## **Growing Green Leaders**

**UC San Diego Earth Month Celebration inspires campus changemakers to turn their passion into action**

They bravely led the way to a new environmental consciousness that awakened communities around the world to the importance of protecting our planet. Naturalist John Muir, activist Dolores Huerta and climate scientist Charles David Keeling all turned their passion for the planet into action—which is this year's theme for Earth Month festivities at UC San Diego. The campus and local community are invited to join in a month-long series of events in April designed to celebrate these pioneering environmentalists and inspire the next generation of green leaders.

“Environmental sustainability is engrained in UC San Diego’s research, teachings and physical operations; it’s an important part of our campus culture,” said Chancellor Pradeep K. Khosla. “We encourage members of the UC San Diego community to participate in our various Earth Month activities to learn how each individual can take part in UC San Diego’s efforts to protect the planet.”

More than a dozen events will be held on campus and in partnership with local nonprofits in celebration of Earth Day, which is nationally recognized on April 22. The events—the majority free and open to the public—offer opportunities to engage in cleanups and DIY green activities, as well as meet environmental changemakers like Dolores Huerta, who spoke about her experiences as a labor and environmental rights activist on Apr. 5.

### **Dolores Huerta: “Environmental Rights are Human Rights”**

When Huerta took to the stage, the co-founder of the United Farm Workers shared her “aha” moment—the time, decades ago, when she realized clean air and water are human rights.

“I was in Delano (in Central California) and went outside and saw a cloud and then realized it was pesticides and that health was a huge issue when it comes to the environment,” Huerta said. “Growers would spray fields while workers were in them. Sometimes they would spray at night, and not tell the farmworkers who would work the next day when everything was full of pesticides.”

She spoke of various circumstances in which the farm workers she advocated for would get poisoned from pesticides and how the problem still persists.

“There was one man who would travel from Tijuana to San Ysidro to pick strawberries...these pesticides are especially poisonous, so that farmworker got sick and died on the bus back from San Ysidro to Tijuana.”

At the event, Huerta shared the stage with Lesly Figueroa, current UC San Diego Associated Students president. Figueroa is a first-generation college student from Coachella, which is home to many farmworker communities. Figueroa said Huerta has been a big influence on her.

“What inspires me [to get involved] was growing up in Coachella and my parents... in my community, working people have to overcome so much to have opportunities,” Figueroa said.

*Dolores Huerta took the time to meet with students and event attendees before and after her talk. Immediately following the event, she stayed for more than an hour to ensure everyone who wanted to get a picture with her had the opportunity to do so.*

The two exchanged ideas on a number of topics and spoke passionately about what it is like to be activists as well as women of color. Throughout the conversation, Huerta encouraged Figuero and all in the audience to make change where they see fit and not to be afraid to speak out.

“The hardest thing as a woman, is speaking out,” Huerta said. “We often hold ourselves back because we are afraid to be criticized...but confidence comes from courage. You have to be courageous. People will ask me if I have any regrets and the only one is that I didn’t speak out *more*.”

She added, “To the women in the audience, next time you see a job or opportunity that you think you may not be qualified for, apply anyways, that’s what men do.”

Huerta spoke about how living simply is a way in which every citizen can be more environmentally conscious.

“We have this culture of consumption, and our planet cannot sustain it,” Huerta said. “You never see a U-Haul behind a hearse, because we can’t take it all with us.”

*About 400 faculty, students, staff and community members attended the Dolores Huerta event.*

With regard to consumption, she added, “Germany, Japan and the U.S. use up about 75 percent of the world’s resources. We want all the countries to adopt our lifestyle and this is problematic.”

Throughout the conversation, Huerta encouraged the audience to be civic-minded and to engage in politics and in local, state and national elections, even if they are disillusioned by the current political process.

“The most powerful non-violent tool we have is the power to vote. You can protest until the moon turns to cheese,” Huerta said, in jest. “But it’s the people who get elected that are the ones who make decisions. They are going to decide whether our tax dollars are going to be spent building jails or building schools.”

She said the best part of her work as an activist has been empowering citizens.

“What I tell people, is that ‘politicians work for you...as the people you have power.’ Making people realize they have power, it feels like magic,” she said.

Huerta concluded her talk by encouraging members of the audience to get involved in the 2018 elections, leading a rousing chant: “Now are we going to go out there and knock on those doors, campaign... are we going to go out there and do the work we need to do and be the missionaries for justice, what do we say se puede, or no se puede?”

To which the crowd responded with a thunderous “Sí, se puede!”

The day prior to the talk, UC San Diego’s Muir College hosted a screening of the film “Dolores” which is currently showing on Amazon and PBS.

## **Earth Month Events April 16 to 30 Celebrate UC San Diego’s Environmental Legacy**

This year marks the 60th anniversary of the “Keeling Curve,” which in 1958 became the first measurements to indicate rising levels of carbon dioxide in the Earth’s atmosphere. Led by the late Charles David Keeling, a Scripps Institution of Oceanography geochemist, the data continues to propel climate change advocacy.

“This year’s events have a special importance as we reflect on the legacy of the Keeling Curve and look forward to continuing to make strides to become carbon neutral by 2025,” said Vice Chancellor for Resource Management and Planning Gary C. Matthews.

Matthews added that UC San Diego’s faculty and staff have been instrumental in the UC system-wide effort to reduce greenhouse gas emissions, recently outlining a three-step solution to achieving carbon neutrality that could be a model for the international community to mitigate climate change.

Additional Earth Month events this month include a symposium from 10 a.m. to 4 p.m. on April 23 dedicated to the life and legacy of naturalist and founder of the Sierra Club, John Muir. UC San Diego’s second college—founded in 1967—was named after the conservationist, who is known as the founding father of the country’s national park system and whose writings have inspired millions over the last century to explore the outdoors. The event, to be held at the Village, will focus on whether Muir’s legacy can shape policy and debate today.

After the symposium concludes on April 23, historian and Muir scholar Donald Worster, will give a talk from 5 to 6:30 p.m. on how attacks on environmentalism impact the Muir legacy, sharing the need to look for the complex truths of the man, the role he played in history, and why he’s such a popular figure today.

*Whether students, staff or faculty want to help beautify the campus by collecting litter or become more knowledgeable about ways to recycle, there are many opportunities to get involved in this year’s Earth Month.*

Many Earth Month events focus on educating students and the local community about climate change impacts and the research happening at UC San Diego to promote sustainability. See a snapshot of events below. For a full schedule, click [here](#).

- **John Muir Week, April 16 to 20, various times and locations:** The celebration will kick off with a birthday party for John Muir on April 16 at noon at the Middle of Muir (MOM). Other events include the annual Muir Environmental Fellows organic luncheon on April 18, where UC San Diego alumni, staff or faculty will be honored for their work to make the university and the world more environmentally sustainable for future generations. The week will conclude with the burial of the new John Muir College time capsule.
- **John Muir Symposium – After the West: Rethinking Muir's Environmental Legacy, April 23, 10 a.m. to 4 p.m., the Village at Torrey Pines, Building 1, #15<sup>th</sup> Floor:** As part of the Environments in Motion lecture series, co-sponsored by Muir College and the Division of Arts and Humanities, this symposium is dedicated to the life and work of John Muir. It will feature an international panel of scholars devoted to a critical discussion and appraisal of the legacy and thought of Muir to commemorate the college's anniversary.
- **Talk from Renowned Historian, Donald Worster, April 23, 5 to 6:30 p.m., the Village at Torrey Pines, Building #1, 15<sup>th</sup> Floor:** The Muir historian delivers the keynote address. His book, "A Passion for Nature: The Life of John Muir," was named the best work of non-fiction by the Scottish Arts Council and won the Ambassador Award for Biography from the English Speaking Union. The Washington Post named it one of the best books published in 2008. Earlier books include "A River Running West," "The Wealth of Nature," and "Under Western Skies, Rivers of Empire, Dust Bowl."
- **Food Recovery Network at UC San Diego Food Waste Summit, April 21, 8 a.m. to 1 p.m., Village West:** As a pioneer in the food security movement, the Food Recovery Network is hosting nine regional food waste summits across the country to inspire local leaders and encourage collaboration between advocates for food justice. This half-day event aims to motivate and inspire local student leaders to get involved in the food security movement. Register for the free event [here](#).
- **Trash Audit, April 23-24, 11 a.m. to 2 p.m., Library Walk:** Volunteer to help clean up trash around Library Walk and residential areas. Afterwards, recyclable items will be sorted and measured to discover recycling habits of the campus.
- **Earth Plaza Palooza, April 26, 11 a.m. to 1 p.m., Price Center Plaza:** Celebrate Earth Day at the annual fair hosted by the Inter-Sustainability Council. The fair will feature student sustainability organizations, campus departments and vendors.
- **Green Talks, April 30, 4 to 6:30 p.m., Price Center East Ballroom:** This TED-style discussion will feature six speakers covering different perspectives of sustainability. There will also be an interactive Q&A panel, networking session, organic and vegan snacks, and more. For more information and to register, click [here](#).

Sustainability is an integral part of UC San Diego's education, research and campus operations. To learn more about our ongoing efforts, visit [sustain.ucsd.edu](https://sustain.ucsd.edu).
