and biotechnology. Current research topics in the specialized areas in academe and industry will be discussed. The role and professional identity of biologists in research, consulting, government, management, and teaching will be reviewed. In addition, issues surrounding professional ethics will be discussed.

BILD 94. Professional Issues in Bioinformatics (1)

This seminar will introduce undergraduate students, especially freshmen and sophomores, to a variety of issues and topics in the field of bioinformatics. (S)

BILD 95. Undergraduate Workshops (1)

The workshops will be restricted to lower-division undergraduates. The course will introduce students to the methods of scientific research and to a variety of research topics in the biological/biomedical sciences. Examples of topics are: Introduction to Scientific Research, AIDS, Medical and Social Aspects, Is the Mind the Same as the Brain, Wildlife Conservation.

BILD 99. Independent Research (2 or 4)

Independent research by special arrangement with a faculty member. (P/NP grades only.) Students must have an overall UCSD GPA of at least 3.0 and a minimum of thirty units complete. Students must complete a "Special Studies" form and a Division of Biological Sciences "Research Plan." Credit may not be received for a course numbered 99 subsequent to receiving credit for a course numbered 199.

UPPER-DIVISION

Biochemistry

BIBC 100. Structural Biochemistry (4)

The structure and function of biomolecules. Includes protein conformation, dynamics, and function; enzymatic catalysis, enzyme kinetics, and allosteric regulation; lipids and membranes; sugars and polysaccharides; and nucleic acids. Three hours of lecture and one hour of recitation. *Prerequisites: two quarters of organic chemistry (second quarter may be taken concurrently).* (Note: Students may not receive credit for both BIBC 100 and Chem. 114A.) (F,W,S)

BIBC 102. Metabolic Biochemistry (4)

Energy-producing pathways—glycolysis, the TCA cycle, oxidative phosphorylation, photosynthesis, and fatty acid oxidation; and biosynthetic pathways—gluconeogenesis, glycogen synthesis, and fatty acid biosynthesis. Nitrogen metabolism, urea cycle, amino acid metabolism, nucleotide metabolism, and metabolism of macromolecules. Three hours lecture and one hour recitation. *Prerequisites: two quarters of organic chemistry (second quarter may be taken concurrently).* Note: Students may not receive credit for both BIBC 102 and Chem. 114B.) (F,W,S)

BIBC 103. Biochemical Techniques (4)

Introductory laboratory course in current principles and techniques applicable to research problems in biochemistry and molecular biology. Techniques include protein and nucleic acid purification; identification methods such as centrifugation, chromatography, and electrophoresis; immunological, spectrophotometric, and enzymatic methods. *Prerequisite: BILD 1.* Students may not receive credit for BIBC 103 after taking Chem. 112A. (F,W,S)

BIBC 104. Biochemistry and Biotechnology of Plants (4)
The biochemical and molecular basis of plant genetic engineering to understand modern approaches to crop improvement. *Prerequisite: BILD 1; Chem 140A. BIBC 102 and Chem 140B may be taken concurrently.* (S)

BIBC 105. Signal Transduction Laboratory (6)
A laboratory course involving the application of molecular, cellular, and biochemical techniques to explore signal transduction mechanisms in mammalian cells. The events between ligand-binding to a cell surface receptor and activation of gene transcription in the nucleus will be studied. *Prerequisites: BIBC 100, BIBC 103 and BIMM 100.*

BIBC 110. Physical Biochemistry (4)
The theory and applications of physical chemistry to biological molecules, process and systems and techniques used in biochemistry and physiology. Topics include reversible and irreversible thermodynamics, bioenergetics, energy coupling and transduction, solutions of macromolecules, sedimentation, chromatography, electrophoresis, passive and active membrane transport, spectroscopy, and chemical kinetics. Three hours of lecture and one hour of recitation. *Prerequisites: calculus and organic chemistry.* (W)

BIBC 115. Computer Programming in Biology (4)
Use of computer programming in the analysis and presentation of biological data (computation of best value and standard deviation, histogram, least squares fitting procedure, simulation of genetic experiments, etc.) Students learn the C++ computer language and run their programs at the Computer Center. There are some visits to laboratories and hospitals to see applications of computers in biology and medicine. Three hours of lecture and about ten hours of homework per week; limited enrollment. *Prerequisite: upper-division standing or consent of instructor.* (Note: Students may not receive credit for both BIBC 115 and Chem. 134.)

BIBC 116 Evolution of Genes and Proteins (4)
The history of an organism can be found in its genome. Analysis of the primary sequences will be used to recognize families of genes that arose by duplication and divergence. Topics include comparisons of amino acid sequences and three dimensional structures and range from the oldest and most widely distributed proteins to modern mosaics. Where possible, specific motifs and folds will be traced to their ancestral beginnings. *Prerequisites: BIBC 100, BIMM 100.* (W)

BIBC 120. Nutrition (4)
Emphasis is on the biochemical aspects of nutrition. The known functions of vitamins, minerals, fats, carbohydrates, and protein are discussed in terms of experiments in nutrition and an evaluation of the relation of the knowledge to nutrition in man. Three hours of lecture. *Prerequisite: BIBC 102 (may be taken concurrently).* (W)

BIBC 130. Marine Biochemistry (4)
Biochemical mechanisms of adaptation in organisms to the marine environment. Special emphasis will be on the effects of pressure, temperature, salinity, oxygen, and light on the physiology and biochemistry. *Prerequisites: BIBC 102 or consent of instructor.* (F)

Genetics, Cellular and Developmental Biology of Plants and Animals

BICD 100. Genetics (4)
An introduction to the principles of heredity in diploid organisms, fungi, bacteria, and viruses. Mendelian

inheritance; population genetics; quantitative genetics; linkage; sex determination; meiotic behavior of chromosome aberrations, gene structure, regulation, and replication; genetic code. Three hours of lecture and one hour of recitation. *Prerequisite: BILD 1 or the equivalent.* (F,W,S)

BICD 101. Eucaryotic Genetics Laboratory (4)
This course emphasizes the principles of Mendelian inheritance and requires the student to apply both cytological and genetic analysis to the solution of problems in transmission genetics. One hour of lecture and seven hours of laboratory. *Prerequisite: BICD 100.* Attendance at the first lecture/lab is required. Non-attendance will result in the student's being dropped from the course roster. It is the student's responsibility to officially drop the course. (S)

BICD 110. Cell Biology (4)
The structure and function of cells and cell organelles, cell growth and division, motility, cell differentiation and specialization. Three hours of lecture and one hour of recitation. *Prerequisites: BIBC 100 or BIBC 102, and BICD 100.* (F,W,S)

BICD 111. Cell Biology Laboratory (6)
A laboratory course in the application of cellular techniques to biological problems. The establishment, growth, transformation, immortalization, and senescence of mammalian cells will be studied at the molecular and the cellular level. Ten hours of laboratory. In addition to the formal lab hours listed above, there will be an average of two hours in which students will be required to work in the class laboratory to complete experiments and prepare for presentations. *Prerequisite: BICD 110 (may be taken concurrently); BIBC 103 is strongly recommended.* Attendance at the first lecture/lab is required. Non-attendance will result in the student's being dropped from the course roster. It is the student's responsibility to officially drop the course. (F)

BICD 118. Pathways of Intracellular Protein Trafficking and Compartmentation (4)
This course will focus on various subcellular organelles, their function, protein traffic, disulfide bond formation, protein folding, assembly of macromolecular complexes, protein quality control, and cellular responses to misfolded proteins. The emphasis will be on experimental approaches and model systems for the analysis of these problems, and on the connection of these topics to human disease. Three hours of lecture and one hour of mandatory discussion of primary publications per week. Open to upper-division students only. *Prerequisites: BICD 110 and BIMM 100.* (W)

BICD 120. Fundamentals of Plant Biology (4)
An introduction to the biology of plants. Basic principles of plant anatomy, physiology, development, and diversity are covered as well as specialized topics, including plant genetic engineering, plant disease and stress, medicinal plants, plants and the environment, and sustainable agriculture. *Prerequisites: BILD 1 and 2.* (F)

BICD 122. Plant Cellular and Molecular Biology (4)
The cellular and molecular basis of plant development, including plant hormones, signal transduction mechanisms, light and plant growth, plant microorganism interaction, plant transformation, genetic engineering of plants. *Prerequisite: BIBC 102 required.* (W)

BICD 123. Plant Molecular Genetics and Biotechnology Laboratory (6)
Techniques in plant cell and tissue culture, plant transformation, genetic selection and screening of mutants, host pathogen interactions, gene regulation, organelle isolation, membrane transport. Two hours of lecture and eight hours of laboratory each week. In addition to the formal lab hours, there will be at least eight hours in which students will be required to work in the class laboratory to complete experiments and prepare for presentations. *Prerequisites: upper-division standing; BICD 120 strongly recommended.* Attendance at the first lecture/lab is required. Non-attendance will result in the student's being dropped from the course roster. It is the student's responsibility to officially drop the course. (S)

BICD 130. Embryos, Genes, and Development (4)
Developmental biology of animals at the tissue, cellular, and molecular levels. Basic processes of embryogenesis in a variety of invertebrate and vertebrate organisms. Cellular and molecular mechanisms that underlie cell fate determination and cell differentiation. More advanced topics such as pattern formation and sex determination are discussed. Open to upper-division students only. Three hours of lecture and one hour of recitation. *Prerequisites: BICD 100, upper-division standing, BIBC 100 or BIBC 102; BICD 110 strongly recommended, BIMM 100 strongly recommended.* (W)

BICD 131. Embryology Laboratory (6)
Descriptive and experimental embryology of marine invertebrates and of vertebrates. One and one-half hours of lecture and ten hours of laboratory each week. In addition to the formal lab hours, there will be at least six and a half hours in which students will be required to work in the class laboratory to complete experiments and prepare for presentations. *Prerequisites: BILD 1; BILD 2 or BIPN 100.* Attendance at the first lecture/lab is required. Nonattendance will result in the student's being dropped from the course roster. It is the student's responsibility to officially drop the course. (F)

BICD 133. Developmental Biology Lab (6)
Explore fundamentals of embryonic development using advanced techniques in light and fluorescent microscopy and by analyzing developmental mutants. Course includes selecting and knocking out genes of interest followed by phenotypic analysis. Invertebrate and vertebrate organisms covered. *Prerequisites: BILD 1; BILD 2 or BIPN 100; BIMM 100 and BIMM 110 are recommended.* Attendance at the first lecture/lab is required. Nonattendance will result in the student's being dropped from the course roster. It is the student's responsibility to officially drop the course.

BICD 134. Human Reproduction and Development (4)
This course is addressed to the development of the human sexual system, including gametogenesis, fertilization, and embryo implantation. Emphasis is placed on the physiology of reproductive functions. Three hours of lecture and one hour of discussion. *Prerequisites: BIBC 102 and BICD 100.* (F)

BICD 136. AIDS Science and Society (4)
An introduction to all aspects of the AIDS epidemic. Topics will include the epidemiology, biology, and clinical aspects of HIV infection, HIV testing, education and approaches to therapy, and the social, political, and legal impacts of AIDS on the individual and society. In order to count for their major, biology majors must take the upper-division course, BICD 136. *Prerequisites: BILD 1, BILD 2 recommended.* (S)

BICD 140. Immunology (4)

Formation and function of the mammalian immune system, molecular and cellular basis of the immune response, infectious diseases and autoimmunity. *Prerequisites: BICD 100, BIMM 100. BIBC 100 recommended. (W,S)*

BICD 142. Topics in Immunology (4)

This course covers selected topics in molecular and cellular immunology at a more advanced level, and is a sequel to Immunology (BICD 140). *Prerequisites: BICD 140 and upper-division standing. (S)*

BICD 145 Laboratory in Molecular Medicine (4)

This course focuses upon a molecular and immunological approach to study problems in modern medical research. The emphasis will be on novel approaches in medicine, including lymphocyte biology, cancer biology, and gene transfer. *Prerequisites: BIBC 103, BIMM 100. Attendance at the first lecture/lab is required. Nonattendance will result in the student's being dropped from the course roster. It is the student's responsibility to officially drop the course. (W)*

BICD 150. Endocrinology (4)

Normal function and diseases of the major hormone systems of the body including the hypothalamus/pituitary axis, the thyroid gland, reproduction and sexual development, metabolism and the pancreas, bone and calcium metabolism, and the adrenal glands. *Prerequisite: BIPN 100 (may be taken concurrently). (W)*

BICD 162. Critical Reading and Writing in the Biological Sciences (4)

Primary literature readings in the field of cell transport on how to approach a scientific paper, how to interpret results, and how to write a paper that summarizes scientific research. *Prerequisites: Chem. 140A, 140B; either BIBC 100 or BIBC 102; BIMM 100; BICD 110 is recommended; one laboratory course (BIBC 103 or BIMM 101 or BIMM 121 or BIPN 105) or other example of research experience (BISP 199 or research experience in industry).*

BICD 170. Topics in Human Genetics (4)

An advanced course covering aspects of human genetics in detail and using papers from the scientific literature as the major source of information. A review of basic genetics as applied to the human species is followed by the consideration of recent genetic insights into a number of human conditions which illustrate the principles covered in the first part of the course. *Prerequisites: BICD 100 (may not be taken concurrently), BIMM 100 is strongly recommended.*

BICD 180. Genetics of Model Organisms (4)

Survey of various organisms used in current biological/biomedical research. Biology faculty experts discuss organisms used in their research, outline history as genetic models, tools used for laboratory study, and contributions to the wider understanding of biological systems. *Prerequisite: BICD 100.*

Ecology, Behavior, and Evolution

BIEB 100. Biometry (4)

Application of statistics in biological problems. Topics: parametric statistics, (t-test, correlation, regression, ANOVA), non-parametric statistics resampling methods, experimental design. Mandatory homework to apply theory using statistical Macintosh-based programs. Instructor conducts mandatory two-hour discussion session in computer lab. Three hours of lecture and two hours of laboratory section. *Prerequisite: BILD 3 recommended. (S)*

BIEB 102. Introductory Ecology—Organisms and Habitat (4)

This course emphasizes principles shaping organisms, habitats, and ecosystems. Topics covered include population regulation, physiological ecology, competition, predation, and human exploitation. This will be an empirical look at general principles in ecology and conservation with emphasis on the unique organisms and habitats of California. *Prerequisite: BILD 3 or equivalent. (F)*

BIEB 110. Vertebrate Biology (4)

Course will introduce students to the natural history of turtles, lizards, snakes, birds, and terrestrial and marine mammals from both an ecological and evolutionary perspective. Students will conduct an independent field project. One field trip required. *Prerequisite: BILD 3. BILD 1 or 2 recommended.*

BIEB 121. Ecology Laboratory (6)

A laboratory course to familiarize students with ecological problem solving and methods. Sections will use the Macintosh computer and also perform outdoor field work. Two hours of lecture and eight hours of laboratory each week. In addition to the formal lab hours, there will be at least nine hours in which students will be required to work in the class laboratory to complete experiments and prepare for presentations. *Prerequisites: BIEB 100.*

BIEB 123. Molecular Methods in Ecology and Evolution Lab (4)

Theory and practice of molecular biology techniques used in ecological and evolutionary research. Includes isolation of DNA and RNA, PCR and its applications, DNA sequencing, gene expression analysis, bioinformatics, and ecological and evolutionary analysis of molecular data. Students may not enroll in or receive credit for both BIMM 101 and BIEB 123. *Prerequisite: BILD 3.*

BIEB 126. Plant Ecology (4)

This course begins with an introduction to plant population biology including whole-plant growth and physiology. We then focus on three classes of ecological interactions: plant-plant competition, plant-herbivore coevolution, and plant reproductive ecology including animal pollination and seed dispersal. *Prerequisite: BILD 3.*

BIEB 128. Insect Ecology (4)

This course begins with a survey of insect diversity and phylogenetic relationships. We then address ecological issues including thermal ecology, population dynamics (including outbreaks), movement and migration, competition, predation, herbivory, parasitism, insect defense, mimicry complexes, and sociality. *Prerequisite: BILD 3 or equivalent.*

BIEB 130. Introductory Marine Ecology (4)

An introduction to the marine environment—its physics and chemistry, the organisms which live there, and the ecological processes affecting the distributions and abundances of these organisms. *Prerequisites: BILD 3, high school physics, and chemistry.*

BIEB 131. Marine Invertebrate Ecology Laboratory (6)

A laboratory course introducing students to marine ecology. Students will participate in outdoor fieldwork and work in the laboratory gathering and analyzing ecological data. We will focus on ecological communities in estuary, sandy beach, and rocky intertidal habitats. Two hours of lecture and eight hours of laboratory each week. In addition to the formal lab hours, there will be at least nine hours in which students will be required to work in the class laboratory to complete

experiments and prepare for presentations. *Prerequisite: BILD 3; BIEB 100. (W)*

BIEB 132. Introduction to Marine Biology (4)

Overview of marine organisms and their adaptations to sea life. Selected examples of physiological, behavioral, and evolutionary adaptations in response to the unique challenges of a maritime environment. *Prerequisite: BILD 3. (F)*

BIEB 134. Introduction to Biological Oceanography (4)

Basis for understanding the ecology of marine communities. The approach is process-oriented, focusing on major functional groups of organisms; their food-web interactions and community responses to environmental forcing, and contemporary issues in human and climate influences. *Prerequisite: upper-division standing; BILD 3 is recommended. (W)*

BIEB 136. Ichthyology (4)

Course will study aspects of the biology of fishes from all over the world, from the crushing pressure of the deep sea to the chilling temperatures of Antarctic waters. Students will learn about form/function that allow fishes to thrive in diverse marine environments. Students will conduct an independent field project. Field trips may be required. *Prerequisite: BILD 3 recommended.*

BIEB 140. Biodiversity (4)

An introduction to the patterns of geographic distribution and natural history of plants and animals living in terrestrial and marine ecosystems. We will explore: ecological and evolutionary processes responsible for generating and maintaining biological diversity; and the nature of extinction both in past and present ecosystem. *Prerequisite: BILD 3. (S)*

BIEB 144. Quantitative Ecology and Conservation (4)

Introduction to mathematical and statistical tools for prediction of deterministic and stochastic ecological systems, including age-structured population growth; population regulation; interspecific interaction; species diversity. Conservation biology topics include sustainable harvesting; metapopulation dynamics; extinction; case studies of endangered species. *Prerequisite: BILD 3; BIEB 100 and BIEB 102 recommended. (F)*

BIEB 150. Evolution (4)

Evolutionary processes are discussed in their genetic, historical, and ecological contexts. Microevolution, speciation, macroevolution, and the evolution of adaptations. Three hours of lecture and one hour of recitation. *Prerequisite: BILD 3; BIEB 100 and BIEB 102 recommended. (S)*

BIEB 154. Molecular Evolution (4)

This course deals with the evolution of genes and the molecules they encode. The role of mutation, selection, and drift at the molecular level are discussed. Molecular phylogenies, jumping genes, viral evolution, and searches for molecular homologies are a few of the topics covered. Three hours of lecture and one hour of discussion. *Prerequisites: BIBC 102, BICD 100, and BIMM 100 recommended. (S)*

BIEB 156. Population Genetics (4)

The first two-thirds of the course will cover the basic theory of population genetics, including selection, genetic drift, mutation, and migration. The last one-third of the course provides an introduction to quantitative genetics, including measurements of heritability and selection. The theory is illustrated throughout

with biological examples. *Prerequisite: BICD 100. BIEB 100 is recommended.* (W)

BIEB 164. Behavioral Ecology (4)

A survey of the patterns of social behavior in animals and a discussion of the ecological principles underlying the evolution of animal societies. Three hours of lecture and one hour of discussion. *Prerequisite: BILD 3 recommended.* (W)

BIEB 165. Behavioral Ecology Laboratory (6)

This course will deal with quantitative methods for the study of animal social behaviors. Topics include spatial patterns, mating systems, and cooperation. The course includes both lab exercises and field trips. Two hours of lecture and eight hours of laboratory each week. In addition to the formal lab hours, there will be at least nine hours in which students will be required to work in the class laboratory to complete experiments and prepare for presentations. *Prerequisites: BIEB 100 and BIEB 164. (BIEB 164 may be taken concurrently.)* (S)

BIEB 166. Animal Behavior and Communication (4)

An integrated approach to animal behavior focusing on mechanisms of acoustic, visual, and olfactory communication. Course covers ethology and the genetics and neurobiology of behavior; orientation and navigation; and signal origins, properties, design, and evolution. *Prerequisite: BILD 3 recommended, but not required; Physics 1A- or 2A, or equivalent recommended, but not required.* (S)

BIEB 167. Animal Communication Laboratory (6)

Laboratory exercises will introduce students to quantitative methods of visual, auditory, and olfactory signal analysis and to lab and field studies of animal signalling. Two hours of lecture and eight hours of laboratory each week. In addition to the formal lab hours, there will be at least nine hours in which students will be required to work in the class laboratory to complete experiments and prepare for presentations. *Prerequisites: BIEB 100 and BIEB 166. (BIEB 166 may be taken concurrently.)*

BIEB 170. Applied Remote Sensing (4)

Provides a working knowledge of remote sensing with emphasis on understanding the underlying concepts involved in the interaction of the electromagnetic spectrum and the natural world. May be taken only as part of the White Mountain Research "Integrated Methods in Ecology." *Prerequisites: consent of instructor; 3.0 GPA; departmental stamp.* For more information, consult <http://www.wmrs.edu>.

BIEB 171. Landscape Analysis (4)

Introduces perspectives on biological scales and levels of organization on how these concepts interrelate, and how they can be quantified and used for effective management. May be taken only as part of the White Mountain Research "Integrated Methods in Ecology." *Prerequisites: consent of instructor; 3.0 GPA; departmental stamp.* For more information, consult <http://www.wmrs.edu>.

BIEB 172. Scientific Inquiry in Ecosystem Analysis (4)

Designed to integrate remote sensing and landscape analysis with policy and management of natural resources in the western U.S. to foster student professional development. May be taken only as part of the White Mountain Research "Integrated Methods in Ecology." *Prerequisites: consent of instructor; 3.0 GPA; departmental stamp.* For more information, consult <http://www.wmrs.edu>.

BIEB 176. Conservation and the Human Predicament (4)

(Cross-listed with ANTH/BIO 132; however, biology majors must take the course as Biology 176.) An interdisciplinary discussion of the human predicament, the biodiversity crisis, and the importance of biological and environmental conservation in sustaining future societies. We explore the consequences of habitat destruction and species extinctions on the biosphere and human welfare. Three hours of lecture and one hour of discussion. *Prerequisite: upper-division standing and BILD 3 or consent of instructor.*

BIEB 178. Principles of Conservation Ecology (4)

Biodiversity will ultimately be preserved in "islands" of natural habitat. The principles of community ecology, island biogeography, and metropopulation dynamics will underlay the management decisions regarding the number, size, and locations of such reserves. Case studies are emphasized. *Prerequisite: BIEB 100.*

BIEB 179. Conservation Biology Laboratory (6)

Students will utilize, modify, and create computer software to solve conservation biology management problems. Topics included are pedigree analysis, stochastic population dynamics, community structure, and island biogeography. Two hours of lecture and eight hours of laboratory each week. In addition to the formal lab hours, there will be at least seven hours in which students will be required to work in the class laboratory to complete experiments and prepare for presentations. *Prerequisite: BIEB 178 or BIEB 180 (may be taken concurrently).*

Molecular Biology, Microbiology

BIMM 100. Molecular Biology (4)

Molecular basis of biological processes, emphasizing gene action in context of entire genome. Chromosomes and DNA metabolism: chromatin, DNA replication, repair, mutation, recombination, transposition. Transcription, protein synthesis, regulation of gene activity. Prokaryotes and eukaryotes. *Prerequisites: BIBC 100 or BIBC 102, BICD 100. (Note: Students may not receive credit for both BIMM 100 and Chem. 114C.)* (F,W,S)

BIMM 101. Recombinant DNA Techniques (4)

Theory and practice of DNA cloning. This course aims at providing practical knowledge in the field of genetic engineering. Techniques covered include construction of plasmid and phage DNA libraries, screening libraries for desired DNA clones by hybridization methods, plasmid and phage DNA preparation, and DNA sequencing. Two hours of lecture, one hour of discussion, and eight hours of laboratory. *Prerequisite: BIMM 100.* Attendance at the first lecture/lab is required. Non-attendance will result in the student's being dropped from the course roster. It is the student's responsibility to officially drop the course. *Note:* Students may not receive credit for both BIMM 101 and Chem. 112B. (F,W,S)

BIMM 103. Modern Techniques in Molecular Biology (4)

This course focuses upon a combined biochemical and molecular genetic approach to study current biological problems. Techniques include amplification of rare nucleic acids with the polymerase chain reaction, purification and characterization of a eukaryotic protein expressed in bacteria, in vitro mutagenesis of DNA. One hour of lecture and eleven hours of laboratory. *Prerequisites: BIBC 103, BIMM 100.* Attendance at the first lecture/lab is required. Non-attendance will result in the student's being dropped from the course

roster. It is the student's responsibility to officially drop the course.

BIMM 108. Chromatin Structure and Dynamics (4)

Chromatin is the natural state of DNA in the eukaryotic nucleus. Chromatin structure, nucleosome assembly, chromatin remodeling by ATP-dependent motor proteins, histone modifications and the histone code, heterochromatin, and the influence of chromatin upon DNA-directed processes in the nucleus will be discussed. *Prerequisite: BIMM 100.*

BIMM 110. Molecular Basis of Human Disease (4)

An examination of the molecular basis of human diseases. Course emphasizes inherited human disorders, and some important diseases caused by viruses. Focus on the application of genetic, biochemical, and molecular biological principles to an understanding of the diseases. Three hours of lecture. Course restricted to upper-division biology majors. *Prerequisites: BICD 100; BIBC 102; BIMM 100.* (F,S)

BIMM 112. Regulation of Gene Activity in Eucaryotic Cells (4)

This course explores problems in the regulation of gene activity in eucaryotic cells approached at the molecular level. The course includes the organization, structure, transcription, and regulation of eucaryotic genes; mechanism of hormonal regulation in controlling gene activity; induction of gene expression in eucaryotic cells; role of signal transduction in controlling gene expression; and regulation of gene activity during differentiation in developing systems. Examples are taken from eucaryotic microorganisms, invertebrates, as well as mammalian and other vertebrate systems. Three hours of lecture and one hour of discussion. *Prerequisite: BIMM 100.* (S)

BIMM 114. Virology (4)

An introduction to eucaryotic virology, with emphasis on animal virus systems. Topics discussed include the molecular structure of viruses; the multiplication strategies of the major virus families; and viral latency, persistence, and oncology. Three hours of lecture and one hour of discussion. *Prerequisite: BIMM 100.* (S)

BIMM 116. Circadian Rhythms—Biological Clocks (4)

Examples and fundamental properties of the daily biological clock in humans, animals, and microbes. Experimental approaches employed to understand how organisms keep time and how this applies to human health. *Prerequisite: BILD 1 or Psych. 106 or consent of instructor.* (F)

BIMM 118. Pharmacology (4)

Basics of pharmacology such as drug absorption, distribution, metabolism, and elimination. Concepts in toxicology and pharmacognosy are used to survey the major drug categories. *Prerequisites: BIBC 100 or BIBC 102; BIPN 100.* (S)

BIMM 120. Bacteriology (4)

A discussion of the structure, growth, molecular genetics, and physiology of prokaryotic microorganisms, with emphasis on the diverse activities of bacteria and on the interaction of various bacterial species with their environment. Three hours of lecture and one hour recitation. *Prerequisites: organic chemistry; BIBC 100 or BIBC 102 (may be taken concurrently).* (W,S)

BIMM 121. Laboratory in Microbiology (4)

This course emphasizes fundamental principles of microbiology. Studies with bacteria include comparative morphology and physiology; pure culture techniques; bacterial growth; spore germination; and

bacteriophage infection, replication, and release. Additional studies on antibiotics and the use of bioassays are included. One hour of demonstration and seven hours of laboratory. *Prerequisite: BIMM 120.* Attendance at the first lecture/lab is required. Nonattendance will result in the student's being dropped from the course roster. It is the student's responsibility to officially drop the course at the Registrar's Office. (F,W,S)

BIMM 122. Microbial Genetics (4)

Organization and function of prokaryotic genetic systems including sex factors, transduction, transformation, phage genetics, transposons, genetic engineering. Three hours of lecture. *Prerequisites: BIMM 100, BICD 100, or consent of instructor.* (W)

BIMM 124. Medical Microbiology (4)

This course covers basic principles and detailed aspects of microbial infectious diseases. Biochemical properties underlying microbial spread, host antimicrobial and inflammatory response, immunity, and recovery are emphasized. Emphasis is placed upon viral and bacterial diseases, including molecular principles of pathogenesis, of host immune responses, of drug resistance, and of viral and plasmid replication. Three hours of lecture and one hour of discussion. *Prerequisites: BIMM 100 and 120, BICD 140 is recommended.* (S)

BIMM 126. Marine Microbiology (4)

The role of microorganisms in the oceans: metabolic diversity, methods in marine microbiology, interactions of microbes with other microbes, plants and animals, biogeochemical cycling, pollution and water quality, microbe-mineral interactions, extremophiles. *Prerequisite: BIBC 102 and BIMM 120 recommended.* (W)

BIMM 127. Marine Microbiology Laboratory (4)

Techniques and theory in environmental microbiology. Students perform experiments concerning a) enrichment, enumeration, and identification and b) metabolic and physiochemical adaptations, along with an independent project. Graduate students submit an additional report and take a modified final exam. *Prerequisite: upper-division standing.* (S)

BIMM 130. Microbial Physiology (4)

Prokaryotic microbial physiology will be discussed primarily from a biochemical standpoint with emphasis on mechanism. Topics will vary from year to year but will include the following themes: Central metabolism, bioenergetics, biosynthesis, regulation, differentiation, prokaryotic structure-function relationships. *Prerequisites: BIBC 100 or BIBC 102 or equivalent.* (S)

BIMM 132. Molecular Biology of Human Retroviruses (4)

Replication cycle and gene regulation of HIV. Molecular approaches to therapy and vaccines. Three hours of lecture. *Prerequisite: BIMM 100.* (S)

BIMM 134. Biology of Cancer (4)

This course covers basic processes of transformation and tumor formation in a two-part format. The first section is focused on molecular and cellular mechanisms of carcinogenesis. The second section discusses tumor pathology and metastasis. Open to upper-division students only. *Prerequisites: BICD 110 and BIMM 100.* (S)

BIMM 140. Introduction to Bioinformatics (4)

Introduction to basic methods used in bioinformatics and computational biology. Survey of methods used

in computational analysis of DNA such as sequence assembly, sequence comparison, gene modeling, and sequence databases. Survey methods used in the computational analysis of protein sequences such as alignments, motif and pattern recognition, family classification, and protein structure prediction. Survey of organismic database methods. Emphasis is on a broad survey of current approaches with an introduction to statistical and computational techniques for analyzing, comparing, and validating methods. *Prerequisites: BIBC 100 or 102, BIMM 100, and BICD 100. (BIMM 100 may be taken concurrently.)*

BIMM 141. Bioinformatics Laboratory (4)

Laboratory course giving hands-on exposure to topics covered in BIMM 140. Survey of methods used in computational analysis of DNA such as sequence assembly, sequence comparison, gene modeling, and sequence databases. Survey of methods used in the computational analysis of protein sequences such as alignments, motif and pattern recognition, family classification, and protein structure prediction. *Prerequisites: BIBC 100 or 102, BIMM 100, BICD 100, and BIMM 140.*

BIMM 142. Advanced Bioinformatics (4)

Continuation of BIMM 140 emphasizing advanced topics in bioinformatics and computational biology. Emphasis is on computational approaches at the level needed to design and implement new approaches. Topics: computational and statistical approaches to computational biology including probabilistic models, machine learning approaches, and using federated resources to develop integrated approaches to bioinformatic problems. *Prerequisites: BIBC 100 or 102, BIMM 100, BICD 100, and BIMM 140.*

BIMM 150. Post-Genomics Biology (2)

This course will focus on large-scale analysis of post-genomics biological systems. Students will be introduced to methods for analyzing changes in gene expression, identifying protein-protein interactions, screening for pathway inhibitors, characterizing multiprotein complexes, and probing protein localization and function. *Prerequisite: consent of instructor.*

BIMM 181. Molecular Sequence Analysis (4)

This course covers the analysis of nucleic acid and protein sequences, with an emphasis on the application of algorithms to biological problems. Topics include sequence alignments, database searching, comparative genomics, and phylogenetic and clustering analysis. Pairwise alignment, multiple alignment, DNA sequencing, scoring functions, fast database search, comparative genomics, clustering, phylogenetic trees, gene finding/DNA statistics. This course open to bioinformatics majors only. *Prerequisites: CSE 100 or Math. 176, CSE 101 or Math. 188, BIMM 100 or Chem. 114C.*

BIMM 182. Biological Databases (4)

This course provides an introduction to the features of biological data, how that data are organized efficiently in databases, and how existing data resources can be utilized to solve a variety of biological problems. Relational databases, object oriented databases, ontologies, data modeling and description, survey of current biological database with respect to above, implementation of database focused on a biological topic. This course open to bioinformatics majors only. *Prerequisite: CSE 100 or Math 176.*

BIMM 184. Computational Molecular Biology (4)

This advanced course covers the application of machine learning and modeling techniques to biological systems. Topics include gene structure, recognition

of DNA and protein sequence patterns, classification, and protein structure prediction. Pattern discovery, hidden Markov models/support vector machines/neural network/profiles, protein structure prediction, functional characterization or proteins, functional genomics/proteomics, metabolic pathways/gene networks. This course open to bioinformatics majors only. *Prerequisite: BIMM 181 or BENG 181 or CSE 181, BIMM 182 or BENG 182 or CSE 182 or Chem. 182. Bioinformatics majors only.*

BIMM 185. Bioinformatics Laboratory (Advanced) (4)

This course emphasizes the hands-on application of bioinformatics methods to biological problems. Students will gain experience in the application of existing software, as well as in combining approaches to answer specific biological questions. Sequence alignment, fast database search, profiles and motifs, comparative genomics, gene finding, phylogenetic trees, protein structure, functional characterization of proteins, expression analysis, computational proteomics. This course open to bioinformatics majors only. *Prerequisite: two courses out of: BIMM 181 or BENG 181 or CSE 181, BIMM 182 or BENG 182 or CSE 182, BENG 183, BIMM 184 or BENG 184 or CSE 184.*

Animal Physiology and Neuroscience

BIPN 100. Mammalian Physiology I (4)

This course introduces the concepts of physiological regulation, controlled and integrated by the nervous and endocrine systems. It then examines the muscular, cardiovascular, and renal systems in detail and considers their control through the interaction of nervous activity and hormones. Three hours of lecture and one hour of discussion. *Prerequisites: BILD 1; BILD 2.* (F,W,S)

BIPN 102. Mammalian Physiology II (4)

This course completes a survey of organ systems begun in BIPN 100 by considering the respiratory and gastrointestinal systems. Consideration is given to interactions of these systems in weight and temperature regulation, exercise physiology, stress, and pregnancy and reproduction. Three hours of lecture and one hour of section per week. *Prerequisite: BIBC 102; BIPN 100.* (F,W,S)

BIPN 105. Animal Physiology Lab (6)

Experiments are performed on membrane physiology; nerve muscle function; cardiovascular physiology; respiratory, gastrointestinal and renal physiology. Subjects include experimental animals and humans. *Prerequisite: BIPN 100 (may be taken concurrently).* Three hours of lecture and ten hours of laboratory each week. In addition to the formal lab hours, there will be at least eight hours in which students will be required to work in the class laboratory to complete experiments and prepare for presentations. Attendance at the first lecture/lab is required. Non-attendance will result in the student's being dropped from the course roster. It is the student's responsibility to officially drop the course. (F,W,S)

BIPN 106. Comparative Physiology (4)

This course examines the physiological adaptation of animals, invertebrates and vertebrates, to their particular environmental and behavioral niches. Structural, functional, and molecular adaptations of the basic organ systems are discussed. *Prerequisites: BILD 2, Chem. 6A-B-C or Chem. 7A-B-C. BILD 3 is recommended.* (W)

BIPN 108. Integrative Biology of Exercise (4)

Course will integrate the organ system biology learned in Mammalian Physiology I and II through the

study of the human body's response to exercise. Specifically, the multi-organ system reaction to both acute and chronic exercise will be studied from the functional to the basic mechanistic level. Thus, the role of exercise in both health and disease will be addressed. *Prerequisites:* BIPN 100; BIPN 102.

BIPN 140. Cellular Neurobiology (4)

This course covers the biophysics of the resting and active membranes of nerve cells. It also covers the mechanisms of sensory transduction and neuromodulation, as well as the molecular basis of nerve cell function. *Prerequisites:* BILD 1, 2; BIBC 100 or 102 recommended. (F,W)

BIPN 142. Systems Neurobiology (4)

This course covers integrated networks of nerve cells, including simple circuits like those involved in spinal reflexes. We will study how information and motor output is integrated and processed in the brain. We will also discuss higher-level neural processing. *Prerequisites:* BILD 1, 2, and BIBC 100 or 102. (W)

BIPN 144. Developmental Neurobiology (4)

Cellular and molecular basis of cell determination, neurite outgrowth, specificity, synaptogenesis, and cell death in the brain. *Prerequisites:* BILD 1, 2, and BIBC 100 or 102, BICD 100, BIPN 142 recommended. (S)

BIPN 145. Neurobiology Laboratory (6)

Basic principles of nerve and muscle physiology will be taught through weekly exercises and individual projects. One hour of lecture and nine hours of laboratory each week. *Prerequisite:* BIPN 140 or BIPN 142 or BIPN 146 (may be taken concurrently).

BIPN 146. Computational Neurobiology (4)

An exploration of computational brain models, including biophysical models of single neurons, small neural circuits, and larger scale network models. *Prerequisite:* BILD 12 or BIPN 140 or Psych. 106 or Cog. Sci. 107 recommended. (S)

BIPN 148. Cellular Basis of Learning and Memory (4)

Cellular and molecular mechanisms that underlie learning and memory. Synapse formation and synaptic plasticity, neurotransmitter systems and their receptors, mechanisms of synaptic modification, and effect of experience on neuronal connectivity, and gene expression. *Prerequisites:* BILD 1; BILD 2; BIBC 100 or BIBC 102 (may be taken concurrently). (S)

Special Courses

BISP 190. Advanced Biology Seminars for Seniors (2)

Experts in diverse areas of biology from major universities in the U.S. and abroad will describe current research activities being conducted in their laboratories. Relevant readings will be assigned. P/NP grades only. *Prerequisites:* seniors only; concurrent enrollment in BISP 199 or consent of instructor. (F,W,S)

BISP 194. Advanced Topics in Modern Biology (2)

Course will vary in title and content. When offered, the current description and title are found in the *Schedule of Classes* and the Biological Sciences Web site. Can be taken a total of four times as topics vary. Students may not receive credit for the same topic. *Prerequisites:* BIBC 102; BICD 100; upper-division standing. (F,W,S)

BISP 195. Introduction to Teaching in Biology (4)

Introduction to the teaching of the basic course in biology. A student under the direction of the instructor of the course is assigned one class section and will meet one time per week with the section. A student is

required to attend the course lecture and meet with the instructor of the course at least one time per week. Limited to upper-division students who have a B average or higher. Three hours' lecture. (P/NP grades only.) *Prerequisites:* consent of instructor and approval of department chair. (Note: Applications for a BISP 195 are to be submitted to the Division of Biological Sciences by the end of the sixth week of the quarter preceding the quarter in which the BISP 195 will be completed.) (F,W,S) This course may be counted as one of the upper-division electives for a biology major. (F,W,S)

BISP 196. Honors Thesis in Biology (4)

Senior thesis research program. Research is conducted under the supervision of a biology faculty member. This one-year program is taken in addition to the major requirements for graduation. Upon satisfactory completion of the program, students will receive "Distinction in Biology" on their transcripts. *Prerequisites:* senior standing, 3.7 GPA or above; prior selection for the program by a faculty member and approval by program coordinator. A department stamp will be used to monitor during registration. (F,W,S)

BISP 197. Biology Internship Program (4)

Under the joint supervision of a biology faculty adviser and a selected industry mentor, the student will conduct independent research on a problem in an industrial biotech laboratory. The student will gain insight into industry research and practical biotech experience. *Prerequisites:* BIBC 103 or BIBM 101, BIBC 102, BICD 100, BIBM 100, overall GPA 3.0, and consent of the biology faculty coordinator. (W,S)

BISP 199. Individual Research for Undergraduates (2 or 4)

Individual research on a problem by special arrangement with a faculty member. Projects are expected to involve primary, experimental approaches that augment training in basic biology and that echo the curricular focus of the Division of Biological Sciences. (P/NP grades only.) *Prerequisites:* Students must have an overall UCSD GPA of at least 3.0, a minimum of ninety units complete, and approval by division chair. Students must complete a "Special Studies" form and a Division of Biological Sciences "Research Plan." (Note: Applications for a BISP 199 must be submitted to the Division of Biological Sciences prior to the eighth week of the quarter preceding the quarter in which the BISP 199 will be completed.) This course may be counted as one of the upper-division electives for a biology major, providing that no other special studies courses have already been counted toward the major.

GRADUATE

BGGN 204. Topics in Community and Population Ecology (3)

This course teaches a different topic each quarter on the theoretical or conceptual side of community and population ecology. Students will read materials in depth, attend weekly discussions, and explore theories and models with statistical, analytical, and algorithmic tools of the trade. *Prerequisite:* graduate standing or consent of instructor. (S/U grades only) (Quarter offered varies and course is not offered every year.)

BGGN 206. Topics in Biophysics and Physical Biochemistry (4)

Selection of topics of current interest. Examples: primary processes of photosynthesis; membrane biophysics; applications of physical methods to problems

in biology and chemistry, e.g., magnetic resonance, X-ray diffraction, fluctuation spectroscopy, optical techniques (fluorescence, optical rotary dispersion, circular dichroism). Topics may vary from year to year. *Prerequisite:* consent of instructor. (S/U grades permitted.) This course is cross-listed with Physics 206 and Chemistry 206. (Quarter offered varies, and course is not offered every year.)

BGGN 212. Special Topics in Microbiology (3)

Recent developments in prokaryotic and eukaryotic microbial research. Topics vary from year to year but may include the following subjects: the molecular basis of (a) sex determination, expression, and interconversion; (b) differentiation, morphogenesis, and programmed death; (c) transcriptional and metabolic regulation; and (d) chemical macromolecular and energy-mediated reception, transmission, and response processes. The main thesis of the course is that examples of complex regulatory phenomena in higher organisms can be found in single celled organisms. This course is open to enrollment by undergraduates. *Prerequisites:* BIBC 102 and BICD 100. (S/U grades permitted.) (Quarter offered varies, and course is not offered every year.)

BGGN 213. Topics in Conservation Biology (3)

Provides in depth coverage of topics in population genetics and ecology, community ecology, biogeography, human ecology, and ecosystem management relevant to conservation biology. Topics vary from year to year and have included pedigree analysis, inbreeding depression, minimum viable population size, problems of overabundance, fragmented populations, key-stone species, in-situ and ex-situ conservation techniques. One two-hour meeting weekly. *Prerequisite:* graduate standing or consent of instructor. (S/U/ grades only.) (S)

BGGN 215. Phylogenetics (3)

This course provides the theoretical and practical basis of phylogenetic analysis (the estimation of phylogenetic trees). Students will understand the assumptions made in phylogenetic analysis, be able to identify the strengths and weaknesses of various methods, and perform a phylogenetic analysis on DNA sequence data. *Prerequisite:* one semester of calculus is recommended. (S)

BGGN 218. Post-Genomics Biology (2)

This course will focus on large-scale analysis of post-genomics biological systems. Students will be introduced to methods for analyzing changes in gene expression, identifying protein-protein interactions, screening for pathway inhibitors, characterizing multi-protein complexes, and probing protein localization and function.

BGGN 219. Classic Papers in Genetics (3)

The course explores, through classic papers, how genetic approaches in the distant and near past have opened up novel areas of biology. The goal of the course is to teach students the type of approach that allowed these researchers to break out of old paradigms and form new ones of their own based on genetic pathfinding. (W)

BGGN 220. Graduate Molecular Biology (6)

Provides a broad, advanced-level coverage of modern molecular biology for first-year graduate students. Topics include prokaryotic and eukaryotic gene structure and regulation, chromatin structure, DNA replication, translation, mechanisms of transcription, and an introduction to viruses. OPEN ONLY TO STUDENTS ENROLLED IN A GRADUATE DEGREE PROGRAM. (Letter grades only.) (F)

BGGN 221. Graduate Protein Biochemistry (4)

Topics include general aspects of protein structure and biochemical approaches to the isolation and study of proteins. This course also covers the relationship between the structure and function of selected proteins. Detailed discussion of modern biophysical methods to study protein-protein interactions will be included. *BGGN 220 is a co-requisite.* OPEN ONLY TO STUDENTS ENROLLED IN A GRADUATE DEGREE PROGRAM. (Letter grades only.) *Corequisite: BGGN 220.* (F)

BGGN 222. Graduate Cell Biology (6)

A coverage of modern cell biology for first year graduate students. There is an up-to-date discussion of topics such as: structure and function of membranes; ion pumps, ion channels, transmembrane signalling; receptor mediated endocytosis; protein targeting; the role of RER and Golgi apparatus; the biosynthesis of intracellular organelles in animal and plant cells; the cytoskeleton, motility, molecular motors, cell-cell interactions, mitosis; and the control of cell division. Also included are extensive coverage of cell signalling mechanisms and discussions on molecular approaches to cell biology. *Prerequisites: BGGN 220 and 221.* OPEN ONLY TO STUDENTS ENROLLED IN A GRADUATE DEGREE PROGRAM. (Letter grades only.) (W)

BGGN 223. Graduate Genetics (6)

Provides a broad and extensive advanced-level coverage of molecular and formal aspects of genetics for first-year graduate students. Topics covered include: bacterial genetics, recombination in prokaryotes and eukaryotes, mammalian somatic-cell genetics, developmental genetics, sex determination, dosage compensation, and immunogenetics. Extensive coverage of the use of model systems like *Drosophila* and *C. elegans* is included. General and specific aspects of cellular signalling mechanisms will be covered. *Prerequisites: BGGN 220, 221 and 222.* OPEN ONLY TO STUDENTS ENROLLED IN A GRADUATE DEGREE PROGRAM. (Letter grades only.) (S)

BGGN 224. Graduate Neurobiology (4)

Course covers modern molecular, cellular, developmental, and physiological aspects of neurobiology. Extensive discussion of original research articles will be included. *Prerequisites: BGGN 220 and 221.* OPEN ONLY TO STUDENTS ENROLLED IN A GRADUATE DEGREE PROGRAM. (Letter grades only.) (F)

BGGN 225. Graduate Immunology (4)

The course is devoted to immunology and is organized as a combined lecture-tutorial course stressing classical as well as current literature. Each week will compose an independent section. Topics will include cellular interactions involved in the immune response and the molecular biology unique to lymphoid factor and receptors. *Prerequisites: BGGN 220 and 221.* OPEN ONLY TO STUDENTS ENROLLED IN A GRADUATE DEGREE PROGRAM. (Letter grades only.) (S)

BGGN 226. Graduate Animal Virology (4)

This course consists of a review of fundamental concepts together with an in-depth analysis of the structure, genetics, multiplication and oncogenicity of animal viruses. Particular emphasis will be given to the DNA and RNA tumor viruses. The format of this section includes lectures and discussion of selected papers. *Prerequisites: BGGN 220 and 221.* OPEN ONLY TO STUDENTS ENROLLED IN A GRADUATE DEGREE PROGRAM. (Letter grades only.) (W)

BGGN 227. Graduate Topics in Plant Biology (4)

This course covers advanced topics in plant biology in the areas of molecular genetic developmental, and

physiological biology. We will discuss plant-microbe interactions, transposable elements, protein trafficking, ion transport, and organ development. The format of this section includes lectures and discussion of selected papers. *Prerequisites: BGGN 220, 221, and 222.* OPEN ONLY TO STUDENTS ENROLLED IN A GRADUATE DEGREE PROGRAM. (Letter grades only.) (W)

BGGN 228. Graduate Developmental Biology (4)

This course covers graduate level lectures on developmental biology, emphasizing the use of genetically tractable model systems. Discussion of recent research articles is an integral aspect of this course. Students are introduced to classical experiments and given detailed coverage of recent fundamental findings in developmental biology. *Prerequisites: BGGN 220 and 221.* (Letter grades only.) (S)

BGGN 229. Graduate Oncogenes (4)

This course provides detailed coverage of the cellular and molecular basis of cellular transformation and oncogenesis. There will be extensive discussion on the role of oncogenes and their cellular counterparts. The course also provides in-depth analysis of intracellular signal transduction mechanisms. *Prerequisites: BGGN 220, 221, and 222.* (Letter grades only.) (S)

BGGN 230. Graduate Signal Transduction (4)

The course will introduce students to a variety of signal transduction pathways and their function in the regulation of cellular processes. Special emphasis will be given to signaling cascades regulating immunological responses and alterations of signaling pathways during oncogenesis. (W)

BGGN 233. Cellular Immunology (3)

This course covers the molecular and cellular events in the humoral and cellular response to antigen, transplantation biology, the structure and function of the major histocompatibility gene complex, the T-cell receptor, lymphokines, and the induction of immunological tolerance. It serves as the second course in a two-part sequence. May be taken by undergraduates who have taken Part 1 (BICD 140) and by graduate students (S/U grades only.) (Quarter offered varies and course is not offered every year.)

BGGN 235. Biology and Biochemistry of Cancer Cells (2)

This course covers recent advances in cell biology, biochemistry, immunology, and virology as they relate to cancer cells and their interaction with the host. Cancer research specialists from outside will be brought in to discuss the most recent evidence and interpretations in key areas of cancer research. This course meets two hours per week for lecture and discussion. It will be at an advanced graduate level but open to a limited number of seniors (with permission of instructor) on a P/NP basis. (S/U grades only) (Quarter offered varies, and course is not offered every year.)

BGGN 236. Essentials of Glycobiology (2)

Molecular glycobiology encompasses studies of the structure, biosynthesis, and biological roles of oligosaccharide units on glycoconjugates. This course provides an overview of this rapidly evolving field with an emphasis on the glycoconjugates of eukaryotic organisms in the animal kingdom. (S/U grades only.) (S) This course is cross-listed with Medicine 222.

BGGN 238A. Integrative Microbiology I (4)

To introduce students with structural and functional properties of microorganisms and with the role of microbes in the world. Course will emphasize the integrative aspects of microbiology. First course in series. *Prerequisite: graduate standing.*

BGGN 238B. Integrative Microbiology II (4)

To introduce students with structural and functional properties of microorganisms and with the role of microbes in the world. Course will emphasize the integrative aspects of microbiology. Second course in series. *Prerequisite: graduate standing.*

BGGN 240. Cellular Neurobiology (2)

Students read classic and modern papers that form the basis of the undergraduate lectures (BIPN 240), which they are encouraged to attend. These papers are presented by the students at weekly discussion sessions. *Prerequisite: consent of instructor.* (S/U grades only.) (F)

BGGN 242. Systems Neurobiology (2)

Students read classic and modern papers that form the basis of the undergraduate lectures (BIPN 142), which they are encouraged to attend. These papers are presented by the students at weekly discussion sessions. *Prerequisite: consent of instructor.* (S/U grades only.) (W)

BGGN 243. Systems Neurophysiology (3)

Ways in which neurons are assembled into circuits to achieve perception and patterned movement. *Prerequisites: graduate standing or consent of instructor.* (S/U grades only.)

BGGN 244. Molecular/Developmental Neurobiology (2)

Students read classic and modern papers that form the basis of the undergraduate lectures (BIPN 144), which they are encouraged to attend. These papers are presented by the students at weekly discussion sessions. *Prerequisite: consent of instructor.* (S/U grades only.) (S)

BGGN 246 A-B. Computational Neurobiology (2-2)

Students read classic and modern papers that form the basis of the undergraduate lectures (BIPN 146), which they are encouraged to attend. Students present these papers at weekly discussion sessions. The focus of 246A is cellular neuronal properties and the focus of 246B is properties of neuronal systems. *Prerequisites: graduate student or consent of instructor.* (S/U grades only.)

BGGN 247. Development of Neural Systems (4)

Course emphasizes current molecular and physiological approaches used to study the development of neural circuits including the processes of neuronal migration, axon pathfinding, and synapse and circuit formation in different systems. Topics include development of the visual system, olfactory system, spinal cord and cerebellum. *Prerequisite: graduate standing or consent of instructor.* (S/U grades only.)

BGGN 248. Molecular Mechanisms of Neural Development (4)

The cellular and molecular basis of neural development, focusing on primary papers. Topics include: neural induction and neurogenesis, cell patterning, neuronal and glial differentiation, neuronal migration, axon pathfinding, synapogenesis, neuronal cell death, regeneration, activity-dependent events, topographic maps, invertebrate and vertebrate model systems. *Prerequisite: graduate standing or consent of instructor.*

BGGN 249B-C. Basic Neuroscience (4-4)

These courses are designed for graduate students in the neurosciences and other departments that are part of the interdisciplinary program (i.e., Biology, Cog. Sci.). These courses have been designed to cover as much basic neuroscience as possible in three quarters

of study. They will combine two three-hour meetings each week with a 1.5 hour lecture and a 1.5 hour discussion of papers. These are required courses for all first-year neurosciences graduate students. *Prerequisite: graduate student or consent of instructor.* (F,W,S)

BGGN 251. Molecular Biology (3)

The first section of this course consists of a review of fundamental concepts in molecular biology together with an in-depth analysis of molecular biological topics of medical importance. The second section covers the structure, genetics, and multiplication of animal viruses, with particular emphasis on the DNA and RNA tumor viruses. Other subjects discussed include viral persistence, latency, and approaches to viral chemo-therapy. Three hours of lecture. *Prerequisite: biochemistry.* (Not open to undergraduates.) (S/U grades only) (F)

BGGN 252. Genetics (3)

Human genetics, with emphasis on basic principles. Topics covered include chromosome abnormalities, the mechanisms of dominant and recessive diseases, pedigree analysis, ascertainment of linkage, the interaction of genotype with diseases. Mechanisms of maintaining genetic diversity in human populations will be discussed along with recent approaches to genetic counseling and intervention. *Prerequisite: consent of instructor.* (Not open to undergraduates.) (S/U grades only) (F)

BGGN 253. Immunology (3)

Graduate students will explore topics in specialized areas of immunochemistry and cellular immunology, antigenic and molecular structure of immunoglobulin molecules; antigen-antibody interactions; cellular events in the humoral and cellular immune responses; translation immunology. *Prerequisite: consent of instructor.* The course is similar in content to BICD 140 but is accelerated in pace. (S/U grades permitted.) This course is cross-listed with Chemistry 217.(F)

BGGN 254. Cell and Membrane Physiology (3)

This course is a survey covering current subjects in membrane biology relevant to medicine. Subjects are: 1) membrane isolation, composition, and structure; 2) consequences of membrane fluidity (mode of action of anesthetics, intercellular communication, endo- and exo-cytosis biogenesis); 3) sensory perception and response (chemo- and energy reception, cellular neurophysiology, muscle; physiology); 4) regulation of membrane function (hormone reception, intercellular adhesion, neoplastic transformation). *Prerequisites: biochemistry and genetics.* (S/U grades only)

BGGN 260. Neurodynamics (4)

Introduction to the nonlinear dynamics of neurons and simple neural systems through nonlinear dynamics, bifurcation theory, and chaotic motions. The dynamics of single cells is considered at different levels of abstraction, e.g., biophysical and "reduced" models for analysis of regularly spiking and bursting cells, their dynamical properties, and their representation in phase space. Laboratory exercises will accompany the lectures. *Prerequisites: graduate student or consent of instructor.*

BGGN 266. Advanced Laboratory in Biophysical Techniques (6)

Experiments that emphasize biophysical principles through hands-on experience, with an emphasis on the blending of physical measurements with a clearly identified biological problem. Exercises include the use of optical tweezers to measure viscous forces at the level of cellular organelles, the characterization of

sensorimotor control in the fly during visually guided flight, and the use of microscopic imaging techniques to characterize cell motility and organelle transport. Includes instruction in LabView. Students are encouraged to attend the Phys. 173 undergraduate lectures. *Prerequisites: graduate student or consent of instructor. Phys. 120A, BILD 1, and Chem. 6CL for undergraduates.*

BGGN 269. Mathematics for Neurobiologists (6)

An intensive course to introduce the mathematical concepts and techniques used in modern neurobiology. Intended for beginning graduate students in the neurosciences, but is also available to advanced undergraduates, with the consent of the instructor. *Prerequisites: graduate student or consent of instructor.*

BGGN 271. Advanced Experimental Methods in Biology (4-12)

Advanced laboratory and/or field experience in contemporary biological methodology. Open only to students enrolled in the integrated Bachelor's/Master's Degree Program. *Prerequisites: consent of instructor and approval of division chair.* (F,W,S) (Graduate students: letter grades only.)

BGGN 297. Research Conference (1-3)

Group and individual discussion of research activities and of current literature. *Prerequisite: graduate standing.* (S/U grades only.) (F,W,S)

BGGN 298. Laboratory Projects in Biology (3-12)

An introduction to contemporary laboratory techniques and research interests through independent, original projects under the direction of individual faculty members. *Prerequisite: consent of instructor.* (Letter grades only) (F,W,S)

BGGN 299. Thesis Research in Biology (1-12)
(F,W,S)

BGGN 500. Apprentice Teaching (4)

This course involves participation in upper-division undergraduate teaching at the level of assuming responsibility for recitation sections or laboratories under the supervision of the responsible faculty member. Some experience in lecturing to upper-division classes will occasionally be provided. (S/U grades only.) (F,W,S)

BGJC 201. Journal Club in Cell Biology (1)

Weekly presentations and discussions pertaining to research results reported in recently published literature. *Prerequisites: none for graduate students. Undergraduates must be seniors or enrolled in BISP 199.* (S/U grades only.) (F,W,S)

BGJC 202. Journal Club in Developmental Biology (1)

Weekly presentations and discussions pertaining to research results reported in recently published literature. *Prerequisites: none for graduate students. Undergraduates must be seniors or enrolled in BISP 199.* (S/U grades only.) (Quarter offered varies, and course is not offered every year.)

BGJC 203. Journal Club in HIV Molecular Biology (1)

Weekly presentations and discussions pertaining to research results reported in recently published literature. *Prerequisites: none for graduate students. Undergraduates must be seniors or enrolled in BISP 199.* (S/U grades only.) (F,W,S)

BGJC 204. Journal Club in Molecular and Cellular Immunology (1)

Weekly presentations and discussions pertaining to research results reported in recently published literature. *Prerequisites: none for graduate students. Undergraduates must be seniors or enrolled in BISP 199.* (S/U grades only.) (F,W,S)

BGJC 206. Journal Club in Microbial Physiology (1)

Weekly presentations and discussions pertaining to research results reported in recently published literature. *Prerequisites: none for graduate students. Undergraduates must be seniors or enrolled in BISP 199.* (S/U grades only.) (S)

BGJC 208. Journal Club in Plant Molecular Biology (1)

Weekly presentations and discussions pertaining to research results reported in recently published literature. *Prerequisites: none for graduate students. Undergraduates must be seniors or enrolled in BISP 199.* (S/U grades only.) (F,W,S)

BGJC 209. Journal Club in Molecular and Cellular Regulation in Biology (1)

Weekly presentations and discussions pertaining to research results reported in recently published literature. *Prerequisites: none for graduate students. Undergraduates must be seniors or enrolled in BISP 199.* (S/U grades only.) (F,W,S)

BGJC 210. Journal Club in Cell Cycle Regulation (1)

Weekly presentations and discussions pertaining to research results reported in recently published literature. *Prerequisites: none for graduate students. Undergraduates must be seniors or enrolled in BISP 199.* (S/U grades only.) (F,W,S)

BGJC 212. Journal Club in Genetics (1)

Weekly presentations and discussions pertaining to research results reported in recently published literature. *Prerequisites: none for graduate students. Undergraduates must be seniors or enrolled in BISP 199.* (S/U grades only.) (F,W,S)

BGJC 213. Journal Club in Computational Neurobiology (1)

Weekly presentations and discussions pertaining to research results reported in recently published literature. *Prerequisites: none for graduate students. Undergraduates must be seniors or enrolled in BISP 199.* (S/U grades only.)

BGRD 203. Research Discussion in Development of Dictyostelium (1)

Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. *Prerequisites: none for graduate students. Undergraduates must be seniors or enrolled in BISP 199.* (S/U grades only.)

BGRD 204. Molecular Biology of the Cell (1)

Research reports and discussions based on recent experimental results in cell biology, oncogenesis, genetics, molecular biology and development. Students are expected to present and discuss their own new data and the recent data of others. *Prerequisites: none for graduate students. Undergraduates must be seniors or enrolled in BISP 199.* (S/U grades only.)

BGRD 205. Research Discussion in Plant Membrane Biology (1)

Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. *Prerequisites: none for graduate students.*

BGRD 234. Research Discussion in Cell Signalling in *Drosophila* (3)

Presentation of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. *Prerequisites: none for graduate students. Undergraduates must be seniors or enrolled in BISP 199. (S/U grades only.)*

BGSE 200. Seminar in Biology (1)

Invited speakers from the U.S. and abroad, who are leaders in various aspects of biological research, describe their current research. *Prerequisites: none for graduate students. Undergraduates must be seniors or enrolled in BISP 199. (S/U grades only.) (F,W,S)*

BGSE 201. Seminar in Molecular Biology (1)

Invited speakers from the U.S. and abroad, who are leaders in various aspects of biological research, describe their current research. *Prerequisites: none for graduate students. Undergraduates must be seniors or enrolled in BISP 199. (S/U grades only.) (F,W,S)*

BGSE 202. Seminar in Immunology (1)

Invited speakers from the U.S. and abroad, who are leaders in various aspects of biological research, describe their current research. *Prerequisites: none for graduate students. Undergraduates must be seniors or enrolled in BISP 199. (S/U grades only.) (F,W,S)*

BGSE 203. Seminar in Population Biology (1)

Invited speakers from the U.S. and abroad, who are leaders in various aspects of biological research, describe their current research. *Prerequisites: none for graduate students. Undergraduates must be seniors or enrolled in BISP 199. (S/U grades only.)*

BGSE 204. Seminar in Developmental Genetics (1)

Invited speakers from the U.S. and abroad, who are leaders in various aspects of biological research, describe their current research. *Prerequisites: none for graduate students. Undergraduates must be seniors or enrolled in BISP 199. (S/U grades only.) (F,W,S)*

BGSE 205. Graduate Research Seminar (1)

Discussions of recent research in various aspects of biological research conducted by third- and fourth-year doctoral students in the Division of Biological Sciences. *(S/U grades only.) (F,W,S)*

The Graduate Program

The graduate program offered by the Group in Biomedical Sciences is designed to lead to the Ph.D. degree through a combination of didactic study, laboratory rotations, and thesis research in basic biomedical sciences. Research experiences are wide and varied, permitting students the options of selecting molecular, cellular, or organ and integrated systems approaches in their research programs. Students are encouraged to design and execute investigation in a self-critical and independent manner. Undergraduate preparation must include courses in mathematics

(through calculus), chemistry (including organic, physical, and biochemistry), and if possible, participation in undergraduate research. Students whose undergraduate backgrounds are significantly different will be considered provided there is sufficient evidence of interest in cell and molecular biology, physiology, pharmacology, or eukaryotic regulatory biology, and a desire to enter a field of active research and academic excellence.

Doctoral Degree Program

During the first year, the students take basic courses in cell biology, molecular biology, pharmacology, physiology, genetics, and microbiology/immunology. In a required laboratory rotation program, students develop laboratory skills and the ability to formulate scientific hypotheses and become familiar with the research activities of the faculty. Students may differentiate into one of five advanced training tracks: genetics, microbiology/immunology, molecular cell biology, molecular pharmacology, or physiology. Required advanced courses and electives in subsequent years are chosen to develop the students' interest and specialized knowledge in the thesis research area and chosen training tracks. The thesis laboratory is usually selected by the end of the first year of graduate study.

The graduate program is interdepartmental and interdisciplinary; it involves faculty of the Departments of Medicine, Pharmacology, Neurosciences, Reproductive Medicine, Chemistry, Pathology, Bioengineering, Cellular and Molecular Medicine, Psychiatry, Orthopedics, Anesthesiology, and the Cancer Center. Pharmacologic studies of drug action at the molecular and biochemical levels include studies of receptor structure and function, genetic and recombinant DNA methods to analyze ligand-receptor interactions, regulation of gene expression and signal transduction, and biophysical approaches to defining neurotransmitter and hormone action. Molecular and cell biological approaches are being applied to the study of major issues in cell biology, including the regulation of protein targeting and intracellular membrane traffic, hormone and growth factor receptors, endothelial cell biology, molecular motors, RNA splicing, and mitosis, among others. Physiological studies include molecular to whole animal approaches to cardiovascular, microcirculatory, respiratory, renal, gastrointestinal and fetal

physiology and their neural and hormonal control. Genetic and genomic studies include experimental and statistical approaches to existing variations in both human and model organism populations as well as mutagenesis, gene targeting, gene silencing, gene profiling, and gene therapy approaches to manipulating genomes. Studies in microbiology and immunology are focused on the fundamental basis of innate and adaptive immunity, elucidation of inflammatory response pathways, and understanding those virulence mechanisms of pathogenic bacteria, viruses, and parasites that can subvert host and contribute to infectious disease pathogenesis. Faculty within the program are the directors of four specialized centers of research at the university focusing on cancer, myocardial ischemia, hypertension, and atherosclerosis. Other faculty are directors of training grants for programs in pulmonary physiology, oncogenes, cardiovascular physiology, cellular and molecular pharmacology, hypertension, metabolic diseases, cell and molecular biology, genetics, digestive diseases, and cancer cell biology.

The graduate program in biomedical sciences is also designed to educate physician-scientists through the School of Medicine's Medical Scientist Training Program. Students already admitted to the School of Medicine are eligible for admission to our program for Ph.D. training. Such students generally apply in the first or second year of their medical studies and enter graduate studies following completion of their second year of medical school. Normative time for M.D./Ph.D. students is seven years.

Examinations

Students obtain letter grades in the program's basic courses. Candidacy for the Ph.D. degree is determined by a two-part examination. The first part, the minor proposition examination, tests the student's competence and ability to design the approach to a pertinent research problem in an area unrelated to his or her major interest. The second part, the major proposition examination, deals with the dissertation problem and should be completed during the third year of residence in the program. After the preparation of the dissertation, an oral defense of the thesis completes the requirement for the Ph.D. degree.

COURSES

For course descriptions not found in the 2006–2007 General Catalog, please contact the department for more information.

200A. Molecules to Organisms: Concepts (6)

This course provides a systematic approach to current biomedical research, using analysis of selected topics to focus on the process of research discovery and its critical evaluation. The course progresses through five thematic modules that cover genes, building a cell, cellular responses, organogenesis, and the processes that allow survival in the world. *Prerequisite: limited to BMS graduate students except by consent of instructor.*

200B. Molecules to Organisms: Approaches (2)

Students will critically evaluate classic and current research papers in biomedical research, in addition to being exposed to state-of-the-art technologies in research. *Prerequisite: limited to BMS graduate students except by consent of instructor.*

201. Seminars in Biomedical Research (4)

This course includes attendance at seminars in the biomedical sciences and is designed to provoke critical discussion of the presented findings and scientific approaches in a small-group setting. *Prerequisite: limited to BMS graduate students except by consent of instructor.*

202. Carcinogenesis and Drug Metabolism (3)

This elective will explore relationships between drug metabolism and carcinogenesis at cellular, molecular and etiological levels. Guided by faculty, students will research and present key papers and principles underlying the biochemistry, genetics, biophysics, and computer-assisted aspects of several assigned topics. *Prerequisites: biology and chemistry. Cell biology, biochemistry, and molecular biology may be taken concurrently.*

204. Evolution of Modern Concepts in Pharmacology (2)

This course details the evolution of modern principles of pharmacology from first evidences to the present level of knowledge. The course will be independent of but compliment general principles of pharmacology courses for medical and graduate students. *Prerequisite: prior or concurrent Principles of Pharmacology, or equivalent course.*

207. Using Internet Resources in Molecular Biology (2)

Increasing the Internet is a source both of data and analysis tools in molecular biology. A hands-on series of instructional lectures is proposed that uses these resources to work through problems found in many molecular biology research situations. Topics include: DNA and protein sequence analysis, genome analysis, constructing and using phylogenetic trees, RNA structure prediction, protein structure analysis, classification and prediction. *Prerequisite: consent of instructor.*

219. Ethics in Scientific Research (1)

Overview of ethical issues in scientific research, conflicts of interest; national, statewide and campus issues and requirement; ethical issues in publications; authorship; retention of research records; tracing of research records; attribution; plagiarism; copyright considerations; primary, archival and meeting summary publications; ethical procedures and policies;

NIH, NSF, California and UCSD; case studies and precedents in ethics. *Prerequisite: consent of instructor.*

222. Essentials of Glycobiology (2)

Advanced elective for graduate/medical students who have had core courses in cell biology or biochemistry. Expert faculty will present a coordinated overview of the field of glycobiology, which explores the structure, synthesis and functions of sugar chains in biological systems.

223. Genetics, Metabolism, and Inherited Disease (2)

Detailed discussions of the molecular aspects of certain inborn errors of intermediary metabolism selected to illustrate principles of biochemical genetics applicable to a wider variety of clinically important genetic diseases. Individual sessions will include faculty presentations followed by student-led discussions of the particular principles illustrated by the disorders reviewed. (S)

224. Topics in Cancer Research (2)

Each quarter will focus on an important area of cancer research such as immunology (fall), growth regulation (winter), and cancer genetics (spring). One-hour lecture coordinated with a one-hour seminar with the opportunity to meet with the invited speaker. *Prerequisites: limited to senior undergraduates, graduate students, and medical students. (W,S)*

229. Methods in Pharmacology (3)

A combination of lecture and lab exercises presented by the faculty of the Group in Biomedical Sciences, designed to introduce biomedical science graduate students to the essential techniques employed in molecular and cellular pharmacology. *Prerequisites: BMS 212, OP, CBB, biochemistry, molecular biology, biomedical sciences or consent of instructor. (6)*

230. Receptors and Signal Transduction (3)

An examination of the molecular and biochemical bases of drug and neurotransmitter action. Topics include molecular basis of drug specificity, receptor mechanisms, neuropharmacology, signal transduction from the cell surface to the nucleus, and drug action on excitable tissues. *Prerequisite: course in biochemistry. (F)*

231. Contemporary Topics in Pharmacology (2)

A selection of short courses in the biomedical and pharmacological sciences offered by resident experts. Topics will vary annually. Each short course will last one to two weeks, meeting five hours a week. *Prerequisite: consent of instructor. (F,W,S)*

232. In vivo Cellular and Molecular Imaging (1)

Strategies such as positron emission tomography, magnetic resonance imaging, and ultrasound for non-destructively imaging molecular and cell biological events inside living animals and eventually human patients. Emphasis on detecting angiogenesis, apoptosis, and expression of tumor-specific genes. *Prerequisites: upper-division or graduate courses in molecular and cell biology.*

233. Molecular Biology of Human Retroviruses (3)

Replication cycle and gene regulation of HIV. Molecular approaches to therapy and vaccines. *Prerequisites: undergraduates lower-division courses in BMM 100.*

234. Practical Histopathology and Mouse Models of Human Diseases (2)

The course is designed to introduce or reintroduce histology and histopathology of the various organ systems to those who need to analyze mouse tissues as an essential part of their research. *Prerequisites: standard undergraduate biology courses.*

235. Pharmacogenomics (3)

The pharmacogenetics course is designed to introduce graduate students, medical students, and pharmacy students to this emerging area of interest, indicting how hereditary mechanisms influence drug responses in humans. The lectures, examples, discussions, and journal presentations will provide the students with a working knowledge of the domains of pharmacology, how heredity influences any response traits, and the ways that advances in genome technologies support our emerging understanding of how polymorphic genetic variants determine inter-individual differences in drug responses. The course will include lectures, discussions, and journal article presentations by students. *Prerequisite: admission to a UCSD graduate program, School of Medicine, or School of Pharmacy and Pharmaceutical Sciences.*

240. Critical Reading in Cell Biology (3)

This course will focus on critical reading and understanding current areas in Cell and Molecular Biology. The exact topic will vary, but will include such topics as Protein Trafficking, Cell Division, Intracellular Movement, Cell Interaction, and Cell Cycle.

242. Seminar in Genetics (1)

Intended for graduate students interested in principles of classical and molecular genetics. Will attend weekly genetics seminar and participate in didactic/discussion preparatory session. *Prerequisite: consent of instructor.*

243. Human Genetics (3)

Advanced aspects of human genetics and human genetics disease, including principles of Mendelian and non-Mendelian inheritance, monogenic and polygenic traits, anticipation, penetrance, and genomics. Course will consist of alternating didactic sessions and seminars in which students will present papers.

245. Cancer Genetics (3)

Intended for graduate students interested in genetics. Course will cover genetic basis for cancer related diseases. *Prerequisites: graduate-level course in cell biology and molecular biology.*

246. Current Literature in Glycobiology (1)

Informal presentations on topics of current interest in glycobiology as represented in the current scientific literature. *Prerequisite: consent of instructor.*

250. Molecular and Modern Methodologies in Physiological Sciences (2)

This course emphasizes modern approaches and methodologies for investigating physiological processes in normal and pathological conditions. This includes the application of transgenic, knockout, adenovirus gene therapy, antisense, and cellular imaging technologies in animal models.

260. Immune Regulation (3)

This course will cover most of today's key aspects in the organization and dynamics of the immune system and its regulation. It will provide students with a basis for understanding the physiology and functioning of the immune system in normal and pathological states. *Prerequisites: core courses in Biomedical Sciences Ph.D. Program, or permission of instructor.*

262. Neurophysiology (4)

An overview of neurophysiological systems, emphasizing mammalian neurophysiology and related model vertebrate systems and concepts. (W)

264. Molecular and Cellular Basis of Disease (2)

Lectures on the molecular and cellular mechanisms of pathogenesis. Topics will include Alzheimer's disease, cell surface and unclear receptors in disease, signal transduction by oncogenes in cancer cells, AIDS, human diseases affecting glycosylation pathways, rheumatoid arthritis, and arteriosclerosis. *Prerequisite: graduate students.* (W)

282. Microbial Pathogenesis (3)

Topics covered in this course include molecular and cellular mechanisms of viral, bacterial, and protozoan pathogenesis. Host response and microbial mechanisms of evasion of host defense will also be discussed. Sessions will consist of faculty and student presentations of current literature. *Prerequisite: graduate standing or consent of instructor.* (S)

285. Statistical Inference in the Medical Sciences (2)

An introduction to basic techniques used in biomedical literature: t tests, ANOVA, chi-square, linear and nonlinear regression. Emphasis will be on understanding the appropriate use and interpretation of the tests, rather than on the calculations.

294. Pharmacology and Molecular Biology Journal Club (0-1)

Current literature in molecular pharmacology and molecular biology is reviewed. Two papers are chosen per week for oral presentation by students. Faculty critique the student presentations. *Prerequisite: enrollment in Ph.D. program at year two and above.* (F,W,S)

295. Pharmacology Research Discussions (0-1)

Student, faculty, and fellow discussion groups on research projects. Students are expected to present research findings to fellows, other Ph.D. students, and faculty. Written critiques are provided by the faculty. *Prerequisites: completion of minor proposition examination and two years of graduate work.* (F,W,S)

296. Directed Reading (1-4)

Reading of special topics under the direction of a faculty member. Exact subject matter to be arranged in individual cases. *Prerequisite: consent of instructor.*

297. Progress in Signal Transduction (1)

Papers describing recent progress in signal transduction from the cell-surface to the nucleus will be chosen from recent research literature. Two papers will be discussed and criticized in detail each week for one hour. *Prerequisites: graduate-level Biochemistry, Cell Biology, and Molecular Biology; registered as second-year and above graduate student in Biomedical Sciences, Biology, or Chemistry.* (F,W,S)

298. Directed Study (1-12)

Reading and laboratory study of special topics under the direction of a faculty member. Exact subject matter to be arranged in individual cases. (F,W,S)

299. Independent Study or Research (1-12)

Independent study or research. *Prerequisite: consent of instructor.* (F,W,S)

The Department of Physics offers an undergraduate and graduate program which prepares students for a career in biophysics and which leads to the following degrees:

B.S. in physics with specialization in biophysics

C.Phil. in physics

Ph.D. in physics (biophysics)

A grade-point average of 2.0 or higher in the upper-division major program is required for graduation. All courses (lower- and upper-division) required for the major must be taken for a letter grade. Students must receive a grade of C- or better in any course to be counted toward fulfillment of the major requirements. In exceptional cases, students with a grade-point average in the major of 2.5 or greater may petition to have one grade of D accepted.

The Undergraduate Program

Physics Major with Specialization in Biophysics

This program leads to a bachelor of science degree. As a terminal degree, it is an excellent education for students who wish to work in the biotechnology industry, and provides an ideal background for students who plan to attend graduate or professional school in biological or biomedical fields.

This program is intended for students with a strong interest in bringing the concepts and technical advances from the physical sciences to bear on issues in biology. The curriculum is cho-

sen to prepare students as rigorously trained but broad-minded generalists, so that they may attack problems in the biological, biochemical, and biomedical sciences with the tools and confidence that come from rigorous training in the physical sciences.

The curriculum for Physics Major with Specialization in Biophysics is designed to allow pre-medical students to complete all necessary courses for admission to medical schools.

The lower-division program for physics majors with specialization in biophysics includes basic courses in biology and chemistry as well as physics. Although the sequence Physics 4A through 4E is strongly recommended, students have the choice of petitioning the department to substitute the sequence Physics 2A through 2D.

The following courses are required for the physics major with specialization in biophysics:

Lower-Division

1. Physics 4A-B-C-D-E and 2CL-DL; or Physics 2A-B-C-D and 2CL-DL (Physics 4 sequence is strongly recommended)
2. Chemistry 6A-B-C and 6BL
3. Biology, BILD 1 and BILD 2
4. Mathematics 20A, 20B, 20C, 20D, 20E, 20F

The upper-division program includes advanced courses in physics, including two core lecture courses and one core laboratory course in biophysics, as well as organic chemistry.

Upper-Division

1. Physics 100A, 105A, 110A, 120A, 130A, 140A, 171, 172, 173
2. Chemistry 140A

Additional electives, to achieve a count of twelve upper-division courses in the major, may be selected from biology, chemistry, and physics. Three additional upper-division courses, in any subject, are required in order to satisfy UCSD requirements.

Premedical students will need to take two additional quarters of organic chemistry (Chemistry 140B and 140C), one quarter of organic chemistry laboratory (Chemistry 143A), and one quarter of an upper-division biology course. In addition, some medical schools also require a quarter of biochemistry (Biology BIBC 100 or Chemistry 114A). The premedical requirements may be used to satisfy elective requirements for upper-division courses.

As a guide to prospective students, we consider a schedule of required classes for a Muir College student.

Suggested Schedule

SENIOR YEAR		
Phys. 140A Phys. 171	Phys. 172 Elec. Elec.	Phys. 173

The Graduate Program

Research in biophysics is being actively pursued in several departments (e.g., physics, chemistry, and biology), which also offer courses in or relevant to biophysics.

Biophysics students will receive their M.S. and C.Phil. degrees in physics. Only their Ph.D. will be in physics (biophysics).

Doctoral Degree Program

The Ph.D. program consists of graduate courses, apprenticeship in research, teaching experience, and thesis research.

Entering students are assigned a faculty adviser to guide them in their program. Many students spend their first year as teaching assistants or fellows and begin apprentice research in their second year. When a student's association with a research area and research supervisor is well established, a faculty research progress committee is formed with the responsibility of conducting an annual review of progress and, at the appropriate time, initiating the formation of a doctoral committee. After three years of graduate study, or earlier, students complete the departmental examinations and begin thesis research. There is no foreign language requirement.

Entrance Testing

An entrance test covering undergraduate physics is given to entering students during the first week of orientation to give better guidance to students in their graduate program. The results are not entered in the student's file. Entering students are encouraged, but not obliged, to bring the results to the first meeting with their academic adviser. Entering students may elect to take the departmental examination instead of taking the entrance test.

Requirements for the Ph.D.

Students are required to pass a departmental examination, advanced graduate courses, a qualifying examination, teaching requirement, and a final defense of the thesis as described below.

1. Departmental Examination

Biophysics students are required to take a departmental examination after completing two years of graduate work at UCSD. The examination is on the level of material usually covered in upper-division courses and the graduate courses listed below:

Fall

Phys. 200A (Theoretical Mechanics)
Phys. 201 (Mathematical Physics)
Phys. 212A (Quantum Mechanics)

Winter

Phys. 200B (Theoretical Mechanics)
Phys. 203A (Adv. Classical Electrodynamics)
Phys. 212B (Quantum Mechanics)

Spring

Phys. 203B (Adv. Classical Electrodynamics)
Phys. 210A (Equilibrium Statistical Mechanics)
Phys. 212C (Quantum Mechanics)

The examination is offered twice a year, at the beginning of the fall and spring quarters, and lasts two days, four hours per day. The examination may be repeated once, the next time it is offered.

Biophysics students take the departmental examination after completing two years of graduate work.

2. Advanced Graduate Courses

Biophysics students are required to pass five courses (with a grade of C or better) from biology, biochemistry, chemistry, or physics in consultation with their adviser no later than the end of the third year of graduate work. At least three of these courses must be graduate courses. A 3.0

average in four of the five courses is required. (In lieu of the course requirement, students may petition to take an oral examination covering three areas of physics.)

3. Qualifying Examination and Advancement to Candidacy

In order to be advanced to candidacy, students must have met the departmental requirements and obtained a faculty research supervisor. At the time of application for advancement to candidacy, a doctoral committee responsible for the remainder of the student's graduate program is appointed by the Graduate Council. Members of the research progress committee are usually included as members of the doctoral committee. The committee conducts the Ph.D. qualifying examination during which students must demonstrate the ability to engage in thesis research. Usually this involves the presentation of a plan for the thesis research project. The committee may ask questions directly or indirectly related to the project and questions on general physics which it determines to be relevant. Upon successful completion of this examination, students are advanced to candidacy and are awarded the Candidate of Philosophy Degree.

4. Instruction in Physics Teaching

All graduate students are required to participate in the physics undergraduate teaching program as part of their career training. The main component of this requirement is an evaluated classroom-based teaching activity. All graduate student teaching accomplishments are subject to the approval of the vice chair for education. There are several ways of satisfying the teaching requirement, including: (1) leading discussions as a teaching assistant, (2) practical classroom teaching, under faculty supervision, (3) participation in an approved teaching development program offered by the Department of Physics or the campus Center for Teaching Development, or (4) transferred teaching credit from another institution or department. Students who satisfy the requirement by teaching at UCSD should enroll in Physics 500 during the quarter in which they complete it.

5. Thesis Defense

When students have completed their theses, they are asked to present and defend them before their doctoral committees.

Time Limits for Progress to the Ph.D.

In accordance with university policy, the Department of Physics has established the following time limits for progress to the Ph.D. A student's research progress committee helps ensure that these time limits are met.

	Theorists	Experimentalists
Advancement to Candidacy	4 years	5 years
Total Registered Time and Support	7 years	8 years

Introduction

The UCSD Department of Chemistry and Biochemistry was founded in the 1950s by the late Professor Harold Urey and a group of colleagues who strove to create a department that would stress the fundamentals of chemistry and, at the same time, embrace diverse applications of those principles at the frontiers of knowledge.

Degrees offered include:

Biochemistry

B.S. Biochemistry/Chemistry
M.S. Chemistry
Ph.D. Chemistry
Ph.D. Chemistry with specialization in bioinformatics

Chemistry

B.A. Environmental Chemistry
B.S. Biochemistry
B.S. Bioinformatics from the Department of Chemistry and Biochemistry
B.S. Chemical Education

B.S. Chemical Physics
B.S. Chemistry
B.S. Chemistry/Earth Sciences
B.S. Environmental Chemistry
B.S. Molecular Synthesis
B.S. Pharmacological Chemistry
M.S. Chemistry
Ph.D. Chemistry
Ph.D. Chemistry with specialization
in bioinformatics

Chemistry–Premedical Majors

Either a biochemistry/chemistry major or a chemistry major with appropriate choice of electives provides a strong background for students intending to pursue careers in the medical sciences.

Premedical students are encouraged to complete the three-quarter general chemistry series (Chem. 6A-B-C or 6AH-6BH-6CH) in their first year. Most medical schools require both a full year of general chemistry, and may not accept Advanced Placement exam scores to satisfy admissions requirements. Students with Advanced Placement exam scores of 4 or 5 who plan to attend medical school should discuss their academic plan with an academic or career adviser early in their academic career. Students should complete the organic chemistry series (either Chem. 140A-B-C or Chem. 141A-B-C) in their sophomore year.

The lower-division biology (BILD 1-2-3) series or equivalent is also required for most medical schools, along with certain upper-division biology courses, some of which may be counted toward the major requirements in chemistry. Students should meet with the department's undergraduate adviser early in order to plan their courses and discuss their options.

General Chemistry

The General Chemistry Chem. 6 sequence (6A-B-C) is intended for science and engineering majors as well as others who need a quantitative course. It satisfies all preprofessional programs. Chem. 4 is a one-quarter preparation for 6A, which should be taken only by those whose college adviser so recommends. The Honors General Chemistry sequence (6AH-6BH-6CH) is designed for science and engineering majors with strong preparation in science and mathe-

tics. A student intending to major in chemistry can thus begin with 4, 6A, or 6AH depending on the level of preparation. A student intending to major in a discipline other than chemistry should consult his or her adviser in the appropriate department to determine which chemistry course is recommended.

Chem. 11, 12, 13 is a terminal sequence for non-science/non-engineering majors. Chem. 15 is a one-quarter survey course suitable for non-science majors. Students should check with their college adviser to determine applicability toward general-education requirements.

General Information on Undergraduate Major Programs

The minimum passing grade is a D, though students may not graduate with more than one D grade in upper-division required course work and must maintain a minimum of a 2.0 average GPA in the major. All courses for the major, except for independent research (Chem. 199) and chemistry instruction (Chem. 195), must be taken for a letter grade. Chem. 195 and Chem. 199 must be taken on a P/NP basis. All chemistry majors, including transfer students, must complete forty-eight units of upper-division chemistry course work at UCSD and fulfill the campus senior residency requirement.

In addition to the requirements, Math. 20F (required for chemical physics majors) and a course in computer programming are also recommended.

Any departure from the requirements outlined below must be approved by petition. This applies to lower- and upper-division requirements.

The suggested programs following each of the major descriptions are only examples.

All undergraduate degree programs, unless otherwise noted, are certified by the American Chemical Society.

Biochemistry/Chemistry Major

The Biochemistry/Chemistry major deals with the chemical processes in living organisms, including structure and function of nucleic acids and proteins. It is suitable for those planning to go to graduate school as well as medical, dental, veterinary, and other professional schools. It is

also suitable at the bachelor's level for jobs in the biotechnology or pharmaceutical field.

The following courses must be taken for a letter grade:

Lower-Division Requirements

1. General chemistry including laboratory (Chem. 6A-C or 6AH-CH, and 6BL, or equivalent).
2. Calculus (Math. 20A-D, or equivalent).
3. Calculus-based physics including laboratory (Phys. 2A-B and 2D or equivalent, and either 2BL, 2CL or 2DL. Phys. 2CL is recommended and is accessible without Phys. 2C).

Upper-Division Requirements

1. Three quarters of organic chemistry (Chem. 140A-C or 141A-C).
2. Two quarters of physical chemistry (Chem. 126-127 recommended; 131–133 acceptable).
3. One quarter of inorganic chemistry (Chem. 120A).
4. Three quarters of biochemistry (Chem. 114A-C).
5. Six laboratory courses (Chem. 100A, 143AH or 143A, 143B, 105A, either 112A or 112B and one additional chemistry lab from the following: Chem. 100B, 105B, 112A or 112B, 123, 143C, or 143D).
6. Two elective courses from the following list: Chem. 107, 113/213, 114D, 115/215, 124/225, 116/216, 118, 152/252, 154/254, 155/255, 156/256, 157/257.
7. One additional elective course chosen from among all of the upper-division and graduate courses offered by the Department of Chemistry and Biochemistry (except non-letter-graded courses) or from the following list of courses offered by the Department of Biology (some biology courses will require additional coursework to fulfill prerequisites): BICD 100, BICD 110, BICD 140, BIMM 114, BIMM 120, BIPN 100, BIPN 102, BIPN 140. Other electives may be arranged by petition.

Suggested Program for Biochemistry/Chemistry B.S. Major

Many courses have enforced prerequisites or are offered once per year.

Bioinformatics Major from the Department of Chemistry and Biochemistry

Also see the program information listed under *Bioinformatics in the catalog*.

The Bioinformatics major offers a rigorous, interdisciplinary training in the new and rapidly evolving field of bioinformatics with a strong focus on chemistry and biochemistry. Bioinformatics is the field of advanced computational and experimental methods that model the flow of information (genetic, metabolic, and regulatory) in living systems to provide an integrated understanding of the systems properties of model organisms. This is a new and rapidly evolving field in which large volumes of both qualitative and quantitative data will accrue at an increasing pace, and the bioinformatician must have a substantial mastery of both the sciences and engineering. This interdisciplinary specialization will be offered jointly with computer science and engineering, bioengineering, and biological sciences, each with its own set of requirements and electives. The program offered by the Department of Chemistry and Biochemistry is aimed at a student interested in applying and developing tools of bioinformatics for the study of chemical processes in biological systems.

Admission to the Bioinformatics Major

There is a fifty-student limit in all combined bioinformatics majors on campus. As a result, admission to the bioinformatics degree is not guaranteed, but is based on a screening process which evaluates potential majors based on academic excellence. Since bioinformatics is an interdisciplinary major, a steering committee involving faculty from the participating departments will select among the best candidates applying and recommended through each department, while insuring active participation of the departments and divisions offering the major. The final decision on admission to the pre-major and major will be made by the bioinformatics steering committee, in consultation with the departments.

Chemistry and Biochemistry candidates for the major should enroll as either chemistry (major code Chem. 25) or biochemistry (major code Chem. 31) majors until they have completed their screening courses in the first two years and have been admitted to the bioinformatics major.

Freshmen

Freshmen may apply to the bioinformatics pre-major after completing the initial screening courses:

- Math. 20B
- Math. 20C
- BILD 1
- Chem. 6A

Once admitted to the pre-major, students may take CSE 11 and 12. On completion of those courses, students may apply for admission to the major. Admission is based on the number of seats available and the applicant's GPA in the six screening courses (Math. 20B-C, BILD 1, Chem. 6A, CSE 11, CSE 12).

Continuing Students

Students who have not declared the bioinformatics pre-major, but who have completed the screening courses, may apply for entry to a bioinformatics program after six quarters (the end of the sophomore year). They will be admitted on a space-available basis, after pre-majors have been screened for admission to the major.

Transfer Students

Effective fall 2003, applicants seeking admission to a bioinformatics major must have completed the following courses with a strong GPA that is competitive with that of UCSD students applying for entry into this specialization:

- a year of calculus (equivalent to Math. 20A-B-C)
- a year of general chemistry, with lab (equivalent to Chem. 6A-B-C, and 6BL)
- the highest level programming course offered at the community college (equivalent to CSE 11 and 12)
- one semester of biology (equivalent to BILD 1 and BILD 2)

Those who have not completed the equivalent courses may be admitted as pre-majors, using the same criteria that apply for UCSD students, and will be allowed a maximum of three quarters to complete pre-major requirements. Transfer students are therefore encouraged to complete these requirements at the community college.

The following courses must be taken for a letter grade:

Lower-Division Requirements

1. Calculus and linear algebra (Math. 20A-C, 20F)
2. General chemistry including laboratory (Chem. 6A-C or 6AH-CH, and 6BL).
3. Physics (Phys. 2A-B)
4. Biology (BILD 1-2)
5. Computer programming (CSE 11-12)
6. Mathematics for algorithm and systems (CSE 21/Math. 15B)
7. Bioinformatics seminar (BILD 94)

The department recommends that students complete an introductory C programming course before taking CSE 11 and CSE 12, either in their first year or during the summer between their first and second years.

Upper-Division Requirements

1. Two quarters of organic chemistry (Chem. 140A-B)
2. Organic chemistry (Chem. 140C) or structural biochemistry (Chem. 114A)
3. Metabolic biochemistry (Chem. 114B)
4. Physical chemistry (Chem. 127 accepted, Chem. 131 and 132 recommended)

- Molecular and cellular biochemistry (Chem. 114D)
- Two quarters of biochemistry laboratory (Chem. 112A-112B)
- Genetics (BICD 100)
- Cell biology (BICD 110)
- Two computer science courses (CSE 100 or Math. 176; and CSE 101 or Math. 188)
- Two additional upper-division electives offered by the Department of Chemistry and Biochemistry (each course must be at least four units) with only one quarter of credit allowed for any given course. Recommended courses are: Chem. 100A, 115, 118, and 143A.

The bioinformatics series comprising the following courses:

- Molecular sequence analysis (BIMM 181 or CSE 181 or BENG 181)
- Biological databases (Chem. 182 or BIMM 182 or CSE 182 or BENG 182)
- Applied genomic technologies (BENG 183)
- Computational molecular biology (BIMM 184 or CSE 184 or BENG 184 or Chem. 184)
- Bioinformatics lab (BIMM 185)
- Probability and statistics (Math. 186)

Chemical Education Major

The Chemical Education major offers an excellent preparation for teaching physical science in secondary schools, including chemistry, physics, earth science, biology, and mathematics.

The chemical education program is sufficiently intensive that students with this degree should be admissible as graduate students in chemistry, biochemistry, and teacher education programs at most universities. This program is also excellent preparation for students interested in a career in science writing.

The program is basically a chemistry major with earth science and biochemistry as electives, combined with three courses from Education Studies.

If you are interested in earning a California teaching credential through UCSD, contact Education Studies for information about the prerequisite and professional preparation requirements. It is recommended that you contact Education Studies as early as possible in your academic career.

The following courses must be taken for a letter grade:

Lower-Division Requirements

- General chemistry including laboratory (Chem. 6A-C or 6AH-CH, and 6BL, or equivalent).
- Calculus (Math. 20A-D, or equivalent).
- Calculus-based physics including laboratory (Phys. 2A-B and 2D or equivalent, and either 2BL, 2CL or 2DL. Phys. 2CL is recommended and is accessible without Phys. 2C).
- Biology (BILD 1).
- Earth Science 50 (Erth. 50).

Upper-Division Requirements

- Three quarters of organic chemistry (Chem. 140A-C or 141A-C).

- Two quarters of physical chemistry (Chem. 126-127 recommended; 131-133 acceptable).
- One quarter of inorganic chemistry (Chem. 120A).
- One quarter of biochemistry (Chem. 114A).
- Six laboratory courses (Chem. 100A, 143AH or 143A, 143B, 105A, and two of the following: 100B, 105B-BL, 112A, 112B, 123, 143C, or 143D).
- One additional elective course chosen from among all of the upper-division and graduate courses offered by the Department of Chemistry and Biochemistry (except non-letter graded courses).
- One earth science course (Erth. 102 or 103) Other biology or chemistry courses may be arranged by petition.
- Chem. 195, or 196, or 199. Chem. 195 is recommended.
- TEP 129A-B-C.

Chemical Physics Major

The Chemical Physics major applies the concepts and quantitative methods of physics to the descriptions of atoms and molecules, analyzes matter as a statistical assembly of molecular building blocks, and develops and exploits

physical (largely spectroscopic) experimental tools with which to test and refine such theories.

The chemical physics major is designed as a preparation for graduate work in chemistry, physics, or other interdisciplinary areas.

The following courses must be taken for a letter grade:

Lower-Division Requirements

1. General chemistry including laboratory (Chem. 6A-C or 6AH-CH, and 6BL, or equivalent).
2. Calculus and linear algebra (Math. 20A-F, or equivalent).
3. Calculus-based physics including laboratory (Phys. 2A-D or equivalent, and either 2BL, 2CL or 2DL. Phys. 2CL is recommended).

It is recommended that the above requirements be completed by the end of the sophomore year.

Upper-Division Requirements

1. Two quarters of organic chemistry (Chem. 140A-B or 141A-B).
2. One year of physical chemistry (Chem. 131-133).
3. Two quarters of inorganic chemistry (Chem. 120A-B). Chem. 114A can substitute for Chem. 120B.
4. Six upper-division chemistry labs: Chem. 100A, 100B-BL, 143AH or 143A, 143B or 143C, 105A and one of the following: 105B, 112A, 112B, 123, 143B, 143C, or 143D.
5. Molecular spectroscopy (Chem. 135).
6. Partial differential equations (Math. 110).
7. Two quarters of physics (Phys. 110A-B, or Phys. 100A-B).
8. One additional course in physical chemistry or related areas as approved by the department. Chem. 199 may be petitioned.

Suggested Program for Chemical Physics B.S. Major

Chemistry Major

The Chemistry major provides a broad introduction for the biochemistry, organic, physical, or inorganic student as well as those who prefer not to specialize. This major will enable a student to pursue further studies in chemistry or in related fields of science, medicine, or engineering.

The following courses must be taken for a letter grade:

Lower-Division Requirements

1. General chemistry including laboratory (Chem. 6A-C or 6AH-CH, and 6BL, or equivalent).
2. Calculus (Math. 20A-D, or equivalent).
3. Calculus-based physics including laboratory (Phys. 2A-B and 2D or equivalent, and either 2BL, 2CL or 2DL. Phys. 2CL is recommended and is accessible without Phys. 2C).

Upper-Division Requirements

1. Three quarters of organic chemistry (Chem. 140A-C or 141A-C).
2. Three quarters of physical chemistry (Chem. 131-133).
3. Two quarters of inorganic chemistry (120A-B).
4. One quarter of biochemistry (Chem. 114A).
5. Six laboratory courses (Chem. 100A, 143AH or 143A, 143B, 105A and two of the following: Chem. 100B, 105B-BL, 112A, 112B, 123, 143C, or 143D).

6. Three additional four-unit upper-division or graduate courses in chemistry and biochemistry or related areas. One of Chem. 195 or 199 may be petitioned.

Suggested Program for Chemistry B.S. Major

Many courses have enforced prerequisites or are offered once per year.

Chemistry/Earth Sciences Major

The Chemistry/Earth Sciences major is available in cooperation with UCSD's Scripps Institution of Oceanography. It requires course work for a major in chemistry, plus additional courses in geology. It will appeal to students who plan to go on to graduate school in related fields, or to those students who plan to go into professional geologic work with their undergraduate degree.

The following courses must be taken for a letter grade:

Lower-Division Requirements

1. General chemistry including laboratory (Chem. 6A-C or 6AH-CH, and 6BL, or equivalent).
2. Calculus (Math. 20A-D, or equivalent).
3. Calculus-based physics including laboratory (Phys. 2A-B and 2D or equivalent, and either 2BL, 2CL or 2DL. Phys. 2CL is recommended and is accessible without Phys. 2C). Phys. 2C is recommended as preparation for the upper-division Earth Sciences sequence, but it is not required for the major.

4. Erth. 50.

Upper-Division Requirements

- Two quarters of organic chemistry (Chem. 140A-B or 141A-B).
- Three quarters of physical chemistry (Chem. 131-133).
- Two quarters of inorganic chemistry (Chem. 120A-B). Chem. 114A can substitute for Chem. 120B.
- Six upper-division labs: Chem. 100A, 100B-BL, 143AH or 143A, 105A, Erth. 162, and one of the following: Chem. 105B, 112A, 112B, 123, 143B, 143C, or 143D.
- Four Earth Sciences courses (Erth. 100, 102, 103, and 120).
- One additional course from the following list: SIO 252A, 259, 260, 261, SIO 251/Erth. 155 or SIO 247, Chem. 149A-149B, 170, 171, 173, 174/SIO 141. Petrology is essential for geology students. SIO 251/Erth. 155 or SIO 247 should be taken by students planning to go on to graduate school or to do professional geologic work with their undergraduate degrees. Students are encouraged to take at least one quarter of Chem. 199.

Suggested Program for Chemistry/Earth Sciences B.S. Major

Many courses have enforced prerequisites or are offered once per year.

Environmental Chemistry Major

Students have the option of earning the B.A. or the B.S. in the Environmental Chemistry major. The B.S. is ACS certified and is recommended for those who intend to apply to graduate school.

The Environmental Chemistry major requires a strong chemistry background, but also includes breadth courses from other disciplines related to environmental concerns. The elective courses allow specialization in a secondary area of interest, such as economics, political science, biology, earth sciences, or additional chemistry.

The program is designed to prepare students to enter the industrial, governmental, or legal workforce, or to continue studies in the environmental sciences. Students fulfilling their elective requirements with chemistry and biochemistry courses would be prepared to attend most graduate schools in chemical sciences.

The following courses must be taken for a letter grade:

Lower-Division Requirements

- General chemistry including laboratory (Chem. 6A-C or 6AH-CH, and 6BL, or equivalent).
- Calculus (Math. 20A-D, or equivalent).
- Calculus-based physics (Phys. 2A-B and 2D or equivalent). Phys. 2CL (or Phys. 2BL or 2DL) is required for a B.S. degree.

Upper-Division Requirements

- Two quarters of organic chemistry (Chem. 140A-B or 141A-B).
- Two quarters of physical chemistry (Chem. 126-127 recommended; 131-133 acceptable).
- One quarter of inorganic chemistry (Chem. 120A) or a third quarter of organic chemistry (Chem. 140C or 141C).
- One quarter of biochemistry (Chem. 114A).
- Three laboratory courses (Chem. 100A, 100B-BL, and 143AH or 143A).
- Two quarters of environmental chemistry (Chem. 149A-B).
- Atmospheric chemistry (Chem. 173).

Elective Requirements

- Four non-science elective courses chosen from the following list (at least one course must be upper-division): Econ. 1, Econ. 3, Econ. 131, Econ. 132, HIUS 154, Phil. 148, Phil. 164, Poli. SCI 160AA, Poli. SCI 160AB, Poli. SCI 162, Soc. 185, USP 2, USP 124, USP 144, USP 171. Environmental chemistry students must complete their elective requirements through coursework and cannot substitute examination scores such as Advanced Placement examinations for these courses.
- Three science elective courses chosen from the following list (at least two courses must be upper-division): Chem. 105A, Chem. 105B, Chem. 112A, Chem. 112B, Chem. 114B, Chem. 114C, Chem. 120A, Chem. 120B, Chem. 123, Chem. 140C or 141C, Chem. 143B, Chem. 143C, Chem. 143D, Chem. 170, Chem. 171, Chem. 199, Erth. 40, Erth. 50, Erth. 102, Erth. 103, BILD 1, BILD 2, BILD 3, BIEB 120, BIEB 121, BIEB 176, BIEB 178, BIEB 179, MAE 118A-B.
- Students desiring an ACS certified B.S. Degree must take three laboratory courses: Chem. 105A, 143B or 143C, and one from the following list: Chem. 105B, 112A, 112B, 123, 143B, 143C or 143D. These courses may be used to satisfy number 2 above.

Suggested Program for Environmental Chemistry B.A. or B.S. Major (B.S. and ACS certification require additional courses)

Many courses have enforced prerequisites or are offered once per year.

Molecular Synthesis Major

The Molecular Synthesis major offers a thorough training in all aspects of the molecular synthesis of organic, inorganic, and biological substances, and with a fundamental understanding of their structure and reactivity. This major provides an excellent preparation for employment in biotechnology, diagnostic, electronic, and pharmaceutical enterprises as well as for graduate programs in organic, bioorganic, and inorganic chemistry.

The following courses must be taken for a letter grade:

Lower-Division Requirements

1. General chemistry including laboratory (Chem. 6A-C or 6AH-CH, and 6BL, or equivalent).
2. Calculus (Math. 20A-D, or equivalent).
3. Calculus-based physics including laboratory (Phys. 2A-B and 2D or equivalent, and either 2BL, 2CL or 2DL. Phys. 2CL is recommended and is accessible without Phys. 2C).

Upper-Division Requirements

1. Three quarters of organic chemistry (Chem. 140A-C or 141A-C)
2. Three quarters of physical chemistry (Chem. 131-133)
3. Two quarters of inorganic chemistry (Chem. 120A-120B)
4. One quarter of biochemistry (Chem. 114A)
5. Six laboratory courses (Chem. 100A, 143A or 143AH, 143B-143C, 105A, and 123)
6. Synthetic methods (Chem. 152)
7. Structural or mechanistic organic chemistry (Chem. 154 or 156)
8. Polymer, bioorganic, or bioinorganic chemistry (Chem. 107 or 124 or 157)
9. One additional course from the following: Chem. 114B, 114C, 155, 185, or 199

Suggested Program for Molecular Synthesis B.S. Major

Many courses have enforced prerequisites or are offered once per year.

Pharmacological Chemistry Major

The Pharmacological Chemistry major provides a strong background in chemistry and includes most courses required by California pharmacy schools. The major is intended primarily to prepare students for pharmacy school (Pharm.D.). Students fulfilling their elective requirements with appropriate courses would be prepared for graduate school to obtain a Ph.D. in pharmacology, biochemistry, or other areas of science. Degree recipients would also be prepared for most jobs in the biotechnology and chemical industries.

Pharmacological chemistry students are strongly encouraged to complete a full year of general chemistry and a full year of lower-division biology. As with some medical programs, some pharmacy programs may require a full year of these courses and may not accept tests such as the Advanced Placement exam to satisfy these requirements.

The following courses must be taken for a letter grade:

Lower-Division Requirements

1. Biology (BILD 1, 2 and 3, and either BICD 101, 111, 131, or BIPN 105 or BIMM 121). Alternatively, a year of biology with laboratory at a community college may be petitioned.
2. General chemistry including laboratory (Chem. 6A-C or 6AH-CH, and Chem. 6BL, or equivalent).

3. Calculus-based physics including laboratory. (Phys. 2A-B and 2D or equivalent, and either 2BL, 2CL, or 2DL. Phys. 2CL is recommended and is usually the course required by pharmacy schools. It is accessible without Phys. 2C).
4. Calculus (Math. 20A-D, or equivalent).
5. Economics (Econ. 1 or 3 or equivalent).
6. Pharmacology seminar (Chem. 92).

Most California pharmacy schools require a course in public speaking for admission to the school. Students planning to apply to these programs should take Introduction to Speech, Theatre THGE 25, or an appropriate course at a community college.

Upper-Division Requirements

1. Two quarters of physical chemistry (Chem. 126-127 recommended; 131-133 acceptable).
2. Three quarters of organic chemistry (Chem. 140A-C or 141A-C).
3. Three quarters of biochemistry (Chem. 114A-B-C).
4. Four laboratory courses (Chem. 100A, 143AH or 143A, 143B and either 112A, 112B or 143C).
5. One quarter of pharmacology and toxicology (Chem. 118).
6. One chemistry elective course chosen from among all the upper-division and graduate courses offered by the Department of Chemistry and Biochemistry (except non-letter graded courses).

If ACS certification is desired, Chem. 120A, plus two additional laboratory courses (Chem. 105A and a lab chosen from Chem. 100B-BL, 105B, 123, or 143C/112A/112B, if not already taken), are required. Any of these courses would satisfy #6. above.

Suggested Program for Pharmacological Chemistry B.S. Major (ACS certification requires additional courses)

Many courses have enforced prerequisites or are offered once per year.

Honors Program

The Department of Chemistry and Biochemistry offers an Honors Program to those students who have demonstrated excellence in any of the nine majors. Students are eligible for Departmental Honors at graduation when they have:

1. Achieved a GPA of 3.2 overall and 3.4 in chemistry courses.
2. Completed a minimum of eight units of Chem. 199, distributed over at least two quarters. A student who registers for 199 and subsequently fails to complete the Honors Program may apply up to four units to any major that normally allows 199 as elective credit. A student who has successfully petitioned to use a Chem 199 course to fulfill elective credit may not use that course to fulfill honors requirements as well.
3. Submitted a final honors research report to three UCSD faculty members, including their research adviser, for approval.
4. Presented an oral report about their research before a group of at least three faculty. This can be at an undergraduate research conference or at a seminar involving honors students and faculty.

Students who are interested in the Honors Program should contact the Undergraduate Coordinator in 4010 York Hall, and are invited to do so at any time.

Education Abroad

Majors are encouraged to explore the programs that allow students to study abroad or at other U.S. universities for a term or longer. See an adviser for details.

Chemistry and Biochemistry majors are encouraged to participate in the UC Education Abroad Program (EAP) and UCSD's Opportunities Abroad Program (OAP). Subject to approval by our faculty, courses taken through EAP/OAP will be accepted for credit toward the major. Students interested in studying abroad should see a departmental program adviser to discuss appropriate courses and programs for their plan of study.

Minor Program in Chemistry and Biochemistry

A typical minor in chemistry consists of three lower-division lecture courses and at least one laboratory course, followed by a minimum of five upper-division courses, including at least one laboratory course, focused in physical, inorganic, organic, environmental chemistry, or biochemistry. Lower-division course requirements may not be satisfied by advanced placement credit, though transfer units may be used to satisfy lower-division minor requirements. Upper-division courses required by a student's major may not be applied toward a minor.

Upper-division courses for the minor must be taken at UCSD in the Department of Chemistry and Biochemistry, and must be taken for a letter grade. The minimum overall GPA requirement for the minor is a 2.0.

The Graduate Programs

Graduate students are accepted to the Department of Chemistry and Biochemistry for study toward Plan I (Thesis) and the Plan II (Comprehensive Examination) M.S. in chemistry, the Ph.D. in chemistry and the Ph.D. in chemistry with specialization in bioinformatics. Students interested in the bioinformatics specialization should contact the Student Affairs Office for more information.

Master's of Science

A Plan I (Thesis) M.S. in chemistry and a Plan II (Comprehensive Examination) M.S. in chemistry are offered.

Admissions: UCSD students are admitted for fall, winter, and spring quarter entrance; non-UCSD students are admitted for fall entrance only. Eligibility requirements for admission include a solid training in the chemical sciences based on the undergraduate record, a 3.0 GPA in chemistry courses completed, and a 3.0 overall GPA.

The GRE general test is required of all applicants. Foreign applicants must submit a TOEFL score; TWE scores are strongly recommended. Those who wish to apply to the Thesis Plan must have a letter of support from the proposed thesis adviser.

Residency and Time to Degree: Master's students must register at UCSD for a minimum of three quarters, and complete at least twenty units per academic year. Full-time Comprehensive Examination Plan students can complete the degree in three quarters. Thesis Plan students typically take eighteen to twenty-four months to graduate.

Relationship to Doctoral Program: Master's students who wish to continue their studies as doctoral students in chemistry and biochemistry must request to transfer to that program. Application materials are due mid-January and include current letters of recommendation, current UCSD transcript, and statement of purpose. Transfer is for fall quarter only.

PLAN I (THESIS)

Purpose: To prepare students for research careers or for doctoral or professional studies; the emphasis is on research.

Advancement to Candidacy: A minimum of thirty-six units with an overall GPA of 3.0 must be completed. The majority of units taken are for thesis research (Chem. 299). At least eight units of graduate level chemistry courses must be completed for a letter grade. Four units of teaching apprenticeship are required (Chem. 500; see Doctoral Program, Teaching and Language Requirement sections). Contact the Student Affairs Office for full information.

Thesis: Students must give an oral presentation and defense of their thesis project to a Thesis Committee. A student graduates after the thesis has been defended and the written dissertation approved by his or her committee, department, and OGSF, and filed with the University Archivist.

The Thesis Committee consists of at least three faculty: (1) the thesis adviser, (2) a faculty member from the Department of Chemistry and Biochemistry familiar with the student's research area, and (3) a faculty member from either this or another department whose research is in an area different from that of the thesis.

PLAN II (COMPREHENSIVE EXAM)

Purpose: To prepare students for doctoral or professional studies; the emphasis is on course work.

Advancement to Candidacy: A minimum of thirty-six units with an overall GPA of 3.0 must be completed. The majority of units taken are in letter-graded graduate chemistry courses. Four units of teaching apprenticeship are required (Chem. 500; see Doctoral Program, Teaching and Language Requirement sections). Four units of nonthesis research (Chem. 297) are allowed. Contact the Student Affairs Office for full information.

Comprehensive Examination: The purpose of this requirement is to confirm that students have achieved an advanced understanding of, and a comprehensive training in, the chemical sciences. The tests cover a wide range of material, so that students will have a chance to show what they have learned. For master's students, the department administers the standardized American Chemical Society exams in biochemistry and in analytical, inorganic, organic, and physical chemistry. Students must pass three of the five exams in order to graduate. For doctoral students earning the M.S. on the way to the Ph.D., the Departmental Examination fulfills this requirement.

Doctoral Program

The goal of the Ph.D. in chemistry is to prepare students for careers in science by expanding their knowledge of chemistry while developing their ability for critical analysis, creativity, and independent study. The program is designed to encourage initiative and to stimulate enjoyment and development of the student's area of research expertise as well as the broader aspects of scientific inquiry and enlightenment.

Research

Students choose their research concentration from programs in biochemistry, biophysics, bioinformatics, inorganic, organic, physical, analytical, and theoretical chemistry, surface and materials chemistry, and atmospheric and environmental chemistry. Opportunities for scientific discovery

are also abundant through the department's extensive collaborations with investigators in the physical, biological, and engineering sciences. This includes on-campus collaborations with faculty in the Materials Science Program, School of Medicine, School of Pharmacy and Pharmaceutical Sciences, and Scripps Institution of Oceanography. There are also off-campus interactions with scientists at nearby research facilities such as the Salk Institute and The Scripps Research Institute. Excellent state-of-the-art facilities and equipment support all the research programs. The department's Industrial Relations Program interfaces with national and local chemical, biotechnology, and pharmaceutical industries to encourage technology transfer and to assist postgraduates interested in industrial careers.

Research Adviser

A first-year faculty adviser guides students until a research adviser is chosen. Most of a student's efforts in graduate school are directed toward research for the doctoral dissertation, and selection of a research adviser is of utmost importance. To assist students with this critical decision, all chemistry and biochemistry faculty present research seminars in the fall quarter. Students then rotate in laboratories or consult with faculty to discuss research opportunities. Although students have until the end of the first year to join a laboratory, most start their research studies by mid-year.

Placement Examinations and Course Work

Entering students take written placement examinations in analytical, biochemistry, inorganic, organic, and physical chemistry. The purposes of these exams are to assist with advising and to assure that students have the breadth and level of competence needed for graduate studies. Deficiencies must be remedied in the first year. Three of five exams must be passed, including the one in the student's research area.

First-year students normally take at least six of the graduate courses listed below based on the results of their placement examinations, their research programs, and their specialized interests. Chem. 250 and Chem. 500 are required. Undergraduate courses and courses offered through other departments may also be taken, depending on the student's research area. By the second year, the emphasis is on the-

sis research, and a lighter load of courses is taken, although participation in seminars and informal study groups continues.

Departmental Examination

In the winter quarter of the second year, a student's progress in research and graduate studies is evaluated through the departmental examination, which includes presentation and critical discussion of a recent research article. Students are also evaluated on their general knowledge of their particular field of study. Students may also be asked about progress on their dissertation.

Qualifying Examination

By the end of the third year, students defend the topic, preliminary findings, and future research plans of their dissertation. Passing this defense qualifies the student to advance to candidacy for the dissertation. A dissertation committee composed of five faculty, one of whom is the research adviser, provides consultation and evaluation for the dissertation project.

Dissertation

The dissertation is normally completed in the fourth or fifth year. This body of research is expected to make an innovative contribution to the field of chemistry. Ph.D. candidates present a seminar summarizing their research accomplishments and defend their thesis in an oral examination before their dissertation committee.

Teaching

Experience in teaching is a vital and integral part of every graduate student's training, and all students participate in the instructional activities of the undergraduate curriculum. Course credit for the teaching apprenticeship is earned by enrolling in Chem. 500. Excellence in teaching is stressed, and the department provides a thorough training program covering the fundamentals of teaching as well as other useful information and techniques for effective instruction. Further training is provided by the campus's Center for Teaching Development. Faculty and the students taught evaluate the performance of teaching assistants every quarter and awards are bestowed annually for outstanding performance as a teaching assistant.

Language Requirement

Students whose native language is not English must demonstrate a mastery of English adequate to complete the teaching requirement. Deficiencies must be remedied by the end of the first year of academic residency. For native English speakers, there is no foreign-language requirement.

Time Limits

In accordance with UCSD policy, students must advance to candidacy by the end of four years. Total university support cannot exceed six and one-third years. Total registered time at UCSD cannot exceed seven and one-third years.

Seminars

Seminars by researchers from other universities, national laboratories, and industry are another basic and important aspect of the graduate curriculum. Seminars are presented weekly in biochemistry, inorganic, organic, and physical chemistry. Department colloquia are given on topics of general interest to the department. Seminars are also sponsored by many other departments and institutes.

Financial Support

The department supports all first-year students in good academic standing from a variety of sources, including teaching and research assistantships, training grants, fellowships, and awards. A stipend is paid in addition to fees and, if applicable, tuition. Continuing students who do not have fellowships or awards are normally supported on training grants or on research assistantships by their thesis advisers.

Admissions

The department seeks bright, motivated doctoral students and welcomes all such applications. To make admissions decisions, the department considers an applicant's statement of purpose and research interests, GRE scores on the general test plus either the advanced chemistry or advanced biochemistry test, undergraduate record, quality of the undergraduate university, letters of recommendation, and research experience and publica-

tions. Applicants whose native language is not English must also submit TOEFL scores; TWE scores are strongly recommended. Admissions to the doctoral program is for fall quarter. Applications received by mid-January receive priority consideration.

Students who have a master's degree with strong course records and with research experience are encouraged to apply. They normally pass the Qualifying Examination and graduate at an accelerated pace.

Joint Doctoral Program with San Diego State University

The Department of Chemistry and Biochemistry at UCSD and the Department of Chemistry at San Diego State University offer a joint program of graduate study leading to the Ph.D. degree in chemistry. More information is available in the current edition of the *Bulletin of the Graduate Division* of San Diego State University.

COURSES

For course descriptions not found in the 2006–2007 General Catalog, please contact the department for more information.

LOWER-DIVISION

4. Basic Chemistry (4)

Chemistry 4 is a one-quarter course for science majors with insufficient preparation to start the Chem. 6 sequence. Emphasis is on learning how to solve quantitative problems. Topics include nomenclature, stoichiometry, and the periodic table. Includes a combined laboratory and discussion-recitation each week. *Prerequisite: Math. 4C. Cannot be taken for credit after any other chemistry course.* Intended for science majors. (F)

6A. General Chemistry I (4)

First quarter of a three-quarter sequence intended for science and engineering majors. Topics include: stoichiometry, gas laws, bonding, atomic theory, quantum theory, and thermochemistry. Three hours lecture, one hour recitation. *Prerequisites: proficiency in high school chemistry or physics, Math. 10A or 20A or a higher course in the Math. 10 or 20 sequence (may be taken concurrently).* (F,W,S)

6AH. Honors General Chemistry I (4)

First quarter of a three-quarter honors sequence intended for well-prepared science and engineering majors. Topics include: stoichiometry, gas laws, bonding, atomic theory, quantum theory, and thermochemistry. Three hours lecture and one hour recitation. Students may not receive credit for both Chem. 6AH and Chem. 6A. *Prerequisites: proficiency in high school chemistry, physics and mathematics. Math. 10A or 20A or a higher course in the Math. 10 or 20 sequence.*

Concurrent enrollment in Math. 20A or higher level calculus required. (F)

6B. General Chemistry II (4)

Second quarter of a three-quarter sequence intended for science and engineering majors. Topics include: molecular geometry, condensed phases and solutions, chemical equilibrium, acids and bases and thermodynamics. Three hours lecture and one hour recitation. *Prerequisites: Chem. 6A, Math. 10A or 20A or a higher course in the Math. 10 or 20 sequence.* (F,W,S)

6BH. Honors General Chemistry II (4)

Second quarter of a three-quarter honors sequence intended for well-prepared science and engineering majors. Topics include: molecular geometry, condensed phases and solutions, chemical equilibrium, acids and bases and thermodynamics. Students may not receive credit for both Chem. 6BH and Chem. 6B. Three hours lecture and one hour recitation. *Prerequisites: Chem. 6AH, Math. 10A or 20A or a higher course in the Math. 10 or 20 sequence.* (W)

6BL. Introductory Inorganic Chemistry Laboratory (3)

Introduction to experimental procedures used in synthetic, inorganic, analytical, and physical chemistry. *Prerequisites: Chem. 6A, 6B. Preferably taken concurrently with Chem. 6C.* A materials fee is required. A mandatory safety exam must be passed within the first two weeks. (F,W,S)

6C. General Chemistry III (4)

Third quarter of a three-quarter sequence intended for science and engineering majors. Topics include: electrochemistry, kinetics, coordination chemistry, nuclear chemistry, and an introduction to organic and biochemistry. Three hours lecture and one hour recitation. *Prerequisite: Chem. 6B, Chem. 6BL may be taken concurrently.* (F,W,S)

6CH. Honors General Chemistry III (4)

Third quarter of a three-quarter honors sequence intended for well-prepared science and engineering majors. Topics include: electrochemistry, kinetics, coordination chemistry, nuclear chemistry, and an introduction to organic and biochemistry. Three hours lecture and one hour recitation. Students may not receive credit for both Chem. 6CH or Chem. 6C. *Prerequisites: Chem. 6BH, Math. 20B; Chem. 6BL may be taken concurrently.* (S)

11. The Periodic Table (4)

Introduction to the material world of atoms and small inorganic molecules. Intended for nonscience majors. Can be skipped by students with a good knowledge of high school chemistry. Cannot be taken for credit after any other general chemistry course. (F)

12. Molecules and Reactions (4)

Introduction to molecular bonding and structure and chemical reactions, including organic molecules and synthetic polymers. Intended for nonscience majors. *Prerequisite: Chem. 11 or good knowledge of high school chemistry.* Cannot be taken for credit after any organic chemistry course. (W)

13. Chemistry of Life (4)

Introduction to biochemistry for nonscience majors. *Prerequisite: Chem. 12.* Cannot be taken for credit after any biochemistry course. (S)

15. Chemistry of the Universe (4)

This is a one-quarter, nonmathematical chemistry course for nonscience majors covering the origin of the universe, the elements, and the formation of the

solar system. The evolution of the Earth's atmosphere, hydrosphere, geosphere, and biosphere will be covered, as well as contemporary problems in environmental chemistry. Cannot be taken for credit after any other chemistry course.

87. Freshman Seminar in Chemistry and Biochemistry (1)

This seminar will present topics in chemistry at a level appropriate for first-year students.

90. Undergraduate Seminar (1)

The seminar will focus on a variety of issues and special areas in the field of chemistry.

91. Undergraduate Honors Seminar (1)

A seminar intended for exposing undergraduate students, especially freshmen and sophomores, to exciting research programs conducted by the faculty. Enrollment is limited.

92. Undergraduate Pharmacology Seminar (1)

Selected topics in pharmacology and toxicology.

99. Independent Study (2-4)

Independent literature or laboratory research by arrangement with and under the direction of a member of the Department of Chemistry and Biochemistry faculty. Students must register on a P/NP basis. *Prerequisites:* lower-division standing, 3.0 minimum UCSD GPA, consent of instructor and department, completion of 30 units of undergraduate study at UCSD, completed and approved Special Studies form.

UPPER-DIVISION

100A. Analytical Chemistry Laboratory (4)

Laboratory course emphasizing classical quantitative chemical analysis techniques, including separation and gravimetric methods, as well as an introduction to instrumental analysis. *Prerequisites:* Chem. 6C or 6CH or equivalent, and Chem. 6BL or equivalent; Phys. 2CL or 2BL recommended. A materials fee is required for this course. A mandatory safety exam must be passed within the first two weeks. (F, W, S)

100B. Fundamentals of Instrumental Analysis (4)

Fundamental theoretical principles, capabilities, applications, and limitations of modern analytical instrumentation used for qualitative and quantitative analysis. Students will learn how to define the nature of an analytical problem and how to select and appropriate analytical method. *Prerequisites:* Chem. 100A or graduate standing, and Phys. 2A-B-D or equivalent; Phys. 2CL or 2BL recommended. (Note: Students may not receive credit for both Chem. 100B and Chem. 106.) (W, S)

100BL. Instrumental Analysis Laboratory (3)

Hands-on laboratory course focuses on the development of correct laboratory work habits and methodologies for the operation of modern analytical instrumentation. Gas chromatography, gas-chromatography-mass spectrometry, high performance liquid chromatography, ion chromatography, atomic absorption spectroscopy. Chem. 100BL is for undergraduates only. *Prerequisites:* Chem. 100A; Phys. 2A-2B-2D, or equivalent; concurrent enrollment with Chem. 100B. Phys. 2BL or 2CL recommended. (Note: Students may not receive credit for both Chem. 100B and Chem. 106.) (W, S)

105A. Physical Chemistry Laboratory (5)

Laboratory course in experimental physical chemistry. *Prerequisites:* Chem. 100A (formerly 6CL) and Phys. 2CL or equivalent, Chem. 126 or 127 or 131 or 133. A materials fee is required for this course. (F, W, S)

105B. Physical Chemistry Laboratory (4)

Laboratory course in experimental physical chemistry. *Prerequisite:* Chem. 105A. A materials fee is required for this course. (F, W, S)

107. Synthetic Macromolecules (4)

The chemistry of high polymers with emphasis on synthesis, structure, characterization, and properties. Polymers as materials are important as films, fibers, and elastomers. They play an ever-increasing role in science, technology, and medicine. *Prerequisite:* Chem. 140A-B or 141A-B. (May not be offered every year.)

112A. Molecular Biochemistry Laboratory (6)

The application of techniques to study protein structure and function, including electrophoresis, protein purification, column chromatography, enzyme kinetics, and immunochemistry. *Prerequisites:* Chem. 140A-B-C, 143A-B, 114A-B. (Some of these courses may be taken concurrently.) (Note: Students may not receive credit for both Chem. 112A and BIBC 103.) A materials fee is required for this course. (W)

112B. Molecular Biochemistry Laboratory (6)

This laboratory will introduce the students to the tools of molecular biology and will involve experiments with recombinant DNA techniques. *Prerequisites:* Chem. 114A-B, Chem. 114C (may be taken concurrently); Chem. 143A and 143B. (Note: Students may not receive credit for both Chem. 112B and BIBM 101.) A materials fee is required for this course. (S)

113. Chemistry of Biological Macromolecules (4)

A discussion of the structural principles governing biological macromolecules, the techniques used in their study, and how their functional properties depend on three-dimensional structure. *Prerequisites:* elementary organic and physical chemistry. (May not be offered every year.)

114A. Biochemical Structure and Function (4)

Introduction to biochemistry from a structural and functional viewpoint. *Prerequisite:* elementary organic chemistry (Chem. 140A or equivalent). (Note: Students may not receive credit for both Chem. 114A and BIBC 100.) (F)

114B. Biochemical Energetics and Metabolism (4)

This course is an introduction to the metabolic reactions in the cell which produce and utilize energy. The course material will include energy-producing pathways: glycolysis, Krebs cycle, oxidative phosphorylation, fatty-acid oxidation. Biosynthesis of amino acids, lipids, carbohydrates, purines, pyrimidines, proteins, nucleic acids. *Prerequisite:* Chem. 114A or BIBC 100. (Note: Students may not receive credit for both Chem. 114B and BIBC 102.) (W)

114C. Biosynthesis of Macromolecules (4)

This course is a continuation of the introduction to biochemistry courses (114A and 114B). This quarter reviews the mechanisms of biosynthesis of macromolecules—particularly proteins and nucleic acids. Emphasis will be placed on how these processes are controlled and integrated with the metabolism of the cell. *Prerequisite:* Chem. 114B or BIBC 102. (Note: Students may not receive credit for both Chem. 114C and BIBM 100.) (S)

114D. Molecular and Cellular Biochemistry (4)

This course represents a continuation of 114C, or an introductory course for first- and second-year graduate students, and covers topics in molecular and cellular biochemistry. Emphasis will be placed on contemporary approaches to the isolation and characterization of mammalian genes and proteins, and molecular genetic approaches to understanding eukaryotic development and human disease. *Prerequisites:* Chem. 114A-C or consent of instructor. (May not be offered every year.)

115. Modeling Biological Macromolecules (4)

Use of computer graphics and modeling methods in the study of biological macromolecules. The course will cover basic methods and techniques. The objective is to provide a good working knowledge of the critical features of the methods and to provide a foundation for further study for those who wish to pursue these methods as research topics. *Prerequisite:* Chem. 114A or equivalent. (May not be offered every year.)

116. Chemistry of Enzyme Catalyzed Reactions (4)

A discussion of the chemistry of representative enzyme catalyzed reactions is presented. Enzyme reaction mechanisms and their relation to enzyme structure are emphasized. *Prerequisites:* Chem. 140A-C, 114A, and 126 or 131. (May not be offered every year.)

118. Pharmacology and Toxicology (4)

A survey of the biochemical action of drugs and toxins as well as their absorption and excretion. *Prerequisites:* Chem. 140C or 141C; and Chem. 114C, or consent of instructor. Priorities will be given to PharmChem majors.

120A. Inorganic Chemistry I (4)

The chemistry of the main group elements in terms of atomic structure, ionic and covalent bonding. Structural theory involving s, p, and unfilled d orbitals. Thermodynamic and spectroscopic criteria for structure and stability of compounds and chemical reactions of main group elements in terms of molecular structure and reactivity. *Prerequisite:* a general chemistry course. Chem. 140A or 141A or equivalent course is recommended. (F)

120B. Inorganic Chemistry II (4)

A continuation of the discussion of structure, bonding, and reactivity with emphasis on transition metals and other elements using filled d orbitals to form bonds. Coordination chemistry in terms of valence bond, crystal field, and molecular orbital theory. The properties and reactivities of transition metal complexes including organometallic compounds. *Prerequisite:* Chem. 120A. (W)

123. Advanced Inorganic Chemistry Laboratory (4)

Synthesis, analysis, and physical characterization of inorganic chemical compounds. A materials fee is required for this course. *Prerequisites:* Chem. 120A, 143AM or 143A, and 143B. Chem. 120B and 143B may be taken concurrently. (W, S)

124. Bioinorganic Chemistry (4)

The role of metal ions in biological systems, with emphasis on transition metal ions in enzymes that transfer electrons, bind oxygen, and fix nitrogen. Also included are metal complexes in medicine, toxicity, and metal ion storage and transport. *Prerequisite:* Chem. 6C or 6CH. Recommended: Chem. 114A and 120A. (May not be offered every year.)

126. Physical Chemistry (4)

An introduction to physical chemistry with emphasis on biochemical and environmental applications.

Quantum mechanics and molecular structure, spectroscopy. *Prerequisites: Phys. 2D and Math. 20D or 21D; or consent of instructor.* (F)

127. Physical Chemistry (4)

An introduction to physical chemistry with emphasis on biochemical and environmental applications. Thermodynamics, first and second laws, thermochemistry, chemical equilibrium, solutions, kinetic theory, reaction kinetics. *Prerequisite: Chem. 126 or consent of instructor.* (W)

131. Physical Chemistry (4)

Thermodynamics, chemical equilibrium, phase equilibrium, chemistry of solutions. *Prerequisites: Math. 20C or 21C, and Phys. 2B. Recommended: Math. 20D or 21D, and Phys. 2D.* (F)

132. Physical Chemistry (4)

Chemical statistics, kinetic theory, reaction kinetics. *Prerequisites: Math. 20D or 21D, and Phys. 2B. Recommended: Phys. 2D.* (W)

133. Physical Chemistry (4)

Quantum mechanics, atomic and molecular spectroscopy, molecular structure. *Prerequisites: Chem. 132 and Phys. 2D; or Chem. 6C, Math. 20D or 21D, Math. 20F, and Phys. 2AB; or consent of instructor.* (S)

134. Computer Programming in Chemistry (4)

Use of computer programming in the analysis and presentation of chemical data (statistical analysis, least squares fitting procedures, titration curve interpretation, analysis of radioactive decay series, chemical kinetics, organic synthesis, etc.) *Prerequisites: Math. 20A and 20B or equivalent.* (Note: Students may not receive credit for both Chem. 134 and BIBC 115.) (May not be offered every year.)

135. Molecular Spectroscopy (4)

Time-dependent behavior of systems; interaction of matter with light; selection rule. Radiative and nonradiative processes, coherent phenomena, and the density matrices. Instrumentation, measurement, and interpretation. *Prerequisites: Chem. 133 or equivalent. Math. 20D or 21D, or Chem. 190/290.* (May not be offered every year.)

140A. Organic Chemistry I (4)

Introduction to organic chemistry, with applications to biochemistry. Bonding theory, isomerism, stereochemistry, chemical and physical properties. Introduction to substitution, addition, and elimination reactions. Students may not receive credit for both Chem. 140A and Chem. 141A. *Prerequisite: Chem. 6C or equivalent course in general chemistry.* (F,W,S)

140B. Organic Chemistry II (4)

Continuation of Organic Chemistry I, 140A. Methods of analysis, chemistry of hydrocarbons, chemistry of the carbonyl group. Introduction to the reactions of biologically important molecules. Students may not receive credit for both Chem. 141B and Chem. 140B. *Prerequisite: Chem. 140A (a grade of C or higher in Chem. 140A is strongly recommended).* (F,W,S)

140C. Organic Chemistry III (4)

Continuation of Organic Chemistry I (140A) and Organic Chemistry II (140B). Organic chemistry of biologically important molecules: carboxylic acids, carbohydrates, proteins, fatty acids, biopolymers, natural products. Students may not receive credit for both Chem. 140C and Chem. 141C. *Prerequisite: Chem. 140B (a grade of C or higher in Chem. 140B is strongly recommended).* (F,W,S)

141A. Organic Chemistry (4)

Chem. 141A introduces theoretical and experimental studies of structure and properties of covalent molecules. Both resonance and simple molecular orbital descriptions of organic compounds are introduced and spectroscopic methods for determining electronic and molecular structure are discussed. Organic reactions are introduced with synthetic and mechanistic examples. *Prerequisite: Chem. 6C (6C may be taken concurrently by good students). Prior or concurrent physics recommended.* (Note: Students may not receive credit for both Chem. 141A and Chem. 140A.) (F)

141B. Organic Chemistry (4)

A continuation of Chem. 141A, this course applies the structure-reactivity, spectroscopy, and electronic theories introduced in Chem. 141A to organic reactions. *Prerequisite: Chem. 141A or consent of instructor.* (Note: Students may not receive credit for both Chem. 141B and Chem. 140B.) (W)

141C. Organic Chemistry (4)

A continuation of Chem. 141A-B, this course treats selected topics such as carbon-metal bonds, organometallic chemistry, electrophilic reactions, free radical reactions, alkane chemistry, polymerization, molecular orbital theory and electrocyclic reactions, photochemistry, unstable intermediates such as carbenes, benzyne, etc., and metal oxidation reactions, and an introduction to carbohydrate and protein chemistry. *Prerequisite: Chem. 141B or consent of instructor.* (Note: Students may not receive credit for both Chem. 141C and Chem. 140C.) (S)

143A. Organic Chemistry Laboratory (4)

Introduction to organic laboratory techniques. Separation, and purification, spectroscopy, product analysis, and effects of reaction conditions. *Prerequisites: Chem. 6BL and Chem. 140A or Chem. 141A.* A materials fee is required. A mandatory safety exam must be passed within the first two weeks. (Note: Students may not receive credit for both Chem. 143A and Chem. 143AH.) (F,W,S)

143AH. Honors Organic Chemistry Laboratory (4)

Organic chemistry laboratory for chemistry majors and other honors-level students with strong background in Chem. 140A. Similar to Chem. 143A, but emphasizes instrumental methods of product identification, separation, and analysis. *Prerequisites: Chem. 6BL and "B" or better grade in Chem. 140A.* A materials fee is required. A mandatory safety exam must be passed within the first two weeks. (Note: Students may not receive credit for both Chem. 143A and Chem. 143AH.) (W)

143B. Organic Chemistry Laboratory (4)

Continuation of Chem. 143AM or 143A, emphasizing synthetic methods of organic chemistry. *Prerequisites: Chem. 143AM or 143A, Chem. 140B (may be taken concurrently).* Enrollment is limited to majors in the Department of Chemistry and Biochemistry, unless space is available. A materials fee is required for this course. (W,S)

143C. Organic Chemistry Laboratory (5)

Identification of unknown organic compounds by a combination of chemical and physical techniques. This course is intended for chemistry majors only. *Prerequisites: Chem. 6CL and 143 AM or 143A or equivalent (may be taken concurrently); 143B recommended.* A materials fee is required for this course. (F)

143D. Molecular Design and Synthesis (4)

Advanced organic synthesis. Relationships between molecular structure and reactivity using modern syn-

thetic methods and advanced instrumentation. Stresses importance of molecular design, optimized reaction conditions for development of practically useful synthesis, and problem-solving skills. *Prerequisites: Chem. 140C and Chem. 143B.* A materials fee is required for this course. (S)

149A. Environmental Chemistry (4)

The chemical basis of air and water pollution, chlorofluorocarbons and the ozone hole, the environmental impact of radioactive waste disposal, mineral resource usage, and nuclear energy. *Prerequisite: Chem. 6C or 6CH or equivalent.* (F)

149B. Environmental Chemistry (4)

Agricultural productivity, biological impact on the environment, deforestation, environmental disasters (fires, nuclear winter, and volcanoes), and organic waste handling. *Prerequisite: Chem. 149A.* (W)

152. Synthetic Methods in Organic Chemistry (4)

(Formerly Chem. 148) A survey of reactions of particular utility in the organic laboratory. Emphasis is on methods of preparation of carbon-carbon bonds and oxidation reduction sequences. *Prerequisite: Chem. 140C or Chem. 141C or consent of instructor.*

154. Mechanisms of Organic Reactions (4)

(Formerly Chem. 147) A qualitative approach to the mechanisms of various organic reactions; substitutions, additions, eliminations, condensations, rearrangements, oxidations, reductions, free-radical reactions, and photochemistry. Includes considerations of molecular structure and reactivity, synthetic methods, spectroscopic tools, and stereochemistry. The topics emphasized will vary from year to year. This is the first quarter of the advanced organic chemistry sequence. *Prerequisite: Chem. 140C or 141C.*

155. Synthesis of Complex Molecules (4)

(Formerly Chem. 144) This course discusses planning economic routes for the synthesis of complex organic molecules. The uses of specific reagents and protecting groups will be outlined as well as the control of stereochemistry during a synthesis. Examples will be selected from the recent literature. (May not be offered every year.) *Prerequisite: Chem. 152 or 252 or consent of instructor.*

156. Structure and Properties of Organic Molecules (4)

(Formerly Chem. 145) Introduction to the measurement and theoretical correlation of the physical properties of organic molecules. Topics covered include molecular geometry, molecular-orbital theory, orbital hybridization, aromaticity, chemical reactivity, stereochemistry, infrared and electronic spectra, photochemistry, and nuclear magnetic resonance. *Prerequisites: Chem. 140A-B-C or 141A-B-C or the equivalent.*

157. Bioorganic and Natural Products Chemistry (4)

(Formerly Chem. 142) A comprehensive survey of modern bioorganic and natural products chemistry. Topics will include biosynthesis of natural products, molecular recognition, and small molecule-biomolecule interactions. *Prerequisite: Chem. 140C or 141C or 254 or consent of the instructor.*

161. Supramolecular Coordination Chemistry (4)

An introduction and survey of modern coordination chemistry. Topics will include structure and bonding of alkali, transition, lanthanide and actinide metals, with emphasis on the first row transition metals; stereochemistry, coordination clusters, molecular solids and nanoparticles. *Prerequisites: Chem. 120A and 120B or equivalent.*

166. Environmental and Molecular Toxicology (4)

Molecular and cellular mechanisms underlie the actions of environmental toxicants. This course will investigate approaches to study the impact of environmental toxicants on human health. Other modern approaches that are being implemented to detect and remediate environmental toxicants will also be examined. *Prerequisites:* Chem. 114A-B.

168. Bioenergetics (4)

Chemiosmotic processes in mitochondria and photosynthetic organelles, structure-function relationships of membrane protein apoptosis, a refined view of mitochondrial structure deduced from electron tomography, and the role of proteins encoded by mitochondrial DNA in oxidative phosphorylation. *Prerequisites:* Chem. 114A and Chem. 114B (or equivalents).

170. Cosmochemistry (4)

Composition of stars, of planets, of meteorites, and the earth. Nuclear stability rules and isotopic composition of the elements. Chemical properties of solar matter. Origin of the elements and of the solar system. *Prerequisite:* general chemistry sequence.

171. Nuclear and Radiochemistry (4)

Radioactive decay, stability systematics, neutron activation, nuclear reactions. Szilard-Chalmers reactions, hot-atom chemistry, radiation chemistry, effects of ionizing radiation. *Prerequisite:* general chemistry sequence.

173. Atmospheric Chemistry (4)

Chemical principles applied to the study of atmospheres. Atmospheric photochemistry, radical reactions, chemical lifetime determinations, acid rain, greenhouse effects, ozone cycle, and evolution are discussed. *Prerequisites:* Chem. 6A-6C or 6AH, 6BH, and 6CH, or equivalent. (S)

182. Biological Databases (4)

This course provides an introduction to the features of biological data, how those data are organized efficiently in databases, and how existing data resources can be utilized to solve a variety of biological problems. Object oriented databases, data modeling, and description. Survey of current biological database with respect to above, implementation of database on a biological topic. *Prerequisite:* CSE 100 or Math. 176. *Bioinformatics majors only.*

184. Computational Molecular Biology (4)

This advanced course covers the application of machine learning and modeling techniques to biological systems. Topics include gene structure, recognition of DNA and protein sequence patterns, classification, and protein structure prediction. Pattern discovery, Hidden Markov models/support vector machines/neural network/profiles, protein structure prediction, functional characterization of proteins, functional genomics/proteomics, metabolic pathways/gene networks. *Prerequisites:* BIMM 181 or BENG 181 or CSE 181; BIMM 182 or BENG 182 or CSE 182 or CHEM 182. *Bioinformatics majors only.*

185. Introduction to Computational Chemistry (4)

Course in computational methods building on a background in mathematics and physical chemistry. Brief introduction and background in computational theory, molecular mechanics, semi-empirical methods, and ab initio-based methods of increasing elaboration. Emphasis on applications and reliability. *Prerequisites:* Chem. 126 or 133 and Math. 20C or 21C. (May not be offered every year.)

190. Mathematical Methods in Chemistry I (4)

Applied mathematics useful in kinetics, spectroscopy, thermodynamics, statistical mechanics and quantum mechanics; ordinary and partial differential equations, vector spaces, operators, linear algebra, numerical analysis. *Prerequisites:* general chemistry, calculus. (May not be offered every year.)

195. Methods of Teaching Chemistry (4)

An introduction to teaching chemistry. Students are required to attend a weekly class on methods of teaching chemistry, and will teach a discussion section of one of the lower-division chemistry courses. Attendance at lecture of the lower-division course in which the student is participating is required. (P/NP grades only.) *Prerequisite:* consent of instructor. (F,W,S)

196. Reading and Research in Chemical Education (2 or 4)

Independent literature or classroom research by arrangement with, and under the direction of, a member of the Department of Chemistry and Biochemistry faculty. Students must register on a P/NP basis. *Prerequisites:* upper-division standing, 2.5 minimum GPA, consent of instructor and department. (F,W,S)

199. Reading and Research (2 or 4)

Independent literature or laboratory research by arrangement with, and under the direction of, a member of the Department of Chemistry and Biochemistry faculty. Students must register on a P/NP basis. *Prerequisites:* upper-division standing, 2.5 minimum GPA, consent of instructor and department. (F,W,S)

GRADUATE

207. Modern NMR Methods (4)

Treats varied pulse sequences, one- and two-dimensional methods, interpretation of relaxation rates, spin-decoupling, multiple quantum filtering, and solvent suppression with application to liquid crystals, membranes, small molecules, proteins, and nucleic acids. *Prerequisite:* does not require extensive mathematics, but Chem. 130 recommended. (May not be offered every year.)

209. Macromolecular Recognition (4)

Structures and functions of nucleic acids, folding and catalysis of nucleic acids, motifs and domains of proteins, principles of protein-protein interactions, chemistry of protein/DNA and protein/RNA interfaces, conformational changes in macromolecular recognition. *Prerequisites:* biochemistry background and graduate standing, or approval of instructor.

211. Metabolic Biochemistry (4)

A comprehensive course in biochemistry emphasizing metabolic and human biochemistry. *Prerequisites:* physical and organic chemistry; graduate standing. (F)

213. Chemistry of Biological Macromolecules (4)

A discussion of the structural principles governing biological macromolecules, the techniques used in their study, and how their functional properties depend on three-dimensional structure. Chem. 213 students will be required to complete additional coursework beyond that expected of students in Chem. 113. *Prerequisites:* elementary physical and organic chemistry. (May not be offered every year.)

214. Molecular and Cellular Biochemistry (4)

This course represents a continuation of 114C, or an introductory course for first- and second-year graduate students, and covers topics in molecular and cellular

biochemistry. Emphasis will be placed on contemporary approaches to the isolation and characterization of mammalian genes and proteins, and molecular genetic approaches to understanding eukaryotic development and human disease. Chem. 214 students will be required to complete additional coursework beyond that expected of students in Chem. 114D. *Prerequisite:* Chem. 114A-C or consent of instructor. (May not be offered every year.)

215. Modeling Biological Macromolecules (4)

Use of computer graphics and modeling methods in the study of biological macromolecules. The course will cover basic methods and techniques. The objective is to provide a good working knowledge of the critical features of the methods and to provide a foundation for further study for those who wish to pursue these methods as research topics. Chem. 215 students will be required to complete additional coursework beyond that expected of students in Chem. 115. *Prerequisite:* Chem. 114A or equivalent. (May not be offered every year.)

216. Chemistry of Enzyme Catalyzed Reactions (4)

A discussion of the chemistry of representative enzyme catalyzed reactions is presented. Enzyme reaction mechanisms and their relation to enzyme structure are emphasized. Chem. 216 students will be required to complete additional coursework beyond that expected of students in Chem. 116. *Prerequisites:* Chem. 140A-B-C, 114A and 126 or 131. (May not be offered every year.)

218. Macromolecular Biochemistry (4)

A comprehensive course in biochemistry emphasizing structural biochemistry. *Prerequisites:* physical and organic chemistry; graduate-student standing. (F)

219. Special Topics in Biochemistry (4)

This special topics course is designed for first-year graduate students in biochemistry. Topics presented in recent years have included protein processing, the chemical modification of proteins, the biosynthesis and function of glycoproteins, lipid biochemistry and membrane structure, and bioenergetics. *Prerequisites:* undergraduate courses in biochemistry, Chem. 114A or equivalent. (May not be offered every year.)

221. Signal Transduction (4)

The aim of this course is to develop an appreciation for a variety of topics in signal transduction. We will discuss several historical developments while the focus will be on current issues. Both experimental approaches and results will be included in our discussions. Topics may vary from year to year. *Prerequisites:* biochemistry and molecular biology. (May not be offered every year.)

222. Structure and Analysis of Solids (4)

Key concepts in the atomic structure and bonding of solids such as metals, ceramics, and semiconductors. Symmetry operations, point groups, lattice types, space groups, simple and complex inorganic compounds, structure/property comparisons, structure determination with X-ray diffraction. Ionic, covalent, metallic bonding compared with physical properties. Atomic and molecular orbitals, bands versus bonds, free electron theory.

223. Organometallic Chemistry (4)

A survey of this field from a synthetic and mechanistic viewpoint. Reactivity patterns for both main group and transition element organometallic compounds

will be discussed and organized according to periodic trends. (May not be offered every year.)

224. Spectroscopic Techniques (4)

Application of physical techniques to the elucidation of the structure of inorganic complex ions and organometallic compounds. Topics covered include group theory, and its application to vibrational, magnetic resonance and Raman spectroscopy. (May not be offered every year.)

225. Bioinorganic Chemistry (4)

The role of metal ions in biological systems, with emphasis on transition metal ions in enzymes that transfer electrons, bind oxygen, and fix nitrogen. Also included are metal complexes in medicine, toxicity, and metal ion storage and transport. Chem. 225 students will be required to complete an additional paper and/or exam beyond that expected of students in Chem. 124. *Prerequisite: Chem. 6C or 6CH. Chem. 114A and 120A recommended.* (May not be offered every year.)

227. Seminar in Inorganic Chemistry (2)

Seminars presented by faculty and students on topics of current interest in inorganic chemistry, including areas such as bioinorganic, organometallic and physical-inorganic chemistry. The course is designed to promote a critical evaluation of the available data in specialized areas of inorganic chemistry. Each quarter three or four different topics will be discussed. *Prerequisite: graduate standing or consent of instructor.* (S/U grades only.)

228. Solid State Chemistry (4)

Survey of the chemistry of semiconductors, superconductors, molecular magnetic materials, zeolites, fast ion conductors, electronically conducting polymers and ceramics. Synthetic techniques such as molecular precursor design, the sol-gel process, electrosynthesis, and high-temperature thermolysis will be covered. (May not be offered every year.)

229. Special Topics in Inorganic Chemistry (2-4)

Selection of topics of current interest. May be repeated for credit when topics vary. (May not be offered every year.)

230. Quantum Mechanics (4)

Concepts and mathematical formalism that are useful for problems of chemical interest: states, representations, operators, eigenvalues and eigenfunctions, time evolution, observables, and measurements. Time-independent perturbation theory. *Prerequisites: Chem. 133 or equivalent; Math. 20D or equivalent; Chem. 190 may be taken concurrently.* (May not be offered every year.)

231. Chemical Kinetics and Molecular Reaction Dynamics (4)

Classical kinetics, transition state theory, unimolecular decomposition, potential energy surfaces; scattering processes and photodissociation processes. *Prerequisite: Chem. 230.* (May not be offered ever year.)

232. Statistical Mechanics of Chemical Systems (4)

Equilibrium statistical mechanics, distribution functions, and partition functions. Boltzman, Bose, and Fermi statistics. The different ensembles; ensemble averages and QM expectation values; derivation of thermodynamic properties of simple systems. *Prerequisites: Chem. 131, 132 and 133, or equivalent.* (May not be offered every year.)

235. Molecular Spectroscopy (4)

Time-dependent behavior of systems; interaction of matter with light; selection rule. Radiative and nonradiative processes, coherent phenomena and the density matrices. Instrumentation, measurement, and interpretation. Chem. 235 students will be required to complete additional coursework beyond that expected of students in Chem. 135. *Prerequisites: Chem. 133 or equivalent; Math. 20D or 21D; or Chem. 190/290.* (May not be offered every year.)

237. Essentials of Glycobiology (4)

Advanced elective for graduate/medical students who have had core courses in cell biology or biochemistry. Expert faculty will present a coordinated overview of the field of glycobiology, which explores the structure, synthesis, and functions of sugar chains in biological systems. (May not be offered every year.)

239. Special Topics in Chemical Physics (2-4)

Topics of special interest will be presented. Examples include NMR, solid-state chemistry, phase transitions, stochastic processes, scattering theory, nonequilibrium processes, tensor transformations, and advanced topics in statistical mechanics, thermodynamics, and chemical kinetics. (May not be offered every year.)

240. Electrochemistry (4)

Application of electrochemical techniques to chemistry research. Basic electrochemical theory and instrumentation: the diffusion equations, controlled potential, and current methods. Electro-chemical kinetics, Butler-Volmer, Marcus-Hush theories, preparative electrochemistry, analytical electrochemistry, solid and polymer electrolytes, semiconductor photoelectrochemistry. (May not be offered every year.)

246. Kinetics and Mechanism (4)

Methodology of mechanistic organic chemistry: integration of rate expressions, determination of rate constants, transition state theory; catalysis, kinetic orders, isotope effects, substituent effects, solvent effects, linear free energy relationship; product studies, stereochemistry; reactive intermediates; rapid reactions. (May not be offered every year.)

250. Seminar in Chemistry (2)

Regularly scheduled seminars by first-year graduate students provide opportunities for practice in seminar delivery and for the exploration of topics of general interest. (S/U grades only.) (S)

251. Research Conference (2)

Group discussion of research activities and progress of the group members. *Prerequisite: consent of instructor.* (S/U grades only.) (F,W,S)

252. Synthetic Methods in Organic Chemistry (4)

(Formerly Chem. 248) A survey of reactions of particular utility in the organic laboratory. Emphasis is on methods of preparation of carbon-carbon bonds and oxidation reduction sequences. Chem. 252 students will be required to complete additional coursework beyond that expected of students in Chem. 152. *Prerequisite: Chem. 140C or 141C or consent of instructor.*

254. Mechanisms of Organic Reactions (4)

(Formerly Chem. 247) A qualitative approach to the mechanisms of various organic reactions; substitutions, additions, eliminations, condensations, rearrangements, oxidations, reductions, free-radical reactions, and photochemistry. Includes considerations of molecular structure and reactivity, synthetic methods, spectroscopic tools, and stereochemistry. The topics emphasized will vary from year to year. This is the first quarter of the advanced organic chemistry sequence. Chem. 254 students will be required to complete an

additional paper and/or exam beyond that expected of students in Chem. 154. *Prerequisite: Chem. 140C or 141C or graduate standing.*

255. Synthesis of Complex Molecules (4)

(Formerly Chem. 244) This course discusses planning economic routes for the synthesis of complex organic molecules. The uses of specific reagents and protecting groups will be outlined as well as the control of stereochemistry during a synthesis. Examples will be selected from the recent literature. Chem. 255 students will be required to complete an additional paper and/or exam beyond that expected of students in Chem. 155. (May not be offered every year.) *Prerequisite: Chem. 152 or 252 or consent of instructor.*

256. Structure and Properties of Organic Molecules (4)

(Formerly Chem. 245) Introduction to the measurement and theoretical correlation of the physical properties of organic molecules. Topics covered include molecular geometry, molecular-orbital theory, orbital hybridization, aromaticity, chemical reactivity, stereochemistry, infrared and electronic spectra, photochemistry, and nuclear magnetic resonance. Chem. 256 students will be required to complete an additional paper and/or exam beyond that expected of students in Chem. 156. *Prerequisites: Chem. 140A-B-C or 141A-B-C or the equivalent.*

257. Biorganic and Natural Products Chemistry (4)

(Formerly Chem. 242) A comprehensive survey of modern bioorganic and natural products chemistry. Topics include biosynthesis of natural products, molecular recognition, and small molecule-biomolecule interactions. Chem. 257 students will be required to complete additional coursework beyond that expected of students in Chem. 157. *Prerequisites: Chem. 140C or 141C, 254 or consent of instructor.*

258. Applied Spectroscopy (4)

Intensive coverage of modern spectroscopic techniques used to determine the structure of organic molecules. Problem solving and interpretation of spectra will be strongly emphasized. *Prerequisite: Chem. 254 or consent of instructor.*

259. Special Topics in Organic Chemistry (2-4)

(Formerly Chem. 249) Various advanced topics in organic chemistry. Includes but is not limited to: advanced kinetics, advanced spectroscopy, computational chemistry, heterocyclic chemistry, medicinal chemistry, organotransition metal chemistry, polymers, solid-phase synthesis/combinatorial chemistry, stereochemistry, and total synthesis classics.

261. Supramolecular Coordination Chemistry (4)

An introduction and survey of modern coordination chemistry. Topics will include structure and bonding of alkali, transition, lanthanide, and actinide metals, with emphasis on the first row transition metals; stereochemistry, coordination clusters, molecular solids and nanoparticles. Chem. 261 students will be required to complete additional coursework beyond that expected of students in Chem. 161. *Prerequisites: Chem. 120A, 120B or equivalent; or graduate standing.*

262. Inorganic Chemistry and NMR (4)

A survey of inorganic chemistry to prepare for graduate research in the field, including a detailed introduction to nuclear magnetic resonance (NMR), followed by applications of NMR to structural and mechanistic problems in inorganic chemistry.

266. Environmental and Molecular Toxicology (4)

Molecular and cellular mechanisms underlie the actions of environmental toxicants. This course will

investigate approaches to study the impact of environmental toxicants on human health. Other modern approaches that are being implemented to detect and remediate environmental toxicants will also be examined. Chem. 266 students will be required to complete an additional paper and/or exam beyond that expected of students in Chem. 166. (W)

268. Bioenergetics (4)

Chemiosmotic processes in mitochondria and photosynthetic organelles, structure-function relationships of membrane protein apoptosis, a refined view of mitochondrial structure deduced from electron tomography and the role of proteins encoded by mitochondrial DNA in oxidative phosphorylation. Chem. 268 students will be required to complete additional coursework beyond that expected of students in Chem. 168. *Prerequisites:* Chem. 114 A and Chem. 114B (or equivalents).

270A-B-C. Current Topics in Environmental Chemistry (2-2-2)

Seminar series on the current topics in the field of environmental chemistry. Emphasis is on current research topics in atmospheric, oceanic, and geological environments. *Prerequisite:* consent of instructor. (S/U grades only.) (May not be offered every year.)

271. Special Topics in Analytical Chemistry (4)

Topics of special interest in analytical chemistry. May include, but is not limited to, chemical separation, sample introductions, mass analyzers, ionization schemes, and current state-of-the-art applications in environmental and biological chemistry.

273. Atmospheric Chemistry

Chemical principles applied to the study of atmospheres. Atmospheric photochemistry, radical reactions, chemical lifetime determinations, acid rain, greenhouse effects, ozone cycle, and evolution are discussed. Chem. 273 students will be required to complete additional coursework beyond that expected of students in Chem. 173. *Prerequisites:* Chem. 6A-B-C, or Chem. 6AH, 6BH and 6CH, or equivalent, or graduate standing. (S)

285. Introduction to Computational Chemistry (4)

Course in computational methods building on a background in mathematics and physical chemistry. Brief introduction and background in computational theory, molecular mechanics, semi-empirical methods, and ab initio-based methods of increasing elaboration. Emphasis on applications and reliability. Chem. 285 students will be required to complete an additional paper and/or exam beyond that expected of students in Chem. 185. *Prerequisites:* Chem. 126 or 133 and Math. 20C or 21C. (May not be offered every year.)

290. Mathematical Methods in Chemistry I (4)

Applied mathematics useful in kinetics, spectroscopy, thermodynamics; statistical mechanics, and quantum mechanics; ordinary and partial differential equations, vector spaces, operators, linear algebra, numerical analysis. Chem. 290 students will be required to complete additional coursework beyond that expected of students in Chem. 190. *Prerequisites:* general chemistry, calculus. (May not be offered every year.)

293. Cosmochemistry Seminar (2)

Formal seminars or informal sessions on topics of current interest in cosmochemistry as presented by visiting lecturers, local researchers, or students. *Prerequisite:* advanced graduate-student standing. (S/U grades only.)

294. Organic Chemistry Seminar (2)

Formal seminars or informal puzzle sessions on topics of current interest in organic chemistry, as presented

by visiting lecturers, local researchers, or students. *Prerequisite:* advanced graduate-student standing. (S/U grades only.) (F,W,S)

295. Biochemistry Seminar (2)

Formal seminars or informal puzzle sessions on topics of current interest in biochemistry, as presented by visiting lecturers, local researchers, or students. *Prerequisite:* graduate-student standing. (S/U grades only.)

296. Chemical Physics Seminar (2)

Formal seminars or informal sessions on topics of current interest in chemical physics as presented by visiting lecturers, local researchers, or students. *Prerequisite:* advanced graduate-student standing. (S/U grades only.) (F,W,S)

297. Experimental Methods in Chemistry (4)

Experimental methods and techniques involved in chemical research are introduced. Hands-on experience provides training for careers in industrial research and for future thesis research. *Prerequisite:* graduate-student standing. (S/U grades only.)

298. Special Study in Chemistry (1-4)

Reading and laboratory study of special topics for first-year graduate students under the direction of a faculty member. Exact subject matter to be arranged in individual cases. (S/U grades only.) *Prerequisite:* first-year graduate-student standing. (F,W,S)

299. Research in Chemistry (1-12)

Prerequisites: graduate standing and consent of instructor. (S/U grades only.) (F,W,S)

500. Teaching in Chemistry (4)

A doctoral student in chemistry is required to assist in teaching undergraduate chemistry courses. One meeting per week with instructor, one or more meetings per week with assigned class sections or laboratories, and attendance at the lecture of the undergraduate course in which he or she is participating. *Prerequisites:* graduate standing and consent of instructor. (S/U grades only.) (F,W,S)

Chicano/a-Latino/a Arts and Humanities Minor (CLAH)

OFFICE: 270 Pepper Canyon Hall

THE MINOR

The Chicano/a-Latino/a Arts and Humanities minor is an interdisciplinary minor that provides a broad introduction to the histories and cultural artifacts produced by Spanish-speaking communities in the United States. Through a coordinated course of study drawing upon course offerings in the Departments of Theatre and Dance, Ethnic Studies, Communication, History, Literature, and other departments, students will gain an understanding of this important segment of the U.S. population.

REQUIREMENTS

Students will have a minimum of two years or the equivalent of Spanish language instruction (Satisfactory completion of Lit/Spanish 2A, B, C or Lit/Span 2D will satisfy this requirement). Students may count one lower-division language course (four units) towards the total unit requirement.

Students will complete twenty-eight total units of which at least twenty (five courses) must be upper-division. Students may take no more than three upper-division courses in any one department. The required distribution of the five upper-division courses may be selected from among the following courses. Students may petition to receive credit for courses not listed below.

COURSES (PARTIAL LIST)

ETHNIC STUDIES

(Note: Many ETHN courses are cross-listed courses from other departments)

- ETHN 101. *Ethnic Images in Film*
- ETHN 105. *Ethnic Diversity and the City*
- ETHN 140. *Language and American Ethnicity*

ETHN 141. Language, Culture, and Inequality

ETHN 189. Special Topics in Ethnic Studies

HISTORY

HILD 7C. History of Race and Ethnicity in the U.S.

HIUS 167. Topics in Mexican American History

HIUS 180. Colloquium on the Recent History of Immigration, Ethnicity, and Citizenship in the Twentieth-Century U.S.

HILA 158. Social and Economic History of the Southwest I

HILA 159. Social and Economic History of the Southwest II

HILA 131. History of Mexico

HILA 132. Contemporary Mexico

HILA 122. Cuba

LITERATURE

The following courses are taught in Spanish-Literature Spanish (LTSP):

LTSP 130B. Introduction to Latin American Literature

LTSP 135B. Modern Mexican Literature

LTSP 136. Andean Literature

LTSP 137. Caribbean Literature

LTSP 150A. Early Latino/a and Chicano/a Cultural Production 1848-1960

LTSP 150B. Contemporary Latino/a and Chicano/a Cultural Production 1960 to present

LTSP 151. Topics in Chicano/a and Latino/a Cultures

LTSP 153. Chicano/a and Latino/a Poetry

LTSP 154. Chicano/a and Latino/a Literatures

LTSP 162. Spanish Language in the U.S.

The following courses are taught in Literature English (LTEN) and Literature of the Americas (LTAM):

LTEN 180. Chicano Literature in English

LTAM 100. Latino/a Cultures in the United States

LTAM 101. Early Latino/a and Chicano/a Cultures: 1848-1960

LTAM 102. Contemporary Latino/a and Chicano/a Cultural Production 1960 to present

LTAM 105. Gender and Sexuality in Chicano/a and Latino/a Cultural Production

LTAM 106. Modern Chicana and Mexican Women Writers

LTAM 107. Comparative Latino/a and U.S. Ethnic Cultures

LTAM 108. Chicano/a and Latino/a Cultures: Intellectual and Political Traditions

LTAM 109. Cultural Production of the Latino/a Diasporas

LTAM 110. Latin American Literature in Translation

LTAM 120. Mexican Literature in Translation

MUSIC

MUS 13AM. World Music/Multicultural America

THEATRE AND DANCE

TDHT 108. Luis Valdez

TDHT 110. Chicano Dramatic Literature

TDHT 111. Hispanic-American Dramatic Literature

TDHT 112. Gay and Lesbian Themes in U.S. Latino Theater

VISUAL ARTS

VIS 126AN. Pre-Columbian Art of Ancient Mexico and Central America

VIS 126BN. The Art and Civilization of the Ancient Maya

VIS 126G. Problems in Mesoamerican Art History

VIS 126H. Problems in Ancient Maya Iconography and Inscriptions

- Pei-Chia Chen, M.A., *History*
- Qian He, *History*
- Xiao Wang, M.A., *History*

Chinese Studies is an interdisciplinary program that allows the student interested in China to utilize the university's offerings in various departments to build a major leading to a B.A. degree. In addition to coordinating courses in the various departments, the Program in Chinese Studies offers courses directly under its own auspices to round out the available offerings.

The Chinese Studies Program combines historical understanding with an emphasis on modern and contemporary China. The Chinese History Program has a strong specialization in late imperial and modern China. A full spectrum of courses on the politics, economics, society, and culture of today's China are offered. Another focal point of research interest is visual culture and cultural history in modern and pre-modern China. The interdisciplinary nature of the program (see departmental affiliation of the participating faculty) can accommodate students of a wide range of interests. In addition to our local resources, the University of California Education Abroad Program (EAP) and Opportunities Abroad Program (OAP) are affiliated with various universities and language institutes in China, Taiwan, Hong Kong, and Singapore. This, together with other academic exchange programs with a number of Chinese universities, provides the possibility of a junior year abroad, including both language courses and courses dealing with various aspects of Chinese studies. Subject to final approval by the program chair, EAP credits may be transferred back to UCSD to coordinate with on-campus offerings. However, at least six of the upper-division courses for the major must be taken at UCSD.

The Major Program

The student choosing a major in Chinese studies must meet the following requirements:

1. Two years of Mandarin Chinese (Chinese Studies 11-12-13 and 21-22-23 or equivalent).
2. History 10-11-12 (East Asian History)
3. Twelve upper-division courses in Chinese studies, including courses taken in at least three departments. At least one of these

COURSES

courses should be a seminar or colloquium in which students would be expected to write a substantial term paper. No more than six upper-division language courses count toward the major requirement.

4. As a rule, only courses taken for a letter grade can satisfy program requirements (major, minor). Exceptions are granted for Chinese Studies 198 and 199.

In principle, the courses included in the Program in Chinese Studies are those campus offerings dealing with China or the Chinese language. Most of the courses listed below are planned by participating departments for the 2004–2005 academic year.

Honors Program

Requirements for admission to the program are:

1. Junior standing
2. A GPA of 3.5 or better in the major
3. Overall GPA of 3.2 or better
4. Recommendation of a faculty sponsor familiar with the student's work
5. Completion of at least four upper-division courses approved by the Program in Chinese Studies
6. Completion of at least one year of Chinese language study

Students who qualify for honors take a two-quarter sequence of directed study during which they define a research project, carry out the research, and complete a senior thesis.

The completed thesis will be evaluated by a committee consisting of the student's thesis adviser and one other faculty member appointed by the Chinese studies program chair.

The Minor Program

A minor in Chinese studies consists of at least three lower-division courses (a minimum of twelve units) and four upper-division courses (a minimum of sixteen units) taken for a letter grade. These courses should be chosen from three programs or departments. No more than three language courses may apply toward the minor requirement. Only one non-language course taken abroad may be approved for fulfillment of the minor. A list of approved courses is available quarterly from the Program in Chinese Studies.

For course descriptions not found in the 2006–2007 General Catalog, please contact the department for more information.

COMMITTEE-SPONSORED COURSES

11-12-13. **First-Year Chinese** (5-5-5)

21-22-23. **Second-Year Chinese** (4-4-4)

111-112-113. **Third-Year Chinese** (4-4-4)

121-122-123. **Fourth-Year Chinese** (4-4-4)

Each of these year-long sequences begins in the fall term. Students wishing to take more than one Chinese language class in the same quarter must obtain approval from the head of the language program prior to enrolling in the second course.

All Chinese language courses have A, B, and C tracks for students with no Chinese language background; B track for students with some Mandarin Chinese language background; C track for students with Chinese language background other than Mandarin.

150. Intensive Summer Language and Culture Program in China (4)

Intensive language and cultural study in China. Program includes regularly scheduled language classes taught by UCSD faculty members; a cultural program of films, stage performances and lectures; and field trips to villages, urban industrial communities, and places of historical interest. All levels of language proficiency accepted. (Summer) Not offered in summer 2006.

160/260. Late Imperial and Twentieth-Century Chinese Historical Texts (4)

This course introduces the primary sources used by historians of Late Imperial and Twentieth-Century Chinese history. Reading material includes diaries, newspaper articles, Qing documents, gazetteers, essays, speeches, popular fiction, journal articles, scholarly prose, and field surveys. May be repeated for credit. (P/NP grades only.) *Prerequisite: advanced knowledge of Chinese language and consent of instructor.*

165A-B-C. Business Chinese (4-4-4)

Basic training in oral and written communication skills for business, including introduction to modern business terminology and social conventions. *Prerequisite: two years of Chinese language or equivalent.*

170. History of Science in China (4)

This course is designed to provide a coherent picture of aspects of the development of science in Chinese civilization from ancient times through the eighteenth century. The focus (mathematics, astronomy, medicine, chemistry, etc.) will shift from year to year.

181A. Introduction to Classical Chinese (4)

Introduction to the classical language through Confucius, Mencius, and the other Great Books. The emphasis will be on comprehension and reading ability. *Prerequisite: Chinese Studies 23 or equivalent.*

181B. Introduction to Classical Chinese (4)

Continuation of Chinese Studies 181A. *Prerequisite: Chinese Studies 181A or equivalent.*

181C. Introduction to Classical Chinese (4)

This course is a continuation of 181A and B. Short passages from major historical, literary, and philosophical works are introduced. *Prerequisite: Chinese Studies 181B or equivalent.*

182A. Intermediate Classical Chinese (4)

This course is a continuation of Introduction to Classical Chinese (181A-B-C). Selections from major works written in classical Chinese, such as Laozi, Shijing, etc., will be read. The course emphasizes the structures, function words, the analysis of each sentence, and the comprehension of texts. *Prerequisite: Chinese Studies 181A-B-C or equivalent.*

182B. Intermediate Classical Chinese (4)

This course is a continuation of 182A. Selections from Zhuangzi, Shiji, etc., will be taught. The course emphasizes the structures, function words, the analysis of each sentence, and the comprehension of texts. *Prerequisite: Chinese Studies 182A or equivalent.*

182C. Intermediate Classical Chinese (4)

This course is a continuation of 182B. Selections from I Ching, Hanshu, etc., will be introduced. The course emphasizes the structures, function words, the analysis of each sentence, and the comprehension of texts. *Prerequisite: Chinese Studies 182B or equivalent.*

185A-B-C. Readings in Chinese Culture and Society (4-4-4)

This course will enlarge a student's vocabulary and improve reading skills through studies of original writings and other media on Chinese culture and society, past and present. *Prerequisite: Chinese Studies 113 or consent of instructor.*

186A-B-C. Readings in Chinese Economics, Politics, and Trade (4-4-4)

Introduction to the specialized vocabulary relating to Chinese politics, trade, and development. Designed for students in the social sciences or with career interests in international trade, the course will stress reading and translating documents, and the special forms of business correspondence and oral negotiation. *Prerequisite: one year of Chinese.*

196. Directed Thesis Research (4)

B.A. honors thesis under the direction of a faculty member in Chinese studies. This course requires two quarters to complete. An IP grade will be awarded at the end of the first quarter. *Prerequisite: consent of instructor. (F,W,S)*

198. Directed Group Study in Chinese Studies (2 or 4)

Study of specific aspects in Chinese civilization not covered in regular course work, under the direction of faculty members in Chinese studies. (P/NP grades only.) *Prerequisite: consent of instructor. (F,W,S)*

199. Independent Study in Chinese Studies (2 or 4)

The student will undertake a program of research or advanced reading in selected areas in Chinese studies under the supervision of a faculty member of the Program in Chinese Studies. (P/NP grades only.) *Prerequisite: consent of instructor. (F,W,S)*

269. Conversational Mandarin for Medical Students—Beginning (2)

This introductory course is designed to develop a working knowledge of medical Mandarin that will

enable the student to communicate with Mandarin-speaking patients. There will be instruction in basic medical vocabulary and grammar, with a focus on taking a medical history. No previous knowledge of Mandarin is required since this is only a conversation course. For graduate and School of Medicine students. (S/U only.)

296. Directed Thesis Research (2-12)

Graduate thesis research under the guidance of a faculty member affiliated with the Program in Chinese Studies.

299. Independent Study in Chinese Studies (2-12)

Independent graduate research under the guidance of a faculty member affiliated with the Program in Chinese Studies.

500. Apprentice Teaching (1-4)

A course in which teaching assistants are aided in learning proper teaching methods by means of supervision of their work by the faculty; handling of discussions, preparation and grading of exams and other written exercises, and student relations. (S/U only.)

DEPARTMENT-SPONSORED COURSES

For description of courses listed below, see appropriate departmental listing. All graduate-level courses require consent of the instructor for undergraduate students. Some departmental offerings have content that varies from year to year. In those cases, Chinese Studies approval is given only when content relates primarily to China.

LOWER-DIVISION

- History HILD 10: East Asia: The Great Tradition (staff)
- History HILD 11: East Asia and the West (staff)
- History HILD 12: Twentieth-Century East Asia (staff)
- Literature/LTWL 4C: Fiction and Film in Twentieth-Century Societies: Asian Societies (Zhang)
- Music MUS 13AS: World Music: Asia and Oceania (Guy)

UPPER-DIVISION

I. CHINESE CULTURE AND SOCIETY

- Anthropology ANRG 170: Traditional Chinese Society (Jordan)
- Anthropology ANRG 173: Chinese Popular Religion (Jordan)
- History HIEA 119: Religion and Popular Culture in East Asia (Cahill)

Leslie Collins Edwards, Ph.D., *Classical Literature and Languages*

Eliot Wirshbo, Ph.D., *Classical Literature and Languages*

Classical studies is concerned with the cultures of ancient Greece and Rome—roughly from the time of Homer through the time of St. Augustine—in all of their aspects. This program thus offers undergraduates an opportunity to study the cultures of Greece and Rome through the combined resources of the Departments of History, Literature, Visual Arts, Theatre and Dance, and Philosophy. The study of the ancient Greek and Latin languages themselves serves as the starting point for the broader consideration of specific texts in their literary, intellectual, and historical context. In cooperation with the Judaic Studies Program, moreover, students are provided the opportunity to link the study of ancient Greece and Rome to that of the ancient Near East.

The Major Programs

The Classical Studies Program offers four different degree paths, three within classical studies and one in cooperation with Judaic studies. The majors are Greek, Latin, classics, and Greek and Hebrew. Each consists of a choice of twelve upper-division courses approved for the program and listed below. All courses used to meet requirements for a major in classical studies must be taken for a letter grade and be passed with a grade of C- or better.

GREEK

LTWL 19A-B-C are prerequisites to the Greek major. Six of the twelve upper-division courses must be LTGK courses numbered 100 and above, but exclusive of LTGK 101. The remaining six courses may be in classical civilization (in English translation), selected from the list of approved courses from history, Lit/World, philosophy, political science, and visual arts, though additional LTGK courses numbered 100 and above (including LTGK 101) are acceptable here. These must be from at least two departments and selected in consultation with the adviser; courses dealing with Greek civilization are strongly preferred.

LATIN

LTWL 19A-B-C are prerequisites to the Latin major. Six of the twelve upper-division courses must be LTLA courses numbered 100 and above, but exclusive of LTLA 101 and 102. The remaining six courses may be in classical civilization (in English translation), selected from the list of approved courses from history, Lit/World, philosophy, political science, and visual arts, though additional LTLA courses numbered 100 and above (including LTLA 101 and 102) are acceptable here. These must be from at least two departments and selected in consultation with the adviser; courses dealing with Roman civilization are strongly preferred.

CLASSICS

LTWL 19A-B-C are prerequisites to the classics major. Nine of the twelve upper-division courses must be distributed between LTLA and LTGK courses numbered 100 and above (but exclusive of LTLA 101 and 102 and LTGK 101), six in one literature and three in the other according to the student's emphasis. The remaining three courses may be in classical civilization (in English translation), selected from the list of approved courses from history, Lit/World, philosophy, political science, and visual arts, though additional LTLA or LTGK courses numbered 100 and above (including LTLA 101 and 102 and LTGK 101) are acceptable here. These must be from at least two departments and selected in consultation with the adviser to reflect the relative emphasis upon the Greek and Latin literatures, but with at least one focusing upon each culture.

GREEK AND HEBREW

Three courses from LTWL 19A-B-C and Cultural Traditions, Judaic 1A-B, to be selected in consultation with the adviser, are prerequisites to the Greek and Hebrew major. Nine of the twelve upper-division courses must be distributed between LTGK courses numbered 100 and above (but exclusive of LTGK 101) and Judaic Studies 101-102-103 or LTNE courses numbered 100 through 112, six in one literature and three in the other according to the student's emphasis. The remaining three courses may be in ancient Greek and Judaic civilization (in English translation), selected from the list of courses approved for classical studies and from the list of courses approved for Judaic studies, though additional LTGK courses numbered 100 and above (includ-

ing LTGK 101) or Judaic Studies 101-102-103 or LTNE courses numbered 100 through 112 are acceptable here. These must be from at least two departments and selected in consultation with the adviser (who is selected in accordance with the student's emphasis) to reflect the relative emphasis upon the Greek and Hebrew literatures, but with at least one course from each program.

The Minor Programs**CLASSICAL STUDIES:**

A minor in classical studies consists of seven courses from those listed below, of which at least four must be upper-division. A knowledge of the ancient languages is not required. The minor will normally include LTWL 19A-B-C: the Greco-Roman World, and four other courses from the participating departments.

Greek:

See Literature: "The Minor in Literature"

Latin:

See Literature: "The Minor in Literature"

Warren College

A Warren College program of concentration in classical studies normally consists of LTWL 19A-B-C and three of the upper-division courses listed below.

Graduate courses may be taken by undergraduates with consent of the instructor. The faculty of the program welcomes qualified undergraduates in graduate courses.

Additional courses counting toward a major in classical studies are offered on a year-to-year basis, both at the undergraduate and graduate levels. As these often cannot be listed in advance, interested students should consult the program faculty for an up-to-date list.

Honors in Greek, Latin, and Classics

Honors is intended for the most talented and motivated students majoring in Greek, Latin, classics, or Greek and Hebrew. Requirements for admission to the honors program are:

1. Junior standing
2. An overall GPA of 3.5

3. A GPA in the major of 3.7

Qualified students majoring in Greek, Latin, or classics may apply at the end of their junior year to the program faculty on the basis of 1) a thesis proposal (three to four pages) worked out in advance with a classical studies faculty member and 2) a recommendation from that faculty member. It is strongly advised that the proposal be based upon a class paper or project from a course taken towards completion of the major.

The core of the honors program is an honors thesis. The research and writing of the thesis will be conducted over the winter or fall and winter terms of the senior year. Up to four hours of 196 credit to this end may be counted towards the major in place of one of the courses in English translation. A thesis completed by the end of the winter quarter of the senior year will be read and evaluated by the thesis adviser and another member of the program faculty. If the thesis is accepted and the student maintains a 3.7 GPA, departmental honors will be awarded. The level of honors—distinction, high distinction, or highest distinction—will be determined by the program faculty.

Students choosing a major in Greek and Hebrew may complete an honors major as follows: those with an emphasis on Greek must meet the requirements for honors in the Classical Studies Program and work with a thesis adviser from classical studies, but select a second adviser for the thesis from Judaic studies. Those with an emphasis on Hebrew must meet the requirements for honors in the Judaic Studies Program and work with a thesis adviser from Judaic studies, but select a second adviser for the thesis from classical studies.

COURSES

For course descriptions not found in the 2006–2007 General Catalog, please contact the department for more information.

UNDERGRADUATE

- Classical Studies 51. Bio-Scientific Vocabulary (Greek-Latin Roots) (4)**
Intensive exposure (100 words per week) to Greek and Latin roots, prefixes, and suffixes which form the basis of bio-scientific terminology. Extensive practice in word building and analysis. No knowledge of Greek or Latin required.
- Classical Studies 107. Myth, Religion, and Philosophy in Late Antiquity (4)**
- Classical Studies 111. Topics in Ancient Greek Drama (4)**
Close reading and discussion of selected works of ancient Greek drama in translation. (Course may be

repeated for credit when topic varies.) *Prerequisite: sophomore standing.*

- Classical Studies 196A-B. Honors Thesis (2-4)**
- Cultural Traditions. Judaic 1A-B (4-4)**
- Humanities 1. The Foundations of Western Civilization: Israel and Greece (6)**
Prerequisite: satisfaction of the Entry-Level Writing requirement. (W)
- Humanities 2. Rome, Christianity, and the Medieval World(6)**
Prerequisite: satisfaction of the Entry-Level Writing requirement. (S)
- Humanities 3. Renaissance, Reformation, and Early Modern Europe (4)**
Prerequisite: satisfaction of the Entry-Level Writing requirement. (F)
- HIEU 101. Greece in the Classical Age (4)**
- HIEU 102. The Roman Republic (4)**
- HIEU 103. The Roman Empire (4)**
- HIEU 160. Topics in the History of Greece (4)**
- HIEU 161. Topics in Roman History (4)**
- HIEU 199. Independent Study in Greek and Roman History (4)**
- HISC 101A. Science in the Greek and Roman World (4)**
- LTGK 1-2-3. Beginning and Intermediate Greek (4-4-4)**
- LTGK 110. Archaic Period (4)**
- LTGK 112. Homer (4)**
- LTGK 113. Classical Period (4)**
- LTGK 120. New Testament Greek (4)**
- LTGK 130. Tragedy (4)**
- LTGK 131. Comedy (4)**
- LTGK 132. History (4)**
- LTGK 133. Prose (4)**
- LTGK 134. Epic Poetry (4)**
- LTGK 135. Lyric Poetry (4)**
- LTGK 198. Directed Group Study (4)**
- LTGK 199. Special Studies (2 or 4)**
- LTLA 1-2-3. Beginning and Intermediate Latin (4-4-4)**
- LTLA 100. Introduction to Latin Literature (4)**
- LTLA 111. Pre-Augustan (4)**
- LTLA 113. Augustan (4)**
- LTLA 114. Vergil (4)**
- LTLA 116. Silver Latin (4)**
- LTLA 131. Prose (4)**
- LTLA 132. Lyric and Elegiac Poetry (4)**
- LTLA 134. History (4)**
- LTLA 135. Drama (4)**
- LTLA 198. Directed Group Study (4)**
- LTLA 199. Special Studies (2 or 4)**
- LTEU 102. Women in Antiquity (4)**
- LTWL 19A-B-C. (4-4-4)**
- LTWL 100. Mythology (4)**

- LTWL 101. What Socrates Knew (4)**
- LTLW 106. Classical Tradition (4)**
Previously LGTN 100, LTEU 100 (May be repeated as topics vary).
- Philosophy 100. Plato (4)**
- Philosophy 101. Aristotle (4)**
- Philosophy 102. Hellenistic Philosophy (4)**
- Philosophy 108. Mythology and Philosophy (4)**
- Philosophy 199. Independent Study (4)**
- Pol. Sci. 110A. Citizens and Saints: Political Thought from Plato to Augustine (4)**
- TDHT 116. Old Myths in New Films (4)**
- Visual Arts 120A. Greek Art (4)**
- Visual Arts 120B. Roman Art (4)**
- Visual Arts 120C. Late Antique Art (4)**

GRADUATE

- HIGR 255. The Literature of Ancient History (4)**
- HIGR 298. Directed Readings in Greek and Roman History (1-12)**
- LTCO 210. Classical Studies (4)**
- LTGK 297. Directed Studies (1-12)**
- LTGK 298. Special Projects (4)**
- LTLA 297. Directed Studies (1-12)**
- LTLA 298. Special Projects (4)**
- Philosophy 210. Greek Philosophy (4)**
- Philosophy 290. Directed Independent Study (1-4)**

*The University of California
Tri-Campus Graduate Program
in Classics*

UC IRVINE, UC RIVERSIDE, AND UCSD

What is the UC Tri-Campus Program? This graduate program joins together into a single faculty more than twenty experts in classics and related disciplines from the three southernmost University of California campuses (Irvine, Riverside, and San Diego). It features an innovative curriculum and program of study that address the practical and theoretical questions confronting the humanities and classics in particular as both enter the twenty-first century.

What are the Program's Goals? The aim of the Tri-Campus Program is to provide an educational environment for pursuing a graduate career in classics that is closely integrated into the main currents of humanistic and social scientific scholarship. The program's faculty recognizes that today and in the future teachers of the classics must possess and develop expertise beyond the standard specialties of the traditional

classics Ph.D. degree. Classics programs, in both large research universities and small liberal arts colleges, increasingly feel the pressure to break down the boundaries between disciplines.

To achieve these goals, the program and curriculum are designed around five principles:

- Study the ancient texts and objects in their wider social, cultural, and historical contexts.
- Bring the culture of the ancient Greeks and Romans into the purview of contemporary literary and sociological theory.
- Examine the reception of ancient literature and culture by later cultures and the appropriation of the ancient world by the modern world.
- Pay particular attention to the intersections of Greek and Roman society and culture with each other and with the other cultures of the ancient world.
- Utilize to the fullest the potential of new computing technologies as tools for research and teaching.

These five interdisciplinary principles are embodied in the four Core Courses (Classics 200A, 200B, 200C, and 201). Graduate seminars (Classics 220) and reading courses in Greek and Latin authors (Classics 205) round out the program of studies. This curriculum has been in effect at Irvine since 1995, taught by faculty members from all three campuses.

Where do I apply? The Tri-Campus Program uniquely does not belong to a particular campus but to the University of California. Students who are accepted into the program may enroll at any of the three campuses. Because instruction and administrative functions take place on the Irvine campus, students will normally enroll at Irvine. Applications to the Tri-Campus Graduate Program will be reviewed by an admissions committee composed of members from all three campuses.

Where is the Tri-Campus Program located? UC Irvine is located five miles inland from the Pacific Ocean, fifty miles south of metropolitan Los Angeles, forty-five miles southwest of UC Riverside and seventy-four miles north of UCSD. In addition to its beaches, mountains, and deserts, Southern California offers excellent cultural amenities such as museums, theater, dance, opera, and music.

What are the requirements for admission? Applicants to the program should have a B.A. or equivalent in classics or classical civilization,

which normally means that you have had at least three years of one classical language and two of the other. Majors in other disciplines (e.g., comparative literature, history, philosophy, or interdisciplinary fields such as women's studies) are welcome, provided they have sufficient background in Greek and Latin. All applicants must submit Graduate Record Exam (GRE) scores and must have a minimum GPA of 3.0 or the equivalent. If you have completed an M.A. in classics at another institution, you may be admitted with advanced standing and may have the course requirements reduced from the normal three years to two or one. The level of course reduction will be determined by progress evaluation exams administered in the spring quarter of each year.

THE ROLE OF THE JOINT EXECUTIVE COMMITTEE

The Tri-Campus Program is administered by a joint executive committee (JEC), which consists of six representatives, two from each campus, serving staggered, two-year terms. The JEC's responsibilities include: reviewing graduate applications and admitting students to the program; overseeing the formation of examination and dissertation committees; reviewing and deciding on student petitions; making policy decisions concerning the program, including changes in the program's requirements and procedures; and interpreting the program's requirements and procedures. The JEC elects from its members a chair to serve a three-year term. It is the chair's responsibility to manage budgetary issues, schedule and set the agenda for quarterly JEC meetings, identify faculty to teach graduate courses, and generally look after the smooth operation of the program.

THE ROLE OF THE GRADUATE ADVISER

The graduate adviser is a faculty member responsible for supervising graduate study in the department and monitoring the academic progress of graduate students. The graduate adviser coordinates the various elements of the academic program and advises students and other faculty members about program requirements and university policies. The graduate adviser keeps records for each student and for the whole program, ensures that each student meets all requirements and makes satisfactory progress toward attainment of the degree, and is instrumental in the nomination of students for fellowship support and assistantship appointments. The

graduate adviser also provides general help to students as they attempt to negotiate the academic and administrative hurdles on their way to completion of their degrees. The graduate adviser is an ex-officio member of the Tri-Campus JEC for the duration of his or her tenure, normally two years.

ELECTION OF STUDENT REPRESENTATIVE

Graduate students elect a representative who attends JEC meetings as a regular voting member. Graduate students are also invited to attend meetings as observers and to participate where appropriate. The voting rights and attendance of the graduate student representative are circumscribed by the requirements of confidentiality.

The Ph.D. and the M.A. Programs

A student's career may be thought of as covering three stages: course work, preparation for qualifying exams, and candidacy (dissertation). For Ph. D. students the normative limits for completion of the program are four years to advancement to candidacy, two years to final approval of the dissertation, and a maximum of seven years in total. Students are only admitted into the Ph.D. program. Entering students who do not already hold a master's degree in classics from another institution will be required to complete M.A. requirements while pursuing the Ph.D.

Course Work For the M.A.

The M.A. degree in classics may be awarded either upon completing the Ph.D. course requirements and passing the written Ph.D. examinations or upon completing the M.A. course requirements and master's paper and passing the M.A. translation examinations and general exam. The latter path to the M.A. is intended for Ph.D. students who decide to leave the program before completing the requirements for a Ph.D.

M.A. students must successfully complete a minimum of twelve approved, seminar-level courses. The twelve courses must be distributed as follows:

- Nine quarters of Classics 220.
- At least three quarters of Classics 200A-B-C and 201; a fourth quarter may be substituted for a Classics 220.

- Up to one quarter of Classics 290 for research and writing of the master's paper may be substituted for a Classics 220.
- If remedial work is required in Greek or Latin, with the graduate adviser's approval, one enhanced upper-division Greek or Latin course enrolled as a Classics 280 may be substituted for a Classics 220.
- With the graduate adviser's approval, M.A. students may substitute one external graduate seminar in a relevant area outside of classics (at any of the three participating campuses) for a Classics 220.

A Sample M.A. Program

FALL	WINTER	SPRING
YEAR 1		
200A (200C)	Classics 220	200B (201)
Classics 220	Classics 220	Classics 220
Classics 399	Classics 399	Classics 399
YEAR 2		
200C (200A)	Classics 220	201 (200B)
Classics 220	Classics 220	Classics 290
Classics 399	Classics 399	Classics 399
		M.A. Exams

Course Work for the Ph.D.

Ph.D. students must successfully complete a minimum of eighteen approved, seminar-level courses. The eighteen courses must be distributed as follows:

- Four quarters of Classics 200A-B-C, and 201.
- Twelve quarters of Classics 220.
- Two external graduate seminars, from departments or programs outside of classics. These may be taken from the offerings of any of the three campuses.
- Students may take up to two quarters of enhanced upper-division Greek or Latin courses (enrolled as 280s) in place of Classics 220s, with permission of the graduate adviser if remedial work is required in Greek or Latin.
- Where appropriate, in the third year of course work, a second Classics 200A, B, or C, may be substituted for a 220
- Classics 280, Independent Study (supervised research) may be substituted for Classics 220s **only** with the permission of the graduate adviser.
- Up to twelve equivalent graduate-level courses completed elsewhere may be substituted for

Tri-Campus Program courses with approval of the JEC.

Classics 280 may be used, normally in the fourth year, to provide time to work on the Greek and Latin reading lists and to prepare for qualifying exams, but these courses do not count towards the required eighteen courses. Ph.D. students must meet with the graduate adviser early every fall quarter to discuss their progress through the curriculum and their plans for the coming academic year. A student who accumulates more than one outstanding grade of incomplete is considered to be at risk.

Faculty teaching graduate courses will submit to the graduate adviser for student files a brief written evaluation for each student, commenting on the student's performance and noting whether the student wrote a seminar paper for the course. The graduate adviser will lead the JEC in an annual review of all active graduate students in the program at the JEC's spring meeting.

A Sample Ph.D. Program

Examinations

Diagnostic Exams: Immediately upon entering the program, the student takes diagnostic translation examinations in both Greek and Latin to establish his or her level of competency and to

determine where effort should be directed. In the second year of course work, students will take as diagnostic exams the Latin and Greek translation exams administered as part of the qualifying exam battery.

EXAMS FOR THE M.A.

1. **Foreign Language Requirement:** Students must demonstrate reading knowledge of German, French, Italian, or an equivalent research language either through appropriate course work or by examination.
2. **Translation Exams:** Each student must pass a set of translation examinations in Greek and in Latin administered by the master's committee (two hours each).

The JEC in consultation with the graduate adviser and the student recommends to the graduate dean a three-member master's committee composed of program faculty from at least two campuses to set and evaluate the translation exams and to evaluate the master's paper. Normally this committee is established in the quarter preceding completion of the master's paper.

EXAMS FOR THE PH.D.

1. **Foreign Language Requirements:** Ph.D. students must demonstrate reading proficiency in one modern research language (normally German and French or Italian) by the end of their second year either through appropriate course work or by examination. Proficiency in a second modern research language is expected by the end of the third year.
2. **Ph.D. Qualifying Exams:** In order to advance to candidacy for the Ph.D. and enter the dissertation stage, a student must pass a set of seven qualifying exams. The translation exams, history exams, and history of the literatures exam are administered and evaluated on a regular schedule over the academic year by examination boards composed of one faculty member from each campus and appointed for that purpose by the JEC at the graduate adviser's recommendation. The JEC, in consultation with the graduate adviser and the student, recommends

to the graduate dean a five-member candidacy committee composed of four program faculty (from at least two campuses) and one outside member holding tenure on one of the participating campuses (i.e., not a member of the program faculty) to organize and administer the special-area exam and the oral exam taken by the candidate after successful completion of the other exams. All committee members for both candidacy and doctoral committees should normally be voting members of the Academic Senate of the Irvine, Riverside, or San Diego divisions. Any exceptions must hold a Ph.D., be qualified for a UC faculty appointment, and be supported by a memo of justification and a CV submitted by the graduate adviser to the graduate dean for approval at least two weeks prior to an exam. The qualifying examinations include written examinations and a final oral examination:

- a. Greek and Latin translation (three hours each)
- b. Greek and Roman history (two hours each)
- c. History of Greek and Roman literature (three hours)
- d. A "special area" that can be fulfilled by either an extensive research paper or a three-hour written exam
- e. Oral examination to be administered by the candidacy committee and taken only after the other exams have been passed (two hours: one hour general knowledge and one hour special-area exam paper or research paper)

These exams are based on the Tri-Campus Reading Lists and should be completed by the end of the fourth year. The exams on Greek and Roman history are based on up to six books each, three prescribed on the reading list for this exam and up to three agreed to by the student and graduate adviser. The exam on the history of Greek and Roman literature is based on the Greek and Latin Reading Lists and the books prescribed on the reading list for this exam. Students are expected to read, in the original, all works on the Greek and Latin Reading Lists, whether or not they have appeared in courses. (Students may negotiate with the graduate adviser substitutions on the Greek and Latin Reading Lists comprising up to twenty percent of their total length in order to

accommodate the particular interests of the individual student.) Upon successful completion of the written examinations the oral exam will be scheduled. Students failing segments of the qualifying exams may normally retake those sections only once after the interval of one quarter or the summer break, as the case may be. Students may retake segments of the qualifying exams more than once only at the discretion of the JEC. A grade of "pass" in all examinations is required for admission to candidacy.

Thesis and Defense for the M.A.

The master's paper comprises a substantial piece of original research. It should exceed the breadth and depth expected for a seminar paper, which can provide a good foundation for the master's paper. The master's paper must be submitted to members of the master's committee three weeks in advance of the general exam.

If the master's paper is found to be of passing quality by the committee, the student may take the general exam, a one-hour oral exam covering the broader implications of the master's paper and the classical world generally.

Thesis and Defense for the Ph.D.

When the student has advanced to candidacy, the JEC—in consultation with the candidate, the graduate adviser, and the proposed chair of the doctoral committee—will recommend to the Dean of the Graduate Division a doctoral committee composed of at least three program faculty (from at least two of the three campuses) and one outside member who holds tenure at one of the participating campuses. The doctoral committee will serve as the examination committee for the thesis defense. Within the first quarter after completion of the qualifying exams and all other prerequisites, the candidate will submit a dissertation proposal for discussion and evaluation to the doctoral committee.

A public oral defense of the dissertation will be scheduled upon its submission to the doctoral committee. Members of the committee must be supplied with a copy of the dissertation at least three weeks before the exam date.

The Emphasis in Comparative Literature

COURSE WORK

For the emphasis in comparative literature, students must take at least five graduate courses in the Department of English and Comparative Literature. One course should be Criticism 222A or C, or Comparative Literature 200. At least three of the courses should have a Comparative Literature designation. One of the courses could be Humanities 270 (Critical Theory). Classics students can devote the required outside seminars to this emphasis and may, with the graduate adviser's approval, make appropriate substitutions of courses.

QUALIFYING EXAMS

One topic on the Ph.D. qualifying examination must be on a comparative literature topic and should be prepared with a professor from the Comparative Literature Program who would serve as a member of the student's exam committee. The student should be able to demonstrate some expertise in comparative critical methodologies as well as knowledge of a literature and tradition other than classics. Normally classics students will fulfill this requirement by selecting the research-paper option for the oral-exam stage of the qualifying examinations.

DISSERTATION

One member of the student's doctoral committee must be from the Program in Comparative Literature.

Students must submit an application for the emphasis to the graduate adviser in classics, and the department will track the students' progress and fulfillment of the emphasis requirements. Upon graduation, students will receive a letter from the graduate adviser certifying completion of the emphasis.

Attendance at Colloquia and other Departmental Activities

Seminars, colloquia, and other activities of interest to classics graduate students are organized regularly by the Tri-Campus Graduate Program. Since these activities are considered part of the student's professional training, all students are required to attend them. Students are also urged to acquaint themselves with colloquia offered in other fields.

Support for Graduate Students

A variety of fellowships and teaching assistantships is available to classics graduate students on a competitive basis. They include Chancellor's Fellowships, Regents' Fellowships, and Dissertation Fellowships, as well as the Thesaurus Linguae Graecae Fellowship. Several teaching and research assistantships are also available, and provide a stipend in addition to tuition and fees. Some fourth- and fifth-year teaching assistantships are held at UC Riverside and UCSD. Continuation of support is contingent upon satisfactory academic progress. Support from various sources is normally extended to students in good standing for up to six years.

Resources of the Tri-Campus Program.

The Department of Classics at UC Irvine, which is the administrative center of the Tri-Campus Program, is housed in pleasant quarters in Humanities Office Building 2. Tri-Campus graduate students avail themselves of

- Superior library holdings in classics and related fields in the combined collections of all nine University of California research libraries, accessed to the holdings of the California Digital Library, and expeditious Interlibrary Loan Services with other U.S. and international libraries.
- The facilities of the Thesaurus Linguae Graecae Project (TLG) at UC Irvine, including the complete TLG data bank, the Classics/TLG Computing Lab, and the large collection of primary texts, commentaries, and reference materials housed in the TLG's Marianne Eirene McDonald Library. Formal (Classics 201) and informal instruction in computer-related methodologies for research and teaching are conducted at the Classics/TLG Computing Lab.
- The Consortium for Latin Lexicography (CLL) at UC Irvine, a collaborative research group whose primary goal is to create a computerized Latin dictionary based on the Thesaurus Linguae Latinae (TLL) in Munich.
- The faculty and program in comparative ancient civilizations at UC Riverside, which are dedicated to a cross-cultural and cross-disciplinary approach to the study of ancient cultures.
- Combined UCI-UCSD Ph.D. program in theatre, which has a strong classics component,

and the nationally renowned regional theatre at La Jolla.

- Seminars, colloquia, and lectures regularly offered by the Critical Theory Institute at UC Irvine and by the University of California Humanities Research Institute that is housed on the UC Irvine campus. Tri-Campus doctoral students may add an emphasis in critical theory under the supervision of the Committee on Critical Theory. The Tri-Campus Program also has its own colloquia series of lectures by visiting scholars on the three campuses.
- The Southern California Graduate Resource-Sharing Consortium, a cooperative association of the Tri-Campus Program and the graduate classics programs of UCLA and the University of Southern California. Every year a faculty member from each of these units offers a graduate seminar in his or her area of expertise at one of the other units. In the spring of every year faculty and graduate students conjoin at an annual consortium luncheon and lecture by a distinguished visiting scholar.

For further information and an online application to the program, please see the Tri-Campus Program's Web site at <http://www.hnet.uci.edu/classics/tricampus/>.

COURSES

For course descriptions not found in the 2006-2007 General Catalog, please contact the department for more information.

UC TRI-CAMPUS GRADUATE PROGRAM IN CLASSICS

Classics 200A. Contemporary Literary Theory and the Classics (4)

An introduction to contemporary literary theory, focusing on important critical approaches to the literary texts. May be repeated for credit as topics vary. Some recent offerings include "Bahktin and Aristophanes" (A. Edwards, fall 1995) and "Classics and Literary Theory" (P. duBois, spring 1995)

Classics 200B. Historical Perspectives on Classical Antiquity (4)

Examines ways in which classical texts and ideas have been received and appropriated for the diverse purposes of ancient and subsequent cultures. May be repeated for credit as topics vary. Some recent offerings include "Platonism" (D. Glidden, winter 1996) and "Vergil & Milton" (D. Sutton, winter 1998).

Classics 200C. Greece and Rome in their Contemporary Cultural Contexts (4)

An introduction to the methods and perspectives of social scientific theory which can be used to study the material and social dimensions of the cultures of ancient Greece and Rome. May be repeated for credit as topics vary. Some recent offerings include "Literature & Society in the 4th Century" (M. Salzman, winter 1997) and "Homer's *Iliad* and the Greek Dark Age" (W. Donlan, spring 1999).

Classics 201. Computing in Classical Studies (4)

An introduction to the latest methods of computing for research and teaching. May be repeated for credit as topics vary.

Classics 205. Concurrent Readings (2)

Concurrent enrollment with advanced undergraduate courses (either Greek 105 or Latin 105) with enhanced readings and separate examinations. May be repeated for credit as topics vary.

Classics 220. Classics Graduate Seminar (4)

Subject matter variable; mainly but not exclusively major literary topics. May be repeated for credit as topics vary. Same as Art History 295 when topic is appropriate. Some recent offerings include "Senecan Tragedy" (W. Fitzgerald, winter 1997), "Production Criticism" (D. Sutton, spring 1997), and "Cleopatra and Egyptomania in Rome" (M. Miles, winter 1999).

Classics 280. Independent Study (4)

Supervised independent research. Subject varies.

Classics 290. Research in Classics (4-4-4)

F, W, S.

Classics 299. Dissertation Research (4-12)

F, W, S. May be repeated for credit. Satisfactory/Unsatisfactory Only.

Classics 399. University Teaching (4-4-4)

F, W, S. Required of and limited to Teaching Assistants.

UC TRI-CAMPUS CLASSICS PROGRAM FACULTY

- Thomas F. Scanlon, Ph.D., Ohio State University,
Professor of Classics and Program Director, UCR
(Greek and Roman historiography, ancient athletics)
- Georgios Anagnostopoulos, Ph.D., Brandeis University, *Professor of Philosophy, UCSD*
(ancient Greek philosophy, ethics, metaphysics)
- Luci Berkowitz, Ph.D., Ohio State University,
Professor Emerita of Classics, UCI (Greek literary history, computer application to literature)
- Theodore F. Brunner, Ph.D., Stanford University,
Professor Emeritus of Classics, UCI (computer application to classical literature)

Charles Chamberlain, Ph.D., University of California, Berkeley, *Lecturer in Classics and Comparative Literature*, UCSD (Greek and Latin literature, Aristotle, poetics)

Cynthia L. Claxton, Ph.D., University of Washington, *Lecturer in Classics and Graduate Teaching Supervisor*, UCI (Greek prose, historiography)

Walter Donlan, Ph.D., Northwestern University, *Professor Emeritus of Classics and Graduate Adviser*, UCI (early Greek literature, Greek social history)

Page duBois, Ph.D., University of California, Berkeley, *Professor of Classics and Comparative Literature*, UCSD (Greek literature, rhetoric, critical theory, cultural studies)

Anthony Edwards, Ph.D., Cornell University, *Professor of Classics and Comparative Literature*, UCSD (epic, Greek comedy, critical theory)

Leslie Collins Edwards, Ph.D., Cornell University, *Lecturer in Classics and Comparative Literature*, UCSD (Homer, Greek drama, education in ancient Greece)

Richard I. Frank, Ph.D., University of California, Berkeley, *Associate Professor Emeritus of History and Classics*, UCI (Roman history, Latin elegy and satire, classical tradition)

Zina Giannopoulou, Ph.D., University of Illinois, *Assistant Professor of Classics*, UCI (literary theory and Platonic hermeneutics, classical and Hellenistic philosophy, Greek tragedy and epic)

David Glidden, Ph.D., Princeton University, *Professor of Philosophy*, UCR (Greek and Roman philosophy)

Max Goldman, Ph.D., Brown University, *Lecturer in Classics* (Latin poetry, ancient novel, literary criticism)

Anna Gonosová, Ph.D., Harvard University, *Associate Professor of Art History*, UCI (Byzantine and Medieval art)

Edward N. Lee, Ph.D., Princeton University, *Professor Emeritus of Philosophy*, UCSD (Greek philosophy, Plato)

Marianne McDonald, Ph.D., University of California, Irvine, *Professor of Theatre and Classics*, UCSD (Greek and Roman theatre, ancient drama in modern plays, film, and opera)

Margaret M. Miles, Ph.D., Princeton University, *Associate Professor of Art History*, UCI (Greek and Roman art and archaeology, ancient Sicily, Greek religion)

Alden A. Mosshammer, Ph.D., Brown University, *Professor Emeritus of History*, UCSD (early Christian thought, Greek chronography, early Greek history)

Sheldon Nodelman, Ph.D., Yale University, *Associate Professor of Visual Arts*, UCSD (classical art and architecture, Roman portraiture, critical theory)

Maria C. Pantelia, Ph.D., Ohio State University, *Associate Professor of Classics and Director Thesaurus Linguae Graecae*, UCI (Greek epic poetry, Hellenistic poetry, computer applications to classics)

Wendy Raschke, Ph.D., State University of New York, Buffalo, *Lecturer in Classics*, UCR (Roman satire, Greek art and archaeology)

B. P. Reardon, D.U. Université de Nantes, *Professor Emeritus of Classics*, UCI (Late Greek literature, ancient novel)

Michele Salzman, Ph.D., Bryn Mawr College, *Associate Professor of History*, UCR (Late antiquity; Roman history and literature, religion, women's studies)

Gerasimos Santas, Ph.D., Cornell University, *Professor of Philosophy*, UCI (ancient philosophy, history of philosophy, ethics)

Patrick Sinclair, Ph.D., Northwestern University, *Associate Professor Emeritus of Classics*, UCI (Roman historiography, Latin lexicography, rhetoric)

Christiana Sogno, Ph.D., Yale University, *Assistant Professor of Classics*, UCI (Roman history, Roman law, Latin epigraphy, and papyrology)

Dana F. Sutton, Ph.D., University of Wisconsin, *Professor Emeritus of Classics*, UCI (Greek and Latin drama, Greek poetry, Anglo-Latin literature)

Nicholas P. White, Ph.D., Harvard University, *Professor of Philosophy*, UCI (Greek Philosophy, Ethics, Epistemology)

Eliot Wirshbo, Ph.D., University of Pennsylvania, *Lecturer in Classics and Comparative Literature*, UCSD (Greek epic, folklore)

Andrew Zissos, Ph.D., Princeton University, *Assistant Professor of Classics*, UCI (Latin epic, medieval Latin, Roman culture)

Clinical Psychology

OFFICE: 2056 Basic Science Building
(858) 534-4044

Professors

Sonia Ancoli-Israel, Ph.D., *In-Residence/ Psychiatry*

Mark I. Appelbaum, Ph.D., *Psychology*

J. Hampton Atkinson, Jr., M.D., *In-Residence/ Psychiatry*

Ursula Bellugi, Ed.D., *Adjunct/Psychology*

Gary R. Birchler, Ph.D., *Clinical Psychiatry*

David L. Braff, M.D., *Psychiatry*

Karen Britton, M.D., Ph.D., *In-Residence/Psychiatry*

Gregory G. Brown, Ph.D., *In-Residence/Psychiatry*

Sandra Brown, Ph.D., *Psychology/Psychiatry*

Michael P. Caligiuri, Ph.D., *In-Residence/Psychiatry*

Eric Courchesne, Ph.D., *Neurosciences*

Dean C. Delis, Ph.D., *In-Residence/Psychiatry*

Joel E. Dimsdale, M.D., *In-Residence/Psychiatry*

Ann F. Garland, Ph.D., *In-Residence/Psychiatry*

Mark A. Geyer, Ph.D., *In-Residence/Psychiatry*

Eric L. Granholm, Ph.D., *In-Residence/Psychiatry*

Igor Grant, M.D., *Psychiatry*

Robert K. Heaton, Ph.D., *Psychiatry, Program Director*

Terry L. Jernigan, Ph.D., *In-Residence/Psychiatry*

Dilip V. Jeste, M.D., *In-Residence/Psychiatry*

Lewis L. Judd, M.D., *Psychiatry, Chair*

Patricia A. Judd, Ph.D., *Clinical Psychiatry*

John R. Kelsoe, Jr., M.D., *Psychiatry*

James A. Kulik, Ph.D., *Psychology*

Saul Levine, M.D., *Psychiatry*

James B. Lohr, M.D., *In-Residence/Psychiatry*

Jeffrey E. Max, MBBCh, *Psychiatry*

Paul J. Mills, Ph.D., *In-Residence/Psychiatry*

Mark G. Myers, Ph.D., *In-Residence/Psychiatry*

Lawrence A. Palinkas, Ph.D., *Family and Preventive Medicine*

Barbara L. Parry, M.D., Ph.D., *In-Residence/ Psychiatry*

Thomas L. Patterson, Ph.D., *In-Residence/ Psychiatry*

Martin P. Paulus, M.D., *In-Residence/Psychiatry*

William Perry, Ph.D., *In-Residence/Psychiatry*

David P. Salmon, Ph.D., *In-Residence/Neurosciences*

Laura Schreibman, Ph.D., *Psychology*

Marc A. Schuckit, M.D., *Psychiatry*

Larry R. Squire, Ph.D., *Psychiatry*
Murray B. Stein, M.D., *In-Residence, Psychiatry*
Joan Stiles, Ph.D., *Cognitive Science*
Neal R. Swerdlow, M.D., Ph.D., *Psychiatry*
Doris A. Trauner, M.D., *Neurosciences/Pediatrics*
Tamara L. Wall, Ph.D., *In-Residence/Psychiatry*
Sidney Zisook, M.D., *Psychiatry*

Associate Professors

Mark W. Bondi, Ph.D., *In-Residence/Psychiatry*
Sandra J. Brown, Ph.D., *Clinical Psychiatry*
David Feifel, M.D., *In-Residence/Psychiatry*
J. Vincent Filoteo, Ph.D., *In-Residence/Psychiatry*
John R. McQuaid, Ph.D., *Clinical Psychiatry*
Sharon Nichols, Ph.D., *Project Scientist/
Neurosciences*
Barton Palmer, Ph.D., *In-Residence/Psychiatry*
Georgia Sadler, M.D., *Clinical Surgery*
Susan F. Tapert, Ph.D., *In-Residence/Psychiatry*
Shu-Hong Zhu, Ph.D., *Adjunct/Family and
Preventive Medicine*

Assistant Professors

Natacha Akshoomoff, Ph.D., *Adjunct/Psychiatry*
Leslie J. Carver, Ph.D., *Psychology*
Sean Drummond, Ph.D., *In-Residence/Psychiatry*
Tamar Gollan, Ph.D., *Adjunct/Psychiatry*
Frank Haist, Ph.D., *Adjunct/Psychiatry*
Ariel J. Lang, Ph.D., *In-Residence/Psychiatry*
Thomas D. Marcotte, Ph.D., *Adjunct/Psychiatry*
Kristen McCabe, Ph.D., *Adjunct/Psychiatry*
Gregory J. Norman, Ph.D., *Assistant Adjunct,
Family and Preventive Medicine*
Thomas Rutledge, Ph.D., *In-Residence/Psychiatry*
Brian C. Schweinsburg, Ph.D., *Assistant
Adjunct/Psychiatry*
Susan F. Tapert, Ph.D., *In-Residence/Psychiatry*
Julie Wetherell, Ph.D., *In-Residence/Psychiatry*

Professional Researcher

Jeanne Townsend, Ph.D., *Associate Research
Scientist/Neurosciences*

The Joint Doctoral Program

The interdisciplinary partnership of the Department of Psychiatry at the UCSD School of Medicine and the Department of Psychology at San Diego State University greatly extends the range of perspectives and furnishes unusual opportunities for graduate study leading to the Ph.D. degree in clinical psychology. The Joint Doctoral Group in Clinical Psychology currently consists of faculty from the UCSD Department

of Psychiatry, School of Medicine, and the Departments of Neurosciences, Cognitive Science, Family and Preventive Medicine, and Psychology, and the SDSU Department of Psychology and School of Public Health.

Information regarding admission is found in the current edition of the Bulletin of the Graduate Division of San Diego State University and at our Web site: www.psychology.sdsu.edu/doctoral.

The program goal is to train clinical psychologists who are accomplished both as clinicians and as research scientists. The curricula and training provide a strong foundation in clinical psychological concepts, methods, theories, and data, together with intensive concentrations in specialized areas of clinical psychology. Currently our program has three areas of specialization: behavioral medicine, neuropsychology, and experimental psychopathology.

The scientist-practitioner model on which this program is based requires that students receive ongoing supervised research experience, including planning, design, implementation, analysis, and communication of findings. Equally important is extensive supervised experience aimed at developing sound general and specialized clinical skills. Students are expected to be actively involved in all these activities throughout their tenure in the program.

The program is designed as a five-year curriculum, including a one-year clinical internship. The curriculum is based on a twelve-month academic year. The program is accredited by the American Psychological Association.

Specific courses currently required as part of the core at UCSD include: Clinical Psychology 294A,B,C, (required for neuropsychology track majors only); Clinical Psychology 296 (independent study, lab practicum); Clinical Psychology 299 (independent study project); School of Medicine 202E (Psychopathology).

Ph.D. Time Limit Policies

Students must be advanced to candidacy by the end of five years. Total University support cannot exceed six years. Total registered time at UCSD cannot exceed seven years.

COURSES

For course descriptions not found in the 2006–2007 General Catalog, please contact the department for more information.

Clinical Psychology 205. Neuroanatomy (6)
Fundamental anatomy/physiology of human nervous system, emphasizing higher cortical functions. Methods of clinical problem solving in neurology; background in basic neuropsychological skills.

Clinical Psychology 294. Pro-Seminar in Neuropsychology (3)
Year-long course (294A,B,C), each for three credits, offered sequentially fall, winter, spring. Provides a fundamental knowledge of brain-behavior relationships as well as strategies and methods of neuropsychological assessment and rehabilitation.

School of Medicine 202E. Social and Behavioral Sciences—Psychopathology (3)
This sequence will acquaint students with techniques of interviewing, concepts of mental illness and normality, basic research in causality of behavioral disorders, and approaches to treatment, all in the context of a bio-psycho-social frame of reference. Format combines a lecture followed by smaller group sessions with a faculty leader. The groups enable students to meet patients with behavioral disorders, to practice interviewing, to develop observational skills, and to discuss material presented in lectures and assigned readings. (S/U grades only.) *Prerequisite: SOM 202A,C,D or consent of instructor.*

Clinical Psychology 296. Independent Study (1-12)
Independent survey of basic concepts in clinical psychology using various sources of material, including scientific papers in clinical psychology and behavioral science and other sources as seem indicated.

Clinical Psychology 299. Graduate Research (1-12)
Individual study course under one or more of the joint doctoral program faculty to develop certain research questions, design a methodology to answer the questions, and then carry out actual research, data reduction, and analysis.

Program Director

Ravindra L. Mehta, M.D., *Professor of Clinical
Medicine*

Associate Program Directors

Gerry R. Boss, M.D., *Professor of Medicine*
 J. Allen McCutchan, M.D., *Professor of Medicine in Residence*

Associated Faculty

Theodore Ganiats, M.D., *Professor, Family and Preventive Medicine*
 W. Christopher Mathews, M.D., *Professor of Clinical Medicine*
 Deborah L. Wingard, M.D., *Professor, Family and Preventive Medicine*
 Michael G. Ziegler, M.D., *Professor of Medicine*

Program Description

The Master of Advanced Studies (MAS) in Clinical Research offers a broad-based curriculum in clinical research methodology and integrates classroom instruction with practical training to provide students with the knowledge and skills necessary to produce valid, credible research. Linking the academic and professional scientific communities, the program is appropriate for physicians, pharmacists, nurses with advanced training, psychologists, and biomedical scientists employed in biomedical firms, hospitals, and pharmacies. The program aims to accommodate the varying needs of the students through its modular approach to instruction, a part-time year-round schedule, and a choice of general electives organized by tracks.

The MAS in Clinical Research is a part-time, self-supporting degree program with a flexible course schedule designed for working professionals and academics. The UCSD graduate division confers the MAS degree and the Department of Medicine in the UCSD School of Medicine is responsible for the academic management of the curriculum. UCSD Extension administers the program and provides student advising and career counseling services.

Admission

New students are admitted in the winter and summer quarter of each academic year. Prospective candidates should submit and complete the official UCSD online graduate application for admission, the application fee, one set of official transcripts from each institution attended after high school, three letters of professional letters of recommendation, and a current resume or c.v. The GRE/GMAT is not

required; however, it is strongly recommended that candidates possess, or currently be pursuing, a graduate degree in a scientific or health-care related field and also have some level of experience in scientific or clinical research. In some instances candidates without an advanced degree may be admitted to the program if they have demonstrated substantial professional experience in the field at increasing levels of responsibility. The application deadlines are October 15 (winter) and April 15 (summer).

Program of Study

The part-time master's degree program is designed to be completed in two to three years, depending upon a participant's time to devote to the program. Classes are typically scheduled in the late afternoons and evenings. The thirty-six-unit degree is comprised of sixteen units of core clinical modules, four units of seminar courses, six units of general electives, four units of advanced statistics electives, and six units of an independent study project.

COURSES

For course descriptions not found in the 2006–2007 General Catalog, please contact the department for more information.

CLRE 250. Patient-Oriented Research I (2)

This course will develop and apply the theory of clinical trials design and analysis, discuss the practical issues of financing and implementing clinical trials, and describe issues of monitoring trials and working in cooperative groups. The scholar will design and present to a group of peers a concept sheet for a phase I/II and phase II/III clinical trial.

CLRE 251. Epidemiology I (2)

Scholars will recognize and understand different types of study designs, the relative strengths and limitations of each, and the proper choice of study design in conducting their own research. They will also be able to identify and calculate the correct measure of risk for each study design. Participants will recognize major sources of bias, confounding and misclassification, and understand design and analysis methods of dealing with each. They will also be familiar with criteria to differentiate association from causation.

CLRE 252. Health Services Research (2)

Scholars will evaluate relevant outcomes in patient-oriented research from the patient (quality of life) and societal (economic) perspectives and locate potential resources for assessing the relevant outcomes in a wide variety of study designs. They will also be able to describe the relative strengths of different health services research approaches to a clinical problem. Finally, they will understand the components of clinical practice guidelines, including patient preferences, and how these guidelines both depend upon as well as inform patient-oriented research.

CLRE 253. Biostatistics I (2)

Scholars will understand principles of measurement of clinical data, recognize data types, and correctly identify statistical methods appropriate for analysis of a given clinical data set. They will gain experience in assembling a clinical dataset in formats suitable for analysis by STATA or other comparable statistical packages. They will learn skills to conduct graphical and numerical exploratory data analysis, comparative tests of categorical, ordinal, and continuous data, linear and logistic regression analysis, and survival analysis by life table and Kaplan-Meier techniques.

CLRE 254. Biostatistics II (2)

Scholars will understand and conduct advanced biostatistical analyses including: multiple linear and logistic regression, survival analysis, and Cox and extended Cox regression. The scholar will also be familiar with person-time rate analysis with Poisson regression and longitudinal data analysis in the presence of missing values and varying measurement times. *Prerequisites: Biostatistics I, CLRE 253.*

CLRE 255. Data Management and Informatics (2)

This course provides an orientation to database design and management and covers key issues regarding data handling for clinical research and clinical trials. Scholars will also become familiar with technology assessment and decision-making methods and analysis.

CLRE 256. Patient-Oriented Research II

This course will review the ethics and basic regulatory issues for research involving human subjects; the principles of data management for clinical research, including architecture, access and confidentiality, and integrity of databases; and skills in graphic and verbal presentation of research data. Scholars will prepare a mock submission to an IRB for peer review and practice presenting graphic and tabular data. *Prerequisite: Patient-Oriented Research I, CLRE 250.*

CLRE 257. Epidemiology II (2)

Scholars will select the appropriate sampling method and determine the sample size necessary for specific projects and adjust for confounding. Participants will be familiar with several specialized analytic techniques, including matched, cluster, and meta-analyses. They will also be familiar with methodological issues, unique to ecological, behavioral, and genetic studies. *Prerequisite: Epidemiology I, CLRE 251.*

CLRE 296. Independent Study Project (6)

The Independent Study Project (ISP) is the cornerstone of the MAS program. Students will be involved in a high-level clinical research project that integrates what they have learned in their formal course work. The ISP will be an independent and creative scholarly activity in an area related to one or more of the topics covered in the formal curriculum. Students' work will be evaluated by a committee of faculty, and, in some cases, industry advisers.

Terrence J. Sejnowski, Ph.D., *Biological Sciences—Neurobiology, Computer Science and Engineering, and Neurosciences*

Introduction

Cognitive science is a young and diverse field which is unified and motivated by a single basic inquiry: What is cognition? How do people, animals, or computers 'think,' act, and learn? In order to understand the mind/brain, cognitive science brings together methods and discoveries from neuroscience, psychology, linguistics, philosophy, and computer science. UCSD has been at the

forefront of this exciting new field and our Department of Cognitive Science was the first of its kind in the world. It is part of an exceptional scientific community and remains a dominant influence in the field it helped create.

In addition to preparing undergraduates for careers in a variety of sciences, the major also provides an excellent background for many professional fields, including medicine, clinical psychology, and information technology.

The concerns of cognitive science fall into three broad categories: the brain—the neurological anatomy and processes underlying cognitive phenomena; behavior—the cognitive activity of individuals and their interaction with each other and their sociocultural environment, including the use of language, information, and media; and computation—the capacity of mathematical and computer systems to model cognitive and neural phenomena and represent information, and the role of computers as cognitive tools.

The department collaborates closely with other academic departments and research communities, including the Center for Research in Language, the Center for Human Development, the Salk Institute for Biological Studies, the UCSD Medical Center, the San Diego Supercomputer Center, the Center for Functional Magnetic Resonance Imaging, and the new Kavli Institute for Brain and Mind, providing many outstanding resources and opportunities.

Students are encouraged to participate actively in the department by sharing their ideas about curriculum, research, and other topics with faculty and staff. Undergraduate students may join the Students in Cognitive and Neurosciences (SCANS) organization, which provides opportunities for undergraduates to meet students and faculty from UCSD and other institutes, visit research laboratories, and make job contacts. Graduate students take an especially active role in shaping the department, both academically and administratively, while they gain experience in research, teaching, and managing both labs and department affairs.

The Undergraduate Programs

The department offers both a B.A. and a B.S. degree. The B.S. requires completion of more rigorous lower-division course work and three additional courses at the upper-division level.

The B.S. degree may be taken optionally with a specified area of specialization. There is also an honors program for exceptional students in both degree programs. Major Code: CG25.

Please note: Students who officially declared the major before fall 2001 may choose to follow the old major requirements or the new major requirements, but not a combination of both. See department adviser for more information.

Grade Requirements for the Major

A minimum grade-point average of 2.0 is required for admittance to and graduation from the B.A. or B.S. degree program. Students must receive a grade of C- or better in any course to be counted toward fulfillment of the major requirements. All courses must be taken for a letter grade, with the exception of Cognitive Science 195, 198, and 199, which are taken Pass/No Pass.

Four-Year Plan of Study

The four-year plan of study below assures that all prerequisites and requirements for the cognitive science major are completed. The department does enforce course prerequisites and several courses are offered only once a year, so careful planning is important. It is recommended that lower-division courses be taken in the first two years, core courses in the third year, and electives in the final year. Check with a departmental adviser about which quarter cognitive science courses will be offered each academic year. Check with a college adviser about course planning to meet college requirements.

FRESHMAN YEAR: Twelve units of math (B.A.) or sixteen units of math (B.S.). Students intending to take Cognitive Science 118A and/or 118B should take Mathematics 20A-B-C.

College requirements

SOPHOMORE Cognitive Science 1. Cognitive Science 14. Cognitive Science 18. Students intending to take Cognitive Science 118A and/or 118B should take Mathematics 20E-F and Mathematics 180A.

JUNIOR YEAR: Nine core courses, chosen from a list of twelve (see *Core Sequences*)

SENIOR YEAR: Electives for the major

Lower-Division Requirements

All majors must complete lower-division courses in introductory cognitive science, mathematics, statistics, and computer programming:

MATHEMATICS REQUIREMENT

The cognitive science major requires twelve units of mathematics courses (for the B.A. degree), or sixteen units of mathematics courses (for the B.S. degree), chosen from the following list:

- Mathematics 10A-B-C
- Mathematics 20A-B-C-D-E-F
- Mathematics 15A or CSE 20
- Mathematics 15B or CSE 21

(Students should check with the Department of Mathematics for rules governing duplication of credit between the 10 and 20 series.)

LOWER-DIVISION REQUIREMENTS FOR THE B.A. DEGREE

Twelve units of mathematics courses chosen from the list above, in addition to the lower-division cognitive science course requirements.

LOWER-DIVISION REQUIREMENTS FOR THE B.S. DEGREE

Sixteen units of mathematics courses chosen from the list above, in addition to the lower-division cognitive science course requirements.

LOWER-DIVISION COGNITIVE SCIENCE COURSE REQUIREMENTS

The following lower-division courses in Cognitive Science are required for all majors:

- Cognitive Science 1
- Cognitive Science 14
- Cognitive Science 18

Students intending to take Cognitive Science 118A and/or 118B are advised to take Mathematics 20-A-B-C-E-F and Mathematics 180A before their junior year.

Upper-Division Requirements

The cognitive science major requires the completion of nine core sequence courses, plus three elective courses (for the B.A. degree), or six elective courses (for the B.S. degree). Students are advised to complete these core courses in their junior year, especially if they intend to apply to the honors program. The remainder of the

upper-division requirement is fulfilled by completing electives.

Core Sequences

The core sequences courses in the Department of Cognitive Science are:

- Cognitive Science 101A-B-C (Cognitive Theory and Phenomena)
- Cognitive Science 102A-B-C (Distributed Cognition, Everyday Cognition, Cognitive Engineering)
- Cognitive Science 107A-B-C (Cognitive Neuroscience)
- Cognitive Science 109, 118A-B (Computational Models of Cognition)

The cognitive science major requires the completion of nine courses from the core sequences, which must include two courses in the Cognitive Science 101 series, two in the Cognitive Science 102 series, two in the Cognitive Science 107 series, Cognitive Science 109, and two additional courses from any of the core sequences.

Electives

At least half of the electives for the major must be taken in the department. Courses in the Cognitive Science 19X series (190A, 190B, 190C, 198, 199) may NOT be used as an elective to satisfy the major requirements for the B.A. degree. One course in the Cognitive Science 19X series may be used as an elective to satisfy the requirements for the B.S. degree, but only with the approval of both the instructor who supervised the course and the undergraduate adviser. A course taken outside the department must meet the following criteria:

1. The course must deal with topics and issues that are clearly part of cognitive science.
2. The material must not be available in a course offered inside the department.

This policy permits students and their advisers to be responsive to changes in course offerings. Majors must obtain departmental approval for electives taken outside of the department.

Areas of Specialization

A major may elect to receive a B.S. in cognitive science with a specified area of specialization. The areas of specialization are intended to provide majors with guidance in choosing elective

courses and to make the specific interests and training of a major clear to prospective employers and graduate schools. Specifying an area of specialization is optional; however, students should take into consideration when planning for their specialization that approved courses are not necessarily offered every year.

To major in cognitive science with an area of specialization, the student must fulfill the requirements for the B.S. degree and must choose four of the required six elective courses from a list of approved electives for that area of specialization. (The lists of approved electives for each area of specialization are available in the department office.)

The following areas of specialization are currently offered by the department:

Specialization in Clinical Aspects of Cognition

This area of specialization is intended for majors interested in cognitive neuropsychology, psychiatry, cognitive disorders, and the effects of drugs and brain-damage on cognitive functions. Allowed electives include courses in those topics, as well as organic chemistry, biochemistry, and physiology. Major code: CG31

Specialization in Computation

This area of specialization is intended for majors interested in software engineering or research in computational modeling of cognition. Allowed electives include advanced courses in neural networks, artificial intelligence, and computer science. Students interested in this specialization will most likely select courses from the computer science and engineering course offerings, as courses offered within the cognitive science department are limited. Major code: CG27

Specialization in Human Cognition

This area of specialization is intended for majors whose primary interests include human psychology and applications of cognitive science in design and engineering. Allowed electives include courses in cognitive development, language, laboratory research of cognition, anthropology, and sociology. Major code: CG28

Specialization in Human Computer Interaction

This area of specialization is intended for majors interested in human computer interaction; Web; visualization; and applications of

cognitive science in design and engineering. Additional electives may be petitioned from communication, computer science, computer engineering, and visual arts. Major code: CG30

Specialization in Neuroscience

This area of specialization is intended for majors interested in neuroscience research or medicine. Allowed electives include courses in cognitive neuroscience, organic chemistry, biochemistry, and physiology. Major code: CG29

Cognitive Science Honors Program

The Department of Cognitive Science offers an honors program for a limited number of majors who have demonstrated excellence, talent, and high motivation.

Eligibility Requirements

Students are eligible for admission to the program when they:

1. Complete all core courses
2. Have at least junior level standing
3. Have at least a 3.5 GPA in upper-division major courses and at least a 3.0 overall GPA

Eligible students will enroll in four units of 190A (Pre-Honors Project in Cognitive Science) under a faculty member who has agreed to advise them on a potential honors project. Students may apply the COGS 190A course as an elective toward major requirements whether or not they enter the Honors Program. At the end of the 190A course, students will submit to their faculty mentor a written project proposal. The proposal will define the question to be investigated, survey existing literature, describe the approach and methods that will be used, explain how data will be collected if it is an empirical study, detail how human subjects requirements will be met if necessary, discuss expected results, and provide a timeline for project completion.

Acceptance in Honors Program

To formally enter the Honors Program, students must meet the eligibility requirements above, receive a grade of A- or better in COGS 190A, establish an honors committee of at least two faculty and one graduate student to review the proposal and advise them during the process of completing the honors project, and have their project proposal approved by their honors committee.

The honors committee must be kept informed of any deviations from the original approved project proposal and timeline. Students who fail to make satisfactory progress may be asked to withdraw from the program at any point the adviser or the department chair deems necessary.

Successful completion of the Honors Program requires:

1. Maintenance of a 3.5 GPA in upper-division major courses, and a 3.0 overall GPA
2. Completion of one cognitive science (or related) graduate level course (may be taken P/NP). Students may use the required graduate course as one of their electives for the major whether or not they complete the honors project
3. Completion of COGS 190B and 190C with letter grades of A- or better
4. Completion of COGS 190D (Preparation for Thesis Presentation), a 1-unit seminar given each spring (P/NP)
5. Completion of a written honors thesis describing the project
6. Approval of the thesis by the honors committee and the department chair
7. Satisfactory presentation of the honors thesis to the cognitive science community at the Honors Thesis Presentation Conference, spring quarter.

Students who successfully complete all of the requirements for the Honors Program will graduate with *Distinction in Cognitive Science* recorded on their transcripts.

Minors and Programs of Concentration

Each college has specific requirements, and students should consult with an academic adviser in their provost's office as well as a cognitive science adviser to be sure they fulfill requirements of the college and of the department.

To receive a minor from the Department of Cognitive Science, a student must complete a total of seven (four unit) courses; five of which must be upper-division. Lower-division requirements are normally fulfilled by completing (one of) Cognitive Science 1, 3, 10 or 11 and (one of) Cognitive Science 14, 17 or 18. Upper-division requirements are normally fulfilled by completing two cognitive science electives and one of the following sequences:

Cognitive Science 101A-B-C

Cognitive Science 102A-B-C
Cognitive Science 107A-B-C
Cognitive Science 108D-E-F
Cognitive Science 109, 118A-B

All courses must be taken for a letter grade. No grade below C- is acceptable.

Transfer Credit

Students who wish to transfer from another institution to UCSD as cognitive science majors should work closely with university advisers to ensure that all lower-division requirements have been completed and are equivalent to those offered at UCSD. It is extremely important for students to have completed lower-division requirements by the end of their sophomore year so they are prepared for core courses in their junior year. Advanced UCSD students who wish to transfer to the department should consult with the departmental advisers about credit for courses already completed.

Education Abroad

Students majoring in cognitive science are encouraged to participate in the Education Abroad Programs (EAP), and to investigate other options of foreign study through the Opportunities Abroad Program (OAP). By petition, credits earned through EAP/OAP can fulfill UCSD degree and major requirements. Please visit the Web site at <http://programsabroad.ucsd.edu> for further details. Financial aid is applicable and special study abroad scholarships are readily available.

The Graduate Programs

There are two Ph.D. programs, each with different admissions and graduation requirements. The *Department of Cognitive Science* offers a Ph.D. in cognitive science. Students are admitted to UCSD directly into the department and fulfill degree requirements of the department. The *Interdisciplinary Program in Cognitive Science* offers a joint Ph.D. in cognitive science and a home department (anthropology, communication, computer science and engineering, linguistics, neurosciences, philosophy, psychology, or sociology). Students are admitted to UCSD through the home department and fulfill the requirements of both the interdisciplinary program and the home department.

Ph.D. in Cognitive Science

This program provides broad training in neurological processes and phenomena; the experimental methods, results, and theories from the study of psychology, language, and social and cultural issues; and the studies of computational mechanisms. The first year is devoted to familiarizing the student with the findings and current problems in cognitive science through courses in foundations and issues.

By the second year, basic courses and laboratory rotations are completed, with the major emphasis on the completion of a year-long research project. Future years are spent completing the advancement to candidacy requirements and doing the thesis research. Throughout the program, there are frequent faculty-student interactions, including special lectures by the faculty or invited speakers and the weekly informal research discussions and cognitive science seminar.

Admissions

The application deadline is January 5. The admissions committee reviews each applicant's statement of purpose, letters of recommendation, GRE scores, previous education and work experience, and grade-point averages, then recommends candidates for admission to the entire faculty, who make the final decision.

Advising

An interim adviser is appointed to serve as general adviser and counselor for each entering student. The adviser helps chart a set of courses that fulfill the content area requirements, taking into account the student's prior training and interests. Students may change the interim adviser at any time (as long as the new interim adviser is willing). At the time of advancement to candidacy, students choose a permanent adviser who also functions as the chair of the dissertation committee.

All entering students are assumed to have basic prerequisite knowledge, and a list of basic readings will be provided to incoming students. Students who do not have this background can acquire it through self-study in the summer preceding arrival at UCSD or by taking self-paced study courses or relevant undergraduate courses at UCSD.

Summary of Requirements

1. Foundations courses
2. Approved study plan, which includes issues courses, methods courses, and laboratory rotations
3. Second-year project
4. Language requirement
5. Advancement to candidacy
6. Teaching
7. Cognitive Science 200 seminar
8. Participation in departmental events and committees
9. Ph.D. dissertation and defense

Description of Requirements

The expectation is that graduate students in the program will maintain a 3.4 GPA, and falling below this expectation may lead to the student being put on departmental probation. No course in which the student is assigned a grade below B- will be allowed to fulfill department requirements.

1. **Foundations Courses (Cognitive Science 201, 202, 203).** Students complete foundations courses in the areas of brain, behavior, and computation by the end of the second year. The department may waive some or all courses for students who already have the required knowledge.
2. **Study Plan.** Students complete a study plan recommended by their adviser. The normal plan includes:
 - a. **Issues Courses.** A minimum of six issues courses are required, at least one in each of the areas of brain, behavior, and computation. At least four of the issues courses should be taken within the department. Department recommends completion by the end of the second year. Issues courses taken outside the department require the approval of the adviser in conjunction with the Graduate Committee. Five of the six issues courses must be taken for a letter grade.
 - b. **Methods Courses.** Three methods courses are required, one of which must be an approved statistics course. Students should obtain approval for all three courses from their adviser. An approved list of courses is on file with the depart-

ment to assist students in selecting courses. Students may petition courses not on the approval list. Such petitions must be approved by the student's adviser and graduate committee. All three courses must be taken for a letter grade.

- c. **Laboratory Rotations (Cognitive Science 290).** A total of three quarters of laboratory rotations in at least two different faculty laboratories are required. Each rotation is for one to two full quarters as required by the faculty laboratory. All rotations should be completed by the end of fall quarter of the second year.

Students can meet this requirement in the following ways:

- Three one-quarter rotations in three different laboratories, or
- One one-quarter rotation and one two-quarter rotation in two different laboratories, or
- Two two-quarter rotations in two different laboratories for a total of four quarters enrolled in COGS 290.

Department recommends that student and adviser negotiate a topic and activity, then put the agreement in writing, sign, and give to the graduate coordinator.

3. **Second-Year Research Project (Cognitive Science 210A-B-C and 211A-B-C).** In the summer between the first and second year, students work with their adviser and a faculty committee to develop a prospectus for a research project. The year-long project culminates with written and oral presentations to the faculty at the end of spring quarter. During the second year, concurrent enrollment in Cognitive Science 210A-B-C and Cognitive Science 211A-B-C is required as part of the Second Year Project.
4. **Language Requirement.** The main goal of the language requirement is to give all students firsthand experience with some of the differences in structure and usage of languages and the several issues involved in the learning of second languages. This requirement can be satisfied by demonstrating satisfactory proficiency, by prior study in a language (e.g., two years of high school study), or by satisfactory completion of one quarter of study in a language course approved by the department.

5. **Advancement to Candidacy/Qualifying Paper and Oral Exam.** There are three components to advancement to candidacy:
 - a. Competency. This requirement is met by satisfactorily completing items 1-4 above.
 - b. Depth. This requirement is met by satisfactorily completing a talk to the entire department on their thesis topic by the end of the third year. A first draft of the thesis proposal must be submitted to the student's adviser by the end of the third year. Students enroll in COGS 205 during winter and spring quarter of the third year.
 - c. Dissertation Topic/Advancement Exam. The student prepares a proposal of the dissertation topic that must be approved by the student's doctoral committee. A final written proposal is submitted to the committee at least two weeks prior to an oral defense of the proposal. The doctoral committee consists of at least five faculty members: three from the department and two from outside the department; one of the outside members must be tenured.
6. **Teaching (Cognitive Science 500).** All graduate students must serve as a teaching assistant at least one quarter of each academic year in residence. The undergraduate program offers a special challenge to instructor and student alike, and experience with the teaching of that program can provide a valuable part of the education of a cognitive scientist. Teaching assistantships performed in other departments must be approved by formal petition to the graduate committee to count toward the requirement. The department works closely with the Center for Teaching Development to design effective training and development programs for its teaching assistants. At the end of each quarter, instructors prepare written evaluations of all teaching assistants.
7. **Cognitive Science 200 Seminar.** Students must enroll in this seminar for at least three quarters while in residence; frequent participation is encouraged.
8. **Participation in Departmental Events and Committees.** Students participate in departmental special events and committees and serve as student representatives for faculty meetings and the campus-wide Graduate

Student Association. Students present their research in the undergraduate SCANS series.

9. **Completion of the Ph.D. Dissertation and Defense.** Candidates prepare a written dissertation demonstrating a substantive contribution to our understanding of cognition. An oral defense follows.

Master's Degree

The Department of Cognitive Science does not offer admissions to a master's program. However, candidates for the Ph.D. who do not hold a master's degree from another institution may be granted the M.S. degree after fulfilling the first three requirements listed above. This is usually at the end of the second year. Duplication of advanced academic degrees, e.g., one at the same level, is not permitted at UCSD. Likewise, a professional degree at the master's or doctoral level, e.g., M.Ed., M.P.I.A., M.D., or Pharm.D., is not regarded as a duplicate of an academic degree.

Evaluation of Performance and Progress

A formal evaluation of performance and progress for all students takes place at the end of spring quarter every year, with special attention given to the first and second years of study and at the time of qualification. The first-year evaluation is based in large part on the performance in foundations and issues courses. The second-year evaluation is based on the student's total performance, with heavy weight given to the student's second-year research project. The third-year evaluation focuses on the competency and depth requirements, and the following years on the progress made toward completion of the dissertation.

Special Events

The department intends to enhance student-faculty interaction and current awareness of active research issues by special "events":

- Lectures by invited speakers or faculty members.
- A full day of faculty/student overview and information at the start of each year, with emphasis on ongoing research activity.

- Presentations of second-year research projects and third-year thesis topics to the entire faculty at the end of each year.
- Final defense of the dissertation accompanied by a public lecture and celebration.

Time Limits to Ph.D.

Students must be advanced to candidacy by the end of spring quarter of their fourth year. Total university support cannot exceed seven years. Total registered time at UCSD cannot exceed eight years.

Financial Aid

Financial support is available to qualified students in the form of fellowships, loans, and assistantships. Students are encouraged to seek fellowships and research awards from outside the university. Please refer to the Graduate Studies section for more information.

The Interdisciplinary Ph.D. Program

FACULTY

Professors

- Farrell Ackerman, Ph.D., *Linguistics*
Richard C. Atkinson, Ph.D., *UC President, Emeritus, Cognitive Science and Psychology*
Chris Barker, Ph.D., *Linguistics*
William Bechtel, Ph.D., *Philosophy*
Richard K. Belew, Ph.D., *Cognitive Science*
Ursula Bellugi, Ph.D., *Adjunct/Psychology*
Gregory Brown, Ph.D., *In-Residence, Psychiatry*
Patricia S. Churchland, B.Phil., *Philosophy*
Paul M. Churchland, Ph.D., *Philosophy*
Aaron V. Cicourel, Ph.D., *Emeritus, Cognitive Science and Sociology*
Michael Cole, Ph.D., *University Professor, Communication*
Garrison W. Cottrell, Ph.D., *Program Director, Computer Science and Engineering*
Eric Courchesne, Ph.D., *Neurosciences*

Lecturer

Christine M. Johnson, Ph.D., *Cognitive Science*

The interdisciplinary Ph.D. program is distinct from the departmental Ph.D. program (see previous section) both in admissions and graduation requirements. There are four aspects to graduate study in the interdisciplinary program: (a) a primary specialization in one of the established disciplines of cognitive science; (b) a secondary specialization in a second field of study; (c) familiarity with general issues in the field and the various approaches taken to these issues by scholars in different disciplines; and (d) an original dissertation project of an interdisciplinary character. The degree itself reflects the interdisciplinary nature of the program, being awarded jointly to the student for studies in cognitive science and the home department. Thus, students in linguistics or psychology will have degrees that read "Ph.D. in Linguistics and Cognitive Science" or "Ph.D. in Psychology and Cognitive Science."

Admission to the Program

Students enter UCSD through admission to one of the affiliated departments, which then serves as their home department, and which specifies their primary specialization. The affiliated departments are anthropology, communication, computer science and engineering, linguistics, neurosciences, philosophy, psychology, and sociology. Students may apply for admission to the interdisciplinary program anytime after entering UCSD, typically in the second or third year. Students must have an adviser from their home department who is a member of the interdisciplinary program faculty. If a student does not have such an adviser, a member of the Instructional Advisory Committee will be appointed as interim adviser. The Instructional Advisory Committee is made up of one interdisciplinary program faculty person from each of the home departments. The committee member that will serve as interim adviser for a student will come from the same home department as the student.

Note: Admission to the interdisciplinary Ph.D. program is contingent upon applying to and being accepted in a home department.

Primary Specialization

Primary specialization is accomplished through the home department. Students are expected to maintain good standing within their home departments and to complete all requirements of their home departments through qualification for candidacy for the Ph.D. degree.

Secondary Specialization

The power of an interdisciplinary graduate training program lies in large measure in its ability to provide the student the tools of inquiry of more than one discipline. Students in the cognitive science interdisciplinary program are expected to gain significant expertise in areas of study outside of those covered by their home departments. Such expertise can be defined in several ways. The second area might coincide with that of an established discipline, and study within that discipline would be appropriate. Alternatively, the area could be based upon a substantive issue of cognitive science that spans several of the existing disciplines, and study within several departments would be involved. In either case, students work with their adviser and the Instructional Advisory Committee to develop an individual study plan designed to give them this secondary specialization. A list of courses in cognitive studies at UCSD is available. This requirement takes the equivalent of a full year of study, possibly spread out over several years. Often it is valuable to perform an individual research project sponsored by a faculty member in a department other than the student's home department.

The following list demonstrates some ways to fulfill the secondary specialization requirement. It should be emphasized that these programs are only examples. Students will devise individual plans by working with their advisers and the advisory committee. Ideally, students who elect to do research in their areas of secondary interest will be able to accomplish a substantive piece of work, either one of publishable quality or one that will be of significant assistance in their dissertation projects.

Cognitive Psychology. Get a basic introduction to cognitive psychology through the Cognitive Psychology Seminar (Psychology 218A-B) and acquire or demonstrate knowledge of statistical

tools and experimental design (this can be done either by taking the graduate sequence in statistics, Psychology 201A-B, or through the standard "testing out" option offered to all psychology graduate students). Finally, and, perhaps of most importance, the student should do a year-long project of empirical research in psychology with the guidance of a member of the Department of Psychology.

Cognitive Social Sciences. A course sequence from sociology and anthropology, including one or two courses in field methods and a research project under the direction of a cognitive social sciences faculty member. The course sequence and project should be worked out with the advisory committee to reflect the interests and background of the student. Examples of courses include Distributed Cognition (Cognitive Science 234), Text and Discourse Analysis (Sociology 204), and the Anthropology of Language and Discourse (Anthropology 263). In addition, courses on field methods are offered by both anthropology and sociology.

Computer Science and Artificial Language. This specialization requires a thorough background in computer science. For those who enter the program without much formal training in this area, the secondary specialization in computer science includes some upper-division undergraduate courses (CSE 100, 102, 105) and a minimum of two graduate courses (CSE 250AB). (Note that these courses require basic knowledge of programming and discrete mathematics areas that may require some additional undergraduate courses for those who lack these skills.) Students with stronger backgrounds in computer science may go straight to graduate courses. For all students interested in this specialization, the course sequences and any projects should be worked out on an individual basis with the student's adviser.

Discourse Structure and Processing. This specialization is highly interdisciplinary, spanning linguistics, computer science, psychology, sociology, philosophy, and anthropology. Research within this specialization depends upon which discipline is given emphasis. Therefore, the specialization will have to be developed according to the interests of the student. All students will have to demonstrate awareness and knowledge of relevant studies and the approaches of the various disciplines.

Linguistics. Students who elect a secondary specialization in linguistics should specialize

either in the general area of syntax/semantics or in the general area of phonetics/phonology. Those who specialize in syntax/semantics should plan to take three courses in this area and one course in phonetics/phonology. Conversely, those who specialize in phonetics/phonology should plan to take three courses in this area and one course in syntax/semantics. The specific courses recommended will depend on the individual student's interests and should be arranged in conjunction with the Department of Linguistics faculty liaison to the Cognitive Science Interdisciplinary Program.

In addition, students will prepare a research paper (preferably originating in one of the above courses) that demonstrates control of the methodology and knowledge of important issues in their area of specialization.

Neurosciences. A student specializing in neurosciences would take a program of courses emphasizing brain-behavior relationships, including Behavioral Neuroscience (Neurosciences 264) and the Physiological Basis of Human Information (Neurosciences 243). In addition, depending upon the student's individual interests, one or more of the neurosciences core courses would be taken in the areas of Mammalian Neuroanatomy (Neurosciences 256), Neuropsychopharmacology (Neurosciences 277), and/or Neurochemistry (Neurosciences 234). In most cases, the student would also take a research rotation in the laboratory of a member of the neurosciences faculty.

Philosophy. Students who elect a secondary specialization in philosophy will focus on philosophy of science, philosophy of mind, philosophy of psychology, philosophy of neuroscience, or philosophy of language, depending on their area of primary specialization. Courses suitable for this program include Philosophy of Language (Philosophy 234), Philosophy of Mind (Philosophy 236), Philosophy of the Cognitive Sciences (Philosophy 250A), and Seminar on Special Topics (Philosophy 285), which will frequently focus on issues relevant to cognitive science. The course sequence should be worked out with the student's adviser.

Acquisition of Perspective on the Field

The cognitive science faculty offers a special seminar, Cognitive Science 200, that emphasizes the interdisciplinary approach to the field and

that covers a variety of different problems, each from the perspective of several disciplines. All students are required to enroll in this seminar a total of six quarters while in residence; most students regularly attend the seminar even after fulfilling the requirement. Students may substitute a Cognitive Science Foundations course for a Cognitive Science 200. A maximum of two quarters may be substituted.

Prequalifying Examinations

Students must complete any prequalifying and field requirements of their home department.

Qualifying Examinations

The Dissertation Advisory Committee. As soon as possible, students form a dissertation committee consisting of:

At least three members from the student's home department, including the student's adviser; and at least three members of the Cognitive Science Program, at least two of whom are not members of the student's home department.

University regulations require that at least one of the faculty members of the committee from outside the-home department must be tenured. The committee must be approved by the interdisciplinary program, the home department, and by the dean of Graduate Studies. The dissertation committee is expected to play an active role in supervising the student and to meet with the student at regular intervals to review progress and plans.

In the qualifying examination, the student must demonstrate familiarity with the approaches and findings from several disciplines relevant to the proposed dissertation research and must satisfy the committee of the quality, soundness, originality, and interdisciplinary character of the proposed research.

Interdisciplinary Dissertation

It is expected that the dissertation will draw on both the primary and secondary areas of expertise, combining methodologies and viewpoints from two or more perspectives, and that the dissertation will make a substantive contribution to the field of cognitive science.

Overview

The program can be summarized in this way:

In the first years, basic training within the student's primary specialization, provided by the home departments;

In the middle years, acquisition of secondary specialization and participation in the Cognitive Science Seminar;

In the final years, dissertation research on a topic in cognitive science, supervised by faculty from the program.

Time Limits. Time limits for precandidacy, financial support, and registration are those established for the home department. Normative time is six years.

COURSES

For course descriptions not found in the 2006–2007 General Catalog, please contact the department for more information.

LOWER-DIVISION

1. Introduction to Cognitive Science (4)

A team-taught course highlighting development of the field and the broad range of topics covered in the major. Example topics include addiction, analogy, animal cognition, artificial life, brain damage, cognitive development, distributed cognition, human-computer interaction, language, neuroimaging, neural networks, reasoning, robots, and real-world applications.

3. An Introduction to Computing (4)

A practical introduction to computers and how you can use their power. Designed for undergraduates in the social sciences. Topics include: basic operations of personal computers (MAC, PC), UNIX, word processing, email, spreadsheets, and creating web pages using the World Wide Web. *No previous background in computing required.*

8. Hands-on Computing (4)

Introductory-level course that will give students insight into the fundamental concepts of algorithmic thinking and design. The course will provide the students with first-person, hands-on experience programming a Web crawler and simple physical robots.

10. Cognitive Consequences of Technology (4)

The role of cognition and computation in the development of state-of-the-art technologies such as human computational interaction in aviation, air traffic control, medical diagnosis, robotics and telerobotics, and the design and engineering of cognitive artifacts.

11. Introduction to Cognitive Science: Minds and Brains (4)

How damaged and normal brains influence the way humans solve problems, remember or forget, pay attention to things; how they affect our emotions; and the way we use language in daily life.

14. Design and Analysis of Experiments (4)

Design, statistical analysis, and interpretation of experiments in the main areas of cognitive science: brain, behavior, and computation. Introduction to mathe-

matical foundations of probability and statistical decision theory. Decision theory is applied to the problem of designing and analyzing experiments. Students will participate in a group project in which they must design scientific experiments, collect data and analyze results. May fulfill general education requirements; ask a college adviser.

17. Neurobiology of Cognition (4)

Introduction to the organization and functions of the nervous system. Topics include molecular, cellular, developmental, systems, and behavioral neurobiology. Specifically, structure and function of neurons, peripheral and central nervous systems, sensory, motor, and control systems, learning and memory mechanisms. (Students may not receive credit for both Biology 12 and Cognitive Science 17. This course fulfills general-education requirements for Marshall and Roosevelt Colleges as well as Warren by petition.)

18. Introduction to Programming for Cognitive Science (4)

Fundamentals of computer programming are introduced. Topics include: fundamentals of computer architecture, variables, functions, and control structures; writing, testing, and debugging programs; programming style and basic software design. Examples and exercises focus on cognitive science applications. *Prerequisite: Mathematics 10A or 20A.*

25. Introduction to Web Programming (4)

Introduction to Web programming languages and their real-world applications. Concepts and languages covered include document structure (XHTML). A basic background in computing is required, but no prior programming experience.

87. Freshman Seminar (1)

The Freshman Seminar Program is designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminars are offered in all campus departments and undergraduate colleges, and topics vary from quarter to quarter. Enrollment is limited to fifteen to twenty students, with preference given to entering freshmen.

91. SCANS Presents (1)

The department faculty and the Students for Cognitive and Neurosciences (SCANS) offer this seminar exploring issues in cognitive science. It includes informal faculty research presentations, investigations of topics not covered in the curriculum, and discussions on graduate school and careers. (May be repeated when topics vary.)

99. Independent Study (2 or 4)

Independent literature or laboratory research by arrangement with and under direction of a Department of Cognitive Science faculty member. *Prerequisites: lower-division standing, completion of thirty units of UCSD undergraduate study, a minimum UCSD GPA of 3.0, and a completed and approved "Special Studies" form.*

UPPER-DIVISION

101A. Sensation and Perception (4)

An introduction to the experimental study of cognition with a focus on sensation and perception. *Prerequisite: Cognitive Science 1.*

101B. Learning, Memory, and Attention (4)

A survey of the experimental study of learning, memory, and attention. Topics include conditioning, automaticity,

divided attention, memory systems, and the nature of mental representation. *Prerequisites: Cognitive Science 1. Recommended: Cognitive Science 101A.*

101C. Language (4)

An introduction to structure of natural language, and to the cognitive processes that underline its acquisition, comprehension, and production. This course covers findings from linguistics, computer science, psychology, and cognitive neuroscience to provide an integrated perspective on human language abilities. *Prerequisite: Cognitive Science 1. Recommended: Cognitive Science 101A.*

102A. Distributed Cognition (4)

Distributed cognition extends beyond the boundaries of the person to include the environment, artifacts, social interactions, and culture. Major themes are the study of socially distributed cognition and the role of artifacts in human cognition. *Prerequisite: upper-division standing. Recommended: Cognitive Science 1 or Cognitive Science 10.*

102B. Cognitive Ethnography (4)

This course examines memory, reasoning, language understanding, learning, and planning directly in everyday, real-world settings. The coursework will include discussions of both the findings and the methodology of naturalistic studies of cognition. *Prerequisite: Cognitive Science 102A.*

102C. Cognitive Engineering (4)

Applications of cognitive science for the design of human-centered systems are explored. An extensive project analyzing an existing system or product or designing a new prototype application is required. *Prerequisites: Cognitive Science 102A and 102B recommended.*

107A. Neuroanatomy and Physiology (4)

This first course in the sequence focuses on principles of brain organization, from neurons to circuits to functional networks. It explores developmental plasticity, neuronal connectivity, cellular communication, complex signalling, and how these various dimensions form functional brain systems. *Prerequisite: Cognitive Science 1.*

107B. Systems Neuroscience (4)

This course is a rigorous introduction to the neurophysiological and neuroanatomical basis of human and animal cognition, covering cellular neurophysiology and circuit modeling, development, visual, somatosensory, auditory, motor, and limbic systems; neuroimaging and language. *Prerequisite: Cognitive Science 107A.*

107C. Cognitive Neuroscience (4)

This course studies brain systems implicated in attention, language, object recognition, and memory. Neurobiological evidence for functional subsystems within these processes and the way specialized systems develop are considered using findings from animal studies, human development, and behavioral and brain imaging. *Prerequisites: Cognitive Science 107B and its prerequisites.*

108D. Programming Methods for Cognitive Science (4)

(Course previously offered as COGS 108A fall 2001) The design, implementation, and analysis of algorithms and data structures. Applications include: symbolic artificial intelligence, neural networks, genetic algorithms, computer graphics, and human computer interaction. *Prerequisites: Cognitive Science 1 and Cognitive Science 18 or CSE 9A or CSE 10, or permission of instructor. Course not offered in 2006–07.*

108E. Neural Network Models of Cognition I (4)

(Course previously offered as COGS 108B winter 2002) This course is an elementary introduction to neural networks and their use in cognitive science. Students will learn how to construct and train neural networks to solve problems at both the psychological and neurological levels of cognition. *Prerequisite: Cognitive Science 108D.* Course not offered in 2006–07.

108F. Advanced Programming Methods for Cognitive Science (4)

(Course previously offered as COGS 108C spring 2002) This course focuses on providing students with additional programming experience in the design of cognitive science applications and modeling. Each time it is offered a specific application or modeling area will be covered. *Prerequisites: Cognitive Science 108E and Math 20F.* Course not offered in 2006–07.

109. Modeling and Data Analysis (4)

Exposure to the basic computational methods useful throughout cognitive science. Computing basic statistics, modeling learning individuals, evolving populations, communicating agents, and corpus-based linguistics will be considered. *Prerequisites: Cognitive Science 18 or equivalent programming course or consent of instructor.*

113. Cognitive Development (4)

This course examines the foundations and growth of mind, discussing the development of perception, imagery, concept formation, memory, and thinking. Emphasis is placed on the representation of knowledge in infancy and early childhood. (Credit may not be received for both Psychology 136 and Cognitive Science 113.) *Prerequisite: Cognitive Science 101B or Psychology 105 or Psychology 101.*

115. Neurological Development and Cognitive Change (4)

This course provides an overview of neurological development and explores the relations between physiological change and the experience of the child from the prenatal period through adolescence. *Prerequisite: Cognitive Science 17 or equivalent.*

118A. Natural Computation I (4)

This course is an introduction to computational modeling of biological intelligence, focusing on neural networks and related approaches to supervised learning. Topics include estimation, filtering, optimization, multilayer perceptrons, support vector machines, boosting, Bayes nets. *Prerequisites: Cognitive Science 109, Mathematics 20E, Mathematics 20F, and Mathematics 180A or consent of instructor.*

118B. Natural Computation II (4)

This course is an introduction to computational modeling of biological intelligence, focusing on neural networks and related approaches to unsupervised learning. Topics include density estimation, clustering, self-organizing maps, principal component analysis, information theoretic models, and evolutionary approaches. *Prerequisites: Cognitive Science 109, Cognitive Science 118A, Mathematics 20E, Mathematics 20F, and Mathematics 180A or consent of instructor.*

120. Human Computer Interaction (4)

This course is an introduction to the field of human computer interaction (HCI). It provides an overview of HCI from the perspective of cognitive science. *Recommended: Cognitive Science 10 and an introductory programming course.*

121. Human Computer Interaction Programming (4)

This course is an introduction to human computer interaction (HCI) programming. It focuses on architectures, implementation techniques, and cognitive issues involved in designing interactive interfaces. *Prerequisite: Cognitive Science 120 or consent of instructor.*

143. Animal Cognition (4)

Review of historical perspectives: introspectionist, behaviorist, and cognitivist models. Examination of how perceptual and motor constraints and ecological demands yield species-specific differences in cognitive repertoire. Contemporary issues in the comparative study of the evolution of human cognition. *Prerequisite: upper-division standing.*

151. Analogy and Conceptual Systems (4)

Human thought and meaning are deeply tied to the capacity for mapping conceptual domains onto each other, inducing common schemas and performing mental simulation. This course examines major aspects of this cognitive activity including metaphor, conceptual blending and embodied cognition. *Prerequisite: upper-division standing.* Course not offered in 2006–07.

152. Cognitive Foundations of Mathematics (4)

How the human mind/brain creates mathematics: embodiment, innovation, and creativity. The emergence and power of abstract concepts, such as infinity, infinitesimals, imaginary numbers, or zero. Cognitive approaches that connect mathematics to human thought in general. *Prerequisite: upper-division standing.*

154. Communication Disorders in Children and Adults (4)

Neural bases of language use in normal adults, and neural bases of language and communication development in normal children. Evidence on the language and communication deficits in adults (especially aphasia and dementia) and children (specific language impairment, focal brain injury, retardation, and autism). *Prerequisites: upper-division standing.*

156. Language Development (4)

A comprehensive survey of theory, method and research findings on language development in children ranging from the earliest stages of speech perception and communication at birth to refinements in narrative discourse and conversational fluency through middle childhood and adolescence. *Prerequisites: upper-division standing and background in developmental psychology and/or linguistics is recommended.* Course not offered in 2006–07.

160. Upper-Division Seminar on Special Topics (1-4)

Special topics in cognitive science are discussed. (May be repeated when topics vary.) *Prerequisite: department approval.*

170. Natural and Artificial Symbolic Representational Systems (4)

This course develops a detailed analogy between the evolution and architecture of language comprehension in human primates and symbol processing at the level of individual cells, contrasting this with the analogy between cognition and computation. *Prerequisites: Cognitive Science 17 or Biology 12; Cognitive Science 18 or Computer Science and Engineering 62AB recommended.*

172. Brain Disorders and Cognition (4)

A review of the patterns of impaired and intact cognitive abilities present in brain-damaged patients in terms of damage to one or more components of a model of normal cognitive functioning. (Cognitive

science majors may not receive elective credit for both Psychology 139 and Cognitive Science 172.) *Prerequisite: Cognitive Science 107A.*

174. Drugs: Brain, Mind and Culture (4)

This course explores how drugs interact with the brain/mind and culture. It covers evolutionary and historical perspectives, brain chemistry, pharmacology, expectancies and placebo effects, and models of addiction. It also provides a biopsychosocial survey of commonly used and abused substances. *Prerequisite: upper-division standing.* Midterm, final, paper.

175. The Neuropsychological Basis of Alternate States of Consciousness (4)

This course will review the literature that correlates brain rhythms in the human EEG with aspects of cognition, behavioral states, neuropsychopharmacology, and psychopathology in order to understand the psychological and neurophysiological underpinnings of these experiences. *Prerequisites: Cognitive Science 101A or Cognitive Science 107A.*

179. Electrophysiology of Cognition (4)

This course surveys the theory and practice of using recordings of electrical and magnetic activity of the brain to study cognition and behavior. It explores what brain waves reveal about normal and abnormal perception, processing, decision making, memory, preparation, and comprehension. *Prerequisites: Cognitive Science 107A or Psychology 106; Cognitive Science 101A or Psychology 105.*

181. Neural Network Models of Cognition II (4)

This course is a continuation of the study of neural models of cognitive systems with an emphasis on applications and a term-long student project. *Prerequisites: Cognitive Science 108E and its prerequisites.* Course not offered in 2006–07.

183. Artificial Life (4)

This class will explore models of life as it could be, in artificial as well as biological contexts. An attempt will be made to understand the characteristics which distinguish living from nonliving systems. Coursework includes computer simulations of artificial lifeforms. *Prerequisites: Cognitive Science 18, CSE 5A and 5B, or CSE 11, or equivalent.* Course not offered in 2006–07.

184. Modeling the Evolution of Cognition (4)

Mathematical and computational modeling of the evolution and mechanisms of simple cognitive functions. Theoretical background, including topics in population genetics, behavioral ecology, evolutionary game theory, dynamical systems theory, genetic algorithms and neural networks will be applied to questions concerning the evolution of behavioral strategies, the relation between evolution and learning, and the evolution of cooperation, communication and other aspects of social behavior. *Prerequisites: programming ability, calculus, and consent of instructor.*

187A. Cognitive Aspects of Multimedia Design (4)

This course will examine the cognitive basis of successful multimedia designs. We will be interested in what makes an interactive system effective: what makes images easy to understand, animations clear and helpful, and why some sequences of images, text, and sounds make more sense than others. Students will learn Web design, how to evaluate CD ROMs and assess their usability, and gain firsthand experience with the problems of visualization. No programming skills are presupposed but we do assume a strong familiarity with computer software. *Prerequisite: open to cognitive science majors with upper-division standing only.*

187B. Cognitive Aspects of Multimedia Design II (4)

This course follows up on the basics of multimedia design taught in Cognitive Science 187A. Students will probe more deeply into selective topics, such as animation, navigation, graphical display of information, and narrative coherence. A large fraction of time will be spent on group projects. *Prerequisites: COGS 187A; open to cognitive science majors with upper-division standing only.*

188. Representation, Search, and the Web (4)

Computational methods for finding and exploiting structure across vast data corpora, from personal email collections to the entire WWW. Implementation and evaluation of algorithms used as part of modern search engines, and how these are connected to models of shared cognition. *Prerequisites: Cognitive Science 108D or Computer Science and Engineering 12. Recommended: Cognitive Science 108F.*

190A. Pre-Honors Project in Cognitive Science (4)

This independent study course is for advanced students who wish to prepare for and apply to the Cognitive Science Honors Program. After completing this course, students may be admitted to the Honors Program contingent upon significant progress made during the course. (See "Cognitive Science Honors Program" section for more information.) Students should contact faculty whose research interests them to discuss possible projects. *Prerequisite: upper-division standing; instructor and department approval.*

190B. Honors Studies in Cognitive Science (4)

This course will allow cognitive science honors students to explore advanced issues in the field of cognitive science. It will also provide honors students the opportunity to develop an honors thesis on the topic of their choice and begin preliminary work under faculty supervision. Students will receive an "IP" grade in 190B and the grade assigned for 190C, when completed, will replace the "IP" in 190B. *Prerequisites: Cognitive Science 190A with grade of A- or better and formal admittance to the Cognitive Science Honors Program.* (See "Cognitive Science Honors Program" section for more information.)

190C. Honors Thesis in Cognitive Science (4)

This course will provide honors candidates an opportunity to complete the research on and preparation of an honors thesis under close faculty supervision. Oral presentation of student's thesis is required to receive honors; additionally, student must receive grade of A- or better in 190B and 190C to receive honors. *Prerequisite: Cognitive Science 190B with grade of A- or better and formal admittance to the Cognitive Science Honors Program.* (See "Cognitive Science Honors Program" section for more information.)

190D. Preparation for Thesis Presentation (1)

This course is affiliated with the honors program (190A-B-C) and is required of honors students during spring quarter. Its aim is to prepare students to present research results to an audience. Emphasis will be on the oral presentation (organization, wording, graphics), but there will also be some discussion about written research reports. Seminar style format with occasional short lectures wherein students will practice oral presentations and provide constructive criticism to each other. *Prerequisite: must be concurrently enrolled in 190B or 190C.*

191. Laboratory Research (1-4)

Students engage in discussions of reading of recent research in an area designated and directed by the instructor and also participate in design and execution

of original research. Assignments include both oral and written presentations and demonstrating the ability to pursue research objectives. *Prerequisites: consent of the instructor and department approval.* (May be repeated for credit, but not to exceed 8 units).

195. Instructional Apprenticeship in Cognitive Science (4)

Students, under the direction of the instructor, lead laboratory or discussion sections, attend lectures, and meet regularly with the instructor to help prepare course materials. Applications must be submitted to and approved by the department. *Prerequisites: upper-division standing; 3.0 GPA; instructor and department approval.* P/NP only.

197. Cognitive Science Internship (2 or 4)

The student will undertake a program of practical research in a supervised work environment. Topics to be researched may vary, but in each case the course will provide skills for carrying out these studies. *Prerequisite: consent of instructor.*

198. Directed Group Study (4)

This independent study course is for small groups of advanced students who wish to complete a one-quarter reading or research project under the mentorship of a faculty member. Students should contact faculty whose research interests them to discuss possible projects. *Prerequisites: upper-division standing; 2.5 GPA; consent of instructor and department approval.*

199. Special Project (2 or 4)

This independent study course is for individual, advanced students who wish to complete a one-quarter reading or research project under the mentorship of a faculty member. Students should contact faculty whose research interests them to discuss possible projects. *Prerequisites: upper-division standing; 2.5 GPA; consent of instructor and department approval.*

GRADUATE**200. Cognitive Science Seminar (4)**

This seminar emphasizes the conceptual basis of cognitive science, including representation, processing mechanisms, language, and the role of interaction among individuals, culture, and the environment. Current developments in each field are considered as they relate to issues in cognitive science. (May be repeated for credit.)

201. Systems Neuroscience (4)

This course is a rigorous introduction to the neurophysiological and neuroanatomical basis of human and animal cognition, covering cellular neurophysiology and circuit modeling; development; visual, somatosensory, auditory, motor, and limbic systems; neuroimaging and language.

202. Cognitive Science Foundations: Computational Modeling of Cognition (4)

This course surveys the development of symbolic and connectionist models of cognition. Selected readings from the late 1940s to the present are covered. Topics include: Turing machines, information theory, computational complexity, search, learning, symbolic artificial intelligence, and neural networks.

203. Cognitive Science Foundations: Theories and Methods in the Study of Cognitive Phenomena (4)

Surveys a variety of theoretical and methodological approaches to the study of human cognition. Topics include language structure, language processing, concepts and categories, knowledge representation,

analogy and metaphor, reasoning, planning and action, problem solving, learning and expertise, and emotion.

205. Introduction to Thesis Research (4)

This course is taken to focus the students' development of a thesis topic and research proposal. Students prepare an outline of thesis proposal and make an oral public presentation of the proposed topic prior to the end of the third year. S/U only.

210A-B-C. Introduction to Research (4-4-4)

This sequence is an intensive research project. Students under faculty mentorship perform a thorough analysis of the problem and the literature, carry out original studies, and prepare oral and written presentations. Students should aim for a report of publishable quality. *Letter grade required.*

211A-B-C. Research Methods in Cognitive Science (2-2-2)

Issues in design, implementation, and evaluation of research in cognitive science are discussed. Students will present and comment on their own research projects in progress. Discussions also include presentations of research to various audiences, abstracts, reviews, grant process, and scientific ethics. *Letter grade required.*

213. Issues in Cognitive Development (4)

This course examines current issues in human development of interest to cognitive scientists. An emphasis is placed on the foundations of mind and how information is represented at various stages of learning and development. (May be repeated once, when topics vary.)

215. Neurological and Cognitive Development (3)

This course is presented in two sections. The first part of the course focuses on early neurological development. The second part addresses questions concerned with the relations between cognitive brain development, and linguistic and affective development.

220. Information Visualization (4)

This seminar surveys current research in information visualization with the goal of preparing students to do original research. The focus is on the cognitive aspects of information design, dynamic representations, and computational techniques. Topics vary each time course is offered.

234. Distributed Cognition (4)

This course focuses on aspects of individual and socially distributed cognition. Empirical examples are drawn from natural and experimental settings which presuppose, tacitly or explicitly, socially distributed knowledge among participants. The class examines the way locally managed, pragmatic conditions influence how decisions are framed.

238. Topics in Cognitive Linguistics (1-4)

(Same as Linguistics 238) Basic concepts, empirical findings, and recent developments in cognitive and functional linguistics. Language viewed dynamically in relation to conceptualization, discourse, meaning construction, and cognitive processing. (As topics vary, may be repeated for credit.) Course not offered in 2006-07.

241. Ethics and Survival Skills in Academia (3)

(Same as Neurosciences 241) This course will cover ethical issues which arise in academia, including: dishonesty, plagiarism, attribution, sexual misconduct, etc. We will also discuss 'survival' issues, including job

hunting, grant preparation, journal reviews, writing letters of recommendation, mentoring, etc. S/U only.

243. Statistical Inference and Data Analysis (4)

This course provides a rigorous treatment of hypothesis testing, statistical inference, model fitting, and exploratory data analysis techniques used in the cognitive and neural sciences. Students will acquire an understanding of mathematical foundations and hands-on experience in applying these methods using Matlab.

245. Introduction to Probability Theory (4)

This is a one quarter introductory course on probability theory and applications. The target audience is researchers in the cognitive, computational and neural sciences. The course also introduces scientific programming in MatLab. The grade is based on homework, project, or a combination of both. Course not offered in 2006-07.

250. Connectionist Models of Language (4)

This course covers topics in computational psycholinguistics. The primary focus will be on connectionist models, but will also include work in statistical natural language processing as well as experimental psycholinguistics. Course not offered in 2006-07.

251. Aphasia (4)

Research and theory on language breakdown in brain-damaged adults is surveyed. Topics include an historical overview from linguistics, psycholinguistics, and neuroscience (especially brain imaging techniques). Credit may not be received for both Psychology 245 and Cognitive Science 251. Course not offered in 2006-07.

253. Semantics and Cognition (4)

This course explores current issues in the study of meaning and its interaction with other areas of cognitive science. The focus is on cognitive semantics, pragmatics, and meaning construction in general.

254. Pragmatics and Common Sense Reasoning (4)

A study of the pragmatic principles involved in language comprehension and the logic of everyday life. Cognitive, linguistic, cultural, and sociological aspects will be covered.

256. Language Acquisition (4)

Discussion of the acquisition of language by young children, including such topics as its stages, mechanisms, and relation to nonlinguistic development. Course not offered in 2006-07.

260. Seminar on Special Topics (1-4)

Specific topics in cognitive science are discussed. (May be repeated when topics vary.)

271. Cognitive Neuropharmacology (4)

This course provides a review of the neurochemistry of cognition. Topics include functional anatomy of neurotransmitter circuitry, computational properties of neuromodulation, interaction of psychoactive substances with brain and behavior, neuropharmacological accounts of cognitive disorders (e.g., addiction, depression, schizophrenia). Course not offered in 2006-07.

272. Topics in Theoretical Neurobiology (4)

The main focus of this course is the relationship between nervous system function and cognition. It covers broad theoretical issues and specific topics.

Material comes from lectures, papers, and the text. Topic varies each time the course is offered. (May be repeated for credit.)

273. Biological Basis of Attention (4)

A survey of the research and theories of attention with special emphasis on the current anatomical, physiological, and biochemical basis of attention.

275. Visual Modeling (4)

Visual system neurophysiology and neuroanatomy, and neurally realistic and artificial intelligence modeling approaches are covered. Topics are: dendrites, orientation and edges, motion, stereo, shading and color, eye movements, and pattern recognition. Students prepare computer modeling projects or research papers. Course not offered in 2006-07.

276. Foundations of Neuroimaging (4)

Foundations of neuroimaging: (1) MRI/fMRI: RF excitation, relaxation, echos, image formation, BOLD and flow, DTI, EPI, time and series analysis, (2) cortical surface reconstruction, morphing, mapping, and data display, (3) physiological basis of MEG and EEG, forward and inverse solutions.

279. Electrophysiology of Cognition (4)

This course surveys the theory and practice of using recordings of electrical and magnetic activity of the brain to study cognition and behavior. It explores what brain waves reveal about normal and abnormal perception, processing, decision making, memory, preparation, and comprehension. Graduate students will be required to do additional readings for the material each week (different for each grad) and to present orally (as well as in a written page) a critical analysis of the readings. *Prerequisites: COGS 107A or PSYC 106; COGS 101A or PSYC 105.*

290. Cognitive Science Laboratory Rotation (2)

Laboratory rotations provide students with experience in the various experimental methods used in cognitive science. *Prerequisite: consent of instructor.* S/U only.

291. Laboratory Research (1-4)

Students engage in discussions of reading of recent research in an area designated and directed by the instructor and also participate in the design and execution of original research. Students are expected to demonstrate oral and written competence in presenting original research. *Prerequisite: consent of the instructor and departmental approval.* (May be repeated for credit.)

298. Directed Independent Study (1-12)

Students study and research selected topics under the direction of a member of the faculty.

299. Thesis Research (1-12)

Students are provided directed research on their dissertation topic by faculty advisers.

500. Teaching Apprenticeship (1-4)

This practicum for graduate students provides experience in teaching undergraduate cognitive science courses. S/U only.

Communication

Noah Wardrip-Fruin, Ph.D.
Elana Zilberg, Ph.D.

Lecturer with Security of Employment

Claudio Fenner-Lopez, M.A., *Emeritus*

Communication at UCSD is a field of study which emphasizes the role of different technologies of communication, from language, to television, to the Internet, in mediating human experience. It draws from such social science disciplines as anthropology, psychology, sociology, and political science, and from the humanities and fine arts, including theatre, literature, and visual arts. Communication students will develop a critical awareness of the communicative forces that affect their everyday lives.

The communication major is not designed as a training program in advertising, journalism, production, or public relations. It provides students with a solid liberal arts background necessary for graduate studies in communication and other disciplines, and for professional work in a number of communication-related fields, including primary and secondary education.

Though the emphasis of the major is not a technical one, the faculty in the Department of Communication believe that students will develop a deeper understanding of how communication works by exploring firsthand the capabilities and limitations of a variety of media; students, therefore, will have the opportunity to conduct part of their studies in video, writing, theatre performance, or computer communication.

Within the Department of Communication curriculum are three broadly defined areas of study: Communication as a Social Force, Communication and Culture, and Communication and Human Information processing. Students take courses in each of these areas.

Communication as a Social Force

How are social systems affected by communication technology? What is the social organization of the communication industries? How is the information presented by the media related to the characteristics of the intended audiences? How do media fit into the power structure of societies? Courses in this area address such questions. Students analyze mass communications, the development of telecommunication and information technologies, and the political economy of communication institutions both at home and abroad.

Communication and Culture

Film, music, advertising, art, theater, ritual, literature, and language are forms of communication which embody cultural beliefs of the societies from which they come. These media can influence and bring about changes in social behavior, styles, and traditions. At the same time, individuals and groups can reshape the media. Students will study the social production of cultural objects, the cultural traditions that shape their form and content, and various approaches to interpreting or "reading" television, film, newspapers, language, rituals, and other forms.

Communication and Human Information Processing

How do people turn concepts and ideas into messages? What is the process by which people receive and respond to those messages? Each medium—whether it is language, writing, or electronic media—has different properties that change the way people create and comprehend messages. The impact of television on the individual, the effect of literacy on individuals and on cultures, the ways that concepts are transmitted in film, and the means by which computers expand communication potentials are examples of topics investigated in this area.

The Communication Major

Degree offered: Bachelor of Arts

The major consists of two lower-division courses and fourteen upper-division courses. None of the major courses may be taken on a Pass/No Pass basis.

Lower-Division

*COGN 20: Introduction to Communication
COGN 21: Methods of Media Production

Upper-Division

*COSF 100: Introduction to Communication as a Social Force
*COCU 100: Introduction to Communication and Culture
*COHI 100: Introduction to Communication and Human Information Processing
*COGN 150: Senior Seminar in Communication

One media methods course

Three courses beyond the introductory courses: (one must be chosen from each of the categories: COSF, COCU, and COHI)

Six upper-division communication electives

* These courses must be taken at UCSD.

Note: If students choose to do a 198, 199, or 197 note the following. COGN 198, 199, 197 grading option is Pass/No Pass and only ONE may be applied to the major to satisfy an upper-division elective. AIP 197 must be petitioned for approval for the major.

Residency Requirement

Students are required to complete at least ten classes of their overall work in the major at UCSD. Following are the communication classes required to be taken at UCSD. See your college adviser for further residency requirements.

COGN 20: Introduction to Communication

COGN 21: Methods of Media Production

COSF 100: Introduction to Communication as a Social Force

COCU 100: Introduction to Communication and Culture

COHI 100: Introduction to Communication and Human Information Processing

COGN 150: Senior Seminar

One COCU elective

One COHI elective

One COSF elective

One COMT elective

Requirements for the Communication Minor

(Effective fall 1998)

The communication minor at UCSD is a social science minor. None of the courses may be taken on a Pass/Not Pass basis. Students are required to take seven courses in communication as follows:

*COGN 20 (Introduction to Communication)

Two courses of your choice from the following 100's:

*COSF 100 (Introduction to Communication as a Social Force)

*COCU 100 (Introduction to Communication and Culture)

*COHI 100 (Introduction to Communication and Human Information Processing)

*Four upper-division communication electives within the areas of the chosen 100 classes.

*These courses must be taken at UCSD within the communication department.

Note: COGN 100, COGN 150, 197, 198, and 199 Media Methods, and courses outside of the department may not be used as electives within the minor.

The Honors Program

The Department of Communication offers an honors program to those students who have demonstrated excellence in the communication major. Successful completion of the honors

program enables the student to graduate "With Highest Distinction," "With High Distinction," or "With Distinction," depending on performance in the program. The honors program requires an application. Students wishing to be considered need to include the following in their application: one faculty adviser who supports their admission to the program, a verified overall GPA of 3.0 and a major GPA of 3.5, and a brief but detailed description of the proposed research or creative project.

Applications will be reviewed by a faculty committee, accepting students who meet these criteria. Students who do not meet these criteria but who have promising projects may be admitted by special dispensation with strong faculty endorsement and a letter of recommendation. Once accepted into the Honors Program, students are required to complete a two-quarter course sequence, COGN 191A/191B in the fall and winter quarters of their senior year. At the end of the fall quarter, students will receive an IP grade report. This grade will change to the final letter grade at the completion of the course sequence in the winter quarter. This grade is based on attendance in the seminars and successful completion of the research paper or creative production.

The Graduate Program

The Department of Communication offers a program of study leading to the Doctor of Philosophy degree. Communication at UCSD seeks to combine modes of analysis from the humanities and social sciences to explore the history, structure, and process of communication. The graduate program is conceived as a blending of the tradition of critical communication research with the empirical tradition of American scholarship. The program does not closely resemble any other communication department in this country. It is related by sympathy and interest to mass communication programs, but not by kinship. Historically, this department grew out of an interdisciplinary program jointly sponsored by the Departments of Drama (currently, Theatre and Dance), Political Science, Psychology, and Sociology. The department retains strong ties to the departments and disciplines from which it developed.

The study of communication at UCSD places major emphasis on historical and comparative approaches to symbolically mediated human

activity. The graduate curriculum is organized around three perspectives: 1. Communication as a Social Force, 2. Communication and Culture, and 3. Communication and the Individual. Communication as a Social Force deals with the history and political economy of mediated communication and the study of the media as social institutions. The department is particularly strong in the areas of telecommunications, regulation, and information studies. Special interests include the increasing importance of information and information technologies in American society and the global consequences of media practices. Communication and Culture involves the analysis of culture, using traditions from literature, folklore, history, sociology, and anthropology to focus on the social construction of interpretation and meaning. Special interests include the study of broadcast news, print journalism, commercial entertainment, and live performances as communicative systems. The department is particularly strong in the areas of popular culture, political culture, and the relationship of nature to culture. Communication and the individual involves examination of the individual as socially constituted through language and other media. Special interests include computer-mediated interaction, the effects of specified media practices on individual consciousness, and the language and culture of the deaf community. The program also emphasizes a production component in which students test theory in practical implementations. Some faculty and student interests bridge the components of the curriculum. Faculty research interests that do so include concepts of person and mind, communication and collective memory; relations of language, power and culture; gender and cultural forms; telecommunications and information studies and communication and technology in the work place.

Ph.D. Requirements

1. 200A-B-C (Introduction to the Theory of Communication as a Social Force, Communication and Culture, and Communication and the Individual).
2. 294, The History of Communication Research.
3. At least three methods courses from the 201 methodology sequence (see course listings).
4. Four courses in communication history and theory (see course listings).

5. 280, Advanced Workshop in Communication Media.
6. 296, Communication Research as an Interdisciplinary Activity.
7. First-Year Exam and Evaluation: At the end of the spring quarter of the student's first year, the student must pass a comprehensive written examination based on course work completed during the first year.
8. Language Requirement: All students are required to demonstrate proficiency in one language other than their native language.
9. Qualifying Examinations: Before the end of the fourth year the student must take and pass an oral qualifying examination. The exam will be based on two papers concerning two of the subfields covered in the program. The student will also present a separate dissertation proposal at the examination. At this time, the faculty will examine the proposal for appropriateness and feasibility.
10. Teaching Requirement: In order to acquire teaching experience, all students are required to participate in the teaching activities of the university for three academic quarters.
11. Dissertation: Acceptance of the dissertation by the university librarian represents the final step in completing all requirements for a Ph.D. The dissertation committee must be approved by the department chair and the dean of Graduate Studies.

Departmental Ph.D. Time Limit Policies

Students must be advanced to candidacy by the end of four years. Total university support cannot exceed seven years. Total registered time at UCSD cannot exceed eight years.

Student Advising

Faculty Graduate Adviser:
Brian Goldfarb, Ph.D.

Faculty Undergraduate Adviser:
Michael Schudson, Ph.D.

Undergraduate Student Affairs Advisers:
Bea Velasco
Jamie Lloyd

Graduate Program Coordinator:
Gayle Aruta

COURSES

For course descriptions not found in the 2006-2007 General Catalog, please contact the department for more information.

LOWER-DIVISION

General Communication

COGN 20. Introduction to Communication (4)

An historical introduction to the development of the means of human communication, from language and early symbols through the introduction of writing, printing, and electronic media, to today's digital and multimedia revolution. Examines the effect of communications media on human activity, and the historical forces that shape their development and use. Offered fall and spring quarters.

COGN 21. Methods of Media Production (4)

This course explores fundamental technical and social constraints shaping media production: light, optics, electricity, news media technology, camera techniques, basic editing languages, and aesthetic standards affecting production decisions. Satisfactory completion of COGN 21 is required to obtain a "media card." Offered winter and spring quarters.

UPPER-DIVISION

Communication as a Social Force

COSF 100. Introduction to Communication as a Social Force (4)

A critical overview of areas of macro communication and analysis, with special emphasis on the development of communication institutions, including broadcasting, common carriers, and information industries. Questions regarding power, ideology, and the public interest are addressed. *Prerequisite:* COGN 20. Offered fall quarter.

COSF 123. Communication, Dissent, and Social Movements (4)

Emergence of dissent in different societies, and the relationship of dissent to movements of protest and social change. Movements studied include media concentration, antiwar, antiglobalization, death penalty, national liberation, and labor. Survey of dissenting voices from Tolstoy and Naomi Klein seeking to explain the relationship of ideas to collective action and its outcomes. *Prerequisite:* COSF 100 or consent of instructor.

COSF 124. Black Women, Feminism, and the Media (4)

In Africa and the U.S., black feminists point out that their feminisms are different. Some black women who challenge norms of female behavior insist they are not feminist. We examine formal and informal black feminisms, and the mass media as an arena of black feminist struggle. *Prerequisite:* COSF 100 or consent of instructor.

COSF 125A-B. Civic Participation (4)

What are the sources of political apathy and political engagement? What are the variety of ways Americans express civic involvement and political concern? Primary focus will be on the contemporary United States, but with substantial attention to comparative and historical perspectives. COSF 125B is a continuation of COSF 125A.

This will be run as a research seminar. Students will write library-based or fieldwork-based empirical research papers of 25-40 pages. *Prerequisites:* COSF 100 or consent of instructor for COSF 125A. COSF 125A and instructor consent for COSF 125B.

COSF 127. The Internet Industry (4)

The political economy of the emergent Internet industry, charted through analysis of its hardware, software, and services components. The course specifies leading trends and changing institutional outcomes by relating the Internet industry to the adjoining media, telecommunications, and computer industries. *Prerequisite:* COSF 100 or consent of instructor.

COSF 128. Cultural Industries (4)

We examine how people interact with products of popular culture, production of cultural goods by looking at conditions in cultural industries. We examine film, music, publishing, focusing on how production is organized, what kind of working conditions arise, how products are distributed. *Prerequisites:* COSF 100 or consent of instructor.

COSF 132. History of U.S. Political Communication (4)

Survey of the history of political communication in the United States from the colonial period to the present. Students will work on term papers in which they will undertake original historical research. *Prerequisites:* COSF 100, communication major.

COSF 134. Communication, Politics, and Citizenship in America (4)

(Formerly COCU 134.) Selected topics, both historical and contemporary, on the public sphere, political participation, and the meaning of citizenship. Topics may include: voting practices, the role of political parties, social and cultural dimensions of citizenship, and shifts in public understanding of what counts as "political." The course may require five to ten hours of internship work, arranged through the AIP office. See instructor for further information. *Prerequisite:* COSF 100 or consent of instructor.

COSF 139A-B. Law, Communication, and Freedom of Expression (4-4)

An examination of the legal framework of the freedom of expression in the United States. 139A covers the fundamentals of First Amendment law through the consideration of key cases in historical context. Prior restraint, incitement, obscenity, libel, fighting words, public forum, commercial speech, and hate speech are some of the topics covered. 139B focuses on the law of mass communication, examining the different legal treatments accorded print, broadcasting, cable, and common carriers. The decline of broadcast regulation, the breakup of AT&T, the rise of new forms of mass communication, and the question of the public interest are of central concern. *Prerequisites:* 139A-COSF 100 or PS 40 or consent of instructor. 139B-COSF 100 or PS 40, COSF 139A preferred.

COSF 140B. Comparative Media Systems: Europe (4)

The development of media systems and policies in Europe. Differences between European and American journalism. Debates over the commercialization of television. The role of media in post-communist societies in Eastern Europe. *Prerequisite:* COSF 100 or consent of instructor.

COSF 140C. Comparative Media Systems: Latin America and the Caribbean (4)

The development of media systems and policies in Latin America and the Caribbean. Debates over

dependency and cultural imperialism. The news media and the process of democratization. Development of the regional television industry. *Prerequisite:* COSF 100 or consent of instructor.

COSF 14CXL. Foreign Language Discussion (1)

Students will exercise advanced foreign language skills to discuss materials and the correspondingly numbered communication language foreign area course. This section is taught by the course instructor, has no final exam, and does not affect the grade in the core course, COSF 140C. *Prerequisite:* concurrent enrollment in COSF 140C.

COSF 141. History of U.S. Telecommunications (4)

This course provides a sustained historical focus on the developing social form and industry structure of U.S. telecommunications, beginning with the Post Office. Policy issues are regularly incorporated into readings and discussions. Emphasis is placed on the emergence, around the turn of the century, of the regulated, national telephone network system dominated by AT&T and its extension. *Prerequisite:* COSF 100 or consent of instructor.

COSF 159. Work and Industry in the New Information Economy (4)

This course, a research seminar, examines the evolution of the so-called new information economy and analyzes the transformation of patterns of work and industrial organization. Students will be expected to write a research paper, typically on some aspect of the new economy in the San Diego-Tijuana region. *Prerequisite:* upper-division standing or consent of instructor.

COSF 160. Political Economy/Global Consumer Culture (4)

This course critically examines social and economic forces that shape the making of this new global consumer culture by following the flows of consumption and production between the 'developed' and 'developing' worlds in the 1990s. We will consider how consumers, workers, and citizens participate in a globalized consumer culture that challenges older distinctions between the 'First' and the 'Third World.' In this course, we will focus on the flows between the U.S., Asia, Latin America. *Prerequisite:* COSF 100 or consent of instructor.

COSF 161. Global Economy and National Identity (4)

Examine the interplay of globalization as a discourse and set of practices focusing on free movement of commodities and ideas, nationalist fragmentation marked by ethnic rivalry and identity conflict, seeks to examine those places where dualism is most pronounced. *Prerequisite:* COSF 100 or consent of instructor.

COSF 171A. American News Media (4)

(Same as Soc 165A.) History, politics, social organization, and ideology of the American news media. SF 171A surveys the development of the news media as an institution, from earliest new newspapers to modern mass news media. SF 171B deals with special topics, including the nature of television news, and with methods of news media research, and requires a research paper. *Prerequisite:* COSF 100 for COSF 171A; COSF 171A is required for COSF 171B.

COSF 172. The Cultural Politics of Sport (4)

Examine sport as play, performance, competition, an arena where there are politics, culture, power, identity struggles. Establishing the social meanings of sport, we address: ethics, race, class, nation, gender, body, science, technology, entertainment industries, commerce,

spectatorship, consumption, amateurism, professionalism. *Prerequisite: COSF 100 or consent of instructor.*

COSF 175. Advanced Topics in Communication: Social Force (4)

Specialized study in communication as a social force with topics to be determined by the instructor for any given quarter. Past topics include information as a commodity and book publishing. May be repeated for credit three times. *Prerequisite: COSF 100 or consent of instructor.*

COSF 180. Political Economy of Mass Communications (4)

The social, legal, and economic forces affecting the evolution of mass communications institutions and structure in the industrialized world. The character and the dynamics of mass communications in the United States today. *Prerequisite: COSF 100 or consent of instructor.*

COSF 181. Political Economy of International Communications (4)

The character and forms of international communications. Emerging structures of international communications. The United States as the foremost international communicator. Differential impacts of the free flow of information and the unequal roles and needs of developed and developing economies in international communications. *Prerequisite: COSF 100 or consent of instructor.*

COSF 183. The Politics of World Music (4)

What is "world music?" How, where, and why did it come into being? Is it a naturally occurring category of music? What makes it distinct from other music? We critically examine history of world music, analyzing how it is produced, circulated, and consumed. *Prerequisite: COSF 100 or consent of instructor.*

COSF 184. The Mass Media and Politics in Africa (4)

This course will critically examine the role of the mass media in Sub-Saharan Africa in the areas of colonial rule, nationalist struggles, authoritarianism, and popular movements. It will examine general trends regionally and internationally, as well as individual national cases, from the early twentieth century to the Internet news services of the information age.

COSF 185. Gender, Labor, and Culture in the Global Economy (4)

Course examines the ways in which women participate in the global economy as the producers of consumer products and of cultural goods like entertainment and information. It also examines power as it relates to women's labor in producing such material and cultural goods. *Prerequisite: COSF 100 or consent of instructor.*

COSF 186. Film Industry (4)

A study of the social organization of the film industry throughout its history, addressing such questions as who makes films, by what criteria, and for what audience. The changing relationships between studios, producers, directors, writers, actors, editors, censors, distributors, audience, and subject matter of the films will be explored. *Prerequisite: COSF 100 or consent of instructor.*

Communication and Culture

COCU 100. Introduction to Communication and Culture (4)

Processes of communication shape and are shaped by the cultures within which they occur. This course emphasizes the ways in which cultural understandings are constructed and transmitted via the variety of

communication media available to members. A wide range of cultural contexts are sampled, and the different ways that available communication technologies (language, writing, electronic media) influence the cultural organization of people's lives are analyzed. *Prerequisite: COGN 20, or HDP 1, or consent of instructor.* Offered winter quarter.

COCU 108. Visual Culture (4)

How visual images contribute to our understanding of the world and ourselves. Theoretical approaches from media studies, art history, gender studies, and social theory will be used to analyze cultures of science, art, mass media, and everyday life. *Prerequisite: COCU 100 or consent of instructor.*

COCU 110. Cinema in Latin America (4)

Analysis of the changing content and sociopolitical role in Latin America of contemporary media, including the "new cinema" movement, recent developments in film, and popular television programming, including the telenovela. Examples drawn from Mexico, Brazil, Cuba, and other countries. *Prerequisite: COCU 100 or consent of instructor.*

COCU 120. The Problem of Voice (4)

This course will explore the problem of self-expression for members of various ethnic and cultural groups. Of special interest is how writers find ways of describing themselves in the face of others' sometimes overwhelming predilection to describe them. *Prerequisite: COCU 100 or consent of the instructor.*

COCU 123. Black Women Filmmakers (4)

Students examine film and video media produced by black women filmmakers worldwide. This course will use readings from the writings of the filmmakers themselves as well as from film studies, women's studies, literature, sociology, and history. *Prerequisite: COCU 100 or consent of the instructor.*

COCU 124. Documentary History and Theory (4)

Lecture and discussion course in the history of nonfiction film and video. Through film and written texts we survey the nonfiction film genre, considering technological innovations, ethical issues, and formal movements related to these representations of the "real." Students write a research paper in lieu of a final. *Prerequisite: COCU 100 or consent of instructor.*

COCU 125. How to Read a Film (4)

The purpose of this course is to increase our awareness of the ways we commonly interpret or make understandings from movies and to enrich and increase the means by which one can enjoy and comprehend movies. We will talk about movies and we will explore a range of methods and approaches to film interpretation. Readings will emphasize major and diverse theorists, including: Bazin, Eisenstein, Cavell, and Mulvey. *Prerequisite: COCU 100 or consent of instructor.*

COCU 126. African Cinema (4)

Initiate a higher level of film literacy, sharpening, generating thoughtful criticism as it relates to world cinema, to foster a collaborative sense of a film/media community at UCSD where barriers between the filmmaker and audience are broken down and dialogue occurs. *Prerequisite: COCU 100 or consent of instructor.*

COCU 127. Folklore and Communication (4)

Folklore is an important variety of noncommercial communication in societies dominated by commercial media. A source of alternative understandings, folklore is characterized by particular styles, forms,

and settings. This course introduces a wide range of folklore genres from different cultures and historical periods, including oral narrative, material folk arts, dramas, and rituals. We will pay special attention to the relation between expressive form and social context. Sources include folklore texts, ethnographies, performances on film and videotape, novels, autobiographies, and student observations and experiences. *Prerequisite: COCU 100 or consent of the instructor.*

COCU 128. Folklore and Mass Media (4)

Local personal, vernacular, and oral traditions coexist with and influence the mass-produced, mass-mediated culture of the late twentieth century. This course examines the history of this influence, using materials such as oral histories, life stories, urban legends, and soap operas to explore the conjunctions of folklore and commercially produced entertainments in everyday social life. *Prerequisite: COCU 100 or consent of the instructor.*

COCU 129. Public History and Museum Studies (4)

This course will explore the role that "public history"—history as created for general audiences—plays in communicating cultural and national identities by examining museum exhibitions, their controversies, and how material objects mediate interpretations of the past. *Prerequisite: COCU 100 or consent of instructor.*

COCU 130. Tourism: Global Industry and Cultural Form (4)

The largest industry in the world has far-reaching cultural ramifications. We will explore tourism's history and its contemporary cultural effects, taking the perspective of the "toured" as well as that of the tourist. *Prerequisite: COCU 100 or consent of the instructor.*

COCU 132. Gender and Media (4)

This course examines the work of women artists and the history of the representation of women in the media, from the beginnings of cinema to the present, and offers a basic introduction to feminist media theory. It focuses on the representation of gender, and narrative and experimental strategies used by women media makers, and the role of the female spectator. *Prerequisite: COCU 100 or consent of the instructor.*

COCU 136. Concepts of Freedom (4)

This course examines some of the changing cultural, social, technological, and political meanings, practices, and aspirations that together constitute what is, and has been, called Freedom. *Prerequisite: COCU 100 or consent of the instructor.*

COCU 137. The Politics of Bodies (4)

This course will explore the construction of gendered bodies and gendered sexuality in postindustrial culture(s) through political, historical, and media analysis. Topics may include abortion, eating disorders, body modification, work and consumption, AIDS, and genetic engineering. *Prerequisite: COCU 100 or consent of instructor.*

COCU 138. Feminist Theory (4)

This class is designed to initiate students into the pleasures, pains, and perplexities of critical thinking about gender. We will survey a wide variety of thinkers and issues, consider some of the historical as well as contemporary debates within western feminist thought, and develop tools of analysis for future work. *Prerequisite: upper-division standing.*

COCU 139. Reproductive Discourse and Gender (4)

In this course we will examine as a problem of discourse and culture the controversies surrounding the development and use of the new technologies of human genetics and reproduction. Of particular interest will be the way in which these new technological practices and processes test, erode, or undermine traditional understanding of "human nature" and relationship while enforcing traditional understanding of gender. *Prerequisite: COCU 100 or CGS 2A or 2B or consent of instructor.*

COCU 140. Television, Culture, and the Public (4)

How and what does television communicate? Emphasis will be on contemporary U.S. television programming, placed in comparative and historical context. Special topics may include: TV genres; TV and politics; TV and other media. Frequent in-class screenings. *Prerequisite: COGN 20 or consent of the instructor.*

COCU 141A. Media and Technology: Global Nature, Global Culture (4)

Considers globalization's impact on concepts of nature in and through media texts, information systems, circulation of consumer goods and services, the emergence of global brands, science, health initiatives, environmental media activism, technology transfer in the twentieth and early twenty-first centuries. *Prerequisite: COSF 100 or COCU 100 or COHI 100 or consent of instructor.*

COCU 141B. Media and Technology: Gender and Biomedicine (4)

From historical and cultural aspects of media, information, imaging technology use in biomedical research, clinical care, health communication to constructions of gender, and identity. We approach the subject through audiovisual texts and writings from fields including science and technology studies and cultural studies. *Prerequisite: COSF 100 or COCU 100 or COHI 100 or consent of instructor.*

COCU 141C. Media and Technology: Disability (4)

Cultural and historical ways of defining and understanding disability relative to communication and assistive technologies, including the impact of digital technologies and the Americans with Disabilities Act. Use of audiovisual texts and writings from fields including science and technology studies, and cultural studies. *Prerequisite: COSF 100 or COCU 100 or COHI 100 or consent of instructor.*

COCU 142. Holocaust Discourse (4)

Legal, visual, historical, cultural discourses and debates that contribute to represent the Holocaust as a coherent and cohesive event, and as a touchstone of moral and political discourse in the U.S., entailing powerful stories about pluralism, tolerance, democracy, human rights, and justice. *Prerequisite: COCU 100 or consent of instructor.*

COCU 148. Communication and the Environment (4)

Survey of the communication practices found in environmental controversies. The sociological aspects of environmental issues will provide background for the investigation of environmental disputes in particular contested areas, such as scientific institutions, communities, work-places, governments, popular culture, and the media. *Prerequisite: COCU 100 or consent of instructor.*

COCU 160. Performance and Cultural Studies (4)

Explores performance as a range of aesthetic conventions (theater, film, performance art) and as a mode of experiencing and conveying cultural identity. Texts include critical writing from anthropology, psychol-

ogy, linguistics, media studies as well as film/video, play scripts, live performance. *Prerequisite: COCU 100 or consent of instructor.*

COCU 162. Popular Culture (4)

An overview of the historical development of popular culture from the early modern period to the present. Also a review of major theories explaining how popular culture reflects and/or affects patterns of social behavior. *Prerequisite: COGN 20 and COCU 100 or consent of instructor.*

COCU 164. Representing Race, Nation, and Violence in Multicultural California (4)

How does media representation of race, nation, and violence work? Taking multicultural California as our site, we will explore how social power is embedded in a variety of visual texts, and how media not only represents but also reproduces conflict. *Prerequisite: COCU 100 or consent of instructor.*

COCU 165. History, Memory and Popular Culture (4)

What role does popular culture play in shaping and creating our shared memory of the past? The course examines diverse sources such as school text books, monuments, holidays and commemorations, museums, films, music, and tourist attractions. *Prerequisite: COCU 100 or consent of the instructor.*

COCU 166. Cartoons (4)

This class relates cartoon programming for children to the history of western childhood and the contemporary American culture of the child. While other classes may deal with the effects of television on children, this one is designed to encourage students to review the long-standing western traditions of hope and fear associated with children that shape these concerns. *Prerequisite: COGN 20 and COCU 100 or consent of the instructor.*

COCU 168. Latino Space, Place, and Culture (4)

Develop a critical understanding of the history, politics, and poetics of the Latino *barrio* as a distinct urban form. Course covers key concepts such as the production of space, landscapes of power, spatial apartheid, everyday urbanism, urban renewal, and gentrification. *Prerequisite: COCU 100 or consent of instructor.*

COCU 169. Domination and Resistance (4)

Explores theories and narratives of cultural power, contemporary practices of resistance. Texts from a wide range of disciplines consider how domination is enacted, enforced, and what modes of resistance are employed to contend with uses and abuses of political power. *Prerequisite: COCU 100 or consent of instructor.*

COCU 170. Advertising and Society (4)

Advertising in historical and cross-cultural perspectives. Topics will include the ideology and organization of the advertising industry; the meaning of material goods and gifts in capitalist, socialist, and nonindustrial societies; the natures of needs and desires and whether advertising creates needs and desires; and approaches to decoding the messages of advertising. *Prerequisite: COCU 100 or consent of instructor.*

COCU 175. Advanced Topics in Communication: Culture (4)

Specialized study in communication and culture with topics to be determined by the instructor for any given quarter. Past topics include critical theory, rituals and spectacles. May be repeated for credit three times. *Prerequisite: COCU 100 or consent of instructor.*

COCU 179. Colonialism and Culture (4)

This course examines colonial narratives, slave accounts, essays, and stories by both colonizers and colonized. It also explores the issue of nationalism in determining the limits of colonialism among minority groups in the United States and in the Third World. *Prerequisite: upper-division standing.*

COCU 182. Black Popular Music (4)

Examine black popular music as social practice, cultural product, historically. African American musical expressions, discussions of race and intercultural exchange, power, social change, sound and identity, music industry, black performance. Music making, hearing, performance are examined. *Prerequisite: COCU 100 or consent of instructor.*

COCU 183. Popular Music, Social Practices, and Cultural Politics (4)

Focuses on popular music as a social, aesthetic, historical, political formation. Relationship between musical and extramusical forces (institutions, communities, industries, identities) will be examined. Music making, hearing, performance will be engaged as sites of expressive practice, cultural politics, social identity. *Prerequisite: COCU 100 or consent of instructor.*

Communication and Human Information Processing

COHI 100. Introduction to Communication and the Individual (4)

An introduction to theories of human mental processes which emphasizes the central role of meditation. The course covers methods of research that permit the study of mind in relation to different media and contexts of use. The traditional notion of media effects is critically examined in a number of important domains, including television, film, writing, and oral language. *Prerequisite: COGN 20 or HDP 1, or consent of instructor. Offered spring quarter.*

COHI 108. The Development of Communication in Children (4)

The course serves as an introduction to research methods in the study of child development. The special focus of the course will be on how children acquire competence in symbolic communication, including language, drawing, writing, and number systems. Observation of children in their interactions with each other and adults will be required. *Prerequisite: COHI 100 or consent of instructor.*

COHI 114. Bilingual Communication (4)

This course is designed to introduce students to the multiple settings in which bilingualism is the mode of communication. Students will examine how such settings are socially constructed and culturally-based. Readings on language policy, bilingual education, and linguistic minorities, as well as field activities will constitute the bulk of the course. *Prerequisite: COHI 100 or consent of instructor.*

COHI 115. Education and Global Citizenship (4)

The course introduces students to concepts, possibilities, and dilemmas inherent in the notion of global citizenship. Students will formulate goals and instructional strategies for global education and the expected competence of an individual within a global society—able to focus simultaneously upon many diverse elements, issues, and contexts. It will examine the role that communication and curriculum can play in the formation of identity, language use, and civic responsibility of a global citizen. *Prerequisite: COHI 100 or consent of instructor.*

COHI 117. Language, Thought, and the Media (4)

This course examines the ways in which various communicative channels mediate human action and thought. A basic premise of the course is that human thought is shaped in important ways by the communicative devices used to communicate. There is a particular emphasis on how thought develops, both historically and in the individual. *Prerequisite: COHI 100 or consent of instructor.*

COHI 119. Learning to Read (4)

This course explores learning to read as a process involving individual, cultural, and social resources. Reading difficulty is understood as induced by lack of resources, such as access to books or access to strategies for decoding, comprehension, and analysis of written text. Activities of reading are taken as a basic context for understanding patterns of chronic and pervasive reading difficulty in their populations. *Prerequisite: COHI 100 or consent of instructor.*

COHI 120. Reading the Web (4)

This course explores how networked computing has helped change many aspects of modern life, from how we manage illness to how we see ourselves culturally. The focus of the class is the online venue—how has the Web become part of daily life? What is different about goods, services, and events that transpire online? What theories of communication and social interaction are useful in understanding online behavior? *Prerequisite: COHI 100 or consent of instructor.*

COHI 121. Literacy, Social Organization, and the Individual (4)

This course will examine the historical growth of literacy from its earliest precursors in the Near East. The interrelation between literate technology and social organization and the impact of literacy on the individual will be twin foci of the course. Arriving at the modern era, the course will examine such questions as the impediments to teaching reading and writing skills to all normal children in technological societies and the relation between literacy and national development in the Third World. *Prerequisite: COHI 100 or COCU 100 or HDP 1 or consent of instructor.*

COHI 122. Communication and the Community (4)

This course examines forms of communication that affect people's everyday lives. Focusing on ways that ethnic communities transmit and acquire information and interact with mainstream institutions, we examine a variety of alternative local media, including murals, graffiti, newsletters, and community radio. *Prerequisite: COHI 100 or consent of instructor.*

COHI 123. Children and Media (4)

A course which analyzes the influence of media on children's lives. The course adopts an historical as well as social perspective on childhood within which media plays a role. Among media studied are books, films for children, video games, computer games, and television. *Prerequisite: COGN 20 or HDP 1 or consent of instructor.*

COHI 124. Voice: Deaf People in America (4)

The relationship between small groups and dominant culture is studied by exploring the world of deaf people who have for the past twenty years begun to speak as a cultural group. Issues of language, communication, self-representation, and social structure are examined. *Prerequisite: COHI 100 or consent of instructor.*

COHI 125. Communication in Organizations (4)

Organizations are analyzed as historically-evolving discursive systems of activity mediated by talk, text,

and artifacts. The class covers sense making, coordinating, symbolizing, talking, negotiating, reading and writing, story-telling, joking, and visualizing in organizations. Exemplary case studies, employing several complementary theoretical frameworks, are used to analyze these communicative processes. *Prerequisite: COHI 100 or consent of instructor.*

COHI 126. Toys and the Material Life of Children (4)

This course reviews a history of toys and those used by children. Toys will be studied from the view of their imagery and market popularity, including dolls, action figures, blocks, trains, cars, computer games, and "educational toys." Students will analyze the toy industry and its impact on childhood, leisure, and family life. *Prerequisite: COHI 100 or consent of instructor.*

COHI 127. Biography and Life Stories (4)

Course examines several different ways of telling stories as a form of communication: our own life and about the lives of others. There are also the occasions that the life stories of ordinary people are told at and celebrated: for example, funerals, festschrifts, retirement dinners, fiftieth-anniversary parties, and retrospective art shows. *Prerequisite: COHI 100 or consent of instructor.*

COHI 129. Borderlands (4)

Communicative and identity aspects of "marginality"—belonging to more than one race, community, or nationality, and on the literature about insiders and outsiders. Considers contemporary race-critical and feminist theory, including cyborg anthropology, the historical concept of race in America, and the problematics of multiple memberships of various sorts. *Prerequisite: COHI 100 or consent of instructor.*

COHI 134. Language and Human Communication (4)

This course looks at the interaction of technology, culture, and language, with a focus on narrative styles. Theories on the role of technology in shaping and transforming talk are examined. Cultural properties such as physical space and work traditions are studied as they bear on styles of talking and talking about the world. Storytelling, humor, and talk of children are used as examples of styles of talking. *Prerequisite: COHI 100 or consent of instructor.*

COHI 135. Language and Globalization (4)

The interaction of language and culture in human communication. New and old languages, standard and dialect, dominant and endangered, are the special focus. Selected languages as examples of how languages exist in contemporary contexts. *Prerequisite: COHI 100 or consent of instructor.*

COHI 143. The Psychology of the Filmic Text (4)

The course will examine a variety of films using different perspectives and methods of psychology to analyze the types of problems raised by the nature of cinematic communication. Topics will include an introduction to basic elements of cinematography, theoretical and technical bases of film's "grammar," perception of moving pictures, the function and status of sound, the influence of film on behavior and culture (and vice versa), the representation of psychological and social interaction, the communication of narrative and spatial information formation, the generation and translation of film's conventions, and the parameters which the medium and the culture impose upon the attempt to express various forms of abstraction in the concrete visual language of film. *Prerequisite: COHI 100 or consent of instructor.*

COHI 175. Advanced Topics in Communication: Human Information Processing (4)

Specialized study in communication: human information processing with topics to be determined by the instructor for any given quarter. May be repeated for credit three times. *Prerequisite: COHI 100 or consent of the instructor.*

Communication Media Methods

COMT 100. Nonlinear/Digital Editing (4)

Prepare students to edit on nonlinear editing facilities and introduce aesthetic theories of editing: time code editing, time line editing on the Media 100, digital storage and digitization of audio and video, compression, resolution, and draft mode editing. *Prerequisites: communication majors, COGN 21.*

COMT 101. Television Analysis and Production (6)

An introduction to the techniques and conventions common to the production of news, discussion, and variety-format television programs. Particular emphasis will be placed on the choice of camera "point of view" and its influence on program content. Laboratory sessions provide students the opportunity to experiment with production elements influencing the interpretation of program content. Concentration on lighting, camera movement, composition, and audio support. *Prerequisite: COGN 21 or consent of instructor.*

COMT 102. Introduction to Media Use in Communication (4)

Students will engage in projects, using media, to address theories of communication. Students can use film, video, computers, pen and paper, photography, posters, or performances for their projects. *Prerequisites: COGN 20 and COGN 21.*

COMT 103. Television Documentary (6)

An advanced television course which examines the history, form, and function of the television documentary in American society. Experimentation with documentary techniques and styles requires prior knowledge of television or film production. Laboratory sessions apply theory and methods in the documentary genre via technological process. Integrates research, studio and field experience of various media components. *Prerequisite: COMT 101 or COGN 21 or consent of instructor.*

COMT 104. Studio/TV (4)

This course offers students the opportunity to produce and engage in critical discussions around various television production formats. We will study and produce a variety of projects including public service announcements, panel programs, scripted drama, and performance productions. *Prerequisite: COGN 21 or consent of instructor.*

COMT 105. Media Stereotypes (4)

An examination of how the media present society's members and activities in stereotypical formats. Reasons for and consequences of this presentation are examined. Student responsibilities will be: (a) participation in measurement and analysis of stereotype presentations; (b) investigating techniques for assessing both cognitive and behavioral effects of such scripted presentations on the users of media. Course can be taken to meet COCU major requirement. *Prerequisite: COCU 100 or consent of instructor.*

COMT 107. Internet Journalism (4)

This course focuses on writing for Internet publications and using the Internet for research and hyper-text bibliography. Students will be required to learn and use a web-programming language. News writing

for the Internet will be compared to news writing in other media, including print journalism. *Prerequisites: communication major, COGN 20 or consent of instructor.*

COMT 109. Digital Media Pedagogy (4)

This course teaches techniques for teaching digital media: such as Word, Photoshop, PageMaker, digital cameras, digital video, non-linear editing. What are the special challenges digital media present to teachers and students? How do digital media compare to older technologies such as typewriters, film cameras, and analog video? How do gender, class, and age affect the way students and teachers respond to digital media? At least six hours of fieldwork at a computer lab of their choice or at Seiter's project at Adams Elementary will be required. Experience with computers and/or digital imaging recommended. *Prerequisite: communication majors only.*

COMT 110. News Media Workshop (4)

Designed for students working in student news organizations or off-campus internships or jobs in news, public relations, or public information. A workshop in news writing and news analysis. *Prerequisites: COCU 100 and COSF 171 (may be taken concurrently) or consent of instructor.*

COMT 111A-B. Communicating and Computers (4-4)

This course introduces students to computers as media of communication. Each quarter students participate in a variety of networking activities designed to show the interactive potential of the medium. Field work designed to teach basic methods is combined with readings designed to build a deeper theoretical understanding of computer-based communication. Courses can be taken to meet COHI major requirement. *Prerequisites: COHI 100 and communication major or consent of instructor.*

COMT 112. Ethnographic Methods for Media Research (4)

This is a practical course on ethnographic fieldwork—obtaining informed consent interviewing, negotiating, formulating a research topic, finding relevant literature, writing a research paper, and assisting others with their research. Course can be taken to meet COHI major requirement. *Prerequisite: COHI 100 or consent of instructor.*

COMT 115. Media and Design of Social Learning Contexts (6)

(Same as HDP 115). A combined lecture/lab course cross listed in Communication and Human Development. Students attend lecture, write fieldnotes, and spend 3 hours per week in specially designed after-school settings working with children and designing new educational media and producing special projects. *Prerequisite: COHI 100 or HDP 1.*

COMT 116. Practicum in Child Development (6)

(Same as HDP 135.) A combined lecture and laboratory course for juniors and seniors in psychology and communication. Students should have a solid foundation in general psychology and communication as human information processing. Students will be expected to spend four hours a week in a supervised practical after-school setting at one of the community field sites involving children. Additional time will be devoted to readings and class prep, as well as, six hours a week transcribing field notes and writing a paper on some aspect of the field work experience as it relates to class lectures and readings. Please note that the enrollment size for each site/section is limited. See department course listing for site/section descriptions. *Prerequisite: COHI 100 or HDP 1 or Psych 101.*

COMT 120. Documentary Sketchbook (4)

Digital video is the medium used in this class both as a production technology and as a device to explore the theory and practice of documentary production. Technical demonstrations, lectures, production exercises, and readings will emphasize the interrelation between production values and ethics, problems of representation, and documentary history. *Prerequisite: COGN 21 or consent of instructor*

COMT 121. Sound Production and Manipulation (4)

Advanced seminar in sound production, design, editing. Students create projects by recording original sounds, editing on a Pro-Tools system. We consider the potential of sound in film, radio, TV, and the Web by reviewing work and reading sound theory. *Prerequisites: communication majors only and COGN 21.*

COMT 122. Social Issues of Media Production (4)

Analyze forms of social issue media production, photography, audio/radio, arts, crafts, Web, print zines, political documentary. Students work with several forms of media making: video, audio, Web design, and a project in their chosen format. *Prerequisite: COGN 21 or consent of instructor.*

COMT 175. Advanced Topics in Communication, Media Methods (4)

Specialized "practice" in communication: media methods with topics to be determined by the instructor in any given quarter. May be repeated for credit three times. *Prerequisite: communication majors only.*

General Communication

COGN 150. Senior Seminar in Communication (4)

This course examines in detail some topic in the field of communication, bringing to bear several of the approaches and perspectives introduced in the basic communication curriculum. Seminars will be limited to 25 students and class participation is stressed. A research paper is required. *Prerequisite: senior standing or consent of instructor.*

COGN 175. Advanced Topics in Communication: General (2)

Specialized study in general communication with topics to be determined by the instructor, for any given quarter. May be repeated for credit. *Prerequisite: must be taken with AIP 197.*

COGN 191A-B. Honors Seminar in Communication (4)

Preparation of an honors thesis, which can be either a research paper or a media production project. Open to students who have been admitted to the honors program. Grades will be awarded upon completion of the two-quarter sequence. *Prerequisite: admission to the honors program.*

COGN 194. Research Seminar in Washington, D.C. (4)

(Same as PS 194, USP 194, Hist 193, SocE 194, Erth 194.) Course attached to six-unit internship taken by students participating in the UCDC program. Involves weekly seminar meetings with faculty and teaching assistants and a substantial research paper. *Prerequisite: participation in UCDC program.*

COGN 198. Directed Group Study in Communication (4)

Directed group study on a topic or in a field not included in the regular curriculum by special arrangement with a faculty member. (P/NP grades only.) May be taken three times for credit. *Prerequisite: consent of instructor.*

COGN 199. Independent Study (4)

Independent study and research under the direction of a member of the staff. (P/NP grades only.) *Prerequisite: consent of instructor.*

GRADUATE

COGR 200A. Introduction to the Study of Communication as Social Force (4)

This course focuses on the political economy of communication and the social organization of key media institutions. There will be both descriptive and analytical concerns. The descriptive concern will emphasize the complex structure of communication industries and organizations, both historically and cross-nationally. The analytic focus will examine causal relationships between the economic and political structure of societies, the character of their media institutions, public opinion, and public attitudes and behaviors expressed in patterns of voting, consuming, and public participation. The nature of evidence and theoretical basis for such relationships will be critically explored.

COGR 200B. Introduction to Study of Communication: Communication and Culture (4)

This course focuses on questions of interpretation and meaning. This course will examine how people use texts to interpret the world and coordinate their activities in social groups. Students will study both theories of interpretation in the conventional sense and theories about the act of interpreting.

COGR 200C. Introduction to the Study of Communication: Communication and the Individual (4)

This course will draw on theorists who examine human nature as constituted by social, material, and historical circumstances. This course considers the media in relation to the ontogenetic and historical development of the human being and an examination of the individual as socially constituted in a language-using medium. The role of new communication technologies as part of research methodologies is explored in lecture-seminar.

COGR 201B. Ethnographic Methods for Communication Research (4)

A supervised and coordinated group project will allow students to develop competence in a variety of ethnographic approaches to communication. Subjects covered include choosing a field-work site, setting or process for participation; entry and development of relationships; techniques of observation, interviewing, notetaking, and transcription. Course may also include photography and video as research tools. All participant observation and interviewing strategies fall under the review of the Committee on Human Subjects.

COGR 201C. Discourse Analysis (4)

Review and critique of studies employing discourse analysis, focusing on the ways that "discourse" is identified, recorded, and reported. A working notion of "discourse" will develop from works representing diverse disciplinary approaches. Students will record, transcribe, and report on segments of talk in an everyday setting. All participant observation and interviewing strategies fall under the review of the Committee on Human Subjects.

COGR 201D. Historical Methods for Communication Research (4)

Different approaches to conducting historical research in communication. Such approaches may include the social history of communication technology; structuralist and poststructuralist accounts of language, media, and collective memory; and new historicist treatments of cultural history. Sources, documentation, and the nature of argument from historical evidence are emphasized.

COGR 201H. Qualitative Methods in Audience Research (4)

This course explores the social and economic definitions of media audiences and the various qualitative methodologies for studying media use. Includes audiences for television, video, and motion pictures, as well as users of telephones, computers, and electronic mail.

COGR 201I. Ethnography of Information Systems (4)

This course will survey the rapidly growing body of ethnographic analyses of information systems, to extend the basic principles of ethnographic research and to lead students in the development of projects modifying these principles for the emerging electronic environment. Students may approach the course in one (or both) of two ways—either preparing for and carrying out a pilot ethnographic study or studying the theoretical literature in depth.

COGR 201J. Comparative Analysis (4)

The logic of comparative analysis and its role in communication research. Scientific inference in qualitative research. Selection of cases. Problems of translation across cultures.

COGR 201L. Qualitative Analysis of Information Systems (4)

Historical and ethnographic studies of information systems—the design and use of information and communication technologies in their social, ethical, political, and organizational dimensions. Objects of study range from the invention of file folders to email use and distributed databases as communication systems. *Prerequisite: graduate standing or consent of instructor.*

COGR 201M. Content Analysis (4)

History uses methodology of quantitative analysis of media content. Includes conceptual issues concerning the quantification of meaning and practical procedures for coding and data analysis. Students read examples of studies using content analysis and carry out their own pilot analyses. *Prerequisite: graduate standing or consent of instructor.*

COGR 210. Information and Society (4)

The social, legal, and economic forces affecting the evolution of mass communication institutions and structure in the industrialized world. Differential impacts of the free flow of information and unequal roles and needs of developed and developing economies.

COGR 215. Regulation of Telecommunications (4)

The course will look at the history of, and rationales for, the regulation of mass communications in the United States. The course will cover both broadcasting and common carrier regulation. We will analyze telecommunications regulatory structures as they were constituted historically with the 1934 Communications Act and examine their breakdown in the late 1970s. In a larger vein, the course will examine the rise and functions of regulatory agencies in modern American history.

COGR 220. The News Media (4)

History, politics, social organization, and ideology of the American news media. Special attention will be

paid to historical origins of journalism as a profession and "objective reporting" as ideology; empirical studies of print and TV journalism as social institutions; news coverage of Vietnam and its implications for theories of the news media.

COGR 222. Childhood and Culture (4)

This course explores the social construction of childhood as organized by the institutions of school and family. Of particular interest are media consumption and leisure as they interact with the emergence of taste, preference, and identity in children. Modern adolescence is also explored as it bears on the social nature of childhood.

COGR 225A. Introduction to Science Studies (4)

Study and discussion of classics work in history of science, sociology of science, philosophy of science, and communication of science, and of work that attempts to develop a unified science studies approach. Required for all students in the Science Studies Program. *Prerequisite: enrollment in the Science Studies Program or approval of instructor.*

COGR 225B. Seminar in Science Studies (4)

Study and discussion of selected topics in the science studies field. Required for all students in the Science Studies Program. *Prerequisite: enrollment in the Science Studies Program or approval of instructor.*

COGR 225C. Colloquium in Science Studies (4)

A forum for the presentation and discussion of research in progress in science studies, by graduate students, faculty, and visitors. Required for all students in the Science Studies Program. *Prerequisite: enrollment in the Science Studies Program or approval of instructor.*

COGR 225D. Advanced Approaches to Science Studies (4)

Contemporary themes and problems in science studies. Focus on recent literature in the history, philosophy, and sociology of science, technology, and medicine. Required of all students in the Science Studies Program. *Prerequisites: Completion of COGR 225A, HIGR 238, PHIL 209A, or SOCG 255A; enrollment in Science Studies Program or consent of instructor.*

COGR 236. Popular Culture (4)

This class will be an opportunity for students to review major contributions to the field from the disciplines of anthropology, history, literature, sociology and American studies, and to experiment with some of the recently developed methods for studying popular forms. They will then be able to consider more precisely the potential and actual contribution of studies of popular culture to the discipline of communication.

COGR 238. The Frankfurt School on Mass Culture Social Theory (4)

This reading seminar will consider works by Frankfurt School theorists (Horkheimer, Adorno, Pollock, Lowenthal, Marcuse, Benjamin, Habermas) on mass media, mass culture, ideology, art, authority and the individual, and their relevance in the analysis of contemporary capitalism. *Prerequisite: graduate standing or consent of instructor.*

COGR 240. The Culture of Consumption (4)

(Cross-listed with HIGR 273.) This course will explore the development and cultural manifestations of consumerism in the nineteenth and twentieth centuries. Topics will include the rise of museums, the development of mass market journalism and literature, advertising, and the growth of commercial amusements. Readings will focus primarily, but not exclusively, on

the United States. Students will be encouraged to think comparatively.

COGR 250. Third World Cinema (4)

Course examines the history, theory, and aesthetics of "Third Cinema"—schools of cinema developed by selected filmmakers from Africa, Latin America, and Asia. Through film screenings and a wide range of readings students will discuss such topics as cinema and national identity, cinema and social change, and Hollywood dominance. *Prerequisite: graduate standing or consent of instructor.*

COGR 261. Mediatonal Approaches to Culture/Mind (4)

This course will examine theories of mind in which cultural mediation is given a leading role. The work of anthropologists, psychologists, and communication scholars will be studied in depth. Emphasis will be placed on the methodological implication of cultural theories of mind for empirical research.

COGR 275. Topics in Communication (4)

Specialized study in communication, with topics to be determined by the instructor for any given quarter.

COGR 280. Advanced Workshop in Communication Media (4)

This course is a project course in which students prepare a production or experiment using one of the forms of media. The course is designed to allow students to experiment in a communication form other than the usual oral presentation in class or a term paper. Students can do a video production, a coordinated photographic essay or exhibit, a computer instructional game, a published newspaper or magazine article directed at a special audience, a theatrical presentation, or some form other than those listed. *Prerequisite: graduate standing or consent of instructor.*

COGR 294. The History of Communication Research (4)

Intellectual history of the field of communication studies from Robert Park to the present. Explication and assessment of major research approaches and classic studies representing both empirical and critical traditions.

COGR 296. Communication Research as an Interdisciplinary Activity (4)

A course that introduces students to the interdisciplinary nature of the field of communication research as represented by the work of faculty in the Department of Communication. Through faculty research, students are presented with concrete examples of communication research theory and practice that can provide them with insights for conducting their own research projects. *Prerequisite: graduate standing or consent of instructor.*

COGR 298. Directed Group Study (1-12)

The study and analysis of specific topics to be developed by a small group of graduate students under the guidance of an interested faculty member. COGR 500. Practice Teaching in Communication (4)

COGR 299. Graduate Research (1-12)

Advanced independent study in communication under the guidance of Department of Communication faculty.

COGR 500. Practice Teaching in Communication (4)

A doctoral student in communication is required to assist in teaching undergraduate Department of Communication courses for a total of six quarters. One meeting per week with the instructor, one meeting per week with the assigned sections, and attendance at the lecture of the undergraduate course in which he or she is participating are part of this requirement.

Comparative Studies in Language, Society, and Culture

Department of Music
OFFICE: 111 Mandeville Center for the Arts
(858) 534-6722/(858) 534-3279
<http://music.ucsd.edu>

Department of Literature
OFFICE: 3354 Literature Building
(858) 534-3826/(858) 534-3217

Program Faculty

Nancy Caciola, Ph.D., *Department of History*
Jann C. Pasler, Ph.D., *Department of Music, Chair*
Don E. Wayne, Ph.D., *Department of Literature, Co-Chair*
Kathryn A. Woolard, Ph.D., *Department of Anthropology*

Graduate students in the humanities, social sciences, and arts in this program are provided the opportunity to design curricula, conduct research, and write dissertations under the guidance of interdepartmental and/or intercampus Ph.D. committees. The student who participates in the program must be admitted, satisfy all requirements for advancement to candidacy, and pass the qualifying examination in one department. The student must also undertake advanced study in an integrally related area of research specialization. The student advances to candidacy in the program upon successfully defending a written dissertation proposal before the interdepartment and/or intercampus Ph.D. committee. In the instance of some departments and programs, the defense will be identical with completion of the departmental qualifying examination.

Application to the program in Comparative Studies may be made at the earliest during the student's third quarter of residency in his or her primary department. From the point of acceptance into the program, the student's preparation for dissertation research will be under the supervision of the interdepartment or intercampus Ph.D. committee. The degree granted may indicate in its title the precise nature of the student's studies and research when appropriate and desirable—e.g., Ph.D. in comparative literature and ethnopoetics, in linguistics and literary studies, in economics and Chinese studies, in philosophy

and the history of ideas. When an additional degree title is contemplated, the student's Ph.D. committee must forward a program of study and research, as well as the dissertation proposal, to the supervising committee for initial approval and to the Graduate Council for final approval.

Students applying for admission to UCSD and interested in applying for admission to the program should direct their inquiries to a primary department. Students already admitted to a primary department should, after the required quarters of residence and with the advice of a department adviser, direct inquiries to the chairperson of the program.

Faculty Research Groups

Beginning with the academic year 1997–1998, the program sponsors a series of faculty research groups. These groups consist of faculty who have announced their intention to supervise graduate students wishing to work on topics involving the comparative study of language, society, and culture. Each faculty research group is expected to be composed of faculty in the humanities, social sciences, and arts from different departments and/or campuses. For a list of current faculty research groups and the topics which they support, contact the chairperson of the program.

The Anthropology of Modern Society

The Anthropology of Modern Society is a project of graduate training and research dedicated to the study of modernity and its counterpoints in the late twentieth century. The group sees the social life of cities as making manifest this problem in issues of citizenship and democracy, social formations in tension with the nation-state, modern subjectivities, social and religious movements, transnational markets and migrations, and relations of local to global processes. Participants are committed to reorienting anthropological theory and ethnographic practice towards such contemporary social and political problems.

Director: James Holston,
Department of Anthropology, (858) 534-0111
Co-Director: Martha Lampland,
Department of Sociology, (858) 534-5640

Ph.D. Time Limit Policies

A student admitted to this interdisciplinary program is subject to the same time limit policies as those of the student's primary department.

COURSES

For course descriptions not found in the 2006–2007 General Catalog, please contact the department for more information.

LOWER-DIVISION

22. Human Sexuality (4)

A survey of the nature and problems of human sexuality in the development of the individual, in cultural traditions and values, and in social roles and organizations, particularly with regard to contemporary America. Staff. Not offered in 2006-07.

40. Contemporary Issues: The AIDS Epidemic (4)

Using current information, this course will deal with the worldwide spread of AIDS, particularly into communities, colleges, and universities. Discussion topics: origin, infection, biology, clinical expression, risks, vaccines, epidemiology, and the social, ethical, economic, and legal aspects of this epidemic. Not offered in 2006-07.

50. Information and Academic Libraries (2)

An introduction to research strategies directed at satisfying the information needs of the student using the academic library, with emphasis on the UCSD library system. Library techniques will be acquired through lectures and discussion, problem sets, and a term project. Students will learn to extend these techniques to independent research. Not offered in 2006-07.

UPPER-DIVISION

136. The Anthropology of Medicine (4)

(Same as ANGN 128.) Theoretical approaches to and cross-cultural analyses of the role of the medical profession, the sick and the healers, and culture as communication in the medical event. The theoretical anthropological aspects of medical practice and medical research will include a consideration of the "Great Traditions" of medicine as well as primitive and peasant systems. Western medicine will be considered in

COGR 201D. Historical Methods for Communication Research (4)

Different approaches to conducting historical research in communication. Such approaches may include the social history of communication technology; structuralist and poststructuralist accounts of language, media, and collective memory; and new historicist treatments of cultural history. Sources, documentation, and the nature of argument from historical evidence are emphasized.

COGR 201H. Qualitative Methods in Audience Research (4)

This course explores the social and economic definitions of media audiences and the various qualitative methodologies for studying media use. Includes audiences for television, video, and motion pictures, as well as users of telephones, computers, and electronic mail.

COGR 201I. Ethnography of Information Systems (4)

This course will survey the rapidly growing body of ethnographic analyses of information systems, to extend the basic principles of ethnographic research and to lead students in the development of projects modifying these principles for the emerging electronic environment. Students may approach the course in one (or both) of two ways—either preparing for and carrying out a pilot ethnographic study or studying the theoretical literature in depth.

COGR 201J. Comparative Analysis (4)

The logic of comparative analysis and its role in communication research. Scientific inference in qualitative research. Selection of cases. Problems of translation across cultures.

COGR 201L. Qualitative Analysis of Information Systems (4)

Historical and ethnographic studies of information systems—the design and use of information and communication technologies in their social, ethical, political, and organizational dimensions. Objects of study range from the invention of file folders to email use and distributed databases as communication systems. *Prerequisite: graduate standing or consent of instructor.*

COGR 201M. Content Analysis (4)

History uses methodology of quantitative analysis of media content. Includes conceptual issues concerning the quantification of meaning and practical procedures for coding and data analysis. Students read examples of studies using content analysis and carry out their own pilot analyses. *Prerequisite: graduate standing or consent of instructor.*

COGR 210. Information and Society (4)

The social, legal, and economic forces affecting the evolution of mass communication institutions and structure in the industrialized world. Differential impacts of the free flow of information and unequal roles and needs of developed and developing economies.

COGR 215. Regulation of Telecommunications (4)

The course will look at the history of, and rationales for, the regulation of mass communications in the United States. The course will cover both broadcasting and common carrier regulation. We will analyze telecommunications regulatory structures as they were constituted historically with the 1934 Communications Act and examine their breakdown in the late 1970s. In a larger vein, the course will examine the rise and functions of regulatory agencies in modern American history.

COGR 220. The News Media (4)

History, politics, social organization, and ideology of the American news media. Special attention will be

paid to historical origins of journalism as a profession and "objective reporting" as ideology; empirical studies of print and TV journalism as social institutions; news coverage of Vietnam and its implications for theories of the news media.

COGR 222. Childhood and Culture (4)

This course explores the social construction of childhood as organized by the institutions of school and family. Of particular interest are media consumption and leisure as they interact with the emergence of taste, preference, and identity in children. Modern adolescence is also explored as it bears on the social nature of childhood.

COGR 225A. Introduction to Science Studies (4)

Study and discussion of classics work in history of science, sociology of science, philosophy of science, and communication of science, and of work that attempts to develop a unified science studies approach. Required for all students in the Science Studies Program. *Prerequisite: enrollment in the Science Studies Program or approval of instructor.*

COGR 225B. Seminar in Science Studies (4)

Study and discussion of selected topics in the science studies field. Required for all students in the Science Studies Program. *Prerequisite: enrollment in the Science Studies Program or approval of instructor.*

COGR 225C. Colloquium in Science Studies (4)

A forum for the presentation and discussion of research in progress in science studies, by graduate students, faculty, and visitors. Required for all students in the Science Studies Program. *Prerequisite: enrollment in the Science Studies Program or approval of instructor.*

COGR 225D. Advanced Approaches to Science Studies (4)

Contemporary themes and problems in science studies. Focus on recent literature in the history, philosophy, and sociology of science, technology, and medicine. Required of all students in the Science Studies Program. *Prerequisites: Completion of COGR 225A, HIGR 238, PHIL 209A, or SOCG 255A; enrollment in Science Studies Program or consent of instructor.*

COGR 236. Popular Culture (4)

This class will be an opportunity for students to review major contributions to the field from the disciplines of anthropology, history, literature, sociology and American studies, and to experiment with some of the recently developed methods for studying popular forms. They will then be able to consider more precisely the potential and actual contribution of studies of popular culture to the discipline of communication.

COGR 238. The Frankfurt School on Mass Culture Social Theory (4)

This reading seminar will consider works by Frankfurt School theorists (Horkheimer, Adorno, Pollock, Lowenthal, Marcuse, Benjamin, Habermas) on mass media, mass culture, ideology, art, authority and the individual, and their relevance in the analysis of contemporary capitalism. *Prerequisite: graduate standing or consent of instructor.*

COGR 240. The Culture of Consumption (4)

(Cross-listed with HIGR 273.) This course will explore the development and cultural manifestations of consumerism in the nineteenth and twentieth centuries. Topics will include the rise of museums, the development of mass market journalism and literature, advertising, and the growth of commercial amusements. Readings will focus primarily, but not exclusively, on

the United States. Students will be encouraged to think comparatively.

COGR 250. Third World Cinema (4)

Course examines the history, theory, and aesthetics of "Third Cinema"—schools of cinema developed by selected filmmakers from Africa, Latin America, and Asia. Through film screenings and a wide range of readings students will discuss such topics as cinema and national identity, cinema and social change, and Hollywood dominance. *Prerequisite: graduate standing or consent of instructor.*

COGR 261. Medial Approaches to Culture/Mind (4)

This course will examine theories of mind in which cultural mediation is given a leading role. The work of anthropologists, psychologists, and communication scholars will be studied in depth. Emphasis will be placed on the methodological implication of cultural theories of mind for empirical research.

COGR 275. Topics in Communication (4)

Specialized study in communication, with topics to be determined by the instructor for any given quarter.

COGR 280. Advanced Workshop in Communication Media (4)

This course is a project course in which students prepare a production or experiment using one of the forms of media. The course is designed to allow students to experiment in a communication form other than the usual oral presentation in class or a term paper. Students can do a video production, a coordinated photographic essay or exhibit, a computer instructional game, a published newspaper or magazine article directed at a special audience, a theatrical presentation, or some form other than those listed. *Prerequisite: graduate standing or consent of instructor.*

COGR 294. The History of Communication Research (4)

Intellectual history of the field of communication studies from Robert Park to the present. Explication and assessment of major research approaches and classic studies representing both empirical and critical traditions.

COGR 296. Communication Research as an Interdisciplinary Activity (4)

A course that introduces students to the interdisciplinary nature of the field of communication research as represented by the work of faculty in the Department of Communication. Through faculty research, students are presented with concrete examples of communication research theory and practice that can provide them with insights for conducting their own research projects. *Prerequisite: graduate standing or consent of instructor.*

COGR 298. Directed Group Study (1-12)

The study and analysis of specific topics to be developed by a small group of graduate students under the guidance of an interested faculty member. COGR 500. Practice Teaching in Communication (4)

COGR 299. Graduate Research (1-12)

Advanced independent study in communication under the guidance of Department of Communication faculty.

COGR 500. Practice Teaching in Communication (4)

A doctoral student in communication is required to assist in teaching undergraduate Department of Communication courses for a total of six quarters. One meeting per week with the instructor, one meeting per week with the assigned sections, and attendance at the lecture of the undergraduate course in which he or she is participating are part of this requirement.

Comparative Studies in Language, Society, and Culture

Program Faculty

Nancy Caciola, Ph.D., *Department of History*
Jann C. Pasler, Ph.D., *Department of Music, Chair*
Don E. Wayne, Ph.D., *Department of Literature, Co-Chair*
Kathryn A. Woolard, Ph.D., *Department of Anthropology*

Graduate students in the humanities, social sciences, and arts in this program are provided the opportunity to design curricula, conduct research, and write dissertations under the guidance of interdepartmental and/or intercampus Ph.D. committees. The student who participates in the program must be admitted, satisfy all requirements for advancement to candidacy, and pass the qualifying examination in one department. The student must also undertake advanced study in an integrally related area of research specialization. The student advances to candidacy in the program upon successfully defending a written dissertation proposal before the interdepartment and/or intercampus Ph.D. committee. In the instance of some departments and programs, the defense will be identical with completion of the departmental qualifying examination.

Application to the program in Comparative Studies may be made at the earliest during the student's third quarter of residency in his or her primary department. From the point of acceptance into the program, the student's preparation for dissertation research will be under the supervision of the interdepartment or intercampus Ph.D. committee. The degree granted may indicate in its title the precise nature of the student's studies and research when appropriate and desirable—e.g., Ph.D. in comparative literature and ethno-poetics, in linguistics and literary studies, in economics and Chinese studies, in philosophy

and the history of ideas. When an additional degree title is contemplated, the student's Ph.D. committee must forward a program of study and research, as well as the dissertation proposal, to the supervising committee for initial approval and to the Graduate Council for final approval.

Students applying for admission to UCSD and interested in applying for admission to the program should direct their inquiries to a primary department. Students already admitted to a primary department should, after the required quarters of residence and with the advice of a department adviser, direct inquiries to the chairperson of the program.

Faculty Research Groups

Beginning with the academic year 1997–1998, the program sponsors a series of faculty research groups. These groups consist of faculty who have announced their intention to supervise graduate students wishing to work on topics involving the comparative study of language, society, and culture. Each faculty research group is expected to be composed of faculty in the humanities, social sciences, and arts from different departments and/or campuses. For a list of current faculty research groups and the topics which they support, contact the chairperson of the program.

The Anthropology of Modern Society

The Anthropology of Modern Society is a project of graduate training and research dedicated to the study of modernity and its counterpoints in the late twentieth century. The group sees the social life of cities as making manifest this problem in issues of citizenship and democracy, social formations in tension with the nation-state, modern subjectivities, social and religious movements, transnational markets and migrations, and relations of local to global processes. Participants are committed to reorienting anthropological theory and ethnographic practice towards such contemporary social and political problems.

Director: James Holston,
Department of Anthropology, (858) 534-0111
Co-Director: Martha Lampland,
Department of Sociology, (858) 534-5640

Ph.D. Time Limit Policies

A student admitted to this interdisciplinary program is subject to the same time limit policies as those of the student's primary department.

COURSES

For course descriptions not found in the 2006–2007 General Catalog, please contact the department for more information.

LOWER-DIVISION

22. Human Sexuality (4)

A survey of the nature and problems of human sexuality in the development of the individual, in cultural traditions and values, and in social roles and organizations, particularly with regard to contemporary America. Staff. Not offered in 2006-07.

40. Contemporary Issues: The AIDS Epidemic (4)

Using current information, this course will deal with the worldwide spread of AIDS, particularly into communities, colleges, and universities. Discussion topics: origin, infection, biology, clinical expression, risks, vaccines, epidemiology, and the social, ethical, economic, and legal aspects of this epidemic. Not offered in 2006-07.

50. Information and Academic Libraries (2)

An introduction to research strategies directed at satisfying the information needs of the student using the academic library, with emphasis on the UCSD library system. Library techniques will be acquired through lectures and discussion, problem sets, and a term project. Students will learn to extend these techniques to independent research. Not offered in 2006-07.

UPPER-DIVISION

136. The Anthropology of Medicine (4)

(Same as ANGN 128.) Theoretical approaches to and cross-cultural analyses of the role of the medical profession, the sick and the healers, and culture as communication in the medical event. The theoretical anthropological aspects of medical practice and medical research will include a consideration of the "Great Traditions" of medicine as well as primitive and peasant systems. Western medicine will be considered in

the foregoing framework, with issues of contemporary concern by way of introduction. *Prerequisite: upper-division standing.* Not offered in 2006-07.

195. Discussion Leading in Contemporary Issues (4)

Students will lead groups of ten to twenty students in discussions of contemporary concern. Students will meet with the professor to plan and prepare for their discussions to be held weekly. Students will also consult with another faculty member specializing in their topics for further check on reading materials and course of discussion. (P/NP grades only.) *Prerequisite: Contemporary Issues 196 and consent of the director of Interdisciplinary Sequences.* Not offered in 2006-07.

196. Contemporary Issues Workshop (2)

A workshop for potential discussion leaders in the Contemporary Issues Program. Students will investigate topics for discussion and methods of presentation and inquiry. Participating in the workshop does not guarantee selection as discussion leader. (P/NP grades only.)

198. Group Studies in Contemporary Issues (4)

Group studies, readings, projects, and discussions in areas of contemporary concern. Course is set up so that students may work together as a group with a professor in an area of contemporary concern whereby the group emphasis would be more beneficial and constructive than individual special studies. *Prerequisite: consent of instructor.* (P/NP grades only.)

199. Special Studies in Contemporary Issues (2-4)

To be offered during fall, winter, and spring quarters. Permission of the director of Interdisciplinary Sequences is required. The 199 course is to be made up of individual reading and projects in the areas of contemporary concern. Term paper and/or completed project is required. This class is given under special circumstances, e.g., student abroad. (P/NP grades only.)

500. Apprentice Teaching in Contemporary Issues (4)

A course in which teaching assistants are aided in learning proper teaching methods by means of supervision of their work by the faculty: handling of discussions, preparation and grading of examinations and other written exercises, and student relations. *Prerequisite: graduate standing.*

Critical Gender Studies

The UCSD Critical Gender Studies Program, formerly Women's Studies, is an interdisciplinary academic program, offering students the opportunity to study gender, race, class, sexuality, and nationalism as intersecting categories of analysis and experience. Some basic questions that anchor the program's core curriculum include asking how these categories become institutionalized and yet change over time? How do they work together to shape individual

identity?; contribute to the organization of social life?; become essential to the production of many different kinds of knowledge about that life?

The program's core curriculum builds upon feminist scholarship of the last decade, incorporating the new interdisciplinary agendas, intellectual debates, changing methodological practices, and major scholarly shifts that have reshaped the field of women's studies. Informed by the insights of critical race feminism, feminist critiques of conventional domains of knowledge, and gay and lesbian inquiries challenging traditional understandings and assumptions about sexuality, this new core curriculum is designed to move students beyond simple binary descriptions and contemporary, popularized accounts of gender. Instead, gender is analyzed in the full complexity of its construction over time and in a variety of cultural, scholarly, and global arenas.

Students can expect to encounter a rich spectrum of approaches in studying these complex constructions—the majority of a student's advanced work in the program consists of upper division courses from history, communication, literature, ethnic studies, sociology, anthropology, philosophy, and political science. However, despite their important differences, what these approaches share is a *critical* stance with respect to the subject of gender. This stance, reflected in the program's name "*Critical Gender Studies*," refuses easy answers when exploring the social relations of gender and reaches, instead, for detailed accounts of the intricacies and paradoxes of power through which these relations are and have been made and maintained.

Critical gender studies prepares undergraduates for a variety of careers through the study of social, political, economic, historical, and cultural contexts. For example, the interdisciplinary and multi-disciplinary course work that students complete as part of a major in critical gender studies provides an excellent foundation for those students with career aspirations in law, medicine and health sciences, public administration, and social services. Students wishing to pursue doctoral work will also find that interdisciplinary training in critical gender studies equips them with theoretical and methodological strengths in most disciplines and applied research fields. Specialists in gender studies are increasingly being used as consultants in industry, higher education, insurance companies, and personnel firms. State and federal government

agencies require people who have special training in analyzing gender relations. Finally, educational institutions need specialists to develop and administer women's centers and gay and lesbian centers as well as other institutional structures and programs.

The Critical Gender Studies Program offers two options of study: an undergraduate major and an undergraduate minor (or program of concentration). To declare a major, a department stamp is required. Because critical gender studies is an interdisciplinary major, it is important to work closely with a faculty adviser in the planning of your program.

Preparation for the Major and Minor

All critical gender studies majors and minors are required to take the Introduction to Critical Gender Studies sequence: Critical Gender Studies 2A-B, 100, and 101.

Major Program

Students are required to concentrate in one of five cluster areas: culture and representation; sexualities; work, migration, and globalization; science, technology, and medicine; history, society, and inequalities. Concentrating in a cluster area entails taking five upper-division courses (twenty units) in that area. To complete the major, students are required to complete five additional upper-division courses (twenty units) in cluster areas outside their chosen area of concentration. At least one of the five upper-division courses a student takes outside their chosen area of concentration must be selected from the program's upper-division course list.

Quarterly Course List

When the UCSD Schedule of Classes for an upcoming quarter goes online, the Critical Gender Studies (CGS) Program makes available a list of that quarter's proposed CGS courses. The list also includes gender- and sexuality-based upper-division courses offered by departments and programs throughout the campus. The quarterly list may be found at the CGS Web site, and paper copies are provided at the CGS office. The list identifies the cluster(s) for which departmental courses will work in a given quarter; it also indicates whether a departmental course is considered applicable or petitionable to the major or minor.

CONCENTRATION IN CULTURE AND REPRESENTATION

Group A. **Five upper-division courses (twenty units) in the culture and representation cluster area** from the critical gender studies approved course list.

Group B. **Five upper-division courses (twenty units) in cluster areas other than culture and representation** to be selected from the critical gender studies approved and petitionable course list. At least one of these courses must be chosen from Critical Gender Studies 102-103-104. All five courses may be chosen from Critical Gender Studies 102-103-104 (i.e., each course may be repeated once, provided the course content is different). A maximum of three courses (twelve units) may be selected in any one cluster area.

CONCENTRATION IN SEXUALITIES

Group A. **Five upper-division courses (twenty units) in the sexualities cluster area**, from the critical gender studies approved course list.

Group B. **Five upper-division courses (twenty units) in cluster areas other than sexualities** to be selected from the critical gender studies approved and petitionable course list. At least one of these courses must be chosen from Critical Gender Studies 102-103-104. All five courses may be chosen from Critical Gender Studies 102-103-104 (i.e., each course may be repeated once, provided the course content is different). A maximum of three courses (twelve units) may be selected in any one cluster area.

CONCENTRATION IN WORK, MIGRATION, AND GLOBALIZATION

Group A. **Five upper-division courses (twenty units) in the work, migration, and globalization cluster area**, from the critical gender studies approved course list.

Group B. **Five upper-division courses (twenty units) in cluster areas other than work, migration, and globalization** to be selected from the critical gender studies approved and petitionable course list. At least one of these courses must be chosen from Critical Gender Studies 102-103-104. All five courses may be chosen from Critical Gender Studies 102-103-104 (i.e., each course may be repeated once, provided the course content is different). A maximum of three courses (twelve units) may be selected in any one cluster area.

CONCENTRATION IN SCIENCE, TECHNOLOGY, AND MEDICINE

Group A. **Five upper-division courses (twenty units) in the science, technology, and medicine cluster area**, from the critical gender studies approved course list.

Group B. **Five upper-division courses (twenty units) in cluster areas other than science, technology, and medicine** to be selected from the critical gender studies approved and petitionable course list. At least one of these courses must be chosen from Critical Gender Studies 102-103-104. All five courses may be chosen from Critical Gender Studies 102-103-104 (i.e., each course may be repeated once, provided the course content is different). A maximum of three courses (twelve units) may be selected in any one cluster area.

CONCENTRATION IN HISTORY, SOCIETY, AND INEQUALITIES

Group A. **Five upper-division courses (twenty units) in the history, society, and inequalities cluster area**, from the critical gender studies approved course list.

Group B. **Five upper-division courses (twenty units) in cluster areas other than history, society, and inequalities** to be selected from the critical gender studies approved and petitionable course list. At least one of these courses must be chosen from Critical Gender Studies 102-103-104. All five courses may be chosen from Critical Gender Studies 102-103-104 (i.e., each course may be repeated once, provided the course content is different). A maximum of three courses (twelve units) may be selected in any one cluster area.

Honors Program

The Critical Gender Studies Honors Program allows advanced critical gender studies majors to pursue individual projects in the context of collective intellectual exchange with their peers and advising faculty. Students are eligible if they a) have senior standing at the time they begin the program, b) are approved by the critical gender studies faculty director and steering committee. Normally, students eligible for honors will have a 3.5 grade-point average in upper-division courses taken for the major, but highly motivated students who do not meet this criterion may be admitted to the program at the discretion of the director and the critical gender studies steering committee.

In the fall quarter of their senior year, students take the Honors Seminar (CGS 190), taught by a member of the critical gender studies faculty. The first half of the quarter is devoted to intensive analysis and discussion of recent publications in the fields of gender and sexuality. During the second half of the quarter, each student develops a short thesis proposal and presents it for group discussion. While taking the Honors Seminar, each student also registers for CGS 196A: Honors Research, four units of independent study with a faculty member associated with critical gender studies. With the guidance of this adviser, the student carries out background research for the thesis prospectus and selects a thesis director. In the winter quarter, students complete the thesis under the supervision of their thesis director in the Honors Thesis course, CGS 196B.

Students who complete the thesis with a grade of B+ or above and make an oral presentation have the words "with distinction" added to the notation of the major on their diplomas and transcripts.

Double Major in Critical Gender Studies and Another Department or Program

Students who wish to major both in critical gender studies and in another department or program must fulfill all requirements for the critical gender studies major as described above. Students must submit a double major petition for approval by the participating departments and the student's college advising office. Critical gender studies will accept up to two upper-division courses which overlap requirements for the two majors.

CRITICAL GENDER STUDIES MAJOR COURSE CHECKLIST

During advising sessions with the critical gender studies faculty director or staff, critical gender studies majors make use of a checklist to determine how courses already taken fulfill the major's requirements. An example of the checklist may be found at the CGS Web site.

Minor Program (and Program of Concentration)

Critical gender studies minors are required to complete: Critical Gender Studies 2A-B, 100, and 101 and three additional upper-division courses

(twelve units) applicable to the critical gender studies major and minor. Students who declare the critical gender studies minor (or program of concentration) with junior or senior standing may petition to substitute an upper-division critical gender studies course or a departmental elective course of comparable content for Critical Gender Studies 2A or 2B. Critical gender studies permits one lower-division course and one upper-division course to be taken P/NP. College grading options vary. Please consult college academic advisers and critical gender studies advisers.

Special Studies, Internships, and Grade Options

Many critical gender studies majors and minors elect to do gender research under the rubrics of Directed Group Study (198), Independent Study (199), internships, and mentor programs. Because these courses can be taken only with a P/NP grade option, the number of such courses to be applied to the major should be carefully discussed with a critical gender studies adviser. Some graduate and professional schools will consider it easier to evaluate a student's transcript if there are more letter grades. College guidelines and requirements for grade options also vary. Please see college academic advisers and critical gender studies advisers.

COURSES

For course descriptions not found in the 2006-2007 General Catalog, please contact the department for more information.

LOWER-DIVISION

CGS 2A. Introduction to Critical Gender Studies: Social Movements (4)

The role of social movements in contesting rights and representation in comparative and historical contexts. Historical examples in the U.S. and other locations including: civil rights, men's movements, antiracist feminism, women's movements, AIDS activism, transgenderism, immigrant rights, and the labor movement in the U.S.

CGS 2B. Introduction to Critical Gender Studies: Gender and Institutions (4)

This course examines how gender organizes and is organized by institutions. Domains of inquiry may include family, education, medicine, technology, law, media, the workplace, immigration, and citizenship.

CGS 87. Critical Gender Studies Freshman Seminar (1)
The Freshman Seminar Program is designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Freshman seminars are offered in all campus departments and undergraduate colleges, and topics vary from quarter to quarter. Enrollment is limited to fifteen to twenty students, with preference given to entering freshmen.

CGS 90. Undergraduate Seminar (1)
This seminar will introduce students to current interdisciplinary research topics and methods in the study of gender and sexuality. UCSD Faculty members, as well as distinguished outside visitors, will be invited to present their work.

UPPER-DIVISION

CGS 100. Conceptualizing Gender: Theories and Methods (4)
This course will compare the uses of gender as a category of analysis across academic disciplines in the Humanities, Social Sciences, and Natural Sciences with particular attention to research methodologies.

CGS 101. Gender, Modernity, and Globalization (4)
The global effects of modernity, modernization, and globalization on men and women. Topics: international consumer culture; international divisions of labor; construction of sexuality and gender within global movements; the migrations of people, capital, and culture. *Prerequisite: upper-division standing or consent of instructor.*

CGS 102. Selected Topics in Critical Gender Studies (4)
An interdisciplinary course focusing on one of a variety of topics in gender studies, such as gender and science, the body, reproductive technologies, public policy. May be taken for credit three times when topics vary. *Prerequisites: upper-division standing or consent of instructor.*

CGS 103. Feminist Theory (4)
An interdisciplinary course in feminist theory. Topics may range from a general survey of feminist theory in a variety of disciplines to a more focused interdisciplinary theoretical topic such as postmodernism and feminism. May be taken for credit three times when topics vary. *Prerequisites: upper-division standing or consent of instructor.*

CGS 104. Advanced Topics in Comparative Perspectives (4)
Focuses on the relationship between gender and culture from a multiplicity of perspectives. Possible topics could include gender and ethnicity, gender across class, and other topics to be examined in a cross cultural framework. May be taken for credit two times when topics vary. *Prerequisites: upper-division standing or consent of instructor.*

CGS 105. Queer Theory (4)
Examines the different methodologies and disciplinary histories that together constitute the interdisciplinary project called *queer studies*. Of particular interest will be how these different methodologies and history construe and construct the relations between gender, race, class, and nation. *Prerequisites: upper-division standing or consent of instructor.*

CGS 106. Gender Equality and the Law (4)
Explores the legal treatment of discrimination on the basis of gender, including equal protection doctrine and some statutory law such as Title VII. Topics include

the meaning of gender equality in such areas as single-sex education, military service, sexual harassment, discrimination on the basis of pregnancy, and other current issues. *Prerequisites: upper-division standing or consent of instructor.*

CGS 107. Gender and Reproductive Rights (4)
Legal treatment of gender, reproductive rights, and the family, particularly as evolving law, primarily in the U.S., has created conflicting rights, roles, and responsibilities. Topics include abortion, fetal rights, surrogacy, marriage, and child custody issues. *Prerequisites: upper-division standing or consent of instructor.*

CGS 109A. Gender, Science, Technology (4)
Examines impact of gender and racialized gender on the production and uses of science and technology. Issues include (but are not limited to): racism and biotechnology, biological determinism, eugenics, plagiarism and invisible work, information technologies and access, and the politics of museums. *Prerequisites: upper-division standing or consent of instructor.*

CGS 109B. Gender and Information Technology (4)
Explores how gender and racialized gender affect and are affected by information technology. Through the use of feminist and race-critical approaches, the course examines the impact of information technology on workplaces, the family, gender identity, and the environment. *Prerequisites: upper-division standing or consent of instructor.*

CGS 110A. Women and Sport (4)
Examines the history of women and sport in the U.S. and changes since the passage of Title IX (federal equity legislation) in 1972. Explores the evolution of women in sport from historical, social, racial, psychological, political, and legal perspectives. *Prerequisites: upper-division standing or consent of instructor.*

CGS 110B. Title IX and Gender Equity in Sports and Education (4)
Comprehensive review of Title IX (federal equity legislation) and its impact on gender equity in U.S. sports and education. Explores policy interpretations, changes in educational opportunities and sports programs resulting from legislation and related court cases. *Prerequisites: upper-division standing or consent of instructor.*

CGS 111. Gender and the Body (4)
Various approaches to the study of gendered bodies. Possible topics to include masculinities/feminities; life-cycles; biology, culture, and identity; medical discourses and health issues. May be taken for credit three times when topics vary. *Prerequisites: upper-division standing or consent of instructor.*

CGS 112. Sexuality and Nation (4)
(Cross-listed with ETHN 127.) This course explores the nexus of sex, race, ethnicity, gender, and nation and considers their influence on identity, sexuality, migration movement and borders, and other social, cultural, and political issues that these constructs affect. *Prerequisites: upper-division standing or consent of instructor.*

CGS 190. Honors Seminar (4)
Interdisciplinary readings in feminist theory and research methodology to prepare students for writing an honors thesis. Open to Critical Gender Studies majors who have been admitted to Critical Gender Studies Honors Program. May be applied toward primary concentration in Critical Gender Studies major.

Prerequisites: admission to Critical Gender Studies Honors Program and department stamp required.

CGS 196A. Critical Gender Studies Honors Research (4)
A program of independent study providing candidates for Critical Gender Studies honors to develop, in consultation with an adviser, a preliminary proposal for the honors thesis. An IP grade will be awarded at the end of this quarter. A final grade for both quarters will be given upon completion of Critical Gender Studies 196B. *Prerequisites: consent of instructor and department stamp required.*

CGS 196B. Honors Thesis (4)
Honors thesis research and writing for students who have completed Critical Gender Studies 190 and 196A. A letter grade for both Critical Gender Studies 196A and 196B will be given at the completion of this quarter. *Prerequisites: consent of instructor and department stamp required.*

CGS 198. Directed Group Study (4)
Directed group study on a topic not generally included in the Critical Gender Studies curriculum. *Prerequisites: consent of instructor and director of Critical Gender Studies Program and department stamp required.*

CGS 199. Independent Study (4)
Tutorial; independent study on a topic not generally included in the curriculum. *Prerequisites: consent of instructor and director of Critical Gender Studies Program and department stamp required.*

CGS 500. Apprentice Teaching in Critical Gender Studies (4)
Consideration of pedagogical methods appropriate to undergraduate teaching in Critical Gender Studies courses under supervision of instructor of course. Instructor will define apprentice's responsibilities in preparing class presentations, directing student discussions, evaluating and grading students' work, and maintaining productive association with students.

APPLICABLE AND PETITIONABLE COURSES

Departmental courses available to CGS majors and minors fall into two categories. Applicable courses are those approved as always applying to the CGS major and minor. Petitionable courses are either new and therefore not yet approved as applicable or are "topics" courses that focus on gender only in particular quarters. Petitionable courses may be approved by petition to the major/minor during the quarters in which they appear in the CGS quarterly lists.

QUARTERLY LISTS

Each quarter, when the upcoming quarter's *Schedule of Classes* is published, the Critical Gender Studies quarterly list is available in the CGS office and at the Web site. It is an important, comprehensive source of information about CGS course offerings as well as those from departments throughout the campus. It identifies by cluster areas both applicable as well as petitionable courses for a given quarter. For reference,

the office and the Web site maintain archives of quarterly lists.

CRITICAL GENDER STUDIES CLUSTER AREAS

(NOTE: Only applicable courses are listed here. For petitionable courses, please see the quarterly lists mentioned above.)

1. Culture and Representation:

- ANGN 125. Gender, Sexuality, and Society
- ANRG 117. Gender Across Cultures

Culture, Art, and Technology

OFFICE: Pepper Canyon Hall, second floor
<http://sixth.ucsd.edu/>

Program Director

Linda Strauss, Ph.D.

The Sixth College core sequence in Culture, Art, and Technology offers an opportunity for students to explore the ways in which human beings have come to express and shape themselves and their world through their own creations. The core sequence takes an interdisciplinary, integrated approach to the college theme, with students examining a series of problems and issues from multiple perspectives. These issues center on how culture, art, and technology have developed over time in different societies, how they interact with each other, how human beings have used them to address challenges and how their uses have generated fresh challenges by reshaping peoples' relationships to each other and to their environment. The sequence spans the whole range of human experience, from the prehistoric through the

present, ending with a consideration of future possibilities.

The college writing program is imbedded in the core sequence, with writing-intensive quarters in CAT 2 and CAT 3. Students learn to use writing to probe and experiment with new ideas as well as to express themselves clearly and effectively to others in their own voices. The core sequence provides students with instruction and multiple opportunities for practice so they may develop a repertoire of strategies and tools for communication.

Students in CAT learn through a combination of lectures, discussions, questions, readings, guest speakers, hands-on activities, writing assignments, and multimedia projects. Sixth College offers a learning environment that extends beyond the classroom and emphasizes teamwork, critical thinking, close reading, pattern recognition, and creative approaches to problems, drawing on models and methods from a variety of fields.

The core sequence prepares Sixth College students to become self-motivated, lifelong learners. They will have broadened and deepened their visions of themselves and the world and will have developed an appreciation of the diversity and powers both of ideas and of the social body. Through inquiry into problems and issues of Culture, Art, and Technology, our students will know how to ask and how to go about answering good questions, recognizing that good questions lead not just to answers but to more penetrating, more fruitful questions and approaches to problems, which can then lead in many cases to more effective solutions.

COURSES

For course descriptions not found in the 2006-2007 General Catalog, please contact the department for more information.

LOWER-DIVISION

- CAT 1. Culture, Art, and Technology 1 (4)**
 A global historical overview of principles and patterns of human development, with emphasis on technology and the arts. Traces causes and consequences of cultural variation. Explores interactions of regional environments (geographic, climatic, biological) with social and cultural forces. *Prerequisites:* Sixth College students only; may be taken concurrently with SDCC 1.
- CAT 2. Culture, Art, and Technology 2 (6)**
 Fundamental shifts in one area of endeavor can have a profound impact on whole cultures. Examines select events, technologies, and works of art that revolution-

ized ways of inhabiting the world. Intensive instructions in university-level writing: featured sections on information literacy. *Prerequisites:* completion of UC Entry Level Writing requirement and CAT 1; Sixth College students only.

CAT 3. Culture, Art, and Technology 3 (6)
 Students engage with various interdisciplinary modes of apprehending the near-future. Working in teams on community projects, they are challenged to listen and communicate across cultures and develop cogent technological and artistic responses to local problems. Writing and information literacy instruction. *Prerequisites:* CAT 1, CAT 2; Sixth College students only.

CAT 87. Freshman Seminar (1)
 The freshman seminar program is designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminars are offered in all campus departments and undergraduate colleges and topics vary from quarter to quarter. Enrollment is limited to fifteen to twenty students with preference given to entering freshmen. *Prerequisites:* none.

CAT 97. Culture, Art, and Technology Lower-Division Internship (2 or 4)
 Course designated for lower-division Sixth College students to have the opportunity to work on a community-based or industry-based project supervised by a faculty member and community or industry mentor. *Prerequisites:* lower-division standing and cumulative GPA of 3.0.

CAT 98. Culture, Art, and Technology Lower-Division Group Study (2 or 4)
 Course designated for lower-division Sixth College students to have the opportunity to work together as a group or team on a project supervised by a faculty member in a specific department, not included in a regular curriculum, where group emphasis would be more beneficial and constructive than individual special studies. *Prerequisites:* lower-division standing and cumulative GPA of 3.0.

CAT 99. Culture, Art, and Technology Lower-Division Independent Research (2 or 4)
 Course designated for lower-division Sixth College students to have the opportunity to work on a research project supervised by a faculty member in a specific department, where the subject of content of the project cannot be represented by the academic department or faculty member. *Prerequisites:* lower-division standing and cumulative GPA of 3.0.

UPPER-DIVISION

- CAT 124. Sixth College Practicum (4)**
 Students initiate, plan, and carry out community-based and/or research-based projects that connect classroom-based experiences and knowledge to the outlying community, and that explicitly explore the interplay of culture, art, and technology. *Prerequisites:* upper-division standing and consent of instructor.
- CAT 125. Sixth Practicum Writing (4)**
 Writing to report and reflect on the practicum experience. Students will link general education to practicum projects, practice communicating with people of various constituencies; use writing as a tool for penetrating culture and for understanding self in relation to community. *Prerequisites:* upper-division standing, completion of CAT 1, 2, and 3 or (for transfer students)

completion of general-education requirements, including lower-division writing requirement. Completion of the Practicum course/project. CAT 125 should be taken within one quarter of completion of the practicum project (CAT 124).

CAT 195. Apprentice Teaching (4)

Undergraduate instructional assistance. Responsibilities in areas of learning and instruction. May collect course material and assist with course projects, digital workshops, and collection, organization and analysis of formative assessment data. *Prerequisites: upper-division standing; 3.0 cumulative GPA; consent of instructor.*

CAT 197. Culture, Art, and Technology Field Studies (4)

Supervised community-based or industry-based field work. Designated for Sixth College students to have the opportunity to work on a community-based or industry-based project supervised by a faculty member and community or industry mentor, where the subject/content of the project cannot be represented by a specific academic department. Students will submit written evaluations each week of their ongoing field study. *Prerequisites: upper-division standing, completion of CAT 1, 2, and 3 or (for transfer students) completion of general-education requirements, including lower-division writing requirement.*

CAT 198. Culture, Art, and Technology Directed Group Studies (4)

Directed group studies or, in group, field studies of a creative project. Designated for Sixth College students to have the opportunity to work together as a group or team on a project supervised by a faculty member in a specific department, not included in a regular curriculum, where group emphasis would be more beneficial and constructive than individual special studies. *Prerequisites: upper-division standing, completion of CAT 1, 2, and 3 or (for transfer students) completion of general-education requirements, including lower-division writing requirement.*

CAT 199. Culture, Art, and Technology Independent Studies (4)

Individual independent research or creative project. Designated for Sixth College students to have the opportunity to work on a project supervised by a faculty member in a specific department, where the subject or content of the project cannot be represented by the academic department of the faculty member. *Prerequisites: upper-division standing, completion of CAT 1, 2, and 3 or (for transfer students) completion of general-education requirements, including lower-division writing requirement.*

Dimensions of Culture

OFFICE: 132 Sequoyah Hall, Marshall College
<http://doc-tmc.ucsd.edu>

Program Director

Abraham Shragge, Ph.D.

Assistant Program Director

Pamela S. Wright, Ph.D.

The Dimensions of Culture program (DOC) is an introductory three-quarter social science sequence that is required of all students entering Thurgood Marshall College as freshmen. Successful completion of the DOC sequence satisfies the UC writing requirement. The course is a study in the social construction of individual identity in contemporary America and it surveys a range of social differences and stratifications that shape the nature of human attachment to self, work, community, and a sense of nation. Central to the course objective is the question of how scholars move from knowledge to action.

DOC 1, offered each fall, revolves around the central theme of diversity; in particular, the study of social differences and commonalities among individuals and groups. Students review contemporary theories of diversity and identity in the United States, reading an array of texts drawn from sociology, philosophy, ethnic studies, political science, journalism, mass media, and other sources.

In winter quarter, DOC 2 presents justice as its core theme, with special focus on the political and constitutional implications of publicly significant social differences such as race, class, gender, and ethnicity—the main issues taken up in DOC 1. Course readings include numerous original sources, especially Supreme Court opinions, as well as pieces drawn from the rich field of American history.

DOC 3 examines how Americans have imagined and re-imagined social difference and change, and how these issues have been represented in American culture since World War II. Students analyze a wide variety of texts, including films, novels, photographs, paintings, and music, drawn from popular culture and avant-garde expressions. Returning to the concepts of identity and diversity, the third course investi-

gates how such works have imagined the diverse and conflicting interests that characterize American culture and its changes over time.

Perhaps unique among the UCSD college programs, DOC also provides its students with a full menu of academic and cultural enrichment opportunities, which have included visits to the Veterans Museum in Balboa Park to learn the rudiments of oral history with a group of former prisoners of war; meeting Pulitzer Prize-winning journalists in an intimate setting; attending talks given by a MacArthur fellow and a former prime minister of Norway and Director General of the World Health Organization; participating in a DOC Film Festival; and attending the premier of a play commissioned by the Thurgood Marshall Institute.

To enroll in DOC 2 or 3, students must satisfy the UC Entry Level Writing requirement, formerly called the Subject A requirement. Transfer students should also see their college academic adviser regarding the appropriate course requirements.

For further details on Marshall College requirements, see "Marshall College, General-Education Requirements."

COURSES

For course descriptions not found in the 2006–2007 General Catalog, please contact the department for more information.

LOWER-DIVISION

1. Dimensions of Culture: Diversity (4)

This course focuses on sociocultural diversity in examining class, ethnicity, race, gender, and sexuality as significant markers of differences among persons. Emphasizing American society, it explores the cultural understandings of diversity and its economic, moral, and political consequences. Three hours of lecture, one hour of discussion. Open to Marshall College students only. (Letter grade only.) (F)

2. Dimensions of Culture: Justice (6)

This course considers the nature of justice in philosophical, historical, and legal terms. Topics include racial justice, political representation, economic justice, gender and justice, the rights of cultural minorities, and crime and punishment. The course offers intensive instruction in writing university-level expository prose. Three hours of lecture, two hours of discussion and writing instruction. Open to Marshall College students only. (Letter grade only.) *Prerequisite: completion of UC Entry Level Writing requirement.* (W)

3. Dimensions of Culture: Imagination (6)

Using the arts, this course examines the evolution of pluralistic culture to the modern period. There is a special emphasis on the interdisciplinary study of twenti-

eth-century American culture, including music, literature, art, film, and photography. The course offers intensive instruction in writing university-level expository prose. Three hours of lecture, two hours of discussion and writing instruction. Open to Marshall College students only. (Letter grade only.) *Prerequisite:* completion of UC Entry Level Writing requirement. (S)

The Earth Sciences Program

The earth sciences encompass broad scientific study of the origin and evolution of the earth system and its life forms. Instruction in the Earth Sciences Program at UCSD embraces a wide range of topics, including the physical and chemical evolution of the planet, the evolution of life, the causes of earthquakes and volcanic eruptions, earth-surface processes, the origin and behavior of oceans and atmosphere, and the impact of humans on the environment. The program offers instruction on several different levels, including introductory classes for nonscience majors, and upper-division courses for earth science majors, students interested in the major, students who have a specialization or minor in earth sciences, and students with majors in other related fields. Earth science investigations are increasingly quantitative and experimental, and thus most upper-division courses require a strong foundation in chemistry, physics, and mathematics. For students interested in pursuing careers in the earth sciences, the program offers a B.S. degree and a contiguous B.S./M.S. degree. In addition, students may follow a chemistry/earth sciences major, a physics major with a specialization in earth sciences, or an environmental systems/earth sciences major (see the "Chemistry," "Physics," or "Environmental Systems" sections of the catalog for details). The program also offers an academic minor in earth sciences.

The Earth Sciences Program takes advantage of the unique opportunities offered by UCSD, in particular through the Scripps Institution of Oceanography. Faculty and researchers at Scripps teach most of the earth sciences courses. Classes beyond introductory level are usually small, permitting personalized instruction. Field trips are an important part of the instructional program. Earth sciences students are encouraged to consult with their instructors about incorporating appropriate courses and research opportunities at the Scripps Institution of Oceanography into their undergraduate curriculum.

A degree in earth sciences is an appropriate start for a broad range of career and graduate school opportunities in various areas, including

research, government, state and federal survey jobs, environmental management, the petroleum and mining industries, consulting, ocean sciences, industrial institutions, elementary or secondary education, environmental policy, or environmental law. Program advisers and faculty can provide additional information on career and graduate school opportunities.

Majors in Earth Sciences

Three tracks with slightly different course requirements are presently offered through the UCSD Interdisciplinary Earth Sciences Undergraduate Program. These are the *ERTH/Geology*, *ERTH/Geochemistry*, and *ERTH/Geophysics* majors.

It is strongly recommended that all earth science majors meet regularly with the Earth Science Program academic advising staff and a faculty adviser to discuss and update curriculum choices.

Lower-division requirements are designed to provide the foundations in mathematics, physics, chemistry, and biology that are essential in modern quantitative earth science disciplines. In addition, there are four upper-division courses introducing basic concepts, ERTH 100, ERTH 102, ERTH 103, and ERTH 104. ERTH 100, ERTH 102, and ERTH 103 should be taken during the sophomore year to provide the appropriate background for other upper-division courses.

A grade-point average of 2.0 or higher in the upper-division major program is required for graduation. Students must receive a grade of C- or better in any course to be counted toward fulfillment of the major requirements. In exceptional cases, students with a grade-point average in the major of 2.5 or greater may petition to have one grade of D accepted. All courses (lower- and upper-division) required for the major must be taken for a letter grade.

Special Studies Courses

Special studies in the earth sciences are offered as the courses ERTH 198 and ERTH 199. These courses are subject to consent of the instructor and approval by the earth sciences faculty adviser. They are open to students who have accrued at least ninety quarter-units and have a GPA of at least 3.0. No more than two quarters of earth sciences special studies may be counted toward any earth sciences major.

ERTH/Geology

The geology EARTH major is designed to allow students maximum flexibility in tailoring the curriculum to their interests, within the constraints of obtaining the necessary background in physical, biological, and earth sciences. Compared to the EARTH/Geochemistry and EARTH/Geophysics tracks, it requires more earth science and fewer non-earth science courses.

Lower-Division Requirements

Math 20A-B-C (may allow Math. 10A-B-C by petition) **AND Math. 20D**
 Physics 2A-B-C (may allow Physics 1A-B-C by petition)
 Chemistry 6A-B-C
 Biology 3
 EARTH 50

Earth Science Upper-Division Core Requirements

ERTH 100. Introduction to Field Methods
 EARTH 102. Introduction to Geochemistry
 EARTH 103. Introduction to Geophysics
 EARTH 104. Geobiology

Upper-Division Earth Science Requirements

ERTH 105. Sedimentology and Stratigraphy
 EARTH 120. Mineralogy
 EARTH 152. Petrology and Petrography
 EARTH 160. Introduction to Tectonics
 EARTH 162. Structural Geology
 EARTH 182A-B. Applied Geophysics
 Upper-division restricted electives: at least four courses from:
 Chem. 173. Atmospheric Chemistry
 EARTH 110. Introduction to GIS for Earth and Environmental Scientists
 EARTH 112. Urban Landscapes
 EARTH 135. Satellite Remote Sensing
 EARTH 142. Atmospheric Chemistry
 EARTH 144. Introduction to Isotope Geochemistry
 EARTH 155. Petrology and Geochemistry of the Solid Earth
 EARTH 170. Introduction to Volcanology (summer session)
 EARTH 185. Applied Complexity
 EARTH 195. Methods of Teaching Earth Sciences

ERTH 197. Earth Science Internship
 EARTH 198. Directed Group Study
 EARTH 199. Independent Study
 SIO 210. Physical Oceanography
 SIO 226. Introduction to Marine Geophysics
 SIO 240. Marine Geology
 SIO 247. Rock Magnetism and Paleomagnetism
 SIO 250. Earth History
 SIO 260. Marine Chemistry
 SIO 280. Biological Oceanography

	ERTH Elect.	ERTH 160

ERTH/Geochemistry Major

This specialization focuses on the Earth as a chemical system, and on its evolution. Emphasis is placed on the fundamental observations that allow geoscientists to understand better the past history of the planet, the energetics of its evolution, and the major "cycles" (e.g., water, carbon) that characterize and control planetary-scale changes on a broad range of time scales. The major is appropriate for students interested in modern geochemistry, in "global change" studies, and in global and local environmental problems, including biochemical and anthropogenic effects.

Lower-Division Requirements

ERTH/Geophysics Major

This specialization focuses on the mechanical, dynamical, and thermodynamical aspects of the Earth. Emphasis is placed on a solid background of fundamental physics, from mechanics and electromagnetism to continuum- and quantum mechanics, and on the necessary mathematical skills. The major introduces basic techniques used to investigate the internal structure of the Earth, from seismology to the study of potential fields, and space geodesy. Elementary geodynamics, including the physics of simple convective systems, introductory rock mechanics, and plate kinematics are among topics introduced. At the same time, a "hands on" exposure to field problems and techniques will be accessible through an Applied Geophysics sequence.

Lower-Division Requirements

- Math 20A-B-C-D-E-F
- Physics 4A-B-C-D or Physics 2A-B-C (Physics 4 sequence recommended)
- Chemistry 6A-B-C
- Biology 3
- ERTH 50

Earth Science Upper-Division Core Requirements

- ERTH 100. Introduction to Field Methods
- ERTH 102. Introduction to Geochemistry
- ERTH 103. Introduction to Geophysics
- ERTH 104. Geobiology

Upper-Division Earth Sciences Requirements

- ERTH 130. Geodynamics of Terrestrial Planets or ERTH 160. Introduction to Tectonics
- ERTH 182A-B. Applied Geophysics

Upper-Division Physics Requirements

- Physics 100A-B-C. Electromagnetism
- Physics 110A-B. Mechanics
- Physics restricted electives: at least one course from:

- Physics 105A. Mathematical and Computational Physics
- Physics 121. Experimental Techniques
- Physics 140A-B. Statistical and Thermal Physics
- MAE 131A. Solid Mechanics I
- MAE 180A. Space Science and Engineering

Upper-division restricted electives: at least two courses from:

- ERTH 105. Sedimentology and Stratigraphy
- ERTH 110. Introduction to GIS for Earth and Environmental Scientists
- ERTH 112. Urban Landscapes
- ERTH 120. Mineralogy
- ERTH 130. Geodynamics of Terrestrial Planets
- ERTH 135. Satellite Remote Sensing
- ERTH 142. Atmospheric Chemistry and Biochemical Cycles
- ERTH 144. Introduction to Isotope Chemistry
- ERTH 152. Petrology and Petrography
- ERTH 155. Petrology and Geochemistry of the Solid Earth
- ERTH 160. Introduction to Tectonics
- ERTH 162. Structural Geology
- ERTH 170. Introduction to Volcanology (summer session)
- ERTH 185. Applied Complexity
- ERTH 195. Methods of Teaching Earth Sciences
- ERTH 197. Earth Science Internship
- ERTH 198. Directed Group Study
- ERTH 199. Independent Study
- SIO 223. Geophysical Data Analysis
- SIO 226. Introduction to Marine Geophysics
- SIO 227A. Introduction to Seismology
- SIO 250. Earth History

An example schedule is outlined below.

FALL	WINTER	SPRING
FRESHMAN YEAR		
Chem. 6A	Chem. 6B	Chem. 6C
Math. 20A	Math. 20B	Math. 20C

ERTH 50	Phys. 4A	Phys. 4B
SOPHOMORE YEAR		
Math. 20D	Math. 20E	Math. 20F
Phys. 4C	Phys. 4D	BILD 3
ERTH 100	ERTH 102	
JUNIOR YEAR		
Phys. 100A	Phys. 100B	Phys. 100C
Phys. 110A	Phys. 110B	ERTH 104
ERTH 103	ERTH 182A	ERTH 182B
SENIOR YEAR		
ERTH 130 OR 160	Phys. Elect. ERTH Elect.	ERTH Elect.

Earth Sciences Minor

A minor in earth sciences consists of twenty-eight units of earth science courses, at least twenty of which must be upper-division, focused on geology, geochemistry, or geophysics. Courses required by a student's major may not be applied toward a minor and neither can ERTH 198 nor ERTH 199. Courses for the minor may be taken on a Pass/Not Pass basis if the student's college permits.

Honors Program

The Earth Sciences Program offers an Honors Program for a limited number of students who have demonstrated excellence in the major. Students are eligible for admission to the program when they have:

1. Completed ninety units of courses including twelve units of earth science courses.
2. Achieved a GPA of 3.3 overall and 3.5 in earth science courses.
3. Submitted to the Earth Science Steering Committee, and had approved, an honors thesis research proposal.

Successful completion of the Honors Program requires:

1. Maintenance of a GPA of 3.3 overall and 3.5 in earth science courses.
2. Completion, with a B grade or higher, of a minimum of eight units of ERTH 196 related to the honors thesis research, distributed over at least two quarters. These units must be in addition to the ordinary major requirements. However, students who subsequently fail to

complete the Honors Program may apply up to four of these 196 units to their major.

3. Acceptance of a written honors thesis report by a committee of not fewer than three faculty members.
4. Satisfactory presentation of an oral report on the thesis research, preferably at a public undergraduate research conference on campus, or at an earth science conference. Alternatively, the oral report may be given at a seminar involving honors students and at least three faculty members.

Students who successfully complete the Honors Program will graduate with "high distinction."

Students who are interested in the Honors Program should contact the program adviser in Galbraith Hall, room 188, Revelle College.

Study Abroad

Study abroad through the **Education Abroad Program** (<http://programsabroad.ucsd.edu>) or **Opportunities Abroad Program** can enhance a student's major, particularly as an opportunity for diverse field experiences. However, careful planning is important to meet all major requirements. Please contact the Earth Sciences Office as early as possible if you are planning to study abroad.

Careers in Education

Students interested in a teaching career should be aware that the earth sciences major, because of its broad course requirements in the sciences, fulfills many of the subject requirements for obtaining a California Teaching Credential through UCSD's Teacher Education Program (TEP). The projected high demand over the next decade for well-trained teachers, particularly in the sciences, makes this an attractive option for many students. Students who wish to take advantage of this opportunity may wish to complete a minor in education. Please contact the TEP office directly for further details.

Contiguous Bachelor's/ Master's Degree Program

The integrated program leading to a bachelor of science and a master of science degree in earth sciences is offered to undergraduate students

who are enrolled in the earth sciences major, and to qualified students who are completing a specialization or minor in earth sciences. It is open only to UCSD undergraduates, and entails participation in research in an area of the earth sciences to be determined jointly by the student and a committee of faculty members from the Earth Sciences Program. Applications will only be accepted during the final quarter of the applicant's junior year, or the first or second quarter of the senior year. A minimum undergraduate GPA of 3.0 overall and 3.3 in upper-division earth sciences courses is required for admission. Applications must include a written statement of purpose, a summary of the research proposal, and a letter of support from the potential M.S. thesis adviser. Students must complete requirements for the B.S. degree before they are enrolled in the M.S. program, and are expected to meet the requirements for the M.S. degree within three consecutive academic quarters after obtaining the B.S. Students may be dropped from the program if breaks in enrollment occur. The Earth Sciences Program does not have financial aid available for students enrolled in the program. Please contact the Earth Sciences Office in Galbraith Hall, room 188, Revelle College for information.

Earth Sciences Graduate Program

Other graduate degrees in the earth sciences are offered through the graduate department of the Scripps Institution of Oceanography. See listings under "Scripps Institution of Oceanography" for detailed information.

COURSES

For course descriptions not found in the 2006–2007 General Catalog, please contact the department for more information.

NOTE: The program will endeavor to offer the courses outlined below. However, unforeseen circumstances (particularly changes in ship schedules) sometimes mandate a change of scheduled offerings, especially the quarter offered (F,W,S). Students are strongly advised to check the Schedule of Classes or to contact the Earth Sciences Program Office (Galbraith

Hall, Room 188, Revelle College, 858-534-8157) to obtain up-to-date information.

LOWER-DIVISION

ERTH 1. The Planets

Space exploration has revealed an astonishing diversity among the planets and moons in our solar system. The planets and their histories will be compared to gain insight and a new perspective on planet Earth. *Prerequisite: none.* (S)

ERTH 10. The Earth (4)

A basic introduction to geology for students with little previous science background. The course stresses understanding of the concepts of the structure of the Earth and the processes which have formed it and continue to modify it. The course emphasizes material which every educated citizen should know for appreciation and enjoyment of the world around us, for understanding geological events as reported in the news, and for participating in making intelligent decisions regarding the future of our environment. Three-hour lecture plus optional local field trips. *Prerequisite: none.* (W)

ERTH 12. History of the Earth and Evolution (4)

Evolution of the Earth from its origin in the early solar system to formation of continents and ocean basins, and how the planet became habitable. It examines the geologic record of evolution, extinction, plate tectonics, and climate changes through time. Three-hour lecture. *Prerequisite: none.* (S)

ERTH 15. Natural Disasters

An introduction to environmental perils and their impact on everyday life. Geological and meteorological processes are explored, including earthquakes, volcanic activity, large storms, global climate change, mass extinctions throughout Earth's history, and human activity that causes and prevents natural disasters. *Prerequisite: none.* (F)

ERTH 16. Geology of the National Parks (4)

An introduction to fundamental concepts of geology and environmental science through the lens of the national park system. Topics covered include the geologic time scale; plate tectonics; igneous, metamorphic, and sedimentary processes; geomorphology; climate change; and environmental degradation. *Prerequisite: none.* (W)

ERTH 20. The Atmosphere (4)

Descriptive introduction to meteorology and climate studies. Topics include global and continental wind and precipitation patterns, weather forecasting, present climate and past climate changes (including droughts, El Niño events), man-made modification of climate, including CO₂ and other "greenhouse" gases effects, ozone destruction, "little ice ages," acid rain. Three-hour lecture. *Prerequisites: some high school physics and chemistry background recommended.* (W)

ERTH 30. The Oceans (4)

Presents modern ideas and descriptions of the physical, chemical, biological, and geological aspects of oceanography, and considers the interactions between these aspects. Intended for students interested in the oceans, but who do not necessarily intend to become professional scientists. Three-hour lecture, one-hour discussion. *Prerequisite: some background in high school chemistry recommended.* (F)

ERTH 35. Water (4)

This course will examine the properties of water that make it unique and vital to living things. Origin of water

on Earth and neighboring planets will be explored. Socially relevant issues concerning water use and contamination will be covered. *Prerequisite: none.* (S)

ERTH 40. The Biosphere (4)

Explores life on earth and its relationship to the environment—past, present, and future. Topics include origins of life, earth history, elemental cycles, global climate variability, and human impacts on our environment. *Prerequisite: none.* (F)

ERTH 50. Introduction to Earth and Environmental Sciences (5)

This course is an introduction to how our planet works, focusing on the formation and evolution of the solid earth, and the processes affecting both its surface and interior. Laboratories and field trips complement and extend the lecture material. *Prerequisite: none.* (F)

ERTH 90. Undergraduate Seminar (1)

Provides an introduction to earth sciences. Faculty members from departments in natural sciences, geosciences, and marine sciences will offer perspectives in these areas.

ERTH 96. Frontiers in the Earth Sciences (2)

An introduction to current research in the earth sciences. Background in science not required, but may be useful for some topics. Areas covered vary from year to year. (S)

ERTH 99. Independent Study (2-4)

Independent reading or research on a problem by special arrangement with a faculty member. *Prerequisite: completion of at least 30 units of undergraduate study with a minimum GPA of at least 3.0.*

UPPER-DIVISION

ERTH 100. Introduction to Field Methods (4)

Mapping and interpretation of geologic units. Field work is done locally and the data are analyzed in the laboratory. There will be one mandatory weekend field trip to Anza Borrego State Park. *Prerequisite: EARTH 50, or consent of instructor.* (F)

ERTH 102. Introduction to Geochemistry (4)

A broad introduction to the chemical composition and evolution of the Earth and the solar system. This course explores applications of chemical methods to elucidate the origin and geologic history of the Earth and the planets, the evolution of the oceans and atmosphere, and the impact of humankind on the environment. *Prerequisites: EARTH 50, Chemistry 6A-B-C or equivalent, first-year, mathematics, and physics, or consent of instructor.* (W)

ERTH 103. Introduction to Geophysics (4)

An introduction to the structure and composition of the solid earth. Topics include seismology, the gravity and magnetic fields, high-pressure geophysics, and concepts in geodynamics. Emphasis is on global geophysics, i.e., on the structure and evolution of the planet. *Prerequisites: Math. 20A-B-C-D and Physics 2 sequence, EARTH 50, or consent of instructor. EARTH 160 recommended.* (F)

ERTH 104. Geobiology (5)

Introduction to the major biological transitions in earth history from the origins of metabolism and cells to the evolution of complex societies. The nature and limitations of the fossil record, patterns of adaptation and diversity, and the tempo and mode of biological

and environmental change. Laboratories and field trips complement and extend the lecture material. *Prerequisites: EARTH 50, BILD 3 or equivalent, or consent of instructor.* (S)

ERTH 105. Sedimentology and Stratigraphy (4)

This course will examine sedimentary environments from the mountain tops to the deep sea across a variety of time scales. The focus will be to understand how depositional processes form the stratigraphic record. The central goal of the course is to develop the skills to interpret stratigraphy and read the history of the earth that it records. *Prerequisites: EARTH 50 and EARTH 100.* (F)

ERTH 110. Introduction to GIS for Earth and Environmental Scientists (4)

A hands-on introduction to geological and environmental applications of geographic information systems (GIS). Students acquire data through field surveys and digitization, design and construct GIS using ESRI's ArcGIS software, analyze spatial data, and present the finished products as maps. *Prerequisites: EARTH 50 or ESYS 102 or the equivalent, or consent of instructor.* (S)

ERTH 112. Urban Landscapes (4)

Introduction to scientific principles, such as conservation of mass and energy and pattern formation, that govern the development of urban centers as complex systems. Contrasts between natural and urban landscapes will be highlighted, with examples including water routing and disease transmission. *Prerequisite: upper-division standing.* (S)

ERTH 120. Introduction to Mineralogy (4)

This course focuses on the symmetry, crystal structure, chemical, and physical properties of minerals with special emphasis on the common rock-forming minerals, and highlights the applications of mineralogical and X-ray crystallographic techniques to a spectrum of important problems in the earth sciences. The laboratory will introduce the students to the polarizing microscope and X-ray powder diffraction methods for the study of rock-forming minerals. *Prerequisites: EARTH 50, EARTH 102.* (W)

ERTH 130. Geodynamics of Terrestrial Planets (4)

Planetary differentiation through geodynamical processes is the fundamental agent controlling the evolution of the planet on geological time scales. Similarities and differences between the Earth, Venus, Mars, and other terrestrial planets and satellites teach us about the processes which shape a planet's formation and evolution. The course includes a computer-oriented lab. *Prerequisites: Math. 20A-B-C-D and Physics 2 sequence, or consent of instructors.* (F)

ERTH 135. Satellite Remote Sensing (4)

Satellite remote sensing provides global observations of Earth to monitor changes in the environment of land, oceans, and ice. This course is an overview of the physical principles of remote sensing including orbits, electromagnetic radiation, diffraction, electro-optical, and microwave systems. *Prerequisites: Physics 2A-B or Physics 4A-B-C.* (S)

ERTH 142. Atmospheric Chemistry and the Biochemical Cycles of Atmospheric Trace Gases (4)

Evolution of the Earth's atmosphere, from the earliest days of the planet to the present, and into the future. The atmospheres of other terrestrial planets are discussed to provide a planetary perspective. Discussions will include effects of "greenhouse" gases such as H₂O, CO₂, and CH₄ in climate modification, and other

influences of civilization's byproducts on atmospheric chemistry, e.g., the destruction of the ozone layer. The biogeochemical cycles of the radioactively important trace gases will be examined. *Prerequisites: Chemistry 6 sequence or equivalent, or consent of instructor.* Not offered every year. SIO staff. (W)

ERTH 144/SIO 252A. Introduction to Isotope Geochemistry (4)

Radioactive and stable isotope studies in geology and geochemistry, including geochronology, isotopes as tracers of magnetic processes, cosmic-ray produced isotopes as tracers in the crust and weathering cycle, isotopic evolution of the crust and mantle. At the graduate level, oral presentations are required and the final exam is more rigorous. Offered in alternate years. *Prerequisites: Graduates: SIO entrance requirements or consent of instructor. Undergraduates: EARTH 50, EARTH 102, EARTH 120, or equivalent.* (W)

ERTH 152. Petrology and Petrography (4)

Mineralogical, chemical, textural, and structural properties of igneous, metamorphic, and sedimentary rocks; their origin and relations to evolution of the Earth's crust and mantle. Includes rocks of both the continents and ocean basins. The laboratory emphasizes both hand specimens and microscopic studies of rocks in thin sections. *Prerequisites: EARTH 50, EARTH 102, and EARTH 120 or their equivalents.* (S)

ERTH 155/SIO 251. Petrology and Geochemistry of the Solid Earth (4)

Overview of the Earth from a geochemical and petrogenetic point of view. The formation and chemical differentiation of material in the solar system, the formation and differentiation of the Earth into core, mantle, crust and atmosphere/hydrosphere, the generation of magma in a variety of plate tectonic settings, and isotope and trace element geochemistry of igneous and metamorphic rocks. Literature readings will be assigned and discussion is expected of everyone. *Prerequisite: EARTH 152 or consent of instructors.* (W)

ERTH 160. Introduction to Tectonics (4)

The theory of plate tectonics attempts to explain how forces within the earth give rise to continents, ocean basins, mountain ranges, earthquake belts and most volcanoes. In this course we will learn how plate tectonics works. *Prerequisite: EARTH 50.* (S)

ERTH 162/SIO 256L. Structural Geology (4)

Principles of stratigraphy and structural geology applicable to field geologic studies. Discussion and laboratory exercises. Two to three field trips required. Graduate students, additionally, will complete an in-depth, literature-based, focused study consisting of a written report and a 45-minute seminar on topics related to structural geology. *Prerequisites: EARTH 50 and EARTH 100, or consent of instructor. Graduate students enroll with consent of instructor.* (W)

ERTH 170. Introduction to Volcanology (4)

This course teaches fundamental aspects of physical and chemical volcanology with a major field study component on an active volcano on Hawaii. Subjects are introduced in lectures and reinforced and expanded in field exercises. *Prerequisites: EARTH 50, Chem. 6A, upper-division standing or consent of instructor; eighteen years or older and ability to walk up to fifteen miles a day over rough terrain.* (Offered summer session only)

ERTH 182A. Applied Geophysics (4)

Introduction to design and execution of simple geophysical field experiments, including seismic,

gravimetric, geoelectrical, and geodetic techniques. The focus is on a simple geological problem that can be solved by geophysical experiments. Computer-aided data analysis and interpretation. *Prerequisite: EARTH 103.* (W)

ERTH 182B. Applied Geophysics (4)

Design and execution of simple geophysical field experiments, including seismic, gravimetric, geoelectrical, and geodetic techniques. The focus is on a simple geological problem that can be solved by geophysical experiments. Computer-aided data analysis and interpretation. *Prerequisite: EARTH 182A.* (S)

ERTH 185. Applied Complexity (4)

Techniques from the study of complex systems, including genetic algorithms, neural networks, forecasting, artificial life and agent-based modeling, are introduced and applied to problems in geology, physics, engineering, biology, and economics. *Prerequisites: Math 20A-B-C-D or equivalent, MATLAB recommended.* (S)

ERTH 190. Special Topics in Earth Sciences (2-4)

A seminar course designed to treat emerging or topical subjects in the earth sciences. Involved reading from the literature and student participation in discussion. Topics vary from year to year.

ERTH 194. Research Seminar in Washington, D.C. (4)

Course attached to six-unit internship taken by students participating in the UCDC program. Involves weekly seminar meetings with faculty and teaching assistant and substantial research paper. *Prerequisites: departmental approval, participation in UCDC Program.*

ERTH 195. Methods of Teaching Earth Sciences (4)

Introduction to teaching earth sciences class section in a lower-division class, hold office hours, assist with examinations. This course counts only once towards the major. *Prerequisites: junior or senior earth sciences major with GPA of 3.0 or an A in the course and consent of instructor, plus department stamp.*

ERTH 196. Honors Thesis Research (4)

Independent reading or research on a problem. By special arrangement with a faculty member. (Letter grade only.)

ERTH 197. Earth Science Internship (2-4)

The Earth Science Internship program is designed to complement the program's academic curriculum with practical field experience. *Prerequisites: consent of instructor, upper-division standing, minimum GPA of 2.0, department stamp.*

ERTH 198. Directed Group Study (2-4)

This course covers a variety of directed group studies in areas not covered by formal EARTH courses (P/NP grades only.) *Prerequisite: consent of instructor.*

ERTH 199. Independent Study for Undergraduates (4)

Independent reading or research on a problem. By special arrangement with a faculty member. (P/NP grades only.)

ERTH 211. Research Seminar (2)

A three quarter required sequence for BS/MS Earth Sciences students to prepare students for thesis writing. (F,W,S)

Introduction

Economics is the study of how individuals, organizations, and societies deal with scarcity—the fact that resources are not sufficient to satisfy everyone's wants. Because scarcity requires choice among alternative uses of resources, economists study both the technology by which resources are turned into the products people want and the preferences through which people choose among alternatives. Further, since society is composed of many individuals and groups, economists study markets, governments, and other institutions through which a society might gain the advantages of cooperation and resolve the conflicts due to competing goals. The economics curriculum develops tools and uses them to analyze a wide range of societal problems, and also to study the role of the government in solving these problems.

Economics is a different discipline from business administration. However, there are substantial overlaps. Both disciplines study the behavior of people and firms within the context of market, legal, and other institutions. In evaluating economic institutions, economists tend to emphasize the viewpoint of the larger society, and business scholars tend to emphasize the viewpoint of firms. A more complete discussion is available in the department *Undergraduate Handbook*, which contains a comparison between the economics major at UCSD and a business administration major at UC Berkeley.

The department *Undergraduate Handbook* is available on the Internet at the department Web site at <http://www.econ.ucsd.edu/>. The handbook contains answers to frequently asked questions, gives practical tips for avoiding problems, and provides a more detailed discussion of the department's majors than is possible in the general catalog. It is important for students contemplating a major in the department to be familiar with the handbook and the prerequisite requirements listed therein. Time-sensitive information, job and internship announcements, and other important information are sent to all declared majors and minors through campus email.

Students interested in the Education Abroad Program (EAP) are encouraged to check out the brochure "Opportunities in Business and Economics" that is available at the EAP office.

The Undergraduate Program

Lower-Division Economic Courses

MICROECONOMICS AND MACROECONOMICS—ECONOMICS 1-2-3

The department offers three lower-division economics classes, Economics 1-2-3. Economics 1 introduces microeconomics: supply and demand, markets, income distribution, perfect and imperfect competition, and the role of government. Modern economics is somewhat mathematical, and calculus is the standard working tool. Economics 2, therefore, introduces basic mathematical concepts used in conjunction with basic micro and macro principles to expose students to standard tools of economic analysis: mathematical foundations of marginal analysis, basics of graphical, algebraic and statistical modeling, policy analysis, discounting, and strategic interaction. Economics 3 introduces macroeconomics: unemployment, inflation, business cycles, and monetary and fiscal policy.

The courses are to be taken in sequential order.

Accounting Course

The department offers an accounting course, Economics 4. Economics 4 is a lower-division requirement for the B.S. in management science and the management science minor. The course is a prerequisite for Economics 173, Corporate Finance. Economics 4 can be used as an optional part of an economics major or minor; and the

course is open to students who take no other courses from the department.

Upper-Division Economics Courses

The upper-division economics core courses are offered according to the following academic schedule:

Fall—100A, 110A, 120A-B-C, 170A, 171, 172A, and 172C;

Winter—100A-B, 110A-B, 120A-B-C, 170A-B, and 172A-B;

Spring—100B, 110B, 120A-B-C, 170B, 171, and 172B-C.

The 100, 110, 120 and 170 core courses are sequential. That is, "A" must be taken before "B" before "C". Economics 172A must be taken first, but 172B and 172C may be taken in either order or concurrently.

Entry to the Majors

Any student in good standing may declare a major in the department by filling out a form at the Office of the Registrar. The major codes are as follows: Economics, EN 25; Management Science, EN 26; and Joint Mathematics-Economics, EN 28.

The Economics Major (B.A.)

The economics B.A. program is designed to provide a broad understanding of resource-allocation and income-determination mechanisms. Both the development of the tools of economic analysis and their application to contemporary problems and public policy are stressed.

A student majoring in economics must meet the following requirements:

1. Calculus. Mathematics 10A-B-C or Mathematics 20A-B and 20C/21C.
2. Lower-division economics. Economics 1-2-3.
3. Upper-division core. Economics 100A-B (microeconomics), Economics 110A-B (macroeconomics), and Economics 120A-B-C (econometrics).
4. Upper-division electives. Five more economics courses at the upper-division level.

Majors are strongly encouraged to complete the lower-division requirements (1 and 2) before beginning the upper-division requirements (3 and 4). Further, majors are strongly encouraged to take Economics 100A-B and either 110A-B or

120A-B-C prior to the senior year, since numerous upper-division electives have core-course prerequisites.

The following schedule, though not the only possibility, is a well-constructed one for majoring in economics.

FRESHMAN YEAR

Economics 1-2-3

Mathematics 10A-B-C or

Mathematics 20A-B and 20C/21C

SOPHOMORE YEAR

Economics 100A-B

Economics 120A-B-C

JUNIOR YEAR

Economics 110A-B

Economics Electives

SENIOR YEAR

Remaining Economics Electives

A detailed description of the economics major is contained in the *Undergraduate Handbook*, available in the Undergraduate Program section of the department Web site.

The Management Science Major (B.Sc.)

Management science builds on a set of related quantitative methods commonly used to solve problems arising in the private (business and finance) and public (government) sectors. While students will gain some familiarity with the traditional functional fields of business management, this program is more tightly focused and more quantitative than a traditional business administration major. It is not, however, a program in applied mathematics or operational research, since the economic interpretation and application of the tools are continually stressed. Rather, it is a quantitative major in applied economics with a management focus. Before beginning upper-division work, a major must complete Economics 1-2-3, Mathematics 20A-B and 20C/21C, and Mathematics 20F. These courses provide both the understanding of basic principles and the mathematical maturity needed to understand the quantitative techniques of management science.

The management science major requires a total of 15 upper-division courses. Nine of these are specified: Economics 170A-B (Management Science Microeconomics), Economics 120A-B-C (Econometrics), Economics 171 (Decisions Under Uncertainty), and Economics 172A-B-C (Introduction to Operations Research). The 170 sequence

concerns the nature and interdependence of managerial resource allocation decisions. Economics 120A-B-C teaches the theory and use of statistics and econometrics. The 172 sequence provides a general survey of optimization and problem-solving techniques employed by management scientists.

Of the six management science electives, three from the following "restricted" list must be taken: Economics 109 (Game Theory), Economics 121 (Applied Econometrics), Economics 125 (Economics of Population Growth), Economics 173 (Corporate Finance), Economics 174 (Insurance, Economics, and Finance), Economics 175 (Financial Investments), Economics 176 (Marketing), Economics 178 (Economic and Business Forecasting), or Economics 179 (Decisions in the Public Sector). At least one restricted elective must be either Economics 173 or 175. Each of these courses focuses on an important set of managerial problems. The remaining three electives may be chosen from among other upper-division economics courses. Each of these courses focuses on an important set of managerial problems. The remaining three electives may be chosen from among other upper-division economics courses.

The following schedule, though not the only possibility, is a well-constructed one for a student majoring in Management Science.

FRESHMAN YEAR

Economics 1-2-3
Mathematics 20A-B and 20C/21C

SOPHOMORE YEAR

Economics 120A-B-C
Economics 170A-B
Mathematics 20F

JUNIOR YEAR

Economics 4 (taken in quarter prior to Econ 173)
Economics 171
Economics 172A-B-C
Economics Electives

SENIOR YEAR

Remaining Economics Electives

A detailed description of the management science major is contained in the *Undergraduate Handbook*, available on the department Web site.

Joint Major in Mathematics and Economics (B.A.)

Majors in mathematics and the natural sciences often feel the need for a more formal

introduction to issues involving business applications of science and mathematics. Extending their studies into economics provides this application and can provide a bridge to successful careers or advanced study. Majors in economics generally recognize the importance of mathematics to their discipline. Undergraduate students who plan to pursue doctoral study in economics or business need the more advanced mathematics training prescribed in this major.

This major is considered to be excellent preparation for Ph.D. study in economics and business administration, as well as for graduate studies for professional management degrees, including the MBA. The major provides a formal framework making it easier to combine study in the two fields.

Course requirements of the Joint Major in Mathematics and Economics consist principally of the required courses of the mathematics major and the economics/management science majors:

Lower-Division Requirements:

1. Calculus and Linear Algebra. Mathematics 20A-B, 20C/21C, 20D, and 20F
2. Introductory Economics. Economics 1-2-3

Upper-Division Requirements:

Fifteen upper-division courses in mathematics and economics, with a minimum of seven courses in each department, chosen from the courses listed below (prerequisites are strictly enforced):

1. Mathematical Reasoning. Mathematics 109 (formerly Math. 89)
2. One of the following:
 - a. Applied Linear Algebra. Mathematics 102
 - b. Numerical Linear Algebra. Mathematics 170A
 - c. Linear Algebra. Mathematics 100A and B
3. One of the following:
 - a. Foundations of Analysis. Mathematics 140A
 - b. Advanced Calculus. Mathematics 142A
4. One of the following:
 - a. Ordinary Differential Equations. Mathematics 130A
 - b. Foundations of Analysis. Mathematics 140B
 - c. Advanced Calculus. Mathematics 142B
5. One of the following:
 - a. Microeconomics. Economics 100AB
 - b. Management Science Microeconomics. Economics 170AB

6. Econometrics/Statistics. One of the following:
 - a. Economics 120A-B-C
 - b. Mathematics 180A and Economics 120B-C
 - c. Mathematics 180A and 181A and Economics 120C

7. One of the following:
 - a. Macroeconomics. Economics 110AB
 - b. Mathematical Programming: Numerical Optimization. Mathematics 171AB

or

Two of the following:

- a. Decisions Under Uncertainty. Economics 171
- b. Introduction to Operations Research. Economics 172A-B-C (**Note:** 172A is a prerequisite for 172B and C)

Other courses which are strongly recommended are: Mathematics 130B, 131, 181B, 190, and 193A-B and Economics 109, 113, 175, and 178.

Further information may be obtained in the mathematics and economics undergraduate offices.

Honors

Currently, honors programs exist for the economics major and for the management science major. There are two levels of honors. For the lower level, indicated by the phrase "with distinction" on the diploma, you must satisfy the first two of the following three requirements. For the higher level, indicated by the phrase "with highest distinction" on the diploma, you must satisfy all three requirements. There is no application to the honors program. Register for either major under the regular major code (EN25 for economics, EN26 for management science). Your final degree check will indicate which level of honors you receive.

1. Complete either a management science major or the honors track of the economics major, both of which require fifteen upper-division courses. The honors track of the economics major consists of the course work of a regular economics major (twelve upper-division courses) plus one advanced microeconomics course (Economics 105, 107, 109, 113, 117, 150, 151, 155, or 179), one advanced macroeconomics course (Economics 103 or 146), and one advanced econometrics course (Economics 121, 125, 174, 175, 176, or 178). Typically, a course will qualify as "advanced" if it has the

corresponding core courses as prerequisites. As an example, a course with an Economics 100A-B prerequisite will typically qualify as an advanced microeconomics course.

2. Have an upper division GPA in your major greater than or equal to 3.5. Typically, the upper-division major GPA will exclude grades for courses taken at universities other than those in the UC system.
3. Take the honors versions of at least two upper-division courses (Economics 100AH-BH, 110AH-AH, 120AH-BH-CH, and 170AH-BH), and take the senior essay seminar (Economics 191A-B). The GPA across these four or more courses must be 3.5 or above. Admission to these courses is by special permission; check with the undergraduate adviser in the Economics Student Services Office.

Grade Rules for Majors

All courses used in meeting requirements for a departmental major must be taken on a letter-grade basis, and must be passed with a grade of C- (C minus) or better. These rules apply to lower-division as well as upper-division courses, and to courses taken from other departments (such as required mathematics courses). Exceptions are courses such as Economics 195 and Economics 199, for which P/NP grading is mandatory. However, no more than twelve units of Economics 195 and Economics 199 taken P/NP may be counted toward a major.

Advanced Placement Credits

Because no high school economics course provides the kind of background needed for upper-division economics and management science, we are strict on allowance of credits. The policy is as follows: If the AP score is 5, accept AP Micro (AP Macro) as equivalent to Economics 1 (Economics 3) in meeting major or minor requirements. If the score is 3 or 4, the student is required to take Economics 1 (Economics 3) for the major or minor. There is not an advanced placement exam equivalent to Economics 2.

Minors and Programs of Concentration

The economics minor or program of concentration consists of eight courses: introductory microeconomics (Economics 1); microeconomic applications (Economics 2); introductory macro-

economics (Economics 3); and five upper-division economics courses, which are otherwise not restricted.

The management science minor, paralleling the economics minor, consists of nine courses: introductory microeconomics (Economics 1); microeconomics applications (Economics 2); introductory macroeconomics (Economics 3); financial accounting (Economics 4), and any five from the following list (Caution: some courses have prerequisites):

Economics 170A	Managerial Microeconomics
Economics 170B	Managerial Microeconomics
Economics 120A	Econometrics
Economics 120B	Econometrics
Economics 120C	Econometrics
Economics 171	Decisions Under Uncertainty
Economics 172A	Operations Research
Economics 172B	Operations Research
Economics 172C	Operations Research
Economics 173	Corporate Finance
Economics 174	Insurance, Economics and Finance
Economics 175	Financial Investments
Economics 176	Marketing
Economics 178	Economic and Business Forecasting
Economics 179	Decisions in the Public Sector

Grades of P/NP are acceptable for minor courses. If courses are taken for a letter grade, passing is considered with a "D" or better. To declare a minor or program of concentration, obtain a minor declaration form, fill it out, and turn it in to Sequoyah Hall 245. Students should check with their colleges regarding area of focus, programs of concentration, and project minors.

The Graduate Program

The department offers a Ph.D. degree in economics, designed to provide a solid, analytically oriented training in microeconomics, macroeconomics, econometrics, and advanced specialties. Since the program is structured as a doctoral program, only students who intend to pursue a doctorate should apply. The department also offers the Ph.D. degree in economics and international affairs jointly with the Graduate School of International Relations and Pacific Studies.

The main economics Ph.D. requirements are that a student pass qualifying exams in microeconomics, macroeconomics, econometrics, and select courses of specialization, and prepare an acceptable dissertation. The Ph.D. degree in economics and international affairs also requires successful completion of a language requirement and additional electives offered by IR/PS.

Detailed descriptions of the Ph.D. programs are available on the Internet at the department Web site at <http://www.econ.ucsd.edu>. Residence and other campus-wide regulations are described in the graduate studies section of this catalog.

Departmental Ph.D. Time Limit Policies

Students must be advanced to candidacy by the end of five years. Total university support cannot exceed six years. Total registered time at UCSD cannot exceed seven years. Students will not be permitted to continue beyond the pre-candidacy and total registered time limits. Students will not be permitted to receive UCSD administered financial support beyond the support limit.

COURSES

For course descriptions not found in the 2006-2007 General Catalog, please contact the department for more information.

LOWER-DIVISION

1. Elements of Economics I (4)

Introduction to the study of the economic system from the micro, or individual decision maker's, perspective. Analysis of the allocation of resources and distribution of income in perfectly competitive markets. Courses must be taken in 1-2-3 order.

2. Elements of Economics II (4)

Continuation of study of microeconomics: analysis of monopoly and imperfectly competitive markets, the role of government, and cost/benefit analysis. Courses must be taken in 1-2-3 order. *Prerequisite: Economics 1.*

3. Elements of Economics III (4)

Introductory macroeconomics: unemployment, inflation, business cycles, monetary and fiscal policy. Courses must be taken in 1-2-3 order. *Prerequisites: Economics 1 and 2.*

4. Financial Accounting (4)

Recording, organizing, and communicating economic information relating to business entities. *No prerequisites.*

87. Freshman Seminar (1)

The Freshman Seminar Program is designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminars are offered in all campus departments and undergraduate colleges, and topics vary from quarter to quarter. Enrollment is limited to 15-20 students, with preference given to entering freshmen. May be repeated when course topics vary. (P/NP grades only.)

90. Undergraduate Seminar (1)

Selected topics in economics. May be repeated twice (total of three units) when course topic varies. (P/NP grades only.)

UPPER-DIVISION

100A. Microeconomics A (4)

Economic analysis of household determination of the demand for goods and services, consumption/saving decisions, and the supply of labor. Analysis of firms' determination of output and the demand for factors of production. Analysis of perfectly competitive markets. Economics 100A must be taken before Economics 100B. Credit not allowed for both Economics 100A and Economics 170A. *Prerequisites: Economics 1A-B or Economics 1-2-3; and Mathematics 10A or 20A, Mathematics 10B or 20B, and Mathematics 10C or 20C or 21C.*

100B. Microeconomics B (4)

Analysis of the effects of market structure (perfect competition, imperfect competition, and monopoly) and strategic interaction among firms, the distribution of income, and welfare economics. Economics 100A must be taken before Economics 100B. Credit not allowed for both Economics 100B and Economics 170B. *Prerequisite: Economics 100A.*

100AH-BH. Honors Microeconomics (1-1)

Honors sequence expanding on the material taught in Economics 100A-B. *Prerequisites: GPA of 3.5 or better. Department stamp required. Economics 100A must be taken with 100AH, and 100B must be taken with 100BH.*

101. International Trade (4)

Determinants of trade in goods and services. International flows of labor and capital. The effects of trade policy on welfare and income distribution. Policy issues such as U.S. competitiveness, U.S. immigration policy, trading blocs, and industrial policy. *Prerequisites: Economics 1A-B or 1-2-3. Recommended: Economics 100A-B or 170A-B.*

103. International Monetary Relations (4)

Balance of payments, international capital movements, and foreign exchange examined in light of current theories, policies, and problems. *Prerequisites: Economics 110A-B.*

104. Economics of Network Industries (4)

Economics of industries in which network effects play an important role, such as telecommunications, internet, software, and airlines. Analysis of standards, complementarities, switching costs, and economies of scale, and their role in shaping network industries. *Prerequisites: Economics 100A-B or 170A-B.*

105. Industrial Organization and Antitrust Policy (4)

Structure and performance of U.S. industry. Pricing, advertising, product strategies, cartel behavior, and strategic entry barriers. Detailed treatment of antitrust policy. *Prerequisites: Economics 100A-B or 170A-B.*

107. Economic Regulation (4)

Theory and application of economic regulation. Natural monopoly, nonlinear pricing, Ramsey pricing, franchise bidding. Discussion of U.S. electric utilities, gas utilities, broadcasting, surface transportation, and air transportation. *Prerequisites: Economics 100A or 170A.*

109. Game Theory (4)

Introduction to game theory. Analysis of people's decisions when the consequences of the decisions depend on what other people do. Applications to economic, political, and social interactions. *Prerequisites: Economics 100A-B or 170A-B.*

110A. Macroeconomics A (4)

Analysis of the determination of long run growth and models of the determination of output, interest rates, and the price level. Analysis of inflation, unemployment, and monetary and fiscal policy. Economics 110A must be taken before Economics 110B. *Prerequisites: Economics 1A-B or 1-2-3; and Mathematics 10C or 20C or 21C.*

110B. Macroeconomics B (4)

Analysis of the determination of consumption spending at the aggregate level; extension of the basic macro model to include exchange rates and international trade; the aggregate money supply, and the business cycle. Economics 110A must be taken before Economics 110B. *Prerequisites: Economics 110A.*

110AH-BH. Honors Macroeconomics (1-1)

Honors sequence expanding on the material taught in Economics 110A-B. *Prerequisites: GPA of 3.5 or better. Department stamp required. Economics 110A must be taken with 110AH, and 110B must be taken with 110BH.*

111. Monetary Economics (4)

Financial structure of the U.S. economy. Bank behavior. Monetary control. *Prerequisites: Economics 1A-B or 1-2-3 and Mathematics 10A or 20A.*

113. Mathematical Economics (4)

Mathematical concepts and techniques used in advanced economic analysis; applications to selected aspects of economic theory. *Prerequisites: Economics 100A-B, or Economics 170A-B; or Mathematics 140A; or Mathematics 142A.*

114. Economics of Immigration (4)

Impact of immigration on the U.S. economy. Empirical evidence on the labor market and fiscal impacts of immigration. Consequences of U.S. immigration policies on the economy. *Prerequisites: Economics 1A-B or 1-2-3.*

116. Economic Development (4)

Analysis of current economic problems of less-developed areas and conditions for increasing their income, employment, and welfare; case studies of specific less-developed countries. *Prerequisite: Economics 1A-B or 1-2-3.*

117. Economic Growth (4)

Models of the economic growth of developed economies. *Prerequisites: Economics 100A or 170A.*

118. Law and Economics: Torts, Property, and Crime (4)

Economic theory to evaluate the economic effects of U.S. law in several legal fields, including tort law (accidents), products liability law, property law, criminal law (law enforcement), and litigation. Issues of risk bearing and why people buy insurance. Students who have taken Econ. 118A "Law and Economics A" will not

receive credit for this course. *Prerequisites: Economics 1A-B or 1-2; and Mathematics 10A or 20A.*

119. Law and Economics: Contracts, Credit, and Bankruptcy (4)

Economic theory to evaluate the economic effects of U.S. law in several legal fields, including contract law, corporate law (how large firms are organized and governed), debtor-creditor law, and bankruptcy law. Econ. 118 is recommended. *Prerequisites: Economics 100A-B or 170A-B.*

120A. Econometrics A (4)

Probability and statistics used in economics. Probability and sampling theory, statistical inference, and use of spreadsheets. Courses must be taken in A-B-C order. Credit not allowed for Economics 120A and any of the following: ECE 109; Mathematics 180A; or Mathematics 183. *Prerequisites: Economics 1A-B or 1-2-3; and Mathematics 10A or 20A, Mathematics 10B or 20B, and Mathematics 10C or 20C or 21C.*

120B. Econometrics B (4)

Basic econometric methods, including the linear regression model, heteroskedasticity, serial correlation, hypothesis testing, forecasting, and identification. Courses must be taken in A-B-C order. Credit not allowed for Economics 120B and Mathematics 181A. *Prerequisite: Economics 120A.*

120C. Econometrics C (4)

Advanced econometric methods: time series analysis, estimation in the presence of autocorrelated and heteroskedastic errors, estimation of simultaneous equations models, estimation of discrete choice models, and econometric methods designed for panel data sets. *Prerequisite: Economics 120B.*

120AH-BH-CH. Honors Econometrics (1-1-1)

Honors sequence expanding on the material taught in Economics 120A-B-C. *Prerequisites: GPA of 3.5 or better. Department stamp required. Economics 120A must be taken with 120AH, 120B must be taken with 120BH, and 120C must be taken with 120CH.*

121. Applied Econometrics (4)

Application of econometric methods to such areas as labor supply, human capital, and financial time series. *Prerequisites: Economics 120A-B-C. Concurrent enrollment in Economics 120C is permitted.*

125. Economics of Population Growth (4)

Interaction between economic forces and demographic changes are considered, as are demographic composition; birth, death, and migration processes; and growth of states and regions. Course emphasizes the creation, evaluation, and interpretation of forecasts that focus on San Diego. *Prerequisites: Economics 120A-B. Economics 178 is recommended.*

130. Public Policy (4)

Role of economics in public policy. Health care, drug policy, incentives for high-technology industries, mass transit versus highway construction, and agriculture subsidies. *Prerequisites: Economics 1A-B or 1-2.*

131. Economics of the Environment (4)

Environmental issues from an economic perspective. Relation of the environment to economic growth. Management of natural resources, such as forest and fresh water. Policies on air, water, and toxic waste pollution. International issues such as ozone depletion and sustainable development. *Prerequisites: Economics 1A-B or 1-2.*

132. Energy Economics (4)

Energy from an economic perspective. Fuel cycles for coal, hydro, nuclear, oil, and solar energy. Emphasis on efficiency and control of pollution. Comparison of energy use across sectors and across countries. Global warming. Role of energy in the international economy. *Prerequisites: Economics 1A-B or 1-2.*

133. International Environmental Agreements (4)

Addresses environmental issues that transcend national boundaries, such as climate change, biodiversity loss, over-fishing, etc. Examines why international agreements are required, how they are negotiated and implemented, and studies their effectiveness. Explores the use of game theory, environmental economics, international relations, political science, and international law for formulating more effective environmental treaties. *Prerequisites: Economics 1A-B or 1-2.0*

135. Urban Economics (4)

(Same as USP 102.) Economic analysis of why and where cities develop, problems they cause, and public policies to deal with these problems. Determination of urban land rent/use, reasons for suburbanization. Transportation and congestion in cities, zoning, poverty and housing, urban local government. *Prerequisites: Economics 1A-B or 1-2 and Mathematics 10A or 20A.*

136. Human Resources (4)

Theoretical and empirical analysis of public and private investment in people, emphasizing the contribution to productivity of education. *Prerequisites: Economics 1A-B or 1-2-3 and Mathematics 10A-B-C, or 20A-B and 20C/21C.*

137. Inequality and Poverty (4)

Analysis of inequality in the distribution of income, education, and wealth; causes of poverty and public policies to combat it. *Prerequisites: Economics 1A-B-C, 120A, or Mathematics 180A or Mathematics 183 or ECE 109.*

138A. Economics of Health A (4)

The application of economic analysis to the health field. Issues related to the production of health services and the demand for health care, including the role of insurance. *Prerequisites: Economics 1A-B or 1-2-3.*

138B. Economics of Health B (4)

Current health policy issues. Includes benefit-cost analysis of potential policy changes and health care options, the role of changing technology, private, non-profit and government provision of health care, regulation of health care entities such as drug companies, HMOs, and nursing homes. Economics 138A must be taken before Economics 138B. *Prerequisites: Economics 138A.*

139. Labor Economics (4)

Operation of labor markets. Labor force participation, unemployment, labor mobility, wage inflation, the impact of unions, human capital investments, internal labor markets, and labor market discrimination. *Prerequisites: Economics 1A-B or 1-2-3.*

145. Economics of Ocean Resources (4)

Economic issues associated with oceans. Economics of managing renewable resources in the oceans, with an emphasis on fisheries, economics of conservation and biodiversity preservation for living marine

resources, with an emphasis on whales, dolphins, sea-turtles, and coral reefs. *Prerequisites: Economics 1A-B or 1-2-3.*

146. Economic Stabilization (4)

Theory of business cycles and techniques used by governments to stabilize an economy. Discussion of recent economic experience. *Prerequisites: Economics 110A-B.*

147. Economics of Education (4)

Examination of issues in education using theoretical and empirical approaches from economics. Analysis of decisions to invest in education. Consideration of various market structures in education, including school choice and school finance programs. *Prerequisites: Economics 1A-B or 1-2-3 and Economics 120A or ECE 109 or Mathematics 180A or Mathematics 183.*

150. Economics of the Public Sector: Taxation (4)

Overview of the public sector in the U.S. and the scope of government intervention in economic life. Basic principles of taxation, tax incidence, and tax efficiency. Analysis of the U.S. tax system before and after the Tax Reform Act of 1986. *Prerequisites: Economics 100A or 170A.*

151. Economics of the Public Sector: Expenditures (4)

Overview of the public sector in the U.S. and the scope of government intervention in economic life. Theory of public goods and externalities. Introduction to the basic forms of government intervention. Evaluation of specific expenditure programs such as education and national defense. *Prerequisites: Economics 100A or 170A.*

153. Economics of the Public Sector: Income Maintenance and Insurance (4)

Overview of the public sector in the U.S. and the scope of government intervention in economic life. Theory of income redistribution and social insurance. Applications to current policy in such areas as welfare, unemployment insurance, and Social Security. *Prerequisites: Economics 100A or Economics 170A.*

155. Political Economics (4)

An economic analysis of social decision making, including such topics as the desirable scope and size of the public sector, the efficiency of collective decision-making procedures, voting theory and collective vs. market resource allocation. *Prerequisite: Economics 109.*

158A-B. Economic History of the United States (4-4)

(Same as History HIUS 140-141.) 158A: The United States as a raw materials producer, as an agrarian society, and as an industrial nation. Emphasis on the logic of the growth process, the social and political tensions accompanying expansion, and nineteenth- and early twentieth-century transformations of American capitalism. 158B: The United States as a modern industrial nation. Emphasis on the logic of the growth process, the social and political tensions accompanying expansion, and twentieth-century transformations of American capitalism.

161. International Integration of Latin American Economies (4)

Examines the integration of Latin American and Caribbean countries into the global economy. Topics include trade in agricultural and manufactured goods, regional trade agreements, international capital flows to Latin America, financial vulnerabilities, and policy responses. *Prerequisites: Economics 1A-B or 1-2-3.*

162. Economics of Mexico (4)

Survey of the Mexican economy. Topics such as economic growth, business cycles, saving-investment balance, financial markets, fiscal and monetary policy, labor markets, industrial structure, international trade, and agricultural policy. *Prerequisites: Economics 110A-B. Economics 161 and 120B are recommended.*

163. Japanese Economy (4)

Survey of the Japanese economy. Economic growth, business cycles, saving-investment balance, financial markets, fiscal and monetary policy, labor markets, industrial structure, international trade, and agricultural policy. *Prerequisites: Economics 1A-B or 1-2-3.*

165. Middle East Economics (4)

Internal economies of radical religious groups and terrorist organizations. Ottoman economic history, economic demography and migration, Islamic banking, economic development and peace in Palestine, and oil economics. *Prerequisites: Economics 1A-B or 1-2-3.*

170A. Management Science Microeconomics A (4)

Intermediate microeconomics, including techniques of marginal analysis, demand theory and optimal pricing, estimation of demand function, forecasting, production theory, cost analysis and transfer pricing, and competitive and monopolistic market structure. Credit not allowed for both Economics 100A and Economics 170A. *Prerequisites: Economics 1A-B or 1-2-3; and Mathematics 20A, 20B, and 20C or 21C.*

170B. Management Science Microeconomics B (4)

Intermediate microeconomics, including oligopoly theory, game theory and competitive strategy, externalities and public goods, and information economics (adverse selection, signaling, and principal-agent problems), with emphasis on the theory of the firm. Economics 170A must be taken before 170B. Credit not allowed for both Economics 100B and Economics 170B. *Prerequisite: Economics 170A.*

170AH-BH. Honors Management Science Microeconomics (1-1)

Honors sequence expanding on the material taught in Economics 170A-B. *Prerequisite: GPA of 3.5 or better. Department stamp required. Economics 170A must be taken with 170AH, and 170B must be taken with 170BH.*

171. Decisions Under Uncertainty (4)

Decision-making when the consequences are uncertain. Decision trees, payoff tables, decision criteria, expected utility theory, risk aversion, sample information. *Prerequisites: Economics 120A and Mathematics 20F.*

172A-B-C. Introduction to Operations Research (4-4-4)

Linear, nonlinear, and integer programming. Elements of game theory. Deterministic and stochastic dynamic programming. *Prerequisites: Economics 120A and Mathematics 20F. Economics 172A may be taken concurrently with 120A. Economics 172A must be taken first, but Economics 172B may be taken before or concurrently with 172C. A student may not receive credit for both Economics 172A-172B and Mathematics 171A-171B.*

173. Corporate Finance (4)

Corporate financial management, cash flow analysis, capital budgeting and capital structure. Institutional issues in project analysis, performance evaluation, and financial planning. *Prerequisite: Economics 4.*

174. Financial Insurance (4)

Insurance markets, law, and terminology. Demand for insurance and for lotteries. Contingent claims theory. Reserves management and efficient risk sharing. Financial theories for regulating insurance rates. Options and insurance. Moral hazard. Adverse selection. Current controversies in insurance. *Prerequisites: Economics 120A-B-C and either 100A or Economics 170A. Concurrent enrollment in Economics 120C is permitted. Economics 171 and Economics 175 are recommended.*

175. Financial Investments (4)

Financial decision making. Such topics as valuating assets; portfolio selection, and capital budgeting. *Prerequisite: Economics 120A.*

176. Marketing (4)

Role of marketing in the economy. Topics such as buyer behavior, marketing mix, promotion, product selection, pricing, and distribution. *Prerequisites: Economics 120A-B-C. Concurrent enrollment in Economics 120C is permitted.*

178. Economic and Business Forecasting (4)

Survey of theoretical and practical aspects of statistical and economic forecasting. Such topics as long-run and short-run horizons, leading indicator analysis, econometric models, technological and population forecasts, forecast evaluation, and the use of forecasts for public policy. *Prerequisites: Economics 120A-B-C. Concurrent enrollment in Economics 120C is permitted.*

179. Decisions in the Public Sector (4)

Topics such as program evaluation, budgeting, financial management, and expenditure decisions. *Prerequisites: Economics 100A-B or 170A-B.*

182. Topics in Microeconomics (4)

Selected topics in microeconomics. *Prerequisite: consent of department.*

191A-B. Senior Essay Seminar (4-4)

Senior essay seminar for students with superior records in department majors. *Prerequisite: department stamp required.*

195. Introduction to Teaching Economics (4-4-4)

Introduction to teaching economics. Each student will be responsible for a class section in one of the lower-division economics courses. Limited to advanced economics majors with at least a 3.5 GPA in upper-division economics work. (P/NP grades only.) *Prerequisite: consent of the department. May not use more than eight units for credit.*

198. Directed Group Study (2 or 4)

Directed study on a topic or in a group field not included in regular department curriculum by special arrangement with a faculty member. *Prerequisites: upper-division standing and consent of instructor. May be repeated up to three times when course topics vary. (P/NP grades only.)*

199. Independent Study (2 or 4)

Independent reading or research under the direction of and by special arrangement with a Department of Economics faculty member. (P/NP grades only.) *Prerequisites: consent of instructor and departmental approval.*

GRADUATE

200A-B-C. Microeconomics (4-4-4)

Background mathematical techniques, static and intertemporal consumer and producer theory, partial and general equilibrium, modern producer and consumer theory, risk, time, and interdependence, modern welfare economics.

201. Advanced Economic Theory (4)

An intensive examination of selected topics in economic theory. Course topic nonrepetitive in a three-year cycle. *Prerequisites: Economics 207 and 213.*

202A-B-C. Workshop in Economic Theory (0-4/0-4/0-4)

An examination of recent research in economic theory, including topics in general equilibrium, welfare economics, duality, and social choice; development of related research topics by both graduate students and faculty. Course may be repeated an unlimited number of times. (S/U grades only.) *Prerequisite: Economics 207 or consent of instructor.*

205. Mathematics for Economists (4)

Advanced calculus review for new graduate students.

206. Decisions (4)

Further topics in consumer and producer theory, intertemporal optimization, and decision-making under uncertainty. (Previously numbered Economics 200D.) *Prerequisites: Economics 200A-B-C or consent of instructor.*

207. Markets and Welfare (4)

Further topics in general equilibrium, welfare analysis, and social choice theory. (Previously numbered Economics 200E.) *Prerequisite: Economics 200A-B-C or consent of instructor.*

208. Games and Information (4)

Further topics in game theory and the economics of information. (Previously numbered Economics 200F.) *Prerequisite: Economics 200A-B-C or consent of instructor.*

210A-B-C. Macroeconomics (4-4-4)

Neoclassical and Keynesian theories of employment, income, interest rate, price level, and other aggregate variables; macroeconomic policy; balance of payments and exchange rates; conflicts between external and internal balance; disequilibrium theory; growth theory.

211. Advanced Macroeconomics (4-4-4)

Selected theoretical and empirical issues in macroeconomics. *Prerequisite: Economics 213 or consent of instructor.*

212A-B-C. Workshop in Macroeconomics (0-4/0-4/0-4)

Examination of recent research in macroeconomics; development of own research by graduate students and faculty. Course may be repeated an unlimited number of times. (S/U grades only.) *Prerequisite: Economics 210C.*

213. Advanced Macroeconomic Theory (4)

Dynamic analysis, multiple equilibria, modern growth theory, computational methods. (Previously numbered Economics 210D.) *Prerequisites: Economics 210A-B-C or consent of instructor.*

214. Applied Macroeconomics (4)

Monetary policy, business cycles, factor utilization, investment, heterogeneity. (Previously numbered Economics 210E.) *Prerequisites: Economics 210A-B-C or consent of instructor.*

219. Readings in Macroeconomics (4)

This course will cover numerical analysis of dynamic macroeconomic models. Topics include numerical techniques, dynamic programming, linear systems, solution algorithms, and applications to dynamic general equilibrium. *Prerequisite: graduate standing or consent of instructor.*

220. A-B-C-D-E-F. Econometrics (4-4-4-4-4)

The construction and application of stochastic models in economics. This includes both single and simultaneous equations models. Matrix algebra and basic statistics are covered. Also covered (in 220F) are empirical applications to micro and macroeconomics. These require the completion of an empirical project.

221. Advanced Econometrics (4)

Extensions of the theory of the linear model; Bayesian analysis; principal components, discriminant analysis, spectral analysis of time series; insufficient data problems and the use of generalized inverse matrices; experimental design; formulation and evaluation of economic models, including the interpretation and testing of causality. *Prerequisite: Economics 220F or consent of instructor.*

222A-B-C. Workshop in Econometrics (4-4-4)

Examination of recent econometric research; development of own research by students and faculty. Course may be repeated an unlimited number of times. (S/U grades only.)

224. Readings in Econometrics (1)

Examination of recent research in econometrics to facilitate the development of thesis research by graduate students. (S/U grades only.)

230. Public Economics: Taxation (4)

Exploration of existing theoretical literature evaluating the efficiency and distribution effects of income and commodity taxes. Characterization of an "optimal" tax structure, and examination of problems faced in tax administration. Scrutiny of behavioral responses to existing tax structures. *Prerequisites: Economics 200A-B-C and Economics 220A-B-C.*

231. Public Economics: National Government Expenditures (4)

Examination of possible normative justification of government expenditures (public goods, externalities, and market failures). Exploration of positive government-behavior models. Analysis of behavioral responses to key existing government-expenditure programs (social security, Medicare, and unemployment insurance). Overview of cost-benefit analysis. *Prerequisites: Economics 200A-B-C and Economics 220A-B-C.*

232. Public Economics: Redistribution and Social Insurance (4)

Justifications for government involvement in redistribution and insurance markets. Optimal design of transfer and social insurance programs. Overview of program-evaluation methods. Theoretical and empirical analyses of specific programs, such as welfare, unemployment insurance, and social security. *Prerequisites: Economics 200A-B-C and Economics 220A-B-C.*

235A-B-C. Workshop in Applied Economics (0-4/0-4/0-4)

Examination of recent research in applied economics; development of own research by graduate students and faculty. Course may be repeated an unlimited number of times. (S/U grades only.)

240. Economic Development (4)

Theoretical and empirical issues in economic development. *Prerequisite: consent of instructor.*

245. International Trade (4)

This course covers the determinants of the pattern and volume of trade in goods and services, the interaction of international trade with income distribution and economic growth, and commercial policy. The emphasis is on theory, with some empirical illustration and motivation. *Prerequisite: consent of instructor.*

246. International Macroeconomics (4)

This course presents open-economy macroeconomics and international finance. Topics include theories of the exchange rate, foreign-exchange regimes, current account adjustments, and international portfolio investments. The course examines real and monetary explanations, and implications of international capital market integration. *Prerequisite: consent of instructor.*

247. Empirical Topics in International Economics (4)

This course examines the empirical work in international trade or international macroeconomics. International trade topics include empirical tests of theories of international trade and international capital movements. International macroeconomic topics include empirical studies of exchange rate and relative price adjustments. *Prerequisite: consent of instructor.*

250. Labor Economics (4)

Theoretical and empirical issues in labor economics. (Previously numbered Economics 236A-B.) *Prerequisite: consent of instructor.*

260. Industrial Organization (4)

Theoretical and empirical issues in industrial organization. (Previously numbered Economics 234.) *Prerequisite: Economics 220F or consent of instructor.*

264. Experimental Economics (4)

Design and interpretation of controlled experiments using human subjects. (Previously numbered Economics 207.) *Prerequisite: consent of instructor.*

266. Economics of Natural Resources (4)

Theoretical and empirical issues in natural resource economics. (Previously numbered Economics 242.) *Prerequisite: consent of instructor.*

270. Finance—Core Asset Pricing (4)

Theoretical and empirical issues in finance. (Previously numbered Economics 214A.)

271. Finance—Market Micro Structure and Volatility Modeling (4)

Theoretical and empirical issues in finance. (Previously numbered Economics 214B.)

272. Finance—Theory and Testing of Intertemporal Asset Pricing Models (4)

Theoretical and empirical issues in finance. (Previously numbered Economics 214C.)

279. Readings in Finance (1)

Examination of recent research in finance to facilitate the development of thesis research by graduate students. *Prerequisite: consent of instructor.*

280. Computation (2)

Introduction to econometric computing. (S/U grades only.)

281. Special Topics in Economics (4)

Lecture course at an advanced level on a special topic. May be repeated for credit if topic differs. (Previously

numbered Economics 267.) *Prerequisite: consent of instructor.*

282. Third-Year Paper (4)

Written project, such as a critical review of a body of literature, including a proposal for an original research paper. For third-year students in winter quarter. (Previously numbered Economics 272.)

283. Third-Year Paper Presentations (4)

Workshop for students writing third-year papers. All papers will be formally presented in the workshop. (Previously numbered Economics 273.)

284. Third-Year Original Paper (4)

Original research paper. For third-year students. (Previously numbered Economics 274.)

285. Third-Year Original Paper Presentation (4)

Workshop for students writing third-year original papers. All papers will be formally presented in the workshop. (Previously numbered Economics 275.)

290A-B-C. Colloquium in Economics (0-0-0)

Lectures presented by visiting speakers on research in a variety of topics in both theoretical and applied economics. Course may be repeated an unlimited number of times. (S/U grades only.)

291. Advanced Field Advising (4)

Controlled reading and discussion with adviser; literature survey. May be repeated for credit. (S/U grades only.)

297. Independent Study (1-5)

(S/U grades only.)

299. Research in Economics for Dissertation (1-9)

(S/U grades only.)

500A-B-C. Teaching Methods in Economics (4-4-4)

The study and development of effective pedagogical materials and techniques in economics. Students who hold appointments as teaching assistants must enroll in this course, but it is open to other students as well. (S/U grades only.)

Education Abroad Program (EAP)

Joan Adamo, *EAP Adviser*

Tonia Luo, *EAP Adviser*

Maribeth Binnie, *EAP Adviser*

Rachel Rigoli, *EAP Adviser*

Kathleen Hawking, *EAP Intake Adviser*

Administered by the University of California, the Education Abroad Program (EAP) has established study centers in Australia, Barbados, Brazil, Canada, Chile, China, Costa Rica, Denmark, Egypt, France, Germany, Ghana, Hong Kong (S.A.R.), Hungary, India, Ireland, Israel, Italy, Japan, Korea, Mexico, Netherlands, New Zealand, the Philippines, Russia, Singapore, South Africa, Spain, Sweden, Taiwan, Thailand, Turkey, the United Kingdom, and Vietnam. EAP offers full-year and short-term programs in a wide range of academic disciplines. Please see the EAP Web site (<http://eap.ucop.edu>) for the most up-to-date information about all aspects of the program. Students may use the EAP Program Wizard (<http://eap.ucop.edu/programwizard>) to search for programs by country, specific areas of study, language of instruction, etc. EAP participants are eligible for financial aid and many scholarships. Other non-EAP study-abroad opportunities at UCSD are described at the end of this section.

Purpose

The Education Abroad Program offers undergraduate (sophomores, juniors, and seniors) and graduate students opportunities to integrate into the academic and social life of select foreign universities while continuing to work in major fields of study or otherwise fulfilling UC requirements. EAP provides students access to distinguished academic programs that complement those of the UC campuses and where students can make normal progress toward their degrees at a cost as close as possible to that of education on a UC campus. EAP helps students acquire the knowledge and skills necessary to function confidently and compete successfully in our global environment.

The program stimulates the intellectual development of the participants, broadening their general education, and giving a new depth to their particular academic interests. Many gain fluency in a language other than their own, and all grow in their ability to engage in independent study. Perhaps most valuable of all are increased self-understanding, clarified life purpose, and a broadening and deepening of personal values.

The Academic Program

The Education Abroad Program places students at the finest universities abroad. In most cases students take courses side by side with local students in a wide range of academic fields. In some programs EAP students pursue language study and take special courses designed for foreign students. In others, they pursue specialized studies in their major, take courses to add breadth to their general education, concentrate on language or area studies, and conduct research.

Each student is concurrently enrolled on the home campus of the University of California and at the host university. Full academic credit is received for courses satisfactorily completed. With advance planning and wise choice of courses abroad, most students can make normal progress toward completion of major, minor, and/or general-education requirements for their UCSD degree.

Academic Planning and Advising

In order to make normal progress toward graduation students should counsel in advance with departmental advisers and an academic adviser in their college provost's office in order to ascertain how participation will affect their academic program. Descriptions of individual courses currently approved for UC credit may be found in the Programs Abroad Resource Library and on the EAP Web site (<http://eap/ucop/edu/coursefinder>). Many of the same or similar courses will be available in future years, but students should plan programs that are sufficiently flexible to allow them to take alternate courses. Each year new courses taken by UC students are added to a center's approved offerings. Although courses approved by the University of California carry full credit, each department retains the right to determine the extent to which it will accept specific courses to fulfill requirements for its own majors.

In order to facilitate the academic work of the students, University of California professors serve as directors and associate directors of the study centers. They work with their counterparts in the host university in developing the academic program and advise students on their coursework. In addition, the directors are responsible for all aspects of student welfare and conduct.

Cost, Financial Aid, and Scholarships

The regents endeavor to bring the program within the reach of all students, regardless of their financial resources. The cost of studying abroad is usually comparable to the cost of studying on a UC campus. The only additional costs directly related to the program are for round-trip transportation, on-site orientation, and personal expenses beyond what normally would be spent at home. Programs in some countries actually cost less than a comparable period of study at a UC campus.

Many forms of financial assistance are available to EAP students. Those already receiving UC financial aid maintain their eligibility for grants, loans, and scholarships while studying on EAP. Financial aid is based on the cost of studying at each EAP location and on individual need. Students who might not normally be eligible for financial aid may qualify for the period they are on EAP. In addition to UC financial aid, scholarships are also available from EAP, the Friends of the International Center, various campus offices and departments, and outside organizations. Annually, UCSD students access about \$500,000 in special scholarships available only for study abroad. Information about these scholarships is available in the Programs Abroad Office, and on the UCSD Financial Aid Web site (<http://fao.ucsd.edu>).

Prospective participants who require financial assistance should counsel early with the Student Financial Services Office.

Applications

Applications for admission to the Education Abroad Program are given to students following a discussion of various aspects of the program with an EAP adviser in the Programs Abroad Office. Information on deadlines and related matters such as course offerings, selection, schedules of departures, and payment of fees may be obtained from the Programs Abroad Office, and online at <http://eap.ucop.edu> and <http://programsabroad.ucsd.edu>.

It is not too early to begin planning for an experience abroad prior to or during one's freshman year. Students are then able to take the language classes needed for certain programs, as well as plan which degree requirements to fulfill at UCSD and which to take abroad. Early planning also allows students to apply for the many programs now

open to sophomores. General group information sessions about the programs are held during Welcome Week and in October and January. "1st Steps" workshops are held throughout the year.

Selection

Undergraduate selection is generally open to students with the following qualifications: 3.0 cumulative grade-point average at the time of departure (some programs are available to students with at least a 2.5 GPA); at least sophomore or junior standing by time of departure, depending on the specific program; support of the UCSD EAP Selection Committee; and completion of university-level language courses when required (one, two, or three years, depending on the host institution) with a 3.0 grade-point average in language. Exceptions to these requirements can be made on a case by case basis, in consultation with the EAP adviser.

In addition to academic criteria for selection, the faculty committee looks for indications of the student's seriousness of purpose, maturity, and capacity to adapt to the experience of study abroad. As part of the planning process, students are required to consult with their college academic and department advisers.

Graduate Students

Graduate students can be accommodated at most EAP-affiliated host universities. Graduate students may take courses, conduct research, and participate in short-term language programs for a semester or year. Students must meet EAP minimum requirements, including language prerequisites, have completed at least one year of graduate work, and have the support of their academic department and graduate dean.

Transfer Students

Transfer students from other colleges and universities are eligible for EAP. Applications may be submitted prior to their first quarter at UCSD if appropriate for the specific program. Please contact the Programs Abroad Office for further information.

Safety, Student Conduct, and Parental Approval

EAP considers student health and safety while abroad one of its top priorities. All participants in

F=Fall Term W=Winter Term S=Spring Term
 *The regular academic year begins in January or February rather than during the fall.
 + Program is on hold for 2006-07

For program details and application deadlines, visit the EAP and Programs Abroad Office Web sites:
<http://eap.ucop.edu> and <http://programsabroad.ucsd.edu>

EAP are covered by a mandatory health insurance policy while abroad. While no one can guarantee student security either in the U.S. or abroad, the program makes every reasonable effort to assure a safe environment in its programs abroad, and to counsel students on potential risks and necessary precautions. In return, participants have a responsibility to pay careful attention to safety and health information provided in pre-departure materials and at orientations in the U.S. and abroad.

It is anticipated that the students selected for the Education Abroad Program will be of high caliber, committed to profiting from both the intellectual and social aspects of the experience. Since they will be guests in another country and another university, their conduct will reflect on both the University of California and the United States.

Participation in the program by students who are minors must be approved by their parents or guardians. In approving such participation, parents and guardians should be aware that a greater degree of personal freedom is afforded to students in the foreign university and that the University of California cannot take responsibility for closely supervising the activities of individual students. The directors and staff of the centers will be available to students with problems and will maintain contact with the student group as a whole. The university provides for comprehensive medical and hospitalization coverage for all participants.

Students interested in going abroad should also investigate possibilities through the Opportunities Abroad Program which can assist with placement in a wide range of other academic programs. These programs include study for an academic year, semester, quarter, or summer. They may be sponsored by other U.S. universities, or include direct enrollment in foreign institutions. Academic credit may also be earned on a number of overseas internship programs which combine work experience and courses.

Students going abroad through the Opportunities Abroad Program earn transfer credit from the sponsoring institution. Courses taken abroad may satisfy general-education, major or minor requirements, depending on department or college approval. Federal and state financial aid for approved plans of study abroad is available. Special study abroad scholarships are also available.

In addition to these academic programs, the Programs Abroad Office can assist students in selecting a wide range of volunteer, paid work, and educational travel programs.

Education Studies (EDS) at UCSD offers the Master of Education Degree/California Preliminary Multiple Subject Teaching Credential for elementary school teachers, the Master of Education Degree/California Preliminary Single Subject Credential in English, mathematics, biology, chemistry, geosciences, and physics for secondary school teachers, the Master of Arts in teaching and learning with an emphasis in curriculum design, the Master of Arts in deaf education, the Doctor of Education (Ed.D.) in teaching

and learning, the Doctor of Education in educational leadership, and a minor in education.

A primary focus of Education Studies is multicultural education. We require candidates to master the subject matter that they will teach and develop a repertoire of teaching practices which use their students' cultural knowledge and language as educational resources.

Admissions Process

February 1 is the application deadline for the M.Ed./Credential programs. All applicants must apply online at <http://eds.ucsd.edu>

Applicants interested in financial aid should complete the FAFSA application by March 2, and may contact Graduate Student Financial Services at (858) 534-3807.

Each applicant is carefully reviewed for admission by a committee. The selection committee ensures that applicants have completed the requirements for admission described below and evaluates each applicant on the basis of the following criteria:

1. A strong interest in multicultural approaches to education; a strong desire to improve the quality of American education; a strong desire to develop self-activated learners;
2. Experience working with children in educational environments, especially with students from diverse backgrounds;
3. Participation in public service activities;
4. Academic excellence in their undergraduate and graduate studies.

More information about the entire application process is available on the EDS Web site at <http://eds.ucsd.edu>.

The Master of Education (M.Ed.)

The M.Ed. articulates with Preliminary Multiple Subject and Preliminary Single Subject credential programs. It is a rigorous 15- to 24-month professional degree program designed specifically for preservice elementary and secondary teachers earning their initial teaching credential at UCSD. This course of study allows candidates to earn a Preliminary teaching credential and the M.Ed. degree from UCSD prior to entering the

teaching profession. The program requires applicants with strong subject matter preparation.

PREREQUISITE REQUIREMENTS FOR GRADUATE PRELIMINARY CREDENTIAL PROGRAMS

Master of Education/Preliminary Multiple Subject (Elementary) Credential

- **UCSD Undergraduates:** Students working toward *any* major at UCSD may complete the prerequisite Preliminary Multiple Subject Credential admission requirements and Educational Foundations courses while they are undergraduates.

Preliminary Multiple Subject Credential Prerequisite Requirements

1. Undergraduates completing *any* major at UCSD may complete the prerequisite requirements for the Preliminary Multiple Subject Credential prior to completing their degree. Candidates who have already received a Bachelor of Arts or Science from any University of California campus, or an appropriate equivalent degree from another institution, must apply for graduate status as a M.Ed. Preliminary Multiple Subject credential student. Examples of majors not eligible for application to EDS include Business, Education, Liberal Studies, Marketing, and Recreation.

A 3.0 cumulative GPA is required from the institution awarding the bachelor's degree.

2. Subject Matter Competence:

This requirement is satisfied by providing evidence of satisfactory completion of the California Subject Examinations for Teachers (CSET).

3. The California Basic Educational Skills Test (CBEST):

Evidence of passing the CBEST satisfies this requirement.

4. U.S. Constitution requirement:

This requirement is satisfied by *either*:

- Completion of a course covering the provisions and principles of the U.S. Constitution, or

- Passage of an appropriate exam offered through the County Office of Education (Contact the EDS office for information.)
5. Sensitivity to second language learning:
Applicants must demonstrate, through course work or equivalent experience, an informed sensitivity to the challenges of second language learning and acquisition. This can be fulfilled in one of three ways:
- Completion of nine quarter units of college course work in a single language that is not the applicant's native language, or
 - Completion of three years of secondary school course work in a language other than English. The course work must be taken in grades 7 through 12, with at least a B average, or
 - Demonstration of an "equivalent experience" in a second language situation. Applicants who wish to satisfy this requirement by one of the three options listed below must submit an essay that describes the length and circumstances of the experience, including at least three specific examples of situations that helped you gain personal knowledge and appreciation of issues surrounding second language acquisition in a diverse cultural setting. The three equivalent experience options are:
 - i. The applicant has lived for prolonged period of time in a country where the language spoken was not native to the applicant, and where the applicant was continuously required to speak that second language (e.g., Peace Corps).
 - ii. The applicant has had an extended experience immersed in a multilingual community in his/her native country.
 - iii. The applicant was raised in a multilingual community.
6. Satisfactory scores on the Graduate Record Exam (GRE) General Test
7. Prerequisites for BCLAD Emphasis in Spanish or American Sign Language options:
These emphases are designed for students who have sufficient bilingual skills to effectively teach in English and either Spanish or American Sign Language. Students interested

in applying for admission to the BCLAD program must demonstrate:

- a. Spanish or American Sign Language fluency:
 - i. Spanish: Completion of two Spanish literature courses (Spanish/English BCLAD only), at least one of which must be upper-division in either Latin American or Chicano literature, and completion of the EDS Spanish Language Assessment, with an FSI score of at least 3 (scores of 3- will be accepted, but students must receive a score of 3 prior to being recommended for the BCLAD credential). Since these exams are coordinated by EDS, please contact EDS in January prior to your application to the credential program.
 - ii. American Sign Language: Completion of the EDS American Sign Language assessment with a rating of "acceptable" by a panel of assessors.
 - b. Cultural Knowledge:
 - i. Spanish: One history course *and* one culture course covering Chicano or Latin American-related topics
 - ii. American Sign Language: At least one course on the language or culture of deaf people in the U.S. or intensive experience living among deaf people in the U.S.
 - c. History, Politics, and Theory of Bilingual Education: EDS 125 or ETHN 140.
 - d. A desire to teach in a bilingual setting.
- Note:** A grade of B or higher is required for all BCLAD courses.

Educational Foundations Course-of-Study for M.Ed./Preliminary Multiple Subject (Elementary) Credential Candidates

UCSD students planning to apply to the M.Ed./ Preliminary Multiple Subject (elementary) Credential Program must complete the *Introduction to Teaching and Learning* requirement listed in **a** below and one course from each of the remaining three areas, **b**, **c**, and **d** (see *Table 1 for a sample schedule*). Graduate students admitted as prerequisite candidates may satisfy

the Multiple Subject prerequisite requirements as an academic year program or through an intensive summer program of defined coursework (contact EDS for admission requirements and scheduling). A minimum 3.0 GPA for all prerequisite coursework is required for admission to the EDS credential program.

a. Introduction to Teaching and Learning. Three of the following courses and a corequisite practicum for each:

EDS 130. Introduction to Academic Mentoring of Elementary School Students

or

EDS 134. Introduction to Literacy and Numeracy Tutoring (recommended for Multiple Subject candidates)

and

EDS 128A-B. Introduction to Teaching and Learning (EDS 130 [or 134] is a prerequisite for EDS 128A and cannot be taken concurrently. EDS 128A and 128B are restricted to students applying to EDS at UCSD and must be taken in the year of application to the program.)

and

EDS 139. Practicum in Teaching/Learning (corequisite for EDS 130 or 134 and EDS 128A-B)

b. Learning Environments. One of the following courses or equivalent:

EDS 114. Cognitive Development and Interactive Computing Environments (recommended for Multiple or Single Subject candidates)

EDS 115. Cognitive Development and Education (recommended for Multiple Subject candidates)

EDS 118. Adolescent Development and Education (recommended for Single Subject candidates)

EDS/LIGN 119. First and Second Language Learning: From Childhood through Adolescence (recommended for Single Subject candidates)

CogSci. 154. Communication Disorders in Children and Adults (same as Psy. 174)

COMT 116 Practicum in Child Development (same as HDP 135/Psy. 128)

HDP 1. Introduction to Human Development

Psychology 101. Introduction to Developmental Psychology

c. Language and Culture. One of the following courses or equivalent:

EDS/SocB 117. Language, Culture and Education (recommended for all credential candidates)

EDS 125. History, Politics, and Theory of Bilingual Education (or ETHN 140 required for candidates preparing to teach in bilingual classrooms)

ANGN 117. Anthropology of Education (recommended for all credential candidates)

ANGN 149. Language in Society

COHI 121. Literacy, Social Organization, and the Individual

COHI 114. Bilingual Communication

Ethnic Studies 141. Language and Culture

d. School and Society. One of the following courses or equivalent:

EDS/SocC. 126. Social Organization of Education (recommended for credential candidates)

ECON 147. Economics of Education

ANGN 112. Language, Identity, and Community

ETHN 140. Language and American Ethnicity (or EDS 125 required for candidates preparing to teach in bilingual classrooms)

ETHN 144. Bilingual Communities in the U.S.A.

Table 1: Sample Course-of-Study for Preliminary Multiple Subject (Elementary) Credential

EDS 134	EDS 128A	EDS 128B (only S
EDS 139	(only W)	restricted to
EDS 117*	EDS 139	EDS candidates)
(or EDS 125	EDS 114/115	EDS 139
or ETHN 140		EDS 126*
for BCLAD)		

* Offered various quarters. See other options above.

Professional Preparation

After students complete the prerequisites described above, they apply to the program, as described above. Upon acceptance, teacher candidates complete the professional preparation activities which lead to the award of the Preliminary Multiple Subject credential.

The professional preparation component of the Preliminary Multiple Subject credential

consists of five courses and fifteen weeks of student teaching in elementary school classrooms.

Additional Requirements for BCLAD Candidates

Students pursuing the BCLAD emphasis in Spanish must also take EDS 152A-B (Bilingual Instructional Practices). Furthermore, BCLAD candidates will be placed in bilingual student teaching situations.

A typical student schedule for the professional preparation program is shown in Table 1:

Table 1: Schedule of Professional Preparation Activities for the M.Ed./ Preliminary Multiple Subject Credential

EDS 203 (4)			
EDS 250 (4)			

BCLAD candidates:

EDS 152A (2) EDS 152B (2)

Master of Education/ Preliminary Single Subject (Secondary) Credential

- **UCSD Undergraduates:** Students working towards a Literature, Linguistics, Mathematics, or any Science major at UCSD may complete the prerequisite Single Subject Credential requirements while they are undergraduates.

Preliminary Single Subject Credential Prerequisite Requirements

1. Undergraduates working toward selected majors at UCSD may complete the prerequisite requirements for the Preliminary Single Subject Credential prior to completing their degree. Students must be working toward a major in the discipline corresponding to that of the desired credential:

- *English:* any UCSD Literature or Linguistics major, or equivalent

- **Mathematics:** any UCSD Mathematics, Engineering, or Computer Science major, or equivalent,
- **Biology, Chemistry, Geosciences, or Physics:** any UCSD Natural Science major, or equivalent.

Candidates who have already received a literature, linguistics, mathematics, or science Bachelor of Arts or Science degree from any University of California campus, or an appropriate equivalent degree from another institution, must apply for graduate status as an M.Ed./Preliminary Single Subject credential student.

A 3.0 cumulative GPA is required from the institution awarding the bachelor's degree.

2. Subject Matter Competence:

This requirement is satisfied by *either*:

- providing evidence of satisfactory completion of the appropriate sections of the California Subject Examinations for Teachers (CSET)
- or
- having completed all of the subject matter preparation program for the desired single subject credential.

3. The California Basic Educational Skills Test (CBEST):

Evidence of passing the CBEST satisfies this requirement.

4. U.S. Constitution requirement:

- completion of a course covering the provisions and principles of the U.S. Constitution
- or
- passage of an appropriate exam offered through the County Office of Education (Contact the EDS office for information.)

5. Sensitivity to second language learning:

Applicants must demonstrate, through course work or equivalent experience, an informed sensitivity to the challenges of second language learning and acquisition. This can be fulfilled in one of three ways:

- completion of nine quarter units of college course work in a single language that is not the applicant's native language
- or
- completion of three years of secondary school course work in a language other

than English. The course work must be taken in grades 7 through 12, with at least a B average

or

- demonstration of an "equivalent experience" in a second language situation. Applicants who wish to satisfy this requirement by one of the three options listed below must submit an essay that describes the length and circumstances of the experience, including at least three specific examples of situations that helped you gain personal knowledge and appreciation of issues surrounding second language acquisition in a diverse cultural setting. The three equivalent experience options are:

- The applicant has lived for a prolonged period of time in a country where the language spoken was not native to the applicant, and where the applicant was continuously required to speak that second language (e.g., Peace Corps).
- The applicant has had an extended experience immersed in a multilingual community in his/her native country.
- The applicant was raised in a multilingual community.

6. Satisfactory scores on the Graduate Record Exam (GRE) General Test.

7. Prerequisites for BCLAD Emphasis in Spanish:

This emphasis is designed for students who have sufficient bilingual skills to effectively teach in English and Spanish. Students interested in applying for admission to the BCLAD program must demonstrate:

- Spanish Language Fluency:**
 - Completion of two Spanish literature courses, at least one of which must be upper-division in either Latin American or Chicano literature, and
 - Completion of the EDS Spanish Assessment, with an FSI score of at least 3 (Scores of 3- will be accepted, but student must receive a score of 3 prior to being recommended for the BCLAD credential.) Since these exams are coordinated by

EDS, please contact EDS in January prior to application to the credential program.

- Cultural Knowledge:** One history course and one culture course covering Chicano or Latin American-related topics.
- History, Politics, and Theory of Bilingual Education:** EDS 125 or ETHN 140.
- A desire to teach in a bilingual setting.**

Note: A grade of B- or higher is required for all BCLAD courses.

Educational Foundations Course-of-Study for M.Ed./Preliminary Single Subject (Secondary) Credential Candidates

UCSD students planning to apply to the M.Ed./Preliminary Single Subject (secondary) Credential Program must complete the *Introduction to Teaching and Learning* requirement listed in **a** below and one course from each of the remaining three areas, **b**, **c**, and **d** (see Table 2 for a sample schedule). A minimum 3.0 GPA for all prerequisite coursework is required for admission to the EDS credential program.

- Introduction to Teaching and Learning.** Three of the following courses and a corequisite practicum for each:
 - EDS 129 A-B-C. Introduction to Teaching and Learning (EDS 129B and 129C are restricted to students applying to EDS at UCSD and must be taken in the year of application to the program.)
 - or
 - EDS 136. Introduction to Academic Tutoring of Secondary School Students or EDS 138. Introduction to Academic Tutoring at the Preuss School (may be substituted for EDS 129A only)
 - and
 - EDS 139. Practicum in Teaching/Learning (corequisite for EDS 129 A-B-C and EDS 136)
 - and
 - EDS 190. Research Practicum (take concurrently with EDS 129C)
- Learning Environments.** One of the following courses or equivalent:
 - EDS 114. Cognitive Development and Interactive Computing Environments

(recommended for Multiple or Single Subject candidates)

EDS 115. Cognitive Development and Education (recommended for Multiple Subject candidates)

EDS 118. Adolescent Development and Education (recommended for Single Subject candidates)

EDS/LIGN 119. First and Second Language Learning: From Childhood through Adolescence (recommended for Single Subject candidates)

CogSci. 154. Communication Disorders in Children and Adults (same as Psy. 174)

COMT 116. Practicum in Child Development (same as HDP 135/Psy. 128)

HDP 1. Introduction to Human Development

Psychology 101. Introduction to Developmental Psychology

c. Language and Culture. One of the following courses or equivalent:

EDS/SocB. 117. Language, Culture and Education (recommended for credential candidates)

EDS 125. History, Politics, and Theory of Bilingual Education (or ETHN 140 required for candidates preparing to teach in bilingual classrooms)

ANGN 117. Anthropology of Education

ANGN 149. Language in Society

COHI 121. Literacy, Social Organization, and the Individual

COHI 114. Bilingual Communication

ETHN 141. Language and Culture

d. School and Society. One of the following courses or equivalent:

EDS/SocC. 126. Social Organization of Education (recommended for credential candidates)

ECON 147. Economics of Education

ANGN 112. Language, Identity, and Community

ETHN 140. Language and American Ethnicity (or EDS 125 required for candidates preparing to teach in bilingual classrooms)

ETHN 144. Bilingual Communities in the U.S.A.

Table 2: Sample Course-of-Study for Preliminary Single Subject (Secondary) Credential

FALL	WINTER	SPRING
EDS 129A (only F)	EDS 129B (only W)	EDS 129C (only S)

EDS 117* (EDS 125 or ETHN 140 for BCLAD)	EDS 114/118/119	EDS candidates)
		EDS 126*
		EDS 139
		EDS 190
		(concurrent with EDS 129C)

*Offered various quarters. See options above.

Internship and Student Teaching Programs

Those admitted to the M.Ed./Preliminary Single Subject Credential Program are eligible to be interviewed in June, July, and August for a paid internship for the following school year, in a local middle or high school. Availability of internship positions is **not** guaranteed, though EDS attempts to facilitate internship positions for all Single Subject students. Students who do not receive an internship position will do their practicum as student teachers instead. Interns are responsible for teaching English, mathematics, biology, chemistry, geosciences, or physics courses under the guidance of an EDS supervisor and an on-site adviser. Interns, who are generally hired for part-time teaching loads, receive a salary from the school district commensurate with the number of courses they teach.

Professional Preparation Courses

Once students are selected, they are provided an intensive program of professional preparation, including a full-time summer program of teaching methods courses and seminars offered throughout the academic year which address classroom management techniques and strategies for dealing with concrete teaching and learning situations.

A typical student schedule for the Preliminary Single Subject Professional Preparation Program is shown in Table 2.

Table 2: The Professional Preparation Program for the M.Ed./Preliminary Single Subject Credential

SUMMER (1)	FALL	WINTER	SPRING

Minor in Education Studies

UCSD undergraduate students who are interested in pursuing a teaching credential should refer to the appropriate elementary or secondary Educational Foundations course of study when selecting courses for the minor. Contact EDS for details.

Education Studies offers a Minor in Education Studies that requires a minimum of twenty-eight units, twenty units of which must be upper-division. All courses for the minor must be taken for a letter grade except EDS 139. Students must complete a course-of-study that includes a minimum of one course in category **a** below and a minimum of one course from two of the remaining three categories **b, c, or d**. The EDS minor requires a minimum of twelve units in EDS courses. A maximum of eight units of practicum (EDS 139) may be applied to the minor.

a. Introduction to Teaching and Learning

One of the following courses (four quarter units) and corequisite practicum EDS 139 (two quarter units)

EDS 128 A-B. Introduction to Teaching and Learning (Elementary). (EDS 130 [or 134] is a prerequisite for EDS 128A and cannot be taken concurrently. EDS 128A and 128B are restricted to students applying to EDS at UCSD and must be taken in the year of application to the program.)

EDS 129 A-B-C Introduction to Teaching and Learning (Secondary) (It is preferable that

129A be taken in the fall quarter of senior year. EDS 129B and 129C are restricted to students applying to EDS at UCSD and must be taken in the year of application to the program.)

EDS 130. Introduction to Academic Mentoring of Elementary School Students

EDS 134. Introduction to Literacy and Numeracy Tutoring (*recommended for Multiple Subject candidates*)

EDS 136. Introduction to Academic Tutoring of Secondary School Students

EDS 138. Introduction to Academic Tutoring of Preuss School Students

and

EDS 139. Practicum in Teaching/Learning

b. Learning Environments

EDS 114. Cognitive Development and Interactive Computing Environments (*recommended for Multiple or Single Subject candidates*)

EDS 115. Cognitive Development and Education (*recommended for Multiple Subject candidates*)

EDS 118. Adolescent Development and Education (*recommended for Single Subject candidates*)

EDS 119/LIGN 119. First and Second Language Learning: From Childhood through Adolescence (*recommended for Single Subject candidates*)

CogSci. 154. Communication Disorders in Children and Adults (same as Psy. 174)

COMT 116. Practicum in Child Development (same as HDP 135/Psy. 128)

HDP 1. Introduction to Human Development

Psy. 101. Introduction to Developmental Psychology

c. Language and Culture

EDS/SocB. 117. Language, Culture and Education (*recommended for all EDS credential candidates*)

EDS 125. History, Politics, and Theory of Bilingual Education (or ETHN 140 required for students preparing to teach in bilingual classrooms and recommended for all EDS credential candidates)

ANGN 117. Anthropology of Education

ANGN 149. Language in Society

COCU 144. Language and Society

COHI 121. Literacy, Social Organization, and the Individual

COHI 122. Communication and the Community

COHI 114. Bilingual Communication

ETHN 140. Language and American Ethnicity

ETHN 141. Language and Culture

d. School and Society

EDS/Soc. 126. Social Organization of Education (*recommended for all EDS credential candidates*)

ECON 147. Economics of Education

ANGN 112. Language, Identity, and Community

ETHN 140. Language and American Ethnicity

ETHN 144. Bilingual Communities in the U.S.A.

The Master of Arts in Teaching and Learning: Curriculum Design

The M.A. in Teaching and Learning (Curriculum Design) offers professional educators in elementary and secondary schools an extensive overview of principles of educational research and curriculum design.

A key feature of the M.A. program is the integration of research and practice. M.A. students remain full-time teachers for the duration of the program. They design, implement, and evaluate curricular innovations in their own classrooms. The culmination of the M.A. work is a thesis describing the rationale, development, and effectiveness of these innovations.

Examples of M.A. Research Projects

The topics of the M.A. theses in past years are varied, and have included: multimedia approaches to secondary biology and chemistry instruction; writing revision among emergent writers; building partnerships between families and schools; activities which link home and school experiences in the content areas of reading and writing, mathematics, science, and social studies; improved integration of curriculum and assessment; motivation and art; using technology for mathematics and geography teaching; and embedding ESL in native language instruction.

The M.A. Course of Study (Teaching and Learning: Emphasis in Curriculum Design)

The M.A. program requirements consist of forty quarter units of course work, including the master's thesis. Courses are usually offered for 4.0 quarter units of credit, and are typically offered one night per week, from 5:00–8:00 p.m. Core course work comprises twenty-eight units, with the remaining twelve units consisting of elective course work.

A typical program consists of:

CORE M.A. COURSE WORK

First Summer

(mid June–late August)

EDS 231 Advanced Instructional Practices

or

EDS 232 Special Topics in Education

(offered alternating summers)

EDS 229 Introduction to Educational Resources

Fall, Winter, and Spring:

EDS 230A-B-C Research in Curriculum Design

EDS 233A-B Topics in Education Research and Design

EDS 290 Research Practicum

Second Summer

(mid June–late August)

EDS 231 Advanced Instructional Practices

or

EDS 232 Special Topics in Education

(offered alternating summers)

EDS 295 M.A. Thesis

Completion of M.A. thesis writing.

Admission to the M.A. program in teaching and learning at UCSD is competitive. Factors considered by the selection committee include:

- teaching experience
- professional development activities
- experience and interest in curriculum design
- academic record

Admission to graduate standing at UCSD requires a minimum cumulative GPA of 3.0 for any prior graduate work, and for the bachelor's degree. Official scores from the GRE verbal, analytic, and quantitative sections are also required. Application deadline is February 1.

The Master of Arts in Teaching and Learning: Bilingual Education (ASL-English)

Education Studies (EDS) at UCSD offers a master of arts in teaching and learning: bilingual education emphasis (ASL-English) and the California Deaf and Hard-of-Hearing Specialist Teaching Credential and the Preliminary Multiple Subject Teaching Credential with BCLAD emphasis for elementary school teachers. This program of study includes extensive practicum experience combined with the latest research and innovation in bilingual education and deaf education. Students in the program participate in research and development on the leading edge of bilingual, multicultural education for deaf and hard-of-hearing children.

In keeping with its aim of training teachers who will be able to meet the needs of deaf and hard-of-hearing children from various language and cultural backgrounds, EDS requires fluency in ASL for acceptance into the program. The EDS teacher training program is designed to prepare teachers to work in various types of school settings from residential school classrooms to local public school classrooms for deaf and hard-of-hearing children. EDS recognizes that deaf and hard-of-hearing children need teachers who are themselves bilingual and knowledgeable about the role of culture in human development.

Prerequisite Course of Study Education Foundations Sequence

Prior to admittance to the credential and master's study, prerequisite students (or UCSD undergraduates pursuing the minor in education studies) complete the following five courses offered during the first summer.

- EDS 128A-B: Introduction to Teaching and Learning (Elementary)
- EDS 115: Cognitive Development and Education
- EDS 117: Language, Culture and Education
- EDS 125: History, Politics, and Theory of Bilingual Education

Program of Study for the Deaf and Hard-of-Hearing Specialist Credential, the Preliminary Multiple Subject Teaching Credential with BCLAD Emphasis, and the Master of Arts in Teaching and Learning.

After completion of the prerequisite component, students complete a program of study resulting in the California Deaf and Hard-of-Hearing Specialist Credential at the elementary level. Students also qualify for the Preliminary Multiple Subject (BCLAD) credential.

This program of study consists of courses in bilingual education theory, methods, and applications to deaf education in addition to intensive classroom practice. During the second year of study the focus is on designing, implementing and evaluating a research-based project. This integration of research and practice is central to the goal of the M.A. program to develop teachers as researchers.

A typical program of study includes:

YEAR 1

Fall

- COHI 124: Voice: Deaf People in America
- EDS 142A: ASL-English Bilingual Education Practices
- EDS 161A: Innovative Instructional Practices
- EDS 190: Research Practicum (four units)
- EDS 203: Technology, Teaching, and Learning
- EDS 201: Introduction to Resources for Teaching and Learning
- EDS 250: Equitable Educational Research and Practice

Winter

- EDS 142B: ASL-English Bilingual Education Practices
- EDS 161B: Innovative Instructional Practices
- EDS 169A: Practicum in Student Teaching

Spring

- EDS 142C: ASL-English Bilingual Education Practices
- EDS 161C: Innovative Instructional Practices
- EDS 169B: Practicum in Student Teaching
- EDS 182: Inclusive Educational Practices

YEAR 2

Fall

- EDS 151: Teaching the English Language Learner
- EDS 240A: Research in ASL-English Bilingual Education
- EDS 241: Advanced Topics in Deaf Education

Winter

- EDS 233A: Topics in Education Research and Design
- EDS 240B: Research in ASL-English Bilingual Education
- EDS 290: Research Practicum

Spring

- EDS 149: Education Specialist Student Teaching
- EDS 240C: Research in ASL-English Bilingual Education

Summer

- EDS 295: M.A. Thesis

Admission Requirements

Candidates will apply to graduate admission to the prerequisite component of this program. Upon satisfactory completion of the prerequisite component, students will advance to the professional component and master's component which require two years of study. The following are the minimum eligibility requirements to for admission to the graduate prerequisite component. Applications are available beginning in January. **Application deadline is February 1.**

- A bachelor's degree with a 3.0 cumulative GPA
- Official Graduate Record Exam (GRE) scores
- Subject matter competence (CSET)
- The California Basic Educational Skills Test (CBEST)
- Completion of a course including the provisions and principles of the U.S. Constitution, or passage of the appropriate exam
- Official Graduate Application and Fee
- Statement of Purpose and Reference Letters
- Fluency in American Sign Language

- Knowledge and experience of the social and cultural life of deaf people
- A desire to teach deaf children of varying language and cultural backgrounds

Admission to graduate standing at UCSD requires a minimum cumulative GPA of 3.0 for any prior graduate work, and for the bachelor's degree. Official scores from the GRE verbal, analytic, and quantitative sections are also required.

Doctor of Education (Ed.D.) in Teaching and Learning

Education Studies at UCSD offers a Doctor of Education (Ed.D.) degree in Teaching and Learning. This cohort-based four-year doctorate is designed to enable professional educators to participate in a research-based program while working in an educational setting. The Ed.D. course of study provides a research perspective on educational reform, with the expectation of developing regional leadership for K-12 and postsecondary teaching and learning. With its rich tradition of research and technological innovation, UCSD is uniquely positioned in the region to provide the research expertise for this Ed.D. program.

The Doctor of Education in Teaching and Learning program provides professional educators with the knowledge and skills to serve as faculty of pre-service teacher education and leaders of professional development for practicing teachers. Students take courses which address the topics of school reform and educational equity; learning and educational technology; curriculum research and theory; qualitative and quantitative research methods; cognition and learning theory; the social organization of schooling; language and culture; and research on teaching and learning. The application deadline is February 1.

The following is a typical course of study:

YEAR 1

Summer

- EDS 229: Introduction to Educational Resources
- EDS 231: Advanced Instructional Practices
or
- EDS 232: Special Topics in Education
(offered alternating summers)

Fall, Winter, and Spring

EDS 230A-B-C: Research in Curriculum Design

Summer

- EDS 295: M.A. Thesis
- EDS 231: Advanced Instructional Practices
or
- EDS 232: Special Topics in Education
(offered alternating summers)

YEAR 2

Fall

- EDS 260A: Educational Research and Evaluation Design
- EDS 270: Leadership and Equity in Educational Reform

Winter

- EDS 260B: Educational Research and Evaluation Design
- Elective Graduate Seminar

Spring

- EDS 260C: Educational Research and Evaluation Design
- Elective Graduate Seminar

YEAR 3

Fall, Winter, and Spring

- EDS 261A-B-C: Advanced Research and Evaluation Methods
- Elective Graduate Seminar

YEAR 4

Fall, Winter, and Spring

- EDS 262A-B-C: Dissertation Writing Seminar
- EDS 299: Dissertation Research

Doctor of Education (Ed.D.) in Educational Leadership

The Doctor of Education in Educational Leadership is offered through a partnership among UCSD, California State University, San Marcos (CSUSM), and San Diego State University (SDSU). The program is designed as a professional degree for P-12 and postsecondary educators who will develop advanced leadership and research skills related to their own institutional settings. Students will typically be mid-career working professional educators who will

attend classes on weeknights and weekends over a thirty-six-month period. Students will take courses designed to develop four specific leadership capacities: (1) leadership for learning; (2) leadership for a diverse society; (3) leadership for organizational change; and (4) leadership for organizational development. This program prepares leaders for culturally, linguistically, and economically diverse educational settings. Students will conduct research on professional practice within their own institutions, addressing specific local problems that have national implications for teaching and learning, school reform, and professional development. Students completing the program will receive a joint degree from either UCSD and CSUSM, or UCSD and SDSU. The application deadline is August 1.

The following is a typical course of study taught by UCSD, SDSU, and CSUSM faculty:

YEAR 1

Winter

- EDS 280: Re-Thinking Leadership
- EDS 287A: Educational Research and Evaluation Design
- EDS 291A: Leadership Research Practicum

Spring

- EDS 281: Leadership for Learning
- EDS 287B: Educational Research and Evaluation Design
- EDS 291B: Leadership Research Practicum

Summer

- EDS 282: Leadership for a Diverse Society
- EDS 287C: Educational Research and Evaluation Design
- EDS 291C: Leadership Research Practicum

Fall

- EDS 286: Advanced Topics in Leadership
- EDS 292: Qualifying Paper Preparation

YEAR 2

Winter

- EDS 283: Leadership for Organizational Change

EDS 288A: Advanced Research and Evaluation Methods

EDS 293A: Advanced Leadership Practicum

Spring

EDS 284: Leadership for Organizational Development

EDS 288B: Advanced Research and Evaluation Methods

EDS 293B: Advanced Leadership Practicum

Summer

EDS 285: Leadership for the Future

EDS 288C: Advanced Research and Evaluation Methods

EDS 293C: Advanced Leadership Practicum

Fall

EDS 286: Advanced Topics in Leadership

EDS 299: Dissertation Research

YEAR 3

Winter

EDS 299: Dissertation Research

EDS 289A: Dissertation Writing Seminar

EDS 294A: Colloquium on Educational Leadership

Spring

EDS 299: Dissertation Research

EDS 289B: Dissertation Writing Seminar

EDS 294B: Colloquium on Educational Leadership

Summer

EDS 299: Dissertation Research

EDS 289C: Dissertation Writing Seminar

EDS 294B: Colloquium on Educational Leadership

Fall

EDS 299: Dissertation Research

EDS 289D: Dissertation Writing Seminar

COURSES

For course descriptions not found in the 2006–2007 General Catalog, please contact the department for more information.

The following courses are offered by the EDS faculty. Students are advised to consult with an EDS adviser to determine which courses satisfy credential requirements. Undergraduate students may enroll in graduate seminars with the consent of instructor.

UPPER-DIVISION

COHI 124. Voice: Deaf People in America (4)

The relationship between small groups and dominant culture is studied by exploring the world of deaf people who have for the past twenty years begun to speak as a cultural group. Issues of language, communication, self-representation, and social structure are examined. *Prerequisite: Com/HIP 100 or consent of the instructor.*

EDS 20. Introduction to Principles of Learning (4)

Students will study discipline-specific principles of effective learning, including critical thinking, problem solving, collaboration and group communication, laboratory and hypothesis testing, library research and writing skills, and self-assessment. Students will explore concepts and procedures in mathematics, science, and economics as the context for making explicit these often-tacit principles of learning. *Prerequisite: Summer Bridge participation.*

EDS 39. Practicum in Science and Math Teaching/Learning (2)

Undergraduate students are placed in local schools and work with children in classrooms and the community. Students work on educational activities with K-12 students a minimum of 20 hours/quarter. *Prerequisites: department stamp; concurrent enrollment in either Math 87: Teaching Math: The Challenge, or Chem 87: Teaching Science: The Challenge.*

EDS 87. Freshman Seminar (1)

The Freshman Seminar Program is designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Freshman seminars are offered in all campus departments and undergraduate colleges, and topics vary from quarter to quarter. Enrollment is limited to 15-20 students, with preference given to entering freshmen. Seminars are open to sophomores, juniors, and seniors on a space-available basis.

EDS 105. Teaching and Learning Physics (4)

(Same as PHYS 180.) A course on how people learn and understand key concepts in Newtonian mechanics. Reading in physics and cognitive science plus field-work teaching and evaluating K-12 students. Useful for students interested in teaching. *Prerequisite: Phys. 1A, 2A, or 4A or consent of the instructor.*

EDS 109. Teaching Physical Education (4)

This course is designed to assist future elementary teachers and recreation fitness leaders develop quality physical education programs for children. Instruction focuses on theory and practice of movement activities

that are physically and emotionally safe, health promoting, and developmentally appropriate.

EDS 114. Cognitive Development and Interactive Computing Environments (4)

Learning and development considered as an evolving interplay between "internal representations" and "external representations" of the world, with special attention devoted to the design, history, and educational implications of computer-based tools and learning environments. *Prerequisite: upper-division standing.*

EDS 115. Cognitive Development and Education (4)

This course examines the development of thinking and language in preschool and elementary school children, with implications for education. Themes include facilitating children's learning, and individual differences in cognition. Examples of topics covered are word learning, mathematical knowledge, and scientific thinking. Letter grade only.

EDS 116. The Psychology of Teaching and Structures of Information for Human Learning (0-4)

College students tutoring college students. Curriculum: basic applied learning principles, specifying objectives, planning and designing instruction, testing, evaluation, interpersonal communication skills, study skills. Objectives will be assessed by project completion and practicum feedback. This course is not creditable toward professional preparation requirements for the multiple subject credential. *Prerequisite: departmental approval (consent of instructor)—department stamp restriction.*

EDS 117. Language, Culture, and Education (4)

(Same as Soc/B 117) The mutual influence of language, culture, and education. Explanations of students' school success and failure that employ linguistic and cultural variables, bilingualism, and cultural transmission through education are explored.

EDS 118. Adolescent Development and Education (4)

This course introduces prospective secondary teachers to the cognitive, social, and emotional development of adolescents, including developmental learning theory, the teaching/learning process, effective learning environments, and cross-cultural variation in development. Implications for classroom practice are drawn.

EDS/LIGN 119. First and Second Language Learning: From Childhood through Adolescence (4)

An examination of how human language learning ability develops and changes over the first two decades of life, including discussion of factors that may affect this ability. *Prerequisite: upper-division standing or consent of instructor.*

EDS 125. History, Politics, and Theory of Bilingual Education (4)

This course provides a historical overview and models of bilingual education in the United States. Students will examine sociocultural, theoretical, and policy issues associated with native language and second-language instruction, and legal requirements for public bilingual program.

EDS 126. Social Organization of Education (4)

(Same as Soc/C 126) The social organization of education in the U. S. and other societies; the functions of education for individuals and society; the structure of schools; educational decision-making; educational testing; socialization and education; formal and informal education; cultural transmission. *Prerequisite: upper-division standing.*

EDS 127A-B-C. Practicum in Interactive Computing (4-4-4)

The course focuses on interactional computing in teaching/learning. Course work concentrates on interactive computing, application to teaching, learning, bilingualism, and communication. Concurrent with course work, students are assigned to a school or community field site implementing interactive computing. Students will write research reports integrating course work and field experience. (F,W,S)

EDS 128 A-B. Introduction to Teaching and Learning (Elementary) (4-4)

This course series is for undergraduates who are exploring a career in elementary school teaching. Topics addressed include: theories of teaching and learning; research on cognition and motivation; and the cultural context of classroom teaching and learning. EDS 128A focuses on the learner in the teaching-learning interaction and EDS 128B focuses on the teacher in the teaching-learning interaction. *Prerequisites: department stamp required; EDS 139 must be taken as corequisite. EDS 130 or 134 must be completed before EDS 128A, and 128A for 128B. EDS 128A and EDS 128B are restricted for students applying to the EDS M.Ed./Multiple Subject Credential Program.*

EDS 129 A-B-C. Introduction to Teaching and Learning (Secondary) (4-4-4)

This course series is for undergraduates who are exploring a career in teaching secondary school. Topics addressed include: theories of teaching and learning processes and motivation for science, mathematics, and English instruction. EDS 129A focuses on the analysis of the needs of individual learners and small group instruction techniques; EDS 129B emphasizes the various roles of the classroom teacher and planning individual lessons; and EDS 129C emphasizes the assessment of student work and longer-range curriculum planning. *Prerequisites: department stamp. EDS 139 must be taken as corequisite. Must have successfully completed EDS 136, 138, or 129A for 129B, and 129B for 129C. EDS 129B and 129C are restricted for students applying to the EDS M.Ed./Single Subject Credential Program.*

EDS 130. Introduction to Academic Mentoring of Elementary/School Students (4)

This course focuses on the role of undergraduate mentors in raising academic expectations for students and families traditionally underrepresented at the university. The relationship between the school and community, the social and political organization of elementary schools, and the academic achievement of elementary children are examined. *Prerequisites: department stamp required. EDS 139 must be taken as a corequisite.*

EDS 134. Introduction to Literacy and Numeracy Tutoring (4)

This course examines effective practices for language arts and mathematics learning for elementary school children. The field experience and seminar focus on the tutor/student relationship, teaching and learning processes for literacy and numeracy, and community service. *Prerequisites: department stamp required. EDS 139 must be taken as a corequisite.*

EDS 136. Introduction to Academic Tutoring of Secondary School Students (4)

This course focuses on the role of undergraduate tutors in building academic resiliency in secondary students traditionally underrepresented at the university. The relationship between the school and commu-

nity, the social and political organization of secondary schools, the philosophical, sociological, and political issues which relate to the U.S. secondary educational system, and the academic achievement of secondary children are examined. *Prerequisites: department stamp required. EDS 139 must be taken as a corequisite.*

EDS 138. Introduction to Academic Tutoring at the Preuss School (4)

This course focuses on effects of the Charter School movement on public education in the U.S., the role of the research universities in K-12 education, the social and political organization of the schools, the philosophical, sociological, and political issues which relate to the U.S. secondary educational system, and the academic achievement of secondary children. Students investigate the role of undergraduate tutors in building academic resiliency in secondary students traditionally underrepresented at the university. *Prerequisites: department stamp required. EDS 139 must be taken as a corequisite.*

EDS 139. Practicum in Teaching/Learning (2)

Students are placed in local schools and work with students in classrooms and the community. Students work on educational activities with K-12 students a minimum of four hours/week. *Prerequisites: department stamp required. One of the following courses (may be taken concurrently) EDS 109, or EDS 127A-B-C, or EDS 128A-B, or 129A-B-C, or 130, or 134, or 136, or 138.*

EDS 142A. ASL-English Bilingual Education Practices (4)

Students will examine the history, current theory, philosophy, legislation, and trends in deaf education. Methods of first- and second-language development, communication, and literacy skills for deaf and hard-of-hearing children will be introduced. *Prerequisites: EDS 115, EDS 117, EDS 126, EDS 128A, EDS 128B. Must be a TE81 major. (F)*

EDS 142B. ASL-English Bilingual Education Practices (2)

Students will investigate formal and informal assessment techniques used for deaf and hard-of-hearing children, bilingual/multicultural education practices across the curriculum, effective learning environments and approaches for educating and interacting with families and communities. *Prerequisites: EDS 142A, EDS 161A. Must be a TE81 major. (W)*

EDS 142C. ASL-English Bilingual Education Practices (2)

Students will continue to investigate formal and informal assessment techniques used for deaf and hard of hearing children, bilingual/multicultural education practices across the curriculum, effective learning environments and approaches for educating and interacting with families and communities. *Prerequisites: EDS 142A, EDS 142B, EDS 161A. Must be a TE81 major.*

EDS 149. Deaf Education Specialist Student Teaching Practicum (9)

Education specialist credential candidate performs student teaching in participating schools for a minimum of seven weeks full-time under the supervision of a cooperating teacher and university supervisor. The field experience provides professional preparation and diversified teaching responsibilities for post-baccalaureate students pursuing the California Deaf and Hard of Hearing Specialist and BCLAD Credential. *Prerequisites: must be a TE81 major only—an affirmed Multiple Subject candidate at UCSD who has advanced to student teaching.*

EDS 151. Teaching the English Language Learner (4)

Students will examine the principles of second language acquisition and approaches to bilingual education. They will develop a repertoire of strategies for teaching in elementary or secondary content areas. *Prerequisite: TE81 or TE85 major code. (F)*

EDS 152A. Bilingual Instructional Practices (2)

History and models of bilingual education; socio-cultural issues associated with second language instruction, legal requirements for public school bilingual programs, native language and ESL teaching methods. First course in a two-course sequence. *Prerequisite: TE85 major code. (F)*

EDS 152B. Bilingual Instructional Practices (2)

History and models of bilingual education; socio-cultural issues associated with second language instruction, legal requirements for public school bilingual programs, native language and ESL teaching methods. *Prerequisite: TE85 major code. (Su,W)*

EDS 155A. Advanced Mathematics Teaching Practices for Grades K-6 (2)

Provides a theoretical and practical grounding in pedagogy and professional factors influencing high-quality elementary mathematics education. Students will review research literature and various content standards, assessment materials, and curriculum materials in preparation for specialized mathematics instruction in elementary classrooms. *Prerequisites: admission into the TE85: Multiple Subject (MS-2 program), and concurrent enrollment in EDS 161A or consent of instructor.*

EDS 155B. Advanced Mathematics Teaching Practices for Grades K-6 (2)

Provides a theoretical and practical grounding in pedagogy and professional factors influencing high-quality elementary mathematics education. Students will review research literature and various content standards, assessment materials, and curriculum materials in preparation for specialized mathematics instruction in elementary classrooms. *Prerequisites: EDS 155A, admission into the TE85: Multiple Subject (MS-2 program), and concurrent enrollment in EDS 161B or consent of instructor.*

EDS 155C. Advanced Mathematics Teaching Practices for Grades K-6 (2)

Provides a theoretical and practical grounding in pedagogy and professional factors influencing high-quality elementary mathematics education. Students will review research literature and various content standards, assessment materials, and curriculum materials in preparation for specialized mathematics instruction in elementary classrooms. *Prerequisites: EDS 155B, admission into the TE85: Multiple Subject (MS-2 program), and concurrent enrollment in EDS 161C or consent of instructor.*

EDS 161A. Innovative Instructional Practices (6)

First course in a three-course sequence. It provides pedagogical methods for multiple-subject teaching. Diverse subject areas (math, science, fine arts, P.E., and social studies) are integrated into a single intercurricular course of study by emphasizing activity/inquiry techniques of instruction. *Prerequisite: must be a TE81 or TE85 major.*

EDS 161B. Innovative Instructional Practices (6)

Second course in three course sequence. It provides pedagogical methods for multiple subject teaching. Diverse subject areas (language arts, English language development, health education, mathematics, sciences,

social studies, fine arts, and physical education) are integrated into a single intercurricular course of study by emphasizing activity/inquiry techniques of instructions. *Prerequisites: EDS 161A; TE81 or TE85 major.*

EDS 161C. Innovative Instructional Practices (4)
Last course in a three course sequence. It provides pedagogical methods for multiple subject teaching. General teaching methods are integrated into a single intercurricular course of study by emphasizing activity/inquiry techniques of instruction. *Prerequisites: EDS 161B, must be a TE81 or TE85 major.*

EDS 169 A-B. Multiple Subject (Elementary) Student Teaching Practicum (9-9)
The elementary credential candidate performs student teaching in participating schools for seven to eight weeks full-time for each course (fifteen weeks total) under the supervision of a cooperating teacher and university supervisor. The student teaching experience offers professional preparation and diversified teaching responsibilities for post-baccalaureate students pursuing the California Multiple Subject Teaching Credential. *Prerequisites: TE81 or TE85 major. Affirmed Multiple Subject Credential candidate at UCSD who has advanced to student teaching.*

EDS 173. Secondary English Teaching Practices (4)
The course introduces prospective secondary teachers to principles and strategies of teaching English language arts. Topics include: writing processes, reading processes, integrated language arts, assessment, the second language learner, the classroom community, the California English Language Arts Framework. *Prerequisite: TE85 major code or consent of instructor.*

EDS 174. Secondary Mathematics Teaching Practices (4)
Mathematics teaching techniques including, curriculum design, California Model Curriculum Standards, instructional methods, computer applications, selection and use of textbooks, student assessment, lesson planning, and classroom organization. Professional matters including curriculum planning, professional organizations, para-professionals, professional ethics, education law, and parent involvement are addressed. *Prerequisite: TE85 major code or affirmed credential candidate or approval of instructor. (Su)*

EDS 175. Secondary Science Teaching Practices (4)
Science teaching techniques, including science curriculum design, California Model Curriculum Standards, instructional methods, computer applications, selection and use of textbooks, student assessment, lesson planning, and classroom organization. Professional matters including curriculum planning, professional organizations, para-professionals, professional ethics, education law, and parent involvement are addressed. *Prerequisite: TE85 major or approval of instructor. (Su)*

EDS 176. Language and Learning Instruction (4)
This course satisfies the California Commission on Teacher Credentialing requirement for preparation in reading theory and methods for all credential candidates. Theories of reading development, integration of the language arts, reading and writing in the content areas, teaching methods, and literature. *Prerequisite: TE85 major code.*

EDS 179 A-B-C. Single Subject (Secondary) Internship Practicum (8-8-8)
The secondary credential candidate teaches approximately one academic quarter for each course in this series (one public school academic year) under the

guidance of a university supervisor with additional support provided by an on-site teacher. The internship offers extensive professional preparation and diversified teaching experience under actual classroom conditions for post-baccalaureate students pursuing the California Single Subject Teaching Credential. *Prerequisites: TE85 major. Affirmed Single Subject internship credential candidate at UCSD.*

EDS 181. Health Education (4)
This course satisfies the Commission on Teacher Credentialing requirement for Health Education. Topics include: physical education, substance abuse, sex education, cardio-pulmonary resuscitation, nutrition, and first aid. *Prerequisite: TE81 or TE85 major code.*

EDS 182. Inclusive Educational Practices (4)
This course satisfies the Commission on Teacher Credentialing requirement for Special Education. Topics include: teaching methods for accommodating special-needs students in the regular classroom, developing an Individual Education Plan, characteristics of special-needs students, lesson planning to accommodate individual differences, and legislated mandates. *Prerequisite: TE81 or TE85 major code.*

EDS 185. Elementary School Mathematics Content and Pedagogy (4)
Examines the underlying mathematical concepts of the elementary school mathematics curriculum and related pedagogical implications for teaching. Topics include number concepts, algebraic thinking, geometry, and data collection and analysis. *Prerequisite: students must be TE85 majors: M.Ed./Elementary-Multiple Subject Credential candidates who have advanced to student teaching. (MS-2).*

EDS 190. Research Practicum (1-6)
Supervised research studies with individual topics selected according to students' special interests. Students will develop a research proposal and begin to gather and analyze data. *Prerequisite: consent of instructor. (F,W,S)*

EDS 195. Apprentice Teaching (2-4)
Advanced EDS students are prepared in effective methods of supervising the preparation of UCSD students serving as paraprofessionals in K-12 classrooms. Topics covered include: classroom management, interpersonal relations, supervision techniques, multicultural and multi-lingual education, politics in the school, and curriculum development. Each student serves as a discussion leader and conducts at least two workshops. *Prerequisites: department stamp required and TE79 or TE80 major code.*

EDS 198. Directed Group Study (4-2)
Directed group study, guided reading, and study involving research and analysis of activities and services in multicultural education, bilingual education, the teaching-learning process, and other areas that are not covered by the present curriculum. *Prerequisite: consent of instructor.*

EDS 199. Special Studies (4)
Individual guided reading and study involving research and analysis of activities and services in multicultural education, bilingual education, the teaching-learning process, and other areas that are not covered by the present curriculum. *Prerequisite: consent of instructor.*

GRADUATE

Soc. 270. The Sociology of Education (4)
A consideration of the major theories of schooling and society, including functionalist, conflict, critical, and interactional; selected topics in the sociology of education will be addressed in a given quarter, including: the debate over inequality, social selection, cultural reproduction and the transition of knowledge, the cognitive and economic consequences of education. Major research methods will be discussed and critiqued.

EDS 201. Introduction to Resources for Teaching and Learning (4)
This course introduces students to educational resources, both in print and on-line. Students compile and evaluate research studies, curricular materials, and instructional approaches in preparation for future projects in developing and evaluating various approaches to teaching and learning. *Prerequisite: students must be registered EDS graduate students.*

EDS 203. Technology, Teaching, and Learning (4)
This course will review current literature on effective applications of technology in the classroom. Students will also become fluent in the use of productivity tools, presentation software, and Web development for teaching and learning; critique software relevant to their area of teaching; and develop an educational activity based on their review of the literature that harnesses the power of technology. *Prerequisite: students must be registered EDS graduate students.*

EDS 204. Technology and Professional Assessment (4)
Advanced techniques for using network-based resources for teaching and learning will be introduced. Students will review relevant research on advanced technologies related to assessment of professional performance and student achievement. Students will present a Web-based professional Teaching Performance Assessment Portfolio that reflects teaching performance during their student teaching or internship field experience. *Prerequisite: students must be registered EDS graduate students.*

EDS 205A. Reflective Teaching Practice (2)
This course introduces principles and practices of reflective teaching. Student teachers and interns will systematically document their practice teaching and analyze observation data to improve performance. Students will collaborate with supervisors and expert teachers throughout the yearlong preservice teaching experience. *Prerequisites: students must be registered EDS graduate students.*

EDS 205B. Reflective Teaching Practice (2)
This course introduces principles and practices of reflective teaching. Student teachers and interns will systematically document their practice teaching and analyze observation data to improve performance. Students will collaborate with supervisors and expert teachers throughout the yearlong preservice teaching experience. *Prerequisites: EDS 205A, and students must be registered EDS graduate students.*

EDS 206. Teaching Performance Assessment Portfolio (4)
This course introduces the use of a Teaching Performance Assessment Portfolio for assessment of teaching performance. Student teachers and interns will design an electronic portfolio that demonstrates acceptable performance on essential credential standards. National Board of Professional Teaching

Standards will also be introduced. *Prerequisite: students must be registered EDS graduate students.*

EDS 229. Introduction to Educational Resources (4)

This course prepares K-12 teacher-researchers to design, implement, and evaluate classroom research. Students learn how to access and evaluate research studies, curricular materials, and instructional approaches both on-line and in print. *Prerequisite: students must be registered TE76 majors.*

EDS 230A-B-C. Research on Curriculum Design (4-4-4)

A year-long course sequence which provides an extensive overview of curriculum design principles appropriate for K-12 instruction. Consensus and model building methods will be discussed using case studies of curriculum research and development projects appropriate for various subject areas and grade levels. Participants will design, implement, and evaluate a curriculum project in their own classrooms. *Prerequisite: must be TE76 major or consent of instructor. (F,W,S)*

EDS 231. Advanced Instructional Practices (4)

Selected advanced topics in K-12 instructional practices in various subject areas. Techniques for teaching higher-level cognitive processes and advanced applications of computers and other technology will be stressed. Participants will conduct a field study of promising teaching practices appropriate to their grade level(s) and subject area(s) of instruction. *Prerequisite: must be TE76 major or consent of instructor. (Su)*

EDS 232. Special Topics in Education (4)

This course explores topical issues in education. It focuses on recent developments which have broad implications for research and practice in teaching and learning. Course topics will vary each time the course is offered. *Prerequisite: TE76 major or consent of instructor.*

EDS 233A. Topics in Education Research and Design (2)

Current topics and issues in education and educational research methodology, including action research, participant observation, ethnography, and survey research. This is the first in a two-course series. *Prerequisite: TE76 major or consent of instructor.*

EDS 233B. Topics in Education Research and Design (2)

Current topics and issues in education and educational research methodology, including action research, participant observation, ethnography, and survey research. This is the second in a two-course series. *Prerequisite: EDS 233A and TE76 major or consent of instructor.*

EDS 240A. Research in ASL-English Bilingual Education (4)

A three-course sequence in which participants conduct an overview of research and design and conduct a study related to bilingual, bicultural education for deaf children. *Prerequisite: TE81 major: Teaching and Learning Bilingual Education (ASL-English) or consent of instructor.*

EDS 240B. Research in ASL-English Bilingual Education (4)

A three-course sequence in which participants conduct an overview of research and design and conduct a study related to bilingual, bicultural education for deaf children. *Prerequisites: EDS 240A, and TE81 major: Teaching and Learning Bilingual Education (ASL-English) or consent of instructor.*

EDS 240C. Research in ASL-English Bilingual Education (4)

A three-course sequence in which participants conduct an overview of research and design and conduct a study related to bilingual, bicultural education for deaf children. *Prerequisites: EDS 240A/EDS 240B, and TE81 major: Teaching and Learning Bilingual Education (ASL-English) or consent of instructor.*

EDS 241. Advanced Topics in Deaf Education (2)

Topics in human development and education that relate to deaf and hard-of-hearing children and the relationship between home, community/culture, and classroom. *Prerequisite: TE81 major or consent of instructor.*

EDS 250. Equitable Educational Research and Practice (4)

This course introduces students to research studies and educational practices of educational equity, both in general and within specific content areas. Research studies relevant to educational equity will be examined, as will practices that have attempted to enable all students to achieve to the best of their abilities. *Prerequisite: students must be registered EDS graduate students.*

EDS 260A. Educational Research and Evaluation Design (4)

This course integrates a variety of social and behavioral science perspectives and research methodologies in examining topics of central relevance to education. Students have opportunities to design and apply to educational-research questions a variety of methodologies, including survey, interview, ethnographic, case study, video data analysis, and discourse analysis methods. This is the first of a three-course series. *Prerequisite: admission into the Ed.D. program or consent of instructor.*

EDS 260B. Educational Research and Evaluation Design (4)

This course integrates a variety of social and behavioral science perspectives and research methodologies in examining topics of central relevance to education. Students have opportunities to design and apply to educational-research questions a variety of methodologies, including survey, interview, ethnographic, case study, video data analysis, and discourse analysis methods. This is the second of a three-course series. *Prerequisites: EDS 260A, and admission into the Ed.D. program or consent of instructor.*

EDS 260C. Educational Research and Evaluation Design (4)

This course integrates a variety of social and behavioral science perspectives and research methodologies in examining topics of central relevance to education. Students have opportunities to design and apply to educational research questions a variety of methodologies, including survey, interview, ethnographic, case study, video data analysis, and discourse analysis methods. This is the third of a three-course series. *Prerequisites: EDS 260B, and admission into the Ed.D. program or consent of instructor.*

EDS 261A. Advanced Research and Evaluation Methods (4)

This course addresses more advanced topics in research design and methodology. Students hone the requisite research skills to conduct dissertation research. Students gain varied hands-on experiences in collecting and analyzing data relevant to schooling, as well as learn how to develop, manage, and analyze

large data files. Students create a research agenda and develop skills needed in proposal writing: development, organization and coherence, conceptualization of research design, and attention to audience and writing style. This is the first of a three-course series. *Prerequisite: admission into the Ed.D. program or consent of instructor.*

EDS 261B. Advanced Research and Evaluation Methods (4)

This course addresses more advanced topics in research design and methodology. Students hone the requisite research skills to conduct dissertation research. Students gain varied hands-on experiences in collecting and analyzing data relevant to schooling, as well as learn how to develop, manage, and analyze large data files. Students create a research agenda and develop skills needed in proposal writing: development, organization and coherence, conceptualization of research design, and attention to audience and writing style. This is the second of a three-course series. *Prerequisites: EDS 261A, and admission into the Ed.D. program or consent of instructor.*

EDS 261C. Advanced Research and Evaluation Methods (4)

This course addresses more advanced topics in research design and methodology. Students hone the requisite research skills to conduct dissertation research. Students gain varied hands-on experiences in collecting and analyzing data relevant to schooling, as well as learn how to develop, manage, and analyze large data files. Students create a research agenda and develop skills needed in proposal writing: development, organization and coherence, conceptualization of research design, and attention to audience and writing style. This is the third of a three-course series. *Prerequisites: EDS 261B, and admission into the Ed.D. program or consent of instructor.*

EDS 262A. Dissertation Writing Seminar (4)

This seminar provides an opportunity for doctoral candidates to present and critique in-progress dissertation research and writing. Topics addressed will also include writing for professional publications and presenting research findings to varied audiences. This is the first of a three-course series. *Prerequisite: admission into the Ed.D. program or consent of instructor.*

EDS 262B. Dissertation Writing Seminar (4)

This seminar provides an opportunity for doctoral candidates to present and critique in-progress dissertation research and writing. Topics addressed will also include writing for professional publications and presenting research findings to varied audiences. This is the second of a three-course series. *Prerequisites: EDS 262A, and admission into the Ed.D. program or consent of instructor.*

EDS 262C. Dissertation Writing Seminar (4)

This seminar provides an opportunity for doctoral candidates to present and critique in-progress dissertation research and writing. Topics addressed will also include writing for professional publications and presenting research findings to varied audiences. This is the third of a three-course series. *Prerequisites: EDS 262B, and admission into the Ed.D. program or consent of instructor.*

EDS 270. Leadership and Equity in Educational Reform (4)

This course provides a framework for understanding school reform movements that integrates relevant theory and research from a number of academic

disciplines. *Prerequisite: admission into the Ed.D. program or consent of instructor.*

EDS 271. Language and Diversity in the Schooling Process (4)

This course examines current research and theory which relate language and diversity to educational outcomes. Topics addressed include the development of language and literacy in schools and other settings, socio-cultural perspectives on language learning, and implications for educational policy and practice. *Prerequisite: admission into the Ed.D. program or consent of instructor.*

EDS 272. Education and Culture (4)

This course examines schooling from an anthropological perspective, focusing on the impact of social and cultural forces on teaching and learning in U.S. public schools using comparative materials from other societies and settings. *Prerequisite: admission into the Ed.D. program or consent of instructor.*

EDS 273. Research in Teaching and Learning: Reading and Writing (4)

This seminar will address current theories and research on the teaching and learning of reading and writing, as well as how research can be used to analyze and foster effective teaching practices. *Prerequisite: admission into the Ed.D. program or consent of instructor.*

EDS 274. Research in Teaching and Learning: Mathematics (4)

This seminar will address current theories and research on the teaching and learning of mathematics, as well as how research can be used to analyze and foster effective teaching practices. *Prerequisite: admission into the Ed.D. program or consent of instructor.*

EDS 275. Research in Teaching and Learning: Science (4)

This seminar will address current theories and research on the teaching and learning of science, as well as how research can be used to analyze and foster effective teaching practices. *Prerequisite: admission into the Ed.D. program or consent of instructor.*

EDS 276. Research in Teaching and Learning: English Language Learning (4)

This seminar will address current theories and research on the teaching and learning of second-language learning, as well as how research can be used to analyze and foster effective practices in teaching English to non-native speakers. *Prerequisite: admission into the Ed.D. program or consent of instructor.*

EDS 277. Research in Teaching and Learning: History and Social Sciences (4)

This seminar will address current theories and research on the teaching and learning of social sciences, as well as how research can be used to analyze and foster effective teaching practices. *Prerequisite: admission into the Ed.D. program or consent of instructor.*

EDS 278/COGR 278. Talking Culture, Culture Talking: Voices of Diversity (4)

This course explores the discourse of culture in American society and the problem of "silenced" or unheard voices. The interaction of individual and collective voice, language, and identity are discussed as they bear on the ways that culture moves through important social institutions such as schools. Of particular interest are issues of teaching, learning, dis-

placement, inclusion, marginality, and the "speaking center." *Prerequisite: graduate status or consent of instructor.*

EDS 280. Re-Thinking Leadership (4)

This course will present the evolution of leadership thought and theory, with an emphasis on the distinction between, and interrelatedness of, effective management and leadership. The ethics of leadership practice and epistemological perspectives of emerging leadership styles will be explored, and students will have opportunities to reflect on the nature of leadership as it is practiced in educational settings. Applying critical, self-reflective leadership practice through structured activities is also an element of this course.

EDS 281. Leadership for Learning (4)

This course will explore various models of curriculum and instruction in response to students' learning needs. It also will examine models of school organization and the leader's role and responsibility in developing a school culture that promotes student achievement, using evidence-based decision-making. A major emphasis will be on evaluating research on which theories and practice are based. *Prerequisite: joint Ed.D. in Educational Leadership student status.*

EDS 282. Leadership for a Diverse Society (4)

This course will address theories and practices for achieving schools and classrooms that are informed by and built around the participation of diverse communities and cultures. The emphasis is on how leadership intersects with sociohistorical and sociocultural theories that suggest that the organization of schools and instruction is critical to student inclusion and outcomes. A basic premise of this course is that a socially just learning theory begins with using all of the resources and knowledge of families, communities, and cultures in formulating policy and practice. *Prerequisite: joint Ed.D. in Educational Leadership student status.*

EDS 283. Leadership for Organizational Change (4)

This course will present multiple theories of organizational change, explore group processes and identify models of decision-making, and analyze human motivation theories. Establishing and nurturing a purpose-driven organization, while dealing with competing demands, will be discussed. A major emphasis in this course is on people as agents of change and on the creation of high-quality ethical and productive workplaces where employees can achieve success and satisfaction, while advancing the mission of the educational organization. *Prerequisite: joint Ed.D. in Educational Leadership student status or consent of instructor.*

EDS 284. Leadership for Organizational Development (4)

This course will investigate the skills and dispositions needed for students to lead the development of learning organizations. Faculty will teach and model concepts of working with people within educational organizations and programs. Emphasis will be placed on individual's team development and facilitation, organizational communications, adult learning, and professional development. *Prerequisite: joint Ed.D. in Educational Leadership student status or consent of instructor.*

EDS 285. Leadership for the Future (4)

This course addresses interdisciplinary influences on leadership practice within learning organizations.

Contributions from scholars in futures' studies, including those influenced by modernism and postmodernism, will be used to explore topics such as long-range planning, demographic trends, technology, and brain theory. *Prerequisite: joint Ed.D. in Educational Leadership student status or consent of instructor.*

EDS 286. Advanced Topics in Leadership (4)

This course explores topical issues in the field of leadership. It focuses on recent developments that have broad implications for research and practice in educational leadership. Course topics will vary each time the course is offered. *Prerequisite: joint Ed.D. in Educational Leadership student status.*

EDS 287A. Educational Research and Evaluation Design (4)

This course integrates a variety of social and behavioral science perspectives and research methodologies in examining topics of central relevance to education. Students have opportunities to design and apply to educational-research questions a variety of methodologies, including experimental and quasi-experimental survey, interview, ethnographic, case study, video data analysis, and discourse analysis methods. This is the first in a three-course sequence. *Prerequisite: TEP Education Doctorate student or consent of instructor.*

EDS 287B. Educational Research and Evaluation Design (4)

This course integrates a variety of social and behavioral science perspectives and research methodologies in examining topics of central relevance to education. Students have opportunities to design and apply to educational-research questions a variety of methodologies, including experimental and quasi-experimental survey, interview, ethnographic, case study, video data analysis, and discourse analysis methods. *Prerequisites: EDS 287A, and TEP Education Doctorate student or consent of instructor.*

EDS 287C. Educational Research and Evaluation Design (4)

This course integrates a variety of social and behavioral science perspectives and research methodologies in examining topics of central relevance to education. Students have opportunities to design and apply to educational-research questions a variety of methodologies, including experimental and quasi-experimental survey, interview, ethnographic, case study, video data analysis, and discourse analysis methods. *Prerequisites: EDS 287B, and TEP Education Doctorate student or consent of instructor.*

EDS 288A. Advanced Research and Evaluation Methods (4)

This course addresses more advanced topics in research design and methodology. Students hone the requisite research skills to conduct dissertation research. Students gain varied hands-on experiences in collecting and analyzing data relevant to schooling, as well as learn how to develop, manage, and analyze large data files. Students create a research agenda to develop skills needed in proposal writing: development, organization and coherence, conceptualization of research design, and attention to audience and writing style. This is the first in a three-course series. *Prerequisite: joint Ed.D. in Educational Leadership student status or consent of instructor.*

EDS 288B. Advanced Research and Evaluation Methods (4)

This course addresses more advanced topics in research design and methodology. Students hone the requisite research skills to conduct dissertation research. Students gain varied hands-on experiences in collecting and analyzing data relevant to schooling, as well as learn how to develop, manage, and analyze large data files. Students create a research agenda to develop skills needed in proposal writing: development, organization and coherence, conceptualization of research design, and attention to audience and writing style. This is the second in a three-course series. *Prerequisites: EDS 288A, and joint Ed.D. in Educational Leadership student status or consent of instructor.*

EDS 288C. Advanced Research and Evaluation Methods (4)

This course addresses more advanced topics in research design and methodology. Students hone the requisite research skills to conduct dissertation research. Students gain varied hands-on experiences in collecting and analyzing data relevant to schooling, as well as learn how to develop, manage, and analyze large data files. Students create a research agenda to develop skills needed in proposal writing: development, organization and coherence, conceptualization of research design, and attention to audience and writing style. This is the third course in a three-course series. *Prerequisites: EDS 288B, and joint Ed.D. in Educational Leadership student status or consent of instructor.*

EDS 289A. Dissertation Writing Seminar (4)

This seminar provides an opportunity for doctoral candidates to present and critique in-progress dissertation research and writing. Topics addressed will also include writing for professional publications and presenting research findings to varied audiences. This is the first in a four-course series. *Prerequisite: joint Ed.D. in Educational Leadership student status or consent of instructor.*

EDS 289B. Dissertation Writing Seminar (4)

This seminar provides an opportunity for doctoral candidates to present and critique in-progress dissertation research and writing. Topics addressed will also include writing for professional publications and presenting research findings to varied audiences. This is the second in a four-course series. *Prerequisites: EDS 289A, and joint Ed.D. in Educational Leadership student status or consent of instructor.*

EDS 289C. Dissertation Writing Seminar (4)

This seminar provides an opportunity for doctoral candidates to present and critique in-progress dissertation research and writing. Topics addressed will also include writing for professional publications and presenting research findings to varied audiences. This is the third in a four-course series. *Prerequisites: EDS 289B, and joint Ed.D. in Educational Leadership student status or consent of instructor.*

EDS 289D. Dissertation Writing Seminar (4)

This seminar provides an opportunity for doctoral candidates to present and critique in-progress dissertation research and writing. Topics addressed will also include writing for professional publications and presenting research findings to varied audiences. This is the fourth course in a four-course series. *Prerequisites: EDS 289C, and joint Ed.D. in Educational Leadership student status or consent of instructor.*

EDS 290. Research Practicum (1-6)

Supervised research studies with individual topics selected according to students' special interests. Students will develop a research proposal appropriate for M.A. thesis, begin to gather and analyze data. *Prerequisites: M.A. candidate and consent of instructor. (S/U grades only.)*

EDS 291A. Leadership Research Practicum (2)

Students use their placements in local schools and educational settings to examine leadership research and practice topics raised in the Leadership core courses and Research and Evaluation Design/Methods courses. This is the first in a three-course series. *Prerequisite: joint Ed.D. in Educational Leadership student status or consent of instructor.*

EDS 291B. Leadership Research Practicum (2)

Students use their placements in local schools and educational settings to examine leadership research and practice topics raised in the Leadership core courses and Research and Evaluation Design/Methods courses. This is the second course in a three-course series. *Prerequisite: EDS 291A, and joint Ed.D. in Educational Leadership student status.*

EDS 291C. Leadership Research Practicum (2)

Students use their placements in local schools and educational settings to examine leadership research and practice topics raised in the Leadership core courses and Research and Evaluation Design/Methods courses. This is the third course in a three-course series. *Prerequisite: EDS 291B, and joint Ed.D. in Educational Leadership student status.*

EDS 292. Qualifying Paper Preparation (2)

This course will provide students with time, resources, and guidance for the purpose of developing a review of literature on a student-related topic, which typically becomes the focus of the dissertation research project. Students will be expected to use a variety of research tools in order to discover and identify relevant information. (S/U grade permitted)

EDS 293A. Advanced Leadership Research Practicum (2)

Students use their placements in local schools and educational settings to examine leadership research and practice topics raised in the Leadership core courses and Research and Evaluation Design/Methods courses. This is the first course in a three-course series. *Prerequisite: joint Ed.D. in Educational Leadership student status or consent of instructor.*

EDS 293B. Advanced Leadership Research Practicum (2)

Students use their placements in local schools and educational settings to examine leadership research and practice topics raised in the Leadership core courses and Research and Evaluation Design/Methods courses. This is the second course in a three-course series. *Prerequisite: EDS 293A, and joint Ed.D. in Educational Leadership student status or consent of instructor.*

EDS 293C. Advanced Leadership Research Practicum (2)

Students use their placements in local schools and educational settings to examine leadership research and practice topics raised in the Leadership core courses and Research and Evaluation Design/Methods courses. This is the third course in a three-course series. *Prerequisite: EDS 293B, and joint*

Ed.D. in Educational Leadership student status or consent of instructor.

EDS 294A. Colloquium on Educational Leadership (2)

Program faculty and visiting lecturers present leadership research in progress. Serves as a forum to discuss current research in educational leadership. This is the first course of a two-course series. *Prerequisite: graduate student status or consent of instructor.*

EDS 294B. Colloquium on Educational Leadership (2)

Program faculty and visiting lecturers present leadership research in progress. Serves as a forum to discuss current research in educational leadership. This is the second course in a two-course series. *Prerequisite: EDS 294A, and graduate student status or consent of instructor.*

EDS 295. MA Thesis (1-8)

Research for the Master's thesis (Educational Research) or Curriculum Design Portfolio thesis (Curriculum Design). Open for repeated registration up to eight units (S/U grade only). *Prerequisite: consent of instructor.*

EDS 297. Directed Group Study (1-6)

Study and analysis of specific topics under the guidance of a faculty member. Offered for repeated registration. *Prerequisite: consent of instructor.*

EDS 298. Independent Study (1-6)

Individual guided study and/or independent research in an area not covered by present course offerings. Offered for repeated registration. *Prerequisite: consent of instructor.*

EDS 299. Dissertation Research (1-12)

Directed research on dissertation topic for students who have been admitted to candidacy for the Ed.D. degree. May be repeated for credit. *Prerequisite: admission into the Ed.D. program.*

EDS 500. Apprentice Teaching in Education (2-4)

The course, designed for graduate students serving as teaching assistants in teacher education courses, includes discussion of teaching theory and practice, instructional materials, organization of discussion sections, liaison with participating schools, and methods of evaluation/grading under the supervision of the instructor of the course.

Eleanor Roosevelt College

OFFICE: Provost, Eleanor Roosevelt College,
ERC Administration Building

The Making of the Modern World/Writing Program

OFFICE: Eleanor Roosevelt College Writing Program, ERC Administration Building

See "The Making of the Modern World" program for Eleanor Roosevelt Writing.

Eleanor Roosevelt College Honors Program

OFFICE: Provost, Eleanor Roosevelt College,
ERC Administration Building

Honors programs at Eleanor Roosevelt College have been established to provide exceptionally motivated and capable students with enhanced educational experiences through close interaction with faculty and other honors students. There are two main components to the program: the Freshman Honors Program and the Sophomore Honors Research Project. Participation in either is by invitation.

In the fall quarter of their freshman year, selected students are invited to enroll in the Freshman Honors Seminar, a two- to three-quarter course. During the fall quarter, students meet with a variety of faculty members to learn more about their research, and about academic enrichment opportunities at UCSD. The seminar continues during the winter quarter, focusing on an international theme with faculty speakers. Honors students may receive opportunities for particular cultural and social events. Second-year students with GPAs of 3.5 or higher have the opportunity to pursue independent study with individual faculty.

Additional honors opportunities are offered in the Making of the Modern World (MMW) sequence. Students with excellent grades in MMW 1, 2, and 3 and high cumulative grade-point averages are eligible to take MMW 4H, 5H, and 6H. Students attend regular course lectures, but meet in separate honors sections.

They may also be invited to special guest lectures and enrichment activities connected with MMW.

There are also opportunities for university-wide honors, including provost's honors. Students who maintain a GPA of 3.5 for a full academic year are awarded certificates of merit by the college. UCSD's reputation for excellence is also reflected in the numbers of students who enroll in departmental senior honors programs and who earn college or university honors or election to Phi Beta Kappa.

10. ERC Freshman Honors Seminar (0)
Weekly seminar with faculty members from a variety of disciplines. This seminar provides students with the opportunity to learn more about research and scholarly activities available to them, and acquaints them with UCSD faculty members. *Prerequisite: by invitation only. Pass/Not Pass grades only.*

20. Freshman Honors Seminar: International Themes (1)
This weekly seminar focuses on a chosen international theme with faculty speakers. The structure of the seminar is informal, giving students the opportunity to participate in interactive discussions. *Prerequisite: by invitation only. Pass/Not Pass only. May be taken for credit two times.*

92. Honors Project (2)
Individual project on a topic chosen by the student, done under direction of a faculty member. *Prerequisite: by invitation only. Pass/Not Pass only. Repeatable for credit twice, up to a total of six units over three quarters.*

196. Honors Project (4)
Senior thesis research project for students who have been accepted into the Eleanor Roosevelt College Individual Studies major. Project will be carried out under supervision of one or more faculty members. Depending on scope of the project, may be taken for four or eight units of credit in a single quarter, or eight units distributed over two quarters. *Prerequisite: admission to Eleanor Roosevelt Individual Studies major.*

199. ERC Independent Studies (4)
The content of this independent study course, which may not duplicate any existing course on campus, will be determined by a supervising faculty member and tailored to fit specific content needs of students pursuing the Eleanor Roosevelt College Individual Studies major. *Prerequisite: admission to ERC Individual Studies major.*

Eleanor Roosevelt Seminar

OFFICE: Provost, Eleanor Roosevelt College,
ERC Administration Building

90. Undergraduate Seminar (1)
A seminar intended for exposing undergraduate students, especially freshmen and sophomores, to exciting research programs conducted by the faculty. *Prerequisite: none. Pass/Not Pass only.*

Engineering, Jacobs School of

OFFICE: 7310 Engineering Building Unit 1,
Warren Mall
<http://www.jacobsschool.ucsd.edu>

The Irwin and Joan Jacobs School of Engineering at UCSD comprises the Departments of Bioengineering (BE), Computer Science and Engineering (CSE), Electrical and Computer Engineering (ECE), Mechanical and Aerospace Engineering (MAE), and Structural Engineering (SE). The Jacobs School is directed by the dean of engineering. The departments offer seventeen undergraduate programs that fall into three categories: impacted, pre-major, and open major programs as well as many graduate degree programs. For a complete list of engineering undergraduate and graduate programs, please visit our Web site at <http://www.jacobsschool.ucsd.edu>. Students interested in engineering should consult the Web site and the individual department listings which follow this section of the catalog.

UCSD's six undergraduate colleges differ in their general-education requirements. Prospective students should review the general-education requirements and take them into account when planning their college curriculum.

Acceptance to the Jacobs School of Engineering

Student demand exceeds program capacity in several of the undergraduate majors. Owing to limited departmental resources, major programs to which more students apply than can be accepted have been declared impacted majors. Acceptance into an impacted engineering major is based on academic excellence demonstrated in high school or at a community college. Acceptance will be granted to the maximum number of students in each of these impacted major programs consistent with maintaining acceptable program quality and in compliance with admissions procedures and criteria approved by the Academic Senate's Committee on Educational Policy.

Remember that admission to the university and to a college does not guarantee acceptance to an impacted major.

FRESHMAN

Freshmen are admitted to engineering majors in one of three ways: open majors, pre-majors and impacted majors.

Open Majors

The following seven majors are open to all admitted UCSD students: aerospace engineering, chemical engineering (offered through the Chemical Engineering Program), engineering science (offered through MAE department), engineering sciences (offered through SE department), environmental engineering, mechanical engineering, and structural engineering. All applicants who have been accepted to UCSD and indicated a pre-major or open engineering major on their application are placed directly into that major.

Required Review of Student Progress for Electrical Engineering Majors

Effective fall 2006 the electrical engineering major within the Department of Electrical and Computer Engineering (ECE) is no longer considered an impacted major. Entering freshmen and transfer students who have indicated the desire to major in electrical engineering will be admitted directly to the major. Continuing UCSD students who wish to transfer into the electrical engineering major will be evaluated under the rules that are in effect for the year in which they enter the major. Effective fall 2006, to remain in good standing as an electrical engineering major, a student must complete a minimum of eight Progress Review Courses with a C- or better during his or her first five quarters for freshmen or during the first three quarters for continuing UCSD or transfer students. The average GPA from any six of the Progress Review Courses, including at least two from EE Progress Review Courses, must exceed 2.50.

The required review of student progress for electrical engineering majors is explained in greater detail under the "Department of Electrical and Computer Engineering (ECE)" section of this catalog.

Pre-major Programs

There are two engineering pre-major programs offered: (1) bioengineering: pre-medical and (2) engineering physics. Incoming freshmen who identified either of these pre-majors as their first choice on their UCSD admissions application are accepted directly into these pre-majors

upon admission to UCSD. Subsequent acceptance to the major is dependent on performance in selected mathematics, science, and engineering screening courses as well as competitive grade-point average in the pre-major screening courses.

Pre-major engineering students are expected to apply for acceptance to the major during the spring quarter of their freshman year. Acceptance to the major is based on the grade-point average in the screening courses only. The grade-point average required for acceptance to the major by pre-majors is set individually by each engineering program. Pre-majors should consult their departments concerning the appropriate screening courses and the current grade-point average standards for acceptance. In addition to the courses required by the departments, it is expected that all pre-major students will take twelve to eighteen units of general-education college requirements during their first year.

Pre-major engineering students who are not able to apply before the end of their third quarter, or who wish to reapply following an unsuccessful application, must contact their department as soon as possible for further advising as **acceptance to any engineering major will not be considered after six quarters of enrollment.**

Impacted Majors

The following five engineering majors are impacted: bioengineering, bioengineering: biotechnology, computer engineering (CSE), computer engineering (ECE), and computer science. Applicants must indicate one of these impacted majors as their first choice on their UC application in order to be considered for acceptance to the major by the Jacobs School. The Jacobs School will subsequently notify all engineering students admitted to UCSD of their acceptance status.

Effective fall 2001, this selection is based on the freshman review criteria (Comprehensive Review) administered by the UCSD Office of Admissions and Relations with Schools.

It is strongly suggested that all students accepted into engineering programs consult their department's academic adviser at an early stage to plan their lower-division engineering courses, and that they consult with a college academic counselor to arrange general-education

courses around the required screening courses. Students admitted fall quarter should attend the engineering department's orientation meetings during Welcome Week.

Bioinformatics Programs

Students interested in applying to either the bioengineering: bioinformatics major (offered by the bioengineering department), or the computer science major with a specialization in bioinformatics (offered by the computer science and engineering department) should consult individual department listings which follow this section of the catalog.

TRANSFERS

Following California's Master Plan for Higher Education, The Jacobs School of Engineering gives high priority to students transferring from California community colleges.

Transfer students are admitted to engineering majors in one of three ways: open majors, pre-majors, and impacted majors. Effective fall 2006, all applicants who have been accepted to UCSD and indicated an engineering major on their UC application will be reviewed for major-preparation course work (see courses below.) For major-specific advising, please contact the relevant departmental undergraduate academic advising office.

Effective **fall 2004**, it is **strongly recommended** that transfer students complete the following preparation for engineering majors*.

*Effective **fall 2006**, these courses will be **required** preparation for **all** engineering transfer students.

- Calculus I—for Science and Engineering (Math. 20A)
 - Calculus II—for Science and Engineering (Math. 20B)
 - Calculus and Analytic Geometry (Math. 20C)
 - Differential Equations (Math. 20D)
 - Linear Algebra (Math. 20F)
 - Complete calculus-based physics series with lab experience (Physics 2A-B-C)
 - Chemistry 6A (except Computer Science and Computer Engineering majors)
- Note:** Effective fall 2007, a total of ten quarter-units of general chemistry (including laboratory) will be required for students applying

to all majors offered by the Department of Bioengineering.

- Highest level of introductory computer programming language course offerings at the community college**

**Refer to the *UCSD General Catalog* to select major prerequisite requirement for computer language courses.

For impacted majors (bioengineering, bioengineering: biotechnology, computer science, computer engineering (CSE), and computer engineering (ECE), we recommend a competitive UCSD transferable cumulative GPA of 3.20 and 3.40 in the major-preparation courses.

Open Majors

The following seven majors are open to all admitted UCSD students: aerospace engineering, chemical engineering (offered through the Chemical Engineering Program), engineering science (offered through MAE), engineering sciences (offered through SE), environmental engineering, mechanical engineering, and structural engineering. Through the fall 2005 admissions cycle, all transfer applicants who have been admitted to UCSD and indicated an open engineering major on their application are placed directly into that major. Effective fall 2006, transfer applicants to open majors will be screened for completion of the above preparation courses.

Required Review of Student Progress for Electrical Engineering Majors

Effective fall 2006 the electrical engineering major within the Department of Electrical and Computer Engineering (ECE) is no longer considered an impacted major. Entering freshmen and transfer students who have indicated the desire to major in electrical engineering will be admitted directly to the major. Continuing UCSD students who wish to transfer into the electrical engineering major will be evaluated under the rules that are in effect for the year in which they enter the major. Effective fall 2006, to remain in good standing as an electrical engineering major, a student must complete a minimum of eight Progress Review Courses with a C- or better during his or her first five quarters for freshmen or during the first three quarters for continuing UCSD or transfer students. The average GPA from any six of the Progress Review Courses, including at least two from EE Progress Review Courses, must exceed 2.50.

The required review of student progress for electrical engineering majors is explained in greater detail under the Department of Electrical and Computer Engineering (ECE) section of this catalog.

Pre-major Programs

There are two engineering pre-major programs offered: (1) bioengineering: pre-medical and (2) engineering physics. Subsequent acceptance to the major is dependent on performance in selected mathematics, science, and engineering screening courses as well as competitive grade-point average in the pre-major screening courses.

Pre-major transfer engineering students are expected to apply for acceptance to the major during their third quarter of their first year at UCSD. Acceptance to the major is based on the grade-point average in the screening courses only. The grade-point average required for acceptance to the major by pre-majors is set individually by each engineering program. Pre-majors should consult their departments concerning the appropriate screening courses and the current grade-point average standards for acceptance. In addition to the courses required by the departments, it is expected that all pre-major students will take twelve to eighteen units of general-education college requirements during their first year.

Pre-major transfer engineering students must apply to the major before the end of their third quarter as acceptance to any engineering major by a transfer student will not be considered after the end of third quarter of enrollment.

Impacted Majors

Since acceptance to impacted engineering majors is quite competitive for freshman and transfer applicants alike, academic standards are high. Transferring students must demonstrate both the completion of most of their lower-division courses at the community college, and a high level of academic competence (GPA) in these courses.

The Jacobs School evaluates transfer students who choose impacted engineering major programs as their first choice major on their UC application. Those seeking acceptance to the following impacted engineering majors: bioengineering and bioengineering: biotechnology,

computer science, and computer engineering will have their community college work evaluated by the Jacobs School of Engineering.

Acceptance to impacted majors may be limited to the best transfer applicants, e.g., those who have been admitted to UCSD with the most complete lower-division preparation and the highest college grade-point averages. For impacted majors, a competitive UCSD transferable cumulative GPA of 3.20 and 3.40 in the major-preparation courses is recommended. Since acceptance is restricted to these majors, **transfer students are encouraged to apply to more than one major degree program.**

It is strongly suggested that all students accepted into engineering programs consult their department's academic adviser at an early stage to plan their lower-division engineering courses, and that they consult with a college academic counselor to arrange general-education courses around the required screening courses. Students admitted fall quarter should attend the engineering department's orientation meetings during Welcome Week.

For specific program requirements for transfer students, please refer to the appropriate department's listing which follow this section of the catalog.

Bioinformatics Programs

Students interested in applying to either the bioengineering: bioinformatics major (offered by the bioengineering department), or the computer science major with a specialization in bioinformatics (offered by the computer science and engineering department) should consult individual department listings which follow this section of the catalog.

CONTINUING UCSD STUDENTS

Through the fall 2005 admissions cycle, UCSD undergraduate students who were not accepted into an engineering major as entering students may, *with engineering departmental approval*, change their major to any **non-impacted engineering major**. Effective fall 2006, continuing transfer students to open majors will be screened for completion of required major preparation course work (see beginning of "TRANSFERS" section above for more details). Interested students should make an appointment to speak with the departmental under-

graduate adviser prior to changing their major for more details.

EXCEPTIONAL ADMISSION PROGRAM (CSE AND ECE IMPACTED MAJORS)

The Departments of Computer Science and Engineering and Electrical and Computer Engineering may periodically grant admission to the computer engineering (CE) or computer science (CS) majors to a small number of academically exceptional UCSD undergraduate students who were not admitted to these majors as entering students. Refer to the department section in this catalog for program requirements and information. At this time, the Department of Bioengineering does not participate in the Exceptional Admission Program for its impacted major programs.

Access of Non-Engineering Majors to the Jacobs School of Engineering Courses

The number of students enrolled in some courses offered by the Jacobs School of Engineering must be restricted to meet the resources available. Students who have successfully completed all prerequisite courses will be enrolled in these restricted courses in the following order:

1. students accepted by the department to a major curriculum
2. students accepted by the department to a minor curriculum
3. students fulfilling a requirement for another major
4. all others, with permission of the department and instructor

Students should check with the departments concerning the limitations on specific courses and the requirements needed prior to attempting to enroll.

Double Majors and Minors

It is the policy of the Jacobs School of Engineering not to approve double majors within engineering. Students who qualify for admission to graduate school and who have the extra time are encouraged to consider co-terminal B.S./Master's degrees in one or two engineering

disciplines. Engineering minors may be taken only by non-engineering majors.

Integrative Engineering Education

ESS—Office of the Dean: The mission of ESS is to promote the personal and professional development of the undergraduate and graduate engineering student body. ESS activities and programs are designed to assist students as they pursue their chosen degrees and to prepare them for life outside of the university as engineering professionals and responsible citizens. To this end, the office serves as a resource for those interested in applying to engineering majors; getting involved in student organizations; locating an internship; accessing tutoring information; or simply as a referral to on-campus and community resources. In addition, the office supports the Teams in Engineering Service (TIES) Program, Team Internship Program (corporate), and the California State Summer School for Mathematics and Science (COSMOS). For more details, visit the office in Engineering Building Unit 1, Room 1400, email ess@soe.ucsd.edu, or visit <http://www.jacobsschool.ucsd.edu/ESS/>.

Teams in Engineering Service (TIES): Jacobs School undergraduates can place their technical and creative skills to work for San Diego non-profit organizations through the new Teams in Engineering Service (TIES) Program. Through TIES, multidisciplinary teams of UCSD students design, build, and deploy projects that solve technology-based problems for local community organizations, and receive technical elective (or academic) credit. For details, visit <http://ties.ucsd.edu>.

Team Internship Program: This corporate-sponsored program gives students the opportunity to develop their engineering skills in a collaborative work environment that mirrors what they will encounter as they enter the workforce. In these full-time, competitive summer paid internships, students work on-site with industry partners as a systems-oriented solution team focused on a clearly defined and significant project. For details, visit http://www.jacobsschool.ucsd.edu/ESS/team_intern/.

The California State Summer School for Mathematics and Science (COSMOS) is a four-week residential pre-college academic experience in math, science, and engineering for top

high school students. Students participate in one of the following seven academic courses (or clusters): 1. Adventures in Media Computing; 2. Kinetic Sculpture and Clocks; 3. Living Oceans and the Impacts of Climate Change; 4. Earthquakes in Action; 5. The Molecular Biology Revolution; 6. The Physics of Waves and Stars; and 7. Bioengineering and Modeling of the Red Blood Cell Membrane. In summer 2005, one-third of the admitted students were awarded full financial aid. For more information, visit <http://www.jacobsschool.ucsd.edu/cosmos>.

COURSES

For course descriptions not found in the 2006–2007 General Catalog, please contact the department for more information.

100. Principles of Team Engineering (2)

Introduction to the practice of engineering as a team-driven profession. Levels of the design process, verbal and written communication, principles of teamwork, project management, ethics, legal issues, quality management, entrepreneurship, and community involvement. *Prerequisites:* concurrent enrollment in or completion of one of the following: DOC 2, CAT 2, HUM 2, MMW 2, MCWP 50, or WCWP 10B and one university-level mathematics course (or equivalent) or consent of instructor. Preference given to engineering majors. Not open to graduate students.

100L. Team Engineering Laboratory (2)

Faculty-directed, multi-disciplinary, long-term engineering projects. Students use their technical knowledge to design and develop solutions to real problems in consultation with customers such as community organizations. *Prerequisite:* ENG 100 (required prior to or in concurrent enrollment with ENG 100).

101. Team Engineering (4)

Fundamental principles of team engineering practice. Team formation and leadership, project creation and management, statistical tools for quality improvement, engineering business economics, law, and ethics. Interdisciplinary student teams will research, refine, and propose the design, manufacture, and marketing of a novel engineering product. Four hours of lecture. *Prerequisite:* a course in probability of statistics.

201. Venture Mechanics (4)

Examines the engineering/entrepreneurism interface. Discovery, development, and implementation of new product ideas. Understanding markets, competitors, and selling innovations. Cultivating effective working relationships between research, engineering, manufacturing, and marketing elements of an organization. Priority enrollment given to engineering majors.

202. Enterprise Dynamics (4)

Case studies of start-ups, strategic technology management, practice in use of industrial decision-making tools, and speakers from successful firms combined with experience in making management decisions dynamically in a competitive computer-simulated

enterprise. Field study of ongoing processes in a local high technology company. Priority enrollment given to engineering majors.

203. Applied Innovations (4)

Course includes the examination of business plans developed by early stage technology businesses. Students expected to work on the development of business plans for real, innovative business organizations. Will explore all of the business research and analysis that needs to be undertaken in order to develop a complete business plan. Completion of ENG 201 or ENG 202 preferred.

204. Theory and Practice of University Teaching (2)

Teaching and learning at the college/university level. Readings in engineering and cognitive science, plus opportunities for teaching and evaluating college level students. Covers theoretical underpinnings and the practice of teaching. Participation in some practicum teaching experience will be required.

Applied Mechanics and Engineering Sciences (AMES)

Program name changed to *Mechanical and Aerospace Engineering (MAE)*.

Bioengineering

Y. H. Zhao, Ph.D., *Associate Project Scientist*

Departmental Focus

Bioengineering is an interdisciplinary major in which the principles and tools of traditional engineering fields, such as mechanical, materials, electrical, and chemical engineering, are applied to biomedical problems. Engineering plays an increasingly important role in medicine in projects that range from basic research in physiology to advances in biotechnology and the improvement of health care delivery. By its very nature, bioengineering is broad and requires a foundation in the engineering sciences as well as in physiology and other biological sciences.

The overall mission of the Department of Bioengineering is to provide students with an education that enables successful, innovative, and lifelong careers in bioengineering industries and professions, including

- depth, breadth, and creativity in the central areas of bioengineering, its underlying mathematical, physical and biological sciences, and related technologies
- effective communication, learning, and teamwork skills that facilitate bioengineering practice, continued professional advancement, and adaptation
- a recognition of professional and social responsibilities, including sensitivity to ethical and health-related issues

At the undergraduate level, the department offers several four-year engineering majors. One leads to a **B.S. degree in Bioengineering**. This major prepares students for careers in the biomedical device industry and for further education in graduate school. Students completing the B.S. degree in *Bioengineering* have a broad preparation in traditional topics in engineering, allowing for a variety of career pathways. This program addresses the bioengineering topics of biomechanics, biotransport, bioinstrumentation, bioelectricity, biosystems, and biomaterials, and the complementary fields of systems and organ-level physiology. Education in these areas allows application of bioengineering and scientific principles to the development of medical devices and technologies that benefit human health by advancing

methods for effective diagnosis and treatment of disease. The bioengineering program is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (EAC/ABET).

The department also offers a **B.S. degree in Bioengineering: Biotechnology**. This major prepares students for careers in the biotechnology industry and for further education in graduate school. The curriculum has a strong engineering foundation with emphasis on biochemical process applications. This program addresses the bioengineering topics of biochemistry and metabolism, kinetics, biotransport, biosystems, bioreactors, bioseparations, tissue engineering, and the complementary fields of cellular physiology. Education in these areas allows application of bioengineering and physicochemical principles to cellular and molecular biology, with the applications that benefit human health. The *Bioengineering: Biotechnology* program is accredited by EAC/ABET.

In addition, the department offers a four-year major leading to a **B.S. degree in Bioengineering: Premedical**. This curriculum is designed to meet the requirements for admission to medical schools and is also suitable for those planning to enter graduate school in bioengineering, physiology, neurosciences, or related fields. This program provides a quantitative understanding of the engineering design of the body, as well as certain technologies used in medical practice. It has less engineering content but more biological sciences and is one of many majors that can serve as preparation for further training in medical, veterinary, or allied health professions. Some graduates of this program also go on to work in industry.

The department also offers a major leading to a **B.S. degree in Bioengineering: Bioinformatics**. Bioinformatics is the study of the flow of information (genetic, metabolic, and regulatory) in living systems to provide an understanding of the properties of cells and organisms. This major has been developed by the Departments of Bioengineering, Chemistry and Biochemistry, Computer Science and Engineering, and the Division of Biology. Students wishing to major in bioinformatics may apply through any of these departments or the division. The *Bioinformatics* major in Bioengineering emphasizes systems engineering and model-based approaches to interpreting and integrating bioinformatics

data. The *Bioinformatics* major prepares students for careers in the pharmaceutical, biotechnology, and biomedical software industries, and for further studies in graduate school.

The programs and curricula of bioengineering emphasize education in the fundamentals of engineering sciences that form the common basis of all engineering subspecialties. Education with this emphasis is intended to provide students with a solid engineering foundation for a career in which engineering practice may change rapidly. In addition, elements of bioengineering design are incorporated at every level in the curricula. This is accomplished by integration of laboratory experimentation, computer applications, and exposure to real bioengineering problems throughout the program. In the *Bioengineering* and *Bioengineering: Biotechnology* majors, students also work in teams on a senior design project to design a solution to a multidisciplinary bioengineering problem suggested by professionals in the bioengineering industry, academia, or clinical medicine.

At the graduate level, specialized curricula lead to the **M.S., M.Eng. (master of engineering)**, and **Ph.D.** degrees, as well as an integrated **B.S./M.S.** degree. In addition to the Ph.D. degree, the department offers a **Ph.D. degree with a specialization in Bioinformatics**. It is intended for students who have an interdisciplinary persuasion to work across computers, biology, medicine, and engineering. For further information on the specialization please consult with the Student Affairs Office. There are also **M.D./M.S., M.D./M.Eng.** and **M.D./Ph.D.** degrees offered in conjunction with UCSD Medical School, pending independent admission to the medical school. The M.Eng. degree is a terminal professional degree whereas the M.S. and Ph.D. degrees are research programs. (See section on master's degree programs.) The graduate programs are characterized by strong interdisciplinary relationships with the other engineering departments and Departments of Physics, Mathematics, Biology, Chemistry and Biochemistry, Medicine, and others, as well as with campus organizations such as the Whitaker Institute for Biomedical Engineering, Institute for Mechanics and Materials, and the School of Medicine.

The Undergraduate Program

Major Requirements

Specific course requirements for each of the majors are outlined in tables below. In addition to the required technical courses specifically indicated, a suggested scheduling of humanities and social science courses (HSS) is included in the curricula for students to use to meet college general-education requirements. To graduate, students must maintain an overall GPA of at least 2.0, and obtain at least a C- grade in each course required for the major. All courses required for the major must be taken for a letter grade.

Deviations from the required programs of study must be approved by the Undergraduate Studies Committee *prior* to students taking alternative courses. In addition, students must obtain departmental approval of technical elective (TE) course selections *prior* to taking the course. In the ABET-accredited programs, TE courses are restricted to those that meet ABET standards. Courses such as Bioengineering 196, 197, and 198 are encouraged, but they do not count as upper-division technical electives. Bioengineering 195 and 199 can be used as technical electives under certain conditions. Policy information may be obtained from the Student Affairs Office.

Students with accelerated academic preparation at admission to the university may vary the scheduling of lower-division courses such as mathematics, physics, and chemistry, but must first consult the department. Most lower-division courses are offered more than once each year to permit students some flexibility in their program scheduling. However, most upper-division bioengineering courses are taught only once each year. **Deviations in the scheduling of upper-division bioengineering courses are strongly discouraged, as such changes usually lead to a delay in graduation.** The curricula shown in the tables below are consistent with the current scheduling of classes.

Minors are not offered in bioengineering, and double major options are restricted. Students interested in double majors should consult the Student Affairs Office as early as possible.

General-Education/ College Requirements

For graduation, each student must satisfy general-education course requirements determined by the student's college, as well as the major requirements determined by the department. The six colleges at UCSD require different general-education courses, and the number of such courses differs from one college to another. Each student should choose his or her college carefully, considering the special nature of the curriculum and the breadth of general education.

The bioengineering programs allow for humanities and social science (HSS) courses so that students can fulfill their college requirements. In the bioengineering ABET-accredited programs, students must develop a program that includes a total of at least twenty-four units in the arts, humanities, and social sciences, not including subjects such as accounting, industrial management, finance, or personnel administration. It should be noted, however, that some colleges require more than the ten HSS courses indicated in the *Bioengineering, Bioengineering: Premedical, Bioengineering: Biotechnology, and Bioengineering: Bioinformatics* curriculum tables. Accordingly, students in these colleges may take longer to graduate than the four years indicated in the schedule. Students must consult with their colleges to determine which HSS courses to take.

Policies and Procedures

Transfer Student Admission into *Bioengineering, Bioengineering: Biotechnology, Bioengineering: Premedical, or Bioengineering: Bioinformatics*

Effective **fall 2004**, it is **strongly recommended** that transfer students complete the following course preparation for engineering majors*:

*Effective **fall 2006**, these courses will be **required** preparation for all engineering transfer students.

- Calculus I—for Science and Engineering (Math. 20A)
- Calculus II—for Science and Engineering (Math. 20B)
- Calculus and Analytic Geometry (Math. 20C)
- Differential Equations (Math. 20D)
- Linear Algebra (Math. 20F)
- Complete calculus-based physics series with lab experience (Physics 2A-B-C)
- Chemistry 6A (except Computer Science and Computer Engineering majors) **NOTE: Effective fall 2007**, a total of ten quarter-units of general chemistry (including laboratory) will be required for students applying to **all** majors offered by the **Department of Bioengineering**.
- Highest level of introductory computer programming language course offerings at the community college**

**Refer to the *UCSD General Catalog* to select major prerequisite requirements for computer language courses.

ADMISSION TO BIOENGINEERING OR BIOENGINEERING: BIOTECHNOLOGY

Because of heavy student interest in the *Bioengineering* and *Bioengineering: Biotechnology* majors, and the limited resources available to accommodate this demand, maintenance of a high quality program makes it necessary to limit enrollments to the most qualified students.

Freshman Students

Freshman students who have excelled in high school and have declared *Bioengineering* or *Bioengineering: Biotechnology* on their UCSD application are eligible for direct admission into those majors. These students will be notified directly by the Jacobs School of Engineering whether they have been admitted into their chosen major, based on admissions criteria and their ranking in the applicant pool. The only way for a student to become a *Bioengineering* or *Bioengineering: Biotechnology* major as a freshman at UCSD is to be directly admitted from high school at the time of entrance into UCSD.

Transfer Students

Admission of transfer applicants into *Bioengineering* or *Bioengineering: Biotechnology* is limited to those who have demonstrated a high level of achievement commensurate with the prospect of success in these majors. Successful applicants must have completed substantial training at the community college and must have achieved a high level of academic performance there. The required minimum of ninety quarter-units of calculus, twelve quarter-units of calculus-based physics, and the highest level computer science course offered at their community college. Beginning fall 2007, ten quarter units of general chemistry (including laboratory), will be part of the required transfer units.

Applicants seeking admission as transfer students will be considered for direct admission into the *Bioengineering* and *Bioengineering: Biotechnology* majors in the Department of Bioengineering. The only way to become a *Bioengineering* or *Bioengineering: Biotechnology* major is to be directly admitted as an entering transfer student. Although the actual required GPA cutoff depends on the number of openings, at least a 3.2 GPA in the community college transfer courses, and a 3.4 GPA in math, physics,

and computer science courses, are likely to be needed to gain admission.

ADMISSION TO BIOENGINEERING: PREMEDICAL

Freshman Students

Students intending to complete a *Bioengineering: Premedical* major are initially identified as *Pre-Bioengineering: Premedical* majors and admitted into a pre-major status. *Pre-Bioengineering: Premedical* majors who have achieved a GPA of 3.0 or better in the eight required pre-major courses (Mathematics 20A-B-C; Physics 2A-B; Chemistry 6A; MAE 9 or 10, and one other pre-bioengineering course by the end of the freshman year) are assured of admission into the *Bioengineering: Premedical* major. Students who have not completed the pre-major courses or achieved the necessary GPA for entry into the *Bioengineering: Premedical* major by the end of the freshman year may still enter the *Bioengineering: Premedical* major if these requirements have been satisfied before the end of the sixth quarter of study at UCSD. At the end of the appropriate quarter, students should contact the Student Affairs Office to check on their status and complete an Undergraduate Change of Major Request form to switch their status from "*Pre-Bioengineering: Pre-medical*" to "*Bioengineering: Premedical*". Students who enter UCSD as *Pre-Bioengineering: Premedical* majors and who are not admitted into the *Bioengineering: Premedical* major by the end of the sixth quarter of study at UCSD will automatically have their major converted from "*Pre-Bioengineering: Premedical*" to "Undeclared" by the department.

Transfer Students

Students are initially identified as "pre-majors," and will be admitted to the *Bioengineering: Premedical* major based on academic performance in ten prerequisite courses. It is expected that students will have completed or have in progress all ten prerequisite courses when applying to UCSD. Students are required to achieve a GPA of 3.0 or better in the ten prerequisite pre-major courses (Mathematics 20A-B-C; Physics 2A-B; Chemistry 6A; MAE 9 or 10, and three other courses required by the major) by the end of the third quarter of study at UCSD. **Note:** *Two of the prerequisite courses must be taken at UCSD, one of which must be an upper-division course.* Students need to contact the Student Affairs Office at the

end of their third quarter at UCSD to check on their status and complete an Undergraduate Change of Major Request form.

ADMISSION TO BIOENGINEERING: BIOINFORMATICS

As the number of pre-majors and majors will be limited as described in the catalog section on bioinformatics, student demand may exceed program capacity. Therefore, admission to the major is not guaranteed and will be based on academic excellence, as described below. Since bioinformatics is an interdisciplinary major, a steering committee involving faculty from the participating departments will select among the best candidates applying and recommended through each department, while insuring active participation of the departments and division offering the major.

Freshman Students

Bioengineering: Bioinformatics has been recently developed, and there is a multistep process into this major for students entering UCSD as freshmen. First, high school students should apply to UCSD for direct admission into the *Bioengineering: Bioengineering: Biotechnology*, or *Pre-Bioengineering: Premedical* major. Those admitted should then complete the freshman courses, prescribed in the preceding table for the *Bioengineering: Bioinformatics* major. After completing BILD 1, Chem. 6A, Math. 20B, and Math. 20C during the freshman year, such students can apply to *Pre-Bioengineering: Bioinformatics*. Admission will be based primarily on the GPA in the four preceding courses, but also on a written statement, completion of the other listed requirements, and overall academic excellence. Students approved for *Pre-Bioengineering: Bioinformatics* should then continue with the sophomore courses, prescribed in the preceding table, including CSE 11 and 12 which serve as two additional screening courses. By the end of the sophomore year, these students can then apply to major in *Bioengineering: Bioinformatics*. Admission to the *Bioengineering: Bioinformatics* major will be based on the GPA in all six screening courses. The final decision on admission to the pre-major and major will be made by the Bioinformatics Steering Committee, in consultation with the departments. Those students who are not selected for the *Bioengineering: Bioinformatics* major, will be eligible to remain in the

Department of Bioengineering in the status in which they were originally admitted.

Continuing Students

Students who have not declared the *Pre-Bioengineering: Bioinformatics* major, but who have completed the screening courses for the *Bioengineering: Bioinformatics* major, may apply for entry to the program after six quarters (the end of sophomore year). Students will be admitted on a space-available basis, after pre-majors have been screened for admission to the major.

Transfer Students

As *Bioengineering: Bioinformatics* has been recently developed, there is a multistep process into this major for transfer students. First, such students should complete at their community colleges as many of the following courses as possible, with a strong GPA that is competitive with that of UCSD students applying for entry into this major. The required courses include a year of calculus (equivalent to Math. 20A, 20B, and 20C), two quarters of biology (equivalent to BILD 1 and 2), a year of general chemistry with laboratory (equivalent to Chem. 6A, 6B, 6C, and 6BL), and the highest level programming courses (equivalent to CSE 11 and 12). Next, such students should apply to UCSD for direct admission into the *Bioengineering: Bioengineering: Biotechnology*, or *Pre-Bioengineering: Premedical* major. After completing the necessary screening requirements equivalent to those that apply for students entering UCSD as freshmen, such students can apply to *Pre-Bioengineering: Bioinformatics* and subsequently apply to major in *Bioengineering: Bioinformatics*. Admission will be based primarily on the GPA in the required screening courses, but also on a written statement, completion of the other listed requirements and overall academic excellence. The final decision on admission to the pre-major and major will be made by the Bioinformatics Steering Committee, in consultation with the departments. Those who are not selected for the *Bioengineering: Bioinformatics* major, will be eligible to remain in the Department of Bioengineering in the status in which they were originally admitted.

ACADEMIC ADVISING

Upon admission to the major, students are encouraged to seek advice from departmental staff in the Bioengineering Student Affairs Office,

Room 141, Powell-Focht Bioengineering Hall, to plan a program of study. Students are expected to chart their progress within their major. As the department may make a small number of course and/or curricular changes every year, it is imperative that students check their email for updates and consult a bioengineering undergraduate adviser on an annual basis.

To enroll in any courses required for a bioengineering major, a student must have satisfied prerequisite courses with a C- or better. (The department does not consider D or F grades as adequate preparation for subsequent material.) Also, the majority of bioengineering courses have enrollment restrictions and are open only to students who have been admitted to a bioengineering pre-major or major. Where these restrictions apply, the registrar will not enroll other students except by department approval. The department expects students to adhere to these policies and enroll in courses accordingly. Students are advised that they may be dropped from course rosters if prerequisites and/or performance standards have not been met.

Bioengineering courses are typically offered only once a year and therefore should be taken in the recommended sequence. If courses are taken out of sequence, it may not always be possible to enroll in courses as desired or needed for timely graduation. If this occurs, students should seek immediate departmental advice.

Programmatic advice may be obtained from the Student Affairs Office. In addition, technical advice may be obtained from a specific bioengineering faculty adviser assigned to each student upon admission to the major.

PROGRAM ALTERATIONS, EXCEPTIONS TO REQUIREMENTS, AND SPECIAL PROGRAMS

Exceptions to any program or course requirements are possible if approved by the Undergraduate Studies Committee *before* the courses in question are taken. Petitions may be obtained from the Bioengineering Student Affairs Office.

Institution of Capstone Design Course Sequence for Bioengineering and Bioengineering: Biotechnology

A capstone design course sequence has been approved for senior level students in the *Bioengineering* and *Bioengineering: Biotechnology* majors. The capstone design course sequence consists of a multiquarter upper-division

sequence of courses that totals ten quarter-units and includes (1) a series of four one-unit courses on selection (BENG 187A), design (BENG 187B), implementation (BENG 187C), and presentation (BENG 187D) of design projects, with consideration of professional issues, and (2) a sequence of two three-unit laboratory design projects, offered in many of the primary areas of bioengineering, including biomechanics (BENG 119AB), systems bioengineering (BENG 127AB, 128AB, 129AB), nanoscale and molecular bioengineering (BENG 139AB), organ system bioengineering (BENG 147AB, 148AB, 149AB), tissue engineering and regenerative medicine (BENG 169AB), and bioinstrumentation (BENG 179AB). The design projects and presentations will be performed by student teams in the course sequence.

The capstone design sequence is currently being phased in, and the Department of Bioengineering will make provisions to accommodate new and current majors. For students graduating in spring 2007 and subsequently, the design course sequence will be fully implemented.

Independent Study for Undergraduates

Under the guidance of a bioengineering faculty member, lower- and upper-division level bioengineering students have opportunities to participate in independent study and research.

Upper-division bioengineering students may take Bioengineering 199, Independent Study for Undergraduates. Lower-division bioengineering students may enroll in Bioengineering 99 which is similar to Bioengineering 199, except that less background in the curriculum is needed. These courses are taken as electives on a P/NP basis. Under certain conditions a Bioengineering 199 course may be used to satisfy upper-division technical elective course requirements for the major. Students interested in this alternative must identify a faculty member with whom they wish to work and propose a two-quarter research or study topic for *Bioengineering and Bioengineering: Biotechnology* majors, a one- or two-quarter research topic for *Bioengineering: Premedical* majors. Completion of two consecutive quarters of BENG 199 will satisfy both technical elective requirements in the *Bioengineering and Bioengineering: Biotechnology* majors. A *Bioengineering: Premedical* major may satisfy up to two of the three technical elective requirements in that major by completion of BENG 199 courses. After obtaining the faculty adviser's

concurrence on the topic and scope of the study, the student must submit a *Special Studies Course Form* (each quarter) and a *Bioengineering 199 as Technical Elective Contract* to the Undergraduate Studies Committee. These forms must be completed, approved, and processed prior to the beginning of the quarter in which the course is to be taken.

Teaching

Students interested in participating in the instructional activities of the department may take Bioengineering 195, Undergraduate Teaching as an elective on a P/NP basis. Under certain conditions, it may be used to satisfy upper-division technical elective course requirements for the *Bioengineering: Premedical* major. Policy in this regard may be obtained from the Student Affairs Office.

Integrated Bachelor's/ Master's Degree Program

An integrated program leading to a bachelor of science and a master of science degree in bioengineering is offered to undergraduate students who are enrolled in any of the major programs offered by the Department of Bioengineering. Students interested in obtaining the M.S. degree within one year following completion of the B.S. degree may apply to the department for admission to the program during the fourth quarter *prior* to the receipt of the B.S. degree. The program is open only to UCSD undergraduates.

To be eligible, students must have completed the first two quarters of their junior year in residence at UCSD and have an upper-division GPA of 3.5 or better and a 3.0 overall UC GPA. Twelve units of bioengineering graduate-level courses must be completed during the student's senior undergraduate year, *in addition* to the requirements for the bachelor's degree; these twelve units will count toward the requirements for the master's degree only and must be taken for a letter grade. It is the responsibility of the prospective B.S./M.S. student to select a bioengineering faculty member who is willing to serve as the student's adviser. The student will also arrange (with their faculty adviser's approval) a schedule of courses for the senior year that will fulfill the requirements for the B.S. degree while also serving the program planned for the M.S. degree. Students are expected to meet the requirements for the M.S. degree in one year

(three consecutive academic quarters) from the date of the receipt of the B.S. degree.

Industrial Internship Program and Graduate Industrial Training Program

The Department of Bioengineering offers two industrial programs: the **Industrial Internship Program** for undergraduates and the **Graduate Industrial Training Program** for graduate students. Both industrial programs are designed to complement the department's academic curriculum with practical industry experience. Students interested in these programs should contact the Bioengineering Industrial Internship Office (125 Powell-Focht Bioengineering Hall) well in advance of the quarter in which they would like to start their internship.

The Industrial Internship Program is available to undergraduate students who have completed all lower-division course requirements. Academic credit under Bioengineering 196, Bioengineering Industrial Internship, can be earned by spending ten weeks or more as interns in an industrial setting. The intern may be involved in a range of activities including design, analysis, manufacturing, testing, regulatory affairs, etc., under the direction of a mentor in the workplace. At the completion of the internship experience, students are required to submit a brief report to the mentor and faculty adviser describing their activities.

The Graduate Industrial Training Program is designed for students in the Master of Engineering Degree Program. This program serves to significantly enhance the professional development of M.Eng. students in preparation for leadership in the bioengineering industry. Students will complete an independent industrial bioengineering project in the setting of a company under the direction of an industrial and faculty adviser.

The Graduate Program

Admission to the M.Eng., M.S., and Ph.D., as well as to the Ph.D. with a specialization in bioinformatics programs, is in accordance with the general requirements of the graduate division. Applicants are required to have completed a B.S. and/or M.S. degree by time of admission in a branch of engineering, natural sciences, mathe-

matics, or quantitative life sciences. M.S. and Ph.D. applicants must have a GPA of 3.4 or better in technical courses. M.Eng. applicants should have competitive grades (greater than a 3.0 GPA). All applicants must submit GRE General Test scores, as well as three letters of recommendation from individuals who can attest to the academic or professional competence and to the depth of their interest in pursuing graduate study. Attention will be paid to the background and statement of purpose to ensure that they are consistent with the goals of the program. For example, whereas undergraduate research experience and the intention to pursue a research career or advanced studies are qualifications and interests typically well-suited to the M.S. program, industrial experience and the intention to pursue a professional career are better suited to the M.Eng. program.

A minimum score of 550 (paper based) or 213 (computer based) on the Test of English as a Foreign Language (TOEFL) is required of all international applicants whose native language is not English and whose undergraduate education was conducted in a language other than English. Students who score below 600 on the TOEFL examination are strongly encouraged to enroll in an English as a Second Language program before beginning graduate work. (UCSD Extension offers an English language program during the summer as well as the academic year.) Admission to the M.S. or Ph.D. degree program is designated when the applicants are judged to be appropriately qualified to pursue the degree requested at the time of application. Applicants are considered for admission for the fall quarter only.

A new graduate student who does not meet the prerequisites of required courses in the M.Eng., M.S., or Ph.D. curricula may have to take some basic courses to make up the deficiency. Thus, a student deficient in mathematics and mechanics may have to take Math. 110, CENG 101B or Bioengineering 103B, Bioengineering 110, 122A in the first year and Bioengineering 250A-B, 253 in the second year. A student deficient in biology and chemistry may have to take Chemistry 131 or Bioengineering 130 and BIPN 100, 102 in the first year and Bioengineering 230A-B-C in the second year.

Nonmatriculated students are welcome to seek enrollment in bioengineering courses via UCSD Extension's concurrent registration program, but such enrollment in a bioengineering graduate course must be approved by the instructor.

Master of Science Degree Programs

The **master of science (M.S.) program** is intended to extend and broaden an undergraduate background and equip the graduates with fundamental knowledge in bioengineering. It is intended for those students wishing to gain experience in academic research, especially those considering continuing graduate studies at the doctoral level. The M.S. degree may be terminal or may be obtained while pursuing a doctorate. Ph.D. students may obtain the M.S. degree by completing the course work requirements of the M.S. degree and by passing the Ph.D. departmental examination.

An individualized program is agreed upon by the student and a faculty adviser. The plan of study must involve both course work and research, culminating in the preparation of a thesis.

A total of **forty-eight units** of credit is required:

- **Thirty-six units in course work**
Nine courses, of which six are core courses, described below, and three are elective courses which can be drawn from Bioengineering course offerings, other engineering/science course offerings, and School of Medicine courses. *The faculty adviser must approve the three elective courses.*
- **Twelve units in research**
Bioengineering Research (BENG 299) under the direction of the chosen faculty research adviser.

A thesis based on the research is written and subsequently reviewed by the thesis adviser and two other faculty members appointed by the dean of Graduate Studies. The oral defense of the thesis constitutes the departmental master's exam.

REQUIRED CORE COURSES FOR M.S. DEGREE PROGRAM

Integrative Bioengineering

- BENG 250A. Biomechanics
- BENG 253. Biomedical Transport Phenomena
- A third required course chosen from a list of approved courses that satisfy the Integrative Bioengineering requirement i.e., BENG 250B. Advanced Biomechanics, BENG 280B. Biomedical Imaging, BENG 203/CSE 283. Bioinformatics III—Functional Genomics, or other core bioen-

gineering graduate courses that satisfy the Integrative Bioengineering requirement as approved by the Graduate Studies Committee. A list of applicable approved courses is available from the Bioengineering Student Affairs Office.

Life Science

- BENG 230A. Biochemistry
- BENG 230B. Cell and Molecular Biology
- BENG 230C/BIOM 271. Cardiovascular Physiology

Restrictions to core course work requirements are as follows:

1. Units obtained in Bioengineering 281 or 299 or 501 may not be applied toward the course work requirement.
2. No more than a total of eight units of Bioengineering 296 and 298 may be applied toward the course work requirement.
3. No more than twelve units of upper-division 100-level bioengineering courses may be applied toward the course work requirement.

Students must maintain at least a B average in the courses taken to fulfill the degree requirements.

MASTER'S TIME LIMIT POLICY

Full-time M.S. students are permitted seven quarters in which to complete all requirements. While there are no written time limits for part-time students, the department has the right to set individual deadlines if necessary.

A strong effort is made to schedule M.S.-level course offerings so that students may obtain their M.S. degree in one year of full-time study or two years of part-time study (*see regulations on part-time study under "Graduate Studies"*). Entering students who do not meet the prerequisites of these core courses may have to take some basic courses to make up the deficiency.

A candidate admitted for the M.S. degree who wishes to transfer to the Ph.D. program must consult the Student Affairs Office for the transfer before completion of the M.S. program.

CHANGE OF DEGREE AIM

Upon completion of the requirements for the M.S. degree, students are not automatically eligible for admission to the Ph.D. program.

M.S. candidates who wish to pursue a doctorate must submit an application for a change in status to the Graduate Studies Committee. The

application must be approved and signed by a bioengineering faculty member who expects to serve as the student's Ph.D. adviser. Applications will be reviewed by an ad hoc faculty committee. If the committee recommends that the student has good potential for success in the doctoral program, the student will be given the opportunity to take an oral examination equivalent to the Ph.D. Departmental Qualifying Examination. At the time of that exam, an assessment will be made concerning admission to the Ph.D. program.

A change of status from a master's program to the doctoral program requires that the student meet the minimal grade-point average required by the department of doctoral candidates.

Master of Engineering Degree Program

The department offers a **master of engineering (M.Eng.) degree**. The purpose of this degree is to prepare design and project engineers for careers in the biomedical and biotechnology industries within the framework of the graduate program of the Department of Bioengineering. It is a terminal professional degree in engineering which includes a recognition of the importance of breadth in technical knowledge, sufficient electives to address job-specific interests and professional skills such as economics, management, and business. It is intended for students who are primarily interested in engineering design, development, manufacturing, and management within an industrial setting.

The M.Eng. program is a flexible, course-intensive terminal professional degree, designed to be completed in one academic year of full-time study. It does not require a research project, a thesis, or a comprehensive exam. However, students do have the option of enrolling for technical credit in BENG 295, *Bioengineering Design Project and Industrial Training* under the direction of a faculty adviser. This is done by participating in the Graduate Industrial Training Program which allows students to work in an industrial setting on bioengineering projects in order to gain practical experience. (See "*Industrial Internship Program*" and "*Graduate Industrial Training Program*" sections of this catalog.) Students who may be interested in continuing to the Ph.D. program should apply to the M.S. program and not the terminal M.Eng. degree.

Students must select **six** courses from approved core areas, **three** additional approved

technical elective courses from any graduate engineering program, and **three** general elective courses which may be drawn from the bioengineering core areas, engineering technical electives or other nontechnical courses. Such core courses and technical and general electives are described below. In selecting breadth courses, students must be mindful of the prerequisite requirements for some of the courses listed. The lists below are based on the current graduate course offerings of the bioengineering and other engineering departments. The Graduate Studies Committee will review the M.Eng. course lists annually and update them as course offerings change. Students must maintain at least a B average in the courses taken to fulfill the degree requirements.

Required Core Courses for M.Eng. Program (Six Required)

- Biomechanics and Transport Phenomena—BENG 250A-B, 253
- Tissue Engineering—BENG 241A-B-C
- Life Science—BENG 230A-B-C
- Other approved core graduate courses taught by bioengineering faculty that satisfy the depth requirement of the M. Eng. degree as approved by the Graduate Studies Committee. A list of applicable approved courses is available from the Department of Bioengineering Student Affairs Office.

Examples of Technical Electives for M.Eng. (Three Required)

- BENG 202/CSE 282. Bioinformatics II: Sequence and Structure Analysis—Methods and Applications
- BENG 203/CSE 283. Bioinformatics III: Functional Genomics
- BENG 207. Neuromuscular Physiology and Biomechanics
- BENG 208. Topics w/BENG Lab
- BENG 209. Continuum Mechanics
- BENG 211/212/213. Systems Bioengineering
- BENG 230A-B-C-D. Biochem/Physiology
- BENG 238/MED 238. Molecular Biology of the Cardiovascular System
- BENG 241A-B-C. Tissue Engineering
- BENG 247A-B-C. Biophotonics
- BENG 250A-B, 253. Biomechanics
- BENG 267. Microcirculation in Health and Disease
- BENG 275. Computational Biomechanics

- BENG 280A-B. Biomedical Imaging
- BENG 295. Bioengineering Design Project (two-quarters, four units each)
- MAE 210A-B-C. Fluid Mechanics
- MAE 221A-B-C. Heat and Mass Transfer
- MAE 229A. Mechanical Properties
- MAE 231A-B-C. Solid Mechanics
- MAE 280A. Linear Systems Theory
- MAE 293. Advanced Computer Graphics for Engineers and Scientists
- MATS 253. Nanomaterials and Properties
- CSE 202. Algorithm Design and Analysis
- CSE 206B. Algorithms in Computational Biology
- CSE 210. Principles of Software Engineering
- CSE 250A. Artificial Intelligence
- ECE 239. Nanometer-Scale Probes and Devices
- ECE 251AN, BN. Digital Image Processing and Analysis

Examples of General Electives for M.Eng. (Three Required)

- BENG 161A-B-C. Biochemical, Bioreactor, and Metabolic Engineering
- BENG 186A-B-C. Principles of Biomaterials, Bioinstrumentation and Bioengineering Design.
- BENG 207. Topic Courses
- BENG 225. BioBusiness: Biotech Company
- Chem. 140A-B-C. Organic Chemistry
- CSE 167. Computer Graphics
- ENG 201, 202, 203. Entrepreneurism
- ECE 138L. Microstructuring Processing Technology Laboratory
- ECE 254. Detection Theory
- IR/PS Management: IRGN 420, 434, 438, 439, 442, 444, 445, IRCO 420, 421, 490G
- IR/PS International Issues: IRCO 401, IRGN 407, 411, 413, 418
- Econ 133. International Environmental Agreements
- Econ 172A-B-C. Introduction to Operations Research
- Econ 175. Financial Investments
- Econ 178. Economic and Business Forecasting

For other courses that address job-specific interests and professional skills such as economics, management, and business, consult with the Student Affairs Office.

- MAE 133. Finite Element Method
- MAE 152. Computer Graphics for Engineers and Scientists

MAE 290A. Numerical Methods in Science and Engineering
Phys. 206. Biophysics

Sample M.Eng. Program of Study

FALL	WINTER	SPRING
BENG 230A Tech Elec	BENG 230B BENG 250A	BENG 230C BENG 250C

Gen Elec	Tech Elec	Gen Elec

Doctoral Degree Program

The **bioengineering Ph.D. program** is intended to prepare students for a variety of careers in research and teaching. Therefore, depending on the student's background and ability, research is initiated as soon as possible. Bioengineering students have specific course requirements and must maintain a minimum grade-point average of 3.4 in these courses. Students, in consultation with their advisers, develop course programs that will prepare them for the Departmental Qualifying Examination and for their dissertation research. These programs of study and research must be planned to meet the time limits established to advance to candidacy and to complete the requirements for the degree. Doctoral students who have passed the Departmental Qualifying Examination may take any course for an S/U grade with the exception of courses required by the Departmental or Senate Qualifying Examination Committee. It is recommended that all bioengineering graduate students take a minimum of two courses (other than research) per academic year after passing the Departmental Qualifying Examination. Details can be obtained from the Student Affairs Office.

Doctoral Examinations

A bioengineering Ph.D. student is required to pass three examinations. The first is a Departmental Qualifying Examination which must be taken during the spring quarter of the first year of study. The exam is designed to ensure that all successful candidates possess a firm command of the engineering and life science subjects that form the foundations of bioengineering research and their integration at a level appropriate for the doctorate. It is administered by a committee designated by the department, consisting of departmental faculty members and, in some cases, one other faculty member from a related academic department (e.g., MAE, ECE, medicine). The scope of the oral examination includes the three broad

areas that form the core first-year Ph.D. curriculum, namely engineering foundations, life science, and integrative bioengineering. The purpose of the exam is not merely to recapitulate the content of first-year courses, but rather to establish that students are able to synthesize this knowledge and apply it to solve problems in contemporary bioengineering research.

1. Engineering Foundations

Defined by the content of three graduate engineering courses drawn from the following:

- BENG 202/CSE 282. Bioinformatics II: Sequence and Structure Analysis—Methods and Applications
- BENG 209/MAE 209. Continuum Mechanics Applied to Medicine/Biology
- BENG 211/212. Systems Biology
- BENG 275. Computational Biomechanics
- BENG 280A. Principles of Biomedical Imaging
- CSE 202. Algorithm Design and Analysis
- ECE 222A. Applied Electromagnetic Theory
- ECE 238A. Thermodynamics of Solids
- ECE 247A/BENG 247A. Advanced Biophotonics
- ECE 247B/BENG 247B. Bioelectronics
- ECE 251AN. Digital Signal Processing
- ECE 270A-B-C. Neurocomputing
- MAE 210A. Fluid Mechanics (best suited to students with some undergraduate background in mechanics or mechanical engineering)
- MAE 221A. Heat and Mass Transfer
- MAE 223. Computational Fluid Dynamics
- MAE 231A. Foundations of Solid Mechanics (best suited to students with some undergraduate background in mechanics or mechanical engineering)
- MAE 233A. Fracture Mechanics
- MAE 252. Chemical Reaction Engineering
- MAE 280A. Linear Systems Theory
- MAE 281A. Nonlinear Systems
- MAE 290A. Numerical Methods in Science and Engineering
- MATS 201B. Solid State Diffusion and Reaction Kinetics

Other topics may be approved by the Graduate Studies Committee

2. Integrative Bioengineering

Defined by the content of the following three bioengineering courses:

- BENG 250A. Biomechanics
- BENG 253. Biomedical Transport Phenomena
- A third required course chosen from a list of approved courses that satisfy the Integrative Bioengineering requirement i.e., BENG 203/CSE 283. Bioinformatics III: Functional Genomics, BENG 250B. Advanced Biomechanics, BENG 280B. Biomedical Imaging, BENG 213. Systems Biology and Bioengineering: Building-In-Silico models, ECE 247C/BENG 247C. Bionanotechnology, or other core bioengineering graduate courses that satisfy the Integrative Bioengineering requirement as approved by the Graduate Studies Committee. A list of applicable approved courses is available from the Department of Bioengineering Student Affairs Office.

3. Life Science

The life science subject area consists of the following topics: biochemistry, cell and molecular biology, organ physiology, and tissue engineering. These subject areas are defined by the contents of the following four courses:

- BENG 230A. Biochemistry or CHEM 211. Metabolic Biochemistry
- BENG 230B. Cell and Molecular Biology
- BENG 230C. Cardiovascular Physiology or BENG 230D. Respiratory and Renal Physiology
- BENG 241A. Foundations of Tissue Engineering

In addition to the above mentioned breadth requirements, students must complete the following courses in their second and subsequent years of study:

- At least two four-unit courses from an approved list that includes the continuation of Bioengineering Foundations course sequences, bioengineering graduate course sequences, other engineering/science course offerings, and School of Medicine courses. Students often take SOM courses to fulfill the second-year course requirement. The faculty adviser must approve the courses. Approved courses include: BENG 203, BENG 207, BENG 230D, BENG 247A-B-C, BENG 250B, BENG 238, MAE 231A-B-C, MAE 210A-B-C,

MAE 207, MAE 221A, MATS 253, ECE 251, Chem. 211, and MAM 238.

- One quarter of BENG 501. Teaching Experience
- BENG 281. Seminar in Bioengineering (F,W,S)

Courses comprising subject areas as well as subsequent requirements, and composition of the examination committee must be approved by the Graduate Studies Committee. Students are advised to seek such approval well in advance of their expected examination date, preferably while planning graduate studies.

Teaching experience is required of all bioengineering Ph.D. students prior to taking the Senate Qualifying Exam described below. Teaching experience is defined as service as a graduate student instructor in a course designated by the department. The total teaching requirement for new Ph.D. students is four quarters at 25 percent effort (ten hours per week). At least one quarter of teaching experience is required during the first year (prior to the departmental qualifying examination) and at least one quarter in the second year. Teaching experience can be fulfilled as a requirement for student support or taken as a course for academic credit (Bioengineering 501). Students must contact the Student Affairs Office to plan for completion of this requirement.

The **Senate Qualifying Examination** is the second examination required of bioengineering Ph.D. students. In preparation for this examination, students must have completed the Departmental Qualifying Examination and the departmental teaching experience requirement, obtained a faculty research adviser, and identified a topic for their dissertation research and made initial progress. At the time of application for advancement to candidacy, a doctoral committee responsible for the remainder of the student's graduate program is appointed by the Graduate Council. The committee conducts the Senate Qualifying Examination, during which students must demonstrate the ability to engage in thesis research. This involves the presentation and defense of a plan for the thesis research project. Upon successful completion of this examination, students are advanced to candidacy and are awarded the Candidate in Philosophy degree (see "Graduate Studies" section in this catalog).

The **dissertation defense** is the final Ph.D. examination. Upon completion of the dissertation research project, the student writes a dissertation that must be successfully defended in a public presentation and oral examination conducted by the doctoral committee. A complete copy of the student's dissertation must be submitted to each member of the doctoral committee approximately four weeks before the defense. It is understood that this copy of the dissertation given to committee members will not be the final copy, and that the committee members may suggest changes in the text at the time of the defense. This examination must be conducted after at least three quarters of the date of advancement to doctoral candidacy. Acceptance of the dissertation by the Office of Graduate Studies and Research and the university librarian represents the final step in completion of all requirements for the Ph.D.

There is no formal foreign language requirement for doctoral candidates. Students are expected to master whatever language is needed for the pursuit of their own research.

Ph.D. Time Limit Policy

Precandidacy status is limited to four years. Doctoral students are eligible for university support for six years. The defense and submission of the doctoral dissertation must be within seven years.

Evaluations

In the spring of each year, the faculty evaluate each doctoral student's overall performance in course work, research, and prospects for financial support for future years. A written assessment is given to the student after the evaluation. If a student's work is found to be inadequate, the faculty may determine that the student cannot continue in the graduate program.

COURSES

For course descriptions not found in the 2006–2007 General Catalog, please contact the department for more information.

Note: The department will endeavor to offer the courses as outlined below; however, unforeseen circumstances sometimes mandate a change of scheduled offerings. Students are strongly advised to check with the department's Student Affairs Office. This is of particular importance in planning schedules to satisfy graduation requirements.

The following schedule is tentative for the academic year 2006–07 only. The quarter in which a course is scheduled may differ in subsequent academic years. Students should consult TritonLink and the Student Affairs Office to obtain current information.

Prerequisites are enforced when students register for courses. Students who have satisfied prerequisites at another institution or by AP credit need to be pre-authorized to register in these courses. If pre-authorization is necessary, students should contact the Student Affairs Office before the scheduled registration period.

LOWER-DIVISION

1. Introduction to Bioengineering (1)

An introduction to the central topics of bioengineering in a seminar format. The principles of problem definition, team design, engineering inventiveness, information access, communication, ethics, and social responsibility will be emphasized. P/NP grading only. *Prerequisite: none. (W).*

87. Freshman Seminar (1)

The Freshman Seminar Program is designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminars are offered in all campus departments and undergraduate colleges, and topics vary from quarter to quarter. Enrollment is limited to fifteen to twenty students, with preference given to entering freshmen. (F,W,S)

90. Undergraduate Seminar (1)

Selected topics of interest to the faculty will be used to introduce students to bioengineering science and design concepts. (Not open to upper-division bioengineering students.) (F,W,S)

97. Internship/Field Studies (1-4)

An enrichment program available to a limited number of lower-division undergraduate students, which provides work experience with industry, government offices, and hospitals. The internship is coordinated through UCSD's Academic Internship Program under the supervision of a faculty member and an industrial, government, or hospital employee. *Prerequisites: lower-division standing, completion of thirty units of UCSD undergraduate study, a minimum UCSD GPA of 3.0, and a completed and approved "Special Studies" form. (F,W,S)*

98. Directed Group Study (1-4)

Directed group study on a topic or in a field not included in the regular department curriculum. (P/NP grades only.) *Prerequisites: lower-division standing, completion of thirty units of undergraduate study at UCSD with a UCSD GPA of at least 3.0 and consent of a Bioengineering faculty member; completed and approved Special Studies form.*

99. Independent Study for Undergraduates (4)

Independent reading or research by arrangement with a bioengineering faculty member. (P/NP grades only.) *Prerequisites: lower-division standing, completion of thirty units of undergraduate study at UCSD with a UCSD GPA of at least 3.0 and consent of a*

Bioengineering faculty member; completed and approved Special Studies form.

UPPER-DIVISION

100. Introduction to Bioengineering Design (4)

A general introduction to bioengineering design, including examples of engineering analysis and design applied to representative topics in biomechanics, bioinstrumentation, biomaterials, biotechnology, and related areas. A review of technological needs, design methodology, testing procedures, statistical analysis, governmental regulation, evaluation of costs and benefits, quality of life, and ethical issues. *Prerequisites:* BENG 1; grade of C- or better in Math. 21C or Math. 20C and Math. 21D or Math. 20D, and Physics 2C; majors only. (S)

101. Foundations of Biomedical Imaging (4)

An introduction to the principles and applications of biomedical imaging, with emphasis on the acquisition, processing, display of imagery, and design of imaging systems. Filtering, convolution, and Fourier methods. Microscopy, radiography, computed tomography, magnetic resonance, ultrasound, and nuclear imaging. *Prerequisites:* grade of C- or better in BENG 100; majors only or consent of department. (F)

103B. Bioengineering Mass Transfer (4)

Mass transfer in solids, liquids, and gases with application to biological systems. Free and facilitated diffusion. Convective mass transfer. Diffusion-reaction phenomena. Active transport. Biological mass transfer coefficients. Steady and unsteady state. Flux-force relationships. (Credit not allowed for both CENG 101C and BENG 103B.) *Prerequisites:* grade of C- or better in CENG 101A or BENG 112A; majors only or consent of instructor. (S)

109. Bioengineering Statics and Dynamics (4)

Newton's Laws. Static resultant forces and moments. Conservation laws of dynamics. Muscle and joint loads. Human body dynamics, locomotion, and clinical applications. Bodies in contact: friction, momentum, and impulse; impact and injury. Work, power, and energy relationships. Bioengineering design problems. *Prerequisites:* grade of C- or better in Math. 21D or Math. 20D; Physics 2C; majors only or consent of instructor. (W)

110. Continuum Mechanics (4)

An introduction to continuum mechanics of both living and nonliving bodies. The laws of motion and free-body diagrams. Stresses. Deformation. Compatibility conditions. Constitutive equations. Properties of common fluids and solids. Derivation of field equations and boundary conditions. Applications to bioengineering design. *Prerequisites:* grades of C- or better in Physics 2A, 2B, 2C, and BENG 109; majors only or consent of instructor. (F)

112A. Biomechanics (4)

Introduction to physiological systems, with emphasis on structure and function of major tissues and organs. Application of mechanics to understand the behavior of these tissues and organs at gross and microscopic levels. Bioelastic solids. Rigid body biomechanics. Biofluids. Bioengineering and medical design. *Prerequisites:* grade of C- or better in BENG 110; majors only or consent of instructor. (W)

112B. Biomechanics (4)

Biomechanics of living tissues with emphasis on continuum analysis of problems in biofluid and cell mechanics. Engineering design and problem solving in the biomechanics of mammalian tissues, especially those of the cardiovascular system. *Prerequisites:* grade of C- or better in BENG 112A; majors only or consent of instructor. (S)

119A. Design Development in Biomechanics (3)

Development of design project in biomechanics. *Prerequisites:* concurrent enrollment in BENG 187B; Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor. (F)

119B. Design Implementation in Biomechanics (3)

Implementation of design project in biomechanics. *Prerequisites:* grade of C- or above in BENG 119A; concurrent enrollment in BENG 187C; Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor. (W)

122A. Biosystems and Control (4)

Systems and control theory applied to bioengineering. Modeling, linearization, transfer functions, Laplace transforms, closed-loop systems, design and simulation of controllers. Dynamic behavior and controls of first and second order processes. PID controllers. Stability. Bode design. Features of biological controls systems. A simulation term project using MATLAB and an oral presentation are required. *Prerequisites:* grade of C- or better in MAE 140; majors only or consent of department. (W)

123. Systems Biology and Bioengineering (4)

Systems biology and bioengineering consists of (1) enumeration of biological components participating in a biological process, (2) reconstruction of interactions to form a network, (3) mathematical representation for analysis, interpretation, and prediction, (4) model validation and use in prospective design. *Prerequisites:* grade of C- or better in BIBC 100; majors only or consent of instructor. (W)

125. Modeling and Computation in Bioengineering (4)

Computational modeling of molecular bioengineering phenomena: excitable cells, regulatory networks, and transport. Application of ordinary, stochastic, and partial differential equations. Introduction to data analysis techniques: power spectra, wavelets, and nonlinear time series analysis. *Prerequisites:* grade of C- or better in BENG 122A or BENG 123; majors only or consent of instructor. (S)

126A. Design Development in Bioinformatics Bioengineering (3)

Development of design project in bioinformatics bioengineering. *Prerequisites:* concurrent enrollment in BENG 187B; Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor. (F)

126B. Design Implementation in Bioinformatics Bioengineering (3)

Implementation of design project in bioinformatics bioengineering. *Prerequisites:* grade of C- or above in BENG 126A; concurrent enrollment in BENG 187C; Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor. (W)

127A. Design Development in Molecular Systems Bioengineering (3)

Development of design project in molecular systems bioengineering. *Prerequisites:* concurrent enrollment in

BENG 187B; Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor. (F)

127B. Design Implementation in Molecular Systems Bioengineering (3)

Implementation of design project in molecular systems bioengineering. *Prerequisites:* grade of C- or above in BENG 127A; concurrent enrollment in BENG 187C; Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor. (W)

128A. Design Development in Genetic Circuits Bioengineering (3)

Development of design project in genetic circuits bioengineering. *Prerequisites:* concurrent enrollment in BENG 187B; Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor. (F)

128B. Design Implementation in Genetic Circuits Bioengineering (3)

Implementation of design project in genetic circuits bioengineering. *Prerequisites:* grade of C- or above in BENG 128A; concurrent enrollment in BENG 187C; Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor. (W)

129A. Design Development in Cell Systems Bioengineering (3)

Development of design project in cell systems bioengineering. *Prerequisites:* concurrent enrollment in BENG 187B; Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor. (F)

129B. Design Implementation in Cell Systems Bioengineering (3)

Implementation of design project in cell systems bioengineering. *Prerequisites:* grade of C- or above in BENG 129A; concurrent enrollment in BENG 187C; Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor. (W)

130. Molecular Physical Chemistry (4)

An introduction to physical principles that govern biological matter and processes. Thermodynamic principles and their molecular origin, structural basis of life and physical and conceptual models to illustrate life phenomena. (Credit allowed for one of the following: Chem. 126, Chem. 127, Chem. 131, or BENG 130.) *Prerequisites:* grade of C- or better in Chem 6B, Math. 20A, 20B, Physics 2A, 2B, 2C. (Physics 2C may be taken concurrently.); majors only or consent of instructor. (W)

139A. Design Development in Molecular Bioengineering (3)

Development of design project in molecular bioengineering. *Prerequisites:* concurrent enrollment in BENG 187B; Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor. (F)

139B. Design Implementation in Molecular Bioengineering (3)

Implementation of design project in molecular bioengineering. *Prerequisites:* grade of C- or above in BENG 139A; concurrent enrollment in BENG 187C; Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor. (W)

140A. Bioengineering Physiology (4)

Introductory mammalian physiology for bioengineering students, with emphasis on control mechanisms and engineering principles. Basic cell functions; biological control systems; muscle; neural; endocrine, and circulatory systems. Not intended for premedical bioengineering students. (Credit not allowed for both BIPN

100 and BENG 140A.) *Prerequisites: grade of C- or better in Chem. 6A, 6B, Physics 2A, 2B, 2C, BILD 1; majors only or consent of instructor.* (W)

140B. Bioengineering Physiology (4)

Introductory mammalian physiology for bioengineering students, with emphasis on control mechanisms and engineering principles. Digestive, respiratory, renal, and reproductive systems; regulation of metabolism, and defense mechanisms. (Credit not allowed for both BIPN 102 and BENG 140B.) *Prerequisite: grade of C- or better in BENG 140A; majors only or consent of instructor.* (S)

147A. Design Development in Neural Engineering (3)

Development of design project in neural engineering. *Prerequisites: concurrent enrollment in BENG 187B; Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor.* (F)

147B. Design Implementation in Neural Engineering (3)

Implementation of design project in neural engineering. *Prerequisites: grade of C- or above in BENG 147A; concurrent enrollment in BENG 187C; Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor.* (W)

148A. Design Development in Cardiac Bioengineering (3)

Development of design project in cardiac bioengineering. *Prerequisites: concurrent enrollment in BENG 187B; Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor.* (F)

148B. Design Implementation in Cardiac Bioengineering (3)

Implementation of design project in cardiac bioengineering. *Prerequisites: grade of C- or above in BENG 148A; concurrent enrollment in BENG 187C; Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor.* (W)

149A. Design Development in Vascular Bioengineering (3)

Development of design project in vascular bioengineering. *Prerequisites: concurrent enrollment in BENG 187B; Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor.* (F)

149B. Design Implementation in Vascular Bioengineering (3)

Implementation of design project in vascular bioengineering. *Prerequisites: grade of C- or above in BENG 149A; concurrent enrollment in BENG 187C; Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor.* (W)

160. Chemical and Molecular Bioengineering Techniques (4)

Introductory laboratory course in current principles and techniques of chemistry and molecular biology applicable to bioengineering. Quantitation of proteins and nucleic acids by spectrophotometric, immunological, and enzymatic methods. Separations and purification by centrifugation, chromatographic, and electrophoretic methods. *Prerequisites: BIBC 102, BICD 100, BENG 100, MAE 170; majors only or consent of instructor.* (S)

161A. Bioreactor Engineering (4)

Engineering, biochemical, and physiological considerations in the design of bioreactor processes: enzyme kinetics, mass transfer limitations, microbial growth,

and product formation kinetics. Fermentation reactor selection, design, scale-up, control. Quantitative bioengineering analysis and design of biochemical processes and experiments on biomolecules. *Prerequisites: grade of C- or better in Chem 114B or BIBC 102 (may be taken concurrently), BENG 122A or BENG 123, and BIBC 103 or BENG 160; majors only or consent of instructor.* (F)

161B. Biochemical Engineering (4)

Commercial production of biochemical commodity products. Application of genetic control systems and mutant populations. Recombinant DNA and eucaryotic proteins in *E. coli* and other host organisms. Product recovery operations, including the design of bioseparation processes of filtration, adsorption, chromatography, and crystallization. Bioprocess economics. Human recombinant erythropoietin as an example, from genomic cloning to CHO cell expression, to bioreactor manufacturing and purification of medical products for clinical application. *Prerequisites: grade of C- or better in BENG 161A; majors only or consent of instructor.* (W)

161C. Metabolic Engineering (4)

Engineering systems analysis of metabolic and regulatory processes. Use of high-throughput data for network reconstruction. Formulation of the stoichiometric matrix and its uses to determine steady state flux distributions. Kinetics of individual enzymatic reactions. Computer simulations of metabolic networks, systemic sensitivity coefficients, bifurcations to study dynamic network functions. Temporal decomposition of metabolic processes into multiple time scales and the physiologic roles of metabolic events in each scale. *Prerequisites: grade of C- or better in BENG 161B; majors only or consent of instructor.* (S)

162. Biotechnology Laboratory (4)

Laboratory practices and design principles for biotechnology. Culture of microorganisms and mammalian cells, recombinant DNA bioreactor design and operation. Design and implementation of biosensors. A team design-based term project and oral presentation required. *Prerequisites: grade of C- or above in MAE 170; BIBC 102; BIBC 103 or BENG 160; BENG 161A (may be taken concurrently); BENG 166A (may be taken concurrently); majors only or consent of instructor.* (F)

166A. Cell and Tissue Engineering (4)

Engineering analysis of physico-chemical rate processes that affect, limit, and govern the function of cells and tissues. Cell migration, mitosis, apoptosis, and differentiation. Dynamic and structural interactions between mesenchyme and parenchyme. The role of the tissue microenvironment including cell-cell interactions, extracellular matrix, and growth factor communication. The design of functional tissue substitutes including cell and material sourcing, scale-up and manufacturability, efficacy and safety, regulatory, and ethical topics. Clinical Applications. *Prerequisites: admission to the major or consent of department; senior standing and (BENG 103B OR BENG 112B).* (F)

168. Biomolecular Engineering (4)

Basic molecular biology; recombinant DNA technologies; design and manufacture of recombinant proteins and genetically engineered cells; architecture and mechanism of molecular nano-machineries that perform gene regulation, energy conversion, enzymatic catalysis, and active transport. *Prerequisites: BILD 1 and BENG 100; majors only or consent of instructor.* (S)

169A. Design Development in Tissue Engineering (3)

Development of design project in tissue bioengineering. *Prerequisites: concurrent enrollment in BENG 187B; Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor.* (F)

169B. Design Implementation in Tissue Engineering (3)

Implementation of design project in tissue bioengineering. *Prerequisites: grade of C- or above in BENG 169A; concurrent enrollment in BENG 187C; Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor.* (W)

172. Bioengineering Laboratory (4)

A laboratory course demonstrating basic concepts of biomechanics, bioengineering design, and experimental procedures involving animal tissue. Sources of error and experimental limitations. Computer data acquisition, modeling, statistical analysis. Experiments on artery, muscle and heart mechanics, action potentials, viscoelasticity, electrocardiography, hemorheology. *Prerequisites: grade of C- or better in MAE 170; junior or senior standing in the major, or consent of instructor.* (S)

173. Bioengineering Project Laboratory (4)

Applications of bioengineering concepts to the solution of practical and research problems. Planning, design, and testing of prototype devices. Term project and oral presentation are required. *Prerequisites: majors only; consent of instructor; BENG 112B, BENG 172.* (S)

179A. Design Development in Bioinstrumentation (3)

Development of design project in bioinstrumentation. *Prerequisites: concurrent enrollment in BENG 187B; Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor.* (F)

179B. Design Implementation in Bioinstrumentation (3)

Implementation of design project in bioinstrumentation. *Prerequisites: grade of C- or above in BENG 179A; concurrent enrollment in BENG 187C; Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor.* (W)

181/BIMM 181/CSE 181. Molecular Sequence Analysis (4)

(Cross-listed as BIMM 181 and CSE 181.) This course covers the analysis of nucleic acid and protein sequences, with an emphasis on the application of algorithms to biological problems. Topics include sequence alignments, database searching, comparative genomics, and phylogenetic and clustering analyses. Pairwise alignment, multiple alignment, DNA sequencing, scoring functions, fast database search; comparative genomics, clustering, phylogenetic trees, gene finding/DNA statistics. *Prerequisites: CSE 100 or Math. 176, CSE 101 or Math. 188, BIMM 100 or Chem. 114C; Bioinformatics majors only.* (S)

182/BIMM 182/CSE 182/CHEM182. Biological Databases (4)

(Cross-listed as BIMM 182, CSE 182, and Chem. 182.) This course provides an introduction to the features of biological data, how those data are organized efficiently in databases, and how existing data resources can be utilized to solve a variety of biological problems. Object oriented databases, data modeling and description. Survey of current biological database with respect to above, implementation of database focused on a biological topic. *Prerequisites: CSE 100 or Math. 176; Bioinformatics majors only.* (F)

183. Applied Genomic Technologies (4)

Principles and technologies for using genomic information for biomedical applications. Technologies will be introduced progressively, from DNA to RNA to protein to whole cell systems. The integration of biology, chemistry, engineering, and computation will be stressed. Topics include: Technology for the Genome, DNA Chips, RNA Technologies, Proteomic Technologies, Physiomic and Phenomic Technologies, Analysis of Cell Function. *Prerequisites: grade of C- or better in BIMM 100 or Chem 114C; BICD 110; Bioinformatics majors only.* (F)

184/BIMM 184/CSE 184/CHEM 184. Computational Molecular Biology (4)

(Cross-listed as BIMM 184, CSE 184, and Chem. 184.) This advanced course covers the application of machine learning and modeling techniques to biological systems. Topics include gene structure, recognition of DNA and protein sequence patterns, classification, and protein structure prediction. Pattern discovery, hidden Markov models/support vector machines/neural network/profiles, protein structure prediction, functional characterization of proteins, functional genomics/proteomics, metabolic pathways/gene networks. *Prerequisites: BENG 181 or BIMM 181 or CSE 181; BENG 182 or BIMM 182 or CSE 182 or CHEM 182; Bioinformatics majors only.* (W)

186A. Principles of Biomaterials Design (4)

Fundamentals of materials science as applied to bioengineering design. Natural and synthetic polymeric materials. Materials characterization and design. Wound repair, blood clotting, foreign body response, transplantation biology, biocompatibility of materials, tissue engineering. Artificial organs and medical devices. Government regulations. Patenting. Economic impact. Ethical issues. A term project and oral presentation are required. *Prerequisites: grade of C- or better in BENG 112B or senior standing in Bioengineering: Biotechnology major; majors only or consent of department.* (S)

186B. Principles of Bioinstrumentation Design (4)

Biophysical phenomena, transducers, and electronics as related to the design of biomedical instrumentation. Potentiometric and amperometric signals and amplifiers. Biopotentials, membrane potentials, chemical sensors. Electrical safety. Mechanical transducers for displacement, force, and pressure. Temperature sensors. Flow sensors. Light-based instrumentation. *Prerequisites: grade of C- or better in MAE 140 and MAE 170; majors only or consent of instructor.* (W)

186C. Bioengineering Design (4)

Development of a bioengineering design described in a formal engineering report. Engineering analysis and application of methodology from applied sciences, biology, physiology, and biochemistry. Analysis of economic, environmental, manufacture, ethical, health and safety, social issues, and application of governmental regulations. *Prerequisites: grade of C- or better in BENG 103B, BENG 106B, BENG 112B, BENG 186B, and MAE 130A; majors only or consent of instructor.* (W)

187A. Bioengineering Design Project: Planning (1)

Attendance at a weekly planning session on design projects. *Prerequisites: grade of C- or better in MAE 170; BENG 101 or BICD 100; BENG 112A or CENG 101A; BENG 140A or BICD 102; BENG 186B or BENG 123; Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor.* (S)

187B. Bioengineering Design Project: Development (1)

Development of original bioengineering design to solution of problem in biology or medicine. Analysis of economic issues, manufacturing and quality assurance, ethics, safety, government regulations, and patent requirements. Oral presentation and formal engineering reports. *Prerequisites: grade of C- or better in BENG 187A, and BENG 112B or BENG 123; concurrent enrollment in one of: BENG 119A, BENG 126A, BENG 127A, BENG 128A, BENG 129A, BENG 139A, BENG 147A, BENG 148A, BENG 149A, BENG 169A, or BENG 179A; Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor.* (F)

187C. Bioengineering Design Project: Implementation (1)

Approaches to implementation of senior design project, including final report. Teams will report on construction of prototypes, conduct of testing, collection of data, and assessment of reliability and failure. *Prerequisites: grade of C- or better in BENG 187B; concurrent enrollment in one of the following lab sections: BENG 119B, BENG 126B, BENG 127B, BENG 128B, BENG 129B, BENG 139B, BENG 147B, BENG 148B, BENG 149B, BENG 169B, or BENG 179B. Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor.* (W)

187D. Bioengineering Design Project: Presentation (1)

Oral presentations of design projects, including design, development, and implementation strategies and results of prototype testing. *Prerequisites: grade of C- or better in BENG 187C; Bioengineering or Bioengineering: Biotechnology majors only or consent of instructor.* (S)

191. Senior Seminar I: Professional Issues in Bioengineering (2)

Role of bioengineers in industry. Professional identity. Structure of bioengineering industries and product development process. Job market analysis. Current employment opportunities. Recruiting process and interview. Analysis of the employer. Marketing vs. engineering. Management by objective. Role of higher degrees. *Prerequisite: consent of instructor.* (W)

195. Teaching (2-4)

Teaching and tutorial assistance in a bioengineering course under supervision of instructor. Not more than four units may be used to satisfy graduation requirements. (P/NP grades only.) *Prerequisites: B average in the major and departmental approval.* (F,W,S)

196. Bioengineering Industrial Internship (1-4)

Under the joint supervision of a faculty adviser and industry mentor, the student will work at a bioengineering industrial site to gain practical bioengineering experience. No more than twelve units may be used to satisfy graduation unit requirements. (P/NP grades only.) *Prerequisites: consent of department and completion of all lower-division course requirements, including general-science requirements; some laboratory experience; completion of ninety units with a 2.5 GPA; and consent of a bioengineering faculty coordinator.* (F,W,S,Su)

197. Engineering Internship (1-4)

An enrichment program, available to a limited number of undergraduate students, which provides work experience with industry, government offices, hospitals, and their practices. Subject to the availability of positions, students will work in a local industry or hospital (on a salaried or unsalaried basis) under the

supervision of a faculty member and industrial, government, or hospital employee. Coordination of the Engineering Internship is conducted through UCSD's Academic Internship Program. Time and effort to be arranged. Units may not be applied towards major graduation requirements unless prior approval of a faculty adviser is obtained and internship is an unsalaried position. *Prerequisites: completion of ninety units with a 2.5 GPA and consent of a bioengineering faculty coordinator.* (F,W,S,Su)

198. Directed Group Study (1-4)

Directed group study, on a topic or in a field not included in the regular department curriculum, by arrangement with a bioengineering faculty member. (P/NP grades only.) *Prerequisites: consent of instructor; upper-division standing, completion of ninety units of UCSD undergraduate study, a minimum UCSD GPA of 2.5, and a completed and approved "Special Studies" form, "Application for UCSD Special Studies Course Enrollment."* (F,W,S)

199. Independent Study for Undergraduates (4)

Independent reading or research by arrangement with a bioengineering faculty member. (P/NP grades only.) *Prerequisites: consent of instructor; upper-division standing, completion of ninety units of UCSD undergraduate study, a minimum UCSD GPA of 2.5, and a completed and approved "Special Studies" form, "Application for UCSD Special Studies Course Enrollment."* (F,W,S,Su)

GRADUATE

202/CSE 282. Bioinformatics II: Sequence and Structure Analysis—Methods and Applications (4)

(Formerly BENG 202/CSE 257A.) Introduction to methods for sequence analysis. Applications to genome and proteome sequences. Protein structure, sequence-structure analysis. *Prerequisite: Pharm. 201 or consent of instructor.* (W)

203/CSE 283. Bioinformatics III: Functional Genomics (4)

Annotating genomes, characterizing functional genes, profiling, reconstructing pathways. *Prerequisites: Pharm. 201, BENG 202/CSE 282 or consent of instructor.* (S)

207. Topics in Bioengineering (4)

Course given at the discretion of the faculty on current topics of interest in bioengineering. (F,W,S)

208. Topics in Bioengineering with Lab (2 or 4)

A course to be given at the discretion of the faculty on topics of current interest in engineering science. This course is intended to be a lecture and lab companion topics course. *Prerequisite: consent of instructor.* (S)

209/MAE 209. Continuum Mechanics Applied to Medicine/Biology (4)

Introduction to the basic definitions of Continuum Mechanics and their mathematical formulation at the graduate level with applications to problems in medicine and biology. This course is intended for students with little or no background in mechanics; it is an introduction to the Biomechanics courses BENG 250 A-B in the Department of Bioengineering and to Solid and Fluid Mechanics courses MAE 210A and MAE 231A in the Department of Mechanical and Aerospace Engineering. This course should NOT be taken concurrently with MAE 210A or MAE 231A. *Prerequisite: consent of instructor.* (F)

211. Systems Biology and Bioengineering I: Biological Components (4)

Components of biological systems, their biochemical properties and function. The technology used for obtaining component lists. Relationship within and integration of component lists. Structured vocabularies and component ontologies. Algorithms for comparative approaches in deciphering and mining component lists. *Prerequisite: BENG 230A or BIMM 100 or consent of instructor. (F)*

212. Systems Biology and Bioengineering II: Network Reconstruction (4)

This course will cover the process of reconstructing complex biological reaction networks. Reconstruction of metabolic networks, regulatory networks and signaling networks. Bottom-up and top-down approaches. The use of collections of historical data. The principles underlying high-throughput experimental technologies and examples given on how this data is used for network reconstruction, consistency checking, and validation. *Prerequisite: BENG 211 or consent of instructor. (W)*

213. Systems Biology and Bioengineering III: Building and Simulating Large-scale In Silico Models (4)

Mathematical models of reconstructed reaction networks and simulation of their emergent properties. Classical kinetic theory, stochastic simulation methods and constraints-based models. Methods that are scalable and integrate multiple cellular processes will be emphasized. Existing genome-scale models will be described and computations performed. Emphasis will be on studying the genotype-phenotype relationship in an in silico model driven fashion. Comparisons with phenotypic data will be emphasized. *Prerequisite: BENG 212 or consent of instructor. (S)*

220. Project Design and Development (4)

The design of a research/development project for an industrial setting. Project objectives and organization, funding sources, review of previous developments in the area, proposal writing and review, project management, intellectual property, regulatory issues. The term project will involve preparing a small business proposal for development of a medical device. *Prerequisite: graduate standing in bioengineering. (W)*

225. BioBusiness: Starting, Growing, and Harvesting a Biotech Company (4)

Biotech is a special breed of business, especially in the start-up and early phases. Whether you are considering joining a biotech start-up or want to be successful in a life science organization, it pays to understand this unique business model. In this course, you will study and analyze (1) start-up proposals (2) the genesis of the biotech industry (3) biotech categories and growth strategies (4) the process of spinning out viable product concepts from academia (5) financing techniques (6) business development (7) acquisition/IPO valuation methods and (8) potentially disruptive technologies. The format is highly interactive and learning is enhanced by means of exercises, team presentations, and case studies. *Prerequisite: bioengineering MEng degree student or consent of instructor. (F,W)*

230A. Biochemistry (4)

A graduate course in biochemistry especially tailored to the requirements and background of bioengineering graduate students. It will cover the important macro- and small molecules in cells that are the major constituents, or that function as signaling molecules or molecular machineries. The structures, path-

ways, interactions, methodologies, and molecular designs using recombinant DNA technology will be covered. *Prerequisites: BIPN 100 and 102 or consent of instructor. (F)*

230B. Cell and Molecular Biology (4)

A general survey of structure-function relationships at the molecular and cellular levels. Emphasis on basic genetic mechanisms; control of gene expression; membrane structure, transport and traffic; cell signaling; cell adhesion; mechanics of cell division; and cytoskeleton. *Prerequisites: BIPN 100 and 102, and BENG 230A, or consent of instructor. (W)*

230C/BIOM 271. Cardiovascular Physiology (4)

Physical concepts of behavior of heart, large blood vessels, vascular beds in major organs and the microcirculation. Physical and physiological principles of blood flow, blood pressure, cardiac work, electrophysiology of the heart. Special vascular beds, including their biological and hemodynamic importance. Integration through nervous and humoral controls. *Prerequisites: BIPN 100, 102, and BENG 230B, or consent of instructor. (S)*

230D. Respiratory and Renal Physiology (4)

Mechanics of breathing. Gas diffusion. Pulmonary blood flow. Stress distribution. Gas transport by blood. Kinetics of oxygen and carbon dioxide exchange. VA/Q relations. Control of ventilation. Glomerular and proximal tubule functions. Water metabolism. Control of sodium and potassium in the kidney. *Prerequisites: BIPN 100, 102, and BENG 230C, or consent of instructor. (F,W,S)*

238/MED 238. Molecular Biology of the Cardiovascular System (4)

An overview of heart vascular development and associated diseases from a molecular biological perspective. Current approaches for generating mouse models of cardiovascular disease and recently developed technologies for physiological assessment in small animal models will be presented. (S)

241A. Foundations of Tissue Engineering Science (4)

Molecular and cell biological basis of tissue engineering science. Paracrine control of tissue growth and differentiation. Biomechanics and the molecular basis of cell-cell and cell-matrix interactions. Cell motility, mechanics of tissue growth and assembly, tissue repair. Mass transfer in tissues. Microcirculation of blood and lymph. *Prerequisite: BENG 230A or consent of instructor. (S)*

241C. Applications of Tissue Engineering Science (4)

A lecture/seminar series featuring speakers from academia and industry emphasizing principles of tissue engineering science as applied to clinical medicine and industrial production. Topics include skin replacement, guide tubes for nerve regeneration, blood substitutes, pancreatic islet replacement, and drug delivery devices, among others. Ethics of tissue replacement. *Prerequisite: BENG 241B or consent of instructor. (W)*

247A/ECE 247A. Advanced BioPhotonics (4)

Basic physics and chemistry for the interaction of photons with matter, including both biological and synthetic materials; use of photonic radiation pressure for manipulation of objects and materials; advanced optoelectronic detection systems, devices and methods, including time resolved fluorescent and chemiluminescent methods, fluorescent energy transfer

(FRET) techniques, quantum dots, and near-field optical techniques; underlying mechanisms of the light sensitive biological systems, including chloroplasts for photosynthetic energy conversion and the basis of vision processes. *Prerequisite: graduate standing. (F)*

247B/ECE 247B. BioElectronics (4)

Topics to be covered will include photolithographic techniques for high-density DNA microarray production, incorporation of CMOS control into electronic DNA microarrays, direct electronic detection technology used in microarrays and biosensor devices, and focus on problems related to making highly integrated devices (lab-on-a-chip, in vivo biosensors, etc.) form heterogeneous materials and components. *Prerequisite: graduate standing. (W)*

247C/ECE 247C. Bionanotechnology (4)

Topics include: nanosensors and nanodevices for both clinical diagnostics and biowarfare (bioterror) agent detection; nanostructures for drug delivery; nanoarrays and nanodevices; use of nanoanalytical devices and systems; methods and techniques for modification or functionalization of nanoparticles and nanostructures with biological molecules; nanostructural aspects of fuel cells and biofuel cells; potential use of DNA and other biomolecules for computing and ultra-high-density data storage. *Prerequisite: graduate standing. (S)*

250A. Biomechanics (4)

An introduction to biomechanics and transport phenomena in biological systems at the graduate level. Biorheology, biosolid mechanics, muscle mechanics, mass transfer, momentum transfer, energy transfer. *Prerequisites: CENG 101C and BENG 112B, or consent of instructor. (W)*

250B. Advanced Biomechanics (4)

Modern development of biomechanics at an advanced mathematical level. Selected topics in the dynamics of heart, pulsatile, blood flow, microcirculation, and muscle mechanics. *Prerequisite: BENG 253 or consent of instructor. (S)*

253. Biomedical Transport Phenomena (4)

Nonequilibrium thermodynamic analysis of transport phenomena. The osmotic effect. Diffusion and exchange in biological systems. *Prerequisite: consent of instructor. (W)*

267. Microcirculation in Health and Disease (4)

Structural and functional aspects of transport and blood-tissue exchange in key organs during circulatory shock, bacterial toxemia, hypertension. Physical and ultrastructural techniques used to analyze small-vessel dynamics. *Prerequisite: consent of instructor. (S)*

275. Computational Biomechanics (4)

Finite element methods for anatomical modeling and boundary value problems in the biomechanics of tissues and biomedical devices. Nonlinear biodynamics, heat flow, cardiac impulse propagation, anatomic modeling, and biomechanics. *Prerequisite: consent of instructor. (F)*

280A. Principles of Biomedical Imaging (4)

Fundamentals of Fourier transform and linear systems theory including convolution, sampling, noise, filtering, image reconstruction and visualization with an emphasis on applications to biomedical imaging. Examples from optical imaging, CT, MR, ultrasound, nuclear, PET, and radiography. *Prerequisite: consent of instructor. (F)*

280B. Comparative Biomedical Imaging (4)

Application of biomedical imaging to the measurement of structure, function, and dynamics of organ systems from the microscopic to the organ level. Emphasis on detailed evaluation and comparison of specific imaging modalities. *Prerequisite: consent of instructor.* (W,S)

281. Seminar in Bioengineering (1)

Weekly seminars by faculty, visitors, postdoctoral research fellows, and graduate students concerning research topics in bioengineering and related subjects. May be repeated for credit. This course does not apply toward the M.S. graduation requirements. (S/U grades only.) (F,W,S)

290. Bioengineering Special Graduate Seminar (1-2)

Seminars by faculty, visitors, post-doctoral research fellows, and/or graduate students in selected topic(s) in bioengineering and/or related subjects. This course does not apply toward M.S. graduation requirements.

295. Bioengineering Design Project and Industrial Training (4)

Independent work by graduate students focused on design, applied research, and professional experience. *Prerequisite: consent of department and bioengineering faculty adviser.* (F,W,S)

296. Independent Study (4)

Prerequisite: consent of instructor.

298. Directed Group Study (1-4)

Directed group study on a topic or in a field not included in regular department curriculum, by special arrangement with a faculty member. *Prerequisite: consent of instructor.* (S/U grade only.)

299. Graduate Research (1-12)

Independent work by graduate students engaged in research and writing theses. *Prerequisite: consent of instructor.* (S/U grades only.)

501. Teaching Experience (2)

Teaching experience in an appropriate bioengineering undergraduate course under direction of the faculty member in charge of the course. Lecturing one hour per week in either a problem-solving section or regular lecture. (S/U grade only.) *Prerequisites: consent of instructor and departmental approval.* (F,W,S)

Program Mission and Objectives

The Chemical Engineering Program has affiliated faculty from the Department of Mechanical and Aerospace Engineering, Department of Chemistry and Biochemistry, and the Department of Bioengineering. The program is administered by the Department of Mechanical and Aerospace Engineering. The curricula at both the undergraduate and graduate levels are designed to support and foster chemical engineering as a profession that interfaces engineering and all aspects of basic sciences (physics, chemistry, and biology).

The mission of the Chemical Engineering Program is to provide the next generation of chemical engineers with an excellent and inno-

vative chemical engineering education. The primary goals are:

- To provide chemical engineering students with a strong technical education and communication skills that will enable them to have successful careers in a wide range of industrial and professional environments.
- To prepare chemical engineering students for rapidly changing technological environments with the core knowledge central to multidisciplinary development and personal improvement throughout their professional careers.
- To instill in chemical engineering students a strong sense of humanistic values and professionalism such that they can conduct ethically and knowledgeably regarding technological impact in societal issues.

The curriculum is designed to prepare chemical engineering graduates for further education and personal development through their entire professional career. We strive to accomplish these goals by providing a rigorous and demanding curriculum that incorporates lectures, discussions, laboratory and project development experiences in basic sciences, mathematics, engineering sciences, and design as well as the humanities and social sciences. The main objectives are:

1. To enable students to understand and apply scientific principles and engineering and computational tools to analyze and solve problems of importance to society.
2. To enable students to apply appropriate experimental and statistical techniques in engineering analysis and applications.
3. To enable students to incorporate engineering economics and information from multiple disciplines in the analysis, synthesis, and design of engineering systems under realistic settings.
4. To enable students to acquire effective technical writing and oral communication skills necessary for successful participation on teams and in leadership positions.
5. To enable students to acquire the basic knowledge of chemical and process safety.
6. To instill in our students an understanding of their professional and ethical responsibilities.

Unless otherwise stated, the requirements and policies follow those of the Department of Mechanical and Aerospace Engineering. Only

features unique to Chemical Engineering are provided in this section.

The Undergraduate Program

The B.S. program in Chemical Engineering is accredited by the Engineering Accreditation Commission of the Accreditation Board of Engineering and Technology (ABET/EAC). The curriculum is tailored to provide breadth and flexibility by taking advantage of the strength of basic sciences and other engineering disciplines at UCSD. The intention is to graduate chemical engineers who are multidisciplinary and can work in a broad spectrum of industries rather than solely traditional chemical and petrochemical industries.

Areas of specialization are available whereby a graduate can be in a position for a career in environmental technology, microelectronic device fabrication, materials and polymer processing, pharmaceutical and biotechnology, biomedical engineering, energy and thermal systems, control and system engineering, and so forth.

For students who aspire to pursue a graduate degree and a career in research and development, the units in an area of specialization can be allocated to more fundamental science and engineering courses. These students are also encouraged to perform independent projects in one of the faculty research laboratories or groups.

Whether the career goal is industry, or graduate or professional school, the curriculum has a strong emphasis on developing problem-solving skills and the ability to think and learn independently. The capstone courses in this respect are the two senior design courses and the two very unique senior process laboratory courses where the environment is not unlike product development in either an industrial or academic setting. In each process development lab, students work in groups of three, on one project where they carry through the entire stages of project planning, experimental design and setup, execution, analysis, modification and improvement, and final project evaluation.

Major Requirements

For policies in general education requirements, professional licensing, academic advising, and application for admission to the major, please

refer to the section under Mechanical and Aerospace Engineering.

To receive a B.S. in Chemical Engineering, students must complete 194 units for graduation, which includes 44 units of general education (HSS) requirements of their Colleges and the ABET requirements in the arts, humanities, and social sciences. The balance consists of basic sciences (53 units), chemistry core (24 units), chemical engineering core (32 units), process laboratory and design (16 units), general engineering (12 units), and an area of specialization (12 units). Beyond the 53 units of basic sciences, the science and engineering courses total to 96 units. A one-unit introductory seminar (CENG1) is required of all incoming freshmen. The specific breakdown is as follows:

Basic sciences (53 units): This lower-division requirement includes 24 units of mathematics (Math. 20A-F), 14 units of physics (Phys. 2A-C, 2CL), and 15 units of chemistry (Chem. 6A-C, 6CL).

Chemistry core (24 units): This requirement must include two physical and one organic chemistry courses (Chem. 131, 132, 140A). Three additional advanced chemistry courses must be chosen among biochemistry, physical, organic, and inorganic chemistries. Two courses must be selected among Chem. 133, 135, 140B or 141B, 114A-B, 120A-B, and the third must be a laboratory course selected among Chem. 100B, 105, and 143A.

Chemical engineering core (32 units): This requirement covers chemical process modeling, solution thermodynamics, transport phenomena, chemical reaction engineering, process control, and unit operations (CENG 100, 101A-C, 102, 113, 120, 122).

Process laboratory and design (16 units): This requirement is crucial to fulfill the ABET design content (CENG 124A-B, 176A-B).

General engineering (12 units): This requirement covers basics in computer programming, probability and statistics, and instrumentation. The computer programming requirement can be satisfied with a course in either Fortran (MAE 10), C (MAE 9), or Java (CSE 8B or 11). If you have no programming experience, you need CSE 8A before 8B, but no credit is given for 8A alone. Probability and statistics can be satisfied with ECE 109 or a course with equivalent content. Instrumentation is satisfied with MAE 170.

Electives in an area of specialization (12 units): Electives are intended to broaden and enhance professional goals. They may be chosen to achieve either breadth or depth in one's education. These electives must be upper-division courses in either science or engineering. Suggestions are listed below. To ensure that your selections have proper engineering content, you must have faculty approval before you take these electives.

Biotechnology/Biochemical Engineering: Both Chem. 114A-B (or BIBC 100,102) must be taken as part of the advanced chemistry requirement. These two classes are prerequisites to the following courses: BIMM 100, BIMM 120, BIBC 110, Chem. 115, BE 160A-B-C.

Electronic Materials: Chem. 133 must be taken as part of the advanced chemistry requirement. This course is a prerequisite to the following courses: ECE 103, 134, 135A, 136, 136L.

Engineering Mechanics: MAE 130A-B, 131A, 160.

Engineering Science: MAE 105, 107, 140; Chem. 135, 136; Phys. 152 (requires Chem. 133).

Environmental Engineering: Chem. 149A-B, 173; MAE 120, 121, 122, 124, 125A-B.

Materials Science: Chem. 133 must be taken as part of the advanced chemistry requirement. This course is a prerequisite to the following courses: Chem. 107; Phys. 152; ECE 137; MS 201A-B-C, 205A, 227.

Process Control: ECE 101, 171A-B or MAE 140, 143A-B.

Thermal Engineering and Systems: MAE 118A-B-C, 110B, 113.

Independent Research: CENG 199 as equivalent to a senior thesis can be approved as equivalent to two elective courses (8 units). Consult department Student Affairs Office for details.

CHEMICAL ENGINEERING (ABET ACCREDITED PROGRAM)

FALL	WINTER	SPRING
FRESHMAN YEAR		
Math. 20A	Math. 20B	Math. 20C
Chem. 6A	Phys. 2A	Phys. 2B
MAE 9 ¹	Chem. 6B/6BL	Chem. 6C
HSS2	CENG 1	HSS
	HSS	

Engineering, Chemical Engineering Program (CENG)

SOPHOMORE YEAR

Math. 20D	Math. 20F	Math. 20E
Phys. 2C/2CL or Chem. 131	Chem. 132	Chem. 140A ³
HSS	CENG 100 HSS	Chem 141A CENG 102 HSS

JUNIOR YEAR

CENG 101A	CENG 101B	CENG 101C
Adv. Chem. ⁵	CENG 113	Adv. Chem.
MAE 170	Adv. Chem.	ECE 109
HSS	HSS	HSS

SENIOR YEAR

CENG 120 ⁴	CENG 124A	CENG 124B
CENG 122	CENG 176A	CENG 176B
AS ⁶	AS	AS
HSS	HSS ⁷	HSS

¹ MAE 9 can be replaced by MAE 10, CSE 8B or 11.

² Humanities and social sciences (HSS).

³ Chem. 141A is offered only in the fall quarter. Chem 133, 105, or 106 may fit in the spring quarter schedule.

⁴ If a student chooses process control as the area of specialization, CENG 120 can be replaced by a relevant course within the approved set of courses for specialization in process control.

⁵ Two advanced chemistry electives must be selected among Chem. 133, 135, 140B or 141B, 114A-B, and 120 A-B, and the third laboratory elective must be selected among Chem. 100B, 105, and 143A. Students who choose Chem. 105 must take Chem 6BL.

⁶ The electives in an area of specialization (AS) must be upper-division or graduate courses in engineering, natural sciences or mathematics based on the pre-approved sequences. Otherwise, the selections must receive prior approval of the department to meet ABET standards.

⁷ If students do not require these additional HSS courses to meet their College requirements, they may substitute an unrestricted elective in order to meet the minimum 194 unit graduation requirement. The twelfth HSS course is intended only for students who have additional College requirements to fulfill. To meet ABET requirements, students must have a total of twenty-four units in the arts, humanities, and social sciences, not including subjects such as accounting, industrial management, finance or personnel administration.

Transfer Students

The Chemical Engineering curriculum is designed to integrate four years of college educational experience. It is not easy for transfer students to complete the major requirements in only two additional years beyond their junior college work. However, if transfer students seek a College for which they already satisfy the general education requirements, have taken the lower-division science and mathematics, and have completed the organic chemistry requirement, then the rigorous first-year schedule below will permit them to graduate in two years.

Other students should consult their adviser for a transition program compatible with their junior college preparation.

Effective **fall 2004**, it is **strongly recommended** that transfer students complete the following preparation for engineering majors*:

- Calculus I—for Science and Engineering (Math. 20A)
- Calculus II—for Science and Engineering (Math. 20B)
- Calculus and Analytic Geometry (Math. 20C)
- Differential Equations (Math. 20D)
- Linear Algebra (Math. 20F)
- Complete calculus-based physics series with lab experience (Physics 2A-B-C)
- Chemistry 6A (except Computer Science and Computer Engineering majors)
- Highest level of introductory computer programming language course offerings at the community college**

*Effective **fall 2006**, these courses will be **required** preparation for all engineering transfer students. For major-specific advising, please contact the MAE undergraduate academic advising office.

**Refer to the *UCSD General Catalog* to select major prerequisite requirement for computer language courses.

FALL	WINTER	SPRING
JUNIOR YEAR		
Chem. 131	Chem. 132	Adv. Chem.
CENG 101A	CENG 100	CENG 102
MAE 170	CENG 101B	CENG 101C ECE 109 ¹

¹ Transfer students can petition with an equivalent course in probability and statistics if it is available at a junior college.

Integrated BS/MS Requirements

An integrated co-terminal program leading to a bachelor of science and a master of science degree in chemical engineering is offered to a student with junior standing who has an upper-division GPA of 3.5 or better and a 3.0 overall UCSD GPA. Details of the program are available from the MAE Graduate Student Affairs Office.

Program Accreditation

The B.S. program in chemical engineering is accredited by the Accreditation Board of Engineering and Technology (ABET/EAC).

Graduate Program

The Chemical Engineering Program offers graduate instruction leading to the **M.S. and Ph.D. degrees in engineering sciences** with a designated specialization in chemical engineering.

Admission is in accordance with the general requirements of the graduate division, which requires at least a B.S. in some branch of engineering, sciences, or mathematics; an overall GPA of 3.0; and three letters of recommendation from individuals who can attest to the academic or professional competence and to the depth of their interest in pursuing graduate study.

In addition, all applicants are required to submit GRE General Test Scores. A minimum score of 550 on the Test of English as a Foreign Language (TOEFL) is required of all international applicants whose native language is not English. Students who score below 600 on the TOEFL are strongly encouraged to enroll in an English as a second language program before beginning graduate work. UCSD Extension offers an excellent English language program during the summers as well as the academic year.

Applicants are judged competitively. Based on the candidate's background, qualifications, and goals, admission to the program is in one of three categories: M.S. only, M.S., or Ph.D. Admission to the M.S. only category is reserved for students for whom the M.S. degree is likely to be the terminal graduate degree. The M.S. designation is reserved for students currently interested in obtaining an M.S. degree but who at a later time may wish to continue in the doctoral degree program. Admission to the Ph.D. program is reserved for qualified students whose final aim is a doctoral degree.

Non-matriculated students are welcome to seek enrollment in graduate level courses via UC Extension's concurrent registration program, but an extension student's enrollment in a graduate course must be approved by the instructor.

Master's Degree Program

The M.S. program is intended to extend and broaden an undergraduate education with fundamental knowledge in different fields. The degree may be terminal, or obtained on the way to the Ph.D. The degree is offered under both the Thesis Plan I and the Comprehensive Examination Plan II.

M.S. Time Limit Policy: Full-time M.S. students are permitted seven quarters in which

to complete all requirements. While there is no written time limit for part-time students, the department has the right to intervene and set individual deadlines if it becomes necessary.

Course requirements: All M.S. students must complete a total of 48 units which include a core of five courses (20 units) chosen among fluid dynamics (CENG 210A, MAE 210B), heat and mass transfer (CENG 221AB), kinetics (CENG 252), and mathematics. To maintain a certain balance in the core, no more than two mathematics courses should be chosen among the choices of applied mathematics (MAE 294AB or Math. 210AB), and numerical mathematics (MAE 290AB or Math. 270AB).

No more than three courses (12 units) of upper-division courses may be applied toward the total course work requirement. No more than a total of 8 units of CENG 296 and 298 may be applied toward the course work requirement. Units in seminars (CENG 259) may not be applied toward the degree requirement.

Thesis Plan I: Completion of the research thesis (CENG 299) fulfills 12 units toward the total graduation requirement. The balance is made up of the five core courses (20 units) and additional four elective courses (16 units) subject to the restrictions described above.

Comprehensive Examination Plan II: This plan involves course work only and culminates in an oral comprehensive examination based on topics selected from the core courses. In addition to the five core courses (20 units), one must choose an additional seven electives (28 units) subject to the restrictions of CENG 259, 296, and 298 described above. Sample electives are listed in the table below. A student should consult their academic adviser to choose an appropriate course schedule, including alternatives in bioengineering, electrical and computer engineering, materials science, basic sciences, and mathematics.

FALL	WINTER	SPRING
CORE SELECTIONS		
CENG 210A	CENG 221A	CENG 221B

MS 201A	MS 201B	MS 201C
MAE 211	MAE 212	MAE 213
Math. 270A	Math. 270B	Math. 270C
Chem. 211	Chem. 212	Chem. 213

Change of Degree: Upon completion of the requirements for the M.S. degree, students

admitted as M.S. *only* or M.S. candidates are not automatically eligible for admission to the Ph.D. program.

M.S. *only* and M.S. candidates who subsequently wish to pursue a doctorate must submit an application for a change in status to their examining committee. The application, if approved by the committee, must be signed by a faculty member who expects to serve as the student's Ph.D. adviser. The student must also submit a general petition for graduate students to effect the change of status. If the student elects the comprehensive examination plan for the M.S. degree, the examining committee may recommend that the comprehensive examination may replace the preliminary qualifying examination expected of Ph.D. students.

Doctoral Degree Program

The Ph.D. program is intended to prepare students for a variety of careers in research and teaching. The emphasis is on research. In general, there are no formal course requirements. All students, in consultation with their advisers, develop appropriate course programs that will prepare them for the Preliminary Qualifying Examination and for their dissertation research. These programs must be planned to meet the time limits established to advance to candidacy and to complete the requirements of the degree.

All Ph.D. students are required to pass three examinations. The first is a Preliminary Qualifying Examination which should be taken within three to four quarters of full-time graduate study. The second is the Ph.D. Qualifying Examination. The last is the Dissertation Defense.

Preliminary Qualifying Examination: The examination is intended to determine a candidate's basic understanding of engineering fundamentals and the candidate's ability to pursue successfully a research project at a level appropriate for the doctorate. The scope of the examination is based on topics selected from the core curriculum as listed under the M.S. degree program. A candidate is expected to demonstrate knowledge equivalent to these courses and formal enrollment record is not a prerequisite. The format is an oral examination administered by a committee of three faculty members in the Chemical Engineering Program. The candidate should present to the committee, prior to the examination, the five core courses that will constitute the basis of the examination.

Depth Requirement: A candidate must have the ability to perform in-depth analysis in the dissertation topic. A candidate should consult with the thesis adviser to develop a proper course program if it is deemed necessary. Depending on an individual's background and the nature of the research problem, a candidate should either complete a set of a minimum of four courses or demonstrate to the thesis adviser the equivalent knowledge and ability.

Ph.D. Qualifying Examination: Prior to taking this examination, the candidate must have completed the departmental qualifying examination, obtained a faculty research adviser, and must have made initial progress on a chosen dissertation project. At the time of application for advancement to candidacy, a doctoral committee responsible for the remainder of the student's graduate program is appointed by the Graduate Council under the policy listed in the Graduate Studies section of the General Catalog. The committee conducts the Ph.D. Qualifying Examination, during which the student must demonstrate the ability to engage in thesis research. The process involves the presentation of a plan for the thesis research project. The committee may ask questions directly or indirectly related to the project and general questions that it determines to be relevant. Upon successful completion of the examination, subject to the UCSD time limit policy, the student is advanced to candidacy and is awarded the candidate in Philosophy degree (see "Graduate Studies" section in this Catalog).

Teaching Experience: Prior to the dissertation defense, the candidate must serve at least once as a teaching assistant with the responsibility to hold a problem-solving section one hour a week.

Dissertation Defense: This is the final Ph.D. examination. Upon completion of the dissertation research project, the candidate writes a dissertation that must be successfully defended in an oral examination and public presentation conducted by the doctoral committee. A complete copy of the student's dissertation must be submitted to each member of the doctoral committee four weeks before the defense. It is understood that this copy of the dissertation given to committee members will not be the final copy, and that the committee members may request changes in the text at the time of the defense. This examination may not be conducted earlier than three quarters after the date of advancement to doctoral candidacy.

Change of Degree: Upon completion of the requirements for the M.S. degree, students

admitted as M.S. *only* or M.S. candidates are not automatically eligible for admission to the Ph.D. program.

M.S. *only* and M.S. candidates who subsequently wish to pursue a doctorate must submit an application for a change in status to their examining committee. The application, if approved by the committee, must be signed by a faculty member who expects to serve as the student's Ph.D. adviser. The student must also submit a general petition for graduate students to effect the change of status. If the student elects the comprehensive examination plan for the M.S. degree, the examining committee may recommend that the comprehensive examination may replace the preliminary qualifying examination expected of Ph.D. students.

Doctoral Degree Program

The Ph.D. program is intended to prepare students for a variety of careers in research and teaching. The emphasis is on research. In general, there are no formal course requirements. All students, in consultation with their advisers, develop appropriate course programs that will prepare them for the Preliminary Qualifying Examination and for their dissertation research. These programs must be planned to meet the time limits established to advance to candidacy and to complete the requirements of the degree.

All Ph.D. students are required to pass three examinations. The first is a Preliminary Qualifying Examination which should be taken within three to four quarters of full-time graduate study. The second is the Ph.D. Qualifying Examination. The last is the Dissertation Defense.

Preliminary Qualifying Examination: The examination is intended to determine a candidate's basic understanding of engineering fundamentals and the candidate's ability to pursue successfully a research project at a level appropriate for the doctorate. The scope of the examination is based on topics selected from the core curriculum as listed under the M.S. degree program. A candidate is expected to demonstrate knowledge equivalent to these courses and formal enrollment record is not a prerequisite. The format is an oral examination administered by a committee of three faculty members in the Chemical Engineering Program. The candidate should present to the committee, prior to the examination, the five core courses that will constitute the basis of the examination.

Depth Requirement: A candidate must have the ability to perform in-depth analysis in the dissertation topic. A candidate should consult with the thesis adviser to develop a proper course program if it is deemed necessary. Depending on an individual's background and the nature of the research problem, a candidate should either complete a set of a minimum of four courses or demonstrate to the thesis adviser the equivalent knowledge and ability.

Ph.D. Qualifying Examination: Prior to taking this examination, the candidate must have completed the departmental qualifying examination, obtained a faculty research adviser, and must have made initial progress on a chosen dissertation project. At the time of application for advancement to candidacy, a doctoral committee responsible for the remainder of the student's graduate program is appointed by the Graduate Council under the policy listed in the Graduate Studies section of the General Catalog. The committee conducts the Ph.D. Qualifying Examination, during which the student must demonstrate the ability to engage in thesis research. The process involves the presentation of a plan for the thesis research project. The committee may ask questions directly or indirectly related to the project and general questions that it determines to be relevant. Upon successful completion of the examination, subject to the UCSD time limit policy, the student is advanced to candidacy and is awarded the candidate in Philosophy degree (see "Graduate Studies" section in this Catalog).

Teaching Experience: Prior to the dissertation defense, the candidate must serve at least once as a teaching assistant with the responsibility to hold a problem-solving section one hour a week.

Dissertation Defense: This is the final Ph.D. examination. Upon completion of the dissertation research project, the candidate writes a dissertation that must be successfully defended in an oral examination and public presentation conducted by the doctoral committee. A complete copy of the student's dissertation must be submitted to each member of the doctoral committee four weeks before the defense. It is understood that this copy of the dissertation given to committee members will not be the final copy, and that the committee members may request changes in the text at the time of the defense. This examination may not be conducted earlier than three quarters after the date of advancement to doctoral candidacy.

Acceptance of the dissertation by the Office of Graduate Studies and Research and the University Librarian represents the final step in completion of all requirements for the Ph.D. degree.

Ph.D. Time Limit Policy: Pre-candidacy status is limited to four years. Doctoral students are eligible for university support for six years. The defense and submission of the doctoral dissertation must be within seven years.

Annual Evaluation: In the spring of each year, the faculty adviser evaluates each doctoral student's overall performance in course work, research, and prospects for financial support for future years. A written assessment is given to the student after the evaluation. If a student's work is found to be inadequate, the faculty may determine that the student cannot continue in the graduate program.

COURSES

For course descriptions not found in the 2006–2007 General Catalog, please contact the department for more information.

All students enrolled in CENG courses or admitted to the CENG program (including pre-majors) are expected to meet prerequisite and performance standards, i.e., students may not enroll in any CENG courses or courses in another department which are required for the major prior to having satisfied prerequisite courses with a C– or better. (The program does not consider D or F grades as adequate preparation for subsequent material.) Additional details are given under the program outline, course descriptions, and admission procedures for the Jacobs School of Engineering in this catalog.

LOWER-DIVISION

1. The Scope of Chemical Engineering (1)
Demonstrations and discussions of basic knowledge and the opportunities in chemical engineering for professional development. Introduction to campus library and computer resources. Use of personal software tools such as spreadsheeting and student edition of MATLAB. *Prerequisites: none. (P/NP grading only.)*

UPPER-DIVISION

CENG 100. Process Modelling and Computation in Chemical Engineering (4)
Introduction to elementary numerical methods with applications to chemical engineering problems using a variety of problem solving strategies. Error analysis. Concepts of mathematical modeling, material and energy balances and probability and statistics with applications to design problems. *Prerequisites: admis-*

sion to the chemical engineering or bioengineering major only and grades of C– or better in MAE 9 or 10, and Chem. 6C.

CENG 101A. Introductory Fluid Mechanics (4)
(Formerly CENG 103A) Kinematics and equation of motion; hydrostatics; Bernoulli's equation; viscous flows; turbulence, pipe flow; boundary layers and drag in external flows; applications to chemical, structural, and bioengineering. Students may not receive credit for both MAE 101A and CENG 101A-103A. *Prerequisites: admission to the major and grades of C– or better in Phys. 2A and Math. 21D or 20D, and 20E or consent of instructor.*

CENG 101B. Heat Transfer (4)
(Formerly CENG 103C) Conduction, convection, radiation heat transfer; design of heat exchangers. Students may not receive credit for both MAE 101C and CENG 101B-103C. *Prerequisites: admission to the major and a grade of C– or better in CENG 103A-B or 101A.*

CENG 101C. Mass Transfer (4)
(Formerly CENG 103B) Diffusive and convective mass transfer in solids, liquids, and gases; steady and unsteady state; mass transfer coefficients; applications to chemical engineering and bioengineering. *Prerequisites: admission to the major and grade of C– or better in CENG 103A or 101A.*

CENG 102. Chemical Engineering Thermodynamics (4)
Thermodynamic behavior of pure substances and mixtures. Properties of solutions, phase equilibria. Thermodynamic cycles. Chemical equilibria for homogeneous and heterogeneous systems. *Prerequisites: grade of C– or better in CENG 100 and Chem. 131. Enrollment restricted to chemical engineering pre-majors and majors only.*

CENG 113. Chemical Reaction Engineering (4)
Principles of chemical reactor analysis and design. Experimental determination of rate equations, design of batch and continuous reactors, optimization of selectivity in multiple reactions, consideration of thermal effects and residence time distribution. Introduction to multi-phase reactors. *Prerequisites: grade of C– or better in CENG 100 and Chem. 6B. (Chem. 132 may be taken concurrently)*

CENG 120. Chemical Process Dynamics and Control (4)
Examination of dynamic linear and linearized models of chemical processes. Stability analysis. Design of PID controllers. Selection of control and manipulated variables. Root locus, Bode and Nyquist plots. Cascade, feed-forward and ratio controls. *Prerequisites: admission to the major and grades of C– or better in Math. 21D or Math. 20D. (Students may not receive credit for both MAE 141A or MAE 143B and CENG 120).*

CENG 122. Separation Processes (4)
Principles of analysis and design of systems for separation of components from a mixture. Topics will include staged operations (distillation, liquid-liquid extraction), and continuous operations (gas absorption, membrane separation) under equilibrium and non-equilibrium conditions. *Prerequisites: admission to the*

major and grades of C– or better in CENG 100, CENG 102 and CENG 103B or CENG 101C.

CENG 124A. Chemical Plant and Process Design I (4)
Principles of chemical process design and economics. Process flow diagrams and cost estimation. Computer-aided design and analysis. Representation of the structure of complex, interconnected chemical processes with recycle streams. Ethics and professionalism. Health, safety, and the environmental issues. *Prerequisites: admission to chemical engineering major and grades of C– or better in CENG 113 and CENG 122 or consent of instructor.*

CENG 124B Chemical Plant and Process Design II (4)
Engineering and economic analysis of integrated chemical processes, equipment, and systems. Cost estimation, heat and mass transfer equipment design and costs. Comprehensive integrated plant design. Optimal design. Profitability. *Prerequisites: admission to chemical engineering major and grade of C– or better in CENG 124A.*

CENG 176A. Chemical Engineering Process Laboratory I
Laboratory projects in the areas of applied chemical research and unit operations. Emphasis on applications of engineering concepts and fundamentals to solution of practical and research problems. *Prerequisites: admission to the major and grades of C– or better in CENG 113, CENG 122, and MAE 170 or consent of instructor.*

CENG 176B. Chemical Engineering Process Laboratory II
Training in planning research projects, execution of experimental work and articulation (both oral and written) of the research plan and results in the areas of applied chemical technology and engineering operations related to mass, momentum, and heat transfer. *Prerequisites: admission to the major and grade of C– or better in CENG 176A.*

CENG 199. Independent Study for Undergraduates (4-4)
Independent reading or research on a problem by special arrangement with a faculty member. *Prerequisite: consent of instructor. (P/NP Only).*

CHEMICAL ENGINEERING GRADUATE COURSES

CENG 205. Graduate Seminar in Chemical Engineering (1)
Each graduate student in CENG is expected to attend one seminar per quarter, of his or her choice, dealing with current topics in chemical engineering. Topics will vary. *Prerequisites: none.*

CENG 210A. Fluid Mechanics I (4)
(Cross-listed with MAE 210A.) Basic conservation laws, flow kinematics. The Navier-Stokes equations and some of its exact solutions, non-dimensional parameters and different flow regimes, vorticity dynamics. *Prerequisites: MAE 101AB and MAE 110A or consent of instructor.*

CENG 221A Heat Transfer (4)
(Cross-listed with MAE 221A.) Conduction, convection, and radiation heat transfer development of energy conservation equations. Analytical and numerical solutions to heat transport problems. Specific topics and applications vary. *Prerequisites: MAE 101ABC or CENG 103ABC or consent of instructor.*

CENG 221B Mass Transfer (4)

(Cross-listed with MAE 221B.) Fundamentals of diffusive and convective mass transfer and mass transfer with chemical reaction. Development of mass conservation equations. Analytical and numerical solutions to mass transport problems. Specific topics and applications will vary. *Prerequisites: MAE 101ABC or CENG 103ABC or consent of instructor.*

CENG 251. Thermodynamics (4)

Principles of thermodynamics of single and multi-component systems. Phase equilibria. Estimation, calculation, and correlation of properties of liquids and gases. *Prerequisite: consent of instructor.*

CENG 252. Chemical Reaction Engineering (4)

Analysis of chemical rate processes; complex kinetic systems. Chemical reactor properties in steady state and transient operations; optimal design policies. The interaction of chemical and physical transport processes in affecting reactor design and operating characteristics. Uniqueness/multiplicity and stability in reactor systems. Applications of the heterogeneous reactor systems. *Prerequisite: consent of instructor.*

CENG 253. Heterogeneous Catalysis (4)

Physics and chemistry of heterogeneous catalysis. Adsorption/desorption kinetics, chemical bonding, isotherms, kinetic models, selection of catalysts, poisoning, experimental techniques. *Prerequisite: consent of instructor.*

CENG 254. Biochemical Engineering Fundamentals (4)

Introduction to microbiology as relevant to the main topic, biological reactor analysis. Fermentation and enzyme technology. *Prerequisite: consent of instructor.*

CENG 255. Electrochemical Engineering (4)

Fundamentals of electrochemistry and electrochemical engineering. Structure of the double layer, cell potential and electrochemical thermodynamics, charge transfer kinetics, electrochemical transport phenomena, and introduction to colloidal chemistry. Applications such as corrosion prevention, electroplating, reactor design, batteries and fuel cells. *Prerequisite: consent of instructor.*

CENG 259. Seminar in Chemical Engineering (4)

Presentations on research progress by graduate students and by visitors from industrial and academic research laboratories. (May be repeated for credit. S/U grades only). *Prerequisite: consent of instructor.*

CENG 296. Independent Study in Chemical Engineering (4)

Independent reading or research on a problem as arranged by a faculty member. Must be taken for a letter grade only. *Prerequisite: consent of instructor.*

CENG 299. Graduate Research in Chemical Engineering (1-12)

S/U grades only. *Prerequisite: consent of instructor.*

The Undergraduate Program

DEGREE AND PROGRAM OPTIONS

The Department of Computer Science and Engineering (CSE) offers four degree programs: the B.S. degree in Computer Science, the B.A. degree in Computer Science, the B.S. degree in

Computer Engineering, and the B.S. degree in Computer Science with a Specialization in Bioinformatics. The B.A. degree in Computer Science is a flexible program that allows comprehensive studies beyond Computer Science and Engineering.

All CSE programs of study provide a broad and rigorous curriculum and are designed to provide students with the strong technical education necessary for placement in the competitive high-tech job market as well as for advanced studies in graduate school.

CSE offers courses in the following areas:

- Theory
- Artificial intelligence
- Software
- Hardware
- Computer security and cryptography
- Computer vision and graphics
- Databases and XML
- Systems and networking
- Bioinformatics
- Software engineering

In addition, CSE seniors can participate in challenging project-courses in: software systems, where teams create multiplayer games; Internet systems, where students create sophisticated Web transaction systems; and mobile wireless computing, where teams create applications for handheld devices.

The CSE department supports and encourages students to explore opportunities outside the classroom. Students assist in many CSE courses as paid lab tutors and readers, getting an excellent opportunity to interact more closely with faculty and other students. In addition, CSE students participate in research projects with graduate students and faculty in CSE, the San Diego Supercomputer Center, and the California Institute for Telecommunications and Information Technology (Calit2). Under the direction of our faculty, CSE students may also earn credit by participating in independent research projects. The CSE department has strong ties with local and national high-tech industry, where students can earn course credit while applying their academic knowledge toward exciting commercial technologies in paid internships.

B.S. Computer Science Program

The lower-division B.S. computer science program is designed to provide a strong foundation in mathematics, physics, electrical engineering, programming methodology and skills, and computer organization. Upper-division core courses deal with the theory and design of algorithms, hardware, and software. Students can gain additional breadth and/or depth in computer science and engineering by an appropriate selection of technical electives.

Students should have sufficient background in high school mathematics so that they can take freshman calculus in their first quarter. Courses in high school physics and computer programming, although helpful, are not required for admission to the program.

The department requires a total of 135 units for the B.S. computer science program (not including the general-education requirements). There are three varieties of requirements: lower-division, upper-division, and technical electives.

1. LOWER-DIVISION REQUIREMENTS

Students are expected to complete the following seventy units by the end of their sophomore year.

Computer Science and Engineering: CSE 8B or 11, 12, 20 or Math. 15A, CSE 21 or Math. 15B, CSE 30, and CSE 91; twenty-one units.

Note: Students without any programming experience are advised to take CSE 8A, CSE 8AL, and then CSE 8B, instead of CSE 11. CSE 11 is a faster paced version of CSE 8A, CSE 8AL, and CSE 8B, and requires experience in programming with a compiled language.

Mathematics: Math. 20A-B-C-D and 20F; twenty units.

Physics: Phys. 2A-B-C; 12 units. Math. 20A is a prerequisite for Phys. 2A. Students whose performance on the Department of Mathematics placement test permits them to start with Math. 20B or a higher course may take Phys. 2A in the fall quarter of the freshman year; all others will take Phys. 2A in the winter quarter of the freshman year. Students who received high grades in both calculus and Physics in high school may substitute the major's sequence, Phys. 4A-B-C for Phys. 2A-B-C.

Physics Lab: Phys. 2BL or 2CL or 2DL; two units. The lab course should be taken concurrently with the Phys. 2 or Phys. 4 sequence.

Introduction to Electrical Engineering: ECE 53A-B; eight units. ECE 53A-B are courses that give a comprehensive introduction to electrical engineering.

Probability and Statistics: Math. 183; four units.

Science/Mathematics Elective: Students are required to take one of the following four-unit science/mathematics courses: Phys. 2D, Math. 20E, Chem. 6A, BILD 1, 10, 12, 14, 30.

2. UPPER-DIVISION REQUIREMENTS

All B.S. computer science students are required to take CSE 100 or Math. 176, CSE 101 or Math. 188, CSE 105 or Math. 166, CSE 120, 130, 131A-B, 140, 140L, 141 and 141L; forty units.

Students are expected to complete almost all of these courses by the end of their junior year. If students want to accelerate their program, they should consider taking CSE 100 or Math. 176, CSE 105, and/or CSE 140 and 140L in the sophomore year.

3. TECHNICAL ELECTIVES

B.S. computer science students are required to take six technical electives for a total of twenty-four units. Four electives must be computer science and engineering upper-division or graduate courses.

The remaining two technical electives can be chosen from the wider set of courses that includes computer science and engineering upper-division courses, graduate courses, and other electives as listed under the section titled **Electives**. Other restrictions in the selection of technical electives are also given in the section **Electives**.

B.S. Computer Engineering Program

(Curriculum is the same in both the CSE and ECE departments.)

The B.S. computer engineering program is jointly administered by the Departments of Computer Science and Engineering and Electrical and Computer Engineering. Students wishing to take the computer engineering program must be admitted to one of the departments.

The lower-division computer engineering program is designed to provide a strong foundation in mathematics, physics, electrical engineering, programming methodology and skills, and computer organization. Upper-division core courses deal with the theory and design of algorithms, hardware and software, as well as electronic systems. Students can gain additional breadth and/or depth in computer science and engineering by an appropriate selection of technical electives.

Students should have sufficient background in high school mathematics so that they can take freshman calculus in their first quarter. Courses in high school physics and computer programming, although helpful, are not required for admission to the program.

B.S. computer engineering program requires a total of 147 units (not including the general-education requirements). There are three varieties of requirements: lower-division, upper-division, and technical electives.

1. LOWER-DIVISION REQUIREMENTS

Students are expected to complete the following seventy units by the end of their sophomore year.

Computer Science and Engineering: CSE 8B or 11, 12, 20 or Math. 15A, CSE 21 or Math. 15B, CSE 30, and CSE 91; twenty-one units.

Note: Students without any programming experience are advised to take CSE 8A, CSE 8AL, and then CSE 8B, instead of CSE 11. CSE 11 is a faster paced version of CSE 8A, CSE 8AL, and CSE 8B, and requires experience in programming with a compiled language.

Mathematics: Math. 20A-B-C-D and 20F; twenty units.

Physics: Phys. 2A-B-C-D; sixteen units. Math. 20A is a prerequisite for Phys. 2A. Students whose performance on the Department of Mathematics placement test permits them to start with Math. 20B or a higher course may take Phys. 2A in the fall quarter of the freshman year; all others will take Phys. 2A in the winter quarter of the freshman year. Students who received high grades in both calculus and physics in high school may substitute the major's sequence, Phys. 4A-B-C-D for Phys. 2A-B-C-D.

Physics Lab: Phys. 2BL or 2CL or 2DL; two units. The lab courses should be taken concurrently with the Phys. 2 or Phys. 4 sequence.

Introduction to Electrical Engineering: ECE 53A-B; eight units. ECE 53A-B are courses that give a comprehensive introduction to electrical engineering.

Probability and Statistics: ECE 109; four units. This course can be taken in the sophomore year.

2. UPPER-DIVISION REQUIREMENTS

All B.S. computer engineering students are required to take CSE 100 or Math. 176, CSE 101 or Math. 188, CSE 105 or Math. 166, CSE 120, 131A-B, 140, 140L, 141, and 141L; thirty-six units.

In addition, all B.S. computer engineering students have to fulfill the following upper-division ECE requirements.

Linear Systems: ECE 101, ECE 171A or 161A; eight units. The department recommends that these courses be taken in the junior year.

Electronic Circuits and Systems: ECE 102, ECE 108; eight units. The department recommends that these courses be taken in the junior year.

If students want to accelerate their program, they should consider taking CSE 100 or Math. 176, CSE 105 or Math. 166, and/or CSE 140 and 140L in the sophomore year.

3. TECHNICAL ELECTIVES

All B.S. computer engineering students are required to take six technical electives for a total of twenty-four units. One of these courses must be either ECE 111 or ECE 118. Of the remaining five courses, four must be computer science and engineering or electrical and computer engineering upper-division or graduate courses.

The remaining course can be any computer science and engineering or electrical and com-

puter engineering upper-division or graduate course, or any other course listed under the section titled **Electives**. Other restrictions in the selection of technical electives are also given in the section **Electives**.

B.S. Computer Science with a Specialization in Bioinformatics

The explosion in biological knowledge spawned by the various genome projects has created entirely new fields and industries, and a need for trained computational biologists who are familiar with biology, mathematics, and computer sciences. The Computer Science and Engineering Department offers rigorous, interdisciplinary training in the new and rapidly evolving field of bioinformatics. Bioinformatics refers to advanced computational and experimental methods that model the flow of information (genetic, metabolic, and regulatory) in living systems to provide an integrated understanding of the system properties of organisms. This interdisciplinary major will be offered by three other programs (Division of Biology, Department of Chemistry and Biochemistry, and Department of Bioengineering). The computer science and engineering requirements comprise of 152 units

to be taken from the divisions of physical sciences, biology, and engineering.

1. LOWER-DIVISION REQUIREMENTS

Lower-division requirements, 64 units: Students are expected to complete all lower-division requirements by the end of their sophomore year.

1. Math. 20A, 20B, 20C, 20F, (16 units)
2. Chemistry 6A, 6B, 6C, and one lab (15 units)
3. BILD 1, BILD 2, and BILD 94 (9 units)
4. CSE 11, CSE 12, and CSE 21 or Math. 15B (12 units)
5. Physics 2A, 2B, 2C (12 units)

2. UPPER-DIVISION REQUIREMENTS

Upper-division requirements, 88 units (includes five CSE technical electives)

1. CSE 100 or Math. 176 (Data Structures), (4 units)
2. CSE 101 or Math. 188 (Algorithms), (4 units)
3. Chemistry 140A-140B (Organic Chemistry), (8 units)
4. Chemistry 114B (Biochemical Energetics and Metabolism) or BIBC 102 (Structural and Metabolic Biochemistry) (4 units)
5. BIBC 103 (Biochemical Techniques), (4 units)
6. BICD 100 (Genetics), (4 units)
7. BIMM 100 (Molecular Biology) or Chemistry 114D (Molecular and Cellular Biochemistry), (4 units)
8. BIMM 101 (Recombinant DNA Lab), (4 units)
9. BICD 110 (Cell Biology), (4 units)
10. BIBC 110 (Physical Biochemistry) or Chemistry 127 (Physical Chemistry), (4 units)
11. Five additional CSE upper-division electives (electives 1, 2, 3, 4, and 5).

At least one course from each of the three groups for a total of five electives:

Group I: CSE 30, 111, 131A, 131B, 134A

Group II: CSE 105, 150, 151, Math. 184A

Group III: CSE 132A, 132B, 133

The bioinformatics series comprised of the following six courses, 24 units:

12. CSE 181 or BIMM 181 or BENG 181 (Molecular Sequence Analysis), (4 units)

13. CSE 182 or BIMM 182 or BENG 182 or Chem. 182 (Biological Databases), (4 units)
14. BENG 183 (Applied Genomic Technologies), (4 units)
15. CSE 184 or BIMM 184 or BENG 184 (Computational Molecular Biology), (4 units)
16. BIMM 185 (Bioinformatics lab), (4 units)
17. Math. 186 (Probability and Statistics), (4 units)

3. B.S. COMPUTER SCIENCE WITH A SPECIALIZATION IN BIOINFORMATICS, SAMPLE PROGRAM

FALL	WINTER	SPRING
FRESHMAN YEAR		
CSE 8A/8AL+8B or 11 ¹	CSE 12	BILD 94 ²
Math. 20A	Math. 20B	Math. 20C
Chem. 6A	Chem. 6B	Chem. 6C
GE 1	BILD 1	Chem. 6BL
	GE 2	GE 3
SOPHOMORE YEAR		
CSE 21 or Math. 15B	Math. 20F	Chem. 140B

BICD 100	Math. 186	BIMM 101
GE 7	Math. 186	BICD 110
GE 8	BIBC 102 or Chem. 114B	BICD 110 or Chem. 127
	BIMM 100 or Chem. 114D	
SENIOR YEAR		
CSE 182	CSE 184	BIMM 185
BENG 183	Elec. 2	Elec. 4
Elec. 1 ⁵	Elec. 3	Elec. 5
GE 9	GE 10	GE 11

¹ Students may take the slower paced version, CSE 8A + CSE 8AL + CSE 8B, instead of CSE 11.

² BILD 94 (1 unit seminar) is recommended in students first spring quarter of study at UCSD. This course gives an overview of issues and topics in bioinformatics.

³ CSE 30 prerequisite will be waived.

⁴ New courses for the bioinformatics program: CSE 181 is cross-listed with BIMM 181 and BENG 181; CSE 182 is cross-listed with BIMM 182, Chem 182, and BENG 182; CSE 184 is cross-listed with BIMM 184 and BENG 184; and (BENG 183, BIMM 185, and Math. 186 are not cross-listed with any other courses).

⁵ Students must complete five CSE technical electives from the approved list.

B.A. Computer Science Program

The B.A. computer science program gives students more latitude in designing their course of study. The lower-division program is designed to provide a strong foundation in mathematics, physics, programming methodology and skills, and computer organization. Upper-division core courses deal with the theory and design of algorithms, hardware, and software. Students can gain additional breadth and/or depth in computer science and engineering by an appropriate selection of technical electives. By requiring fewer technical electives, the B.A. computer science program serves those students desiring more time for undergraduate studies outside their major subject.

The department requires a total of 105 units for the B.A. computer science program (not including the general-education requirements). There are three varieties of requirements: lower-division, upper-division, and technical electives.

1. LOWER-DIVISION REQUIREMENTS

Students are expected to complete the following fifty-two units by the end of their sophomore year.

Computer Science and Engineering: CSE 8B or 11, 12, 20 or Math. 15A, CSE 21 or Math. 15B, CSE 30, and CSE 91; twenty-one units.

Note: Students without any programming experience are advised to take CSE 8A, CSE 8AL, and then CSE 8B, instead of CSE 11. CSE 11 is a faster paced version of CSE 8A, CSE 8AL, and CSE 8B, and requires experience in programming with a compiled language.

Mathematics: Math. 20A-B-C-D and 20F; twenty units.

Physics: Phys. 2A-B-C; twelve units. Math. 20A is a prerequisite for Phys. 2A. Students whose performance on the Department of Mathematics placement test permits them to start with Math. 20B or a higher course may take Phys. 2A in the fall quarter of the freshman year; all others will take Phys. 2A in the winter quarter of the freshman year. Students who received high grades in both calculus and physics in high school may substitute the major's sequence, Phys. 4A-B-C for Phys. 2A-B-C.

2. UPPER-DIVISION REQUIREMENTS
