- TDK D Cassette enables you to enjoy excellent sound performance.

The sensitivity in the high frequency range has been improved by 3.5 dB (measured by TDK) therefore TDK D Cassette is suitable for all types of music recording.

- TDK's unique DB (Dimple & Bubble) Sheet together with the Precision Cassette Mechanism ensures good and stable tape running, also the tape checking window is enlarged to let you see all tape running.

Tips on Handling and Storage

1. Avoid touching the tape with your fingers; you may cause drop-outs or scratches.
2. Protect your cassette from dust and damage when not in use by keeping it in its protective plastic box.
3. The tape should be wound snugly on the cassette reels; if the tape is loose, carefully wind it on to one of the reels by gently turning one of the hubs.
4. Keep the recorder head and pinch roller clean by regular use of a good cassette head cleaner (like TDK's HC-1 head cleaner cassette).
5. Avoid prolonged exposure of cassettes to excessive heat (should be kept below 110°F/45°C), humidity, direct sunlight and strong magnetic fields. Do not store near heating appliances, TV sets or similar equipment.
6. To preserve valuable or prized recordings, punch out and remove the erasure prevention lug on the top edge of the cassette.
