GEMBOGL PATROL REPORT NO. 1 OF 1971-72-PART NIGLKANE CENSUS DIVISION

RIMENT OF THE ADMINE

KONBOOK

Receipt of the above Patrol Report, submitted by Mr. Schilling, assistant Patrol Officer, covering the situation report of the 1971. Territory sensus patrol, is acknowledged with thanks.

Mr. Schilling has prepared a abridged type of a report and he has restricted himself with words and phrases which to some extent afforled him to make conclusion without offering some reasons. The report has also resulted in contradicting statement - "Although these answers may not have been entirely truthful, they do give an accurate indication of the economy of this area".

The communication has been the main problem in the area and this has been the main cause of the depressed economic situation in the area. The existing roads and bridges in the area are yet to be improved. The people in the area are lacking realization of the fact that they have to improve and maintain their existing roads and bridges for their own benefit. This has hampered the progress in increased economic activities in the area.

The Coffee does not prove to grow well in the five villages visited because of the soil being unsuitable. The pyrethrum is a ideal crop for this area and the Department of Agriculture is now planning to increase the used distribution to the growers if TAMBUL, the high altitude experimental station would produce better type of seeds. At the present the Department has been receiving 5 lbs of seeds per month from TAMBUL and it expects to receive 20 lbs per month. However, the pyrethrum production would be increased when the seed distribution is increased.

The following are some figures for coffee and pyrethrum produced during the last twelve months in the Niglkane Census Division - Coffee 160 cans for \$60,000 and pyrethrum 15 tons for \$6,200. Generally these figures are less than expected because of the communication problems in the area. I suggest, the people be encouraged of the "self help" ideas to maintain their existing roads and bridges in the area for their own benefit, if the economic situation in the area needed to be improved.

I realize that it is quite important that patrol reports are submitted with some kind of patrol map which would give much assistance in locating which area has been patrolled. An effort has now been sought to produce a reasonable map of the District and your Sub District requires more information required to be obtained for this purpose, example, location of creeks and villages etc. I would appreciate it if you would do this on future patrols.

(L.J. Doolan),

The Secretary, Department of Administrator,

Enclosed herewith two copies of the above report for your information please.

GEMBOGL PATROL REPORT NO. 1 OF 1971-72

Forwarded herewith are three (3) copies of Patrol Report No. ol, together with camping allowance claim completed by A.P.O., Mr. Schilling.

Mr. Schilling is to be complimented for the efficiency with which the Census was conducted. The only comment I have to make concerns the "Economic" Section of the Situation Report. I had noticed when checking Census forms that we were receiving far too many negative answers to the question concerning economic activity in the last 12 months. All teams were then asked to concentrate on this aspect. However, there was not much change in the answers and I am forced to agree with Mr. Schilling's conclusions.

for your information.

NUNU - PAGAUKANE interviewed.

DM. NUNU - GUMBUGLKANE interviews commenced.

Slept GOROMAUGU.

Friday 9th July

B. Monneyle

am. Interviews completed for NUNU- GUMBUGLKANE.

Dm. Territory Census Completed at GOROMAUGU.

Patrel returned to GEMBOGL by vehicles.

Very little coffee is grown and pyrthrum is declining in popularity. Some women whit to COGLMS to tell vegetables at the small weekly market. But in general twis were could be considered as the most economically depressed part of the Sub District. Meab of the woney in the area is brought in by about to here over in

The willy neticeable social aspect sharred wis the degree of soult male absentedism. Many males were feared to be givend working in the ASAKO to GOROKA area for popiods usually langer as three menths, Many were one to return willish the mant few quoks to pay local government council tax for their femilles and relating was also noted that a number of people and only recently about thomselves from the area due to the nearness of the council tax

of the woney in the area is brought the aGARO and GOROMA areas.

AIMS AND SUBJECT MATTER OF THE PATROL

The sele aim of the patrel was to conduct interviews with all residents of GOROMAUGU Rest House for the purpose of carrying out the Territory Cendus. For one week prior to the patrel all members attended a one week training course given by Mr. B.J. Maume, A.D.C. (Sub District Field Supervisor) at GEMBOGL Station. My position was as Team Leader (T.L.A.28) while the five student members of the patrel, three of whom were Kuman speakers, were employed as Interviewers. The interviewing and checking of Census forms was completed without any major difficulties being encountered.

SITUATION REPORT

A. Pelitical

Some Comments on the Efficiency of Councillors:

Although a mem pidgin speaker Wela was of much assistance throughout the duration of the patrolin organizing his lines for the given interview days. However, Wela himself had not told the people anything about the proposed Census, although on at least two occaisions previously Mr. Maume had had long talks with him on the subject.

Counciller Kemba
With the exeption that he is a pidgin speaker
the above comments would also apply to Kemba. This Counciller, though
does not have the same degree of authority and standing with his
Lines as Wella has with his.

B. Economic

In the course of the interviewing it was found that a majority of the people claimed not to have earned any money inthe previous twelve menths. Although these answers may not have been entirely truthfull, they do give an accurate indication of the economy of this area.

Very little coffee is grown and pyrthrum is declining in popularity. Some women walk to GOGLME to seal vegetables at the small weekly market. But in general this area could be considered as the most economically depressed part of the Sub District. Most of the money in the area is brought in by absent workers over in the ASARO and GOROKA areas.

C. Secial

The only noticeable social aspect observed was the degree of adult male absenteeism. Many males were found to be absent working in the ASARO - GOROKA area for periods usually longer then three months. Many were due to return within the next few weeks to pay local government council tax for their families and relatives. It was also noted that a number of people had only recently absented themselves from the area due to the nearness of the council tax patrol.

25th January, 1972

The District Commissioner, Chimbu District, KUNDIAWA.

GEMBOGI PATROL NO. 2/71-72.

Your reference is 67-3-5 of 7th January, 1972.

I acknowledge with thanks receipt of Annual Census/ Area Study/ Situation Report by Mr. G. Schilling A.P.O. of the Mitnande Census Division.

Separation of headings to allow one per folio would facilitate updating of the Area Study.

Paragraphs in the Situation Report should be complete in themselves and not refer to the Area Study which is filed separately.

life. Wage earning is the only economic outlet for many of the people of the Upper Chisbu area and absenteeism has also reduced birthrates and reduced or plabilised

A good first effort.

(S.J. PEARSALL)

DDA 67-18.6

This situation has existed for some years and it would appear that the local people accept it and have made adjustments to cope with it. Very few men have offered or been accepted for H.L.S. over the past few years, however, despite such unofficial voluntary restraint, there continues a regular movement of men to and from Lae and Port Moresby which are preferred centres of employment.

In the terms of Departmental Instructions, I see no valid reason, at this stage, to restrict or deprive persons of the right to seek employment outside the District. Instead, the Council and the Administration should be seeking means of making the Upper Chimbu more attractive and providing employment for the young men. In the meantime, the Council should persuade men before they depart to seek work should persuade men, before they depart to seek work, to ensure that adequate provision has been made for the support of their families and encourage them to return home on a visit at least every three years.

Mt. Wilhelm: The recent loss of a young climber on Mt. Wilhelm highlights the need for improvements to walking tracks and controls over people visiting the mountain to ensure they are adequately clad and equipped for visits to the peaks. This may only be possible by declaring the area a National Park and posting a Ranger to supervise the park.

Loontinue to be taped and the tapes OF THE ADMINISTRA

DISTRICT COMMISSI

c.c. The Secretary,
Department of the Administrator,
KONEDOBU.

District Office, KUNDIAWA. CHIMBU DISTRICT.

7th January, 1972.

Assistant District Commissioner, Sub-District Office, GEMBOGL. CHIMBU DISTRICT.

GEMBOGL PATROL REPORT NO. 2/71-72.

Receipt of the above Patrol Report, submitted by Mr. G.M. Schilling, is acknowledged with thanks.

Political Education: I am pleased to note that the system of informal discussions has been adopted and the results achieved on this patrol indicates that this method of imparting information is far more effective. The use of taped material, particularly of council meetings, to reinforce talks and discussions should be encouraged and I trust that you will ensure that council meetings will continue to be taped and the tapes replayed to interested persons back in the village areas.

It would appear that no political education programme was carried out in the village areas adjoining the Gembogl Station. Mr. Schilling's diary indicates that the census revision was carried out during the course of day-trips, but there is no mention of any political education talks or the replay of tape material. All too frequently, people living in close proximity to stations are somewhat ignored and I would suggest that, on the resumption of the political education programme after the House of Assembly elections, that you provide particularly close attention to these groups.

Road Maintenance: The requirement for landowners to maintain those sections of roads adjoining their
land is provided for under the relevant Council rule.
The Council should be obliged to police and enforce their
rules, otherwise what purpose is there in having rules.
The appointment of a Council Rules Inspector is a step
in the right direction in placing responsibility on the
Council.

Highlands Labour Scheme: From my calculations, there are approximately 40% of the adult male population absent outside the District. Although the percentage absentee rate is high and exceeds recognisable limits which could adversely affect the social and economic well-being of the community, absenteeism has also brought certain benefits even though they perhaps do not fully compensate for the break-downs or changes in community life. Wage earning is the only economic outlet for many of the people of the Upper Chimbu area and absenteeism has also reduced birthrates and reduced or stabilised population/land pressures.

TERRITORY OF PAPUA AND NEW GUINEA

Division of District Administration Dept. of the Administrator Sub-District Office Gembogl, Chimbu District 12th December 1971

Mr. BJM

District Commissioner Chimbu District KUNDIAWA

GEMBOGL PATROL REPORT NO. 2 OF 1971-72

Forwarded herewith three (3)copies of Patrol Report by Mr. Schilling, Camping Allowance Claim and Patrol Map. Comments are as follows:-

AREA STUDY: (Paragraph 2, Page 3). It may not be desirable, but it is a fact that the duties of councillors are those of combination village constable, magistrate and road maintenance overseer. The Mt. Wilhelm Council has recently decided to appoint a full-time Rules Inspector, and this should relieve some of the pressure on individual councillors.

(Paragraph G(b), Page 5). Mr. Schilling has not been long enough in the area to realize that food shortages are a perennial problem and are not caused by high absenteeism but by seasonal variations.

(Paragraph G(c), Page 5). Welfare activities do not generate any great enthusiasm amongst the councillors and I do not expect that the Council will be in a financial position to carry through such a scheme for some time.

(Paragraph N(a), Page 8). D.A.S.F. already has plans for increasing staff at Gembogl. It is balieved, the increase will be: 2 RDAS(Local Officers), and possibly 1 Project Manager (Overseas).

SITUATION REPORT: (Paragraph A(3), Page 2). The policing of the Council's Road Maintenance Rule is a definite problem and has so far been a function of DDA. However, efforts are being made to transfer the responsibility to the Council as much as possible, and to this end a Rules Inspector is soon to be appointed. I would not go so far as to say that "voluntary labour is dead", as it is still possible to get a reasonable roll-up with a little prodding from us. It is true though that enthusiasm for unsupervised road maintenance is on the wane.

(Paragraph B, Page 2). The failure of passion fruit as a cash crop is more the fault of Cottees than anyone else. They reneged on their promise to provide regular marketing facilities and the people naturally lost interest. DASF were not able to maintain momentum without support from Cottees and the deal fell through.

is welcome. The report is somewhat marred by spelling and typing errors and Mr. Schilling would do well to pay much closer attention to these aspects in future. In general, I consider it a good effort for his first solo patrol.

Division of District Administration Department of the Administrator Sub-District Office Gembogl, Chimbu District 4th October 1971

Mr. G. M. Schilling A.P.O. Sub-District Office GEMBOGL

PATROL INSTRUCTIONS - GEMBOGL PATROL NO. 2 OF 1971/72.

As discussed previously, you will today depart Gembogl for Bongugl Rest House, and there commence a census patrol of the Mitnande Census Division. Please attend to the following matters during the patrol.

- You will be required to up-date the statistical sections of the existing Area Study. (Refer Mr. Vandereyk's Report Patrol No. 1 of 1970/71).
- (ii) Situation Report.

 This of course is mandatory and is by far the most important section of your report. Do not try to gain information on native attitudes from formal discussions, but rather take every opportunity to visit various men's houses for informal talks. After a while you will no doubt become quite adept at steering the conversation in the right direction.
- You will be concentrating at this stage on the 1972 House of Assembly Election. Please inform the people of the new Mt. Wilhelm Electorate, new seats in the House, conditions of candidacy etc. One misconception which I have he ard about is that people think that all losing candidates will automatically forfeit their hundred dollar deposit. This, as you know, is not the case, and only those candidates who score less primary votes than one-eighth of the total primary votes of the winning candidate will lose their money.

With regard to self-government and independence, you should stress the inevitability of these developments, pointing out that self-government is practically a fait accomplianyway. The Australian Government recognises that Papua New Guinea has now come of age and should be ready to hear greater responsibility. Mention the increase of localization in the Public Service. I want you to point out particularly that many educated and progressive Highlanders do not fear self-government and independence.

Highlands Labour Scheme.

As directed by the District Commissioner, every effort should be made to publicise the scheme. My own belief is that the people here now have a very low opinion of the scheme, and it will take radical changes in conditions of plantation work, especially with regard to wages, to change this attitude. I have always found it advisable to point out to people that the wages they will receive will be low and the work long and monotonous. That way we cannot be accused of enticing, cajoling, or threatening people in order to get recruits. Surprisingly this ostensibly negative approach sometimes works the best of all. You will of course have to take into account the high rate of absenteeism in the area, as this will necessarily put curbs on the number of recruits.

Method of Patrollin You will at all times try to disrupt village life as little as possible. The people will be fare more appreciative of your presence if you fit in with their pattern of life, rather than the other way round. Try to play d wn the law-keeping aspect of our duties, as the people in this district have us firmly fixed in their minds as travelling magistrates and policemen, and very little else. It is deplorable in this day and age that such archaic images persist. Naturally you and policemen, and very little else. It is deplorable in this day and age that such archaic images persist. Naturally you will have to attend to whatever law and order problems you encounter, but at every opportunity show the people that our main concern is with development - economic, political and social. The day is fast approaching when law and order will be handed over to the experts, and we will then be able to lay aside this distasteful and distracting aspect of our work.

I would like this patrol to be as leisurely as possible, but it could happen that staff exigencies will arise which will cause curtailment of the patrol. You should therefore aim at spending no more than two nights at each rest house.

I hope you will enjoy this first solo patrol, and I will be looking forward to your report. Conclusion. (vi)

(1) Political Education Method

1.

Following the directions of my patrol instructions (copy enclosed) political discussions took the form of informal small group meetings - usually in the House - Man or the Rest House, I believe that this low key approach to communication, on a more personal level, to be far more effective than the old method of lecturing to a large and mostly uninterested audience prior to conducting long hours of even more time consuming and boreing name calling. By using smaller, more intimate discussion groups I found that the audience was far more willing to listen attentive — ly and to ask questions; whereas, within a large group many would have felt too self conscious to ask these same questions and voice their true opinions.

Owing to the inability of the Political Education Office, Kundiawa to supply a film - strip projector and powerplant, the meetings were conducted with the minimum of aids - a good supply of D.I.E.S. posters and the Local Government Council's cassette tape recorder. With the latter I was able to record the minutes of the last General and Agricultural Committee meetings of the Council in the local Kuman language. The playing of these tapes combined with the taping of songs, stories and flute playing certainly contributed to the success of the later discussions. The The use of and distribution of the posters also proved helpfull in attracting and holding the attention of the audience.

(2) Forthcoming House of Assembly Elections

There was a favourable reaction to the news that the Mt. Wilhelm Council Area was to become a separate Blectorate at next years National Elections. The new conditions of voter eligibility were also explained. The residential qualifications caused no comment, however, the lowering of the voting age brought some rumblings of disapproval from a number of the older men. The most difficult concept to impart was that of the conditions necessary for a candidate to recoup his nomination fee - the coaching of the interpreter beforehand proved to be invaluable with regard to this matter.

With the House of Assembly yet to debate a proposed amendment in relation to the amount of the actual nomination on fee, no definite answer could be given to questions raised on the matter. Consequently it is almost impossible to estimate the number of likely candidates in the area. Many prospective nominees are waiting for a definite decis - ion from the House before throwing their hat in. The feeling is that should the fee be increased to say, there will be far fewer candidates than would be the case if the fee remains at \$50.

At present only a handfull of the more prominent Councillo - rs (Pres. Kumai, V.Pres. Siwi, Clrs. Miugwe and Nime) and the Station Interpreter, Kaugla are prospective candidates. Only one younger, more educated man - Mr.
Theodore Banda, a University Student, has been mentioned
as a possible candidate, whether for the Open or Regional
Electorate it is not known. The present Member for the old Chimbu Open Electorate, Mr. Karigl Bonggere from GOGLME in the Niglkande C/D. is also certain to nominate again and must start favourite. However, such early forecasts could easily

(2) Forthcoming House of Assembly Elections (continued)

be proved incorrect, such is the wide - open nature of this, the first House of Assembly Election confined solely to the Sub District.

(3) The Council

Politics at the local level ie. the Council level is far better understood and far more relevant to the individual than nationa — I politics at this stage in the area's POLITICAL awareness. The playing of a Kuman language taps of Council meeting minutes was greatly appreciated by the majority and provoked some intelligent questions as to the use of Council taxes and aspect — s of the current works program. The work of the Council is generally recognised as being for the benefit of the area as whole and is supported by the people provided it does not call for any personal sacrifice beyond their taxes. This would apply particularly to the Council's Road Maintenance Rule where practically nil voluntary road or bridge work can be found on tuesday mornings. Despite warnings of road closures, explanatio — ns of why the roads should be looked after and occaisional mass fines (including Councillors) the problem persists. D.D.A. GEMBOGL simply does not have the time or staff to mount inspection patrols every tuesday and the people know this. I would even go so far as to question the wisdom of such oppresiv — e enforcement of **this**example** this rule by a colonial administration in a country so close to self government.

The people have, in gaining an increased understanding of what the Council can do for them, come to expect the Council to do everything for them. This situation has perhaps been reinforced of late by the sight of the Council employing three road gangs totaling over 170 men. The fact that they are being paid by Rural Development and P.W.D. funds is irrelevant in the eyes of the people as it is the Council who distributes the weekly pays. It logically follows that the individual is now most reluctant to work on his road for nothing. Voluntary labour is dead and from now on the Council can no longer rely on its Road Maintenance Rule for the upkeep of roads. It will simply have to get used to the idea of bearing a larger financial share of the cost of roadworks itself even if it means cutting expenditure on other projects.

(4) The House of Assembly and Self Government

Attitudes to self government and to the central government are adequately examined in Sections L. and P. of the accompanying Area Study.

B. ECONOMIC

See sections M and N of Area Study for comments.

The Failure of Passionfruit as a cash crop in the area can be attributed both to the buyers (Cottees Pty. Ltd.) and the local growers. On the one hand Cottees buying trips only occurred spasmodically and not every two weeks as D.A.S.F. had initially promised the people. While on the other hand the price of only 2¢ / lb. meant that growers who also had coffee or pyrethrum preferred to concentrate their offorts on these higher earning crops thanthe lowly passionfruit. the above attitudes of both the buyers and growers each to some extent caused the other and rapidly led to a downward spiral in the crop's production.

B. ECONOMIC (continued)

To some extent the blame can also be shouldered by D.ASS.F. FOR its failure to have the crop accepted by the people as a second - string EXEM standby to the established Coffee and pyrethrum. Admittedly this was a difficult task to undertake and the extension techniques were just not good enough to overcome the "coffee is king" mentality of the average Chimbu cash cropper.

C. SOCIAL

(2)

Education

The following is a list of complaints which are common to the Primary T Schools in the area:

- 1/ The lack of interest shown by parents pin the P&C and their unwillingness to contribute to weekly maintenance of grounds etc. This in particular applies to male parents.
- 2/ The unwillingness of parents to enroll their daughters.

The Lutheran Midsion at Sumburu is the most poorly equipped and smallest in the area and as a result many parents see this as meaning that it can not possible be as good as the nearby R.C. Schools at Womatne and Goglme (Niglkande C/D). This has the effect lowering its status to the extent that some parents have transferred their children to the latter twoschools. There were also plans for for an additional class room but the parents have now lost linthusiasm and the likely hood of a std. 1 intake next year is fading.

A new teacher's house is at present winder construction at the Gembogl P.T.S. by P.W.D. and together with the four existing Council built houses will bring the number to five. At present their is a most critical teacher shortage at Gembogl with only four teachers taking seven classes (prep. plus stds. 1 - 6). As a result their will be no new intake next year when the prep. children advance to standard 1 and prep. classes will no longer be enrolled.

Health

The major reported ailments found in the area are influenza, common cold, and cuts and abraisions. The reported incidence of V.D. is at present extremely low and no where near as big a problem as in Kundiawa or along the Highlands Highway.

Regular M.C.H. visits are made to the area by both a trained sister from the Goglme R.C. Mission and P.H.D. Kundiawa and clinics are held twice monthly at Womatne and Banglagu and once a month at Pompomeri, Gembogland Sumburu. The major complaint from the Sister in Charge is that many parents are becoming lax in their attendance, thus making it impossible for their children to gain full benefit from the triple antigen vaccination programme. The parents simply do not see the need to take along their perfectly healthy children regularly every month to the clinics, rather they wait until the dhild becomes sick before doing so. This attitude means that the whole idea of preventave medecine as planned by P.H.D. is not working as effectively as it should.

C. SOCIAL (continued)

Law and Order

In general I would agree with Mr. Van der Eyk's observations contained in last years area study but would like to strongly emphasise the fact that is at present no effective policeing of Council Rules. Also the village arbitrations being carried out usually by Councillors are multiplying rapidly to the extent that many Councillors do little else. It is also becoming increasingly more fashionable for at least ware one party in such disputes not to accept a decision. The case, usually most minor, is then brought before the Local Court which generally makes a similar decision to the original one of the "village court". This is most time consuming and irritating to the Sub District Office staff as two out five working days have to be set aside solely for such court matters. The recently discussed recommendations in the House of Assembly for the appointment of official village magistrate es, even with its potential corruption, would be favourable to the present system.

It has also been noted over the past few months that the incidence of more sopphisticated crime, mainly planned break ins and theft from trade stores and houses, has increased. Such crimes are proving than a match for the detection abilities of the Police staff at Gembogl and are if solved at all it is usually a matter of luck than skilled methods of investigation. However, I would like to make it quite clear that the area is not at all understaffed by the Police (one N.C.O. and three Consts. 1/c.); but the fact is that they are simply not trained to handle the minvestigation into or prosecution of the relatively complex crimes that are beginning to occur. To help overcome this hiatus in the system of law and order their are current plans for the establishment of an autonomous Rural Police Station at GEMBOGI which should be staffed by literate and better trained Police. There are also plans for a similar set up at Yombai in the Niglkande C/D. At present there is one policeman on fulltime patrol in each Census Division with two on station at Gembogl.

D. MISCELLANEOUS

Highlands Labour Scheme Recruitment

During the course of the Patrol, but before the patrol's Census at Gembogl, 44 men were recruited from Gembogl for work on Bouganville. However, with the completion of the Census and the analysis of absentee percentages it was found that all Census Units were depleted far in excess of the one that of the adult male population which is generally considered to be the maximum permissable rate. As this situation is also the same as for the Niglkande C/D it follows that the Upper Chimbu Sub District should be closed to any further H.L.S. recruiting.

Tourist Potential - Mt. Wilhelm National Park?

The Mt Wilhelm Massif was recently visited by Mr. N. Gair, the Executive Director of the National Parks Advisory Committee. Mr. Gair was carrying out investigations into the possibility of declaring area aNational Park and although no decision has yet been publicary and unced it does seem likely

1 | |

D. MISCELLANEOUS (continued)

this will be the case in the not to distant future. This would undoubtably contribute greatly to the already high popularity of the area amongst the hardier of the tourists.

The Mt. Wilhelm Local Government Council is currently considering a proposal for handing over the area for the purposes of a National Park but has yet to give a decision on the matter. Assuming that this question can be suitably resolved then the subsequent plans for tourist promotion on the part of the Government should desirably give preference to Council development rather than private enterprise. The Council has already built a permenant materials Challet at Lakes Pindaunde for overnight tourist accommodation. A charge of \$2,000 per night is payable to the Council attendant at Keglsugl where the Council is presently constructing a native materials house/store.

a. Hil beauge aside from the following revised y minute statistics:

t

PREFACE

It should be noted that in revising the original Area Study of Mr. P.J. Van Der Eyk (Patrol Report No. 1 GEMBOGL, 1971) I have only submitted further comment where significant change had taken place, or in my own opinion, another point of view warranted inclusion in this Report. Where no change had taken place I have merely stated "nil change".

- A. INTRODUCTION
- a. Nil change.
- b. Nil change.
- c. Nil change.
- B. POPULATION DISTRIBUTION AND TRENDS
- a. Village Population Register is attached.
- b. Nil change. Area map is attached.
- c. Very little change noted except for an increase in the total number of absentees from the village to 5,480 or almost 39% of the entire population. As for adult males the number of absentees stood at 2,317 (not including Adult Male Students) or approx. 45% of the Edult Males listed in the Census Books. Bearing in mind these statistics all Census Units in the area should in future be regarded as over recruited when considering H.L.S. volunteers.

Some older village people feel that long - term absentees should forfeit all land and inheritance rights. Such strong feelings about absentees reflects the degree of resentment felt by the, generally older, people left in the village. These senior citizens resent having to look after such incidentals as the young absentees roadwork mark, his land and other interests such as a neglected wife and child.

Once again cas of the direct effects of male absenteeism is the corresponding increase in the divorce rate. Some husbands have been absent for many years - their wives invariably divorce them or merely take up with another man. However, another point of interest is the increasing incidence of younger married men who are taking their wives with them to the towns - perhaps they have no choice.

Aside from the big town absentees, the following distinct patterns of absenteeism were noted: groups from KURUMUGL and BONGUGL to KEROWAGI and NONDUGL; groups from GERE and KALINGGU to ASARO, SINASINA and YONGGAMUGL. A large number of the latter could almost be regarded as permanent absentees following a serius landslip some years ago which wiped out large numbers of gardens and forced the landowners to move out of the area. The lanslip, near WOMATNE, is still unsafe for habitation and is likely to remain so for some time yet.

b., c., d., e., Nil change.

D. LEADERSHIP

a. & b. Nil change.

LEADERSHIP (cont.)

c. With the coming of the Local Government Council many groups in the area appear to have lost real leaders. The elected Councillors, although universally recognised as the groups representative, do not have the power, influence or prestige of the treditional leaders. However, the fact must be accepted that leadership patterns are reflected in the election of Local Government Councillors.

The Councillor these days is not a leader in the old sense. He often appears to be caught between his role as representative - spokesman on the one hand, while on the other, his group expect him to perform the duties of his predecessor - the Luluai. Indeed, many Councillors regard it as their duty to act as a combination village constable, magistrate and road maintenance overseer. Certainly these are not the duties of an elected representative in this stage in the country's history. While subject to these pressures the Councillor is always conscious that his fate as a leader rests with people at the next election.

In general the present Councillors may be classified as belonging to one of the following three categories. Firstly there are the traditional leaders who still hold real power and have maintained sufficient standing and influence to gain election to the Council. These leaders are now relatively aged and usually lack any education and are non pidgin speakers. They are however powerfull who command respect hearing within their groups. They are a minority in the Council Another minority, although larger than the first, is that of the self - made, younger man, who although not possessing the power base of the traditional leader, manages to survive on his wits and opportunism. If they fail to prove satisfactory in the eyes of the people they are likely to find themselves dumped at the next election. Mest members of this group are far to busy "gresing about", trying to enhance their prestige and gild their image with the result that they can not devote their full energies to their duties as a Counciller. The third is the Counciller who has been elected a, Because no one else wanted the job (with many groups depleted through excessive absenteeism it is only logical that leadership potential must also suffer depletion); or b, because the individual is thought to be a weak leader who will not upset the status — que or step on anyone's toes. However, I feel that it would be a mistake to regard these men as fronts for traditional leaders luwking in the background. The observed fact is that the traditional leaders luwking in the background. The observed fact is that the traditional leaders no longer have such manipulative power — groups represented in this manner are virtually leaderless, a fact which does not werry the self — centred Chimbu egotist. In the performance of Council activities this latter type of Counciller may range from being extremely veciferous to mute. Either way the results are similar — very few people take much notice of them and they command little respect. This group is a majority in the Mt. Wilhel

Perhaps a fourth group could emerge at a later date - that of the young educated (Std. 6 of better) man. It would be hoped that such a group could inject a more farsighted, propessive and hardworking outlook into the current leadership scheme. I believe that some young man of this type could gain election to the Council in the future. This may, hoever, take longer than some of the other areas in Chimbu as practically all educated people find it necessary to live and work outside the area.

MITAMOW

Teacho

LATOT

- a. Basic trend continuing unchanged.
- b. Nil change, aside from the fact that the whole area is undergoing a food shortage at this point in time. This can mainly be attributed to the fact that the high degree of absenteeism has led to a decline in the annual working of new gardens. I do not consider this shortage to have reached serious proportions for the present but it will bear observation overthe next few months.
- c. At present there are no community centres in the area, but a plan has been put to the Council by the Welfare Officer, Kundiawa, Miss Barbara Hadkinson, for the establishment of a Women's Club to be staffed by two trained girls from 1973. This has yet to be decided upon as it would involve the Council supporting of girls from the area for a years training in Kundiawa mext year and then accommodating and paying their salaries at WOMATNE.

The Council also shows films in a semi - permanent materials that re at least once a week - 16mm projector, cinemascope lens and screen. These films are also shown at the DENGLAGU C.M.

Occaisional impromptu games of soccer and Rugby Union take place on the GEMBOGL Oval. However, with the demise of the Native Club there is no organised body arrange proper competitions.

H.MISSIONS

a. Nil change aside from the establishment of small New Tribes Mission venture near KURUMUGL. This Mission is staffed by a European and his family. The Mission have not, as yet, attempted to do anything more than try and learn the local language. But there has developed, even inthis short time, personal between friction between this missionary and the well established Lutheran and Roman Catholic Mission Heads. Relationships between the Lutherans and Roman Catholics could be described as excellent.

- d. No further comment.
- e. Nil change.

O. ATTITUDE TO LOCAL GOVERNMENT

Generally favourable. For detailed attitudes to Councillors see B. LEADERSHIP.

Current (1971/72) R.D. Funds of approximately \$5,000 are being expended on upgrading the Mondia and Goromaugu roads. There is no non cash contribution being made by the Council. Voluntary labour is no longer available for anything requiring labour in excess of two or three days

P. ATTITUDE TO CENTRAL GOVERNMENT

The general attitude to the central government as represented in the Sub District by this Department is good. However, as to the direct relationship between the House of Assembly and Departmental policy there is very little understanding. It is very hard to convince the peoplethat they have already achieved self government - they simply will not believe that it in their own politicians with the A.E.C. are the decision makers and not the Australian government. In view of this situation a more definate target date for self government would be appreciated in bringing home the reality of the present situation to the peopl I feel that a true realisation of what the central government is and what it does will not come about until self government, only then will the people wake up to the that their local Members hold the power that governs the country.

Q. ACCOMMODATION AND SERVICE FACILITIES

The Sub District Office at GEMBOGL provides the public facilities of a Post and Telegraph Office and also ham operates a Commonwealt Savings Bank Agency. Basic medical services are also available from the P.H.D. Rural Health Centre.

No accommodation is available at GEMBOGL station or the Missions

GEMBOGL PATROL NO. 3 OF 1971/72.

neference your minute of the 29th May.

I acknowledge with thanks receipt of Situation Reports 1 and 2 arising out of the above patrol of the NIGLKANDE Census Division, together with the appropriate assessments, and also the Area Study amendments, as submitted by Mr. J.N. Pain, Assistant Patrol Officer.

Considering that the last Area Study updating was done 12 months ago I am surprised that Mr. Pain found changes that only filled 1 pages of double spaced foolscap.

Situation Report No.1 is most informative and is of the type required here at Headquarters.

(T.W. ELLIS)
Secretary.

UP-DATING AREA STUDY

There are four schools in the census division,
three are run by the mission and on is a government Primary T School.

The following is a revision of statistics for
the four schools in the Census Division.

Government Primary T School KANGGRI

6A	22	10	32
	194	63	257

Goglme had three European teaching staff, two of E.O. 1 classification and 1 E Course. There are five local teachers, one E.O.2, two Teachers Grade 2, one teacher grade 1, one teacher and one who is waiting on registration as a teacher.

ATTITUDE TOWARDS SELF GOVERNMENT

The locals are still very wary of self government and on the whole state that they want nothing to do with it. They have the idea that fights are going to break out after self government, and that they will not have any money. The only real remedy for this kind of thinking is for them to wait and experience self government for themselves, so that they can see for themselves the effect it has on the country as a wole.

CONCLUSION

There are no significant changes in the census division as from the last report and no comment in this report is warranted.

ASSESSMENT ASSISTANT DISTRICT COMMISSIONAR.

DATE RECEIVED.

8th May. 1972.

It is true that unrest is due to coffee prices being so low. The situation is not really serious as yet, but it is easy for malcontents and disgruntled poor losers (I refer to candidate Mathew Numambo Siune (Chimbu Regional) and Kugame Kura (Kundiawa Open)) to try to make political capital out of the depressed economic situation.

It is believed that a lot of the misconceptions concerning selfgovernment arise out of the difficulty of translating such a term into Pidgin or the vernacular. It is claimed by several people who attended the P.E. Seminar at Gembogl last week that some influential (Especially older) people have it in their minds that 'self' refers to some foreign power, and hence Self-Government must mean domination by a foreign power. Excryone at the seminar agreed that it would be highly desirable to drop the term 'Self-Government' entirely, and substitute 'Gavman Bilong Yumi Yet'. It was even suggested that officers might push the line that "You don't have to worry, 'Self-Government' isn't coming ,we're getting 'Gavman bilong yumi yet' instead." Whether such a course would be effective remains to be seen.

What is happening now is that we are reaping the rewards of some of the propagands of

What is happening now is that we are reaping the rewards of some of the propagands of unscrupulous white candidates in the recent election, who didn't hesitate to play up to an unreasonable degree the 'dangers' of early self-government, when it suited their own political ends, but did the country as a whole a great disservice.

I agree with Mr. Pain that it would be unwise to announce that 'Self-Government is coming on a certain date 'It is much better to let the matter gradually be accomplished, as is happening anyway. I don't think that dates for Self-Government or Independence are important. The reins are gradually being handed over now with a minimum of fuss and no apparent effect whatever on the average man in the village. This is obviously the best approach.

A close watch is being kept on the activities of Mathew Siune and his ilk.

Throughout the census division there is unrest and illfeeling towards the new Papua New Guinea flag. The recent slump in coffee prices, and the lack of money in the census division, has been blamed on the flag. The people feel that since the new flag has been flying no money has been coming into the Sub-District. Some asked me if Australia had stopped sending money to Papua New Guinea, or if the members of the House of Assembly were keeping it in Moresby. Days had been set to tear down the flags in Kundiawa and Gembogl but this did not eventuate. I explained to the people that money was still coming into the country and this would not change for a long time. I also tried to explain the coffee market to them, using their own markets as an example and I feel that in some cases the people understood why the prices of coffee had fallen.

It was reported to me that just after the patrol, Mathew Numambo SIUNE, an ex candidate for the House of Assembly, went around some of the Niglkande Census Division telling the people that the flag was stopping money coming into the area and that it should be pulled down. This direct opposition by fairly prominent people, for their own self-gain, makes me wonder if my talks were of any value to those who heard Siunes talk. Confidential Field Report No. 3 refers more fully to this matter.

The people still generally fear Self Government and are under the impression that a change will occur in their villages, that is, something very big is going to happen on that certain unknown day that will mark the change to Self Government. The only way to overcome this fear is to make self government so gradual that a set day be irrelevant. It would be more appropriate if self government was just announced the day it was obtained, rather than to set a target date for all to sit and worry about. At present it has been built up to be way out of proportion and as a result the people are expecting bigger and in the case of the Niglkande's, worse events than With all the talk of self government it is will actually take place. hard for these people to visualise that the main changes will take place in Port Moresby only. I strongly suggest that self government be "played down" rabber than built up as is happeningnow. This may heap to relieve some of the worries that have already built up inside the people.

time of the patrol, " ()

The villagers still beleive that at self government all Australians will go back to Australia and a new country or power will rule Papua New Guinea. They have appearently been told each time a patrol officer has visited the area that this will not happen but doubts till exist.

A political education talk was given to the Standard Four students at the Gagmamambuno Catholic Mission School and it was well received by the students.

Goglme Catholic Mission School and Kanggri Primary "T" Schools were both preparing for the annual combined sports day and no talks were given. These will be given at a later date.
