

July 23, 1951

Dr. Werner Brown  
Division of Bacteriology  
Camp Dietrich, Maryland

Dear Dr. Brown:

When I saw you in Cold Spring Harbor, you thought you might like to send one of your men to work in our laboratory for a few weeks, in order to acquire some practice with the chemostat. I wonder how it would suit you to send your man to us around the first of October. By that time our laboratory should be back to normal.

With best wishes.

Sincerely yours,

Leo Szilard

Dear Dr. Szilard:

Thank you very much for your note of 23 July 1951. We would be very happy to send Mr. Leonard A. Mika to your laboratory during the week of October 1, 1951.

I wonder whether you have any suggestions as to his housing near your laboratory while he is in Chicago.

Sincerely yours,

*Werner Braun*

Dr. Werner Braun  
Chemical Corps Biological Laboratories  
MM Division  
Camp Detrick  
Frederick, Maryland

Dear Dr. Braun:

Many thanks for your letter of August 13 re the proposed visit of Mr. Leonard A. Mika to our laboratory.

I would suggest that Mr. Mika write to Miss Marjorie Elswick at 5640 Ellis Avenue, Chicago 37, and give the date of his arrival and also how long he expects to stay. We will then attempt to make a reservation for him (assuming he will want a single room) at the Broadview Hotel, 5540 South Hyde Park Boulevard.

Alternatively, he might make his reservation with the Broadview directly.

With best regards,

Sincerely yours,

Leo Szilard

Dear Dr. Szilard:

I have been informed that the filters are not available on the open market as yet but should be available in the near future. However, I understand that a somewhat less efficient form of this filter, requiring water extraction prior to use, is being imported by Schleicher and Schuell Company, Keene, New Hampshire, Attn: Mr. H. A. Holz, and is available commercially.

I certainly enjoyed my recent visit to your laboratory.

With best personal regards--

Sincerely yours,

*Werner Braun*

Dear Dr. Braun:

It was very kind of you to supply us with the information contained in your letter of December 12th.

At this time I have another request: We are unable to find a reference to DiAmato's paper on the mutagenic activity of metabolites. I wonder whether you could let us know where it was published.

We were very happy to have you here for a visit and hope that next time you will come for a longer one.

With kind regards,

Sincerely yours,

Leo Szilard

Dear Dr. Szilard:

In reply to your letter of 7 January 1952, here is the reference to the paper by D'Amato. It was published in *Caryologia* 3 (2): 249-259, 1950. An English abstract of this paper appeared in the *Biological Abstracts*.

With kind regards--

Sincerely yours,

*Werner Braun*

Dear Dr. Szilard:

On my way back from a trip to California, I am planning to stop in Chicago on Wednesday afternoon, March 19 and Thursday, March 20. I would very much like to see you for a little while at that time in order to discuss some problems of mutual interest. On my way to California I am going to spend a few hours in Chicago on March 6, and I shall phone then to find out whether either the 19th or 20th would be convenient for a short visit.

Very sincerely

*Werner Braun*

Dear Dr. Szilard:

This is to let you know that the membrane filters are now commercially available. They are being manufactured under the name of "Millipore Filters" by the Lovell Chemical Co., Watertown 72, Mass.

With best personal regards,

Sincerely yours,

*Werner Braun*
