Biogeochemical quality control of optical backscattering data from Biogeochemical Argo floats. Battisti, G., T. V. S. S. Gillie, and F. J. Michaels (2023). Revisiting the quality control of optical backscattering data from Biogeochemical Argo floats. *Open Res Europe*, 2, 118. DOI:10.12688/openreseurope.15047.1

The Role of Continental Topography in the Present-Day Ocean's Mean Climate. Prent, C. T., A. R. Gray, T. D. Tilley, S. T. Gillie, P. Haumann, K. S. Johnson, S. C. Riser, I. Rossi, I. Savine, and J. L. Sarmiento (2021). The Role of Continental Topography in the Present-Day Ocean's Mean Climate. *J. Climate*, DOI:10.1175/JCLI-D-20-0901.1

Atmospheric CO₂ and temperature variability in global ocean dissolved inorganic carbon. Chen, L., F.A. Hannigan, L.D. Tilley, K.S. Johnson, J. Sarmiento (2022). The deep ocean's carbon exhaust. *Global Biogeochemical Cycles*, 36, DOI:10.1029/2021GB007156

Sub-surface forcing drives year-to-year variations of Southern Ocean primary productivity. Prent, C. T., M.G. McKinley, M. Levy, C. Antonietti, S.T. Gillie, and T.D. Tilley (2022). Sub-surface forcing drives year-to-year variations of Southern Ocean primary productivity. *Global Biogeochemical Cycles*, 36, (7).

Seasonal and interannual variability of the Antarctic Slope Current in the Southern Ocean response to ice sheet melt and wind stress change. Beedle, R. J., L.P. Krueger, S.M. Griffies, W.H. Hurlin, R. Brodeau, et al. (2022). Importance of the Antarctic Slope Current in the Southern Ocean response to ice sheet melt and wind stress change. *Journal of Geophysical Research: Oceans*, 127, e2021JC017608. DOI:10.1029/2021JC017608

Trophic Level Decoupling drives future changes in phytoplankton bloom phenology. Yamaguchi, T., A. R. Gray, T. D. Tilley, A. Himmerich, T. L. Mamer, J. L. Sarmiento, et al. (2022). Impact of shortwave longwave radiative deficits on Antarctic sea-ice extent predictability during the sea ice growth period. *Environ. Res. Lett.*, 17, 084003. DOI:10.1088/1748-9326/AB4663

Reactive float tracking with the Kalman smoother. Prent, C. T., A. R. Gray, T. D. Tilley, S. T. Gillie, P. Haumann, K. S. Johnson, S. C. Riser, I. Rossi, I. Savine, and J. L. Sarmiento (2022). Reactive float tracking with the Kalman smoother. *Journal of Geophysical Research: Oceans*, 127, e2022JC018970. DOI:10.1029/2022JC018970

Vertical mixing and phytoplankton growth and productivity inferred from Biogeochemical Argo floats and the Carbon-based Productivity Model. Arengua, T., A. M. J. T. Tilley, D. Tilley, T. W. Webster (2023). Vertical structure in phytoplankton growth and productivity inferred from Biogeochemical Argo floats and the Carbon-based Productivity Model. *Global Biogeochemical Cycles*, 36, e2022GB007389. DOI:10.1029/2022GB007389

Investigating the predictability of DIC and SST in the Argentine Basin through wind perturbation experiments. Prent, C. T., M.R. Mazloff, J. L. Russell, R. Beedle, A. J. Broccoli, J. P. Knutson, M. S. Malvezzini, and Z. Nataian (2021). Investigating the predictability of DIC and SST in the Argentine Basin through wind perturbation experiments. *Geophysical Research Letters*, 48, e2021GL095504. DOI:10.1029/2021GL095504

Democracy in the Arctic: Variability of sea-ice melt ventilation. MacGillivray, G., H.J. Johnson, C. Lipcius, C. D. P. Marshall (2021). Democracy in the North Atlantic: Variability of deep ocean ventilation. *Geophysical Research Letters*, 48, e2020GL023140. DOI:10.1029/2020GL023140

Bringing local and remote influences in two major pelagic habitats in the oligotrophic Southern Ocean. Jones, D. C., F. R. Araujo, C. Murphy, K. Delord, R. W. Furness, R. A. Phillips, R. P. Sagart, J.-B. Sallée, B. Schreiber, D.R. Thompson, L.G. Torres, P.J. Underwood, H. Weimerskirch, and J.C. Xavier (2021). Untangling local and remote influences in two major pelagic habitats in the oligotrophic Southern Ocean. *Glob. Change Biology*, 27, 5773–5785. DOI:10.1111/gcb.15309

Developing a multi-layer model of oxygen fluxes and uptake in a regional ocean circulation model of the Argentine Basin. Szwarczak, S., M.R. Mazloff, M.J. McConnell, J. L. Russell, and J. L. Sarmiento (2021). The effect of resolution on vertical heat and carbon transports in a regional ocean circulation model of the Argentine Basin. *Journal of Geophysical Research: Oceans*, 126, e2020JC017335. DOI:10.1029/2020JC017335

Seasonal Prediction and Projections of Regional Arctic Sea Ice. Busukta, M., W. M. Winton, S. M. Griffies, and T. D. Tilley (2020). The large-scale winter balance of the Antarctic continental margin in a fine-resolution global simulation. *J. Phys. Oceanogr.*, 50, 2173–2188. DOI:10.1175/JPO-D-19-0031.1
