Ripe Olives

The object of this leaflet is to call your attention to this, the choicest of all California's products—

Pickled Ripe Olives

All who have had the pleasure of visiting our beautiful state have been delighted with our Olives, and willingly acknowledge their superiority over the ordinary hard green Olive found in their home market.

For several reasons these Olives have not as yet been thoroughly introduced to the Eastern consumer.

The old way of shipping in barrels and kegs has proven very unsatisfactory.

Some having been improperly processed have spoiled; those which have not spoiled have been preserved by such a strong solution of salt that the rich nutty flavor of the ripe Olive has been entirely destroyed.

By our new process of canning we are enabled to place these Olives in any market with absolute certainty of their keeping until consumed, while they retain all the delicious flavor of the freshly cured RIPE OLIVE.

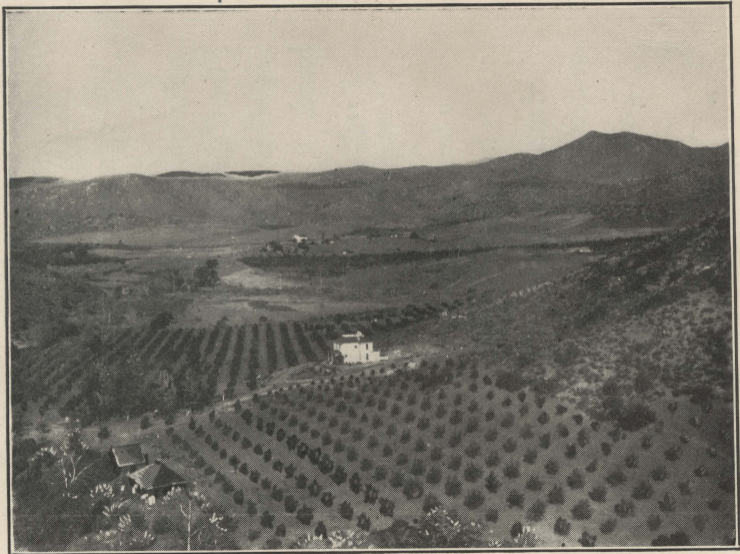

Being ripe, these Olives are full of oil, and, aside from the food value, have all the medicinal properties of pure Olive Oil.

The process used by me in canning ripe Olives was discovered and perfected by myself, and I hereby guarantee them to contain no preservative whatever except salt.
