Facheco Adobe

p. 122.

The Facheco family owned a large picturesque adobe residence in Monterey which is one of the interesting landmarks in California. It was built in 1819 by the Spanish military detachment. The Fachecos acquired it in the Mexican period. After American occupation, and it had been sold by the Fachecos, it was used as a hospital.

It still retains much of its old-time glory of picturesqueness and stands as a monument to the old Spanish days. Many descendants of San Francisco Fachecos live in and around Monterey.
