After advancing to candidacy, the student will select a dissertation committee that will advise him or her throughout the writing of the dissertation, supply feedback on the material of the dissertation, and conduct the oral dissertation defense. The standard committee consists of five faculty members. Three of these faculty members will be from the Department of Philosophy, and one of these (who must be tenured) will be designated as the principal director of the student's dissertation. In addition to the three philosophy faculty, the dissertation committee must include at least two faculty from outside the Department of Philosophy, at least one of whom must be a tenured UC San Diego faculty member.

## MASTER'S DEGREE

The UCSD Department of Philosophy does not admit students with the intention of completing their studies at the master's level. Nonetheless, Ph.D. students in the department sometimes elect to receive the master's degree in the course of their academic progress.

To qualify for a master's degree in philosophy, a student must pass eight of the distribution requirement seminars as described above, under the subheading "[Distribution Requirements](#)." No more than four seminars from any one of the five areas may count toward the master's degree. The student must also complete a master's research paper under the direction of a faculty member or his or her choice, and have it approved by two members of the department faculty.

## INTERDISCIPLINARY DEGREE PROGRAMS

The philosophy department at UCSD participates in three interdisciplinary programs, the requirements for which are outlined below.

### INTERDISCIPLINARY DEGREE PROGRAM IN COGNITIVE SCIENCE

The Interdisciplinary Ph.D. Program in Cognitive Science includes faculty from a number of UCSD departments including the Departments of Anthropology, Biology and Neurobiology, Cognitive Science, Communication, Computer Science and Engineering, Linguistics, Music, Neurosciences, Philosophy, Psychiatry, Psychology, and Sociology. This group includes many outstanding figures in contemporary cognitive science.

Students wishing to pursue a Ph.D. in philosophy and cognitive science register in the philosophy program in the normal fashion, but pursue a significant portion of their studies with faculty in the several departments participating in the interdisciplinary program. Students may apply for admission to the interdisciplinary program at the same time that they apply to the Department of Philosophy, or at some point after entering UCSD. (All students wishing to transfer into any interdisciplinary program must do so prior to the end of the fifth quarter of residency.)

Students in philosophy/cognitive science are required to complete all of the requirements for the Ph.D. in philosophy with the following five amendments:

1. The student must take six quarters of Cognitive Science 200.
2. The student must take the equivalent of one year's course work (usually six courses) in one or more of the other departments affiliated with the Department of Cognitive Science. (It should be noted that a philosophy graduate student who completes this requirement is deemed thereby to have satisfied the philosophy special skills requirement by gaining an approved special competency.)
3. The distribution requirement is amended as follows. Before advancing to candidacy a philosophy/cognitive science student must have completed nine graduate seminars in philosophy distributed across the areas of (A) philosophy of

science, (B) philosophy of mind and philosophy of language, (C) ethics and political philosophy, (D), epistemology and metaphysics, and (E) history of philosophy. The student must take at least one seminar from each of these five areas and at least two seminars from any four of these areas.

4. The course work requirement is amended as follows: Over the first two years, a philosophy/cognitive student will normally take at least three courses/seminars per quarter. Besides graduate seminars in philosophy and cognitive science, these may include up to two independent studies in philosophy, upper-division courses in philosophy (those numbered 100–199), approved upper-division or graduate courses in cognitive science and affiliated departments, and, if the student is a teaching assistant, Philosophy 500 (Apprentice Teaching). (It should be noted that philosophy/cognitive students who complete all the other requirements for cognitive studies and who complete the amended distribution requirement above are thereby deemed to have completed the fourteen graduate seminars required of students prior to their advancing to candidacy.)
5. A plan detailing the course of study must be approved by the Cognitive Science Program Committee. The dissertation should be interdisciplinary, reflecting the two areas of specialization.

### INTERDISCIPLINARY PROGRAM IN SCIENCE STUDIES

The Science Studies Program at UCSD is committed to interdisciplinary investigations. Understanding, interpreting, and explaining the scientific enterprise demand a systematic integration of the perspectives developed within the communication of science, history of science, sociology of science, and philosophy of science. The program offers students an opportunity to work towards such integration, while receiving a thorough training at the professional level in one of the component disciplines (communications, history, sociology, philosophy).

Students enrolled in the program choose one of the component disciplines for their major field of specialist studies (for students enrolled in the Department of Philosophy, this major field is, of course, philosophy), and are required to complete minor field requirements in the others. The core of the program, however, is a year-long seminar in science studies, led by faculty from all participating departments.

Students may apply for admission to the interdisciplinary program at the same time that they apply to the Department of Philosophy, or at some point after entering UCSD. (All students wishing to transfer into any interdisciplinary program must do so prior to the end of the fifth quarter of residency.)

Students in philosophy/science studies are required to complete all of the requirements for the Ph.D. in philosophy with the following seven amendments:

1. The student must attend the Science Studies Colloquium series for his or her entire first and second years. He or she will receive course credit (course 209C) in any two quarters of his or her

- choice (once in the first year and once in the second year, with exceptions to be considered by the director of science studies). This course is taken for an S/U grade option only.
- Before defending his or her prospectus, the student must take Introduction to Science Studies I (209A), Introduction to Science Studies II (209D), and two iterations (with changed content) of the Core Seminar in Science Studies (209B). (These courses are required in addition to the proseminar in philosophy which is required of all Ph.D. students in philosophy.)
  - The student must, prior to defending his or her prospectus, take two additional science studies courses outside philosophy drawn from a list of approved courses available each year from the Science Studies Program office. (One course in one of the sciences may be substituted for one of these courses as part of an approved program of study.)
  - The distribution requirement is amended as follows. Before advancing to candidacy, a philosophy/science studies student must have completed nine seminars in philosophy distributed across the areas of (A) philosophy of science, (B) philosophy of mind and philosophy of language, (C) ethics and political philosophy, (D) metaphysics and epistemology, and (E) history of philosophy. Students must take at least one seminar from each of these five areas and at least two seminars from any four of these areas.
  - The course work requirement is amended as follows. Over the first two years, a philosophy/science studies student will normally take at least three courses/seminars per quarter. Besides graduate seminars in philosophy and science studies, these may include up to two independent studies in philosophy, upper-division courses in philosophy (those numbered 100–199), approved upper-division or graduate courses in science studies and affiliated departments, and, if the student is a teaching assistant, Philosophy 500 (Apprentice Teaching). (It should be noted that philosophy/science studies students who complete all the other requirements for science studies and who complete the amended distribution requirements for philosophy are thereby deemed to have completed the fourteen graduate seminars required of students prior to their advancing to candidacy.)
  - The student's program of study must be approved by the Department of Philosophy faculty advisor for science studies.
  - At least two internal members and at least one external member of the student's dissertation committee should be faculty of the Science Studies Program. Exceptions to this policy require permission from the director of the Science Studies Program.

#### DUAL DEGREE PROGRAM WITH UNIVERSITY OF SAN DIEGO LAW SCHOOL

Students pursuing the Ph.D. in philosophy at UCSD can also pursue a degree at the University of San Diego (USD) School of Law, either the J.D.

(normally a three-year degree) or the M.S.L.S. (a one-year master's degree). Students must be admitted independently to the two programs and must complete the requirements for both programs. Once admitted to both programs, the expectation is that students would first complete their first two years of Ph.D. course work and any associated qualifying exams at UCSD. They can then take a leave from the UCSD program, freezing their clock here, to complete the appropriate course work at USD. For their M.S.L.S. degree, this will require a one-year leave, while for their J.D. degree this will require two years leave. While on leave, students would not be eligible for financial aid from UCSD. Students would then return to UCSD to complete their Ph.D., drawing on their combined training here and at USD in their thesis research, and getting advice on their research from faculty at both universities. Each program will make specific arrangements to grant some course credit toward their degrees for courses taken at the other university. The expectation is that students will pursue dual degrees serially, rather than concurrently, and that the UCSD clock will stop while students are enrolled at USD. Consequently, in the normal course of events the UCSD Department of Philosophy sees no special need for extending time limits on advancing to candidacy, years of support, or time toward the degree. However, exceptional cases can be handled by petition.

#### PH.D. TIME LIMIT POLICIES

Students must be advanced to candidacy by the end of four years. The department's normative time to graduation is six years. Total university support cannot exceed seven years. Total registered time at UCSD cannot exceed eight years.

#### APPLICATION REQUEST

For information regarding the graduate program call (858) 534-6809 or write to

University of California, San Diego  
Graduate Advisor, Philosophy  
9500 Gilman Dr. # 0119  
La Jolla, CA 92093-0119

### COURSES

*For course descriptions not found in the UC San Diego General Catalog, 2010–11, please contact the department for more information.*

#### LOWER-DIVISION

##### 1. Introduction to Philosophy (4)

A general introduction to some of the fundamental questions, texts, and methods of philosophy. Multiple topics will be covered, and may include the existence of God, the nature of mind and body, free will, ethics and political philosophy, knowledge and skepticism.

##### 10. Introduction to Logic (4)

Basic concepts and techniques in both informal and formal logic and reasoning, including a discussion of argument, inference, proof, and common fallacies, and an introduction to the syntax, semantics, and proof method in sentential (propositional) logic. (May be used to fulfill general-education requirements for Warren and Eleanor Roosevelt Colleges.)

##### 12. Logic and Decision Making (4)

An introduction to the study of probability, inductive logic, scientific reasoning, and rational choice among competing hypotheses and alternative courses of action when the evidence is incomplete or uncertain. (May be used to fulfill general-education requirements for Marshall, Warren, and Eleanor Roosevelt Colleges.)

##### 13. Introduction to Philosophy: Ethics (4)

An inquiry into the nature of morality and its role in personal or social life by way of classical and/or contemporary works in ethics. (May be used to fulfill general-education requirements for Muir and Marshall Colleges.)

##### 14. Introduction to Philosophy: The Nature of Reality (4)

A survey of central issues and figures in the Western metaphysical tradition. Topics include the mind-body problem, freedom and determinism, personal identity, appearance and reality, and the existence of God.

##### 15. Introduction to Philosophy: Knowledge and Its Limits (4)

A study of the grounds and scope of human knowledge, both commonsense and scientific, as portrayed in the competing traditions of Continental rationalism, British empiricism, and contemporary cognitive science.

##### 25. Science, Philosophy, and the Big Questions (4)

An inquiry into fundamental questions at the intersection of science and philosophy. Topics can include Einstein's universe; scientific revolutions; the mind and the brain.

##### 26. Science, Society, and Values (4)

An exploration of the interaction between scientific theory and practice on the one hand, and society and values on the other. Topics can include the relationship between science and religion, global climate change, DNA, medicine, and ethics.

##### 27. Ethics and Society (4)

(Same as Poli. Sci. 27.) An examination of ethical principles (e.g., utilitarianism, individual rights, etc.) and their social and political applications to contemporary issues: abortion, environmental protection, and affirmative action. Ethical principles will also be applied to moral dilemmas in government, law, business, and the professions. Satisfies the Warren College ethics and society requirement. Letter grade only. **Prerequisites:** CAT 2 and 3, DOC 2 and 3, MCWP 40 and 50, Hum. 1 and 2, MMW 2 and 3, WCWP 10A-B or WCWP 11A-B.

##### 28. Ethics and Society II (4)

(Same as Poli. Sci. 28.) An examination of a single set of major contemporary social, political, or economic issues (e.g., environmental ethics, international ethics) in light of ethical and moral principles and values. Warren College students must take course for a letter grade in order to satisfy the Warren College general-education requirement. **Prerequisite:** Phil./Poli. Sci. 27.

##### 31. Introduction to Ancient Philosophy (4)

A survey of classical Greek philosophy with an emphasis on Socrates, Plato and Aristotle, though some consideration may be given to Presocratic and/or Hellenistic philosophers.

##### 32. History of Philosophy: Philosophy and the Rise of Modern Science (4)

Beginning with the contrast between medieval and early modern thought, the course focuses on the relation of seventeenth-century philosophy and the emergence of modern natural science. Figures to be studied include Bacon, Galileo, Descartes, Hobbes, Leibniz, and Newton.

##### 33. History of Philosophy: Philosophy between Reason and Despair (4)

Introduction to nineteenth-century philosophy, focusing on skepticism about the authority of reason to answer questions about the ultimate meaning and value of human life. Figures discussed may include Kant, Schopenhauer, Kierkegaard, Nietzsche, and James.

##### 87. Freshman Seminar (1)

The Freshman Seminar Program is designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminars are offered in all campus departments

and undergraduate colleges, and topics vary from quarter to quarter. Enrollment is limited to fifteen to twenty students, with preference given to entering freshmen.

#### **90. Basic Problem in Philosophy (4)**

An investigation of a selected philosophical topic through readings, discussions, and written assignments. (May be taken for credit twice, when topics vary.)

### **UPPER-DIVISION**

#### **100. Plato (4)**

A study of Socrates and/or Plato through major dialogues of Plato. Possible topics include the virtues and happiness; weakness of the will; political authority and democracy; the theory of Forms and sensible flux; immortality; relativism, skepticism, and knowledge. May be repeated for credit with change of content and approval of instructor. **Prerequisite:** upper-division standing or consent of instructor.

#### **101. Aristotle (4)**

A study of major issues in Aristotle's works, such as the categories; form and matter; substance, essence, and accident; the soul; virtue, happiness, and politics. **Prerequisite:** upper-division standing or consent of instructor.

#### **102. Hellenistic Philosophy (4)**

A study of selected texts from the main schools of Hellenistic philosophy—Stoicism, Epicureanism, and Skepticism. **Prerequisite:** upper-division standing or consent of instructor.

#### **104. The Rationalists (4)**

The major writings of one or more of the seventeenth-century rationalists—Descartes, Spinoza, and Leibniz. Topics include the existence of God, the mind-body problem, free will, the nature of knowledge, belief, and error. May be repeated for credit with change of content and approval of instructor. **Prerequisite:** upper-division standing or consent of instructor.

#### **105. The Empiricists (4)**

The major writings of one or more of the British empiricists—Locke, Berkeley, Hume, and Reid. May be repeated for credit with change of content and approval of instructor. **Prerequisite:** upper-division standing or consent of instructor.

#### **106. Kant (4)**

A study of selected portions of the Critique of Pure Reason and other theoretical writings and/or his major works in moral theory. **Prerequisite:** Philosophy 33 or 105 or consent of instructor. May be repeated for credit with change in content and approval of the instructor.

#### **107. Hegel (4)**

A study of one or more of Hegel's major works, in particular, The Phenomenology of Spirit and The Philosophy of Right. Readings and discussion may also include other figures in the Idealist tradition—such as Fichte, Hölderlin, and Schelling—and critics of the Idealist tradition—such as Marx and Kierkegaard. **Prerequisite:** upper-division standing or consent of instructor.

#### **108. Nineteenth-Century Philosophy (4)**

A study of one or more figures in nineteenth-century philosophy, such as Schopenhauer, Nietzsche, Kierkegaard, Marx, Emerson, Thoreau, James, and Mill. The focus may be on particular figures or intellectual themes and traditions. May be repeated for credit with change of content and approval of instructor. **Prerequisite:** upper-division standing or consent of instructor.

#### **109. History of Analytic Philosophy (4)**

Central texts, figures, and traditions in analytic philosophy. Figures may include Frege, Russell, Wittgenstein, Carnap, Moore, Austin, Tarski, Quine, Davidson, Kripke, and Putnam. May be repeated for credit with change of content and approval of the instructor. **Prerequisite:** upper-division standing or consent of instructor.

#### **115. Philosophical Methods Seminar (4)**

This course provides an introduction to the techniques of philosophical inquiry through detailed study of selected philosophical texts and through extensive training in philosophical writing based on those texts. Enrollment

limited and restricted to majors; must be taken for letter grade. May not be repeated for credit. **Prerequisite:** open to philosophy majors only.

#### **120. Symbolic Logic I (4)**

The syntax, semantics, and proof-theory of first-order predicate logic with identity, emphasizing both conceptual issues and practical skills (e.g., criteria for logical truth, consistency, and validity, the application of logical methods to everyday as well as scientific reasoning). **Prerequisite:** Philosophy 10 or consent of instructor.

#### **122. Topics in Logic (4)**

A study of new, extended, or alternative logics and/or special issues in meta-logic. Topics include the nature of logic, modal logic, higher-order logic, generalized logic, free logic, the Löwenheim-Skolem theorem, the incompleteness of arithmetic, undecidability. May be repeated for credit with change in content and approval of instructor. **Prerequisite:** Philosophy 120 (and for advanced topics: Philosophy 121) or consent of instructor.

#### **123. Philosophy of Logic (4)**

Philosophical issues underlying standard and non-standard logics, the nature of logical knowledge, the relation between logic and mathematics, the revisability of logic, truth and logic, ontological commitment and ontological relativity, logical consequence, etc. May be repeated for credit with change in content and approval of instructor. **Prerequisite:** Philosophy 120 or consent of instructor.

#### **124. Philosophy of Mathematics (4)**

The character of logical and mathematical truth and knowledge; the relations between logic and mathematics; the significance of Gödel's incompleteness theorem; Platonism, logicism, and more recent approaches. **Prerequisite:** Philosophy 120 or consent of instructor.

#### **125. Games and Decisions (4)**

Formal and philosophical issues in the theory of games and the theory of rational decision. **Prerequisite:** Philosophy 12 or consent of instructor.

#### **126. Topics in the History of Logic (4)**

Problems and figures in history of logic. Subject matter varies, in some cases a single author or text (e.g., Aristotle, The Port Royal Logic, Leibniz, Kant, Frege, Tarski), in other a particular tradition or problem (e.g., Hilbert's Program, intuitionism, quantification, logicism and psychologism, modality). **Prerequisite:** Philosophy 120 or consent of instructor.

#### **130. Metaphysics (4)**

Central problems in metaphysics, such as free will and determinism, the mind-body problem, personal identity, causation, primary and secondary qualities, the nature of universals, necessity, and identity. **Prerequisite:** upper-division standing or consent of instructor.

#### **131. Topics in Metaphysics (4)**

An in-depth study of some central problem, figure, or tradition in metaphysics. May be repeated for credit with change of content and approval of instructor. **Prerequisite:** upper-division standing or consent of instructor.

#### **132. Epistemology (4)**

Central problems in epistemology such as skepticism; a priori knowledge; knowledge of other minds; self-knowledge; the problem of induction; foundationalist, coherence, and causal theories of knowledge. **Prerequisite:** upper-division standing or consent of instructor.

#### **134. Philosophy of Language (4)**

Examination of contemporary debates about meaning, reference, truth, and thought. Topics include descriptivist theories of reference, sense and reference, compositionality, truth, theories of meaning, vagueness, metaphor, and natural and formal languages. **Prerequisite:** upper-division standing or consent of instructor.

#### **136. Philosophy of Mind (4)**

Different conceptions of the nature of mind and its relation to the physical world. Topics include identity theories, functionalism, eliminative materialism, internalism and externalism, subjectivity, other minds, consciousness, self-knowledge, perception, memory, and imagination.

**Prerequisite:** upper-division standing or consent of instructor.

#### **137. Philosophy of Action (4)**

The nature of action and psychological explanation. Topics include action individuation, reasons as causes, psychological laws, freedom and responsibility, weakness of will, self-deception, and the emotions. **Prerequisite:** upper-division standing or consent of instructor.

#### **145. Philosophy of Science (4)**

Central problems in philosophy of science, such as the nature of confirmation and explanation, the nature of scientific revolutions and progress, the unity of science, and realism and antirealism. **Prerequisite:** upper-division standing or consent of instructor.

#### **146. Philosophy of Physics (4)**

Philosophical problems in the development of modern physics, such as the philosophy of space and time, the epistemology of geometry, the philosophical significance of Einstein's theory of relativity, the interpretation of quantum mechanics, and the significance of modern cosmology. **Prerequisite:** upper-division standing or consent of instructor.

#### **147. Philosophy of Biology (4)**

Philosophical problems in the biological sciences, such as the relation between biology and the physical sciences, the status and structure of evolutionary theory, and the role of biology in the social sciences. **Prerequisite:** upper-division standing or consent of instructor.

#### **148. Philosophy and the Environment (4)**

Investigation of ethical and epistemological questions concerning our relationship to the environment. Topics may include the value of nature, biodiversity, policy and science, and responsibility to future generations. **Prerequisite:** upper-division standing or consent of instructor.

#### **149. Philosophy of Psychology (4)**

Philosophical issues raised by psychology, including the nature of psychological explanation, the role of nature versus nurture, free will and determinism, and the unity of the person. **Prerequisite:** upper-division standing or consent of instructor.

#### **150. Philosophy of the Cognitive Sciences (4)**

Theoretical, empirical, methodological, and philosophical issues at work in the cognitive sciences (e.g., Psychology, Linguistics, Neuroscience, Artificial Intelligence, and Computer Science), concerning things such as mental representation, consciousness, rationality, explanation, and nativism. **Prerequisite:** upper-division standing or consent of instructor.

#### **151. Philosophy of Neuroscience (4)**

An introduction to elementary neuroanatomy and neurophysiology and an examination of theoretical issues in cognitive neuroscience and their implications for traditional philosophical conceptions of the relation between mind and body, perception, consciousness, understanding, emotion, and the self. **Prerequisite:** upper-division standing or consent of instructor.

#### **152. Philosophy of Social Science (4)**

Philosophical issues of method and substance in the social sciences, such as causal and interpretive models of explanation, structuralism and methodological individualism, value neutrality, and relativism. **Prerequisite:** upper-division standing or consent of instructor.

#### **157. History of Philosophy: Ancient (4)**

An examination of ancient Greek philosophy, focusing on major works of Plato and Aristotle. It is recommended that Phil. 157, Phil. 158, and Phil. 159 be taken in order. **Prerequisites:** upper-division standing and department stamp, or consent of instructor.

#### **158. History of Philosophy: Early Modern (4)**

An examination of seventeenth- and eighteenth-century philosophy, focusing on major works of Descartes, Locke, and Hume. It is recommended that Phil. 157, Phil. 158, and Phil. 159 be taken in order. **Prerequisites:** upper-division standing and department stamp, or consent of instructor.

**159. History of Philosophy: Late Modern**

An examination of late eighteenth-century philosophy, focusing on major works of Kant and Hegel. It is recommended that Phil. 157, Phil. 158, and Phil. 159 be taken in order. **Prerequisites:** upper-division standing and department stamp, or consent of instructor.

**160. Ethical Theory (4)**

Systematic and/or historical perspectives on central issues in ethical theory such as deontic, contractualist, and consequentialist conceptions of morality; rights and special obligations; the role of happiness and virtue in morality; moral conflict; ethical objectivity and relativism; and the rational authority of morality. **Prerequisite:** upper-division standing or consent of instructor.

**161. Topics in the History of Ethics (4)**

Central issues and texts in the history of ethics. Subject matter can vary, ranging from one philosopher (e.g., Aristotle, Hobbes, Kant, or Mill) to a historical tradition (e.g., Greek ethics or the British moralists). May be repeated for credit with change in content and approval of instructor. **Prerequisite:** upper-division standing or consent of instructor.

**162. Contemporary Moral Issues (4)**

An examination of contemporary moral issues, such as abortion, euthanasia, war, affirmative action, and freedom of speech. **Prerequisite:** upper-division standing or consent of instructor.

**163. Biomedical Ethics (4)**

Moral issues in medicine and the biological sciences, such as patient's rights and physician's responsibilities, abortion and euthanasia, the distribution of health care, experimentation, and genetic intervention. **Prerequisite:** upper-division standing or consent of instructor.

**164. Technology and Human Values (4)**

Philosophical issues involved in the development of modern science, the growth of technology, and control of the natural environment. The interaction of science and technology with human nature and political and moral ideals. **Prerequisite:** upper-division standing or consent of instructor.

**166. Classics in Political Philosophy (4)**

Central issues about the justification, proper functions, and limits of the state through classic texts in the history of political philosophy by figures such as Plato, Aristotle, Hobbes, Locke, Rousseau, Mill, and Marx. **Prerequisite:** upper-division standing or consent of instructor.

**167. Contemporary Political Philosophy (4)**

Different perspectives on central issues in contemporary political philosophy, such as the nature of state authority and political obligation, the limits of government and individual liberty, liberalism and its critics, equality and distributive justice. **Prerequisite:** upper-division standing or consent of instructor.

**168. Philosophy of Law (4)**

A study of issues in analytical jurisprudence such as the nature of law, the relation between law and morality, and the nature of legal interpretation and issues in normative jurisprudence such as the justification of punishment, paternalism and privacy, freedom of expression, and affirmative action. **Prerequisite:** upper-division standing or consent of instructor.

**170. Philosophy and Race (4)**

A philosophical investigation of the topics of race and racism. The role of "race" in ordinary speech. The ethics of racial discourse. Anthropological and biological conceptions of race. The social and political significance of racial categories. Post-racialist conceptions of race. **Prerequisite:** upper-division standing or consent of instructor.

**175. Aesthetics (4)**

Central issues in philosophical aesthetics such as the nature of art and aesthetic experience, the grounds of artistic interpretation and evaluation, artistic representation, and the role of the arts in education, culture, and politics. **Prerequisite:** upper-division standing or consent of instructor.

**177. Philosophy and Literature (4)**

A study of philosophical themes contained in selected fiction, drama, or poetry, and the philosophical issues that arise in the interpretation, appreciation, and criticism of literature. **Prerequisite:** upper-division standing or consent of instructor.

**180. Phenomenology (4)**

An examination of the phenomenological tradition through the works of its major classical and/or contemporary representatives. Authors studied will vary and may include Brentano, Husserl, Heidegger, Merleau-Ponty, Levinas, Bourdieu. **Prerequisite:** upper-division standing or consent of instructor.

**181. Existentialism (4)**

Classical texts and issues of existentialism. Authors studied will vary and may include Nietzsche, Kierkegaard, Sartre, and Heidegger. **Prerequisite:** upper-division standing or consent of instructor.

**183. Topics in Continental Philosophy (4)**

The focus will be on a leading movement in continental philosophy (e.g., the critical theory of the Frankfurt school, structuralism and deconstruction, post-modernism) or some particular issue that has figured in these traditions (e.g., freedom, subjectivity, historicity, authenticity). May be repeated for credit with change in content and approval of instructor. **Prerequisite:** upper-division standing or consent of instructor.

**185. Philosophy of Religion (4)**

A general introduction to the philosophy of religion through the study of classical and/or contemporary texts. Among the issues to be discussed are the existence and nature of God, the problem of evil, the existence of miracles, the relation between reason and revelation, and the nature of religious language. **Prerequisite:** upper-division standing or consent of instructor.

**191A. Philosophy Honors (4)**

Independent study by special arrangement with and under the supervision of a faculty member, including a proposal for the honors essay. An IP grade will be awarded at the end of this quarter; a final grade will be given for both quarters at the end of 191B. **Prerequisites:** department stamp; consent of instructor.

**191B. The Honors Essay (4)**

Continuation of 191A: independent study by special arrangement with and under the supervision of a faculty member, leading to the completion of the honors essay. A letter grade for both 191A and 191B will be given at the end of this quarter. **Prerequisite:** consent of instructor.

**192. Senior Seminar (1)**

The Senior Seminar Program is designed to allow senior undergraduates to meet with faculty members in a small group setting to explore an intellectual topic in PHIL (at the upper-division level). Senior seminars may be taken for credit up to four times, with a change in topic, and permission of the department. Enrollment is limited to twenty students, with preference given to seniors. **Prerequisites:** upper-division standing; department stamp and/or consent of instructor.

**195. Introduction to Teaching Philosophy (4)**

Under the supervision of the instructor, student will lead one discussion section of a lower-division philosophy class. The student must attend the lecture for the class and meet regularly with the instructor. Applications are available in the Department of Philosophy. **Prerequisites:** consent of instructor and department chair, G.P.A. of 3.0 or higher, over ninety units.

**199. Directed Individual Study (4)**

Directed individual study by special arrangement with and under the supervision of a faculty member. (P/NP grades only.) **Prerequisite:** consent of instructor.

**GRADUATE COURSES****200. Proseminar (4)**

Introduction to philosophical methods of analysis through study of classic historical or contemporary texts. Writing intensive. Enrollment limited to entering graduate students.

**201A. Core Course in History (4)**

A study of selected texts or topics in the history of philosophy. Usually the focus will be on a single major text. May be taken for credit nine times with changed content.

**202. Core Course in Ethics (4)**

An introduction to some central issues in ethical theory with emphasis on classic texts or contemporary authors. May be taken for credit three times with changed content.

**204A. Core Course in Philosophy of Science (4)**

An introduction to one or more central problems in the philosophy of science, or in the philosophy of one of the particular sciences, such as the nature of confirmation and explanation, the nature of scientific knowledge, reductionism, the unity of science, or realism and antirealism. May be taken for credit three times with changed content.

**205A. Core Course in Metaphysics (4)**

An introduction to central topics in metaphysics with emphasis on classic texts or contemporary authors. May be taken for credit three times with changed content.

**206A. Core Course in Epistemology (4)**

An introduction to central topics in epistemology with emphasis on classic texts or contemporary authors. May be taken for credit three times with changed content.

**209A. Introduction to Science Studies (4)**

Study and discussion of classic work in history of science, philosophy of science, and of work that attempts to develop a unified science studies approach. Required of all students in the Science Studies Program.

**209B. Seminar in Science Studies (4)**

Study and discussion of selected topics in the science studies field. Required of all students in the Science Studies Program. The topic varies from year to year and students may, therefore, repeat the course for credit. May be taken for credit three times with changed content.

**209C. Colloquium in Science Studies (4)**

A forum for the presentation and discussion of research in progress in science studies, by graduate students, faculty, and visitors. May be taken for credit two times with changed content.

**209D. Advanced Approaches to Science Studies (4)**

Contemporary themes and problems in science studies. Focus on recent literature in the history, philosophy, and sociology of science, technology, and medicine.

**210. Greek Philosophy (4)**

A study of selected texts or topics from the history of Greek philosophy. Usually centers on works by Plato or Aristotle. May be taken for credit six times with changed content.

**214. Early Modern Philosophy (4)**

A study of selected texts or topics from philosophers of the sixteenth and seventeenth centuries, Descartes, Spinoza, Leibniz, or Locke. May be taken for credit six times with changed content.

**215. Eighteenth-Century Philosophy (4)**

A study of selected texts or topics from philosophers of the eighteenth century: for example, Kant or Hume. May be taken for credit six times with changed content.

**218. Contemporary Analytical Philosophy (4)**

A study of the historical development of the analytical movement, with emphasis on major texts. May be taken for credit six times with changed content.

**222. Philosophy of Logic (4)**

A study of selected issues in the philosophy of logic. The focus may be on contemporary texts or historical works or both. May be taken for credit six times with changed content.

**230. Metaphysics (4)**

Topics may include identity, personal identity, universals and particulars, modality and possible worlds, causation, reduction, supervenience, freedom and determinism, space and time, and realism versus antirealism. May be taken for credit six times with changed content.

**232. Epistemology (4)**

This seminar will cover issues such as rival accounts of knowledge, justification, and warrant, traditional and

contemporary perspectives on empiricism, rationalism, and pragmatism, and skepticism. May be taken for credit six times with changed content.

**234. Philosophy of Language (4)**

Central issues in contemporary philosophy of language, such as the nature of linguistic meaning, truth, content, reference, the syntax and semantics of various linguistic constructions, presupposition, speech acts, the epistemology of language understanding and language learning, the mental/psychological basis of linguistic understanding and use. May be taken for credit six times with changed content.

**236. Philosophy of Mind (4)**

Contemporary debates on the nature, function, and operation of the mental. May include questions about the mind-body relation, mental causation, perception, consciousness, and mental representation. May be taken for credit six times with changed content.

**245. Philosophy of Science (4)**

This seminar will cover current books and theoretical issues in the philosophy of science. May be taken for credit seven times with changed content.

**246. Philosophy of Physics (4)**

Systematic problems and historical and contemporary perspectives on foundational issues in physics. May include issues in the philosophy of space and time, the interpretation of relativity theory and quantum mechanics, or the foundations of statistical mechanics and probability. May be taken for credit six times with changed content.

**Prerequisite:** graduate standing or consent of instructor.

**247. Philosophy of Biology (4)**

Historical and contemporary perspectives on foundational issues about biology. May include questions about the nature of biological explanation, the relation of biology to chemistry and physics, the status of attributions of function, and the relation of biology to the social sciences. May be taken for credit six times with changed content.

**250A. Philosophy of the Cognitive Sciences (4)**

Contemporary debates about the study of the mind-brain as studied in one or more of the empirical cognitive sciences. May include questions about the different strategies of explanation invoked, the conceptions of representation employed, the connections between theoretical models developed. May be taken for credit six times with changed content.

**260. Ethics (4)**

Topics may include metaethics (e.g., the semantics, metaphysics, epistemology, and normativity of ethics), consequentialism and deontology, moral psychology (e.g., freedom, responsibility, and weaknesses of will), or substantive moral problems. The approach may be systematic, historical, or both. May be taken for credit six times with changed content.

**267. Political Philosophy (4)**

Topics may include the nature and limits of state authority, liberty and equality, distributive justice, liberalism and its critics (e.g., feminists, libertarians, and others), or issues in jurisprudence. The focus may be on classic texts or contemporary authors. May be taken for credit six times with changed content.

**276. German Translation Workshop (1-2)**

This course meets weekly to provide training in reading and translating philosophical German. Students prepare in advance written translations of assigned passages. The course helps train graduate students preparing to take the Departmental German Exam. Can be taken nine times for credit with changed content.

**277. Phenomenology Reading Group (1-2)**

This course meets biweekly with students reading and presenting material from the phenomenological literature. The course is designed both for students doing active research in phenomenology and for those seeking to gain some familiarity with that tradition. Can be taken nine times for credit with changed content.

**278. Topics and Methods in Contemporary Philosophy (1-2)**

Investigation of central issues in contemporary philosophy. Content varies but typically will center on a recent and important philosophical book. Can be taken nine times for credit with changed content.

**279. Experimental Philosophy Laboratory (1-2)**

A weekly forum of presentations, EPL provides a wider range of content than a traditional seminar. Content varies, but the focus is on philosophical problems of mind, representation, language and consciousness through empirical and philosophical methods. Can be taken nine times for credit with changed content.

**280. Philosophy of Science Topics and Methods (1-2)**

This course meets weekly to discuss recent books or articles in philosophy of science. The reading is designed both for students doing active research in the field and for those seeking to gain some familiarity with it. Can be taken nine times for credit with changed content.

**281. History of Philosophy Research and Methods (1-2)**

This course meets to discuss work in progress in the history of philosophy. Its aim is to introduce understanding of the methods and standards of research in the field through constructive criticism of each other's work. Can be taken nine times for credit with changed content.

**282. Topics and Methods in Ethics (1-2)**

Weekly or biweekly meetings to discuss recent literature in ethics, broadly construed so as to include ethical theory, normative ethics, jurisprudence, and historical traditions in these fields. The course is suitable for those specializing in ethics and for those seeking some familiarity with the field. Can be taken nine times for credit with changed content.

**283. Topics and Methods in Political Philosophy (1-2)**

Weekly or biweekly meetings to discuss recent literature in political philosophy and historical tradition of this field. The course is suitable for those specializing in ethics and for those seeking some familiarity with the field.

**284. Philosophy of Biology Research Group (1-2)**

A research group for graduate students engaged in philosophy or history of the biological sciences. The group discusses biological, historical, and philosophical articles and books and ongoing research projects. Can be taken nine times for credit with change of content. **Prerequisite:** graduate standing or consent of instructor.

**285. Seminar on Special Topics (4)**

Focused examination of specific problems or themes in some area of philosophy. May be taken for credit nine times with changed content.

**286. Philosophy of Physics Reading Group (1-2)**

A research group for graduate students engaged in philosophy or history of the physical sciences. The group discusses physical, historical, and philosophical articles and books and ongoing research projects. Can be taken nine times for credit with change of content. **Prerequisite:** graduate standing or consent of instructor.

**287. Greek Reading Group (1-2)**

This group provides training in reading and translating philosophical Greek by having students prepare translations of passages and lead discussions. The group helps train graduate students preparing for Departmental Greek Exam. Can be taken nine times for credit with change of content. **Prerequisite:** graduate standing or consent of instructor.

**290. Directed Independent Study (4)**

Supervised study of individually selected philosophical topics. S/U grades permitted.

**292. Writing Workshop (1-3)**

Each enrolled student produces a research essay ready for publication, presents it to students and faculty, and offers critiques of other students' presentations. Units will vary according to enrollment in course. To be taken in fall quarter of third year of philosophy graduate study.

**295. Research Topics (1-12)**

Advanced individual research studies under the direction of a member of the staff. Hours of outside preparation will

vary with number of units taken. May be taken for credit nine times with changed content.

**299. Thesis Research (1-12)**

S/U grades permitted.

**500. Apprentice Teaching (1-4)**

A course designed to satisfy the requirement that graduate students should serve as teaching assistants, either in the Department of Philosophy or in one of the writing programs offered by the various colleges. Each Ph.D. candidate must teach the equivalent of quarter time for three academic quarters. Students are permitted to sign up as TAs for a maximum of eighteen quarters.

The Department of Physics was established in 1960 as the first new department of the UCSD campus. Since then it has developed a strong faculty and student body with unusually diversified interests which lie primarily in the following areas:

1. Physics of elementary particles
2. Quantum liquids and superconductivity
3. Solid state and statistical physics

4. Plasma physics
5. Astrophysics and space physics
6. Atomic and molecular collision and structure
7. Biophysics
8. Geophysics
9. Nonlinear dynamics
10. Computational physics

In addition to on-campus research facilities, the high energy program uses accelerators at SLAC, CERN, and Fermi Laboratory. The astrophysics program uses facilities at Keck, Lick, and Kitt Peak Observatories.

## THE UNDERGRADUATE PROGRAM

The Department of Physics offers undergraduate programs leading to the following degrees:

- B.S., Physics
- B.S., Physics with Specialization in Astrophysics
- B.S., Physics with Specialization in Biophysics
- B.S., Physics with Specialization in Computational Physics
- B.S., Physics with Specialization in Earth Sciences
- B.S., Physics with Specialization in Materials Physics
- B.A., General Physics
- B.A., General Physics/Secondary Education

A grade-point average of 2.0 or higher in the upper-division major program is required for graduation. Students must receive a grade of C- or better in any course to be counted toward fulfillment of the major requirements. In exceptional cases, students with a grade-point average in the major of 2.5 or greater may petition to have one grade of D accepted. All courses (lower- and upper-division) required for the major must be taken for a letter grade.

## SHANG-KENG MA AWARD

The Department of Physics presents the Shang-keng Ma Memorial Award at commencement each year to a graduating physics student who has shown exceptional ability and promise during the UCSD undergraduate years. The award was established in 1984 to commemorate the contributions of Professor Ma to the UCSD Department of Physics and to the field of theoretical condensed matter physics.

## JOHN HOLMES MALMBERG PRIZE

The John Holmes Malmberg Prize is presented annually at commencement to a graduating physics student who is recognized for potential for a career in physics and a measure of experimental inquisitiveness. This prize was established in 1993 in memory of Professor Malmberg who pioneered the use of non-neutral plasmas for sophisticated tests of plasma equilibrium, wave, and transport effects. He was an involved teacher of undergraduate and graduate students and was active in departmental and campus affairs.

## PHYSICS MAJOR (B.S. DEGREE)

The physics major provides a core of basic education in several principle areas of physics, with sufficient flexibility to allow students to prepare either for graduate school or a career in industry. Since in preparing for either goal, more than the required core courses are necessary, it is important for students to meet with a physics department advisor in deciding a schedule.

In the junior year, the emphasis is on macroscopic physics; the two principal physics subjects are electromagnetism and mechanics. The mathematics and computer background required for the physics program is completed in this year.

In the senior year, a sequence of courses in quantum physics provides the student the modern view of atomic and some aspects of sub-atomic physics and the principal analytical methods appropriate in this domain. The relation of the microscopic to the macroscopic world is the subject of courses in thermodynamics and statistical physics, with illustrations drawn from gas dynamics and solid-state physics. Upper-division laboratories teach students the essentials of physical measurement and building advanced equipment, as well as other aspects of experimental science.

The following courses are required for the physics major:

### Lower-Division

1. Physics 4A-B-C-D-E or Physics 2A-B-C-D1
2. Physics 2CL and 2DL
3. Chemistry 6A or 2 a programming course such as MAE 9 or MAE 10
4. Mathematics 20C-D-E-F

<sup>1</sup>The Physics 4 series is recommended, but the Physics 2 sequence is acceptable by petition, in which case both

<sup>2</sup>Chemistry 6A and a programming course are required

### Upper-Division

1. Physics 100A-B, 105A, 110A, 120A, 130A-B, 140A, and an additional laboratory course from the lab group: 120B, 121, 133, 173
2. Two courses from either the theoretical or experimental pre-grad-school sequence  
Theoretical pre-grad-school sequence: Phys. 100C, 105B, 110B, 130C, 140B  
Experimental pre-grad-school sequence: Phys. 100C, 110B, 120B, 130C, 140B
3. Restricted electives: Three upper-division (four-unit) or graduate courses in physics or mathematics (only one). Courses in other science disciplines may be substituted by petition.

For students wishing to prepare for graduate school it is important that all courses in either the theorist or experimentalist pre-grad-school sequence be taken. Mathematics 120A is also recommended.

## Suggested Schedule (pre-graduate school)

FALL	WINTER	SPRING
<b>JUNIOR YEAR</b>		
Phys. 100A	Phys. 100B	Phys. 120A
Phys. 105A	Phys. elective <sup>3</sup>	Phys. 130A
Phys. 110A	Phys. 105B2	
<b>SENIOR YEAR</b>		
Phys. 140A	Phys. 140B <sup>2</sup>	Phys. lab <sup>1</sup>
Phys. 130B	Phys. elective <sup>3</sup>	Phys. elective <sup>3</sup>
<b>WINTER</b>		
Phys. 100B	<b>SPRING</b>	
Phys. elective <sup>3</sup>	Phys. 120A	
Phys. 105B <sup>2</sup>	Phys. 130A	
Phys. 140B <sup>2</sup>	Phys. lab <sup>1</sup>	
Phys. elective <sup>3</sup>	Phys. elective <sup>3</sup>	

<sup>1</sup>Any course from lab group listed above

<sup>2</sup>Any two courses from theoretical or experimental pre-grad-school sequence listed above

<sup>3</sup>Any restricted elective as described above

## Suggested Schedule (career in industry)

FALL	WINTER	SPRING
<b>JUNIOR YEAR</b>		
Phys. 100A	Phys. 100B	[pre-grad] <sup>4</sup>
Phys. 105A	Phys. elective <sup>3</sup>	Phys. 120A
Phys. 110A	[other] <sup>5</sup>	Phys. 130A
<b>SENIOR YEAR</b>		
Phys. 140A	[pre-grad] <sup>4</sup>	Phys. elective <sup>3</sup>
Phys. lab <sup>2</sup>	Phys. elective <sup>3</sup>	[other] <sup>5</sup>
Phys. 130B	[other] <sup>5</sup>	

<sup>2</sup>Any course from lab group listed above

<sup>3</sup>Any restricted elective as described above

<sup>4</sup>any course from either pre-grad-school sequence listed above

<sup>5</sup>any other course as approved by advisor (optional)

## PHYSICS MAJOR WITH SPECIALIZATION IN ASTROPHYSICS (B.S. DEGREE)

The astrophysics specialization is appropriate for students who would like to gain an in-depth understanding of modern astronomy and astrophysics, and/or who wish to prepare for graduate school in astronomy or astrophysics. It is similar to the standard physics major with electives being chosen from astronomically oriented courses. A wide variety of technical, academic, and professional careers are possible for students who choose this specialization.

The following courses are required for the physics major with specialization in astrophysics:

### Lower-Division

1. Physics 4A-B-C-D-E or Physics 2A-B-C-D<sup>1</sup>
2. Physics 2CL and 2DL
3. Chemistry 6A or 2 a programming course such as MAE 9 or MAE 10
4. Mathematics 20C-D-E-F

<sup>1</sup>The Physics 4 series is recommended, but the Physics 2 sequence is acceptable, in which case both

Chemistry 6A and a programming course are required.

### Upper-Division

1. Physics 100A-B, 105A, 110A, 120A, 130A-B, 140A and an additional laboratory course from the lab group: 120B, 121, 133.

2. Two courses from either the theoretical or experimental pre-grad-school sequence.
3. It is recommended that students take the three quarter astrophysics sequence—Physics 160, 161, 162—but any three courses selected from the following list are acceptable:

Physics 160, Stellar Astrophysics

Physics 161, Compact Objects and the Milky Way

Physics 162, Galaxies and Cosmology

Physics 163, Solar System

ECE 120, Solar System Physics

Chem. 170, Cosmochemistry

SIO 130, Geodynamics of Terr. Planets

MAE 180A, Space Science and Engineering 180 A/B

Physics 223, Stellar Structure and Evolution; with consent of Instructor

Physics 224, Interstellar Medium; with consent of Instructor

Physics 226, Galaxies & Galactic Dynamics; with consent of Instructor

Physics 227, Cosmology; with consent of Instructor

Physics 228, High Energy and Compact Objects; with consent of Instructor

Theoretical pre-grad-school sequence: Phys. 100C, 105B, 110B, 130C, 140B

Experimental pre-grad-school sequence: Phys. 100C, 110B, 120B, 130C, 140B

## Example Schedule

FALL	WINTER	SPRING
<b>JUNIOR YEAR</b>		
Phys 100A	Phys 100B	Phys 120A
Phys 105A	Phys 105B <sup>1</sup>	Phys 130A
Phys 110A		
<b>SENIOR YEAR</b>		
Phys 140A	Phys 140B	Physics Lab <sup>2</sup>
Phys 160	Phys 161	Phys 162
Phys 130B		

<sup>1</sup>Experimentalists may replace 105B with an additional lab.

<sup>2</sup>Any course from lab group listed above

## PHYSICS MAJOR WITH SPECIALIZATION IN BIOPHYSICS (B.S. DEGREE)

The Department of Physics offers an undergraduate program that prepares students for careers in biophysics. This program leads to a degree in "B.S., Physics with Specialization in Biophysics." As a terminal degree, it is an excellent education for students who wish to work in the biotechnology industry, and provides an ideal background for students who plan to attend graduate or professional school in biological or biomedical fields.

This program is intended for students with a strong interest in bringing the concepts and technical advances from the physical sciences to bear on issues in biology. The curriculum is chosen to prepare students as rigorously trained but broad-minded generalists, so that they may attack problems in the biological, biochemical, and biomedical sciences with the tools and confidence that come from rigorous training in the physical sciences.

The curriculum for Physics Major with Specialization in Biophysics is designed to allow premedical students to complete all necessary courses for admission to medical schools.

The lower-division program for physics majors with specialization in biophysics includes basic courses in biology and chemistry as well as physics. Although the sequence Physics 4A through 4E is strongly recommended, students have the choice of petitioning the department to substitute the sequence Physics 2A through 2D.

The following courses are required for the physics major with specialization in biophysics:

#### Lower-Division

1. Physics 4A-B-C-D-E and 2CL-DL; or Physics 2A-B-C-D and 2CL-DL (Physics 4 sequence is strongly recommended)
2. Chemistry 6A-B-C and 6BL
3. Biology, BILD 1 and BILD 2
4. Mathematics 20A-B-C-D-E-F

The upper-division program includes advanced courses in physics, including two core lecture courses and one core laboratory course in biophysics, as well as organic chemistry.

#### Upper-Division

1. Physics 100A, 105A, 110A, 120A, 130A, 140A, 171, 172, 173
2. Chemistry 140A

Additional electives, to achieve a count of twelve upper-division courses in the major, may be selected from biology, chemistry and physics. Three additional upper-division courses, in any subject, are required in order to satisfy UCSD requirements.

Premedical students will need to take two additional quarters of organic chemistry (Chemistry 140B and 140C), one quarter of organic chemistry laboratory (Chemistry 143A), and one quarter of an upper level biology course. In addition, some medical schools also require a quarter of biochemistry (Biology BIBC 100 or Chemistry 114A). The premedical requirements may be used to satisfy elective requirements for upper-division courses.

As a guide to prospective students, we consider a schedule of required classes for a Muir College student.

#### Suggested Schedule

FALL	WINTER	SPRING
<b>FRESHMAN YEAR</b>		
Math. 20A	Chem. 6A Math. 20B Phys. 4A	Chem. 6B Chem. 6BL Math. 20C Phys. 4B
<b>SOPHOMORE YEAR</b>		
Chem. 6C Math. 20D Phys. 4C	Math. 20E Phys. 4D Phys. 2CL	Math. 20F Phys. 4E Phys. 2DL
<b>JUNIOR YEAR</b>		
Phys. 100A Phys. 105A Phys. 110A	BILD 1 Chem. 140A	BILD 2 Phys. 120A Phys. 130A
<b>SENIOR YEAR</b>		
Phys. 140A Phys. 171	Phys. 172 Elec.	Phys. 173

### B.S. IN PHYSICS WITH SPECIALIZATION IN COMPUTATIONAL PHYSICS

The computational physics specialization is designed to support a broad range of career development tracks, so students may pursue (1) a terminal B.S. degree for gainful employment in information technology and high-tech industry, (2) preparation for graduate studies in computational science with an M.S. degree, and (3) graduate work in physics with strong interest in computational physics. This flexibility is afforded by a wide array of restricted electives which allows students to design much of their own program (subject to advisor's approval) while simultaneously maintaining the essential physics-based curriculum. Academic advising will be provided by physics faculty in the Computational Physics Specialization Program to assist students in designing their optimal career development track in the flexible curriculum.

The following courses are required for Physics Major with Specialization in Computational Physics:

#### Lower-Division

1. Physics 4A-B-C-D-E or Physics 2A-B-C-D<sup>1</sup>, Physics 2CL-DL
2. Mathematics 20C-F
3. Chemistry 6A
4. MAE 9, or MAE 10, or CSE 11<sup>2</sup>

<sup>1</sup>The 2A-B-C-D sequence is an allowed substitute by petition.

<sup>2</sup>Electing CSE 11, student is still required to have C or Fortran based programming skills equivalent to MAE 9, or MAE 10.

#### Upper-Division

1. Physics 100A-B, 105A-B, 110A, 120A, 121, 130A-B, 140A, 141, 142<sup>1</sup>
2. Six restricted electives from following groups: Physics 100C, 110B, 120B, 130C, 140B, 173, other upper-division Physics courses, Mathematics 132A-B, 170A-C, 172, 173, 183 CSE 12, 30, 80 Substitute Upper-Division courses<sup>2</sup>

#### Suggested Schedule (restricted electives not shown)

FALL	WINTER	SPRING
<b>JUNIOR YEAR</b>		
Phys. 100A Phys. 105A Phys. 110A	Phys. 100B Phys. 105B	Phys. 120A Phys. 130A
<b>SENIOR YEAR</b>		
Phys. 140A Phys. 130B	Phys. 141 Phys. 121	Phys. 142

<sup>1</sup>Students will choose two required courses from the group Phys. 121, Phys. 141, Phys. 142, and either will drop the third, or take it as one of the six restricted electives

<sup>2</sup>Substitute elective courses (upper-division science, mathematics, engineering, or other) require advisor's approval

#### Career Track Examples with Restricted Electives

The program of electives is intended to be flexible, and can be tailored to the student's needs and interests in consultation with the academic advisor.

Grad. School Theorist with Computational Interest Track for student with interest in theoretical physics based computational science:

### Physics 100C, 110B, 130C, 140B Mathematics 132A-B

Grad. School Experimentalist with Computational Interest Track for students with interest in experimental physics based computational science:

Physics 100C, 120B, 142  
Mathematics 183  
CSE 80

Information Technology Track for student with interest in physics based software oriented applications:

Physics 100C, 140B  
CSE 12, 30, 80  
Mathematics 173

Numerical Science/Engineering Application Developer Track for students with interest in physics and engineering applications of numerical algorithms:

Physics 100C, 140B  
Mathematics 170A-C, 172

High Tech Instrumentation Track for students with interest in physics based instrumentation:

Physics 100C, 120B, 140B  
Mathematics 183  
CSE 12, 80

### PHYSICS MAJOR WITH SPECIALIZATION IN EARTH SCIENCES (B.S. DEGREE)

The upper-division program for physics majors with specialization in earth sciences is essentially the same as the standard physics major augmented by courses in earth sciences offered through the Scripps Institution of Oceanography.

Students may wish to incorporate a small portion of the major program into their lower-division studies, for example, SIO 50.

The following courses are required for the physics major with specialization in earth sciences:

#### Lower-Division

1. Physics 4A-B-C-D-E and 2CL-DL; or Physics 2A-B-C-D and 2CL-DL (Physics 4 sequence is strongly recommended)
2. Chemistry 6A-B and 6BL
3. Mathematics 20C-F

#### Upper-Division

1. Physics 100A-B, 105A, 110A-B, 120A, 130A, 140A, plus one upper-division lab\*
2. SIO 50, 102, 103, 120
3. Restricted Electives: Three earth sciences courses in the SIO department (upper-division or graduate level) to be chosen with the approval of the SIO undergraduate program advisor.
4. Two courses from either the theoretical or experimental pre-grad school sequence.

\* Another lab course chosen from Physics 120B, 121, 133, or 173.

#### Suggested Schedule

FALL	WINTER	SPRING
<b>JUNIOR YEAR</b>		
Phys. 100A Phys. 105A	Phys. 100B Phys. 110B	Phys. 120A Phys. 130A

Phys. 110A SIO 102  
SIO 50

**SENIOR YEAR**

Phys. 140A SIO 120 U.D. Lab  
SIO 103 Restr. Elec. Restr. Elec.  
Restr. Elec.

**PHYSICS MAJOR WITH SPECIALIZATION  
IN MATERIALS PHYSICS (B.S. DEGREE)**

The materials physics specialization is designed to support a broad range of options, so students may pursue (1) a terminal B.S. Degree, or preparation for (2) graduate work in materials science, or (3) graduate work in physics. This flexibility is afforded by a wide range of restricted electives which allows students to design much of their own program while simultaneously maintaining the essential physics-based curriculum. Academic advising will be provided by the department to assist the student in navigating through the many options. The B.S. program also serves as the entry to the integrated five-year B.S./M.S. program.

**Lower-Division**

1. Physics 4A-B-C-D-E or Physics 2A-B-C-D, Physics 2CL-DL
2. Chemistry 6A-B\*
3. Mathematics 20C-F
4. MAE 9 or MAE 10 (or equivalent programming experience)

**Upper-Division**

1. Physics 100A-B, 105A-B, 110A, 120A-B, 130A-B, 140A, 133, 152A-B
2. Four restricted electives, to be chosen from Chemistry 120A-B\*; Mathematics 120A; ECE 103, 134, 135A-B, 136, 136L; MAE 160, 110A; or any upper division physics course

\* Students who anticipate taking Chemistry 120A-B as an upper-division elective are strongly advised to take Chemistry 6C.

**Suggested Schedule (restricted electives not shown)**

FALL	WINTER	SPRING
<b>JUNIOR YEAR</b>		
Phys. 100A	Phys. 100B	Phys. 120A
Phys. 105A	Phys. 105B	Phys. 130A
Phys. 110A		
<b>SENIOR YEAR</b>		
Phys. 140A	Phys. 152A	Phys. 152B
Phys. 120B		Phys. 133
Phys. 130B		

**Restricted Electives: Example**

As examples of restricted electives, a student opting for a terminal B.S. Degree (Option 1) might choose to take MAE 160, ECE 103, 136, and Physics 121. Students preparing for graduate work in materials science (Option 2) might consider MAE 160, ECE 103, 134, and a fourth elective. Students preparing for graduate work in physics (Option 3) might consider Physics 100C, 110B, 140B, and a fourth elective. The program of electives is intended to be flexible, and can be tailored to the student's needs and interests in consultation with the academic advisor.

See entry for *Integrated Bachelor's/Master's Degree Program in Materials Physics*.

**GENERAL PHYSICS MAJOR  
(B.A. DEGREE)**

This program covers the essential topics in physics and provides a broadly based education in the natural sciences. Starting with lower-division courses in mathematics, physics, computing, biology and/or chemistry, students proceed to upper-division mechanics, electricity and magnetism, thermal physics, quantum physics, and a physical measurements laboratory course. In addition, students take sixteen units of upper-division elective courses in the natural sciences or mathematics.

While the B.A. Program is suitable for students who pursue a terminal degree in physics or use it as a preparation for other professional careers, it is not intended for those who wish to proceed to the Ph.D. in physics. The latter should enroll in the B.S. Program

The following courses are required for the general physics major:

**Lower-Division**

1. Physics 2A-B-C-D and 2CL-DL
2. Mathematics 20C-F
3. Three restrictive elective courses in science and engineering (a list of acceptable courses is given below)

**Upper-Division**

1. Physics 100A-B, 105A, 110A-B, 120A, 130A, 140A or Chemistry 127 or 131
2. Restricted Electives: Sixteen units of upper-division courses in science and engineering (excluding mathematics)

**Suggested Schedule**

FALL	WINTER	SPRING
<b>JUNIOR YEAR</b>		
Phys. 100A	Phys. 100B	Phys. 120A

<b>SENIOR YEAR</b>		
Phys. 140A or	Restr. Elec.	Restr. Elec.
Chem. 127 or 131	Restr. Elec.	
Restr. Elec.		

**Approved Lower-Division Elective Courses**

One course in computing chosen from the following list:

- MAE 10, FORTRAN for Engineers
- MAE 03, Introduction to Engineering Graphics and Design
- CSE 10, Introduction to Programming Techniques
- CSE 30, Introduction to Systems Programming
- Physics 105B, Mathematical and Computational Physics

Plus two of the following courses:

- BILD 1, The Cell
- BILD 2, Multicellular Life
- BILD 3, Organismic and Evolutionary Biology
- Chem. 6A, General Chemistry
- Chem. 6B, General Chemistry
- Chem. 6C, General Chemistry

**GENERAL PHYSICS/SECONDARY  
EDUCATION MAJOR (B.A. DEGREE)**

This program is intended for students preparing for a career as a physics teacher in secondary schools. It covers the essential topics in physics and provides a broadly based education in the natural sciences. The program includes three courses in general chemistry plus a lab, one course in organic chemistry plus a lab, and a course in earth science as required by the Single Subject Credential Program of the state of California. It also includes three courses in Practicum in Learning offered by the Education Studies Program. This degree is particularly suitable for students pursuing a Single Subject (Physics) credential for high schools. If you are interested in earning a California teaching credential from UCSD, contact the Education Studies Program (EDS) for information about the prerequisite and professional preparation requirements. It is recommended that you contact EDS as early as possible in your academic career.

The following courses are required for the general physics/secondary education major:

**Lower-Division**

1. Physics 2A-B-C-D and 2CL-DL
2. Chemistry 6A-B-C and 6BL
3. SIO 10, 12, or 30
4. Mathematics 20C-F

**Upper-Division**

1. Physics 100A-B, 105A, 110A-B, 120A, 130A
2. Chemistry 140A and 143A
3. SIO 50
4. EDS 129A-B-C

**Suggested Schedule**

FALL	WINTER	SPRING
<b>JUNIOR YEAR</b>

<b>SENIOR YEAR</b>		
SIO 50	EDS 129B	EDS 129C
EDS 129A		

**ENGINEERING PHYSICS PROGRAM**

The engineering physics program is offered jointly by the Departments of Physics, MAE, and ECE, and is administered by the Department of ECE. (See "ECE, Engineering Physics Program.") Transfer students who have had prior course work in the major at other institutions must consult with the Department of Physics, Student Affairs Office, 1110-115 Urey Hall Addition to make an appointment to see a faculty advisor.

**MINOR IN PHYSICS**

Students may arrange minor programs or programs of concentration in physics by consulting with the Department of Physics Student Affairs Office, 1110-115 Urey Hall Addition, and their college for specific requirements. The Department of Physics

requires at least twenty-eight units, of which at least twenty units must be upper-division. All courses must be taken for a letter grade. Lower-division transfer courses are permitted.

### ADVISING OFFICE

All students are assigned an academic advisor. It is strongly recommended students see their advisor at least once a quarter.

Additional advising information may be obtained from the Department of Physics Student Affairs Office, 1110-115 Urey Hall Addition (858) 534-3290.

### HONORS PROGRAM

The Department of Physics offers an Honors Program for students who demonstrate excellence in the major. Students interested in the Honors Program should consult the Student Affairs Office. Eligibility for the Honors Program includes completion of all required lower-division physics courses, ten upper-division physics courses, and a GPA of at least 3.50 in the physics major.

The Honors Program consists of a minimum of eight units of Honors Thesis Research (Physics 199H), an Honors Thesis, and the presentation of the research to faculty and peers at UCSD's Undergraduate Research Conference or an Undergraduate Seminar. Admission to the Honors Program is contingent upon the prior approval of the Honors Thesis "research topic" by the Vice Chair for Education.

### THE GRADUATE PROGRAM

The Department of Physics offers curricula leading to the following degrees:

**M.S., Physics**

**C.Phil., Physics**

**Ph.D., Physics**

**Ph.D., Physics (Biophysics)**

**Ph.D. Physics Specialization in Computational Science**

Biophysics students will receive their M.S. and C.Phil. degrees in physics. Only their Ph.D. will be in physics (biophysics).

Entering graduate students are required to have a sound knowledge of undergraduate mechanics, electricity, and magnetism; to have had senior courses or their equivalent in atomic and quantum physics, nuclear physics, and thermodynamics; and to have taken upper-division laboratory work. An introductory course in solid-state physics is desirable.

Requirements for the master of science degree can be met according to Plan II (comprehensive examination). (See "[Graduate Studies: The Master's Degree.](#)") The comprehensive examination is identical to the first-year departmental examination for Ph.D. students. A list of acceptable courses is available in the Department of Physics Graduate Student Affairs office. There is no foreign language requirement.

The program offers a M.S. in physics with specialization in materials physics. It is open only to UC San Diego undergraduates, and is a Plan I program only (thesis). During the fourth quarter prior to receipt of the B.S. Degree, students enrolled in the B.S. Degree program with specialization in materials physics (see above) may apply for admission to the M.S. program. To be eligible, students must have completed the

first two quarters of their junior year in residence at UCSD and have a GPA of at least 3.0 in both their major and overall undergraduate curriculum. It is strongly recommended that B.S. students who intend to apply to the M.S. program take MAE 160, ECE 103, and ECE 134 as restricted B.S. electives. It is the responsibility of the prospective B.S./M.S. student to select a faculty member (from the Department of Physics or, with physics department approval, from the MAE, ECE, or chemistry departments) who would be willing to serve as the student's advisor and with whom the student would complete at least twelve units of S/U graded research, which could commence as early as the undergraduate senior year. (Taken during the senior year, the units would count only toward the M.S. degree and not toward the B.S.) The student must confirm that the selected faculty advisor will not be on off-campus sabbatical leave during any quarter of the scheduled B.S./M.S. project. Students are expected to meet the requirements for the M.S. degree in one year (three consecutive, contiguous academic quarters) from the date of receipt of the B.S. Degree. Any deviation from this plan, such as a break in enrollment for one or more quarters, may result in the student being dropped from the program.

The requirements for the M.S. degree are as follows:

1. Completion of at least twelve and no more than twenty-four units of research, which may begin as early as the first quarter of the senior undergraduate year.
2. Completion of three required courses during the fifth (graduate) year (MAT SCI 201A-B-C), and two restricted electives (see below).
3. Completion of restricted elective courses so that the total number of units (research plus required courses plus elective courses) totals no less than 36 units taken as a graduate student. Students accumulate units for their research by enrolling in Physics 295 (M.S. Thesis Research), which may be taken repeatedly.
4. Maintenance of a grade-point average of at least 3.0 for all course work, both cumulatively and for each quarter of enrollment in the B.S./M.S. program.
5. Completion of a thesis, with an oral presentation to, and approval of, a three-member committee from the Department of Physics including the faculty advisor. If the faculty advisor is from outside the physics department, the committee shall consist of the advisor and two members from the physics department faculty.
6. Three complete, separate, and consecutive quarters of full-time residency as a graduate student that will commence the quarter immediately following the quarter in which the B.S. Degree is awarded (not counting summer session).
7. Although students may receive research or teaching assistantships if available from their advisor or through the Department of Physics, there is no guarantee of financial support associated with the M.S. program.
8. M.S. candidates will be permitted to serve as teaching assistants, although teaching will not

be a requirement for the degree. Students who obtain a teaching assistantship should make sure that it does not interfere with completion of the M.S. degree requirements within the one year time frame allotted.

### M.S. Program: Fifth Year Curriculum

1. MAT SCI 201A-B-C
2. Physics 295 (M.S. Thesis Research)
3. Two restricted electives, to be chosen from Physics 201, 211A-B; MAT SCI 227, 240A-B-C; ECE 231, 233; other courses allowed by petition

### DOCTORAL DEGREE PROGRAM

The department has developed a flexible Ph.D. program that provides a broad, advanced education in physics while at the same time giving students opportunity for emphasizing their special interests. This program consists of graduate courses, apprenticeship in research, teaching experience, and thesis research.

Entering students are assigned a faculty advisor to guide them in their program. Many students spend their first year as teaching assistants or fellows and begin apprentice research in their second year. When a student's association with a research area and research supervisor is well established, a faculty research progress committee is formed with the responsibility of conducting an annual review of progress and, at the appropriate time, initiating the formation of a doctoral committee. After three years of graduate study, or earlier, students complete the departmental examinations and begin thesis research. Students specializing in biophysics make up deficiencies in biology and chemistry during the first two years and complete the departmental examinations by the end of their third year of graduate study. There is no foreign language requirement.

### ENTRANCE TESTING

An entrance test covering undergraduate physics is given to entering students during the first week of orientation to give better guidance to students in their graduate program. The results are not entered in the student's file. Entering students are encouraged, but not obliged, to bring the results to the first meeting with their academic advisor. Entering students may elect to take the departmental examination instead of taking the entrance test.

### REQUIREMENTS FOR THE PH.D.

Students are required to pass a departmental examination, advanced graduate courses, a qualifying examination, teaching requirement and a final defense of the thesis as described below.

#### 1. Departmental Written Examination

Physics students are required to take the departmental written examination after completing one year of graduate work at UCSD. The examination is on the level of material usually covered in upper-division courses and the graduate courses listed below:

## Fall

Physics 200A (Theoretical Mechanics)  
Physics 201 (Mathematical Physics)  
Physics 212A (Quantum Mechanics)

## Winter

Physics 200B (Theoretical Mechanics)  
Physics 203A (Adv. Classical Electrodynamics)  
Physics 212B (Quantum Mechanics)  
Spring

Physics 203B (Adv. Classical Electrodynamics)  
Physics 210A (Equilibrium Statistical Mechanics)  
Physics 212C (Quantum Mechanics)

The examination is offered twice a year, at the beginning of the fall and spring quarters, and lasts two days, four hours per day. The examination may be repeated once, the next time it is offered.

Biophysics Ph.D. students are required to take the departmental written examination within two years of graduate work at UCSD; not later than the beginning of the third year.

The University requires an annual evaluation of each graduate student's progress toward Ph.D. candidacy and thesis defense. To this end, a Research Progress Committee (RPC) is formed for every student during the spring quarter of the second year of graduate study. Students must demonstrate proficiency in giving technical talks through an oral presentation to the RPC.

## 2. Advanced Graduate Courses

Physics students are required to take five advanced graduate courses from at least three of the groups listed below no later than the end of the third year of graduate work. A 3.0 average over the five courses is required. (In lieu of the course requirement, students may petition to take an oral examination covering three areas of physics.)

- Group 1: Physics 218A-B-C (Plasma); 235 (Nonlin. Plas. Th.)
- Group 2: Physics 210B (Nonequil. Stat. Mech.); 210C, 211A, 211B (Solid State); 219 (C.M./Matl. SCI Lab), 230 (Adv. Solid State); 232 (Electronic Materials)
- Group 3: Physics 214 (Elem. Part.); 215A-B-C (Part. & Fields); 217 (Renorm. Field Th.); 229 (App. Quant. Mech.)
- Group 4: Physics 220 (Group Th.); 221A, 221B (Nonlinear Dyn.); Physics 241 and 242 (Comp. Phys); Physics 243 (Stochastic Methods) and 244 (Parallel Computing in Science and Engineering); Mathematics 210A-B, 210C (Mathematics Physics); Mathematics 259A-B-C (Geom. Physics)
- Group 5: Physics 225A-B (Relativ.); 271 (Bio. Neurons/Net); 272 (Bio. Molecules)
- Group 6: Physics 223 (Stel. Str.); 224 (Intrstel. Med.); 226 (Gal. & Gal. Dyn.); 227 (Cosmology), 228 (HE Astro. & Comp. Obj.)

Students enrolled in the Biophysics Ph.D. program select five courses from biology, biochemistry, chemistry, or physics in consultation with their advisor. At least three courses must be graduate

courses. For more information, see the Biophysics section, below.

## 3. Ph.D. Candidacy Examination

In order to be advanced to candidacy, students must have met the departmental requirements and obtained a faculty research supervisor. At the time of application for advancement to candidacy, a doctoral committee responsible for the remainder of the student's graduate program is appointed by the Graduate Council. The committee conducts the Ph.D. candidacy examination during which students must demonstrate the ability to engage in thesis research. This involves the presentation of a plan for the thesis research project. The committee may ask questions directly or indirectly related to the project and questions on general physics that it determines to be relevant. Upon successful completion of this examination, students are advanced to candidacy and are awarded the Candidate of Philosophy degree.

## 4. Instruction in Physics Teaching

All graduate students are required to participate in the physics undergraduate teaching program as part of their career training. The main component of this requirement is an evaluated classroom-based teaching activity. All graduate student teaching accomplishments are subject to the approval of the vice chair for education. There are several ways to satisfying the teaching requirement, including: (1) leading discussions as a teaching assistant, (2) practical classroom teaching, under faculty supervision, (3) participation in an approved teaching development program offered by the Department of Physics or the campus Center for Teaching Development, or (4) transferred teaching credit from another institution or department. Students who satisfy the requirement by teaching at UCSD should enroll in Physics 500 during the quarter in which they complete it.

## 5. Thesis Defense

When students have completed their theses, they are asked to present and defend them before their doctoral committees.

### Time Limits for Progress to the Ph.D.

In accordance with university policy, the Department of Physics has established the following time limits for progress to the Ph.D. A student's research progress committee helps ensure that these time limits are met.

	Theorists	Experimentalists
Advancement to Candidacy	4 years	5 years
Total Registered Time and Support	7 years	8 years

## PH.D. IN PHYSICS (BIOPHYSICS)

The Department of Physics offers a graduate program which prepares students for a career in biophysics and which leads to the following degrees:

- C.Phil. in Physics
- Ph.D. in Physics (Biophysics)

Biophysics students will receive their M.S. and C.Phil. degrees in physics. Only their Ph.D. will be in physics (biophysics).

The Ph.D. program consists of graduate courses, apprenticeship in research, teaching experience, and thesis research. Research in biophysics is being actively pursued in several departments (physics, chemistry/biochemistry, and biology) that also offer courses in, or courses relevant to, biophysics.

## Requirements for the Ph.D. in Physics (Biophysics)

The specialization in biophysics requires that students complete many of the same requirements as for the physics Ph.D. Students must pass a departmental written examination, advanced graduate courses, Ph.D. candidacy examination, teaching requirement, and a final defense of the thesis. However, the requirements for the written examination and advanced courses differ slightly from those of the Ph.D. degree.

Biophysics Ph.D. students are required to take the departmental written examination within two years of beginning graduate studies at UCSD, and no later than the beginning of the third year. Biophysics students are required to pass five courses from biology, chemistry, biochemistry, or physics no later than the end of the third year of graduate study. The course plan shall be determined in consultation with the advisor. At least three of these courses must be graduate courses. A 3.0 average over the five courses is required. (In lieu of the course requirement, students may petition to take an oral examination covering three areas of physics.)

## PH.D. IN PHYSICS WITH SPECIALIZATION IN COMPUTATIONAL SCIENCE

See "[Computational Science in Mathematics & Engineering \(CSME\)](#)" for more information.

The UCSD campus is offering a new comprehensive Ph.D. specialization in computational science that will be available to doctoral candidates in participating academic departments at UCSD.

This Ph.D. specialization is designed to allow students to obtain training in their chosen field of science, mathematics, or engineering with additional training in computational science integrated into their graduate studies. Prospective students must apply and be admitted into the Ph.D. program in physics, and then be admitted to the CSME program.

Areas of research in the Department of Physics will include computational astrophysics and cosmology, studying star formation and the large scale structure of the universe, computational condensed matter physics studying nanodevices, computational quantum field theory studying the four basic forces of nature, computational biological physics of protein folding and other biologically important complex structures, computational nonlinear dynamics, and computational plasma physics. Each faculty member works with graduate students on the listed research topics that will greatly benefit from the new program.

The specialization in computational science requires that students complete all home requirements for the physics Ph.D. degree. Students are required to pass the departmental written examination, advanced course requirements, Ph.D. candidacy

examination, teaching requirement, and a final defense of the thesis. The qualifying and elective courses for the CSME program (e.g., Physics 241-244) can be used as part of the advanced course requirement, which is the same as for the physics Ph.D.

### Requirements for the Ph.D. in Physics with Specialization in Computational Science:

**Qualifying Requirements:** In addition to the home department qualifying exam requirements, Ph.D. students must take the final exams in three qualifying exam courses from the list below. Courses taken to satisfy the qualifying requirements will not count toward the elective requirements.

1. Math. 275 or MAE 290B (Numerical PDEs)
2. Phys. 244 or CSE 260 (Parallel Computing)
3. One course to be selected from List A

#### List A: CSME Qualifying Exam Courses

1. Phys. 243 (Stochastic Methods)
2. Math. 270A, B, or C (Numerical Analysis)
3. Math. 272A, B, or C (Advanced Numerical PDEs)
4. MAE 223 (Computational Fluid Dynamics)
5. MAE 232A or B (Computational Solid Mechanics)
6. MAE 280A or B (Linear Systems Theory)
7. To be determined by Executive Committee

**Elective Requirements:** To encourage Ph.D. students to both broaden themselves in an area of science or engineering as well as to obtain more specialized training in specific areas of computational science, students will be required to take and pass three elective courses from the following approved List B (four units per course). The Executive Committee may approve the use of courses not appearing on the following list on a case-by-case basis. Courses taken to satisfy the elective requirements will not count toward the qualifying requirements.

#### List B: Relevant Elective Graduate Courses in Mathematics, Science, and Engineering

1. Math. 270A-B-C (Numerical Analysis; not permitted for mathematics students)
2. Math. 271A-B-C (Optimization)
3. Math. 272A-B-C (Advanced Numerical PDEs)
4. Math. 273A-B-C (Computational Mathematics Project)
5. Phys. 141/241 (Computational Physics I)
6. Phys. 142/242 (Computational Physics II)
7. Phys. 221A-B (Nonlinear Dynamics)
8. Chem. 215 (Modeling Biological Macromolecules)
9. BGGN 260 (Neurodynamics)
10. To be determined by Executive Committee

**Program Policies:** The following is a list of policies for the Ph.D. specialization with regard to proficiency, qualifying, and elective requirements.

1. Proficiency in computer engineering must be demonstrated by the end of the first year.
2. The qualifying exams must be passed by the end of the second year, or, on petition, by end of the third year.
3. The qualifying exams can be attempted repeatedly but no more than once per quarter per subject.
4. The qualifying exams in the home department and the CSME qualifying exams must all be passed before the student is permitted to take the candidacy (senate) exam.
5. Two electives outside the home department must be taken.
6. The two electives can be taken at any time before defending the thesis.
7. One of the electives may be taken Pass/Fail; the other must be taken for a letter grade.

#### Recommended schedule for the Ph.D. in physics with specialization in computational science

##### YEAR 1: PHYSICS CORE COURSES

Phys. 200A	Phys. 200B	Phys. 203B
Phys. 201	Phys. 203A	Phys. 210A
Phys. 212A	Phys. 212B	Phys. 212C

##### YEAR 2: CSME QUALIFYING COURSES

Math. 275	Non-Phys. Elective	Phys. 244
Phys. 243	Adv. Phys. Course	Adv. Phys. Course

##### YEAR 3: CSME ELECTIVE COURSES

Non-Phys. Elective	Phys. 241	Phys. 242
--------------------	-----------	-----------

#### DEPARTMENTAL COLLOQUIUM

The department offers a weekly colloquium on topics of current interest in physics and on departmental research programs. Students are expected to register and attend the colloquium.

#### SUPPLEMENTARY COURSE WORK AND SEMINARS

The department offers regular seminars in several areas of current interest. Students are strongly urged to enroll for credit in seminars related to their research interests and, when appropriate, to enroll in advanced graduate courses beyond the departmental requirement. To help beginning students choose a research area and a research supervisor, the department offers a special seminar (Physics 261) that surveys physics research at UCSD.

#### COURSE CREDIT BY EXAMINATION

Students have an option of obtaining credit for a physics graduate course by taking the final examination without participating in any class exercises. They must, however, officially register for the course and notify the instructor and the Department of Physics graduate student affairs office of their intention no later than the first week of the course.

## COURSES

For course descriptions not found in the UC San Diego General Catalog, 2010–11, please contact the department for more information.

### LOWER-DIVISION

The Physics 1 sequence is primarily intended for biology.

The Physics 2 sequence is intended for physical science and engineering majors and those biological science majors with strong mathematical aptitude.

The Physics 4 sequence is intended for all physics majors and for students with an interest in physics. This five-quarter sequence covers the same topics as the Physics 2 sequence, but it covers these topics more slowly and in more depth. The Physics 4 sequence provides a solid foundation for the upper-division courses required for the physics major.

**Note:** Since some of the material is duplicated in the Physics 1, 2 and 4 sequences, credit cannot be obtained for both. Please check with the Physics Student Affairs Office when switching sequences. (Example: Physics 1A followed by Physics 2A, no credit for Physics 2A.)

Physics 5, 6, 7, 8, 9, 10, 11, and 12 are intended for non-science majors. Physics 5, 6, 7, 8, 9, 10, and 12 do not use calculus while Physics 11 uses some calculus.

#### 1A. Mechanics (3)

First quarter of a three-quarter introductory physics course, geared towards life-science majors. Equilibrium and motion of particles in Newtonian mechanics, examples from astronomy, biology and sports, oscillations and waves, vibrating strings and sound. **Prerequisites:** Mathematics 10A or 20A, prior or concurrent enrollment in Mathematics 10B or 20B, concurrent enrollment in Physics 1AL laboratory. (F,W,S)

#### 1AL. Mechanics Laboratory (2)

Physics laboratory course to accompany Physics 1A. Experiments in mechanics. **Prerequisite:** concurrent enrollment in Physics 1A. (F,W,S)

#### 1B. Electricity and Magnetism (3)

Second quarter of a three-quarter introductory physics course geared toward life-science majors. Electric fields, magnetic fields, DC and AC circuitry. **Prerequisites:** Physics 1A, 1AL, and prior or concurrent enrollment in Mathematics 10C–D or 20C. Concurrent enrollment in Physics 1BL. (F,W,S)

#### 1BL. Electricity and Magnetism Laboratory (2)

Physics laboratory course to accompany Physics 1B. Experiments in electricity and magnetism. Course materials fee is required. **Prerequisite:** concurrent enrollment in Physics 1B. (F,W,S)

#### 1C. Waves, Optics and Modern Physics (3)

Third quarter of a three-quarter introductory physics course geared toward life-science majors. Behavior of systems under combined thermal and electric forces, the interaction of light with matter as illustrated through optics and quantum mechanics. Examples from biology and instrumentation. (First offered winter 2005) **Prerequisites:** Physics 1B, 1BL, Mathematics 10C or 10D or 20C. Concurrent enrollment in Physics 1CL. (F,W,S)

#### 1CL. Waves, Optics, and Modern Physics Laboratory (2)

Physics laboratory course to accompany Physics 1C. Experiments in waves, optics, and modern physics. Course materials fee is required. First offered in winter 2005. **Prerequisite:** concurrent enrollment in Physics 1C. (F,W,S)

## 2A. Physics–Mechanics (4)

A calculus-based science-engineering general physics course covering vectors, motion in one and two dimensions, Newton's first and second laws, work and energy, conservation of energy, linear momentum, collisions, rotational kinematics, rotational dynamics, equilibrium of rigid bodies, oscillations, gravitation. **Prerequisites:** Mathematics 20A, and concurrent enrollment in Mathematics 20B. (F,W,S)

## 2B. Physics–Electricity and Magnetism (4)

Continuation of Physics 2A covering charge and matter, the electric field, Gauss's law, electric potential, capacitors and dielectrics, current and resistance, electromotive force and circuits, the magnetic field, Ampere's law, Faraday's law, inductance, electromagnetic oscillations, alternating currents and Maxwell's equations. **Prerequisites:** Physics 2A, Mathematics 20B, and concurrent enrollment in Mathematics 20C. (F,W,S)

## 2BL. Physics Laboratory–Mechanics and Electrostatics (2)

One hour lecture and three hours' laboratory. Experiments include gravitational force, linear and rotational motion, conservation of energy and momentum, collisions, oscillations and springs, gyroscopes. Experiments on electrostatics involve charge, electric field, potential, and capacitance. Data reduction and error analysis are required for written laboratory reports. **Prerequisite:** concurrent enrollment in Physics 2B or 4C. (F,W,S) Course materials fee is required.

## 2C. Physics–Fluids, Waves, Thermodynamics, and Optics (4)

Continuation of Physics 2B covering fluid mechanics, waves in elastic media, sound waves, temperature, heat and the first law of thermodynamics, kinetic theory of gases, entropy and the second law of thermodynamics, Maxwell's equations, electromagnetic waves, geometric optics, interference and diffraction. **Prerequisites:** Physics 2B, Mathematics 20C, and concurrent enrollment in Mathematics 20D. (F,W,S)

## 2CL. Physics Laboratory–Electricity and Magnetism, Waves, and Optics (2)

One hour lecture and three hours' laboratory. Experiments on refraction, interference/diffraction using lasers and microwaves; lenses and the eye; acoustics; oscilloscope and L-R-C circuits; oscillations, resonance and damping, measurement of magnetic fields; and the mechanical equivalence of heat. **Prerequisites:** prior or concurrent enrollment in Physics 1C, 2C, or 4D. (F,W,S) Course materials fee is required.

## 2D. Physics–Relativity and Quantum Physics (4)

A modern physics course covering atomic view of matter, electricity and radiation, atomic models of Rutherford and Bohr, relativity, X-rays, wave and particle duality, matter waves, Schrödinger's equation, atomic view of solids, natural radioactivity. **Prerequisites:** Physics 2B and Mathematics 20D. (F,W,S)

## 2DL. Physics Laboratory–Modern Physics (2)

One hour of lecture and three hours of laboratory. Experiments to be chosen from refraction, diffraction and interference of microwaves, Hall effect, thermal band gap, optical spectra, coherence of light, photoelectric effect,  $e/m$  ratio of particles, radioactive decays, and plasma physics. **Prerequisites:** 2BL or 2CL, prior or concurrent enrollment in Physics 2D or 4E. (S) Course materials fee is required.

## 4A. Physics for Physics Majors–Mechanics (4)

The first quarter of a five-quarter calculus-based physics sequence for physics majors and students with a serious interest in physics. The topics covered are vectors, particle kinematics and dynamics, work and energy, conservation of energy, conservation of momentum, collisions, rotational kinematics and dynamics, equilibrium of rigid bodies. **Prerequisites:** Mathematics 20A and concurrent enrollment in Mathematics 20B. (W)

## 4B. Physics for Physics Majors–Mechanics, Fluids, Waves, and Heat (4)

Continuation of Physics 4A covering oscillations, gravity, fluid statics and dynamics, waves in elastic media, sound waves, heat and the first law of thermodynamics, kinetic theory of gases, second law of thermodynamics, gaseous mixtures and chemical reactions. **Prerequisites:** Physics

4A, Mathematics 20B, and concurrent enrollment in Mathematics 20C. (S)

## 4C. Physics for Physics Majors–Electricity and Magnetism (4)

Continuation of Physics 4B covering charge and Coulomb's law, electric field, Gauss's law, electric potential, capacitors and dielectrics, current and resistance, magnetic field, Ampere's law, Faraday's law, inductance, magnetic properties of matter, LRC circuits, Maxwell's equations. **Prerequisites:** Physics 4B, Mathematics 20C, and concurrent enrollment in Mathematics 20E. (F)

## 4D. Physics for Physics Majors–Electromagnetic Waves, Optics, and Special Relativity (4)

Continuation of Physics 4C covering electromagnetic waves and the nature of light, cavities and wave guides, electromagnetic radiation, reflection and refraction with applications to geometrical optics, interference, diffraction, holography, special relativity. **Prerequisites:** Physics 4C, Mathematics 20E, and prior or concurrent enrollment in Mathematics 20D. (W)

## 4E. Physics for Physics Majors–Quantum Physics (4)

Continuation of Physics 4D covering experimental basis of quantum mechanics: Schrödinger equation and simple applications; spin; structure of atoms and molecules; selected topics from solid state, nuclear, and elementary particle physics. **Prerequisites:** Physics 4D, Mathematics 20D, 20E, and prior or concurrent enrollment in Mathematics 20F. (S)

## 5. The Universe (4)

Introduction to astronomy. Topics include the earth's place in the universe; the atom and light; the birth, life, and death of stars; the Milky Way galaxy; normal and active galaxies; and cosmology. Physics 5 or 7, and SIO 10 and 30 form a three-quarter sequence. Students may not receive credit for both Physics 5 and Physics 7. Restricted to P/NP grading option if taken after Physics 1A, 2A, or 4A. (F,S)

## 7. Introductory Astronomy (4)

Introduction to astronomy and astrophysics. Topics same as Physics 5. This course uses basic pre-calculus level mathematics (algebra, proportions, logs, similar triangles). Physics 5 or 7 and Earth Sciences 10 and 30 form a three-quarter sequence. Students may not receive credit for both Physics 5 and Physics 7. Restricted to P/NP grading option if taken after Physics 1A, 2A, or 4A. (W)

## 8. Physics of Everyday Life (4)

Examines phenomena and technology encountered in daily life from a physics perspective. Topics include waves, musical instruments, telecommunication, sports, appliances, transportation, computers, and energy sources. Physics concepts will be introduced and discussed as needed employing some algebra. No prior physics knowledge is required. Restricted to P/NP grading option if taken after Physics 1A, 2A, or 4A. (S)

## 9. The Solar System (4)

A non-mathematical exploration of our Solar System and other planetary systems for non-science majors. The sun, terrestrial and giant planets, satellites, asteroids, comets and meteors. The formation of planetary systems, space exploration, the development and search for life. (F)

## 10. Concepts in Physics (4)

This is a one-quarter general physics course for non-science majors. Topics covered are motion, energy, heat, waves, electric current, radiation, light, atoms and molecules, nuclear fission and fusion. This course emphasizes concepts with minimal mathematical formulation. **Prerequisite:** college algebra or equivalent. Restricted to P/NP grading option if taken after Physics 1A, 2A, or 4A. (W)

## 11. Survey of Physics (4)

Survey of physics for non-science majors with strong mathematical background, including calculus. Physics 11 describes the laws of motion, gravity, energy, momentum, and relativity. A laboratory component consists of two experiments with gravity and conservation principles. **Prerequisites:** Mathematics 10A or 20A and concurrent enrollment in Math 10B or 20B. (F)

## 12. Energy and the Environment (4)

A course covering energy fundamentals, energy use in an industrial society and the impact of large-scale energy

consumption. It addresses topics on fossil fuel, heat engines, solar energy, nuclear energy, energy conservation, transportation, air pollution and global effects. Concepts and quantitative analysis. (S)

## 87. Freshman Seminar in Physics and Astrophysics (1)

The Freshman Seminar Program is designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminars are offered in all campus departments and undergraduate colleges, and topics vary from quarter to quarter. Enrollment is limited to fifteen to twenty students, with preference given to entering freshmen.

## 98. Directed Group Study (2)

Directed group study on a topic, or in a field not included in the regular departmental curriculum. (P/NP grades only.)

## 99. Independent Study (2)

Independent reading or research on a topic by special arrangement with a faculty member. (P/NP grading only.)

**Prerequisites:** lower-division standing. Completion of thirty units at UCSD undergraduate study, a minimum UCSD GPA of 3.0, and a completed and approved "Special Studies" form. Department stamp required.

## UPPER-DIVISION

### 100A. Electromagnetism (4)

Coulomb's law, electric fields, electrostatics; conductors and dielectrics; steady currents, elements of circuit theory. Four hours lecture. **Prerequisites:** Physics 2C or 4D, Mathematics 20D; 20E, 20F. (Concurrent enrollment in Math. 20F permitted.) (F)

### 100B. Electromagnetism (4)

Magnetic fields and magnetostatics, magnetic materials, induction, AC circuits, displacement currents; development of Maxwell's equations. Four hours lecture. **Prerequisite:** Physics 100A. (W)

### 100C. Electromagnetism (4)

Electromagnetic waves, radiation theory; application to optics; motion of charged particles in electromagnetic fields; relation of electromagnetism to relativistic concepts. Four hours lecture. **Prerequisite:** Physics 100B. (S)

### 105A. Mathematical and Computational Physics (4)

A combined analytic and mathematical-based numerical approach to the solution of common applied mathematics problems in physics and engineering. Topics: Fourier series and integrals, special functions, initial and boundary value problems, Green's functions; heat, Laplace and wave equations. **Prerequisites:** Mathematics 20E and 20F and Physics 4E or 2D. (F)

### 105B. Mathematical and Computational Physics (4)

A continuation of Physics 105A covering selected advanced topics in applied mathematical and numerical methods. Topics include statistics, diffusion and Monte-Carlo simulations; Laplace equation and numerical methods for non-separable geometries; waves in inhomogeneous media, WKB analysis; nonlinear systems and chaos. **Prerequisite:** Physics 105A. (W)

### 110A. Mechanics (4)

Phase flows, bifurcations, linear oscillations, calculus of variations, Lagrangian dynamics, conservation laws, central forces, systems of particles, collisions, coupled oscillations. Four-hour lecture. **Prerequisites:** Physics 2C or 4D, Mathematics 20D, 20E, 20F (concurrent enrollment in Mathematics 20F permitted). (F)

### 110B. Mechanics (4)

Noninertial reference systems, dynamics of rigid bodies, Hamilton's equations, Liouville's theorem, chaos, continuum mechanics, special relativity. **Prerequisites:** Physics 110A and Mathematics 20E. (W)

### SIO 111/Physics 111. Introduction to Ocean Waves and Tides (4)

This course will cover a broad range of physical oceanography topics, including linear dynamics of surface gravity waves, dispersion relations, spectral descriptions, group velocity, shoaling waves, ray theory, edge waves, Coriolis force, the tide-generating force, Laplace's tide equations,

Kelvin waves. **Prerequisites:** Math. 20A–E and Physics 2A–C or consent of instructor. (W)

#### 120A–B. Physical Measurements (4–4)

A laboratory-lecture course in physical measurements with an emphasis on electronic methods. Topics include circuit theory, special circuits. Fourier analysis, noise, transmission lines, transistor theory, amplifiers, feedback, operational amplifiers, oscillators, pulse circuits, digital electronics. Three hours lecture, four hours laboratory. **Prerequisites:** Physics 2CL and 2DL, Physics 100A. (S,F) Course materials fee is required.

#### 121. Experimental Techniques (4)

A laboratory-lecture courses providing content and experiences useful in modern physics laboratories. Topics include: mechanical design and machining; mechanics of materials; thermal design/control; vacuum and cryogenic technologies; optical raytracing and design; practical electronics; computer interface to scientific equipment. **Prerequisite:** Physics 120A. (W)

#### 130A. Quantum Physics (4)

Phenomena which led to the development of quantum mechanics. Wave mechanics; the Schrödinger equation, interpretation of the wave function, the uncertainty principle, piece-wise constant potentials, simple harmonic oscillator, central field and the hydrogen atom. Observables and measurements. Four hours lecture. **Prerequisites:** Physics 2C or 2D, 4E, or equivalent. (S)

#### 130B. Quantum Physics (4)

Matrix mechanics, angular momentum and spin, Stern-Gerlach experiments, dynamics of two-state systems, approximation methods, the complete hydrogen spectrum, identical particles. Four hours lecture. **Prerequisite:** Physics 130A. (F)

#### 130C. Quantum Physics (4)

Scattering theory, symmetry and conservation laws, systems of interacting particles, interaction of electromagnetic radiation with matter, Fermi golden rule, the relativistic electron. **Prerequisites:** Physics 100C or equivalent, 130B. (W)

#### 133/219. Condensed Matter/Materials Science Laboratory (4)

A project-oriented laboratory course utilizing state-of-the-art experimental techniques in materials science. The course prepares students for research in a modern condensed matter-materials science laboratory. Under supervision, the students develop their own experimental ideas after investigating current research literature. With the use of sophisticated state-of-the-art instrumentation students conduct research, write a research paper, and make verbal presentations. **Prerequisites:** Physics 2CL and 2DL for undergraduates; Physics 152A or Physics 211A for graduate students. (S) Course materials fee is required.

#### 137. String Theory (4)

Quantum mechanics and gravity. Electromagnetism from gravity and extra dimensions. Unification of forces. Quantum black holes. Properties of strings and branes. **Prerequisites:** Physics 100A and 110A or consent of instructor, Physics 130A may be taken concurrently. (S)

#### 140A. Statistical and Thermal Physics (4)

Integrated treatment of thermodynamics and statistical mechanics; statistical treatment of entropy, review of elementary probability theory, canonical distribution, partition function, free energy, phase equilibrium, introduction to ideal quantum gases. **Prerequisite:** Physics 130A, or consent of instructor. (F)

#### 140B. Statistical and Thermal Physics (4)

Applications of the theory of ideal quantum gases in condensed matter physics, nuclear physics and astrophysics; advanced thermodynamics, the third law, chemical equilibrium, low temperature physics; kinetic theory and transport in non-equilibrium systems; introduction to critical phenomena including mean field theory. **Prerequisite:** Physics 140A, or consent of instructor. (W)

#### 141. Computational Physics I: Probabilistic Models and Simulations (4)

Project-based computational physics laboratory course with student's choice of Fortran90/95, or C/C++.

Applications from materials science to the structure of the early universe are chosen from molecular dynamics, classical and quantum Monte Carlo methods, physical Langevin/Fokker-Planck processes, and other modern topics. Graduate students will do advanced projects. **Prerequisite:** upper-division standing or consent of instructor. Conjoined with Physics 241. (W)

#### 142. Computational Physics II: PDE and Matrix Models (4)

Project-based computational physics laboratory course for modern physics and engineering problems with student's choice of Fortran90/95, or C/C++. Applications of finite element PDE models are chosen from quantum mechanics and nanodevices, fluid dynamics, electromagnetism, materials physics, and other modern topics. Graduate students will do advanced projects. **Prerequisite:** upper-division standing or consent of instructor. Conjoined with Physics 242. (S)

#### 151. Elementary Plasma Physics (4)

Particle motions, plasmas as fluids, waves, diffusion, equilibrium and stability, nonlinear effects, controlled fusion. Three hours lecture. **Prerequisite:** Math. 20D or consent of instructor. Physics 100 (B,C) or ECE 107 and Physics 110A are suggested. Cross-listed with MAE 117A. (S)

#### 152A. Condensed Matter Physics (4)

Physics of the solid state. Binding mechanisms, crystal structures and symmetries, diffraction, reciprocal space, phonons, free and nearly free electron models, energy bands, solid state thermodynamics, kinetic theory and transport, semiconductors. **Prerequisites:** Physics 130A or Chemistry 133, and Physics 140A. (W)

#### 152B. Electronic Materials (4)

Physics of electronic materials. Semiconductors: bands, donors and acceptors, devices. Metals: Fermi surface, screening, optical properties. Insulators: dia-/ferro-electrics, displacive transitions. Magnets: dia-/para-/ferro-/antiferromagnetism, phase transitions, low temperature properties. Superconductors: pairing, Meissner effect, flux quantization, BCS theory. Students enrolled in Physics 232 will complete a special topics paper. **Prerequisite:** Physics 152A or consent of instructor. Conjoined with Physics 232. (S)

#### 154. Elementary Particle Physics (4)

The constituents of matter (quarks and leptons) and their interactions (strong, electromagnetic, and weak). Symmetries and conservation laws. Fundamental processes involving quarks and leptons. Unification of weak and electromagnetic interactions. Particle-astrophysics and the Big Bang. **Prerequisites:** Physics 130B.

#### 155. Nonlinear Dynamics (4)

Qualitative aspects of Hamiltonian and dissipative dynamical systems: stability of orbits, integrability of Hamiltonian systems, chaos and nonperiodic motion, transition to chaos. Examples to be drawn from mechanics, fluid mechanics, and related physical systems. Numerical work and graphical display and interpretation will be emphasized. Three hours lecture. **Prerequisites:** Physics 100B and 110B. (S)

#### 160. Stellar Astrophysics (4)

Introduction to stellar astrophysics: observational properties of stars, solar physics, radiation and energy transport in stars, stellar spectroscopy, nuclear processes in stars, stellar structure and evolution, degenerate matter and compact stellar objects, supernovae and nucleosynthesis. Physics 160, 161, and 162 may be taken as a three-quarter sequence for students interested in pursuing graduate study in astrophysics or individually as topics of interest. **Prerequisite:** Physics 2A, 2B, 2C, 2D or 4A, 4B, 4C, 4D, 4E. (F)

#### 161. Black Holes and The Milky Way Galaxy (4)

The structure and content of the Milky Way galaxy and the physics of black holes. Topics will be selected from: general relativity, theory and observation of black holes, galactic X-ray sources, galactic structure, physical processes in the interstellar medium, star formation. Physics 160, 161, and 162 may be taken as a three-quarter sequence for students interested in pursuing graduate study in astrophysics or individually as topics of interest. **Prerequisites:** Physics 2A, 2B, 2C, 2D or 4A, 4B, 4C, 4D, 4E. (W)

#### 162. Galaxies and Cosmology (4)

The structure and properties of galaxies, galaxy dynamics and dark matter, the expanding universe, plus some of the following topics: the big bang, early universe, galaxy formation and evolution, large scale structure, active galaxies and quasars. Physics 160, 161, and 162 may be taken as a three-quarter sequence for students interested in pursuing graduate study in astrophysics or individually as topics of interest. **Prerequisites:** Physics 2A, 2B, 2C, 2D or 4A, 4B, 4C, 4D, 4E. (S)

#### 170. Medical Instruments: Principles and Practice (4)

The principles and clinical applications of medical diagnostic instruments, including electromagnetic measurements, spectroscopy, microscopy; ultrasounds, X-rays, MRI, tomography, lasers in surgery, fiber optics in diagnostics. **Prerequisite:** Physics 1C, or 2C, or equivalent. (F)

#### 171/271. Biophysics of Neurons and Networks (4–4)

Fundamental limits to measurements on nervous systems, the biophysics of excitable membranes and neurons, and the fundamentals of recurrent neuronal networks. The emphasis is on information processing by the nervous system through physical reasoning and mathematical analysis. Three hours lecture. The graduate version, Physics 271, will include a report at the level of a research proposal. **Prerequisites:** Physics 100A and 110A, BILD 1, Chemistry 6C and Physics 140A, for graduate students, consent of instructor. The graduate version, Physics 271, will include a report at the level of a research proposal. (F)

#### 172/272. Biophysics of Molecules (4–4)

Physical concepts and techniques used to study the structure and function of biological molecules, the thermodynamics and kinetics of biological activity, and physical descriptions of biological processes. Examples from enzyme action, protein folding, photobiology, and molecular motors. Three hours lecture. **Prerequisites:** Physics 100A and 110A, BILD 1, Chemistry 6C and Physics 130A; and graduate students, consent of instructor. The graduate version, Physics 272, will include a report at the level of a research proposal. (W)

#### 173. Modern Physics Laboratory: Biological and Quantum Physics (4)

A selection of experiments in contemporary physics and biophysics. Students select among pulsed NMR, Mossbauer, Zeeman effect, light scattering, holography, optical trapping, voltage clamp and genetic transcription of ion channels in oocytes, fluorescent imaging, and flight control in flies. **Prerequisites:** Physics 120A, BILD 1, and Chemistry 6BL. (S)

#### 180/280. Teaching and Learning Physics (4)

How people learn and understand key concepts in physics. Readings in physics, physics education research, and cognitive science. Field work teaching and evaluating pre-college and college students. Useful for students interested in teaching and learning physical sciences. **Prerequisites:** Physics 1, 2, or 4 series, or consent of instructor. Cross-listed with EDS 105.

#### 191. Undergraduate Seminar on Physics (1)

Undergraduate seminars organized around the research interests of various faculty members. **Prerequisite:** Physics 2A or 4A series.

#### 192. Senior Seminar in Physics (1)

The Senior Seminar Program is designed to allow senior undergraduates to meet with faculty members in a small group setting to explore an intellectual topic in Physics (at the upper-division level). Senior Seminars may be offered in all campus departments. Topics will vary from quarter to quarter. Senior Seminars may be taken for credit up to four times, with a change in topic, and permission of the department. Enrollment is limited to twenty students, with preference given to seniors.

#### 195. Physics Instruction (2–4)

Students will be responsible for and teach a class section of a lower-division physics course. They will also attend a weekly meeting on teaching methods and materials conducted by the professor who supervises their teaching. (P/NP grades only) **Prerequisite:** consent of instructor. (F,W,S)

### 197. Physics Internship (4)

An enrichment program which provides work experience with industry, government offices, etc., under the supervision of a faculty member and industrial supervisor. **Prerequisite:** Completion of 90 units with 2.5 GPA and consent of faculty advisor.

### 198. Directed Group Study (2 or 4)

Directed group study on a topic or in a field not included in the regular departmental curriculum. (P/NP grades only.) **Prerequisites:** consent of instructor and departmental chair. (F,W,S)

### 199. Research for Undergraduates (2 or 4)

Independent reading or research on a problem by special arrangement with a faculty member. (P/NP grades only.) **Prerequisites:** consent of instructor and departmental chair. (F,W,S)

### 199H. Honors Thesis Research for Undergraduates (2–4)

Honors thesis research for seniors participating in the Honors Program. Research is conducted under the supervision of a physics faculty member. **Prerequisite:** admission to the Honors Program in physics. (F,W,S)

## GRADUATE

### 200A. Theoretical Mechanics (4)

Lagrange's equations and Hamilton's principle; symmetry and constants of the motion. Applications to: charged particle motion; central forces and scattering theory; small oscillations; anharmonic oscillations; rigid body motion; continuum mechanics. **Prerequisite:** Physics 110B or equivalent. (F)

### 200B. Theoretical Mechanics (4)

Hamilton's equations, canonical transformations; Hamilton-Jacobi theory; action-angle variables and adiabatic invariants; introduction to canonical perturbation theory, nonintegrable systems and chaos; Liouville equation; ergodicity and mixing; entropy; statistical ensembles. **Prerequisite:** Physics 200A. (W)

### 201. Mathematical Physics (5)

An introduction to mathematical methods used in theoretical physics. Topics include: a review of complex variable theory, applications of the Cauchy residue theorem, asymptotic series, method of steepest descent, Fourier and Laplace transforms, series solutions of ODE's and related special functions, Sturm Liouville theory, variational principles, boundary value problems, and Green's function techniques. (F)

### 203A. Advanced Classical Electrodynamics (5)

Electrostatics, symmetries of Laplace's equation and methods for solution, boundary value problems, electrostatics in macroscopic media, magnetostatics, Maxwell's equations, Green functions for Maxwell's equations, plane wave solutions, plane waves in macroscopic media. **Prerequisite:** Physics 100C or equivalent. (W)

### 203B. Advanced Classical Electrodynamics (4)

Special theory of relativity, covariant formulation of electrodynamics, radiation from current distributions and accelerated charges, multipole radiation fields, waveguides and resonant cavities. **Prerequisite:** Physics 203A. (S)

### 210A. Equilibrium Statistical Mechanics (4)

Approach to equilibrium: BBGKY hierarchy; Boltzmann equation; H-theorem. Ensemble theory; thermodynamic potentials. Quantum statistics; Bose condensation. Interacting systems: Cluster expansion; phase transition via mean-field theory; the Ginzburg criterion. **Prerequisites:** Physics 140A–B, 152A, 200A–B, or equivalent; concurrent enrollment in Physics 212C. (S)

### 210B. Nonequilibrium Statistical Mechanics (4)

Transport phenomena; kinetic theory and the Chapman-Enskog method; hydrodynamic theory; nonlinear effects and the mode coupling method. Stochastic processes; Langevin and Fokker-Planck equation; fluctuation-dissipation relation; multiplicative processes; dynamic field theory; Martin-Siggia-Rose formalism; dynamical scaling theory. **Prerequisite:** Physics 210A. (F)

### 210C. Statistical Field Theory (4)

Phase transition and critical phenomena: Landau-Ginzburg model and statistical field theory; Goldstone modes; breakdown of mean-field theory. Universality; scaling theory; the renormalization group. Epsilon expansion; large-N expansion; the nonlinear-sigma model. Topological defects; duality; the Kosterlitz-Thouless transition. **Prerequisite:** Physics 210A or consent of instructor. (W)

### 211A. Solid-State Physics (5)

The first of a two-quarter course in solid-state physics. Covers a range of solid-state phenomena that can be understood within an independent particle description. Topics include: chemical versus band-theoretical description of solids, electronic band structure calculation, lattice dynamics, transport phenomena and electrodynamics in metals, optical properties, semiconductor physics. **Prerequisite:** Physics 152A or equivalent. (F)

### 211B. Solid-State Physics (4)

Continuation of 211A. Deals with collective effects in solids arising from interactions between constituents. Topics include electron-electron and electron-phonon interactions, screening, band structure effects, Landau Fermi liquid theory. Magnetism in metals and insulators, superconductivity; occurrence, phenomenology, and microscopic theory. **Prerequisites:** Physics 210A, 211A. (offered in alternate years) (W)

### 212A. Quantum Mechanics (4)

Hilbert space formulation of quantum mechanics and application to simple systems: states and observables, uncertainty relations and measurements, time evolution, and mixed states and density matrix. Symmetries: commuting observables and symmetries, rotation group representations, Clebsch-Gordan coefficients, Wigner-Eckhardt theorem, and discrete symmetries (parity, time reversal, etc.). **Prerequisite:** Physics 130B or equivalent. (F)

### 212B. Quantum Mechanics (4)

Time independent perturbation theory: non-degenerate and degenerate cases, Zeeman effect, fine structure, exclusion principle, and many-electron atoms. Time dependent perturbation theory: interaction picture and Dyson series, transition rates. Radiation theory: quantization of EM field, calculation of atomic level transition rates, line width, and spontaneous decay. **Prerequisite:** Physics 212A. (W)

### 212C. Quantum Mechanics (4)

Scattering theory: Lippman-Schwinger formalism, Born approximation, partial waves, inelastic processes, and spin dependence. Path integrals: introductions and simple examples, rigid rotator, and Bohm-Aharonov effect. Dirac equation: single particle equation, hydrogen atom, and holes. **Prerequisites:** Physics 212A–B. (S)

### 214. Physics of Elementary Particles (4)

Classification of particles using symmetries and invariance principles, quarks and leptons, quantum electrodynamics, weak interactions, e+p- interactions, deep-inelastic lepton-nucleon scattering, pp collisions, introduction to QCD. **Prerequisite:** Physics 215A. (W)

### 215A. Particles and Fields (4)

The first quarter of a three-quarter course on field theory and elementary particle physics. Topics covered include the relation between symmetries and conservation laws, the calculation of cross sections and reaction rates, covariant perturbation theory, and quantum electrodynamics. (F)

### 215B. Particles and Fields (4)

Continuation of 215A. Gauge theory quantization by means of path integrals, SU(3) symmetry and the quark model, spontaneous symmetry breakdown, introduction to QCD and the Glashow-Weinberg-Salam model of weak interactions, basic issues of renormalization. **Prerequisite:** Physics 215A. (W)

### 215C. Particles and Fields (4)

Modern applications of the renormalization group in quantum chromodynamics and the weak interactions. Unified gauge theories, particle cosmology, and special topics in particle theory. **Prerequisites:** Physics 215A–B. (offered in alternate years) (S)

### 217. Field Theory and the Renormalization Group (4)

Application of field theoretic and renormalization group methods to problems in condensed matter, or particle physics. Topics will vary and may include: phase transition and critical phenomena; many body quantum systems; quantum chromodynamics and the electroweak model. **Prerequisite:** Physics 210A.

### 218A. Plasma Physics (4)

The basic physics of plasmas is discussed for the simple case of an unmagnetized plasma. Topics include: thermal equilibrium statistical properties, fluid and Landau theory of electron and ion plasma waves, velocity space instabilities, quasi-linear theory, fluctuations, scattering or radiation, Fokker-Planck equation. (F)

### 218B. Plasma Physics (4)

This course deals with magnetized plasma. Topics include: Appleton-Hartree theory of waves in cold plasma, waves in warm plasma (Bernstein waves, cyclotron damping). MHD equations, MHD waves, low frequency modes, and the adiabatic theory of particle orbits. **Prerequisite:** Physics 218A. (W)

### 218C. Plasma Physics (4)

This course deals with the physics of confined plasmas with particular relevance to the controlled fusion. Topics include: topology of magnetic fields, confined plasma equilibria, energy principles, ballooning and kink instabilities, resistive MHD modes (tearing, rippling and pressure-driven), gyrokinetic theory, microinstabilities and anomalous transport, and laser-plasma interactions relevant to inertial fusion. **Prerequisite:** Physics 218B. (S)

### 133/219. Condensed Matter/Materials Science Laboratory (4)

A project-oriented laboratory course utilizing state-of-the-art experimental techniques in materials science. The course prepares students for research in a modern condensed matter-materials science laboratory. Under supervision, the students develop their own experimental ideas after investigating current research literature. With the use of sophisticated state-of-the-art instrumentation students conduct research, write a research paper, and make verbal presentations. **Prerequisites:** Physics 2CL and 2DL for undergraduates; Physics 152A or Physics 211A for graduate students. (S)

### 220. Group Theoretical Methods in Physics (4)

Study of group theoretical methods with applications to problems in high energy, atomic, and condensed matter physics. Representation theory, tensor methods, Clebsch-Gordan series. Young tableaux. The course will cover discrete groups, Lie groups and Lie algebras, with emphasis on permutation, orthogonal, and unitary groups. **Prerequisite:** Physics 212C. (S)

### 221A. Nonlinear and Nonequilibrium Dynamics of Physical Systems (4)

An introduction to the modern theory of dynamical systems and applications thereof. Topics include maps and flows, bifurcation theory and normal form analysis, chaotic attractors in dissipative systems, Hamiltonian dynamics and the KAM theorem, and time series analysis. Examples from real physical systems will be stressed throughout. **Prerequisite:** Physics 200B. (Offered in alternate years.) (W)

### 221B. Nonlinear and Nonequilibrium Dynamics of Physical Systems (4)

Nonlinear dynamics in spatially extended systems. Material to be covered includes fluid mechanical instabilities, the amplitude equation approach to pattern formation, reaction-diffusion dynamics, integrable systems and solitons, and an introduction to coherent structures and spatio-temporal chaos. **Prerequisites:** Physics 210B and 221A. (Offered in alternate years.) (S)

### 222A. Elementary Particle Physics (4)

Weak interactions; neutrino physics; C,P, and CP violation; electroweak gauge theory and symmetry breaking. Design of detectors and experiments; searches for new phenomena. **Prerequisites:** Physics 214. (W)

### 223. Stellar Structure and Evolution (4)

Energy generation, flow, hydrostatic equilibrium, equation of state. Dependence of stellar parameters (central surface temperature, radius, luminosity, etc.) on stellar mass and

relation to physical constants. Relationship of these parameters to the H-R diagram and stellar evolution. Stellar interiors, opacity sources, radiative and convective energy flow. Nuclear reactions, neutrino processes. Polytypic models. White dwarfs and neutron stars. **Prerequisites:** Physics 130C or equivalent, Physics 140A–B or equivalent. (S/U grades permitted.) (Offered in alternate years.) (F)

#### 224. Physics of the Interstellar Medium (4)

Gaseous nebulae, molecular clouds, ionized regions, and dust. Low energy processes in neutral and ionized gases. Interaction of matter with radiation, emission and absorption processes, formation of atomic lines. Energy balance, steady state temperatures, and the physics and properties of dust. Masers and molecular line emission. Dynamics and shocks in the interstellar medium. **Prerequisites:** Physics 130A–B or equivalent, Physics 140A–B or equivalent. (S/U grades permitted.) (Offered in alternate years.)

#### 225A–B. General Relativity (4-4)

This is a two-quarter course on gravitation and the general theory of relativity. The first quarter is intended to be offered every year and may be taken independently of the second quarter. The second quarter will be offered in alternate years. Topics covered in the first quarter include special relativity, differential geometry, the equivalence principle, the Einstein field equations, and experimental and observational tests of gravitation theories. The second quarter will focus on more advanced topics, including gravitational collapse, Schwarzschild and Kerr geometries, black holes, gravitational radiation, cosmology, and quantum gravitation. (225B offered in alternate years.) (F,W)

#### 226. Galaxies and Galactic Dynamics (4)

The structure and dynamics of galaxies. Topics include potential theory, the theory of stellar orbits, self-consistent equilibria of stellar systems, stability and dynamics of stellar systems including relaxation and approach to equilibrium. Collisions between galaxies, galactic evolution, dark matter, and galaxy formation. **Prerequisite:** consent of instructor. (Offered in alternate years.)

#### 227. Cosmology (4)

An advanced survey of topics in physical cosmology. The Friedmann models and the large-scale structure of the universe, including the observational determination of  $H_0$  (the Hubble constant) and  $q_0$  (the deceleration parameter). Galaxy number counts. A systematic exposition of the physics of the early universe, including vacuum phase transitions; inflation; the generation of net baryon number, fluctuations, topological defects and textures. Primordial nucleosynthesis, both standard and nonstandard models. Growth and decay of adiabatic and isocurvature density fluctuations. Discussion of dark matter candidates and constraints from observation and experiment. Nucleocosmochronology and the determination of the age of the universe. **Prerequisite:** consent of instructor. (Offered in alternate years.)

#### 228. High-Energy Astrophysics and Compact Objects (4)

The physics of compact objects, including the equation of state of dense matter and stellar stability theory. Maximum mass of neutron stars, white dwarfs, and super-massive objects. Black holes and accretion disks. Compact X-ray sources and transient phenomena, including X-ray and  $\gamma$ -ray bursts. The fundamental physics of electromagnetic radiation mechanisms: synchrotron radiation, Compton scattering, thermal and nonthermal bremsstrahlung, pair production, pulsars, particle acceleration models, neutrino production and energy loss mechanisms, supernovae, and neutron star production. **Prerequisites:** Physics 130A–B–C or equivalent. (Offered in alternate years.)

#### 230. Advanced Solid-State Physics (4)

Selection of advanced topics in solid-state physics; material covered may vary from year to year. Examples of topics covered: disordered systems, surface physics, strong-coupling superconductivity, quantum Hall effect, low-dimensional solids, heavy fermion systems, high-temperature superconductivity, solid and liquid helium. **Prerequisite:** Physics 211B. (S)

#### 152B/232. Electronic Materials (4)

Physics of electronic materials. Semiconductors: bands, donors and acceptors, devices. Metals: Fermi surface,

screening, optical properties. Insulators: dia-/ferro-electrics, displacive transitions. Magnets: dia-/para-/ferro-/antiferromagnetism, phase transitions, low temperature properties. Superconductors: pairing, Meissner effect, flux quantization, BCS theory. **Prerequisite:** Physics 152A, Phys. 211 or consent of instructor. Graduate students in Phys. 232 will complete a special topics paper. (S)

#### 235. Nonlinear Plasma Theory (4)

This course deals with nonlinear phenomena in plasmas. Topics include: orbit perturbation theory, stochasticity, Arnold diffusion, nonlinear wave-particle and wave-wave interaction, resonance broadening, basics of fluid and plasma turbulence, closure methods, models of coherent structures. **Prerequisite:** Physics 218C or consent of instructor. (Offered in alternate years.) (W)

#### 239. Special Topics (1-3)

From time to time a member of the regular faculty or a resident visitor will find it possible to give a self-contained short course on an advanced topic in his or her special area of research. This course is not offered on a regular basis, but it is estimated that it will be given once each academic year. (S/U grades permitted.)

#### 141/241. Computational Physics I: Probabilistic Models and Simulations (4-4)

Project-based computational physics laboratory course with student's choice of Fortran90/95 or C/C++. Applications from materials science to the structure of the early universe are chosen from molecular dynamics, classical and quantum Monte Carlo methods, physical Langevin/Fokker-Planck processes, and other modern topics. Graduate students will do advanced projects. **Prerequisites:** upper-division standing or consent of instructor; graduate standing for 241. (W)

#### 142/242. Computational Physics II: PDE and Matrix Models (4-4)

Project-based computational physics laboratory course for modern physics and engineering problems with student's choice of Fortran90/95 or C/C++. Applications of finite element PDE models are chosen from quantum mechanics and nanodevices, fluid dynamics, electromagnetism, materials physics, and other modern topics. Graduate students will do advanced projects. **Prerequisites:** upper-division standing; graduate standing for 242. (S)

#### 243. Stochastic Methods (4)

Introduction to methods of stochastic modeling and simulation. Topics include: random variables; stochastic processes; Markov processes; one-step processes; the Fokker-Planck equation and Brownian motion; the Langevin approach; Monte-Carlo methods; fluctuations and the Boltzmann equation; and stochastic differential equations. (F)

#### 244. Parallel Computing in Science and Engineering (4)

Introduction to basic techniques of parallel computing, the design of parallel algorithms, and their scientific and engineering applications. Topics include: parallel computing platforms; message-passing model and software; design and application of parallel software packages; parallel visualization; parallel applications. (S)

#### 250. Condensed Matter Physics Seminar (0-1)

Discussion of current research in physics of the solid state and of other condensed matter. (S/U grades only.) (F,W,S)

#### 251. High-Energy Physics Seminar (0-1)

Discussions of current research in nuclear physics, principally in the field of elementary particles. (S/U grades only.) (F,W,S)

#### 252. Plasma Physics Seminar (0-1)

Discussions of recent research in plasma physics. (S/U grades only.) (F,W,S)

#### 253. Astrophysics and Space Physics Seminar (0-1)

Discussions of recent research in astrophysics and space physics. (S/U grades only.) (F,W,S)

#### 257. High-Energy Physics Special Topics Seminar (0-1)

Discussions of current research in high-energy physics. (S/U grades only.) (F,W,S)

#### 258. Astrophysics and Space Physics Special Topics Seminar (0-1)

Discussions of current research in astrophysics and space physics. (S/U grades only.) (F,W,S)

#### 260. Physics Colloquium (0-1)

Discussions of recent research in physics directed to the entire physics community. (S/U grades only.) (F,W,S)

#### 261. Seminar on Physics Research at UCSD (0-1)

Discussions of current research conducted by faculty members in the Department of Physics. (S/U grades only.) (W,S)

#### 266. Recent Topics in Condensed Matter Physics (1-3)

The course is dedicated to recent developments in the area of condensed matter physics through lectures given by graduate students and postdocs. The course teaches practical skills, delivering research lectures, and answering questions in front of a research audience. **Prerequisite:** physics graduate students in good standing. (F,W,S)

#### 171/271. Biophysics of Neurons and Networks (4-4)

Fundamental limits to measurements on nervous systems, the biophysics of excitable membranes and neurons, and the fundamentals of recurrent neuronal networks. The emphasis is on information processing by the nervous system through physical reasoning and mathematical analysis. Three hours lecture. The graduate version, Physics 271, will include a report at the level of a research proposal. **Prerequisites:** Physics 100A and 110A, BILD 1, Chemistry 6C and Physics 140A, for graduate students, consent of instructor. The graduate version, Physics 271, will include a report at the level of a research proposal. (F)

#### 172/272. Biophysics of Molecules (4-4)

Physical concepts and techniques used to study the structure and function of biological molecules, the thermodynamics and kinetics of biological activity, and physical descriptions of biological processes. Examples from enzyme action, protein folding, photobiology, and molecular motors. Three hours lecture. **Prerequisites:** Physics 100A and 110A, BILD 1, Chemistry 6C and Physics 130A and graduate students consent of instructor. The graduate version, Physics 272, will include a report at the level of a research proposal. (W)

#### 180/280. Teaching and Learning Physics (4)

How people learn and understand key concepts in physics. Readings in physics, physics education research, and cognitive science. Field work teaching and evaluating pre-college and college students. Useful for students interested in teaching and learning physical sciences. Undergraduate students are required to read and discuss papers in class. Graduate students are expected to read the papers and prepare an annotated bibliography on the background literature, then lead the in-class discussion on the topics covered in the papers. **Prerequisites:** Physics 1, 2, or 4 series, or consent of instructor.

#### 295. M.S. Thesis Research in Materials Physics (1-12)

Directed research on M.S. dissertation topic. (F,W,S)

#### 297. Special Studies in Physics (1-4)

Studies of special topics in physics under the direction of a faculty member. **Prerequisites:** consent of instructor and departmental vice chair, education. (S/U grades permitted.) (F,W,S)

#### 298. Directed Study in Physics (1-12)

Research studies under the direction of a faculty member. (S/U grades permitted.) (F,W,S)

#### 299. Thesis Research in Physics (1-12)

Directed research on dissertation topic. (F,W,S)

#### 500. Instruction in Physics Teaching (1-4)

This course, designed for graduate students, includes discussion of teaching, techniques and materials necessary to teach physics courses. One meeting per week with course instructors, one meeting per week in an assigned recitation section, problem session, or laboratory section. Students are required to take a total of two units of Physics 500. (F,W,S)

# Political Science

## PROFESSORS

Amy B. Bridges, Ph.D.  
William M. Chandler, Ph.D.  
Ellen T. Comisso, Ph.D.  
Wayne A. Cornelius, Ph.D., *Emeritus*  
Paul W. Drake, Ph.D., *Emeritus*  
Steven P. Erie, Ph.D.  
Clark C. Gibson, Ph.D., Chair

## THE MAJOR PROGRAM

Political science addresses some of the fundamental problems facing human society. Questions concerning world peace, government policies aimed at achieving economic stability and growth, the management of environmental quality, control over political competition, the possibility of using law to affect social and political change, and the gap between the rich and poor in the United States and abroad are all on the research agenda of contemporary political scientists. The general purpose of the major is to address these and other issues systematically, and, simultaneously, to raise the broad theoretical questions which can help students relate today's political debates to those debates about politics which have kept a theoretical tradition alive for over 2,000 years.

Students may major in political science as a general program of study, or they may concentrate in one of six areas: (1) American politics, (2) comparative politics, (3) international relations, (4) political theory, (5) public law, and (6) public policy. All majors in political science must satisfy the following sixteen courses: PS 30 (Political Inquiry), three of the following four lower-division courses (Political Science 10, 11, 12 and 13) and twelve upper-division courses. (Note: Lower-division courses PS 27 and PS 40 may not be used to satisfy requirements in the political science major or minor.) Moreover, as stated below, students concentrating in one of the fields must satisfy that field's particular lower- and upper-division requirements.

## REQUIREMENTS FOR MAJOR IN POLITICAL SCIENCE WITHOUT AN AREA OF CONCENTRATION

1. Three of the four lower-division courses from 10, 11, 12, 13.
2. Political Science 30
3. Any twelve upper-division political science courses

## REQUIREMENTS FOR MAJOR IN POLITICAL SCIENCE WITH AN AREA OF CONCENTRATION

### *Major in Political Science/American Politics*

1. Lower-division required: PS 10 (in addition to two other lower-division courses from 11, 12, 13)
2. Political Science 30
3. Five upper-division American courses:

- a. at least two of which must be from the 100 sequence: 100A-B-C, 100DA, 100E, 100H, 100J, 100K, 100L, 100M, 100N
- b. the additional courses for the American concentration must be chosen from: 102C, 102E-F-G, 102J-K-L, 103A-B-C, 104A-B-C-D, 104F, 104I, 104L-M, 105A-B-C, 108

### *Major in Political Science/Comparative Politics*

1. Lower-division required: PS 11 (in addition to two other lower-division courses from 10, 12, 13)
2. Political Science 30
3. Five upper-division courses, including
  - a. at least one from the following thematic courses: 120K, 122A-B, 123, 124A, 125, 125A, 126AA-AB, 127, 136A-B-C, 137A, 150A-B
  - b. and at least one each from two of the following three regional areas:  
Asia: 121, 121B, 130H, 131C, 132C, 133A, 133D, 133DD, 133G, 133J  
Europe: 120A-B-C-D-E, 120H, 120I-J-K, 126AA-AB, 130AA, 130AD  
Latin America: 134AA, 134B, 134D; 134I

### *Major in Political Science/International Relations*

1. Lower-division required: PS 12 (in addition to two other lower-division courses from 10, 11, 13)
2. Political Science 30
3. Five upper-division IR courses with at least one each from the following two groups:
  - a. Foreign Policy/National and International Security: 140B-C, 142A, 142I-J-K-L-M-N-O-P, 143A, 145A, 146A, 146E, 150A, 152
  - b. Political Economy/Theory of International Relations: 126AA-AB, 140A, 141B, 142L, 144AB, 142L, 144E-F, 145C, 146A, 152

### *Major in Political Science/Political Theory*

1. Three of four lower-division courses from 10, 11, 12, 13
2. Political Science 30
3. 110A-B-C
4. And at least two additional courses from 110DA, 110EA, 110EB, 110EC, 110ED, 110H, 110J, 110N, 110T, 112A, 112C, 113A-B, 114B, 115A, 116A, 119A

### *Major in Political Science/Public Law*

1. Lower-division required: PS 10 (in addition to two other lower-division courses from 11, 12, 13)
2. Political Science 30
3. Five of the following: 100A-B, 102L, 104A-B-C-D, 104F, 104I, 104L-M

### *Major in Political Science/Public Policy*

1. Lower-division required: PS 10 (in addition to two other lower-division courses from 11, 12, 13)

2. Political Science 30
3. 160AA
4. One of 160AB, 167A, 168
5. Two of 100A-B-C, 100E-F-G, 100I-J
6. One of 102B-C, 102E, 102L, 103A, 103B, 142A, 142J, 150A-B, 162, 163, 165, 166F

Two upper-division courses in a field may be substituted for that field's lower-division course. However, these courses cannot also be used to satisfy the upper-division course requirements for a concentration of that field.

Since course offerings change from year to year, students are strongly advised to consult the department for the latest listing of courses before preregistration.

Agreements signed between UC San Diego and several community colleges allow students to apply some community college courses toward lower-division course requirements for the major. Transfer students must, however, take at least one of the lower-division courses (10, 11, 12, 13) in residence at UCSD. Courses taken elsewhere may be credited toward the major. Please check with an undergraduate student affairs advisor for more information on credit for courses taken elsewhere.

Students who pass the Advanced Placement (AP) Tests in American or Comparative Politics may petition to be exempted from taking PS 10 or 11 (respectively). Effective fall 2004, students must pass with a score of 5 to be exempted from taking PS 10 or 11.

At least nine courses in political science must be taken in residence at UCSD. A total maximum of six courses may be taken elsewhere and applied toward the major. This applies to transfer students, students who pass the AP exam(s), as well as students who study abroad on the Education Abroad Program (EAP) or the Opportunities Abroad Program (OAP). Students planning to transfer course work completed elsewhere are urged to consult an undergraduate student affairs advisor.

Double majors who include political science as one of their two majors must fulfill the requirements of both programs. Please consult an undergraduate student affairs advisor for more information.

Students must maintain an overall 2.0 GPA in the major. To be counted toward satisfying the requirements for the major, upper- and lower-division courses must be completed with a C- or better grade. Courses taken to satisfy requirements for the major may not be taken Pass/Not Pass with the exception of a maximum of two independent study courses (PS 199).

Honors candidates for departmental honors are required to take PS 191A and B in which they write a senior thesis. To be admitted to the Honors Seminar a student must be of senior standing in the first quarter of the seminar, have a minimum GPA of 3.6 in political science, have completed all lower-division requirements including Political Science 30 and five upper-division courses. Also, students must have an advisor prior to enrolling in the Honors Seminar. These courses may be counted toward the upper-division requirement.

## CAREER GUIDANCE

The premise of our educational philosophy is that the best professional preparation for productive careers which we can provide is one which is broad, theoretical, and only indirectly related to the current job market. Our majors graduate into a wide range of career options.

Many political science majors at UCSD will seek admission to a law school. Although law schools make no recommendation concerning the usefulness of any undergraduate major, a B.A. in political science should be seen as a useful complement to a law degree. Students who take courses in American government, policy analysis, and law and politics find that they develop a keen understanding of the role of law in the general political process. This helps students understand the limits and possibilities of the legal process in fostering change or in preserving the status quo. This same curriculum provides a solid foundation for a career in journalism. Students with any specific questions regarding law are advised to consult with career services.

Increasingly, political science majors are preparing for careers in business or as policy analysts in both the public and private sectors. Many of these students pursue advanced degrees in public policy or study for a master's in business administration. Students interested in this option should look into public policy, American, or comparative politics as an area of concentration. Some political science majors are interested in careers in international organization or diplomacy. These students should look into international relations as an area of concentration. In addition, a broad array of courses in comparative politics is essential for anyone interested in a career of international service.

A political science major offers excellent preparation for teaching in the elementary schools. If you are interested in earning a California teaching credential from UCSD, contact the Teacher Education Program for information about the prerequisite and professional preparation requirements. It is recommended that you contact TEP as early as possible in your academic career.

Students interested in majoring or minoring in political science should stop by the Department of Political Science Office, SSB 301, or visit our Web site at <http://www.polisci.ucsd.edu>.

## STUDY ABROAD

Political science majors are encouraged to participate in the UC Education Abroad Program (EAP) and UCSD's Opportunities Abroad Program (OAP). Information on EAP/OAP is given in the "Education Abroad Program" section of the UC San Diego General Catalog. Interested students should contact the Programs Abroad Office in the International Center and visit its Web site at <http://programsabroad.ucsd.edu>. Financial aid can be used for EAP/OAP study, and special study-abroad scholarships are also available.

## MINOR IN POLITICAL SCIENCE

For students entering UCSD winter 1998 or later the following guidelines for a political science minor will apply: seven political science courses, not including Political Science 27 and 40, with a minimum of

five upper-division. Continuing students may follow the guidelines for a minor of a total of six political science courses, with a minimum of three upper-division. All courses taken for a political science minor must be taken for a letter grade.

## INTERDISCIPLINARY MINOR

The Department of Political Science takes part in one interdisciplinary minors offered at UCSD. The law and society minor offers students the opportunity to examine the role of the legal system in society. Students should note that Law and Society 101 (Contemporary Legal Issues) may be used in fulfilling the twelve upper-division course requirement for the political science major. Additional information on this program is available through the Warren Interdisciplinary Programs Office.

## RESEARCH

The Department of Political Science is closely affiliated with several research centers/institutes/projects currently on campus. Faculty members directly involved include: Steven Erie, director, Urban Studies Program; J. Lawrence Broz, coordinator, Project in International Affairs; Germaine Hoston, director, Center for TransPacific Studies in Values, Culture, and Politics; Mathew McCubbins, director, Public Policy Research Project; Zoltan Hajnal and Thaddeus Kousser, coordinators, American Political Institutions Project; Wayne Cornelius, director, Center for Comparative Immigration Studies; and Clark Gibson, coordinator, Political Economy of Development Series. For further information please refer to the General Catalog section on "Research at UCSD."

## THE PH.D. PROGRAM

The Department of Political Science at the University of California, San Diego offers a program of graduate studies leading to the Ph.D. degree. Instruction is provided in the major fields of the discipline. For purposes of comprehensive examinations, the discipline is broken into four fields: American politics, comparative politics, international relations, and political theory. The department also offers a variety of courses that are of a methodological or epistemological nature, spanning the various fields.

## PROGRAM OVERVIEW

### Course Work

Students must complete eighteen quarter courses before the end of the second year with an overall grade point average of 3.3 or better. All students must complete the six-course core curriculum, Political Science 200A-C and 204A-C. No other UCSD courses may be substituted to fulfill this requirement. Fifteen of these courses must be offered by the department, with a number between Political Science 200 and 279. (Political Science 200A-C and 204A-C count toward this requirement). No more than three courses, offered within or outside the department, may be taken on a satisfactory/unsatisfactory basis. In some individual fields the faculty normally recommends that students take

more graded courses in political science than the minimum.

Additional requirements, such as course work or research skills including proficiency in a foreign language, may be set by the faculty in any examination area as a prerequisite for taking the General Examination in that area.

A student who has completed work toward a graduate degree in political science at another institution prior to enrollment at UCSD is subject to all requirements of the UCSD program. The only exception is as follows: With permission of the department's director of graduate studies a student that has received a graduate degree in political science at another institution may count up to four quarter-course equivalents (taken at other institutions) toward the eighteen-course requirement, including the core curriculum.

Good progress toward the Ph.D. requires that a student complete nine courses by the end of the first year. In addition to the six-course core curriculum, students are advised to complete two or three field core courses during their first year. At the end of the second year good progress requires completion of eighteen courses, of which at least fifteen must be numbered between Political Science 200 and 279.

A student who has not made good progress in course work may receive no more than a 33 percent teaching or research assistantship from the department for the following year. Students on a UCSD fellowship may receive no more than two-thirds of their stipend for the following year.

## General Examination

By the end of the second year, a student must stand for the General Examination. The General Examination consists of written examinations in each of two fields and in a focus area, and an oral examination. The department offers examinations in four fields: American politics, comparative politics, international relations, and political theory. Each field also offers examinations in a number of focus areas that represent a specialized sub-field within a major research literature. By the first day of spring quarter of the second year each student must submit to the graduate coordinator a General Examination plan identifying the two fields within which exams will be taken, and the topic of the focus-field. The General Examination will normally take place during the seventh week of spring quarter. Normally, each written examination will be taken on a separate day within a one-week period, and the oral examination will be given within two weeks of the completion of the written examinations.

## Written Examinations

Written field examinations last four hours. These examinations cover major theoretical approaches in a field. They are structured so that passing requires general knowledge and understanding of important work in the field as a whole. Written focus-area examinations last four hours. These examinations cover in greater depth one subfield within a major research literature. Written examinations are open-note and open-book. Students are expected to do their own work, and to compose their answers on

the day of the examination. Text from computer files may not be downloaded into these answers.

## Oral Examinations

The oral examination normally lasts between one and two hours, and covers all three written examinations. It may also include discussion of the student's seminar paper. A student must take the oral examination, even if one or more of the written examinations is such that it is deemed impossible to pass the entire examination.

Each field has a designated field coordinator, appointed by the department chair in consultation with the director of graduate studies. The field coordinator, in consultation with the faculty in the field, prepares the written examinations. Each General Examination is graded by a committee of four faculty members, with two from each of the student's examination fields. These examiners are nominated by the field coordinator and appointed by the department chair. Students are normally informed of the composition of General Examination boards during the fourth week of the spring quarter.

Each General Examination is graded in its entirety. A student passes or fails the entire examination, not simply parts of it. The examination committee may assign a grade of fail, pass, or distinction. A student passes the General Examination if at least three examiners vote to assign a grade of pass or better. A student receives a grade of distinction by vote of at least three examiners. The student will receive written notification of the examination committee's decision. A student who fails the General Examination must retake it at least one week prior to the start of the fall quarter of the third year. A student who fails the General Examination twice will not be permitted to continue in the graduate program in political science.

Good progress toward the Ph.D. requires that a student complete the General Examination by the end of the second year. A student who has not attempted all parts of the General Examination by the end of the second year may not continue in the program.

## Seminar Papers

A student must complete one seminar paper in one of his or her examination fields. This paper may be written as part of the requirements for a regularly scheduled seminar course or in an independent research course.

Certification that a paper fulfills the seminar paper requirement is at the sole discretion of the faculty member supervising the work (i.e., the instructor of the course for which the paper was written). A student may not take the General Examination before fulfilling the seminar paper requirement. A final draft of the paper, along with the appropriate form certifying that the paper meets the seminar paper requirement, must be submitted to the graduate coordinator before the written portion of the General Examination may be taken. Copies of the seminar paper will be distributed to the General Examination committee.

## Departmental Workshops

A student must complete one seminar paper in one of his or her examination fields. This paper may be written as part of the requirements for a regularly scheduled seminar course or in an independent research course.

Certification that a paper fulfills the seminar paper requirement is at the sole discretion of the faculty member supervising the work (i.e., the instructor of the course for which the paper was written).

A student may not take the General Examination before fulfilling the seminar paper requirement. A final draft of the paper, along with the appropriate form certifying that the paper meets the seminar paper requirement, must be submitted to the graduate coordinator before the written portion of the General Examination may be taken. Copies of the seminar paper will be distributed to the General Examination committee.

## Masters in Political Science

Doctoral students in the Department of Political Science who do not already hold an M.A. may apply for an M.A. after successfully completing fifteen quarter courses, nine of which must be numbered between Political Science 200 and 279, and one seminar paper approved by a member of the department.

## Advancement to Candidacy

A student must complete one seminar paper in one of his or her examination fields. This paper may be written as part of the requirements for a regularly scheduled seminar course or in an independent research course.

Certification that a paper fulfills the seminar paper requirement is at the sole discretion of the faculty member supervising the work (i.e., the instructor of the course for which the paper was written).

A student may not take the General Examination before fulfilling the seminar paper requirement. A final draft of the paper, along with the appropriate form certifying that the paper meets the seminar paper requirement, must be submitted to the graduate coordinator before the written portion of the General Examination may be taken. Copies of the seminar paper will be distributed to the General Examination committee.

## Dissertation

By the end of the sixth year good progress requires completion of the dissertation. A student who fails to complete the dissertation by the end of the sixth year may be denied all departmental financial assistance.

## Advising and Evaluation

Each incoming student is assigned a temporary faculty advisor by the director of graduate studies. At the end of the first year students are given the opportunity to confirm that advisor or select a new one. At the beginning of the third year each student must select a faculty member from the department to serve as prospectus advisor. The prospectus advisor will help guide the student in writing the prospectus and selecting a dissertation committee. It

is not assumed that the prospectus advisor will subsequently chair the dissertation committee, or even be a member of it. Those roles should be determined as the prospectus develops.

During the spring quarter each student is evaluated by his or her advisor in consultation with the departmental faculty. The student will receive a written evaluation from the advisor each year. The student must sign this evaluation for it to become an official part of the student's departmental file. As part of the first-year review each student must complete a plan of study that identifies a faculty seminar paper supervisor, two examination fields, a focus area, and intended preparation in each. This plan must be signed by the student's faculty advisor and submitted to the graduate coordinator by the end of spring quarter of the first year.

## Student Petitions

To contest an evaluation or any departmental action a student must do so in writing. A petition should be submitted to the director of graduate studies no later than the end of the quarter following the evaluation (or other action) contested by the student.

## COURSES

*For course descriptions not found in the UC San Diego General Catalog, 2010–11, please contact the department for more information.*

### LOWER-DIVISION

#### 10. Introduction to Political Science: American Politics (4)

This course surveys the processes and institutions of American politics. Among the topics discussed are individual political attitudes and values, political participation, voting, parties, interest groups, Congress, presidency, Supreme Court, the federal bureaucracy, and domestic and foreign policy making.

#### 11. Introduction to Political Science: Comparative Politics (4)

The nature of political authority, the experience of a social revolution, and the achievement of an economic transformation will be explored in the context of politics and government in a number of different countries.

#### 12. Introduction to Political Science: International Relations (4)

The issues of war/peace, nationalism/internationalism, and economic growth/redistribution will be examined in both historical and theoretical perspectives.

#### 13. Power and Justice (4)

An exploration of the relationship between power and justice in modern society. Materials include classic and contemporary texts, films and literature.

#### 27. Ethics and Society (4)

(Same as Phil. 27) An examination of ethical principles (e.g., utilitarianism, individual rights, etc.) and their social and political applications to contemporary issues such as abortion, environmental protection, and affirmative action. Ethical principles will also be applied to moral dilemmas familiar in government, law, business, and the professions. Satisfies the Warren College ethics and society requirement. **Prerequisites:** CAT 2 and 3, DOC 2 and 3, MCWP 40 and 50, Hum. 1 and 2, MMW 2 and 3, WCWP 10A–B, or WARR 11A–B.

#### 30. Political Inquiry (4)

Introduction to the logic of inference in social science and to quantitative analysis in political science and public policy including research design, data collection, data description

and computer graphics, and the logic of statistical inference (including linear regression).

#### 40. Introduction to Law and Society (4)

This course is designed as a broad introduction to the study of law as a social institution and its relations to other institutions in society. The focus will be less on the substance of law (legal doctrine and judicial opinions) than on the process of law—how legal rules both reflect and shape basic social values and their relation to social, political, and economic conflicts within society.

#### 87. Freshman Seminar (1)

The Freshman Seminar Program is designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminars are offered in all campus departments and undergraduate colleges, and topics vary from quarter to quarter. Enrollment is limited to 15 to 20 students, with preference given to entering freshmen. May not be used to fulfill any major or minor requirements in political science.

#### 99R. Independent Study (1)

Independent study or research under direction of a member of the faculty. **Prerequisites:** Student must be of freshman class standing, and a Regents Scholar; Approved Special Studies Form.

### UPPER-DIVISION

Minimum requirement for all upper-division courses is at least one quarter of lower-division political science, or upper-division standing.

### AMERICAN POLITICS

#### 100A. The Presidency (4)

The role of the presidency in American politics. Topics will include nomination and election politics, relations with Congress, party leadership, presidential control of the bureaucracy, international political role, and presidential psychology.

#### 100B. The U.S. Congress (4)

This course will examine the nomination and election of congressmen, constituent relationships, the development of the institution, formal and informal structures, leadership, comparisons of House with Senate, lobbying, and relationship with the executive branch.

#### 100C. American Political Parties (4)

This course examines the development of the two major parties from 1789 to the present. Considers the nature of party coalitions, the role of leaders, activists, organizers, and voters, and the performance of parties in government.

#### 100DA. Voting, Campaigning, and Elections (4)

A consideration of the nature of public opinion and voting in American government. Studies of voting behavior are examined from the viewpoints of both citizens and candidates, and attention is devoted to recent efforts to develop models of electoral behavior for the study of campaigns. The role of mass media and money also will be examined.

#### 100E. Interest Group Politics (4)

The theory and practice of interest group politics in the United States. Theories of pluralism and collective action, the behavior and influence of lobbies, the role of political action committees, and other important aspects of group action in politics are examined. **Prerequisite:** sophomore standing.

#### 100H. Race and Ethnicity in American Politics (4)

This course examines the processes by which racial and ethnic groups have/have not been incorporated into the American political system. The course focuses on the political experiences of European immigrant groups, blacks, Latinos, and Asians.

#### 100J. Race in American Political Development (4)

Readings examine how the multiracial character of the United States has shaped the broad outlines of American politics. Cases include the founding/the Constitution, southern politics, social organization in formerly Mexican

regions, the New Deal, consequences of limited suffrage. **Prerequisite:** upper-division standing.

#### 100K. Railroads and American Politics (4)

The railroads transformed the economy and politics of the United States in the nineteenth century. The railroads were the first big businesses and their sheer size lead inevitably to conflict with governments at all levels. This conflict shaped modern politics. **Prerequisite:** upper-division standing.

#### 100M. Political Psychology (4)

We begin with hypotheses about how people develop political attitudes, and methods to test those hypotheses. The second half focuses on emerging cognitive neuroscience insights, including brain imaging, and asks how these inform theories of political cognition, affect, and behavior. **Prerequisite:** upper-division standing.

#### 100N. Politics in Washington (4)

Examines Washington as a political community, its institutions, culture, and history. In addition to its elected officeholders and senior government officials, it examines Washington's subcommunities: the national news industry, diplomatic service, the representation of interests. **Prerequisite:** department approval is required.

#### 100O. Perspectives on Race (4)

Drawing heavily from the political psychology literature, this course looks at race in American politics from a variety of perspectives. We consider psychological, genetic, neuroscience, economic, political, sociological, and legal views of what drives powerful dynamics of race in our country. **Prerequisite:** upper-division standing.

#### 100P. Economic Entrepreneurs and American Politics (4)

This course is concerned with the interaction between representative democracy and capitalism in American political history. The key to understanding this interaction is the role of the entrepreneur in the economy and how unexpected economic change shapes politics. **Prerequisite:** upper-division standing.

#### 102C. American Political Development (4)

Examines selected issues and moments in the political history of the United States, comparing competing explanations and analyses of U.S. politics. Likely topics include the founding, "American exceptionalism," change in the party system, race in U.S. politics, the "new institutionalism."

#### 102E. Urban Politics (4)

(Same as USP107) This survey course focuses upon the following six topics: the evolution of urban politics since the mid-nineteenth century; the urban fiscal crisis; federal/urban relationships; the "new" ethnic politics; urban power structure and leadership; and selected contemporary policy issues such as downtown redevelopment, poverty, and race.

#### 102F. Mass Media and Politics (4)

This course will explore both the role played by mass media in political institutions, processes and behaviors, and reciprocally, the roles played by political systems in guiding communication processes.

#### 102G. Special Topics in American Politics (4)

An undergraduate course designed to cover various aspects of American politics. May be repeated for credit two times, provided each course is a separate topic, for a maximum of twelve units.

#### 102J. Advanced Topics in Urban Politics (4)

(Same as USP 110) Building upon the introductory urban politics course, the advanced topics course explores issues such as community power, minority empowerment, and the politics of growth. A research paper is required. Students wishing to fulfill the paper requirement with field research should enroll in the subsequent PS 102JJ course (offered Summer Session 2). **Prerequisite:** consent of instructor.

#### 102JJ. Field Research in Urban Politics (2)

(Same as USP 111) To be taken with the approval of the PS 102J instructor, this course allows students to do original field research on topics in urban politics. This course is offered in Summer Session 2 subsequent to a 102J course.

**Prerequisite:** consent of instructor. May not be used to fulfill any major or minor requirements in Political Science.

#### **102K. The Urban Underclass (4)**

The lives of individuals living in ghetto poverty in the United States. Causes and consequences of ghetto poverty. Political debates surrounding the underclass and different possible solutions. **Prerequisite:** upper-division standing.

#### **102L. The Politics of Regulation (4)**

Politics and policy-making issues in regulation. Themes: regulation versus legislation; general versus specific grants of regulatory power; market versus command mechanisms; private property; and risk assessment. Emphasis on American regulatory policy, examples from current regulatory debates (e.g., health care and environment). **Prerequisite:** upper-division standing.

#### **103A. California Government and Politics (4)**

(Same as USP 109) This survey course explores six topics: 1) the state's political history; 2) campaigning, the mass media, and elections; 3) actors and institutions in the making of state policy; 4) local government; 5) contemporary policy issues; e.g., Proposition 13, school desegregation, crime, housing and land use, transportation, water; 6) California's role in national politics.

#### **103B. Politics and Policymaking in Los Angeles (4)**

(Same as USP 113) This course examines politics and policymaking in the five-county Los Angeles region. It explores the historical development of the city, suburbs, and region; politics, power, and governance; and major policy challenges facing the city and metropolitan area. **Prerequisite:** upper-division standing.

#### **103C. Politics and Policymaking in San Diego (4)**

(Same as USP 115) This course examines how major policy decisions are made in San Diego. It analyzes the region's power structure (including the roles of non-governmental organizations and the media), governance systems and reform efforts, and the politics of major infrastructure projects. **Prerequisite:** upper-division standing or consent of instructor.

#### **104A. The Supreme Court and the Constitution (4)**

An introduction to the study of the Supreme Court and constitutional doctrine. Topics will include the nature of judicial review, federalism, race, and equal protection. The relation of judicial and legislative power will also be examined.

#### **104B. Civil Liberties—Fundamental Rights (4)**

This course will examine issues of civil liberties from both legal and political perspectives. Topics will include the First Amendment rights of speech, press, assembly, and religion; other "fundamental" rights, such as the right to privacy; and some issues in equal protection. Conflicts between governmental powers and individual rights will be examined.

#### **104C. Civil Liberties—The Rights of Criminals and Minorities (4)**

Examines the legal issues surrounding the rights of "marginal" groups such as aliens, illegal immigrants, and the mentally ill. Also includes a discussion of the nature of discrimination in American society.

#### **104D. Judicial Politics (4)**

Introduction to the study of law and courts as political institutions and judges as political actors, including the role of the judiciary in our constitutional system and decision making both within the Supreme Court and within the judicial hierarchy.

#### **104F. Seminar in Constitutional Law (4)**

This seminar will provide an intensive examination of a major issue in constitutional law, with topics varying from year to year. Recent topics have included equal protection law and the rights of civilians in wartime. Students will be required to do legal research on a topic, write a legal brief, and argue a case to the seminar. **Prerequisites:** PS 104A/B; department stamp.

#### **104I. Law and Politics—Courts and Political Controversy (4)**

This course will examine the role of the courts in dealing with issues of great political controversy, with attention

to the rights of speech and assembly during wartime, questions of internal security, and the expression of controversial views on race and religion. The conflict between opposing Supreme Court doctrines on these issues will be explored in the context of the case studies drawn from different historical periods.

#### **104L. Positive Political Theory of Law (4)**

We will discuss modern theories of the origins of law and legal behavior.

#### **104M. Law and Sex (4)**

How law regulates and impacts sexuality and orientation with focus on constitutional law in areas of privacy, free speech, association, regulation of sexual conduct under criminal law pornography, procreation, reproductive rights, and regulation of family status. **Prerequisite:** upper-division standing. Credit will not be allowed for students who have taken Political Science 102G Law and Sex in the following quarters: spring 2002, (section A00); spring 2001 (section A00); fall 1999 (section A00).

#### **105A. Latino Politics in the U.S. (4)**

This course examines contemporary issues in Latino politics in the U.S.; comparisons of racial and ethnic group experiences in the U.S.; Latino access to the political system through political participation. **Prerequisite:** upper-division standing.

#### **105B. Understanding Interracial Conflict (4)**

This course examines and seeks to explain patterns of conflict and cooperation between different racial and ethnic groups within the United States. Why do groups cooperate under certain circumstances and fall into conflict in others? **Prerequisite:** upper-division standing.

#### **108. Politics of Multiculturalism (4)**

This course will examine central issues in debates about race, ethnicity, and multiculturalism in the United States. It will look at relations not only between whites and minorities, but also at those among racial and ethnic communities. **Prerequisite:** upper-division standing.

### **POLITICAL THEORY**

#### **110A. Citizens and Saints: Political Thought from Plato to Augustine (4)**

This course focuses on the development of politics and political thought in ancient Greece, its evolution through Rome and the rise of Christianity. Readings from Plato, Aristotle, Augustine, Machiavelli, and others.

#### **110B. Sovereigns, Subjects, and the Modern State: Political Thought from Machiavelli to Rousseau (4)**

The course deals with the period which marks the rise and triumph of the modern state. Central topics include the gradual emergence of human rights and the belief in individual autonomy. Readings from Machiavelli, Hobbes, Locke, Rousseau, and others.

#### **110C. Revolution and Reaction: Political Thought from Kant to Nietzsche (4)**

The course deals with the period which marks the triumph and critique of the modern state. Central topics include the development of the idea of class, of the irrational, of the unconscious, and of rationalized authority as they affect politics. Readings drawn from Rousseau, Kant, Hegel, Marx, Nietzsche, and others.

#### **110DA. Freedom and Discipline: Political Thought in the Twentieth Century (4)**

This course addresses certain problems which are characteristic of the political experience of the twentieth century. Topics considered are revolution, availability of tradition, and the problems of the rationalization of social and political relations. Readings from Nietzsche, Weber, Freud, Lenin, Gramsci, Dewey, Oakeshott, Arendt, Merleau-Ponty.

#### **110EA. American Political Thought from Revolution to Civil War (4)**

The first quarter examines the origins and development of American political thought from the revolutionary period to the end of the nineteenth century with special emphasis on the formative role of eighteenth-century liberalism and the tensions between "progressive" and "conservative" wings of the liberal consensus.

#### **110EB. American Political Thought from Civil War to Civil Rights (4)**

The second quarter examines some of the major themes of American political thought in the twentieth century including controversies over the meaning of democracy, equality, and distributive justice, the nature of "neoconservatism," and America's role as a world power.

#### **110EC. American Political Thought: Contemporary Debates (4)**

This course explores contemporary issues in American political thought. Topics may include liberalism and rights, gender and sexuality, race and ethnicity, cultural diversity, and the boundaries of modern citizenship. Readings include political pamphlets, philosophical treatises, court decisions, and works of literature.

#### **110ED. Seminar in American Political Thought (4)**

This seminar explores debates over ideals, institutions, and identities in American political thought. Themes and topics will vary. Readings will include political pamphlets, philosophical treatises, court decisions, and works of literature. **Prerequisites:** upper-division standing; department stamp.

#### **110G. International Political Thought (4)**

This course explores theories of politics that are oriented beyond state borders. Key topics include international order, cosmopolitanism, human rights, just war, global justice, migration, citizenship, identity, and commercial society. The course examines thinkers from classical antiquity to contemporary times. **Prerequisite:** upper division standing.

#### **110H. Democracy and Its Critics (4)**

This course will examine the historical development of the ideal of democracy from Periclean Athens to the present in the light of criticism by such thinkers as Plato, Tocqueville, and Mosca and difficulties encountered in efforts to realize the ideal.

#### **110J. Power in American Society (4)**

This course examines how power has been conceived and contested during the course of American history. The course explores the changes which have occurred in political rhetoric and strategies as America has moved from a relatively isolated agrarian and commercial republic to a military and industrial empire.

#### **110T. Modern Political Ideologies (4)**

An examination of some of the ideas and values associated with major social and political movements in Europe and the United States since the French Revolution. Topics will vary and may include liberalism, populism, democracy, communism, nationalism, fascism, and feminism.

#### **112A. Economic Theories of Political Behavior (4)**

An introduction to theories of political behavior developed with the assumptions and methods of economics. General emphasis will be upon theories linking individual behavior to institutional patterns. Specific topics to be covered will include collective action, leadership, voting, and bargaining.

#### **112C. Political Theory and Artistic Vision (4)**

The course explores the modes of political thinking found in arts, especially in drama and literature. It may include ends and means, political leadership, and political economy. Students may not receive credit for both POLI 112CS and POLI 112C. **Prerequisite:** upper-division standing.

#### **113A. East Asian Thought in Comparative Perspective (4)**

This course examines the major traditions of East Asian thought in comparative perspective. Topics include Confucianism, Taoism, Buddhism, and contemporary nationalist and East Asian political thought. Throughout, focused comparisons and contrasts will be made between western and eastern thought. **Prerequisite:** upper-division standing.

#### **113B. Chinese and Japanese Political Thought I (4)**

Examines philosophical traditions of ancient and modern China and Japan, to understand how these have been reflected in Chinese and Japanese development. Course will be in English; however, students with Chinese or Japanese language skills will have opportunity to use these. Graduate

students will be required to complete a seminar-length research paper; undergraduate students will write a paper. **Prerequisites:** upper-division standing for 113B.

#### **114B. Marxist Political Thought (4)**

An introduction to Marxist thought from its roots in the western tradition through its development in non-western contexts. Emphasis is placed on how adaptations were made in Marxism to accommodate the specific challenges of each environment.

#### **115A. Gender and Politics (4)**

Our understanding of politics, power, conflict, and quality continue to be challenged and transformed by considering gender as it intersects with nationality, race, class, and ethnicity. We will consider the importance of gender in each of the subfields of political science.

#### **116A. Feminist Theory (4)**

Readings in historical and contemporary feminist theory; development of gender as a category of political analysis; alternative perspectives on core concepts and categories in feminist thought.

#### **118B. The Political Theory of Liberation Theology (4)**

A comparative study of liberation theologies, including Continental, Latin American, South African, and East Asian. **Prerequisite:** PS 118A.

#### **119A. Special Topics in Political Theory (4)**

An undergraduate course designed to cover various aspects of political theory. May be repeated for credit two times, provided each course is a separate topic, for a maximum of twelve units.

### **COMPARATIVE POLITICS**

#### **120A. Political Development of Western Europe (4)**

An examination of various paths of European political development through consideration of the conflicts which shaped these political systems: the commercialization of agriculture; religion and the role of the church; the army and the state bureaucracy; and industrialization. Stress will be on alternative paradigms and on theorists.

#### **120B. The German Political System (4)**

An analysis of the political system of the Federal Republic of Germany with an emphasis on the party system, elections, executive-legislative relations, and federalism. Comparisons will be made with other West European democracies and the Weimar Republic.

#### **120C. Politics in France (4)**

This course will examine the consequences of social and economic change in France. Specific topics will include institutional development under a semi-presidential system, parties, and elections.

#### **120D. Germany: Before, During, and After Division (4)**

Consideration of political, economic, and security factors that have kept Germany at the center of European developments for more than a century.

#### **120E. Scandinavian Politics (4)**

Introduction to the politics and societies of the Scandinavian states (Denmark, Finland, Norway, and Sweden). Focuses on historical development, political culture, constitutional arrangements, political institutions, parties and interest groups, the Scandinavian welfare states, and foreign policy. **Prerequisite:** upper-division standing.

#### **120H. European Integration (4)**

This course reviews the origins and development of the European Community/European Union and its institutions, theories of integration and the challenges inherent in the creation of a supranational political regime.

#### **120I. Politics in Italy (4)**

This course will provide a comparative perspective on the development and functioning of the Italian political system. It includes analysis of political institutions, ideological traditions, parties and elections, political elites in the policy process, and the evolving importance of Italy within European integration.

#### **120K. Politics of Developing Countries (4)**

This course critically examines central concepts and theories of development, and assesses their utility in

understanding political, economic, and social change in three regions of the developing world: Latin American, sub-Saharan Africa, and Southeast Asia.

#### **121. Government and Politics of the Middle East (4)**

This course examines general themes affecting the region (social structure and regime type, religion and modernization, bonds and tensions), the character of major states, and efforts to resolve the conflict between Israel and its Arab and Islamic neighbors. **Prerequisite:** upper-division standing.

#### **121B. Politics in Israel (4)**

An interdisciplinary study of Israel as both a unique and yet a common example of a modern democratic nation-state. We will examine Israel's history, its political, economic, and legal systems, social structure and multicultural tensions, the relation between state and religion, national security, and international relations.

#### **122. Politics of Human Rights (4)**

What do we mean by "international human rights"? Are they universal? This course examines human rights abuse and redress over time, and across different regions of the world. From this empirically grounded perspective, we critically evaluate contemporary human rights debates. **Prerequisite:** upper-division standing.

#### **123. Politics of Empire in Comparative Perspective (4)**

In between "rises" and "declines," empires are political entities with highly heterogeneous populations that must be governed. The course examines the similarities and differences in imperial governance, comparing the internal and external political dynamics of traditional (Roman, Ottoman), modernizing (Habsburg), and modern (British) empires. **Prerequisite:** upper-division standing.

#### **125. The Politics of Conservation in Developing Countries (4)**

Conservation in developing countries concerns resources that are extremely important to policymakers, militaries, environmental organizations, communities, and individuals. This course examines these groups' struggle for control over wildlife and forests—from the capital to the village—on several continents.

#### **125A. Communities and the Environment (4)**

A popular new idea in environmental protection is to include local communities in conservation efforts. But what are these communities? What challenges do they face in governing their own resources? This course uses both theory and case studies to explore the political economy of community-based conservations.

#### **126AA. Fundamentals of Political Economy: Modern Capitalism (4)**

This course explores how economic factors affect political institutions and how political action affects economic behavior in the United States and Western Europe. Particular attention is given to relations between business and labor, economic policy choices, and the impact of international trade. **Prerequisite:** PS 11 or consent of instructor.

#### **126AB. Politics and Economics in Eastern Europe (4)**

This course explores the interrelationship of politics and economics in Eastern Europe, analyzing the historic evolution of the area, the socialist period, and contemporary political and economic change there. **Prerequisite:** upper-division standing.

#### **127. Politics of Developing Countries (4)**

This course critically examines central concepts and theories of development, and assesses their utility in understanding political, economic, and social change in the developing world. Central case studies are drawn from three regions: Latin America, Sub-Saharan Africa, and Southeast Asia. **Prerequisite:** upper-division standing.

#### **130AA. The Soviet Successor States (4)**

An overview of the historical background and contemporary politics of the fifteen successor states of the Soviet Union.

#### **130AD. The Politics of the Russian Revolution (4)**

An examination of the dynamics of the Russian Revolution from 1905 through the Stalinist period and recent years in light of theories of revolutionary change. Emphasis

is placed on the significance of political thought, socio-economic stratification, and culturo-historical conditions.

#### **131C. The Chinese Revolution (4)**

An analysis of the dynamics of the Chinese Revolution from the fall of the Qing Dynasty (1644–1911) to the present. Emphasis is placed on the relationship between political thought and the dynamics of the revolutionary process.

#### **132C. Political Development and Modern China (4)**

Political development has dominated the study of comparative politics among U.S. academicians since the revival of the Cold War in 1947. This course examines critically this paradigm and its Western philosophical roots in the context of the experience of modern China.

#### **133A. Japanese Politics: A Developmental Perspective (4)**

This course will analyze the political systems of modern Japan in comparative-historical perspective.

#### **133D. Political Institutions of East Asian Countries (4)**

This course discusses the following major topics in three East Asian countries (Japan, South Korea, and Taiwan) from a comparative perspective: (a) economic and political development (b) political institutions (c) public policies.

#### **133DD. Comparative Analysis of East Asian Institutions (4)**

This seminar is designed to be advanced follow-up to PS 133D. It examines present-day East Asian government institutions in much greater depth. **Prerequisite:** PS 133D.

#### **133J. Korean Politics (4)**

This course is primarily about the politics and political economy of South Korea, but will also briefly look at politics and political economy of North Korea as well as foreign and unification policies of the two Koreas. **Prerequisite:** upper-division standing.

#### **134AA. Comparative Politics of Latin America (4)**

Comparative analysis of contemporary political systems and developmental profiles of selected Latin American countries, with special reference to the ways in which revolutionary and counter-revolutionary movements have affected the political, economic, and social structures observable in these countries today. Analyzes the performance of "revolutionary" governments in dealing with problems of domestic political management, reducing external economic dependency, redistributing wealth, creating employment, and extending social services. Introduction to general theoretical works on Latin American politics and development. **Prerequisite:** PS 11 or consent of instructor.

#### **134B. Politics in Mexico (4)**

General survey of the Mexican political system as it operates today. Emphasis on factors promoting the breakdown of Mexico's authoritarian regime and the transition to a more democratic political system. Changing relationship between the state and various segments of Mexico society (economic elites, peasants, urban labor, and the Church). New patterns of civil-military relations.

#### **134D. Selected Topics in Latin American Politics (4)**

A comparative analysis of contemporary political issues in Latin America. Material to be drawn from two or three countries. Among the topics: development, nationalism, neoimperialism, political change. **Prerequisite:** upper-division standing.

#### **134I. Politics in the Southern Cone of Latin America (4)**

This course is a comparative analysis of twentieth-century political developments and issues in the southern cone of Latin America: Argentina, Chile, and Uruguay. The course will also examine the social and economic content and results of contrasting political experiments. **Prerequisite:** upper-division standing.

#### **134N. Politics in Central America (4)**

Focused examination of political conflict in one or more countries of the region, emphasizing issues, ideology, and process in grassroots political organization. Limited coverage of international politics.

#### **136A. Nationalism and Ethnic Conflict (4)**

Appropriate case studies from around the world will be selected.

**136B. Comparative Politics and Political Culture (4)**

This course is designed to provide undergraduates with a sound introduction to cultural interpretations of power and politics. The course will also attempt to render an explicit account of the process of theory formation in social science. Special attention will be given to Africa and Asia.

**136C. Comparative Bureaucracy (4)**

Politics of the administrative state in the world's democracies. How political institutions influence governance across different types of democratic institutional environments.

**137A. Comparative Political Parties and Interest Groups (4)**

This course serves as an introduction to the comparative study of political parties and interest groups as well as an analytical introduction to parties, interest groups, and their role in democratic representation. **Prerequisite:** upper-division standing.

**138D. Special Topics in Comparative Politics (4)**

An undergraduate course designed to cover various aspects of comparative politics. May be repeated for credit two times, provided each course is a separate topic, for a maximum of twelve units.

**INTERNATIONAL RELATIONS****140A. International Law and Organizations (4)**

International law and organizations are central to the efforts to create a world order to limit armed conflict, regulate world economy, and advance programs for economic redistribution among nations, and set minimum standards of human rights. This course explains the theory of international law and organizations that is accepted by diplomats and compares this viewpoint to the analysis of social scientists concerning the past record and likely future of world order concerning conflict, economic redistribution, and human rights.

**140B. Concepts and Aspects of Revolution (4)**

Introduction to the analytical and comparative study of revolutionary movements and related forms of political violence. Topics include: the classical paradigm; types of revolutionary episodes; psychological theories; ideology and belief systems; coups; insurgencies; civil wars; terrorism and revolutionary outcomes. **Prerequisite:** upper-division standing.

**140C. International Crisis Diplomacy (4)**

A survey of international peacekeeping and peace enforcement in civil conflicts with a simulation of international diplomacy. **Prerequisite:** upper-division standing.

**141B. Scientific Analysis of Conflict and Peace (4)**

The use of data to evaluate theories of conflict. Course will examine the relationship between theory and evidence, measurement and research design. Specific issues examined may include the relationship of power, preference, economic relations, and domestic politics to conflict and peace. **Prerequisites:** POLI 12 and POLI 30.

**142A. United States Foreign Policy (4)**

United States foreign policy from the colonial period to the present era. Systematic analysis of competing explanations for U.S. policies—strategic interests, economic requirements, or the vicissitudes of domestic politics. Interaction between the U.S., foreign states (particularly allies), and transnational actors are examined. **Prerequisite:** PS 12 or consent of instructor.

**142I. National and International Security (4)**

A survey of theories of defense policies and international security.

**142J. National Security Strategy (4)**

A survey of American strategies for national defense. Topics may include deterrence, coercive diplomacy, limited war, and unconventional warfare.

**142K. Politics and Warfare (4)**

This course offers an exploration of general theories of the origins of warfare; the impact of the state on war in the modern world; and the micro-foundations of combat and compliance in the context of the costs of war and military mobilization. The course should be of special interest to students in international relations and comparative politics.

**142L. Insurgency and Terrorism (4)**

"Terrorism" uses "illegitimate" violence to achieve political goals. This course uses philosophical, historical, and contemporary material from distinct cultures to understand which actions are defined as "terrorist," who uses them, why, and when, as well as the determinants of their effectiveness.

**142M. U.S. Foreign Policy/Regional Security (4)**

Lectures and readings examine U.S. foreign policy in Europe, Latin America, and East Asia with attention to current problems with specific nations (e.g., Bosnia) and issues (e.g., terrorism). This course integrates historical, comparative, and foreign perspectives on regional security dynamics. Credit will not be given to students who took PS 154 Special Topic/International Relations with the subtitle U.S. Foreign Policy/Regional Security, in spring 1998, spring 2001, or fall 2002.

**142N. American Defense Policy (4)**

An introduction to analytic techniques for assessing policy options in the field of national security. **Prerequisite:** upper-division standing.

**142O. International Terrorism (4)**

(Same as SOCD 177.) This course covers the definitions, history, and internationalization of terrorism; the interrelation of religion, politics, and terror; and the representation of terrorism in the media. A number of organizations and their activities in Europe and the Middle East are examined. **Prerequisite:** upper-division standing.

**142P. Crisis Areas in World Politics (4)**

This course examines the most critical areas in contemporary world politics. While the emphasis will be placed on American involvement in each crisis, an effort will be made to acquaint the student with its historical and political background. Credit will not be allowed for students who have taken POLI 154 "Crisis Areas in World Politics" in the following quarters: SP01; SP02; SP03; SP04; SP05; WI06; SP06; SI06; FA06; WI07; SP07(A00); SI07(A00). **Prerequisite:** upper-division standing.

**143A. War and Society (4)**

How has warfighting evolved over the centuries? How has it varied across cultures? What has war been like for soldiers and civilians? How do societies mobilize for war, and how do they change in the short and long term from fighting? **Prerequisite:** upper-division standing.

**144AB. Selected Topics in International Political Economy (4)**

This course will consider major theories purporting to explain and predict the workings of the international order from the point of view of political economy. An extended discussion of one aspect of the economic order (e.g., the multinational corporation) will serve as the test case. PS 144AA and one quarter of economics recommended. **Prerequisite:** PS 12.

**144E. The Politics of International Trade (4)**

Examines theories of trade and protectionism, focusing both on relations among advanced industrial nations and on relations between developed and developing countries. Topics include standard and strategic trade theory, nontariff barriers to trade, export-led growth strategies, regional trade agreements, and the future of the WTO.

**144F. The Politics of International Trade and Finance (4)**

Examines the welfare and distributional aspects of international trade and finance as they relate to the politics of economic policymaking. Topics include: globalization in historical perspective; origins and consequences of trade policy; exchange-rate arrangements; international capital flows; currency crises; economic development.

**145A. International Politics and Drugs (4)**

This course examines the domestic and international aspects of the drug trade. It will investigate the drug issues from the perspectives of consumers, producers, traffickers, money launderers, and law enforcement. Course material covers the experience of the United States, Latin America, Turkey, Southeast Asia, Western Europe, and Japan.

**145C. International Relations After the Cold War: Theory and Prospect (4)**

The nature of international politics appears to have changed dramatically since 1989. This course applies different theoretical approaches to enhance our understanding of the new international environment, future prospects for peace and war, and current problems of foreign policy. **Prerequisite:** upper-division standing.

**146A. The U.S. and Latin America: Political and Economic Relations (4)**

An analytical survey of U.S. relations with Latin America from the 1820s to the present, with particular emphasis on the post-Cold War environment. Topics include free trade and economic integration; drugs and drug trafficking; illegal migration and immigration control. Focus covers U.S. policy, Latin American reactions, dynamics of cooperation, and options for the future.

**150A. Politics of Immigration (4)**

Comparative analysis of attempts by the United States and other industrialized countries to initiate, regulate and reduce immigration from Third World countries. Social and economic factors shaping outcomes of immigration policies, public opinion toward immigrants, anti-immigration movements, and immigration policy reform options in industrialized countries. **Prerequisites:** upper-division standing required.

**151. International Organizations (4)**

Surveys the theory and function of IOs (UN, NATO, EU, World Bank, IMF) in promoting international cooperation in security, peacekeeping, trade, environment, and human rights. We discuss why IOs exist, how they work, and what challenges they face. **Prerequisites:** PS 12, upper-division standing.

**154. Special Topics in International Relations (4)**

An undergraduate course designed to cover various aspects of international relations. May be repeated for credit two times, provided each course is a separate topic, for a maximum of twelve units.

**POLICY ANALYSIS****160AA. Introduction to Policy Analysis (4)**

(Same as USP 101) This course will explore the process by which the preferences of individuals are converted into public policy. Also included will be an examination of the complexity of policy problems, methods for designing better policies, and a review of tools used by analysts and policy makers. **Prerequisite:** PS 10 or 11.

**160AB. Introduction to Policy Analysis (4)**

In this course, students will use their knowledge of the political and economic foundations of public policy making to conduct research in a wide variety of public policy problems. **Prerequisite:** PS 160AA.

**162. Environmental Policy (4)**

This course will explore contemporary environmental issues such as global warming, endangered species, and land use. Students will be asked to analyze various policy options and to write case analyses. Policies may be debated in class.

**163. Analyzing Politics (4)**

Politics are understood as the combination of individual preferences and decisions into collective choices. What are the issues involved in aggregating individual preferences, what is the choice of rules—formal and informal—for doing so.

**165. Special Topic: Policy Analysis (4)**

An undergraduate course designed to cover various aspects of policy analysis. May be repeated for credit two times, provided each course is a separate topic, for a maximum of twelve units.

**168. Policy Assessment (4)**

The use of real data to assess policy alternatives. Introduction to benefit/cost analysis, decision theory, and the valuation of public goods. Applications to health, environmental, and regulatory economic policy making.

### 170A. Introductory Statistics for Political Science and Public Policy (4)

Introduction to the use of statistics in both political science and public policy concentrating on regression based approaches. Students undertake a series of small quantitative analyses and one project. **Prerequisites:** upper-division standing.

## SPECIAL STUDIES

### 191A–B. Senior Honors Seminar: Frontiers of Political Science (4-4)

This course is open only to seniors interested in qualifying for departmental honors. Admission to the course will be determined by the department. Each student will write an honors essay under the supervision of a member of the faculty.

### 192. Senior Seminar in Political Science (1)

The senior seminar is designed to allow senior undergraduates to meet with faculty members in a small group setting to explore an intellectual topic in political science at the upper-division level. Topics will vary from quarter to quarter. Senior seminars may be taken for credit up to four times, with a change in topic and permission of the department. Enrollment is limited to twenty students, with preference given to seniors. **Prerequisite:** department stamp and/or consent of instructor.

### 194. Research Seminar in Washington, D.C. (4)

(Same as Com/Gen 194; USP 194, H1TO 193, SocE 194, COGS 194) Course attached to six-unit internship taken by students participating in the UCDC program. Involves weekly seminar meetings with faculty and teaching assistant and a substantial research paper. **Prerequisites:** participating in UCDC program.

### 197I. Political Science Washington Internship (6, 8)

This internship is attached to the UC in DC Program. Students participating in the UC in DC Program are placed in an internship in the Washington, D.C., area, requiring approximately seventeen to twenty-three hours per week. **Prerequisites:** must be enrolled in the UC in DC Program; departmental stamp required.

### 199. Independent Study for Undergraduates (2 or 4)

Independent reading in advanced political science by individual students. (P/NP grades only.) **Prerequisite:** consent of instructor.

## GRADUATE

All graduate courses are categorized as either seminars or independent study.

## SEMINARS

### 200A. Foundations of Political Science (4)

An introduction to the theoretical concepts in the discipline of political science that are commonly used across various sub-fields. Each week will introduce the core concept(s) and discuss applications from several, if not all sub-fields in the department. **Prerequisite:** graduate student standing.

### 200B. Democracy (4)

An overview of the normative and positive issues associated with modern democracies. The appeal and the social, political, and economic arrangements of democracies will be explored. **Prerequisite:** graduate student standing.

### 200C. States and Markets (4)

An overview of the normative and positive issues associated with decentralized (market) versus centralized (political) mechanics of allocation. The appropriate role of government in the economy will be explored. **Prerequisite:** graduate student standing.

### 204A. Research Design (4)

This course will study various approaches to knowledge accumulation in social science. A basic outline of scientific method will be used to examine the difference between theories as assumptions and axioms and hypotheses as "if-then" statements derived from theory. Experimental, quasi-experimental, and qualitative designs will be discussed. **Prerequisite:** graduate student standing.

### 204B. Quantitative Methods I (4)

The use of quantitative methods (particularly multiple regression and its extensions) in political science. Emphasis on understanding the methods and using them in political science applications. **Prerequisite:** graduate student standing.

### 204C. Game Theory 1 (4)

This course introduces students to the rudiments of decision theory and game theory. Emphasis will be placed on modeling and solving games. **Prerequisite:** graduate student standing.

### 210A. Systems of Political Thought: Thucydides to Augustine (4)

This course is a preparation for the field examination in political theory. It will provide an intensive and critical introduction to European political thought from Thucydides to Augustine. Some of the secondary literature on this period will also be explored. **Prerequisite:** graduate standing or consent of instructor.

### 210B. Systems of Political Thought: Machiavelli to Rousseau (4)

This course is a preparation for the field examination in political theory. It will provide an intensive and critical introduction to European political thought from Machiavelli to Rousseau. Some of the secondary literature on this period will also be explored. **Prerequisite:** graduate standing or consent of instructor.

### 210C. Systems of Political Thought: Kant to Nietzsche (4)

This course is a preparation for the field examination in political theory. It will provide an intensive and critical introduction to European political thought from Kant to Nietzsche. Some of the secondary literature on this period will also be explored. **Prerequisite:** graduate standing or consent of instructor.

### 210D. Systems of Political Thought: Contemporary (4)

This course is a preparation for the field examination in political theory. It will provide an intensive and critical introduction to twentieth-century political thought. Some of the secondary literature on this period will also be explored. **Prerequisite:** graduate standing or consent of instructor.

### 214. Marxist and Post-Marxist Political Philosophy (4)

An examination of selected texts in Marxist and post-Marxist political philosophy, with a focus on the theme of individual and collective identity including issues concerning alienation, consciousness, and ideology. **Prerequisite:** graduate standing.

### 216. Contemporary Liberal and Democratic Theory (4)

Normative approaches to liberty, equality, justice, and democracy, mostly Anglo-American and empirical approaches to justice. Thinkers such as Rawls, Habermas, Nozick, Dworkin, Raz, Roemer, Elster, Ostrom, Bowles, and Gintis may be considered. **Prerequisite:** graduate standing.

### 219. Special Topics in Political Theory (4)

This seminar is an examination of the different approaches to the study of political theory. Issues and research areas will vary each time the course is offered. **Prerequisite:** graduate standing or consent of instructor.

### 220A. Comparative Politics: State and Society (4)

This course will provide a general literature review in comparative politics to serve as preparation for the field examination. **Prerequisite:** graduate standing, or consent of instructor.

### 220B. Comparative Politics: Institutions (4)

This is a second course in comparative politics designed as a preparation for the field examination. It will focus on the comparative study of political institutions. **Prerequisite:** graduate standing, or consent of instructor.

### 220C. Origins of the State (4)

Survey of theories, with empirical cases explaining origins of the modern state. **Prerequisite:** graduate standing.

### 222A. American Politics in Comparative Perspective (4)

Research seminar that focuses on the systematic comparison of the American political system with about thirty other contemporary democracies, particularly the other large

industrialized countries. A central aim will be to assess the claims about American "exceptionalism." **Prerequisite:** graduate standing.

### 223A. Comparative Parliamentary Studies (4)

A survey of the academic literature on parliamentary studies, comparing the research on legislative elections, behavior, and organization in American, European, and Asian democracies. The course will also compare various approaches to studying legislative activity. **Prerequisite:** graduate standing.

### 224. The Politics of Democratization (4)

A survey of theories explaining the processes of democratization and democratic stability. **Prerequisite:** graduate standing.

### 224A. Elections in Consolidating Democracies (4)

Course looks at elections in consolidating democracies with an eye to evaluating existing theories of elections with new data. Also explores new empirical patterns in countries around the world, especially Africa, Latin America, Eastern Europe, and the Soviet successor states. **Prerequisite:** graduate student standing or consent of instructor.

### 225B. The Nation-State (4)

A reading and research seminar on the origins, development, and politics of nationalism and the nation-state. **Prerequisite:** graduate standing.

### 227. Comparative Political Economy (4)

An introduction to seminal and current research in comparative political economy. Course explores how various political institutions and processes affect economic outcomes (e.g. growth, inequality, and redistribution) and how the economy influences politics (e.g. democratization, electoral institutions, and welfare states). **Prerequisite:** POLI 200C or consent of instructor.

### 228. Comparative Bureaucracy (4)

This course examines the politics of the administrative state in the world's democracies. The course focuses on how political institutions affect the nature of governance in democracies. **Prerequisite:** graduate student standing.

### 229. Special Topics in Comparative Politics (4)

This seminar is an examination of the different approaches to the study of comparative politics. Issues and research areas will vary each time the course is offered. **Prerequisite:** graduate standing or consent of instructor.

### 231E. Politics of Development (4)

This course provides an overview of previous and current efforts to explain political and economic development in non-western settings. **Prerequisite:** graduate standing or consent of instructor.

### 235A. Latin American Politics (4)

Introductory reading seminar on Latin American politics to acquaint students with leading schools of thought, provide critical perspective on premises and methodology, and identify themes for further inquiry. Themes include authoritarianism, revolution, democratization, regional conflict, and emergence of middle-level powers. **Prerequisite:** graduate standing.

### 236. Immigration Policy and Politics (4)

An interdisciplinary seminar covering origins, consequences, and characteristics of worker migration from Third World countries (especially Mexico, Central America, and the Caribbean basin) to the United States, from the nineteenth century to the present. **Prerequisite:** graduate standing or consent of instructor.

### 238. State and Society in Modern East Asia (4)

An examination of the role of the state in economic development in major East Asian societies and its impact on democratization. Case studies will vary but will include China, Japan, and Korea, as well as at least one other society. **Prerequisite:** graduate standing.

### 240. International Relations Theory (4)

A survey of the principal theories and approaches to the study of international relations. **Prerequisite:** graduate standing or consent of instructor.

**243. International Security (4)**

A colloquium surveying the major theoretical controversies in the study of international and national security. **Prerequisite:** graduate standing or consent of instructor.

**244A. European Integration (4)**

This seminar provides perspectives on the theories and politics of European integration. Analysis will focus on the development of the European Union, the functioning of core institutions, and the challenges of creating a supranational political regime.

**245. International Political Economy (4)**

A seminar surveying the major theoretical controversies in the study of international political economy. **Prerequisite:** graduate standing or consent of instructor.

**247A. Quantitative International Relations (4)**

Explores empirical research in international relations with special emphasis on international conflict. Topics covered include theories on the causes of war, the distribution of power and conflict, formal and informal alignment, interdependence and conflict, linkages between domestic and international processes, and issues of research design. Students who have previously taken 247 may not take this course for credit. **Prerequisite:** graduate standing or consent of instructor.

**247B. Formal Models in International Relations (4)**

Explores formal analytic and primarily game-theoretic research in international relations with emphasis on conflict and bargaining. Topics include: causes of war and peace, conventional and nuclear deterrence, crisis bargaining, arms race, and two-level games.

**248. Special Topics in International Relations (4)**

(Same as IRGN 290) This seminar is an examination of the different approaches to the study of international relations. Issues and research areas will vary each time the course is offered. **Prerequisite:** graduate standing or consent of instructor.

**251. American Political Institutions (4)**

A critical examination of major contributions to the theoretical and empirical literature on the U.S. Congress, presidency, and federal bureaucracy. **Prerequisite:** graduate standing or consent of instructor.

**252. American Politics: Behavior (4)**

Theoretical and empirical perspectives on voting and other forms of political participation, parties, interest groups, and public opinion in the United States. **Prerequisite:** graduate standing or consent of instructor.

**253. Research in State Politics (4)**

This seminar will survey the existing literature in state politics with an eye toward proposing new research designs. Topics will include the variation across states in electoral systems, campaign finance laws, political culture, legislative institutions, judicial arrangements, and policy outcomes. **Prerequisite:** graduate standing or consent of instructor.

**254. American Political Development (4)**

This course examines the historical evolution of the American state with particular attention to theories of political development. Special topics include the development of the party system, electoral and policy realignments, and the evolution of national political institutions. **Prerequisite:** graduate standing in any discipline of the social sciences or humanities or consent of instructor.

**255. Urban Politics (4)**

Examines central works on the development of political institutions in U.S. cities; analyses of community power structures; who governs, why, and to what ends; processes and prospects for minority empowerment; the prominence of "growth machines"; the political economy of contemporary cities. **Prerequisite:** graduate standing or consent of instructor.

**256A. Judicial Politics (4)**

Judicial politics is the study of law and courts as political institutions and judges as political actors, focusing on decision-making and power relations within courts, within the judicial hierarchy, and within the constitutional system. **Prerequisite:** graduate standing or consent of instructor.

**257. Voting and Elections (4)**

This course is designed to acquaint graduate students with the central themes and issues in the study of voting in national elections. **Prerequisite:** graduate standing or consent of instructor.

**259. Special Topics in American Politics (4)**

This seminar is an examination of the different approaches to the study of American politics. Issues and research areas will vary each time the course is offered. **Prerequisite:** graduate standing or consent of instructor.

**270. Mathematical and Statistical Foundations (4)**

This course reviews essential calculus and linear algebra and introduces probability theory (probability rules, random variables, univariate and multivariate distributions) and mathematical statistics (sampling distributions, estimation and inference frameworks). **Prerequisite:** graduate standing.

**276. Mathematical Modeling (4)**

This course demonstrates how to construct mathematical models of phenomena of interest to political science. Specific applications examined may include models for the distributions of state size, war magnitude, and democracy over time and space. **Prerequisite:** graduate standing.

**277. Measurement Theory (4)**

This course is concerned with methods of estimating latent dimensions of preference and similarity from individuals' observed choices and judgments. Factor Analysis, Multidimensional Scaling, and related techniques are studied both with classical maximum likelihood and Bayesian methods. **Prerequisite:** graduate standing.

**279. Special Topics in Methodology (4)**

This seminar is an examination of the different approaches to the study of methodology. Issues and research areas will vary each time the course is offered. **Prerequisite:** graduate standing or consent of instructor.

**282A-B-C. Workshop on State and Society (4-4-4)**

Examination of recent research in American politics, comparative politics, and political theory concerning the relationship of politics to society; development and presentation of research projects by graduate students; presentations of research projects by faculty. Second-year students present seminar paper; third-year students present dissertation prospectus; candidates make yearly presentations of dissertation research. **Prerequisite:** PS 202 or consent of instructor.

**283A-B-C. Workshop in International Relations (4-4-4)**

Examination of recent research in international politics; development and presentation of research projects by graduate students; presentations of research projects by faculty. Second year students present seminar paper; third year students present dissertation prospectus; candidates make yearly presentation of dissertation research. **Prerequisite:** PS 202 or permission of instructor.

**284. Workshop on Scientific Communication (4)**

Forms of scientific communication, practical exercise in scientific writing and short oral communication, and in criticism and editing; preparation of illustrations, preparation of proposals; scientific societies, and the history of scientific communication. Examples from any field of science, most commonly political science, economics, and law. **Prerequisite:** PS 202 or consent of instructor.

**INDEPENDENT STUDY****298. Directed Reading (1-12)**

Guided and supervised reading in the literature of the several fields of political science.

**299. Dissertation Research (1-12)**

Independent work by graduate students engaged in research and writing of second-year paper and doctoral dissertation, under direct supervision of advisor.

**500. Apprentice Teaching (1-4)**

A course in which teaching assistants are aided in learning proper teaching methods by means of supervision of their work by the faculty: handling of discussions, preparation, and grading of examinations and other written exercises,

and student relations. Twenty-four units of teaching apprenticeship meets the department teaching requirement for the Ph.D. degree.

**501. Seminar on Teaching Development—American Politics (1-4)**

A seminar designed for graduate students serving as teaching assistants in American politics, includes discussion of teaching theories, techniques, and materials, conduct of discussion sessions, and participation in examinations, under the supervision of the instructor in charge of the course. **Prerequisite:** graduate standing.

**502. Seminar on Teaching Development—Comparative Politics (1-4)**

A seminar designed for graduate students serving as teaching assistants in comparative politics, includes discussion of teaching theories, techniques, and materials, conduct of discussion sessions, and participation in examinations, under the supervision of the instructor in charge of the course. **Prerequisite:** graduate standing.

**503. Seminar on Teaching Development—International Relations (1-4)**

A seminar designed for graduate students serving as teaching assistants in international relations, includes discussion of teaching theories, techniques, and materials, conduct of discussion sessions, and participation in examinations, under the supervision of the instructor in charge of the course. **Prerequisite:** graduate standing.

**504. Seminar on Teaching Development—Political Theory (1-4)**

A seminar designed for graduate students serving as teaching assistants in political theory, includes discussion of teaching theories, techniques, and materials, conduct of discussion sessions, and participation in examinations, under the supervision of the instructor in charge of the course. **Prerequisite:** graduate standing.

## THE UNDERGRADUATE PROGRAM

### MAJOR PROGRAMS

The department offers three degree programs: bachelor of arts (B.A.), bachelor of science (B.S.), and the contiguous bachelor of science (B.S.)/master of arts (M.A.). We offer courses in all major areas of experimental psychology, with emphasis in behavior analysis, clinical psychology, cognitive psychology and cognitive neuropsychology, developmental psychology, human information processing, neuroscience and behavior, psychopathology, sensation and perception, and social psychology. The department emphasizes research in the experimental and theoretical analysis of human and animal behavior, and the study of the mind. Students who major in psychology can expect to develop a knowledge of a broad range of content areas, as well as basic skills in experimental and analytic procedures. Once a student has decided upon a major in psychology, he or she is highly encouraged to consult with the Psychology Student Affairs Office.

Majors must have departmental approval for electives taken outside the department. Of the required courses in the area of specialization (three regular upper-division courses and two research experiences), no more than two may be taken outside the department. We recommend consulting the department before enrolling in courses offered by other departments.

### PREREQUISITES FOR THE B.A.

Experimental psychology uses the tools and knowledge of science: calculus, probability theory, computer science, chemistry, biology, physics, and statistics. Accordingly, students in upper-division courses must have an adequate background in these topics. Prerequisites for individual courses are specified in the catalog.

The prerequisites for the bachelor of arts degree in psychology are as follows:

1. Three lower-division, general-introductory natural science courses from the listing of the approved UC San Diego courses below or their equivalent. (The three courses can be distributed in any manner.)
  - Biology: 1, 2, 3, 10, 20, 24, 26
  - Chemistry: 4, 6A, 6B, 6C, 11, 12, 13
  - Physics: Any of the 1 and 2 series, 10, 11
2. Three formal skills courses, at least one of which must be calculus. The other two courses may consist of any combination of courses in calculus or logic. Acceptable calculus courses at UC San Diego include Mathematics 10A-B-C, 20A-B-C. Acceptable logic courses at UCSD include Philosophy 10 and 12.
3. One introduction to computer programming course. Acceptable courses at UCSD are CSE 3, CSE 5A, CSE 5B, CSE 8A, CSE 8B, CSE 11, CSE 12, MAE 5, MAE 9, MAE 10, or CogSci 18. Other courses will be considered by petition only if they are primarily concerned with programming in a high-level computer language.

*All courses listed under 1–3 may be taken Pass/Not Pass.*

4. One quarter of statistics. Acceptable courses at UCSD are Psychology 60, Economics 120A, Sociology 60, Mathematics 11, 181, or 183, BIEB 100, Cognitive Science 14, or equivalent. Statistics **MUST** be taken for a letter grade.

Students should complete these lower-division requirements by the end of the sophomore year.

### MAJOR REQUIREMENTS FOR THE B.A.

A minimum of twelve upper-division courses in psychology is required. Five must be taken from the core courses (Psychology 101–106), and at least seven from the upper-division elective courses. A minimum of six upper-division psychology courses must be taken at UCSD. These courses must be taken for a letter grade; courses taken as Pass/Not Pass prior to declaring psychology as a major cannot be used to satisfy the major requirement. Excluded from credit toward the major are Psychology 199 (Special Studies); however, Psychology 195 (Undergraduate Instructional Apprentice) can be credited once. Majors must obtain departmental approval for electives taken outside the department. A grade-point average of at least 2.0 in the upper-division courses of the major is required for graduation.

### PREREQUISITES FOR THE B.S.

In general, the lower-division courses required for the B.S. degree in psychology overlap with the B.A. major. However, to fulfill the formal skills, we require the mathematics sequence 20A-B-C.

### MAJOR REQUIREMENTS FOR THE B.S.

A minimum of twelve upper-division courses is required. Five of these courses must come from the core courses (Psychology 101–106). The seven elective courses may be chosen from any of the upper-division courses listed for the psychology program at UCSD. B.S. students must choose an area of concentration (behavior analysis, clinical psychology, cognitive psychology, and cognitive neuropsychology, developmental psychology, neuroscience and behavior, sensation and perception, or social psychology), and three courses of the seven electives must be in the chosen area of concentration.

**In addition to the twelve upper-division courses**, all B.S. degree students must complete course(s) to fulfill the research experience requirement. Research experience courses may comprise either one laboratory course or two Psychology 199 courses (Independent Study). If two Psychology 199 courses are taken to fulfill this requirement, they must be directed by the faculty within the chosen area of concentration and culminate in a research paper approved by the advisor and submitted to the Psychology Student Affairs Office no later than the graduating quarter. The 199 sequence should be taken with the same faculty member.

### UPPER-DIVISION COURSE REQUIREMENTS FOR THE B.S.

**Core Courses, of which five have to be taken for any area of concentration:**

PSYC 101. Intro to Developmental Psychology  
PSYC 102. Intro to Sensation and Perception  
PSYC 103. Intro to Principles of Behavior  
PSYC 104. Intro to Social Psychology  
PSYC 105. Intro to Cognitive Psychology

PSYC 106. Intro to Physiological Psychology

**Areas of concentration and their associated courses are listed in alphabetical order below.**

(Subject to change—for additional qualifying courses, see the department's Student Affairs Office, 1533 Mandler Hall).

**Concentration in Behavior Analysis**

Behavior analysis is based on the principles of Pavlovian and operant conditioning, and other aspects of contemporary associative learning theory. It also includes the application of reinforcement principles and other behavior modification techniques in applied settings (applied behavior analysis).

**Courses**

- PSYC 109. Lab/Applied Behavior Analysis
- PSYC 120. Learning and Motivation\*
- PSYC 121. Lab/Operant Psychology\*
- \*to be taken concurrently with PSYC 120
- PSYC 132. Hormones and Behavior
- PSYC 134. Eating Disorders
- PSYC 135. Evolutionary Principles/Animal Social Behavior
- PSYC 140. Lab/Human Behavior\*
- \*to be taken concurrently with PSYC 120
- PSYC 143. Control and Analysis of Human Behavior
- PSYC 154. Behavior Modification
- PSYC 168. Psychological Disorders of Childhood
- PSYC 171. Neurobiology Learning and Memory
- PSYC 184. Choice and Self Control
- PSYC 188. Impulse Control Disorders
- PSYC 199. Independent Study courses in this field must culminate in a research paper to fulfill lab requirement (but do not count as upper-division psychology courses towards the major).

**Concentration in Neuroscience and Behavior**

This area studies how the nervous system mediates behavioral effects in the realms of motivation, perception, learning and memory, and attention. It also includes human neurophysiology and aphasia.

**Courses**

- PSYC 107. Lab/Substance Abuse Research
- PSYC 114. Lab/Psychophysiological Perspectives on the Social Mind
- PSYC 125. Clinical Neuropsychology and Assessment
- PSYC 129. Logic of Perception
- PSYC 132. Hormones and Behavior
- PSYC 133. Circadian Rhythms—Biological Clocks
- PSYC 134. Eating Disorders
- PSYC 135. Evolutionary Principles/Animal Social Behavior
- PSYC 150. Cognitive Neuroscience of Vision
- PSYC 159. Physiological Basis of Perception
- PSYC 169. Brain Damage and Mental Function
- PSYC 170. Introduction to Cognitive Neuropsychology
- PSYC 171. Neurobiology Learning and Memory
- PSYC 179. Drugs, Addiction, and Mental Disorders
- PSYC 181. Drugs and Behavior
- PSYC 188. Impulse Control Disorders
- PSYC 189. Brain, Behavior, and Evolution
- PSYC 190. Parenting

PSYC 199. Independent Study courses in this field must culminate in a research paper to fulfill lab requirement (but do not count as upper-division psychology courses towards the major).

**Concentration in Clinical Psychology**

This area studies psychological and physiological causes of and treatments for mental illness in children and adults.

**Courses**

- PSYC 107. Lab/Substance Abuse Research
- PSYC 109. Lab/Applied Behavior Analysis
- PSYC 124. Intro to Clinical Psychology
- PSYC 125. Clinical Neuropsychology and Assessment
- PSYC 132. Hormones and Behavior
- PSYC 133. Circadian Rhythms—Biological Clocks
- PSYC 134. Eating Disorders
- PSYC 151. Test and Measurement
- PSYC 154. Behavior Modification
- PSYC 155. Social Psychology and Medicine
- PSYC 163. Abnormal Psychology
- PSYC 168. Psychological Disorders in Children
- PSYC 172. Human Sexuality
- PSYC 184. Choice and Self-Control
- PSYC 188. Impulse Control Disorders
- PSYC 190. Parenting
- PSYC 199. Independent Study courses in this field must culminate in a research paper to fulfill lab requirement (but do not count as upper-division psychology courses towards the major).

**Concentration in Cognitive Psychology and Cognitive Neuropsychology**

1. The cognitive area studies reasoning, thinking, language, judgment, and decision-making in adults and children (including attention, memory, and visual and auditory information processing).
2. The cognitive neuropsychology area studies cognitive processes and their implementation in the brain. Cognitive neuroscientists use methods drawn from brain damage, neuropsychology, cognitive psychology, functional neuroimaging, and computer modeling.

**Courses**

- PSYC 108. Introduction to Cognitive Neuroscience
- PSYC 114. Lab/Psychophysiological Perspectives on the Social Mind
- PSYC 115. Lab/Cognitive Psychology
- PSYC 118. Lab 118A-B/Language Processing
- PSYC 119. Lab/Psycholinguistics
- PSYC 128. Psychology of Reading
- PSYC 129. Logic of Perception
- PSYC 137. Social Cognition
- PSYC 141. Evolution and Human Nature
- PSYC 142. Psychology of Consciousness
- PSYC 144. Memory and Amnesia
- PSYC 145. Psychology of Language
- PSYC 146. Language and Conceptual Development
- PSYC 148. Psychology of Judgment and Decision
- PSYC 150. Cognitive Neuroscience of Vision
- PSYC 152. Concepts of Intelligence
- PSYC 156. Cognitive Development in Infancy
- PSYC 161. Introduction to Engineering Psychology

PSYC 170. Introduction to Cognitive Neuropsychology

- PSYC 171. Neurobiology Learning and Memory
- PSYC 187. Development of Social Cognition
- PSYC 191. Psychology of Sleep
- PSYC 199. Independent Study courses in this field must culminate in a research paper to fulfill lab requirement (but do not count as upper-division psychology courses towards the major).

**Concentration in Developmental Psychology**

This area studies all aspects of human development with emphasis on social and personality development, perceptual development, and language acquisition. Also includes the study of developmental psychopathology.

**Courses**

- PSYC 109. Lab/Applied Behavior Analysis
  - PSYC 114. Lab/Psychophysiological Perspectives on the Social Mind
  - PSYC 133. Circadian Rhythms—Biological Clocks
  - PSYC 135. Evolutionary Principles/Animal Social Behavior
  - PSYC 136. Cognitive Development
  - PSYC 141. Evolution and Human Nature
  - PSYC 145. Psychology of Language
  - PSYC 152. Concepts of Intelligence
  - PSYC 156. Cognitive Development in Infancy
  - PSYC 158. Interpersonal Relationships
  - PSYC 168. Psychological Disorder of Childhood
  - PSYC 172. Human Sexuality
  - PSYC 180. Adolescence
  - PSYC 185. Applied Developmental Psychology
  - PSYC 187. The Development of Social Cognition
  - PSYC 190. Parenting
  - PSYC 199. Independent Study courses in this field must culminate in a research paper to fulfill lab requirement (but do not count as upper-division psychology courses towards the major).
- (For additional qualifying courses, see the department's Student Affairs Office, 1533 Mandler Hall.)

**Concentration in Sensation and Perception**

This area studies how our sense organs and brain make it possible for us to construct our consciously experienced representation of the environment. Experiments using stimuli and computer control are used to test models of sensory or perceptual processes. Processes of particular interest include color vision, motion perception, and auditory illusions and paradox.

**Courses**

- PSYC 125. Clinical Neuropsychology and Assessment
- PSYC 128. Psychology of Reading
- PSYC 129. Logic of Perception
- PSYC 138. Sound and Music Perception
- PSYC 150. Cognitive Neuroscience of Vision
- PSYC 159. Physiological Basis of Perception
- PSYC 169. Brain Damage and Mental Functions
- PSYC 182. Allusions and the Brain

PSYC 199. Independent Study courses in this field must culminate in a research paper to fulfill lab requirement (but do not count as upper-division psychology courses towards the major).

### Concentration in Social Psychology

This area studies human behavior in social situations, with specialization in such topics as emotion, aggression, social cognition, and aesthetics. It also encompasses applied social psychology, including psychology and the law and behavioral medicine.

#### Courses

PSYC 114. Lab/Psychophysiological Perspectives on the Social Mind

PSYC 127. Applied Social Psychology

PSYC 130. Delay of Gratification

PSYC 135. Evolutionary Principles/Animal Social Behavior

PSYC 137. Social Cognition

PSYC 139. Social Psychology of Sports

PSYC 141. Evolution and Human Nature

PSYC 149. Social Psychology of Theater

PSYC 152. Concepts of Intelligence

PSYC 153. Psychology of Emotion

PSYC 155. Social Psychology and Medicine

PSYC 157. Happiness

PSYC 158. Interpersonal Relationships

PSYC 160. Groups

PSYC 162. Psychology and the Law

PSYC 172. Human Sexuality

PSYC 175. Psychology and the Arts

PSYC 178. Industrial Organization Psychology

PSYC 186. Psychology and Social Policy

PSYC 187. Development of Social Cognition

PSYC 190. Parenting

PSYC 199. Independent Study courses in this field must culminate in a research paper to fulfill lab requirement (but do not count as upper-division psychology courses towards the major).

### HONORS PROGRAM

Students are encouraged to participate in the department's honors program. It is strongly recommended for all students interested in graduate school. A minimum overall GPA of 3.3 (3.5 for transfer students, based on transfer GPA) is a prerequisite. Admission is granted by application in the fall quarter of the junior year (Deadline: October 31). This program is composed of the following courses.

#### 1. Junior Year

Winter:

- Junior Honors Research Seminar (PSYC 110)
- Advanced Statistics and Research Methods (PSYC 111A)

Spring:

- Advanced Statistics and Research Methods (PSYC 111B)

#### 2. Senior Year: A year-long independent research project (PSYC 194-A-B-C) under the sponsorship of a faculty advisor. This research culminates in an honors thesis.

#### 3. At least one laboratory course (Psychology 107, 109, 114, 115, 118A, 118B, 119, 120/121, 120/140, 127) or, upon petitioning, two Psychology 199 Independent Study courses culminating in a research paper accepted by the advisor (199s,

however, do not count as upper-division credit toward the major).

Successful completion of the Honors Program requires a grade of A- in the Psychology 194 series and a minimum GPA of 3.5 in the upper-division courses taken for the major.

### MINOR PROGRAM

The minor in psychology consists of seven four-unit courses from the Department of Psychology course offerings, of which at least twenty units (five four-unit courses) must be upper-division. At least four upper-division courses must be taken at UCSD for a letter grade. PSYC 199 (Independent Study) may count for one upper-division course towards the minor.

If Psychology 60 (Statistics) is chosen as one of the lower-division courses, it, too, has to be taken for a letter grade. The application for a minor can be obtained from your college. A grade-point average of at least 2.0 is required for graduation.

### EDUCATION ABROAD

Students are often able to participate in the UC Education Abroad Program (EAP) and UCSD's Opportunities Abroad Program (OAP) while still making progress toward the major. Students considering this option should discuss their plans with the Psychology Student Affairs Office before going abroad, and courses taken abroad must be approved by the department. Students may only receive credit for up to two core courses (PSYC 101-106) from their courses taken abroad. Information on EAP/OAP is detailed in the Education Abroad Program of the UC San Diego General Catalog. Interested students should contact the Program Abroad Office in the International Center.

### TRANSFER CREDIT

In general, all introductory courses in experimental psychology are accepted for lower-division credit toward a psychology minor. Lower-division courses covering special topics in psychology (e.g., personal adjustment, human sexuality) will be accepted only if: 1) the student had a general introductory course as a prerequisite, and 2) the student had satisfied this prerequisite before taking the special topics course. Upper-division psychology courses will be evaluated for transfer credit on a course by course basis.

### THE GRADUATE PROGRAM

The Department of Psychology provides broad training in experimental psychology. Increased specialization and the general burgeoning of knowledge make it impossible to provide training in depth in every aspect of experimental psychology, but most aspects are represented in departmental research.

### PREPARATION

Apart from the general university requirements, the department generally expects adequate undergraduate preparation in psychology. A major in the subject, or at least a strong minor, is normally a prerequisite, but applicants with good backgrounds in such fields as biology and mathematics are also acceptable.

### LANGUAGE REQUIREMENTS

There is no foreign language requirement.

### GRADUATE CURRICULUM

Students must fulfill all course requirements (stated below) while registered as graduate students in psychology at UC San Diego. There may occasionally be exceptions granted to this rule. Requests for exception should be in the form of petitions from students and their advisors to the Committee on Graduate Affairs. It is in the best interest of the student if these petitions are forthcoming at the time of admission to the graduate program. In this way, the committee, the students, and their advisors will all be aware of the course requirements before any of them are taken.

### PROGRAM OF STUDY

Courses are divided into six areas: *behavior analysis* (including basic and applied), *neuroscience and behavior* (including neuropsychology and neurophysiology), *cognitive* (including attention, language, and perception), *developmental* (including language acquisition), *sensation and perception* (including vision and audition), and *social* (including health and law). The Graduate Affairs Committee provides an approved list of courses from these areas. In the first year of study, each student must fulfill the following four requirements:

1. Each student must fulfill a quantitative methods requirement, either by taking two quantitative methods courses approved by the Graduate Affairs Committee (currently 201A and 201B), or by showing a satisfactory knowledge of these courses through an examination.
2. In addition to the quantitative methods requirement, each student is expected to take four proseminars and four approved courses from the list prepared by the Graduate Affairs Committee. All course work must be completed by the end of the third year.
3. Each first-year graduate student is required to submit a research paper on the research project (Psychology 270ABC). The paper should be comparable in style, length, and quality to papers published in the normal, refereed journals of the student's research area. (The publication manual of the American Psychological Association, fourth edition, 1995, gives an acceptable format.)

The research paper will be read and evaluated by the student's research advisor and by at least two other readers appointed by the graduate advisor.

The research paper is presented orally at a research meeting held at the end of the spring quarter. Attendance at this meeting is a requirement for the department's graduate students and faculty. Typically, each student is allowed ten minutes to present the paper, with a five-minute question period following the presentation.

4. A teaching requirement must be met. (See below.)

All students are evaluated by the entire faculty at the end of the academic year. The normal

minimum standards for allowing a student to continue beyond the first year are

- a. Satisfactory completion of the first-year research project (including oral presentation)
- b. At least a B average in the courses which fulfill the area requirements
- c. Having a faculty advisor in the Department of Psychology

Any student whose needs cannot be reasonably met with courses conforming to these guidelines may petition the Graduate Affairs Committee. The petition should contain a specific list of courses and a statement of justification and must be approved by the student's advisor.

### ADVANCING TO CANDIDACY

In order to advance to Ph.D. candidacy a student must

1. Complete all first-year requirements
2. Complete an additional four elective courses from the list prepared by the Graduate Affairs Committee
3. Complete the qualifying examination for the Ph.D.

The qualifying examination is divided into two sections to be taken separately by all students. Part I of the qualifying exam consists of a paper written by the student that is modeled after those published in *Psychological Bulletin* or *Psychological Review*. Ideally, the paper would consist of a detailed review and theoretical synthesis of a coherent body of research. The paper should demonstrate independent and original thinking on the part of the student, and should either take a theoretical stance or recommend experiments designed to resolve theoretical ambiguities (i.e., the paper should not merely review published research).

Students form a qualifying committee in much the same way that they form a dissertation committee. The same rules apply, except that members from outside the department need not be included (although up to two may be). Once the committee is formed, the student should prepare a brief (e.g., three pages) proposal defining the area of research and the theoretical issues that will be addressed in the paper. A proposal meeting is then arranged (usually in spring quarter of the student's second year), and committee members may at that time recommend changes in the scope of the paper and define their expectations.

The paper does not have a prescribed length, although low-end and high-end limits of thirty and fifty pages, respectively, seem reasonable. An oral defense of the paper is required (and should be completed by the end of the student's third year).

*Part II* of the qualifying examination is the defense of the dissertation proposal. This will normally follow *Part I* of the qualifying examination and will be an oral examination including outside examiners.

### TEACHING

In order to acquire adequate teaching experience, all students are required to participate in the teaching activities of the department for at least four years (one quarter for the first year and two quarters the second through the fourth year).

### RESIDENCY

Each student must complete the requirements for qualification for candidacy for the Ph.D. degree by the end of the third year of residence. Any student failing to qualify by this time will be placed on probation. A student who fails to qualify by the end of the spring quarter of the fourth year of residence will automatically be terminated from the department.

No students may allow more than eight calendar years to elapse between starting the graduate program and completing the requirements for the Ph.D. Degree students will automatically be terminated from the program at the end of the spring quarter of their eighth calendar year in the department.

### RESEARCH

In each year of graduate study, students enroll in a research practicum (Psychology 270 in the first year; Psychology 296 or 299 in subsequent years). Students are assigned to current research projects in the department and receive the personal supervision of a member of the staff.

### DEPARTMENTAL PH.D. TIME LIMIT POLICIES

Students must be advanced to candidacy by the end of four years. Total university support cannot exceed eight years. Total registered time at UCSD cannot exceed eight years.

### SPECIALIZATION IN ANTHROPOGENY

This is a transdisciplinary graduate specialization in anthropogeny with the aim of providing graduate students the opportunity to specialize in research and education on explaining the origins of the human phenomenon. The aim is to rectify the absence of existing training programs that provide such a broad and explicitly transdisciplinary approach—spanning the social and natural sciences—and focusing on one of the oldest questions known to humankind, namely, the origins of humans and humanity. This specialization is not a stand-alone program, but aims at providing graduate students who have just embarked on their graduate careers with the opportunity to interact and communicate with peers in radically different disciplines throughout the duration of their Ph.D. projects. Such communication across disciplines from the outset is key to fostering a capacity for interdisciplinary “language” skills and conceptual flexibility

### ADMISSION TO THE SPECIALIZATION

The psychology graduate program will advertise the specialization to those students in our programs who have an interest in human origins. Qualifying applicants will have the opportunity to enroll for the specialization.

### SPECIALIZATION REQUIREMENTS

Students pursuing this specialization will be required to take a series of courses in addition to research rounds over four years of study. It is advised that students begin their course work in their second year.

- Course work: Introduction to Anthropogeny (BIOM 225) and Advanced Anthropogeny (BIOM

229) are each taken once, in the winter and spring of the students' second year. Current Topics in Anthropogeny (BIOM 218) is to be taken every quarter for four years.

- Research Rounds: Monthly seminars during which all participating students talk about their respective research.

### QUALIFYING EXAMINATION

Psychology students in the anthropogeny specialization must meet the departmental requirement for advancement to candidacy, including the qualifying paper and dissertation proposal. In addition, students must meet internal deadlines, mentoring provisions, and proposal standards of the anthropogeny specialization track.

### DISSERTATION

Ph.D. students must complete a dissertation, which meets all requirements of the home program. In addition, it is expected that the Ph.D. dissertation is broadly related to human origins and will be interdisciplinary in nature.

### TIME LIMITS

It is expected that students will retain the same time to degree as students not pursuing this specialization. Additional course load consists only of two regular courses (two quarters twenty lectures each). The third proposed course takes place only three times a year from Friday noon to Saturday evening.

### MAJOR REQUIREMENTS FOR THE CONTIGUOUS B.S./M.A.

A contiguous program leading to a bachelor of science degree and a master of arts degree in psychology is offered to those undergraduate students who are enrolled in the bachelor of science major offered in the Department of Psychology at UC San Diego. Qualified students are able to obtain the M.A. degree within one year following receipt of the B.S. degree. Students interested in applying to this program must consult with the B.S./M.A. advisor in the Psychology Student Affairs Office fall quarter of their junior year.

The program is open only to UCSD undergraduates. The Department of Psychology does not have financial aid available for students enrolled in this program.

### ELIGIBILITY AND ENROLLMENT

To be eligible, students must have completed the first two quarters of their junior year in residence at UCSD and must have an overall UCSD GPA of at least 3.0 and students' major GPA should be at least 3.3. It is the responsibility of the prospective student to select a faculty member who would be willing to serve as the student's advisor and in whose laboratory the student would complete at least twenty-four units of research over a two-year period. Twelve of the twenty-four units of research Psychology (194A-B-C or 196A-B-C) must be completed during the student's senior undergraduate year and must be taken *in addition* to the requirements for the bachelor of science degree. The remaining twelve units of research will be taken in their year of graduate study as part of their M.A.

There are two applications:

1. In fall quarter of the junior year, students apply to the contiguous B.S./M.A. track if they fulfill the above requirements.
2. In the spring quarter of their senior year, students apply to the M.A. program.

#### REQUIREMENTS FOR THE M.A.

For an M.A. in psychology, students must pick a concentration in one of six areas: Behavioral, Cognitive, Developmental, Neuroscience and Behavior, Sensation and Perception, and Social.

Students who have been approved (by both the Department of Psychology and UCSD Office of Graduate Studies) for the program must enroll in their graduate year in

- PSYC 201A-B. Quantitative Methods
- PSYC 270A-B-C. Introduction to Laboratory Experimentation
- Four psychology seminars, two of which are in their area of concentration. In addition, three of the four seminars must be pro-seminars, which include
- PSYC 217. Developmental Psychology
- PSYC 218. Cognitive Psychology
- PSYC 219. Behavioral Psychology
- PSYC 220. Social Psychology
- PSYC 221. Sensation and Perception
- PSYC 222. Behavioral Psychology
- One PSYC 500. Teaching Instruction

This amounts to forty units of graduate work.

All course work is to be approved by the advisors (forms available from the Psychology Student Affairs Office). Students are expected to meet the graduate requirements for the M.A. in *one year* (three consecutive, contiguous, academic quarters, beginning in the fall after graduation). Any deviation from this plan, such as a break in enrollment for one or more quarters, will cause the student to be dropped from the program.

All forms required for the program must be submitted and approved by the Psychology Student Affairs Office, including the Application for Candidacy. Students must pay fees and be officially enrolled at UCSD during the quarter that the master's degree is to be awarded. The thesis draft should be submitted to the Office of Graduate Studies for review before the final copy is officially submitted.

See the [Psychology Student Affairs Office](#) for further details.

## COURSES

*For course descriptions not found in the UC San Diego General Catalog, 2010–11, please contact the department for more information.*

## LOWER-DIVISION

### EXPERIMENTAL REQUIREMENTS

Psychology at UCSD is a laboratory science. We are concerned with the scientific development of knowledge about human and animal behavior and thought. Accordingly, experience with experimental procedures plays an important role in the undergraduate and graduate training of students.

#### 1. Psychology (4)

A comprehensive series of lectures covering the basic concepts of modern psychology in the areas of human information processing, learning and memory, motivation, developmental processes, language acquisition, social psychology, and personality.

#### 2. General Psychology: Biological Foundations (4)

A survey of physiological and psychological mechanisms underlying selected areas of human behavior. Emphasis will be upon sensory processes, especially vision, with emphasis also given to the neuropsychology of motivation, memory, and attention.

#### 3. General Psychology: Cognitive Foundations (4)

This course is an introduction to the basic concepts of cognitive psychology. The course surveys areas such as perception, attention, memory, language, and thought. The relation of cognitive psychology to cognitive science and to neuropsychology is also covered.

#### 4. General Psychology: Behavioral Foundations (4)

This course will provide a basic introduction to behavioral psychology, covering such topics as classical conditioning, operant conditioning, animal learning and motivation, and behavior modification.

#### 6. General Psychology: Social Foundations (4)

This course will provide a basic introduction to social psychology, covering such topics as emotion, aesthetics, behavioral medicine, person perception, attitudes and attitude change, and behavior in social organizations.

#### 7. General Psychology: Developmental Foundations (4)

This course is an introduction to cognitive and social changes that take place over the course of a lifetime. This course introduces influential theories of child development, such as those of Freud or Piaget, together with recent criticisms of these theories.

#### 60. Introduction to Statistics (4)

Introduction to the experimental method in psychology and to mathematical techniques necessary for experimental research. **Prerequisite:** one year mathematics or consent of instructor.

#### 87. Freshmen Seminar (1)

The Freshman Seminar Program is designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminars are offered in all campus departments and undergraduate colleges, and topics vary from quarter to quarter. Enrollment is limited to fifteen to twenty students, with preference given to entering freshmen. **Prerequisite:** none.

#### 90. Undergraduate Seminar (1)

This seminar introduces the various subdisciplines in psychology and their research methods, and also explores career and graduate school opportunities. This includes informal presentations by faculty, graduate students, and other professionals.

#### 99. Independent Study (2,4)

Independent study or research under direction of a member of the faculty. **Prerequisites:** lower-division standing, completion of at least thirty units of undergraduate study at UCSD with a minimum UCSD GPA of 3.0; completed and approved Special Studies form.

## UPPER-DIVISION

#### 101. Introduction to Developmental Psychology (4)

A lecture course on a variety of topics in the development of the child, including the development of perception, cognition, language, and sex differences. **Prerequisite:** upper-division standing; Psychology 60 or BIEB 100 or COGS 14 or Econ. 120A or Math. 11 or Math. 181A or Math. 183 or Soc/L 60.

#### 102. Introduction to Sensation and Perception (4)

An introduction to problems and methods in the study of perception and cognitive processes. **Prerequisites:** upper-division standing; Psychology 60 or BIEB 100 or COGS 14 or Econ. 120A or Math. 11 or Math. 181A or Math. 183 or Soc/L 60.

#### 103. Introduction to Principles of Behavior (4)

An example of the principles of conditioning and their application to the control and modification of human behavior. **Prerequisites:** upper-division standing; Psychology 60 or BIEB 100 or COGS 14 or Econ. 120A or Math. 11 or Math. 181A or Math. 183 or Soc/L 60.

#### 104. Introduction to Social Psychology (4)

An intensive introduction and survey of current knowledge in social psychology. **Prerequisites:** upper-division standing; Psychology 60 or BIEB 100 or COGS 14 or Econ. 120A or Math. 11 or Math. 181A or Math. 183 or Soc/L 60.

#### 105. Introduction to Cognitive Psychology (4)

Introduction to experimental study of higher mental processes. Topics to be covered include pattern recognition, perception, and comprehension of language, memory, and problem solving. **Prerequisites:** upper-division standing; Psychology 60 or BIEB 100 or COGS 14 or Econ. 120A or Math. 11 or Math. 181A or Math. 183 or Soc/L 60.

#### 106. Introduction to Physiological Psychology (4)

Intensive introduction to current knowledge of physiological factors in learning, motivation, perception, and memory. **Prerequisites:** upper-division standing; Psychology 60 or BIEB 100 or COGS 14 or Econ. 120A or Math. 11 or Math. 181A or Math. 183 or Soc/L 60.

#### 107. Lab/Substance Abuse Research (4)

This lab course examines theory and research design and methods for substance abuse in adolescent adult populations. This course serves as preparation for individual research topics culminating in a paper.

#### 108. Introduction to Cognitive Neuroscience (4)

This course covers background history, neuroanatomy, methods, and results from neuroimaging and neuropsychological studies of behavior. Topics include attention, motor control, executive function, memory, learning, emotion, and language. **Prerequisites:** upper-division standing; Psychology 60 or BIEB 100 or COGS 14 or Econ. 120A or Math. 11 or Math. 181A or Math. 183 or Soc/L 60.

#### 109. Lab/Applied Behavior Analysis (4)

This course will provide students with hands-on training in the application of behavioral research technology to a clinical population. Students will meet weekly for lecture, discussion, research article reviews, and specific technique training. In addition, students will work on a research project. **Prerequisite:** Psychology 199 in the Schreibman autism laboratory recommended.

#### 110. Juniors Honors Research Seminars (4)

Meetings consist of research seminars by a range of departmental faculty, exposing students to contemporary research problems in all branches of experimental psychology. Class discussions will follow faculty presentations. Evaluation is based on assigned papers. **Prerequisites:** admission by application with a minimum UCSD GPA of 3.3. Department stamp required. Application forms are available from the Student Services Office and due by the end of October of each fall quarter.

#### 111A. Research Methods I (6)

Designed to provide training in the applications of advanced statistical methods in the context of initial instruction in experimental design. Emphasis will be placed on the development of statistical problem-solving skills, practical computer applications, and scientific report writing. **Prerequisites:** minimum grade of B in Psychology 60 or

equivalent and junior standing. Open to honors students or consent of instructor. Department stamp required.

#### **111B. Research Methods II (6)**

Designed to extend the material of Psychology 111A. Focusing on the techniques developed previously. Participate in data collection, data organization, statistical analysis, and graphic displays, emphasis placed on developing scientific report writing, presentations, and critical thinking about experimental methods. **Prerequisite:** Psychology 111A or consent of instructor.

#### **114. Laboratory in Psychophysiological Perspectives on the Social Mind (4)**

Lab course on the use of psychophysiological methods to investigate "the social mind," or the cognitive and emotional processes involved in understanding and reacting to other people. Overview of major research topics and methods applying selected techniques in actual experiments. Students will engage in developing individual research questions to actively participate in designing and conducting the experiments. **Prerequisite:** upper-division standing.

#### **115. Laboratory in Cognitive Psychology (4)**

Lecture and laboratory work in human information processing. **Prerequisite:** upper-division standing or consent of instructor.

#### **118A. Real-Time Examination of Language Processing (4)**

This lab course examines the design and methods for the real-time examination of language processing in normal and disordered (aphasic, dyslexic, child language impaired, etc.) language populations. This course serves as preparation for individual research topics in Psychology 118B. **Prerequisite:** a course in language or cognition (see professor for exceptions).

#### **118B. Real-Time Examination of Language Processing (4)**

This lab is a continuation of Psychology 118A. The introduction to laboratory methods is now applied to individual research projects culminating in a lab presentation and paper. **Prerequisite:** Psychology 118A or consent of instructor.

#### **119. Psycholinguistics/Cognition Laboratory (4)**

Methods and practicum in experimental study of language, reading, and related cognitive processes (reasoning, problem solving) in young adult populations. **Prerequisites:** Psychology 118A-B or consent of instructor. Department stamp required.

#### **120. Learning and Motivation (4)**

Survey of research and theory in learning and motivation. Includes instincts, reinforcement, stimulus control, choice, aversive control, and human application. **Prerequisite:** upper-division standing. Must be taken concurrently with Psychology 121 or Psychology 140.

#### **121. Laboratory in Operant Psychology (4)**

Lecture and laboratory in operant psychology. **Prerequisite:** upper-division standing. May be taken concurrently with Psychology 120.

#### **123. Cognitive Control and Frontal Lobe Function (4)**

Cognitive control refers to the optimization of behavior according to one's goals. This class examines: anatomy; neuroscience methods; working memory, switching, and stopping; prefrontal pharmacology; ADHD and other neuropsychiatric disorders; addiction and emotion regulation; development, rehabilitation, and criminal responsibility. **Note:** Students may not enroll in Psychology 123 after receiving credit for Psychology 193 Cognitive Control and Frontal Lobe Function. **Prerequisite:** department stamp.

#### **124. Introduction to Clinical Psychology (4)**

Introduction to major concepts and models used in psychological assessment and psychotherapeutic intervention. Several modalities of psychotherapy (individual, group, and family) will be reviewed along with research on their efficacy. **Prerequisite:** Psychology 163.

#### **125. Clinical Neuropsychology and Assessment (4)**

A fundamental grounding in basic neuropsychological principles. Major topics include functional neuroanatomy

and physiology of the human brain, neurobehavioral presentations of common neurologic and psychiatric conditions, and an introduction to diagnostic neuropsychological assessment and methods. **Prerequisite:** Psychology 60.

#### **127. Methods in Applied Social Psychology (4)**

Emphasizes learning of experimental and quasi-experimental methodology applicable to social problems. Students carry out field research in areas such as the psychology of law (judicial decision-making), traffic-related behavior (risk taking), environmental psychology, and other areas of student interest. **Prerequisites:** Psychology 104 and 60.

#### **128. Psychology of Reading (4)**

Basic information about the nature of reading will be covered. Topics include word recognition, eye movements, inner speech, sentence processing, memory for text, learning to read, methods for teaching reading, reading disabilities and dyslexia, and speed reading. **Prerequisite:** Psychology 105 or Psychology 145 or consent of instructor.

#### **129. Logic of Perception (4)**

Lectures will cover three topics: 1) tradition of experimental work on perception that dates back to Hemholtz; 2) discussion and criticisms of theories of perception; 3) recent physiological work on the visual pathways that may give us insights into neural mechanisms underlying perception. **Prerequisite:** upper-division standing.

#### **130. Delay of Gratification (4)**

This course will review the research on delay of gratification. It will cover what makes it in general so tough, what situations make it possible, who can do it, and what the implications of this ability are. **Prerequisite:** upper-division standing.

#### **132. Hormones and Behavior (4)**

A survey of the effects of chemical signals (hormones, neurohormones and pheromones) on behavior as well as reciprocal effects of behavior on these chemical systems. Specific topics covered include aggression, sex and sexuality, feeding, learning, memory and mood. Animal studies will be emphasized. **Prerequisite:** Psychology 106 or consent of instructor.

#### **133. Circadian Rhythms—Biological Clock (4)**

Examples and fundamental properties of the daily biological clock in humans, animals and microbes. Experimental approaches employed to understand how organisms keep time and how this applies to human health. **Prerequisite:** Psychology 106 or BILD 1 or consent of instructor. This course is cross-listed with BIMM 116.

#### **134. Eating Disorders (4)**

This course will cover the biology and psychology of eating disorders such as anorexia nervosa, bulimia nervosa, and binge eating disorder. Abnormal, as well as normal eating will be discussed from various perspectives including endocrinological, neurobiological, psychological, sociological, and evolutionary. **Prerequisite:** upper-division standing.

#### **135. Animal Behavior (4)**

Mechanisms that regulate the behavior of animals, including neural, endocrine, genetic, and environmental mechanisms, with a strong emphasis on evolution (natural and sexual selection). Topics include communication, sociality, mating strategies, and parental behavior. **Prerequisites:** upper-division standing and consent of instructor.

#### **136. Cognitive Development (4)**

This course examines the foundations and growth of the mind, discussing the development of perception, imagery, concept formation, memory, and thinking. Emphasis is placed on the representation of knowledge in infancy and early childhood. (Credit may not be received for both PSYC 136 and COGS 113.) **Prerequisite:** PSYC 101 or PSYC 105.

#### **137. Social Cognition (4)**

Social cognition blends cognitive and social psychology to show how people make sense of the social world. Social perception, inference, memory, motivation, and affect, understanding of the self, stereotypes, and cultural cognition. **Prerequisite:** upper-division standing.

#### **138. Sound and Music Perception (4)**

Topics include the physiology of the auditory system, perception and pitch, loudness and timbre, localization

of sound in space, perception of melodic and temporal patterns, handedness correlates, and musical illusions and paradoxes. There will be a substantial number of sound demonstrations. **Prerequisites:** upper-division standing and consent of instructor.

#### **139. Social Psychology of Sports (4)**

This course focuses on the applications of social psychological principles and finding to the understanding of sports. Topics include the role of motivation, level of aspiration, competition, cooperation, social comparison, and optimal arousal, spectators' perspective, motivation and perceptions of success, streaks, etc. **Prerequisite:** upper-division standing or consent of instructor.

#### **140. Lab/Human Behavior (4)**

Laboratory on the principles of human behavior, including choice behavior, self-control, and reasoning. **Prerequisites:** 120 (may be taken concurrently); upper-division standing.

#### **141. Evolution and Human Nature (4)**

Can important aspects of human behavior be explained as a result of natural selection? Focus on sex differences, selfishness and altruism, homicide and violence, and context effects in human reasoning. **Prerequisites:** upper-division standing and consent of instructor.

#### **142. Psychology of Consciousness (4)**

This course will survey research on consciousness from an experimental psychology perspective. Special emphasis will be placed on cognitive, neuroimaging, and clinical/psychiatric investigative techniques, and on the scientific assessment of the mind-body problem. **Prerequisite:** upper-division standing.

#### **143. Control and Analysis of Human Behavior (4)**

An overview of the behavioral approach including basic principles, self-control, clinical applications, and the design of cultures. **Prerequisite:** upper-division psychology majors.

#### **144. Memory and Amnesia (4)**

This course will review basic research into the nature of memory. It begins with an examination of historical milestones in the study of memory and then considers research concerned with contemporary models of memory and amnesia. **Prerequisite:** upper-division standing.

#### **145. Psychology of Language (4)**

Introduction to research on language comprehension and production. Focus on brain basis of language, language origin and universal structure, language disorders (aphasia, dyslexia), animal language, linguistic community differences, and the mental processes underlying normal language processing. **Prerequisite:** a course in language, cognition, or philosophy of mind recommended.

#### **146. Language and Conceptual Development (4)**

Introduction to research on language acquisition and how it relates to conceptual development. Focus on theoretical foundations (e.g., learning mechanisms, universal grammar, theories of concepts) and empirical case studies, including word learning, syntax and semantics, and language and thought. Recommend course in language/linguistics, cognition, or cognitive development. **Prerequisite:** upper-division standing or consent of instructor.

#### **147. Gender (4)**

This interactive undergraduate seminar will examine biological approaches to gender differences and sexuality. Do the biosciences further our understanding of these issues? How are biological claims embraced or rebutted by other disciplines? Students will read primary scientific literature and criticism. **Prerequisite:** upper-division standing.

#### **148. Psychology of Judgment and Decision (4)**

Broadly defined, the field of judgment and decision making examines preferences and subjective probability, and how they are combined to arrive at decisions. The course will cover history and current topics.

#### **149. Social Psychology of Theater (4)**

Exploration of the relationship between social psychology and drama, focusing on the use of psychological principles in plays (by playwrights) and their performance (by directors, actors, and choreographers). **Prerequisite:**

upper-division standing, major in psychology or theater, or consent of instructor.

#### **150. Cognitive Neuroscience of Vision (4)**

Cognitive neuroscience is an interdisciplinary field of research dedicated to understanding how the brain supports different cognitive abilities. This course will focus on the neural basis of visual experience, or how our brain creates what we see in the world around us. **Prerequisite:** Psychology 102 or Psychology 108.

#### **151. Tests and Measurement (4)**

This course provides an introduction to psychological testing presented in three components: 1) psychometrics and statistical methods of test construction; 2) application of psychological tests in industry, clinical practice, and other applied settings; and 3) controversies in the application of psychological tests. **Prerequisite:** Psychology 60.

#### **152. Concepts of Intelligence (4)**

This course will examine the concept of intelligence from several perspectives: its historical development, its measure in terms of IQ test, and its role in practical affairs. Also included will be its role in comparative psychology and attempts to analyze intelligence in terms of more fundamental cognitive processes. **Prerequisite:** Psychology 60 or consent of instructor.

#### **153. Psychology of Emotion (4)**

Past and current findings and theories on emotion. Facial expressions of emotions, psychophysiology, evolutionary perspectives, and specific emotions: anger, fear, and jealousy. **Prerequisite:** upper-division standing or consent of instructor.

#### **154. Behavior Modification (4)**

Extension of learning principles to human behavior, methods of applied behavior analysis, and applications of behavioral principles to clinical disorders and to normal behavior in various settings. **Prerequisite:** upper-division standing.

#### **155. Social Psychology and Medicine (4)**

Explores areas of health, illness, treatment, and delivery of treatment, and social psychological perspectives in the medical area. **Prerequisites:** Psychology 60 or equivalent and 104.

#### **156. Cognitive Development in Infancy (4)**

Examines perception and cognition in the first year of life. Different theories of cognitive change in infancy will be evaluated. **Prerequisite:** Psychology 60 and either Psychology 101 or HDP 1.

#### **157. Happiness (4)**

This course will address the psychology of happiness. The discussions and readings, consisting largely of original research articles. Will explore such questions as: what is happiness? How do we measure it, and how do we tell who has it? What is the biology of happiness and what is its evolutionary significance? What makes people happy—youth, fortune, marriage, chocolate? Is the pursuit of happiness pointless? **Prerequisite:** upper-division standing.

#### **158. Interpersonal Relationships (4)**

Seminar-style course to examine theories and empirical work pertaining to interpersonal relationships; attraction, jealousy, attachments, love. **Prerequisite:** upper-division standing.

#### **159. Physiological Basis of Perception (4)**

A survey of sensory and perceptual phenomena and the physiological mechanisms underlying them. **Prerequisite:** Psychology 102 or consent of instructor.

#### **160. Groups (4)**

Causes and consequences of gregariousness, stress, validating attitudes, improving efficiency, consolidating power, permitting loafing, rejecting deviates, and insulating group members from unpleasant outside influence. **Prerequisite:** upper-division standing.

#### **161. Introduction to Engineering Psychology (4)**

Surveys human perceptual and cognitive limitations and abilities important in designing "user-friendly" computers and devices, improving aviation and traffic safety, and other engineering challenges. Topics include human vision as it bears on display design (including virtual-reality),

short-term memory limitations, learning and practice, effects of noise and stress, causes of human error and their minimization. **Prerequisite:** upper-division standing.

#### **162. Psychology and the Law (4)**

Research dealing with psychological factors in the legal system will be surveyed. Particular emphasis will be placed on applying psychological theory and methods to the criminal justice system in an attempt to understand the behavior of its participants. **Prerequisite:** Psychology 60 and 104.

#### **163. Abnormal Psychology (4)**

Surveys origins, characteristics and causes of abnormal behavior and the biological and environmental causes of abnormality. **Prerequisite:** upper-division standing.

#### **164. Criminology (4)**

Focus is on the scientific study of law making and societal reaction to breaking of laws; major theories that account for criminal behavior; the relationship between drugs and crime; the effects penalties have on recidivism; and psychological effects of incarceration. **Note:** Students may not enroll in Psychology 164 after receiving credit for Psychology 193 Criminology. **Prerequisite:** department stamp.

#### **166. History of Psychology (4)**

Survey of the major trends and personalities in the development of psychological thought. Emphasis given to such selected topics as mind-body problem, nativism vs. empiricism, and genesis of behaviorism. Open to psychology majors with senior standing only.

#### **168. Psychological Disorders of Childhood (4)**

Explores different forms of psychological deviance in children (psychosis, neurosis, mental retardation, language disorders and other behavior problems). Emphasis on symptomatology, assessment, etiological factors, and various treatment modalities. **Prerequisite:** upper-division standing.

#### **169. Brain Damage and Mental Functions (4)**

Studies neural mechanisms underlying perception, memory, language, and other mental capacities. What happens to these capacities when different parts of the brain are damaged? What can we learn about the normal brain by studying patients? **Prerequisite:** upper-division standing.

#### **170. Introduction to Cognitive Neuropsychology (4)**

What are the neural mechanisms underlying mental phenomena such as perception, attention, and memory? The two disciplines, neuropsychology and psychology, both have a long history but until recently there has been very little interaction between them. This course will take students to the interface between these two fields and we will discuss a wide range of topics that are of current interest. **Prerequisite:** upper-division standing.

#### **171. Neurobiology of Learning and Memory (4)**

Studies the neurobiology of learning and memory, from cognitive to molecular neuroscience, including human, animal, and cellular; and molecular studies of memory. Topics include amnesia, mental retardation, exceptional intelligence, aging, and Alzheimer's disease. **Prerequisites:** Psychology 2 or 106 or 181, upper-division standing or consent of instructor.

#### **172. The Psychology of Human Sexuality (4)**

Important issues in human sexuality including sex and gender, sexual orientation, reproductive technology, and sexual dysfunction. **Prerequisite:** upper-division standing.

#### **173. Psychology of Food and Behavior (4)**

Reviews the psychology of food and behavior. Topics will include biological, psychological, and social influences; taste preferences and aversions and how they are learned; how culture influences food selection; and food-related behaviors across the lifespan. **Prerequisite:** upper-division standing or consent of instructor.

#### **175. Psychology and the Arts (4)**

An interdisciplinary course focusing on theoretical ideas and empirical research that relate contemporary psychology (social and cognitive, psychophysiology, motivation and emotion) to issues in various aesthetic and artistic domains, as visual arts, music, literature, criticism, and the performance arts. **Prerequisites:** upper-division standing;

major in psychology, music, visual arts, communication, theatre and dance, or literature, or consent of instructor.

#### **176. Creativity (4)**

The focus is on enhancing creativity in individuals, small groups, and organizations. Topics include how changes to individuals (e.g., gaining expertise, accepting more risk) and their environment (e.g., more diverse colleagues, more time for exploring) increase creativity. **Prerequisite:** upper-division standing.

#### **178. Organizational Psychology (4)**

Examines human behavior in industrial, business, and organizational settings; and psychological principles as applied to selection, placement, management, and training. The effectiveness of individuals and groups within organizations, including leadership and control, conflict and cooperation, motivation, and organizational structure and design, is examined. **Prerequisite:** upper-division standing.

#### **179. Drugs, Addiction, and Mental Disorders (4)**

Considers the use, abuse, liability, and psycho-therapeutic effects of drugs in humans. Lectures are supplemented by guest lecturers from clinical experts in psychology and psychiatry. **Prerequisite:** one lower-division psychology course (1, 2, 3, or 4) or upper-division standing.

#### **180. Adolescence (4)**

This course will adopt a multidisciplinary approach toward understanding the period of human adolescence. A strong focus on the neurobiological aspects of adolescence will be combined with psychological, anthropological, and sociological considerations. **Prerequisite:** upper-division standing.

#### **181. Drugs and Behavior (4)**

Develops basic principles in psychopharmacology while exploring the behavioral effects of psychoactive drugs and mechanisms of action of drugs. **Prerequisite:** psychology major or minor, or biology major or minor.

#### **182. Illusions and the Brain (4)**

This course explores the bases of illusions in terms of perceptual and cognitive principles, and the underlying brain mechanisms; extensive demonstrations are included. **Prerequisite:** upper-division standing.

#### **184. Choice and Self-Control (4)**

Experimental analysis of choice behavior, with an emphasis on the types of choice involved in self-control. Focus on conditions under which decision-making is optimal. **Prerequisite:** upper-division students in psychology, biology, economics, or consent of instructor.

#### **185. Applied Developmental Psychology (4)**

This seminar course deals with how developmental psychologists conduct scientific studies that have direct practical implications for children's well-being. Major issues to be discussed are: child witnesses, literacy, school violence, impact of media on child development, and developmental psychopathology. **Prerequisites:** upper-division standing and Psychology 101.

#### **187. Development of Social Cognition (4)**

This course will examine reasoning about people from a developmental perspective. Topics will include emotional understanding, achievement motivation, peer relations, social categories, and culture. **Prerequisite:** Psychology 101.

#### **188. Impulse Control Disorders (4)**

Problems of impulse control are important features of major psychiatric disorders but also of atypical impulse control disorder such as: pathological gambling, compulsive sex, eating, exercise, shopping. Focus: development, major common features, treatment, and neurobiological basis of impulse control disorders. **Prerequisite:** upper-division standing.

#### **189. Brain, Behavior, and Evolution (4)**

A survey of natural behaviors, including birdsong, prey capture, localization, electro-reception, and echo-location, and the neural systems that control them, emphasizing broad fundamental relationships between brain and behavior across species. **Prerequisites:** Psychology 103 and 106, or permission of instructor.

**190. Parenting (4)**

This course adopts an interdisciplinary approach to the complex construct of parenting. Parenting is explored with respect to history, culture, development, psychology, biology, etc. Controversial issues such as the influence of the media, family structure, and discipline strategies are analyzed. **Prerequisite:** upper-division standing.

**191. Psychology of Sleep (4)**

Topics include basic psychology, evolutionary models of the purpose of sleep, the role of sleep in learning/creativity, dreams, and sleep disorders. **Prerequisite:** upper-division standing.

**193. Topics in Psychology (4)**

Selected topics in the field of psychology. May be repeated for credit as topics vary. **Prerequisites:** upper-division standing and consent of instructor.

**194A-B-C. Honors Thesis (4-4-4)**

Students will take part in a weekly research seminar. In addition, they will plan and carry out a three-quarter research project under the guidance of a faculty member. The project will form the basis of the senior honors thesis. **Prerequisites:** acceptance to the Honors Program in the junior year (110A-B) (GPA 3.3), in addition one laboratory course (114-127) or two 199s which culminate in a research paper (by petition only) and Psychology 110, 111A-B and consent of instructor.

**195. Instruction in Psychology (4)**

Introduction to teaching a class section in a lower-division psychology course, hold office hours, assist with examinations and grading (P/NP grades only). This course counts only once towards the major. **Prerequisites:** junior or senior psychology major with GPA of 3.0 or an A in the course and consent of instructor.

**196A-B-C. Research Seminar (4-4-4)**

Weekly research seminar, three quarter research project under faculty guidance which culminates in a thesis. **Prerequisites:** one laboratory course, 3.3 GPA, and/or consent of instructor.

**199. Independent Study (2 or 4)**

Independent study or research under direction of a member of the faculty. **Prerequisites:** GPA 2.5 and ninety units completed. (P/NP grades only.) Not counted for credit toward the major. See section on 199 information.

**GRADUATE****201A-B-C. Quantitative Methods in Psychology (4-4-4)**

An intensive course in statistical methods and the mathematical treatment of data, with special reference to research in psychology. **Prerequisite:** restricted to graduate students in psychology.

**204. Neurobiology of Social Development (4)**

The goal of this class is to acquaint students with research on the neurological underpinnings of social and social cognitive development. Students will be expected to become familiar with the existing research in the area, and to understand the neural structures that comprise the limbic system, and their developmental timecourse. Students will be expected to form hypotheses about the neural correlates of aspects of social development based upon an understanding of the development of structures involved in social behavior.

**205. Emotion (4)**

This seminar provides a selective overview of the scientific study of emotion. We will discuss various theoretical perspectives on emotion and will focus on specific topics such as emotion regulation, affect in social interactions, individual differences, and particular emotions (e.g., embarrassment, envy, and jealousy). **Prerequisite:** graduate standing.

**206. Mathematical Modeling (4)**

This course is designed to teach the basics of mathematical modeling. Topics include when, why, and how to use signal detection theory (an essential theory for anyone interested in attention, perception, memory, or decision making), how to analyze reaction time distributions (instead of simply

measuring mean RT), how to engage in the fine art of model comparison, and how to avoid creating models that are more complex than the data they seek to explain.

**209. Topics in Judgment and Decision Making (3)**

This seminar examines issues in the psychology of judgment and decision making. Topics include the heuristics and biases approach, over confidence, framing effects, intertemporal choice, and rationality.

**210. Skill Acquisition and Development of Expertise (4)**

The course examines the transition from novice to highly skilled performance and the transfer of that skill to novel problems and contexts. Emphasis will be on information processing accounts of learning and performance for relatively simple cognitive tasks.

**211. The Development of Social Cognition (3)**

This seminar will cover the development of concepts about people. Topics include emotional understanding, "theory of mind," trait thinking, social categories, psychological essentialism, achievement motivation, and social and cultural influences on person perception. **Prerequisite:** graduate standing.

**212. Current Topics in Visual Science (3)**

Each year a different topic in visual science is selected for in-depth review and discussion based on current readings. **Prerequisite:** consent of instructor.

**213. Professional Procedures and Survival in Psychology (3)**

This course provides a forum for presentation and discussion of the basic issues associated with surviving in a professional (particularly, academic) psychology environment. It covers such issues as: 1) how to get a job; 2) how to keep a job; 3) general issues in professional survival. The course will include the presence of a number of the psychology faculty in topic specific areas (e.g., journal editors from our faculty; faculty sitting on grant review panels, etc.). The issue of ethics will be examined and discussed relative to each topic raised.

**214. Applied Developmental Psychology (4)**

This seminar deals with how developmental psychologists conduct scientific studies that have direct practical implications for children's well-being. Major issues to be discussed are: child witnesses, literacy, school violence, impact of media on child development, and developmental psychopathology.

**217A. Proseminar in Developmental Psychology I (3)**

The course examines cognitive development through the school-age period. It begins with an examination of early neurological, sensory, motor, and perceptual functions and then focuses on issues in linguistic and cognitive development.

**217B. Proseminar in Developmental Psychology II (3)**

The course examines social and personality development from infancy through early adolescence. The class will first discuss general developmental theory and methods and then topics such as attachment, temperament, self-concept, aggression, family relations, play, and peers.

**218A-B. Cognitive Psychology (3-3)**

A two-quarter survey of basic principles and concepts of cognitive psychology. This course is intended to serve as the basic introduction for first-year students. Basic areas include knowledge, memory, thought, perception, and performance. The areas are taught by faculty members who work within the specialty. **Prerequisite:** graduate status in psychology or consent of instructor.

**219. Proseminar in Learning and Motivation (3)**

An overview of the experimental and applied analysis of behavior including topics such as the principles of operant and classical conditioning, stimulus control, choice, conditioned reinforcement, aversive control, biological and economic contexts, verbal behavior, and the modification of human behavior in a variety of applied settings.

**220. Proseminar in Social Psychology (3)**

An introduction to social psychology. Psychology and the law, health psychology, attitudes, emotions, person perception and aggression are some of the topics to be covered.

**221. Proseminar in Sensation and Perception (3)**

Fundamentals of vision, audition, and other senses. Emphasis will be upon psychophysical approaches to the study of these sensory modalities, as well as some essential aspects of their neurophysiological bases.

**222. Biological Psychology (3)**

A survey of the functional neuroanatomical, neurodevelopmental, neurophysiological, and pharmacological correlates of psychological phenomena.

**223. Advanced Topics in Vision (4)**

An in-depth analysis of empirical and theoretical issues in a specialized area of vision or visual perception. Emphasis most likely will be on a topic of ongoing vision research at UCSD. **Prerequisite:** Psychology 212 or special consent of instructor.

**229. Happiness (4)**

This course will address the psychology of happiness. The discussions and readings, consisting largely of original research articles, will explore such questions as: What is happiness? How do we measure it, and how do we tell who has it? What is the biology of happiness and what is its evolutionary significance? What makes people happy—youth, fortune, marriage, chocolate? Is the pursuit of happiness pointless?

**230. Comparative Social Cognition (4)**

This seminar will address the following questions: What do nonhuman animals know about the identity and characteristics of nonspecifics? How do they use this information to guide their actions? How do animals modify their behavior in relation to social context? What kinds of information are culturally transmitted? What are the brain mechanisms for social cognition in nonhumans, and how do they compare to ours? **Prerequisite:** graduate standing or consent of instructor.

**231. Experimentation and Data Analysis Using Matlab (4)**

Lecture and exercises will demonstrate the use of Matlab, its extensions in running psychological experiments and in analyzing experimental data. No prior programming knowledge assumed. Experimental topics include writing scripts to generate well-controlled visual or acoustic stimuli. Analytical topics include data plotting and statistics. **Prerequisite:** graduate standing or consent of instructor.

**233A. Topics in Learning and Motivation (3)**

Advanced topics in learning and motivation, with special emphasis on current research. **Prerequisite:** Psychology 210.

**236. Substance Abuse (3)**

Theory and research on the development, progression, and resolution of substance use and abuse will be reviewed and evaluated. Normal and abnormal patterns of substance involvement will be contrasted across the life span.

**237. Human Rationality (4)**

The traditional view of rationality is based upon abstract, content-independent rules for behavior. People sometimes violate these rules in a laboratory setting, but the violations are often systematic and appear to reflect adaptation to the environment outside the laboratory. Such findings raise questions about what it means to be rational. Readings will be empirically oriented and cover the areas of deductive reasoning, inductive reasoning, and choice.

**240. The Primate Brain (4)**

This course will explore the neural basis of perception, action and cognition in primate cortex. Drawing on recent findings in neuroscience, we will discuss the role of cortex in a range of topics including decision making, object perception and recognition, memory and communication. **Prerequisite:** graduate standing or consent of instructor.

**242A-B-C. Research Topics in Developmental Psychology (4-4-4)**

Advanced seminar concentrating on methods of research and current experimental literature. May be taken by undergraduate senior majors concurrently enrolled in Psychology 194. **Prerequisite:** consent of instructor. (S/U grades permitted.)

**243. Sound and Music Perception (3)**

This course will deal with anatomy and physiology of the ear, central auditory pathways, and neurological disorders of sound and music perception.

**244. Special Topics in Psycholinguistics (4)**

Discussion of the psychological reality of grammatical models, competence versus performance, learnability and innateness in theories of language acquisition, and questions of autonomy of "modularity" of grammatical versus semantic processing. In addition, graduate students are required to give oral presentations on articles. **Prerequisites:** Psychology 145, upper-division standing, or consent of instructor.

**246. Emotion and Cognition (4)**

This seminar focuses on the interplay between emotion and cognition. We will consider how emotion influences perception, reasoning, memory, and judgment, and how cognitive processes can have emotional consequences. We will also discuss physiological and neural underpinnings of an affective influence and debate more general issues such as emotion and rationality. **Prerequisite:** graduate standing or consent of instructor.

**247. Neuroendocrinology of Social Variation (4)**

Students will read and discuss primary literature on the general topic of how steroid and peptide hormones contribute to the production of social variation and diversity. This diversity includes seasonal variation, intersexual variation, and divergence between species in patterns of sociality and space use, pair-bonding and mating tactics, aggression, and use of communication signals.

**249A-B-C. Advanced Topics in Applied Behavior Analysis (3-3-3)**

Research and discussion on selected topics in applied behavior analysis.

**250. Sleep, Learning and Thought (4)**

The role of time and sleep in learning, memory, and thought will be covered. Topics include human procedural memory, declarative memory, inference, creativity, and problem solving. **Prerequisite:** graduate standing or consent of instructor.

**251. Advanced Topics in Learning and Motivation (3)**

Weekly meetings for graduate students actively engaged in research on conditioning. **Prerequisite:** consent of instructor.

**252. Seminar on Cognitive Neuroscience (3)**

This is a series of weekly seminars on current trends in neuropsychology. The seminars will deal with the concept of "localization" of function in different parts of the brain and the effects of damage to these parts on cognitive functions such as perception, memory and language. Active student participation will be encouraged in preparing these seminars.

**253. Cognitive Psychology and Cognitive Neuroimaging (4)**

This seminar in cognitive neuroscience focuses on modern approaches to cognitive psychology as revealed through cognitive neuroimaging. A major goal of the course is to evaluate what (if anything) neuroimaging evidence has added to classic cognitive models/evidence in major areas of cognition (working memory, categorization, executive processes, decision-making, emotion, and memory).

**255A-B-C. Advanced Topics in Biological Psychology (3-3-3)**

Research and discussion on selected topics in biological psychology.

**256. Impulsivity (4)**

This seminar will cover the following topics in relation to impulsivity: varieties of the construct; operationalization via behavioral tasks in nonhuman animals and humans; translation from genes through phenotypes; neuropsychiatric disorders; neuropharmacology; behavioral treatments; and implications for jurisprudence. **Prerequisite:** graduate standing or consent of instructor.

**258. Delay of Gratification (3)**

This course will review the research on delay of gratification. We will cover what makes it in general so tough, what

situations make it possible, who can do it, and what the implications of this ability are. We will draw from research in social, personality, and animal psychology as well as economics.

**259. Social Psychology/Psycho-aesthetics (3)**

This course will be an intensive examination of social psychology (legal decision-making, emotion, aggressive behavior) and the psychology of visual art and music (psycho-aesthetics).

**261. Proseminar in History of Psychology (3)**

This course will consider the intellectual context in the nineteenth century from which psychology developed as an independent discipline. Emphasis will be on early German psychology and evolutionary theory. The second part of the course will consider the histories of different areas of psychology (e.g., behavioral, cognitive).

**262. Functional Construction of the Vertebrate Brain's Social Behavior Network (4)**

The vertebrate brain contains a network of strongly interconnected structures that play essential roles in the regulation of social behavior. In this seminar we will read and discuss primary literature that details the structure and behavioral functions of this network.

**264A-B-C. Advanced Topics in Language Processes (4-4-4)**

Research and discussion on selected topics in language processes.

**266. Psychology of Reading (4)**

This seminar will cover aspects of reading, emphasizing cognitive processes involved in skilled reading. However, learning to read and methods to teach reading will also be discussed. Other topics include: eye movements and reading, word recognition, inner speech, context effects, discourse processing, sentence parsing, and dyslexia.

**267A-B-C. Advanced Topics in Behavior Medicine (3-3-3)**

Research and discussion on selected topics in behavior medicine.

**269A-B-C. Advanced Topics in Sound and Music Perception (3-3-3)**

Research and discussion on selected topics in sound and music perception.

**270A-B-C. Introduction to Laboratory Experimentation (1-4)**

A basic laboratory course, designed to introduce first-year graduate students to experimental methods in psychology. The student will select a research topic, do a thorough literature review of the area, design and carry out new, original studies of problems in the selected area, and prepare a final formal report of the study at the end of the spring quarter. This course is required of all first-year graduate students in the department. **Prerequisite:** first-year psychology graduate students only.

**271. Neurobiology of Learning and Memory (4)**

This seminar will span the study of learning and memory from an interdisciplinary neuroscience perspective: the goal will be to gain a broad perspective on memory. The course will also touch on dysfunctions of learning and memory such as in amnesia, mental retardation, aging, and Alzheimer's disease. The course will end with exciting developments in the field, including the possibility of genetic and pharmacological enhancement of memory and intelligence.

**272. Selected Topics in Cognitive Psychology (3)**

An in-depth analysis of selected empirical and theoretical topics in cognitive psychology. The course will focus on areas where notable progress appears to be taking place in contemporary research.

**273. Selected Topics in Quantitative Methods in Psychology (4)**

An in-depth analysis and discussion of selected advanced topics in quantitative methods in psychology.

**280. Seminar in Communication and Information Processing (1)**

(S/U grades only.)

**282. Advanced Topics in Auditory Neuroscience (4)**

An in-depth analysis of current theoretical and empirical issues in the neurobiological study of auditory perception and cognition. Example topics include auditory stream segregation, localization, natural stimulus coding, pattern recognition and communication in multiple species.

**285. Consciousness, Computation, and Incompleteness (4)**

This seminar will examine conceptual and empirical problems in the scientific study of consciousness. Recent models of consciousness from cognitive psychology and neuroscience will be reviewed, in the light of limits on self-knowledge established in mathematical logic and computation theory. **Prerequisite:** graduate standing or consent of instructor.

**296. Research Practicum (1-12)**

Research in psychology under supervision of individual staff members. (S/U grades only.) (F,W,S)

**298. Library Research (1-12)**

Reports and surveys of the literature on selected topics. **Prerequisite:** graduate students in psychology. (S/U grades only.) (F,W,S)

**299. Independent Research (1-12)**

Independent research and thesis research. (S/U grades only.) (F,W,S)

**500. Apprentice Teaching (4)**

Required teaching practicum for students enrolled in graduate program in psychology. One four-unit course per year for four years. (S/U grades only.)

# Public Health

## THE JOINT DOCTORAL PROGRAM (JDP) IN EPIDEMIOLOGY

OFFICE: Stein Clinical Research Building, Room 349  
Mail Code 0607

UCSD—<http://epidemiology.ucsd.edu/>  
SDSU—<http://publichealth.sdsu.edu/phdmain.php>

The doctoral program in public health (epidemiology) was developed as a joint program in 1990 between the Department of Family and Preventive Medicine in the School of Medicine at the University of California, San Diego (UCSD), and the Graduate School of Public Health at San Diego State University (SDSU). Students in the program complete course work and conduct research at both institutions. Faculty from each campus serve on advisory and dissertation committees, providing students with extensive exposure to experts whose research interests represent the interdisciplinary nature of modern public health. Dr. Deborah Wingard (UCSD) and Dr. Richard Shaffer (SDSU) codirect the program.

Requirements for the joint doctoral degree include:

1. successful completion of required course work
2. passing written preliminary examinations in epidemiology and biostatistics
3. passing written and oral qualifying examinations
4. demonstrating proficiency in two computer-based statistical software packages
5. demonstrating proficiency in teaching
6. completion and successful formal defense of a dissertation

Typical areas of emphasis include infectious disease epidemiology, chronic disease epidemiology, cancer epidemiology, behavioral epidemiology, community-based trials, physical activity/exercise/nutrition and health. San Diego is ideally located in a large and ethnically diverse metropolitan center bordering Mexico and the Pacific Rim, enabling students to carry out population-based multicultural and multinational studies of health problems.

### Time Limits

The goal of this policy is to encourage Ph.D. completion in a timely manner.

**Pre-candidacy limit.** Maximum registered time to advance to Ph.D. candidacy: 4 years

**Support limit.** Maximum registered time doctoral student is eligible for support: 6 years

**Total time limit.** Maximum registered time to complete all Ph.D. requirements: 7 years

Degree and contact information may be found on our Web site <http://publichealth.sdsu.edu/phdmain.php>. Admission requirements and application material can be found at <http://publichealth.sdsu.edu/phdapplication.php>.

## THE JOINT DOCTORAL PROGRAM (JDP) IN GLOBAL HEALTH

OFFICE: Ash Building, Room 109  
Mail Code 0622

Since 2007, a Ph.D. in public health with a concentration in global health has been offered by multidisciplinary faculty in UCSD's School of Medicine and the Graduate School of Public Health at San Diego State University. Global health relates to health issues and concerns that transcend national borders, class, race, ethnicity, and culture, stresses the commonality of health issues, and calls for collective, partnership-based action to resolve these issues. Accordingly, emphasis is on preparing graduates with the fundamental knowledge, understanding, and specific skills necessary to become public health researchers and professional leaders in global health settings. Proximity to the U.S./Mexico border and expertise of many current faculty support and encourage a focus on infectious diseases (e.g., HIV, TB, STDs) and health of migrant populations, although students are expected to develop other areas of specialization within the global health concentration. These may be content areas, such as chronic/infectious disease surveillance and prevention, environmental health, health policy, and substance abuse, or methodological areas such as quantitative, qualitative, and spatial research methodologies that are applied to address health problems of global health significance. Dr. Steffanie Strathdee (UCSD) and Dr. Jenny Quintana (SDSU) direct the program.

Requirements for the joint doctoral degree include:

1. Successful completion of required course work
2. Passing written and oral qualifying examinations
3. Demonstrated proficiency in teaching
4. Demonstrated cultural competence appropriate to dissertation area
5. Completion and successful formal defense of a dissertation

## THE JOINT DOCTORAL PROGRAM (JDP) IN HEALTH BEHAVIOR

OFFICE: Moores UCSD Cancer Center, Room 3063  
Mail Code 0901

UCSD—<http://famprevmed.ucsd.edu/educational.html>

SDSU—<http://publichealth.sdsu.edu>

A Ph.D. in public health with a concentration in health behavior is offered by the joint faculties of the Department of Family and Preventive Medicine in the School of Medicine at UC San Diego and the Graduate School of Public Health at San Diego State University (SDSU). Students in the program complete course work and conduct research at both institutions. Faculty from each campus serve on advisory and dissertation committees, providing students with extensive exposure to experts whose research interests represent the interdisciplinary nature of modern public health. Dr. John P. Pierce (UCSD) and Dr. Joni Mayer (SDSU) codirect the program.

Emphasis is on producing graduates with a mastery of the central concepts and analytic processes of health behavior. Graduates of the program are expected to establish advanced skills in applied behavioral analysis for population application; to establish expertise in advanced qualitative and quantitative research methods; to establish advanced skills in the application of interventions and research methods to health behavior in disenfranchised populations; and to establish skills necessary to understand and change health policy. Graduates of the program are competitive for a variety of research, teaching, and community service positions in areas such as academic institutions, local and state health departments, federal and international agencies, and both private and public-sponsored research institutions.

Areas of specialization currently include physical activity, tobacco control, skin-cancer prevention, nutrition and obesity, and HIV/AIDS and tuberculosis prevention and control. An additional emphasis will be placed on methodologies, such as measurement and related research issues; and ecological approaches to understanding health behavior. San Diego is ideally located in a large and ethnically diverse metropolitan center bordering Mexico and the Pacific Rim, enabling students to carry out community-based multicultural and multinational studies of health problems.

### Time Limits

The goal of this policy is to encourage Ph.D. completion in a timely manner.

**Pre-candidacy limit.** Maximum registered time to advance to Ph.D. candidacy: 4 years

**Support limit.** Maximum registered time doctoral student is eligible for support: 6 years

**Total time limit.** Maximum registered time to complete all Ph.D. requirements: 7 years

Information regarding admission is found in the current edition of the *Bulletin of the Graduate Division of San Diego State University*. To receive an application for admission, contact SDSU/UCSD Joint Doctoral Program in Public Health, San Diego State University, 5500 Campanile Drive, San Diego 92182-4162, (619) 594-2743.

For more information, please contact UCSD Graduate Coordinator, 3855 Health Sciences Drive, Room 3063, La Jolla, CA 92093-0901, (858) 822-2382.

# Public Service Minor

---

TMC Administration Building, or visit the Web site at <http://publicsvminor.ucsd.edu>.

Office: Office of the Provost  
Thurgood Marshall College  
Administration Building

## AFFILIATED FACULTY AND STAFF

Amy Binder, *Associate Professor, Sociology, Director of Public Service Minor*

Tricia Taylor-Oliveira, *Director, Academic Internship Program*

Kerry Shannon, *Public Service Internship Specialist*

## SPECIALIZATION CHAIRS

Aurora Zepeda, M.P.A., *Education Studies—Education*

Steven P. Erie, Ph.D., *Political Science—Government*

Lawrence A. Palinkas, Ph.D., *Family and Preventive Medicine, School of Medicine—Health*

Joel Robbins, Ph.D., *Anthropology—Social Issues*

The public service minor at UCSD encourages students to understand the history and practices of public service and to participate in the development of civic skills. Those skills and practices are essential cornerstones of participation in a democratic society regardless of one's chosen profession.

The course work for the minor emphasizes the history and emergence of the non-profit sector as a national institution distinct from the private and public sectors. The practicum aspects of the minor coupled with the traditional academic work encourage students to see the connection between the deeds of charitable service and the historic worth of citizen participation in the common public franchise, regardless of professional interests or gain.

The minor in public service is open to all UCSD students in good standing. Students first complete TMC 15, Public Service in America, and must choose one area of specialization from education, government, social issues, or health. A list of specific courses appropriate for these specializations is available through the Marshall College Provost's Office. Approval of the minor is based on completion of TMC 15 and two of the three upper-division specialization courses with a 2.0 GPA or better, and a cumulative GPA of 2.5 on ninety units. Students approved to complete the minor are placed into specific internships in public service through the Academic Internship Program.

The following twenty-eight units comprise the public service minor:

- TMC 15, Public Service in America
- Three upper-division specialization courses (education, government, social issues, or health)
- Three upper-division academic internships in public service
- Capstone seminar in public service

For more information regarding the requirements for the minor, see the Office of the Provost, or Academic Advising, Thurgood Marshall College,

## PROGRAM DESCRIPTION

The program engages in the academic study of religious phenomena in many regions of the world and within many different religious cultures and traditions; and it studies literature, history, and society in relation to religion. Faculty and students associated with the program give primacy to humanistic and social scientific methods of study that have become established in the academic community during the nineteenth and twentieth centuries.

The location of the program in the Division of Arts and Humanities and its use of courses from a variety of departments and divisions imply that neither the study of religion nor its data are the privileged possession of a single discipline. The hallmark of the program is its interdisciplinary and interdepartmental structure. At UC San Diego, faculty from the Departments of Anthropology, History, Literature, Philosophy, Political Science, Sociology, and Visual Arts provide students with the opportunity to examine religious artifacts, texts, institutions, and communities within a particular cultural and historical context and in the context of comparable manifestations within the general history of religions.

A concentration in the Study of Religion aims at fostering a student's understanding of religion as one of the primary expressions of the human condition and as an historically powerful force in the shaping of human cultures; and it aims to foster an understanding of multiple religious traditions. It seeks to develop a student's appreciation of the difficulties and possibilities inherent in undertaking a critical, disciplined, cross-cultural study of religion.

Since the program endorses an interdisciplinary and comparative approach to the study of religion, lower-division preparation should be wide and varied. Lower-division courses in which religion figures prominently (e.g., Introduction to Religion, The Making of the Modern World, or the Revelle College Humanities Program), as well as courses which focus on textual and contextual analysis and employ the analytical tools and conceptual categories of the human sciences, would all be useful in preparing the student for a major in the Study of Religion. The program strongly encourages foreign language study. The ability to read the languages of original sources and of modern scholarship is highly recommended, especially for students planning to attend graduate school in religion.

## MAJOR

The major in the Study of Religion consists of twelve upper-division courses, achieving a balance between courses which focus on a single religious tradition or issue and those which explore various traditions and methodologies. These courses should include the following:

- Three required courses in the Study of Religion, (1) RELI 110A or B and (2) RELI 111 or 112 or 113 and (3) RELI 189, or one other seminar approved by the program director.
- Nine courses from the approved course list to be selected in consultation with the program director. Students should see the program coordinator for further details.

## DOUBLE MAJOR

Students may choose to pursue the Study of Religion as their second major. In such cases, it may be possible for up to two courses to overlap with the other major. Students should consult the program coordinator for further information.

## HONORS IN THE STUDY OF RELIGION

The program for the Study of Religion offers an Honors Program for students who demonstrate excellence in the major. The minimum eligibility requirements for the Honors Program are stated below. In most cases students are completing their last two quarters (winter and spring) when they enroll in the Honors Program.

### Minimum Eligibility Requirements

- RELI 110A or 110B completed prior to honors project
- Junior or senior standing (completion of at least 90 units)
- GPA of 3.3 overall and a 3.5 in the major to enter or remain in the Honors Program
- Eight units of RELI 196H taken over two quarters (typically winter and spring)
- Research paper (at least twenty pages; most students write between thirty and fifty pages)

Students interested in the Honors Program should consult with the program coordinator for a detailed list of requirements and an application. Participation in the Honors Program is contingent upon the prior approval of the Honors Thesis research topic by the director. Honors proposals are due at the program office by the tenth week of the quarter (usually fall quarter of the senior year) prior to being enrolled. Final approval must take place before the first day of the quarter in which the student plans to enroll in RELI 196H.

The Honors student's faculty director must certify by the end of the first term that the student is making timely progress toward the completion of his or her project.

The notations "distinction," "high distinction," and "highest distinction" will be determined on the following basis: major GPA, the grade for the research paper, and the grade for the public presentation.

## MINOR

The minor in the Study of Religion consists of seven courses, of which five must be upper-division. These seven courses must include two required courses in the Study of Religion as delineated under the major:

1. RELI 110A or 110B, and
2. RELI 111 or 112 or 113.

Some students may apply two lower-division college requirements to the minor (e.g., Revelle students may apply HUM 1 and HUM 2, and ERC students may apply MMW 2 and MMW 3).

### Student Advising

All students are assigned a faculty advisor and are encouraged to meet with their advisor at least once

a quarter to develop their course of study. Additional advising information may be obtained from the program coordinator, Literature Building, First Floor, Room 139.

### Study Abroad

Students are encouraged to investigate the University of California Education Abroad Program (EAP) and other options for foreign study through the Opportunities Abroad Program (OAP). By petition, credits earned through EAP/OAP can fulfill major and minor requirements. More information about studying abroad can be obtained in the Education Abroad section of the catalog.

### Career Opportunities and Preparation for Graduate Study

Among its many aims, the major in the Study of Religion is designed to develop fundamental skills in critical thinking, comparative analysis, research, and written expression. As such, the B.A. degree is appropriate for careers in education, government, business, and non-profit agencies. It is also an excellent preparation for graduate study in a variety of fields and disciplines.

Students interested in earning a California teaching credential from UCSD should contact the Teacher Education Program for further information.

Students are encouraged to consult the program director for further information about career opportunities and graduate study. Information is also available on the program's Web site.

## COURSES

*For course descriptions not found in the UC San Diego General Catalog, 2010–11, please contact the department for more information.*

### RELI 1. Introduction to Religion (4)

An introduction to key topics in the study of religion through a comparative reading of religious texts and/or artifacts. The intent is to develop basic strategies of interpretation for undertaking a critical, disciplined study of religion.

### RELI 110A. The Modern Study of Religion: Religion in Modernity (4)

This class examines the history of the term "religion," focusing upon the development of religion's contemporary significance within the Reformation and Enlightenment, and questioning what it means to be "modern." Topics change yearly. Special attention to contemporary culture and politics.

### RELI 110B. The Modern Study of Religion: Social and Cultural Theories of Religion (4)

An introduction to basic strategies of interpretation in the study of religion, including issues of category formation, theory, and method. Special attention paid to prominent voices of the nineteenth and twentieth centuries, including Marx, Freud, Durkheim, Eliade, etc.

### RELI 111. Texts and Contexts: The Holy Book in Judaism and Christianity (4)

This class examines the development of sacred scripture in Judaism and Christianity. Topics include the variety and use of texts in religious communities; the process of canonization; the formation and transformation of textual communities. **Prerequisite:** upper-division standing or department stamp.

### RELI 112. Texts and Contexts: The Holy Book in Islam (4)

An overview of the history and thematic issues in the study of Quran. It will focus on historical events, issues, and various interpretive practices in the development of Quran as a sacred text. **Prerequisite:** upper-division standing or department stamp.

### RELI 113. Texts and Contexts: Textual Communities in South Asia (4)

This class considers important texts belonging to one or more of the following South Asian Traditions: Hinduism, Buddhism, Jainism, or Sikhism. It introduces students to the ways in which religious identities are formed and contested within a pluralistic society.

### RELI 130. Religion, Science, and Magic (4)

Religion, science, and magic provide scholars with a set of analytic categories for the comparative study of cultural forms and modes of thinking. What are the ideological underpinnings and political implications of these categories? This class addresses this question using comparative avenues involving literary sources. **Prerequisite:** upper-division standing or consent of instructor.

### RELI 131. Topics in Religion and Sexuality (4)

How does religiosity as a significant cultural component help mold gender and sexuality identities? The class offers topical investigations into this question. **Prerequisite:** upper-division standing or consent of instructor.

### RELI 132. Topics in Orthodoxy and Heterodoxy (4)

Religious dogmas often develop in dialogue with alternative viewpoints that ultimately are rejected by heterodox by the dominant group. This class presents case studies in the interpretation of such ideological and sociological pairings using scriptural, literary, and analytic sources. **Prerequisite:** upper-division standing or consent of instructor.

### RELI 134. Topics in American Religion (4)

Topical studies in the history of religion in American society, ranging from the Puritans to the New Age. **Prerequisite:** upper-division standing or consent of instructor.

### RELI 140. Death and Religion (4)

This interdisciplinary course uses literary sources to explore the relationship between death and religion on a historical and global scale; the relationship between political religious rituals and symbolism of rebirth; examination of carnival, death pollution, and symbolism of gender. **Prerequisite:** upper-division standing or consent of instructor.

### RELI 141. Public Sphere and Religion (4)

This interdisciplinary course will explore the historical and theoretical relationship between public sphere and religion, particularly focusing on the manifestation of religious power, public ritual, and sacred theatricality in everyday spaces of life. **Prerequisite:** upper-division standing or consent of instructor.

### RELI 142. Secularization and Religion (4)

Surveys the relationship between religion and modernity, in particular the problematic of the secularization theory; covers cases such as Catholic liberation theology and Islamic fundamentalism, with particular focus on the "deprivatization of modern religion." **Prerequisite:** upper-division standing or consent of instructor.

### RELI 143. Topics in Performing Religion (4)

This course explores religion as a system of bodily practices, rather than one of tenets or beliefs. How do day-to-day activities as well as significant rituals express and inform people's religious lives? Why is doctrine an insufficient basis for understanding religion? May be taken up to three times as topics vary. **Prerequisite:** upper-division standing or consent of instructor.

### RELI 188. Special Topics in Religion (4)

Students in this lecture will investigate important problems in the study of religion or the history of particular religions. May be repeated for credit up to three times when topics vary. **Prerequisite:** upper-division standing.

### RELI 189. Seminar in Religion (4)

This seminar requires the intensive analysis of critical problems in the study of religion or the history of particular

religions. May be repeated for credit up to three times when topics vary. **Prerequisites:** upper-division standing; RELI 110A or 110B or consent of instructor.

### RELI 196H. Honors Thesis Research (4)

Honors thesis research for students accepted into the Honors Program. Research is conducted under the supervision of a program faculty member. **Prerequisite:** program approval into the Honors Program.

### RELI 197. Directed Advanced Readings (4)

A faculty member will direct a student in advanced readings on a topic not generally included in the Program for the Study of Religion's curriculum. Students must make arrangements with the program and individual faculty. May be repeated for credit up to three times for credit. **Prerequisites:** upper-division standing; RELI 110A or 110B; overall GPA of 2.5.

### RELI 199. Independent Research Study for Undergraduates (2–4)

Independent research in religion under the supervision of a faculty member affiliated with the Program for the Study of Religion. This course may be repeated three times with program approval. (P/NP grades only.) **Prerequisites:** upper-division standing, with 2.5 GPA (overall); program stamp.

## APPROVED ELECTIVE COURSES

The following lower- and upper-division courses are offered on a regular basis, although not every course is available every year. Please contact the program coordinator for approved courses in any given quarter or visit the program's Web site, <http://religion.ucsd.edu>. Students may petition other courses, including independent study and Education Abroad Program courses when appropriate.

## LOWER-DIVISION

### ANTH 1. Introduction to Culture

### HUM 1. The Foundations of Western Civilization: Israel and Greece

### HUM 2. Rome, Christianity, and the Middle Ages

### MMW 2. The Great Classical Traditions

### MMW 3. The Medieval Heritage

### PHIL 14. Introduction to Philosophy: Metaphysics

### PHIL 31. History of Philosophy: Ancient Philosophy

### RELI 1. Introduction to Religion

### SOCI 1A, B. The Study of Society

## UPPER-DIVISION

### METHODOLOGICAL

### ANSC 120. Anthropology of Religion

### ANSC 167. Rituals and Celebrations

### RELI 110A. The Modern Study of Religion: Religion in Modernity

### RELI 110B. The Modern Study of Religion: Social and Cultural Theories of Religion

### RELI 143. Topics in Performing Religion

### RELI 189. Seminar in Religion

### SOCI 100. Classical Sociological Theory

### SOCI 156. Sociology of Religion

## GENERAL COMPARATIVE

### ANSC 104. Anthropology of Fantasy

ANSC 134. Global Islam  
 ANSC 160. Nature, Culture, and Environmentalism  
 LTWL 100. Mythology  
 RELI 130. Religion, Science, and Magic  
 RELI 131. Topics in Religion and Sexuality  
 RELI 132. Topics in Orthodoxy and Heterodoxy  
 RELI 134. Topics in American Religion  
 RELI 140. Death and Religion  
 RELI 188. Special Topics in Religion  
 RELI 196H. Honors Thesis Research  
 RELI 197. Directed Advanced Readings  
 VIS 117I. Western and Non-Western Rituals and Ceremonies

#### RELIGION IN HISTORICAL CONTEXT

ANAR 142. The Rise and Fall of Ancient Israel  
 ANAR 143. Archaeology, Anthropology, and the Bible  
 ANAR 154. Aztecs and their Ancestor  
 ANSC 130. Hinduism  
 ANSC 137. Chinese Popular Religion  
 ETHN 161. Black Politics and Protest Since 1941  
 ETHN 188. African Americans, Religion, and the City  
 HIEA 120. Classical Chinese Philosophy and Culture  
 HIEA 121. Medieval Chinese Culture and Society  
 HIEA 126. The Silk Road in Chinese and Japanese History  
 HIEA 136. History of Thought and Religion in China: Daoism  
 HIEA 168. Topics in Classical and Medieval Chinese History (when topic covers religion)  
 HIEU 101. Greece in the Classical Age  
 HIEU 105. The Early Christian Church  
 HIEU 113. Rule, Conflict, and Dissent in the Middle Ages  
 HIEU 115. The Pursuit of the Millennium  
 HIEU 132. Germany from Luther to Bismark  
 HIEU 147. Women and Gender in Early Modern Europe  
 HIEU 158. Why Hitler? How Auschwitz?  
 HIEU 159. Three Centuries of Zionism, 1648–1948  
 HIEU 163. Special Topics in Medieval History (when topic covers religion)  
 HIEU 171. Special Topics in Twentieth-Century Europe (when topic covers religion)

## HUMANITIES/WRITING PROGRAM

---

OFFICE: Galbraith Hall 180, Revelle College  
See [Humanities](#).

---

## REVELLE HONORS PROGRAM

---

OFFICE: Office of the Provost, Revelle College

Particularly well-prepared students are invited to join a freshman honors program, which includes weekly participation in small faculty seminars (Revelle 20). Acceptance into the Honors Program at admission is automatic for Regents and National Merit Scholars as well as those students entering with a high school GPA of 3.8 or higher and verbal and math SAT scores of 700 or higher. Admission to the program winter quarter is offered to those who achieve a 3.7 GPA in at least twelve graded units taken at UC San Diego during the fall quarter. A variety of other prerequisites are also awarded. Outstanding students are individually advised to participate in small honors classes in chemistry, mathematics, physics, and social science.

Outstanding seniors are selected for participation in honors seminars, Revelle 100 and 110. At least five outstanding graduating seniors are honored at graduation each year with a monetary honorarium.

An honors banquet is given for the top 200 students (from all class levels) in Revelle each spring.

---

## COURSES

---

*For course descriptions not found in the UC San Diego General Catalog, 2010–11, please contact the department for more information.*

### Revelle 20. Revelle Honors Seminar (0)

Weekly seminars with a faculty member (chosen each year by the provost to match the interests of participating students). This seminar will acquaint students with the scholarship and research being conducted by faculty and instill in students a sense of participation in the scholarly life at UCSD. **Prerequisite:** by invitation only. Pass/Not Pass grades only. (F,W,S)

### Revelle 100. Senior Honors Seminar: Science and Civilization (4)

Beginning with the distinction between science and technology, the course will trace their evolution from earliest times, culminating in an examination of their impact on modern society and of the social concerns about their future course. **Prerequisites:** senior standing, 3.5 overall GPA, science major, consent of instructor, Revelle students only. Pass/Not Pass grades only.

### Revelle 110. Senior Honors Seminar: Thinking About Science (4)

A seminar for honors students concerning the nature of science and its place in our society. The course will consist of readings and discussions concerning a range of historical, philosophical, and sociological perspectives on science. **Prerequisite:** Revelle College senior honors students.

---

## REVELLE SEMINARS

---

OFFICE: Office of the Provost, Revelle College

Revelle Seminars 90 (1.0 unit credit) are sponsored by Revelle College to promote student/ faculty interaction in a small group setting.

### Revelle 90. Undergraduate Seminar (1)

A seminar intended for exposing undergraduate students, especially freshmen and sophomores, to exciting research programs conducted by the faculty. **Prerequisite:** none. Pass/Not Pass grades only. (F,W,S)

### Revelle 91. Art, Book, and Life (1)

This interdisciplinary seminar will look at some selective relationships between visual arts and literature generally building chronologically and culminating with slide-illustrated visits to the world's great museums. Short student presentations. **Prerequisite:** Humanities or consent of instructor.

# Russian and Soviet Studies

## FACULTY

Steven Cassedy, Ph.D., *Professor in Literature*  
Frantisek Deak, Ph.D., *Professor Emeritus in Theatre and Dance*

Robert Edelman, Ph.D., *Professor in History*  
Amelia Glaser, Ph.D., *Assistant Professor in Literature*  
Philip Roeder, Ph.D., *Professor in Political Science*  
Rebecca Wells, *Lecturer in Literature*

### OFFICE:

History Undergraduate Advising  
Humanities and Social Sciences Building, Fifth Floor  
Muir College  
<http://history.ucsd.edu/programs/caesar-programs/russiansoviet-stud/>

Russian and Soviet Studies is an interdisciplinary program that provides a broad range of courses in the history, language, literature, and social and political life of Russia (before, during, and after the Soviet period). It is designed for students who do not wish to restrict their Russian studies to literature.

## THE MINOR

The minor consists of seven courses, at least four of which must be upper-division. In addition, there must be at least one course each from two of the three following areas: literature, history, and social science. No more than three of the seven courses may be language courses. Knowledge of the language is not a requirement for the minor, but it is strongly recommended.

## THE MAJOR

The major requires a study of Russian language. It consists of LTRU 1A-B-C (First-Year Russian), LTRU 2A-B-C (Second-Year Russian), or their equivalent, and a minimum of twelve upper-division courses. All students are required to take LTRU 104A-B-C (Advanced Practicum in Russian), HIEU 134 (History of Russia, Ninth Century to 1855), HIEU 156 (History of Russia, 1855 to the Present), and LTRU 110A-B-C (Survey of Russian Literature in Translation). In addition, students will take four electives, of which at least two must be from the social sciences (sociology or political science).

Students in the major are encouraged to participate in the Education Abroad Program (EAP) in Russia and to investigate other options for foreign study through the Opportunities Abroad Program (OAP). By petition, credits earned through EAP/OAP can fulfill UC San Diego degree and major requirements. Please visit the Web site at <http://history.ucsd.edu/programs/caesar-programs/russiansoviet-stud/> for further details.

## COURSES

*For course descriptions not found in the UC San Diego General Catalog, 2010–11, please contact the department for more information.*

### LITERATURE

**LTRU 1A-B-C. First-year Russian (4-4-4)**

**LTRU 2A-B-C. Second-year Russian (4-4-4)**

**LTRU 104A-B-C. Advanced Practicum in Russian (4-4-4)**

**LTRU 110A-B-C. Survey of Russian and Soviet Literature in Translation (4-4-4)**

**110A. 1800–1860**

**110B. 1860–1917**

**110C. 1917–Present**

**LTRU 123. Single Author in Russian Literature in Translation (4)**

**LTRU 150. Russian Culture (4)**

**LTRU 198. Directed Group Study (4)**

**LTRU 199. Special Studies (2 or 4)**

### HISTORY

**HIEU 134. The Formation of the Russian Empire, 800–1855 (4)**

**HIEU 156. History of the Soviet Union, 1905–1991 (4)**

**HIEU 157. Religion and the Law in Modern European History (4)**

**HIEU 178. Soviet History (4)**

### SOCIOLOGY

Course offerings vary by quarter.

### POLITICAL SCIENCE

**POLI 130AA. The Soviet Successor States (4)**

**POLI 130B. The Soviet State and Society (4)**

**POLI 130AC. Seminar: Post-Soviet Politics (4)**

The Science Studies Program at UC San Diego is an interdisciplinary Ph.D. program committed to working toward a deeper understanding of scientific knowledge and technological change, past and present. The program offers students an opportunity to integrate the perspectives developed in communication studies and the history, sociology, and philosophy of science, while receiving a thorough training at a professional level in one of the component disciplines. Students enrolled in the program choose one of the four disciplines for their major field of specialist studies and are required to complete minor field requirements in the others. Students are also required to take the Introduction to Science Studies, Advanced Approaches to Science Studies, and two interdisciplinary, topical "core" seminars, and to attend the program colloquium. Science studies students are encouraged to select dissertation topics that offer scope for a cross-disciplinary approach. The Ph.D. will be awarded in Communication (Science Studies), History (Science Studies), Sociology (Science Studies), or Philosophy

(Science Studies). In special circumstances, students may be permitted to work for the M.A. degree.

## COURSES

For course descriptions not found in the UC San Diego General Catalog, 2010–11, please contact the department for more information.

## GRADUATE

### COGR 225A, HIGR 238, PHIL 209A, SOCG 255A. Introduction to Science Studies (4)

Study and discussion of classic work in history of science, sociology of science, and philosophy of science, and of work that attempts to develop a unified science studies approach. Required for all students in the Science Studies Program. **Prerequisite:** enrollment in Science Studies Program.

### COGR 225B, HIGR 239, PHIL 209B, SOCG 255B. Seminar in Science Studies (4)

Study and discussion of selected topics in the science studies field. Required for all students in the Science Studies Program. The topic varies from year to year, and students may, therefore, repeat the course for credit. **Prerequisite:** enrollment in Science Studies Program.

### COGR 225C, HIGR 240, PHIL 209C, SOCG 255C. Colloquium in Science Studies (4)

A forum for the presentation and discussion of research in progress in science studies, by graduate students, faculty, and visitors. Required for all students in the Science Studies Program. **Prerequisite:** enrollment in the Science Studies Program.

### COGR 225D, HIGR 241, PHIL 209D, SOCG 255D. Advanced Approaches to Science Studies (4)

Contemporary themes and problems in Science Studies. Focus on recent literature in the history, philosophy and sociology of science, technology, and medicine. Required of all students in the Science Studies Program. **Prerequisites:** completion of COGR 225A, HIGR 238, PHIL 209A, or SOCG 255A; enrollment in Science Studies Program; or instructor's permission.

### HIGR 235. Science, Empire, and Exploration (4)

Examines links between scientific work, particularly expeditions and exploration, and political programs of empire in the seventeenth to twentieth centuries. Topics: collecting expeditions as expressions of empire; role of colonial administrative networks in facilitating field-based investigations; relation between European and non-European knowledge systems. **Prerequisite:** graduate standing or consent of instructor.

### HIGR 236A-B. Seminar in History of Science (4-4)

A two-quarter research seminar, comprising intensive study of a specific topic in the history of science. The first quarter will be devoted to readings and discussions; the second chiefly to the writing of individual research papers. The topic varies from year to year, and students may repeat the course for credit. (IP grade to be awarded the first quarter; final grade will be given at the end of the second quarter.) **Prerequisite:** graduate standing.

### HIGR 242. Topics in the History of Earth and Life Sciences (4)

Intensive study of specific problems in the history of the life sciences and earth sciences, ranging in period from the Renaissance to the twenty-first century. May be repeated for credit as topics will vary annually. **Prerequisite:** graduate standing.

### HIGR 243. Historical Scholarship in Technology (4)

An introduction to the historiography of technology. This reading seminar provides an overview of scholarly approaches to the history of technology by critically examining classic and contemporary works in the field. **Prerequisite:** graduate standing or consent of instructor.

### HIGR 244. Introduction to Sound Studies (4)

Study and discussion of classic and recent scholarship on sound production and cultures of listening. Emphasizes historical literature but also includes works in literary studies, art history, music, and other fields.

### HISC 160. Historical Approaches to the Study of Science (4)

This colloquium course will introduce students to the rich variety of ways in which the scientific enterprise is currently being studied historically. Major recent publications on specific topics in the history of science selected to illustrate this diversity will be discussed and analyzed; the topics will range in period from the seventeenth century to the late twentieth, and will deal with all major branches of natural science. Requirements will vary for undergraduate, M.A., and Ph.D. students. Graduate students may be expected to submit a more substantial piece of work. **Prerequisites:** consent of instructor; department stamp required.

### HISC 163/263. History, Science, and Politics of Climate Change (4)

The complex historical development of human understanding of global climate change, including key scientific work, and the cultural dimensions of proof and persuasion. Special emphasis on the differential political acceptance of the scientific evidence in the U.S. and the world. Graduate students are required to submit an additional paper. **Prerequisite:** upper-division or graduate standing; department stamp required.

### HISC 164/264. Topics in the History of the Physical Sciences (4)

Intensive study of specific problems in the physical (including chemical and mathematical) sciences, ranging in period from the Renaissance to the twentieth century. Topics vary from year to year, and students may therefore repeat the course for credit. Requirements will vary for undergraduate, M.A., and Ph.D. students. Graduate students may be expected to submit a more substantial piece of work. **Prerequisites:** consent of instructor; department stamp required.

### HISC 165. Topics in Twentieth-Century Science and Culture (4)

This is a seminar open to advanced undergraduate and graduate students that explores topics at the interface of science, technology, and culture, from the late nineteenth century to the present. Topics change yearly; may be repeated for credit with instructor's consent. Requirements vary for undergraduates, M.A., and Ph.D. students. Graduate students are required to submit a more substantial piece of work. **Prerequisites:** upper-division standing or consent of instructor; department stamp required.

### HISC 166/266. The Galileo Affair (4)

Galileo's condemnation by the Catholic Church in 1633 is a well-known but misunderstood episode. Was Galileo punished for holding dangerous scientific views? Personal arrogance? Disobedience? Religious transgressions? Readings in original sources, recent historical interpretations. Graduate students will be expected to submit a more substantial piece of work. **Prerequisites:** upper-division standing or consent of instructor.

### HISC 167/267. Gender and Science (4)

Why have women been traditionally excluded from science? How has this affected scientific knowledge? How have scientists constructed gendered representations not only of women, but also of science and nature? We will address these questions from perspectives including history, philosophy, and psychoanalytic theory. **Prerequisite:** upper-division standing or consent of instructor.

### HISC 168/268. The Extraterrestrial Life Question (4)

The changing fortunes of the belief in the existence of life beyond the Earth (pluralism) from 1750–present as it evolved from a marginal speculation to a central scientific question with wide-ranging consequences for traditional religious belief systems. **Prerequisite:** upper-division standing or graduate standing or consent of instructor. Graduate students will be expected to submit a more substantial piece of work.

**HISC 170/270. Topics in the History of Science and Technology (4)**

This seminar explores topics at the interface of science, technology, and society, ranging from the seventeenth century to the twentieth. Requirements will vary for undergraduate, M.A., and Ph.D. students. Graduate students are required to submit an additional paper. **Prerequisite:** upper-division standing or consent of instructor; department stamp required.

**HISC 172/272. Building America: Technology, Culture, and the Built Environment in the United States (4)**

The history of the built environment in the United States, from skyscrapers to suburbs, canals and railroads to factories and department stores. The technological history of structures and infrastructures, and the social and cultural values that have been "built into" our material environment. Graduate students are required to submit an additional paper. **Prerequisite:** upper-division standing or consent of instructor; department stamp required.

**Phil. 204A. Core Course in Philosophy of Science (4)**

An introduction to one or more central problems in the philosophy of science, or in the philosophy of one of the particular sciences, such as the nature of confirmation and explanation, the nature of scientific knowledge, reductionism, the unity of science, or realism and antirealism. May be taken for credit three times with changed content.

**Phil. 245. Philosophy of Science (4)**

This seminar will cover current books and theoretical issues in the philosophy of science. May be taken for credit seven times with changed content.

**Phil. 247. Philosophy of Biology (4)**

Historical and contemporary perspectives on foundational issues about biology. May include questions about the nature of biological explanation, the relation of biology to chemistry and physics, the status of attributions of function, and the relation of biology to the social sciences. May be taken for credit six times with changed content.

**Phil. 250A. Philosophy of the Cognitive Sciences (4)**

Contemporary debates about the study of the mind-brain as studied in one or more of the empirical cognitive sciences. May include questions about the different strategies of explanation invoked, the conceptions of representation employed, the connections between theoretical models developed. May be taken for credit six times with changed content.

**Phil. 280. Philosophy of Science**

**Topics and Methods (1-2)**

This course meets weekly to discuss recent books or articles in philosophy of science. The reading is designed both for students doing active research in the field and for those seeking to gain some familiarity with it. Can be taken nine times for credit with changed content. **Prerequisite:** graduate standing or consent of instructor.

**Soc/G 234. Intellectual Foundation of the Study of Science, Technology, and Medicine (4)**

This course focuses on some classic methodological and theoretical resources upon which the sociology of science, technology, and medicine all draw. It gives special attention to relationships between knowledge and social order, and between knowledge and practice, that are common to science, technology, and medicine. **Prerequisites:** graduate standing.

**Soc/G 247. Madness and Society (4)**

An examination of the changing Western responses from the age of Bedlam to the age of Prozac. Topics include: the rise and decline of the total institution; the emergence of psychiatry; changing cultural meanings of madness; and the therapeutics of mental disorder. **Prerequisite:** graduate standing.

**Soc/G 249. Technology and the Human (4)**

This course explores the ethical and political implications of technological interventions into human life. Approaches from science studies, the sociology of the body, and philosophy. Topics include transformations in domains of life such as work, health, childhood, and death. **Prerequisite:** graduate standing.

**Soc/G 283. The Making of Modern Medicine (4)**

An examination of the intellectual, social, cultural, and political dimensions of the Transformation of Western medicine from 1750 to 1900, with a primary focus on Anglo-American developments. **Prerequisite:** graduate standing.

**Soc/G 284. Contemporary Biomedicine (4)**

Develops central themes in medical sociology in order to understand twentieth- and twenty-first-century medical practice and research. Topics include authority and expertise; health inequalities; managed care; health activism; biomedical knowledge production; and the construction of medical objects and subjects. **Prerequisite:** graduate standing.

**Soc/G 288. Knowledge Capitalism (4)**

This seminar examines the place of scientific knowledge and information and communication technology in the transformation of capitalist economy and society. The class explores new interactions between science studies and the social theory of advanced capitalism. **Prerequisite:** graduate standing.

# Science, Technology, and Public Affairs

---

OFFICE: Galbraith Hall, Room 180, Revelle College

The program offers an opportunity to study the important social policy issues that lie at the intersection of science, technology, and decision making and to develop awareness of the social and political factors that condition technology on the social order. The program will be attractive to students anticipating careers in law, administrative sciences, science, engineering, business, and international affairs. The program will serve as a meeting place for those interested in approaching policy questions from the perspective of the physical and biological sciences and for those in the social sciences having an interest in the scientific and technological component of present social, political, and environment problems.

## COURSES

---

*For course descriptions not found in the UC San Diego General Catalog, 2010–11, please contact the department for more information.*

### LOWER-DIVISION

#### **35. Society and the Sea (4)**

Introduction to the oceans and their relationship to humankind. Selected topics include ocean-related science, engineering, research, economics, and international relations (emphasizing countries of the Pacific Rim); living and nonliving resources; coastal zone management; military and social aspects; and the sea in weather and climate.

**Prerequisite:** none. (F)

### UPPER-DIVISION

#### **181. Essentials of Global Health (4)**

Illustrates and explores ecologic settings and frameworks for study and understanding of global health and international health policy. Students acquire understanding of diverse determinants and trends of disease in various settings and inter-relationships between socio-cultural-economic development and health. **Prerequisite:** upper-division standing. (W)

#### **199. Special Project (2 or 4)**

Directed study on topics in science, technology, and public affairs; especially for Warren College students. (P/NP grades only.) **Prerequisite:** senior standing.

### RELATED COURSES

## INTRODUCTION

Scripps Institution of Oceanography is one of the oldest, largest, and most important centers for marine science research, education, and public service in the world. Its preeminence in the marine sciences is reflective of its excellent programs, distinguished faculty and research scientists, and outstanding facilities. Scripps Institution was founded in 1903 as an independent biological research laboratory, which became an integral part of the University of California in 1912. At that time, the laboratory was given the Scripps name in recognition of donors Ellen Browning Scripps and E. W. Scripps. Research and education at Scripps encompasses physical, chemical, biological, geological, and geophysical studies of the oceans. Among the hundreds of research programs that may be under way at any one time are studies of air-sea interaction, climate prediction, earthquakes, the physiology of marine organisms, the geological history of the ocean basins, and multidisciplinary aspects of global change and the environment.

## THE UNDERGRADUATE PROGRAM

The Scripps Institution of Oceanography Department offers over forty-five undergraduate courses covering a wide breadth of earth and marine sciences on several different levels. There are several introductory classes for non-majors, and upper-division courses intended for a wide range of students in natural science majors. For students interested in careers in earth sciences, the Scripps Institution of Oceanography offers a B.S. degree and a contiguous B.S./M.S. degree in earth sciences. In addition, students may follow a chemistry/earth sciences major, a physics major with a specialization in earth sciences, or an environmental systems/earth sciences major (see the "Chemistry," "Physics," or "Environmental Systems" sections of the catalog for details). The program also offers an academic minor in earth sciences.

For students interested in broadening their understanding of and opportunity in marine science and oceanography, the program offers an academic minor in marine science. The marine science minor is designed to complement the strong disciplinary training of UC San Diego basic natural science and engineering majors (i.e., chemistry, physics, biological sciences, earth sciences, engineering, mathematics, etc.) by providing a broad interdisciplinary perspective with an applied environmental focus.

## EARTH SCIENCES MAJOR

Earth sciences encompass broad scientific study of the origin and evolution of the earth system and its life forms. The earth sciences major embraces a wide range of topics, including the physical and chemical evolution of the planet, the evolution of life, the causes of earthquakes and volcanic eruptions, earth-surface processes, the origin and behavior of oceans and atmosphere, and the impact of humans on the environment. Earth science investigations are increasingly quantitative and experimental, and thus most upper-division courses require a strong foundation in chemistry, physics, and mathematics.

The earth sciences curriculum takes advantage of the unique opportunities offered by Scripps Institution of Oceanography. Classes beyond introductory level are usually small, permitting personalized instruction. Field trips are an important part of the instructional program. Earth sciences students are encouraged to consult with their instructors about incorporating appropriate courses and research opportunities at the Scripps Institution of Oceanography into their undergraduate curriculum.

A degree in earth sciences is an appropriate start for a broad range of career and graduate school opportunities in various areas, including research, government, state and federal survey jobs, environmental management, the petroleum and mining industries, consulting, ocean sciences, industrial institutions, elementary or secondary education, environmental policy, or environmental law. Program advisors and faculty can provide additional information on career and graduate school opportunities.

There are three specializations, each with slightly different course requirements, in the earth sciences

major: The *Earth Sciences/Geology* major, *Earth Sciences/Geochemistry* major, and *Earth Sciences/Geophysics* major.

**It is strongly recommended that all earth science majors meet regularly with the earth sciences academic advising staff and a faculty advisor to discuss and update curriculum choices. The earth sciences academic staff are located in the Scripps office of Undergraduate Programs in Galbraith Hall, Room 188.**

Lower-division requirements are designed to provide the foundations in mathematics, physics, chemistry, and biology that are essential in modern quantitative earth science disciplines. In addition, there are four upper-division courses introducing basic concepts, SIO 100, SIO 102, SIO 103, and SIO 104. SIO 100 and SIO 102 should be taken during the sophomore year to provide the appropriate background for other upper-division courses.

A grade-point average of 2.0 or higher in the upper-division major program is required for graduation. Students must receive a grade of C- or better in any course to be counted toward fulfillment of the major requirements. In exceptional cases, students with a grade-point average in the major of 2.5 or greater may petition to have one grade of D accepted. All courses (lower- and upper-division) required for the major must be taken for a letter grade.

## Special Studies Courses

Special studies in the earth sciences are offered as the courses SIO 198 and SIO 199. These courses are subject to consent of the instructor and approval by the earth sciences faculty advisor. They are open to students who have accrued at least ninety quarter-units and have a GPA of at least 3.0. Two quarters of earth sciences special studies may be counted toward any earth sciences major.

## EARTH SCIENCES/GEOLOGY

The earth sciences/geology major is designed to allow students maximum flexibility in tailoring the curriculum to their interests, within the constraints of obtaining the necessary background in physical, biological, and earth sciences. Compared to the earth sciences/geochemistry and earth sciences/geophysics tracks, it requires more earth science and fewer non-earth science courses.

## Lower-Division Requirements

**Math. 20A-B-C (may allow Math. 10A-B-C by petition) and Math. 20D**

**Phys. 2A-B-C (may allow Phys. 1A-B-C by petition)**

**Chem. 6A-B-C**

**BILD 3**

**SIO 50**

## Upper-Division Requirements

### *Earth Sciences Upper-Division Core Requirements*

**SIO 100. Introduction to Field Methods**

**SIO 102. Introduction to Geochemistry**

**SIO 103. Introduction to Geophysics**

**SIO 104/255. Paleobiology and History of Life**

## Upper-Division Earth Science Requirements

SIO 105. Sedimentology and Stratigraphy  
 SIO 120. Mineralogy  
 SIO 152. Petrology and Petrography  
 SIO 160. Introduction to Tectonics  
 SIO 162. Structural Geology  
 SIO 182A. Environmental and Exploration Geophysics A  
 SIO 182B. Environmental and Exploration Geophysics B

## Upper-Division Restricted Electives, at least four courses from

Chem. 173. Atmospheric Chemistry  
 SIO 101. California Coastal Oceanography  
 SIO 110. Introduction to GIS and GPS for Scientists  
 SIO 111/Phys. 111. Introduction to Waves and Tides  
 SIO 112. Urban Landscapes  
 SIO 115. Ice and the Climate System  
 SIO 117. The Physical Basis of Global Warming  
 SIO 135/236. Satellite Remote Sensing  
 SIO 138. The Coral Reef Environment  
 SIO 141/Chem. 174. Chemical Principles of Marine Systems  
 SIO 144/252A. Introduction to Isotope Geochemistry  
 SIO 148/248. Evolution of Earth's Biosphere  
 SIO 154/254. Macroevolution  
 SIO 155/251. Petrology and Geochemistry of the Solid Earth  
 SIO 170. Introduction to Volcanology  
 SIO 186. Interactions Between Humans and the Natural Environment  
 SIO 195. Methods of Teaching Earth Sciences  
 SIO 197. Earth Science Internship  
 SIO 199. Independent Study  
 SIO 210. Physical Oceanography  
 SIO 226. Introduction to Marine Geophysics  
 SIO 240. Marine Geology  
 SIO 247. Rock Magnetism and Paleomagnetism  
 SIO 260. Marine Chemistry  
 SIO 280. Biological Oceanography

An example schedule is outlined below.

FALL	WINTER	SPRING
<b>Freshman Year</b>

	SIO Elect.	SIO 160

## EARTH SCIENCES/GEOCHEMISTRY MAJOR

This specialization focuses on the Earth as a chemical system and on its evolution. Emphasis is placed on the fundamental observations that allow geoscientists to understand better the past history

of the planet, the energetics of its evolution, and the major "cycles" (e.g., water, carbon) that characterize and control planetary-scale changes on a broad range of time scales. The major is appropriate for students interested in modern geochemistry, in "global change" studies, and in global and local environmental problems, including biochemical and anthropogenic effects.

## Lower-Division Requirements

Math. 20A-B-C-D  
 Phys. 2A-B-C (2D recommended)  
 Chem. 6A-B-C and Chem. 6BL  
 BILD 3  
 SIO 50

## Upper-Division Requirements

### Earth Sciences Upper-Division Core Requirements

SIO 100. Introduction to Field Methods  
 SIO 102. Introduction to Geochemistry

## EARTH SCIENCES/GEOPHYSICS MAJOR

This specialization focuses on the mechanical, dynamical, and thermodynamical aspects of the Earth. Emphasis is placed on a solid background of fundamental physics, from mechanics and electromagnetism to continuum- and quantum mechanics, and on the necessary mathematical skills. The major introduces basic techniques used to investigate the internal structure of the Earth, from seismology to the study of potential fields, and space geodesy. Elementary geodynamics, including the physics of simple convective systems, introductory rock mechanics, and plate kinematics are among topics introduced. At the same time, a "hands-on" exposure to field problems and techniques will be accessible through an applied geophysics sequence.

## Lower-Division Requirements

Math. 20A-B-C-D-E-F  
 Phys. 4A-B-C-D or Phys. 2A-B-C (Phys. 4 sequence recommended)  
 Chem. 6A-B-C  
 BILD 3  
 SIO 50

## Upper-Division Requirements

### Earth Sciences Upper-Division Core Requirements

SIO 100. Introduction to Field Methods  
 SIO 102. Introduction to Geochemistry  
 SIO 103. Introduction to Geophysics  
 SIO 104/255. Paleobiology and History of Life

### Upper-Division Earth Sciences Requirements

### HONORS PROGRAM

The Honors Program in Earth Sciences is offered for a limited number of students who have demonstrated excellence in the earth sciences major. Students are eligible for admission to the program when they have

Completed ninety units of courses including twelve units of earth sciences courses.

Achieved a GPA of 3.3 overall and 3.5 in earth science courses.

Submitted to the Earth Sciences Steering Committee, and had approved, an honors thesis research proposal.

Successful completion of the Honors Program requires

Maintenance of a GPA of 3.3 overall and 3.5 in earth sciences courses.

Completion, with a B grade or higher, of a minimum of eight units of SIO 196 related to the honors thesis research, distributed over at least two quarters. These units must be in addition to the ordinary major requirements. However, students who subsequently fail to complete the Honors Program may apply up to four of these 196 units to their major.

Acceptance of a written honors thesis report by a committee of not fewer than three faculty members.

Satisfactory presentation of an oral report on the thesis research, preferably at a public undergraduate research conference on campus, or at an earth sciences conference. Alternatively, the oral report may be given at a seminar involving honors students and at least three faculty members.

Students who successfully complete the Honors Program will graduate with "high distinction."

Students who are interested in the Honors Program should contact the program advisor in Galbraith Hall, Room 188, Revelle College.

(See Scripps Institution of Oceanography graduate program for information on the "Contiguous Bachelor's/Master's Earth Sciences Degree Program.")

### EARTH SCIENCES MINOR

A minor in earth sciences consists of twenty-eight units of earth sciences courses, at least twenty of which must be upper-division, focused on geology, geochemistry, or geophysics. Courses required by a student's major may not be applied toward a minor and neither can SIO 198 nor SIO 199. Courses for the minor may be taken on a Pass/Not Pass basis if the

student's college permits. Students interested in the earth sciences minor should meet with the earth sciences academic advising staff to discuss their curriculum choices.

### MARINE SCIENCE MINOR

The Scripps Institution of Oceanography offers an undergraduate minor program in marine science. The minor curriculum is designed to complement the strong disciplinary training of UCSD basic science majors by providing a broad interdisciplinary perspective with an environmental focus. Ocean-related science is relevant to many contemporary environmental issues and problems and central to understanding earth-system evolution, dynamics, climate, and sustainability. The minor consists of courses and research opportunities offered primarily through faculty and researchers at Scripps. The mix of these components can be tailored to reflect students' career interests through an "all courses" track or a "research" track. The "all courses" track offers a very flexible curriculum that serves students with a broad range of educational and career interests including environmental management and regulation, teaching, environmental law, economics and policy and a wide variety of graduate programs. The "research" track is designed for students interested in an undergraduate research experience at Scripps and serves as excellent preparation for graduate research studies.

The minor consists of twenty-eight units of course work, at least twenty of which must be upper-division. Courses required by a student's major may not be applied toward the minor. Up to two courses for the minor may be taken on a Pass/Not Pass basis (upper- or lower-division). Students must earn at least a letter grade of C- in the remaining five or more courses used for the minor. The marine science minor places a strong emphasis on a rigorous natural science foundation; thus, several of the upper-division courses related to the minor have significant prerequisites. Students planning the minor should check catalog course descriptions carefully and should meet with advising staff in the Scripps Institution of Oceanography Office of Undergraduate Programs, Galbraith Hall, Room 188.

### Lower-Division Requirements

#### SIO 30. The Oceans

Any one of the following lower-division courses may be applied to the minor requirements

#### STPA 35. Society and the Sea

#### SIO 10. The Earth

#### SIO 12. History of the Earth and Evolution

#### SIO 20. The Atmosphere

#### SIO 35. Water

#### SIO 40. Life and Climate on Earth

#### SIO 50. Introduction to Earth and Environmental Sciences

Additionally, any math, chemistry, physics, or biology course that is a prerequisite for an upper-division elective for the marine science minor (ex., Math. 20 series; Chem. 6A, 6B, 6C; Phys. 2 series; BILD 1, 2, 3) may be applied, by petition, as a lower-division requirement for the minor's major.

## Upper-Division Requirements

### Option 1—All Courses Track

At least five courses from the list (below) of upper-division electives

### Option 2—Research Track

At least five courses from the list (below) of upper-division electives, at least three of which must be courses satisfying Option #1 and at least two of which must be Independent Study (SIO 199; eight units total) Note: The Independent Study must be designed in mutual agreement and arrangement with an SIO faculty member. Students interested in the marine science minor "Research Track" must meet with a Scripps Undergraduate Program advisor for information and policies.

### Upper-Division Electives

- SIO 101. California Coastal Oceanography
- SIO 102. Introduction to Geochemistry
- SIO 103. Introduction to Geophysics
- SIO 104/255. Paleobiology and History of Life
- SIO 105. Sedimentology and Stratigraphy
- SIO 110. Introduction to GIS and GPS for Scientists
- SIO 111/Phys. 111. Introduction to Ocean Waves and Tides
- SIO 115. Ice and the Climate System
- SIO 117. The Physical Basis of Global Warming
- SIO 138. The Coral Reef Environment
- BIMM 126. Marine Microbiology
- BIMM 127/SIO 288. Marine Microbiology Lab
- BIEB 132. Introduction to Marine Biology
- BIBC 130/SIO 281. Marine Biochemistry
- BIEB 134. Introduction to Biological Oceanography
- SIO 135/236. Satellite Remote Sensing
- SIO 141/ Chem. 174. Chemical Principles of Marine Systems
- SIO 148/248. Evolution of Earth's Biosphere
- SIO 154/254. Macroevolution
- SIO 160. Introduction to Tectonics
- SIO 180/292. Communicating Science to Informal Audiences
- SIO 198. Directed Group Study
- SIO 199. Independent Study
- ECE 156/MAE 149/SIO 238. Sensor Networks
- SIO 201. Geologic Record of Climate Change
- SIO 210. Physical Oceanography
- SIO 260. Marine Chemistry
- SIO 265. Chemical Ecology of Marine Organisms

Other SIO courses may be submitted by petition.

### STUDY ABROAD

Study abroad through the Education Abroad Program (<http://programsabroad.ucsd.edu>) or Opportunities Abroad Program can enhance a student's major, particularly as an opportunity for diverse field experiences. However, careful planning is important to meet all major requirements. Please contact the Scripps Office of Undergraduate Programs as early as possible if you are an earth sciences major and planning to study abroad.

## CAREERS IN EDUCATION

Students interested in a teaching career should be aware that the earth sciences major, because of its broad course requirements in the sciences, fulfills many of the subject requirements for obtaining a California Teaching Credential through UCSD's Educational Studies Program. The projected high demand over the next decade for well-trained teachers, particularly in the sciences, makes this an attractive option for many students. Students who wish to take advantage of this opportunity may wish to complete a minor in science education. Please contact the Education Studies office directly for further details

## THE GRADUATE PROGRAM

GRADUATE EDUCATION OFFICE:  
Old Scripps Building 22, Scripps Institution of Oceanography  
<http://scrippseducation.ucsd.edu/>

The Department of Scripps Institution of Oceanography offers instruction leading to Ph.D. degrees in oceanography, marine biology, and earth sciences. Although students are not admitted specifically for an M.S. degree, it is possible to obtain an M.S. on the way to completing the Ph.D. degree. The Department of Scripps Institution of Oceanography is organized into three academic programs: Climate-Ocean-Atmosphere Program (COAP), Geosciences of the Earth, Oceans, and Planets (GEO), and Ocean Biosciences Program (OBP).

Each of these programs is responsible for all graduate educational activities in its area, including teaching, advising, and examining. The academic programs are umbrellas for curricular groups as follows.

### Climate-Ocean-Atmosphere Program (COAP)

- Applied Ocean Science (AOS)
- Climate Sciences (CS)
- Physical Oceanography (PO)

### Geosciences of the Earth, Oceans, and Planets (GEO)

- Geophysics (GP)
- Geosciences (GS)
- Marine Chemistry and Geochemistry (MCG)

### Ocean Biosciences Program (OBP)

- Biological Oceanography (BO)
- Marine Biology (MB)

### Climate-Ocean-Atmosphere Program (COAP)

**Applied Ocean Science** is a multidisciplinary program focused on the application of advanced technology to ocean exploration and observation. AOS students perform research in marine acoustics, optics, electromagnetics, geophysics, ecology, sediment transport, coastal processes, physical oceanography, and air-sea interaction. The emphasis is on the resolution of key scientific issues through novel technological development. The science focus of the

Scripps AOS program is complemented by parallel Applied Ocean Science programs in the Mechanical and Aerospace Engineering (MAE) and Electrical and Computer Engineering (ECE) departments. Students have access to professors, courses, and research facilities across all three departments.

**Climate Sciences** concerns the study of the climate system of the earth with emphasis on the physical, dynamical, and chemical interactions of the atmosphere, ocean, land, ice, and the terrestrial and marine biospheres. The program encompasses changes on seasonal to interannual time scales and those induced by human activities, as well as paleoclimatic changes on time scales from centuries to millions of years. Examples of current research activities include: interannual climate variability; physics and dynamics of El Niño; studies of present and future changes in the chemical composition of the atmosphere in relation to global warming and ozone depletion; effects of cloud and cloud feedbacks in the climate system; paleoclimate reconstructions from ice cores, banded corals, tree-rings, and deep-sea sediments; the origin of ice ages; air-sea interactions; climate theory; terrestrial and marine ecosystem response to global change.

**Physical Oceanography** is the field of study that deals with mechanisms of energy transfer through the sea and across its boundaries, and with the physical interactions of the sea with its surroundings, especially including the influence of the seas on the climate of the atmosphere. Research activities within this curricular group are both observational and theoretical and include: study of the general circulation of the oceans, including the relations of ocean currents to driving forces and constraints of the ocean basins; fluctuations of currents, and the transport of properties; the mechanisms of transport of energy, momentum, and physical substances within the sea and across its boundaries; properties of wind waves, internal waves, tsunami, and planetary waves; the thermodynamic description of the sea as a system not in equilibrium; optical and acoustic properties of the sea; and the influence of surf on near-shore currents and the transport of sediments.

### Geosciences of the Earth, Oceans and Planets (GEO)

**Geophysics** emphasizes the application of general principles of mathematics and experimental physics to fundamental problems of the oceans, the oceanic and continental lithosphere, the cryosphere, and the crust and deep interior of the Earth. Research interests of the group include: observational and theoretical studies of electric and magnetic fields in the oceans and on the land; paleomagnetism; theoretical seismology with special emphasis on the structure of the Earth from free-oscillation and body wave studies; broadband observational seismology, including ocean bottom and multichannel seismology; earthquake source mechanisms; the measurements of slow crustal deformations using satellite and observatory methods on continents and in the oceans; marine geodynamics and tectonophysics; gravity measurements; geophysical inverse theory; observations of the ice sheets; magnetohydrodynamics of the core of the Earth; geophysical instrumentation for oceanic and

continental geophysical measurements; acoustic propagation in the oceans.

**Geosciences** emphasizes the application of general principles of geology, geochemistry, and geophysics to problems in the marine and terrestrial environments of the Earth. Graduate students routinely participate in expeditions at sea and on land and many doctoral theses evolve from these experiences.

Research areas in the geological sciences include: the origin and evolution of the ocean-atmosphere system and global climate; geology, geochemistry, and geophysics of oceanic crustal rocks and near-shore environments; tectonic and structural evolution of the oceans, plate margins, and back-arc basins; the role of fluids in the crust; chemistry of rare gases in active volcanoes; the use of natural nuclear processes for understanding physical and chemical processes in the Earth; paleomagnetic applications in geology and geophysics.

**Marine Chemistry and Geochemistry** concerns chemical and geochemical processes operating in a broad range of study areas: the oceans, the solid earth, the atmosphere, marine organisms, polar ice sheets, lakes, meteorites, and the solar system.

Areas of advanced study and research include the physical and inorganic chemistry of seawater; ocean circulation and mixing based on chemical and isotopic tracers; marine organic and natural products chemistry; marine bioinorganic chemistry; geochemical interactions of sediments with seawater and interstitial waters; geochemistries of volcanic and geothermal phenomena; chemical exchanges between the ocean and the atmosphere; geochemical cycles of carbon, oxygen, sulfur, nitrogen, and other elements; isotopic geochemistry of the solid earth and meteorites; atmospheric trace gas chemistry; paleoatmospheric composition recorded in polar ice cores, corals and sediments; and chemistry of lakes and other freshwater systems.

Studies are typically interdisciplinary and involve integration of chemical concepts with information about the physical, biological, or geological processes that influence natural systems. Students in the marine chemistry and geochemistry curricular group are encouraged to explore these links.

### Ocean Biosciences Program (OBP)

**Biological Oceanography** is concerned with the interactions of populations of marine organisms with one another and with their physical and chemical environment. Because these interactions are frequently complex, and because the concepts and techniques used are drawn from many fields, biological oceanography is, of necessity, interdisciplinary. Therefore, studies in physical oceanography, marine chemistry, marine geology, and several biological areas are pertinent.

Research is conducted on space/time scales ranging from short-term interactions between individual organisms (mm., sec.) to interdecadal variation in widely dispersed populations. The techniques used in these investigations are diverse, and can include field observation and manipulations, experimentation in the laboratory, and mathematical modeling.

Research topics include primary and secondary productivity and nutrient regeneration, fishery biology and management, community ecology of

benthic and pelagic organisms, population dynamics, habitat changes and disruptions, systematics and biogeography, population genetics and evolution, and behavior as it affects distribution. Development and testing of new tools (molecular, optical, acoustic), design of sampling programs, and statistical/mathematical analyses of data also are significant activities.

**Marine Biology** is the study of marine organisms. It is concerned with evolutionary, organismic, genetic, genomic, physiological, and biochemical processes in these organisms, and the relationship between them and their biotic and physical environment. Marine biology encompasses several major areas of modern biology, and is interpreted by understanding the physical and chemical dynamics of the oceans. Faculty research focuses on microbiology, photobiology, invertebrate biology, vertebrate biology, high pressure biology, deep-sea biology, developmental biology, genetics, comparative biochemistry, eco-toxicology, physiology, behavior, ecology, biogeography, taxonomy, and evolution. Processes ranging from coral larvae recruitment to the role of bacteria in marine food web dynamics are under study in over twenty independent research laboratories.

### REQUIREMENTS FOR ADMISSION

Candidates for admission should have a bachelor's or master's degree in one of the physical, biological, or earth sciences; degrees in mathematics or engineering science are also accepted. A scholastic average of B or better in upper-division courses, or prior graduate study, is required. The student's preparation should include

mathematics through differential and integral calculus

physics, one year with laboratory (the course should stress the fundamentals of mechanics, electricity, magnetism, optics, and thermodynamics, and should use calculus in its exposition)

chemistry, one year with laboratory  
an additional year of physics, chemistry, or mathematics

All applicants are required to submit scores from the general test of the Graduate Record Examinations (GRE) given by the Educational Testing Service of Princeton, New Jersey. Applicants to the Ocean Biosciences Program, additionally, should take one GRE subject test of their own choice.

All international applicants whose native language is not English and whose undergraduate education was conducted in a language other than English must take the TOEFL and submit their test scores to the UC San Diego Office of Graduate Admissions.

Specific additional requirements for admission to the programs are as follows.

### Climate-Ocean-Atmosphere Program (COAP)

**Applied Ocean Science**—Students are admissible with a strong background in physical science, engineering science, or mathematics. Three years of physics or applicable engineering and three years of mathematics at college level are expected.

**Climate Sciences**—Students are admissible if they satisfy the requirements of the physical oceanography, geophysics, or marine chemistry and geochemistry curricular programs. Biology and geology majors may also be admissible if the Scripps faculty feel that they have a sufficiently strong background in mathematics and physical science.

**Physical Oceanography**—A major in a physical science, including three years of physics and mathematics, is required.

### Geosciences of the Earth, Oceans, and Planets (GEO)

**Geophysics**—A major in physics, mathematics, earth sciences, or equivalent training, is required.

**Geosciences**—A major in one of the earth sciences and undergraduate physical chemistry and calculus are required. Preparation beyond the minimum requirements in mathematics, physics, and chemistry is strongly recommended.

**Marine Chemistry and Geochemistry**—A major in chemistry, geology, biochemistry, or related field, is required.

### Ocean Biosciences Program (OBP)

**Biological Oceanography**—Two years of chemistry, including general and organic chemistry, and a year of general biology are required. Physical chemistry requiring calculus may be substituted for physics requiring calculus where a more elementary physics course was taken. Zoology or botany may be substituted for general biology. Preparation should also include a course in general geology and at least one course in each of the following categories: systematics (e.g., invertebrate zoology), population biology (e.g., ecology), functional biology (e.g., physiology). In special cases, other advanced courses in mathematics or natural sciences may be substituted.

**Marine Biology**—A major in one of the biological sciences (or equivalent), with basic course work in botany, microbiology, or zoology; two years of chemistry, including organic chemistry, is required. Training in one or more of the following areas is strongly recommended: cellular biology, molecular biology, comparative physiology, genetics, developmental biology, ecology, evolutionary biology, vertebrate and invertebrate zoology, microbiology, and/or botany. Biochemistry and physical chemistry will be expected of students in experimental biology, although the student may, if necessary, enroll in these courses at UCSD after admission.

Special consideration occasionally can be given to candidates with outstanding records who do not meet all required preadmission criteria.

### PROGRAMS OF STUDY

Programs of study vary widely among the curricular groups, but generally first-year students are expected to enroll in core courses that cover physical, geological, chemical, and biological oceanography. Each first-year student is assigned a guidance committee consisting of three faculty members. The guidance committee is charged with advising the student during the first year, until the departmental exam. The intention is to provide individualized guidance to students particularly

including advice about courses of study that may reach beyond a single curricular group.

By the end of the first year, students usually select a particular area of focus and choose an advisor. As students advance beyond the first year, they begin to function effectively as research assistants or, in some cases, as teaching assistants. During their third to fifth year they are working toward writing their dissertations.

Programs of study for the first year vary between the three programs.

### **Climate-Ocean-Atmosphere Program**

Students admitted to COAP choose a curricular group by the end of the fall quarter. This choice is aided by the student's guidance committee, which includes a Curriculum Advisor from one of the COAP curricular groups. The guidance committee will help to arrange an individually tailored set of first-year courses for the student, and to ensure that the student has taken all necessary courses to prepare for the departmental exam. During the year, students may be supported in a variety of ways, but by the end of the spring quarter students must choose a research advisor. After the first year the guidance committee is dissolved, and the research advisor and dissertation committee provide guidance.

**Applied Ocean Science**—The AOS academic program is designed to provide both a broad background and a core technical base to support the diverse interests and activities of the students. Early participation in an ongoing research project is encouraged. However, specialization and focus on a specific thesis topic is not required until the second or third year of the program. Required courses include SIO 214A Introduction to Fluid Mechanics, and the two-quarter Wave Physics sequence SIO 202A–B. Two of the four SIO introductory courses (SIO 210, 240, 260, 280), must be completed during the first year, with the remaining two required prior to passing the doctoral qualifying exam at the end of the third year. In addition, the applied math sequence SIO 203 A–B or MAE 294 A–B is taken in either the first or second year of study. The AOS Seminar (SIO 208) serves as a communications bridge across the program; enrollment in this seminar is required during the student's entire period of study. Beyond these core classes, the majority of each student's academic program is tailored to individual interests. The AOS departmental examination, held at the end of the first year, is based on the core technical courses SIO 214A, SIO 202A–B, and two of the four introductory courses (chosen by the student). The exam has both oral and written components.

**Climate Sciences**—The emphasis of this curricular group is on education through interdisciplinary research. All students are responsible for the fundamental material in the following "core" courses: SIO 210, 217A–B–C, 260. Students are also expected to supplement their backgrounds with five to seven additional courses, including, for most Climate Sciences students, at least one additional quarter of fluid dynamics. These additional course(s) will be chosen in consultation with the students' advisors. It is recommended that students participate actively in at least two quarters of seminar courses designed to complement and stimulate individual research. Though the group stresses interactions across

disciplines, students will specialize in a particular subdiscipline or track that will be chosen by the student following discussions with a three-person faculty advisory committee soon after arrival. Examples of current tracks include: (1) atmospheric/ocean/climate dynamics and physics; (2) atmospheric chemistry (emphasizing climatic interactions); and (3) paleoclimate studies. Additional course requirements for these tracks will be tailored to the needs of the individual student.

**Physical Oceanography**—The physical oceanography curriculum combines a comprehensive program of course work with individually tailored specialization to meet student needs. Presently defined "tracks" in the curriculum are (i) Observational Physical Oceanography, (ii) Theoretical Physical Oceanography, and (iii) the Atmospheric/Ocean Climate System. All tracks are similar in the entry-year fall quarter, diverging as students become more familiar with the field and in their interests. A faculty Curriculum Advisory Committee meets with students to tailor tracks to individual needs, or to create new tracks as appropriate. Students in all subdisciplines of physical oceanography are required to take SIO 203A–B, 214A, 212A. In any track, students are required to take sixteen four-unit graduate courses, of which twelve are covered during the first year. As part of the overall requirement, tracks include a breadth component of two or more four-unit courses in other scientific disciplines. These might come from the SIO core courses in other oceanographic disciplines (SIO 240, 260, 280) or from related graduate-level courses taught at UCSD.

Any exception to the policy above requires written approval by the department chair in consultation with the curriculum advisor.

Physical oceanography students are required to take the departmental examination after completing one year of graduate work at UCSD. The examination covers the material in the four required courses and in eight additional first-year graduate courses chosen by the student in consultation with the curriculum advisor.

The Department of Scripps Institution of Oceanography offers regular seminars in several areas of current interest. After the departmental exam, students in residence are strongly encouraged to enroll for credit in at least one one-unit seminar each quarter.

### **Geosciences of the Earth, Oceans, and Planets**

Students admitted to GEO are assigned an advisor, who is a member of the three-person guidance committee. Based on the student's interests and the major affiliation of the advisor, students are assigned to a curricular group on admission. Although students may change curricular groups in the course of the year, they must choose which departmental exam they will take. Departmental exams have similar structures among the curricular groups within GEO (a written exam at the end of spring quarter and an oral exam before the beginning of fall quarter). The material covered is quite different so students must begin preparing for the particular exam from the start. Student support for the first year comes from a variety of sources including departmental fellowships and research grants. Students are

encouraged to begin a research project from the beginning and typically do not hold teaching assistant positions during their first year. Students may change advisors during their first year, and they must find an advisor by the end of the first year.

**Geophysics**—There is no single course of study appropriate to the geophysics curriculum; instead, the individual interests of the student will permit, in consultation with the first-year guidance committee, a choice of course work in seismology, geomagnetism, etc. The content of certain core courses usually taken during the first year (SIO 223A,B, SIO 225, SIO 227A, SIO 229, SIO 234) forms the basis for the written departmental examination. Students are also encouraged to participate in the Special Topics seminars (SIO 239).

**Geosciences**—The geosciences curriculum consists of a series of core courses and a series of research focus courses. All students whether pursuing an earth sciences or an oceanography degree are responsible for material in the core courses: Marine Geology (SIO 240), Marine Chemistry (SIO 260), and Physical Oceanography (SIO 210) during their first year of study. The research courses are selected from three themes: geochemistry, paleoclimate and Earth history, and geology and geophysics. A total of four research courses are required during the first year of study, with at least one from each theme. Additional courses offered by other curricular programs (e.g., geophysics, marine chemistry, and geochemistry) can be selected and scheduled depending on the student's background and interests any time during the student's career at SIO. Each student is also encouraged to participate in the Special Topics seminars (SIO 249) every quarter during the first two years of graduate study. Students wishing to graduate with an oceanography degree are also responsible for the material in SIO 280 (Biological Oceanography).

**Marine Chemistry and Geochemistry**—In their first year at SIO, students in this curricular group are required to take SIO 210, 260, and either SIO 280 or SIO 240, as well as three additional elective courses. In their second year, students are required to take a further three elective courses. Although the exact choice of such courses will depend on the student's research interests, these required electives must be four-unit courses that are offered at the graduate level, and that have been approved by the curricular group as suitable electives. A list of approved courses is on file at the Department of Scripps Institution of Oceanography. If a student desires to take (as a required elective) a course that is not already on this list, he or she should consult with one of the curricular group advisors to get approval.

### **Ocean Biosciences Program**

Students admitted to OBP are assigned an advisor, who is a member of the three-person guidance committee. Students are assigned to a curricular group based on their interests. Although students may change curricular groups near the beginning of the year, they must commit to a curricular group early on because this determines which departmental exam they will take. The BO departmental exam is an oral exam based on first year course work while the MB exam is a written report and an oral presentation based on first year research; both are

administered after or near the end of Spring Quarter. During the year, students may be supported in a variety of ways. After the first year, the guidance committee is dissolved and the research advisor, and eventually the dissertation committee, provide guidance.

**Biological Oceanography**—The student will be expected to be familiar with the material presented in the following courses: SIO 210, 240, 260, 270 or 270A, 275A or 277, 280, and at least one of SIO 271, 282, or 294. Other course work ordinarily will be recommended by the student's advisory committee, usually including SIO 278 (or equivalent participatory seminar) one quarter of each year, a course in introductory parametric statistics, and at least one advanced-level course in physical, chemical, or geological oceanography. Participation in an oceanographic cruise (minimum of two weeks' duration) and service as a teaching assistant (one quarter) are required.

**Marine Biology**—Marine Biology graduate students are expected to gain research experience in one or more laboratories during their first year. In the spring term of their first year at SIO, students will take a departmental exam consisting of a presentation of their first-year research in the form of a paper and short talk to the curricular group, followed by a meeting with their first-year advisory committee. In this exam they also will be expected to demonstrate competence in the material covered in the following courses: SIO 210, 260, 280, 290A-B as well as any other course work recommended by the advisory committee. After their first year students are expected to enroll and actively participate in at least one seminar course (SIO 278, 296, or equivalent) per year that will provide in-depth knowledge and reading in selected areas, as well as practice presenting scientific material. In addition to the seminar requirement discussed above, second-year students will present their research in a special Marine Biology mini-symposium, held in spring quarter; students in the third year and beyond are expected to participate in the research presentation class (SIO 291) each year. Marine Biology students provide annual spring quarter oral or poster presentations of their research through their fifth year.

For the [Marine Biodiversity and Conservation M.A.S. program](#), refer to the separate *UC San Diego General Catalog* listing.

## LANGUAGE REQUIREMENTS

The department has no formal language requirements. All students must be proficient in English.

## QUALIFYING EXAMINATIONS

When the student has passed the departmental examination (described above under each academic program) and has completed an appropriate period of additional study, the department will recommend appointment of a doctoral committee that will supervise the student's performance and reporting of his or her research. The doctoral committee must be formed before the student may proceed to the qualifying examination

The doctoral committee will determine the student's qualifications for independent research by means of a qualifying examination, which will

be administered no later than the end of the third year. The nature of the qualifying examination varies between curricular groups. In biological oceanography, marine biology, geosciences, physical oceanography, applied ocean science, and climate sciences the student will be expected to describe his or her proposed thesis research and satisfy the committee, in an oral examination, as to mastery of this and related topics. In marine chemistry and geochemistry the student, in an oral examination, is required to present and defend a single research proposition in his or her specialized area. The student also is required to provide a written summary of the research proposition, with references, prior to the examination. In geophysics, the student presents an original research problem, in the form of a written proposition, to the doctoral committee. The student's oral presentation and defense of this proposition completes the examination.

## DISSERTATION

A requirement for the Ph.D. degree is the submission of a dissertation and a final examination in which the thesis is publicly defended. Students are encouraged to publish appropriate parts of their theses in the scientific literature. Individual chapters may be published as research articles prior to completion of the dissertation.

## DEPARTMENTAL PH.D. TIME LIMIT POLICIES

Students must complete a qualifying examination by the end of three years, and must be advanced to candidacy for the Ph.D. Degree by the end of four years. Total university support may not exceed seven years and total registered time at UCSD may not exceed eight years.

## SPECIAL FINANCIAL ASSISTANCE AND FELLOWSHIPS

In addition to teaching assistantships, and graduate student researcher positions, fellowships, traineeships, and other awards available on a campus-wide competitive basis, the department has available a certain number of fellowships and graduate student researcher positions supported from research grants and contracts, or from industrial contributions.

## CONCURRENT PH.D./ M.B.A. PROGRAM

The Department of Scripps Institution of Oceanography offers a concurrent degree program allowing interested Ph.D. students to complete an M.B.A. at the Rady School of Management. Students who are admitted to Scripps may, with the consent of their academic advisor, apply to Rady, through the usual admissions process, to begin the M.B.A. program no earlier than after the completion of their departmental exam, and no later than the fall quarter following their advancement to candidacy, in line with specific plans developed with their Scripps faculty advisors. An extensive independent study, jointly supervised by Scripps and Rady faculty, enables the student to develop linkages between Scripps and Rady studies. Interested students are encouraged to consult early with Rady

M.B.A. Admissions and with their Scripps academic advisors.

## CONTIGUOUS BACHELOR'S/MASTER'S EARTH SCIENCES DEGREE PROGRAM

The program leading to a bachelor of science and a master of science degree in earth sciences is offered to undergraduate students who are enrolled in the earth sciences major, and to qualified students who are completing a specialization or minor in earth sciences. It is open only to UCSD undergraduates, and entails participation in research in an area of the earth sciences to be determined jointly by the student and a committee of earth sciences faculty members from the Scripps Institution of Oceanography Department. Applications will only be accepted during the final quarter of the applicant's junior year, or the first or second quarter of the senior year. A minimum undergraduate GPA of 3.0 overall and 3.3 in upper-division earth sciences courses is required for admission. Applications must include a written statement of purpose, a summary of the research proposal, and a letter of support from the potential M.S. thesis advisor. Students must complete requirements for the B.S. degree before they are enrolled in the M.S. program, and are expected to meet the requirements for the M.S. degree within three consecutive academic quarters after obtaining the B.S. Students may be dropped from the program if breaks in enrollment occur. The Scripps Institution of Oceanography Department does not have financial aid available for students enrolled in the contiguous B.S./M.S. program. Please contact the undergraduate education program office in Galbraith Hall, room 188, for information.

## COURSES

*For course descriptions not found in the UC San Diego General Catalog, 2010–11, please contact the department for more information.*

## LOWER-DIVISION

### 1. The Planets (4)

Space exploration has revealed an astonishing diversity among the planets and moons in our solar system. The planets and their histories will be compared to gain insight and a new perspective on planet Earth. **Prerequisite:** none. (W)

### 10. The Earth (4)

An introduction to structure of the Earth and the processes that form and modify it. Emphasizes material which is useful for understanding geological events as reported in the news and for making intelligent decisions regarding the future of our environment. **Prerequisite:** none. (W)

### 12. History of the Earth and Evolution (4)

Evolution of the Earth from its origin in the early solar system to formation of continents and ocean basins, and how the planet became habitable. It examines the geologic record of evolution, extinction, plate tectonics, and climate changes through time. **Prerequisite:** none. (S)

### 15. Natural Disasters (4)

Introduction to environmental perils and their impact on everyday life. Geological and meteorological processes, including earthquakes, volcanic activity, large storms, global climate change, mass extinctions throughout Earth's history, and human activity that causes and prevents natural disasters. **Prerequisite:** none. (F)

## 16. Geology of the National Parks (4)

An introduction to fundamental concepts of geology and environmental science through the lens of the national park system. Topics covered include the geologic time scale; plate tectonics; igneous, metamorphic, and sedimentary processes; geomorphology; climate change; and environmental degradation. **Prerequisite:** none. (S)

## 20. The Atmosphere (4)

Descriptive introduction to meteorology and climate studies. Topics include global and wind and precipitation patterns, weather forecasting, present climate and past climate changes (including droughts, El Niño events), "greenhouse" gas effects, ozone destruction, the "little ice age," acid rain. **Prerequisite:** none. (W)

## 25. Climate Change and Society (4)

Climate change is one of the most complex and critical issues affecting societies today. This course will present the scientific evidence for climate change and its impacts and consider governmental policy responses and possible adaptation strategies. **Prerequisite:** none. (W)

## 30. The Oceans (4)

Presents modern ideas and descriptions of the physical, chemical, biological, and geological aspects of oceanography, and considers the interactions between these aspects. Intended for students interested in the oceans, but who do not necessarily intend to become professional scientists. **Prerequisite:** none. (F)

## 35. Water (4)

This course will examine the properties of water that make it unique and vital to living things. Origin of water on Earth and neighboring planets will be explored. Socially relevant issues concerning water use and contamination will be covered. **Prerequisite:** none. (S)

## 40. Life and Climate on Earth (4)

Explores life on Earth and its relationship to the environment—past, present, and future. Topics include origins of life, earth history, elemental cycles, global climate variability and human impacts on our environment. **Prerequisite:** none. (F)

## 50. Introduction to Earth and Environmental Sciences (6)

This course is an introduction to how our planet works, focusing on the formation and evolution of the solid earth, and the processes affecting both its surface and interior. Laboratories and substantial field component complement and extend the lecture material. Program and/or material fee may apply. **Prerequisite:** none. (F)

## 87. Freshman Seminar (1)

The freshman seminar program is designed to provide the new students with the opportunity to explore and intellectual topic with a faculty member in a small setting. Topics vary from quarter to quarter. Enrollment is limited to fifteen to twenty students, with preference given to entering freshmen. (P/NP grades only). (F,W,S)

## 90. Undergraduate Seminar (1)

Provides an introduction to earth sciences. Faculty members from departments in natural sciences, geosciences, and marine sciences will offer perspectives in these areas. Formerly ERTH 90. (Students may earn up to three units of credit of SIO 90 and/or ERTH 90.) **Prerequisite:** none.

## 96. Frontiers in the Earth Sciences (2)

An introduction to current research in the earth sciences. Background in science not required, but may be useful for some topics. Areas covered vary from year to year. **Prerequisite:** none.

## 99. Independent Study (2 or 4)

Independent reading or research on a problem by special arrangement with a faculty member. **Prerequisite:** lower-division standing, completion of thirty units of UCSD undergraduate study, a minimum UCSD G.P.A. of 3.0, and a completed and approved Special Studies form, UCSD Application for Enrollment Special Studies Courses 97, 98, 99.

## UPPER-DIVISION

### 100. Introduction to Field Methods (4)

Mapping and interpretation of geologic units. Field work is done locally and the data are analyzed in the laboratory. There will be one mandatory weekend field trip to Anza Borrego State Park. Program and/or material fee may apply. **Prerequisite:** SIO 50 or consent of instructor. (F)

### 101. California Coastal Oceanography (4)

This course emphasizes oceanographic connections between physical and climate forcing and marine ecosystem responses using examples from and activities in the California coastal environment. The approach is inquiry-based, combining classroom and experiential learning to build critical and quantitative thinking and research insights and abilities. **Prerequisite:** Chem. 6A or consent of instructor. (F)

### 102. Introduction to Geochemistry (4)

An introduction to the chemical composition and evolution of the Earth and solar system. Applications of chemical methods to elucidate the origin and geologic history of the Earth and the planets, evolution of oceans and atmosphere, and human environmental impacts. **Prerequisites:** SIO 50, Chem. 6A-B-C, or consent of instructor. (W)

### 103. Introduction to Geophysics (4)

An introduction to the structure and composition of the solid earth. Topics include seismology, the gravity and magnetic fields, high-pressure geophysics, and concepts in geodynamics. Emphasis is on global geophysics, i.e., on the structure and evolution of the planet. **Prerequisites:** Math. 20A-B-C-D and Phys. 2A-B-C, SIO 50, or consent of instructor. SIO 160 recommended. (F)

### 104/255. Paleobiology and History of Life (6)

An introduction to the major biological transitions in Earth history from the origins of metabolism and cells to the evolution of complex societies. The nature and limitations of the fossil record, patterns of adaptation and diversity, and the tempo and mode of biological evolution. Laboratories and substantial field component complement and extend the lecture material. Program and/or material fee may apply. **Prerequisites:** Undergraduate: BILD 3 or consent of instructor. Graduate: graduate-level standing or consent of instructor. Graduate students, additionally, will give oral presentation or research paper. (W)

### 105. Sedimentology and Stratigraphy (4)

This course will examine sedimentary environments from mountain tops to the deep sea across a variety of time scales. The focus is to develop the skills to interpret stratigraphy and read the history of the Earth that it records. Laboratories and substantial field component complement and extend lecture material. Program and/or course material fee may apply. **Prerequisite:** SIO 50 or consent of instructor. (S)

### 110. Introduction to GIS and GPS for Scientists (4)

A hands-on introduction to science applications of geographic information systems and global positioning system. Students acquire data through GPS field surveys, design and construct GIS using ESRI's ArcGIS software, analyze spatial data, and present the results in a Web-based environment. **Prerequisite:** upper-division standing or consent of instructor. (W)

### 111/Phys. 111. Introduction to Ocean Waves and Tides (4)

This course will cover a broad range of physical oceanography topics including: linear dynamics of surface gravity waves, dispersion relations, spectral descriptions, group velocity, shoaling waves, ray theory, edge waves, Coriolis force, the tide generating force, LaPlace's tide equations, Kelvin waves. **Prerequisites:** Math. 20A-E and Phys. 2A-C or consent of instructor. (W)

### 112. Urban Landscapes (4)

Introduction to scientific principles, such as conservation of mass and energy and pattern formation, that govern the development of urban centers as complex systems. Contrasts between natural and urban landscapes will be highlighted, with examples including water routing and disease transmission. **Prerequisite:** upper-division standing or consent of instructor. (S)

### 115. Ice and the Climate System (4)

This course examines the Earth's cryosphere, including glaciers, ice sheets, ice caps, sea ice, lake ice, river ice, snow, and permafrost. We cover the important role of the cryosphere in the climate systems and its response to climate change. **Prerequisite:** Math 20A-D and Physics 2A-C or consent of instructor. (F)

### 117. The Physical Basis of Global Warming (4)

Introduction to the processes behind global warming, including the physics of the greenhouse effect, controls on greenhouse gases, atmospheric and oceanic circulation, climate feedbacks, relationships to natural climate variability, and global environmental issues related to global warming. **Prerequisites:** Math. 20D and Phys. 2C or consent of instructor. (S)

### 120. Introduction to Mineralogy (4)

Application of mineralogical and x-ray crystallographic techniques in earth sciences. Topics include symmetry, crystal structure, chemical, and physical properties of minerals with special emphasis on the common rock-forming minerals. Laboratory component includes polarizing microscope and x-ray powder diffraction methods. **Prerequisites:** SIO 50, or consent of instructor. (W)

### 135/236. Satellite Remote Sensing (4)

Satellite remote sensing provides global observations of Earth to monitor environmental changes in land, oceans, and ice. Overview, physical principles of remote sensing including: orbits, electromagnetic radiation, diffraction, electro-optical, and microwave systems. Weekly labs explore remote sensing data sets. Graduate students will also be required to write a term paper and do an oral presentation. **Prerequisites:** Undergraduate: Phys. 2A-B or Phys. 4A-B-C or consent of instructor. Graduate: graduate-level standing or consent of instructor. (S)

### 138. The Coral Reef Environment (4)

Assessment of the physical, chemical, and biological interactions that define the coral reef system; essential geography and evolutionary history of reefs; natural and human perturbations to the coral reef ecosystem; aspects of reef management and sustainability. **Prerequisite:** BILD 3, Math. 10A, Chem. 6B, or consent of instructor.

### 141/Chem. 174. Chemical Principles of Marine Systems (4)

Introduction to the chemistry and distribution of the elements in seawater, emphasizing basic chemical principles such as electron structure, chemical bonding, and group and periodic properties and showing how these affect basic aqueous chemistry in marine systems. **Prerequisite:** Chem. 6C with a grade of C- or better or consent of instructor. (S)

### 144/252A. Introduction to Isotope Geochemistry (4)

Radioactive and stable isotope studies in geology and geochemistry, including geochronology, isotopes as tracers of magmatic processes, cosmic-ray produced isotopes as tracers in the crust and weathering cycle, isotopic evolution of the crust and mantle. **Prerequisites:** Undergraduate: SIO 50, SIO 102, and 120 or consent of instructor. Graduate: graduate-level standing or consent of instructor. Graduate level requires student presentation. (W) (Not offered 2010-11).

### 148/248. Evolution of Earth's Biosphere (6)

Paleoecological development of marine and terrestrial environments during Earth's evolution. Ecological and chemical evolution of the oceans, atmosphere, biogeochemical cycles, and environments with particular emphasis on the long-term history and climate of the Earth's surface. Field trips required. Program and /or course material fee may apply. Graduate level additionally requires (1) term research paper, (2) researched oral presentations during the field trips, and (3) analysis of weekly readings from the current literature. **Prerequisites:** Undergraduate: SIO 104 or consent of instructor. Graduate: graduate-level standing or consent of instructor. (W) (Not offered 2010-11.)

### 152. Petrology and Petrography (4)

Mineralogical, chemical, textural and structural properties of igneous, metamorphic, and sedimentary rocks; their origin and relations to evolution of the Earth's crust and mantle. Laboratory emphasizes hand specimens and microscopic

studies of rocks in thin sections. **Prerequisites:** SIO 50, SIO 102, and SIO 120 or consent of instructor. (S)

#### 154/254. Macroevolution (4)

Tempo and mode of evolution with emphasis on the marine fossil record. Large-scale patterns and trends in diversity, speciation, and extinction. Innovation, disparity, and adaptive radiation. Evolutionary turnover and the role of the environment in macroevolution. Graduate students will also be required to write a term paper and do oral presentation. **Prerequisites:** Undergraduate: SIO 104 or BLEB 150 or consent of instructor. Graduate: graduate-level standing or consent of instructor. (S)

#### 155/251. Petrology and Geochemistry of the Solid Earth (4)

A geochemical and petrogenetic overview of the Earth and planets. Topics include formation and differentiation of the Earth into core, mantle, crust, and atmosphere/hydrosphere, generation of magma, and isotope and trace element geochemistry of igneous and metamorphic rocks. **Prerequisites:** Undergraduate: SIO 152 or consent of instructor. Graduate: graduate-level standing or consent of instructor. Graduate students, additionally, must submit a term paper in one aspect of work discussed during the quarter to be presented orally in class. (W) (Not offered 2010–11.)

#### 160. Introduction to Tectonics (4)

The theory of plate tectonics attempts to explain how forces within the Earth give rise to continents, ocean basins, mountain ranges, earthquake belts, and most volcanoes. In this course we will learn how plate tectonics works. **Prerequisite:** SIO 50 or consent of instructor. (S)

#### 162. Structural Geology (4)

Principles of stratigraphy and structural geology applicable to field geologic studies. Discussion and laboratory exercises. Two to three field trips required. Program and/or material fee may apply. **Prerequisites:** SIO 50 and SIO 100, or consent of instructor. (W)

#### 170. Introduction to Volcanology (6)

This course teaches fundamental aspects of physical and chemical volcanology with a major field study component on an active volcano on Hawaii (two weeks early September). Subjects are introduced in lectures and reinforced and expanded in field exercises. Students return to campus to attend regular lectures and to prepare final field report during fall quarter. Additional fees may be required. **Prerequisites:** SIO 50, SIO 100, and Chem. 6A, or consent of instructor. Department stamp required. (F)

#### 180/292. Communicating Science to Informal Audiences (4)

Students develop fundamental science communication and instructional skills through the understanding and application of learning theory, interpretive techniques, and pedagogical practices, which occur in the context of communicating ocean science concepts to a diverse audience at Birch Aquarium at Scripps. Graduate science students will develop fundamental communication and instructional skills through the understanding and application of learning theory, interpretive techniques, and pedagogical practices, including the development of an education/outreach plan to support a competitive research proposal. **Prerequisites:** (graduate) graduate-level standing or consent of instructor; (undergraduate) Chem. 6A or SIO 50 or BILD 1 or consent of instructor. (F)

#### 182A. Environmental and Exploration Geophysics A (4)

First of two-part sequence on theory and application of practical geophysics. Lectures are supplemented by the collection of gravity, magnetic, and seismic data and production of field reports. Includes an introduction to MATLAB for analysis and interpretation of data. SIO 103 recommended. **Prerequisites:** Math. 20D and Phys. 2C, or consent of instructor. (W)

#### 182B. Environmental and Exploration Geophysics B (4)

Second of two-part sequence on theory and application of practical geophysics. Lectures are supplemented by the collection of electrical and ground penetrating radar data. Continued use of MATLAB for analysis and interpretation

of geophysical data. **Prerequisite:** SIO 182A or consent of instructor. (S)

#### 186. Interactions Between Humans and the Natural Environment (4)

As human population and resource usage have increased, the character of human interactions with nonhuman natural systems on Earth's surface has changed dramatically. This course will survey tools for characterizing this change, its nature, and projections into the future. **Prerequisites:** upper-division standing or consent of instructor. (W)

#### 190. Special Topics in Earth Sciences (4)

A seminar course designed to treat emerging or topical subjects in the earth sciences. Involves reading from the literature and student participation in discussion. Topics vary from year to year. Enrollment by permission of instructor. (Students may enroll in SIO 190 and/or EARTH 190 no more than two times for credit.) **Prerequisite:** upper-division standing, a minimum UCSD GPA of 3.0 or consent of instructor.

#### 192. Senior Seminar in Scripps Institution of Oceanography (1)

The Senior Seminar Program is designed to allow SIO senior undergraduates to meet with faculty members in a small group setting to explore an intellectual topic in SIO (at the upper division level). Topics will vary from quarter to quarter. Senior Seminars may be taken for credit up to four times, with a change in topic, and permission of the department. Enrollment is limited to twenty students, with preference given to seniors.

#### 194. Research Seminar in Washington, D.C. (4)

Course attached to a six- to eight-unit internship taken by students participating in the UCDC Program. Involves weekly seminar meetings with faculty and teaching assistant and a substantial research paper. **Prerequisites:** departmental approval. Participation in the UCDC Program during quarter enrolled in seminar.

#### 195. Methods of Teaching Earth Sciences (4)

Introduction to teaching earth sciences class section in a lower-division class, hold office hours, assist with examinations. This course counts only once towards the major. **Prerequisites:** junior or senior earth sciences major with GPA of 3.0 or an A in the course, overall GPA of 3.0 or higher, ninety units or more, and consent of instructor, plus department stamp.

#### 196. Honors Thesis Research (4)

Independent research on a problem in earth sciences by special arrangement with a faculty member (letter grade only). Students may take EARTH 196 and/or SIO 196 two times for credit. **Prerequisites:** completed ninety units of courses including twelve units of EARTH and/or SIO courses. Achieved a GPA of 3.3 overall and 3.5 in SIO/ERTH courses. Submitted to EARTH Steering committee, and had approved, an honors thesis research proposal. Department stamp.

#### 197. Earth Science Internship (2 or 4)

The earth science internship program is designed to complement the program's academic curriculum with practical field experience. **Prerequisites:** completion of ninety units with a GPA of 2.5, and a completed and approved Special Studies form, UCSD Application for Enrollment Special Studies Courses 197, 198, 199, and department stamp.

#### 198. Directed Group Study (2–4)

This course covers a variety of directed group studies in areas not covered by formal SIO courses. (P/NP grades only.)

#### 199. Independent Study for Undergraduates (4)

Independent reading or research on a problem. By special arrangement with a faculty member. (P/NP grades only.)

## BS/MS COURSE

#### 228. Research Seminar (2)

A three-quarter required sequence for B.S./M.S. earth sciences students to prepare students for thesis writing. **Prerequisites:** current earth sciences B.S./M.S. student. Department stamp required.

## GRADUATE

#### 200A. Computational Ocean Acoustics and Signal Processing I (4)

Overview of ocean acoustics. Acoustics Wave Equation with some analytic solution techniques. Ray Methods. Introduction to Spectral and Normal Modes methods. Introduction to beamforming including matched field processing. Computer programs will be constructed on all subjects covered. **Prerequisite:** graduate standing or consent of instructor. Kuperman (F)

#### 200B. Computational Ocean Acoustics and Signal Processing II (4)

Continuation of SIO 200A. Range dependent propagation models including adiabatic and coupled mode models and parabolic equations. More advanced topics in matched field processing. **Prerequisites:** graduate standing and SIO 200A or consent of instructor. Kuperman (W)

#### 200C. Computational Ocean Acoustics and Signal Processing III (4)

Continuation of SIO 200B. Modeling interference such as ambient noise. Time domain methods. Matched field tomography, nonlinear optimization methods, and geophysical inversion. **Prerequisites:** graduate standing and SIO 200B or consent of instructor. Kuperman (S)

#### 201. Geological Record of Climate Change (4)

Introduction to geological archives; the tools for paleoclimate reconstruction and a sampling of important issues from the geological record, including the development of "greenhouse" and "icehouse" worlds, the origin and evolution of glacial cycles, and the origin of "millennial scale" climate variability. **Prerequisite:** chemistry and physics required for graduate admission to SIO, SIO 101 or equivalent, or consent of instructor. Charles (S)

#### 202A–B. Fundamentals of Wave Physics (4–4)

This two-quarter sequence is designed to introduce a broad background of students to basic principles of wave physics, including generation, propagation, dispersion, refraction, diffraction, reflection, waveguides, etc. A variety of wave motions of environmental relevance, including acoustic, ocean surface and internal (SIO 202A), optical and seismic (SIO 202B) are used to illustrate these principles. In-class experiments, data collection, and analysis exercises are incorporated. **Prerequisites:** calculus and partial differential equations. Buckingham, Kuperman, Stramski, Melville, Hildebrand, Dorman (W,S)

#### 203A. Introduction to Applied Mathematics I (4)

(Cross-listed with MAE 294A.) Review of exact methods for ordinary differential equations. Expansions about regular and irregular singular points. Introduction to asymptotic expansions. Approximate methods for nonlinear differential equations. Regular and singular perturbation theory. Additional topics depending upon the interests of the instructor. **Prerequisites:** Math. 110, Math. 120A, or consent of instructor.

#### 203B. Introduction to Applied Mathematics II (4)

(Cross-listed with MAE 294B.) Asymptotic methods: method of steepest descent (if not covered in I) WKB, method of multiple scales, boundary layer theory. Elements of complex analysis. **Prerequisite:** MAE 294A or SIO 203A or consent of instructor.

#### 203C. Introduction to Applied Mathematics III (4)

(Cross-listed with MAE 294C.) Partial differential equations: characteristics, similarity solutions, Green's functions, images, wave equation, diffusion equation, Laplace's equation. Applications to continuum mechanics, potential fields, and transport phenomena such as diffusion, linear and nonlinear waves, Burger's equation and shocks. Other topics according to the interests of the instructor. **Prerequisite:** MAE 294B or SIO 203B or consent of instructor.

#### 204. Advanced Acoustics (4)

Theory of radiation, transmission, and scattering of sound with special application to ocean acoustics. Students who have taken SIO 204B for credit may not get credit for SIO 204. **Prerequisite:** graduate standing or consent of instructor. Buckingham (W)

#### 206. Land Surface Hydrology (4)

Advanced introduction to natural processes that govern water occurrence and transport over the land surface. Principles of global hydrologic cycle and land-surface water balance, runoff and fluvial geomorphology, infiltration and subsurface water flow, evaporation and plant transpiration. **Prerequisite:** graduate standing or consent of instructor. Staff (S)

#### 207A. Fundamentals of Digital Signal Processing (4)

Discussion of discrete-time signals and systems, Discrete-Time Fourier Transform (DTFT) and window functions, Fast Fourier Transform (FFT), design of Finite Impulse Response (FIR) and Infinite Impulse Response (IIR) digital filters and their implementations, finite word length effects, applications to data acquisition and analysis. **Prerequisite:** graduate standing or consent of instructor. Hodgkiss (F)

#### 207B. Digital Signal Processing I (4)

Discrete random signals; conventional (FFT based) spectral estimation. Coherence and transfer function estimation; model-based spectral estimation; linear prediction and AR modeling, Levinson-Durbin algorithm and lattice filters, minimum variance spectrum estimation. Cross-listed with ECE 251A. (Recommended prerequisites: ECE 153 in addition to either ECE 161 or 161A and SIO 207A or equivalent background.) SIO 207A is intended for graduate students who have not had an undergraduate course in DSP. **Prerequisite:** graduate standing. Hodgkiss, Rao (W)

#### 207C. Digital Signal Processing II (4)

Adaptive filter theory, estimation errors for recursive least squares and gradient algorithms, convergence and tracking analysis of LMS, RLS, and Kalman filtering algorithms, comparative performance of Wiener and adaptive filters, transversal and lattice filter implementations, performance analysis for equalization, noise canceling, and linear prediction applications. Cross-listed with ECE 251B. (Recommended prerequisite: ECE 251A or ECE 251AN.) **Prerequisites:** graduate standing, for ECE 251A (for ECE 251B; SIO 207B (for SIO 207C)). Hodgkiss (S)

#### 207D. Array Processing (4)

The coherent processing of data collected from sensors distributed in space for signal enhancement and noise rejection purposes or wavefield directionality estimation. Conventional and adaptive beamforming. Matched field processing. Sparse array design and processing techniques. Applications to acoustics, geophysics, and electromagnetics. Cross-listed with ECE 251D. (Recommended prerequisite: ECE 251A or ECE 251AN.) **Prerequisites:** graduate standing; ECE 251C (for ECE 251D); SIO 207C (for SIO 207D). Hodgkiss (F)

#### 208. Seminar in Applied Ocean Sciences (1)

Topics in applied ocean sciences. One-hour seminar. (S/U grades only). Staff (F,W,S)

#### 209. Special Topics (1-4)

Within the next few years, lectures on various special subjects will be offered by members of the staff. The emphasis will be on topics that reveal the interdependence of the biological, chemical, geological, and physical processes operating in the oceans. (S/U grades permitted.) Staff (F,W,S)

#### 210. Physical Oceanography (4)

Physical description of the sea; physical properties of seawater, methods and measurements, boundary processes, regional oceanography. **Prerequisite:** graduate standing or consent of instructor. Hendershott, Talley (F)

#### 211A-B. Ocean Waves (4-4)

Propagation and dynamics of waves in the ocean including the effects of stratification, rotation, topography, wind, and nonlinearity. **Prerequisite:** graduate standing or consent of instructor. Hendershott, Guza, Winant (W,S)

#### 212A. Geophysical Fluid Dynamics I (4)

The equations of motion for rotating stratified flow and their application to the atmospheric and oceanic dynamics; Ekman layer dynamics, potential vorticity dynamics, the quasigeostrophic approximation, theories of the wind-driven oceanic circulation, theories of the atmospheric Hadley circulation, geostrophic adjustment, and baroclinic instability. **Prerequisite:** graduate standing or consent of instructor. Cessi, MacKinnon, Young (W,S)

#### 212B. Geophysical Fluid Dynamics II (5)

The equations of motion for rotating stratified flow and their application to the atmospheric and oceanic dynamics; Ekman layer dynamics, potential vorticity dynamics, the quasigeostrophic approximation, theories of the wind-driven oceanic circulation, theories of the atmospheric Hadley circulation, geostrophic adjustment, and baroclinic instability. **Prerequisites:** graduate standing or consent of instructor. Cessi, MacKinnon, Salmon, Young (W,S)

#### 213. Turbulence and Mixing (4)

Mixing mechanisms, their identification, description, and modeling. Introduction to turbulence, semi-empirical theories, importance of coherent structures, effects of stratification and rotation on turbulent structure, entrainment and mixing. Cross-listed with MAE 216. (S/U grades permitted.) Armi (S)

#### 214A. Introduction to Fluid Mechanics (4)

A survey of classical problems in fluid mechanics and approximate techniques of analysis. Topics include conservation equations, straight laminar flows, low and high Reynolds number laminar flow, stability of laminar flows, turbulent flow. **Prerequisite:** graduate standing or consent of instructor. Hendershott, Winant (F)

#### 214B. Environmental Fluid Dynamics (4)

Single-layer flows with a free surface, two-layer flows including exchange flows in harbors, estuaries, seas, and buildings. Continuously stratified flows with meteorological and oceanographic applications. Topographic effects, plumes, jets, and thermals. Planetary boundary layers. **Prerequisite:** graduate standing or consent of instructor. Armi (S)

#### 215A. Applied Mathematics for Oceanographers I (4)

Intended for first-year graduate students who seek a quantitative way to describe how the ocean works: vector analysis, complex quantities, Fourier and Laplace transforms, ordinary differential equations, non-homogeneous ordinary differential equations, initial and boundary value problems, Heat and Laplace equations. **Prerequisite:** graduate standing or consent of instructor. Hendershott, Lerley, Winant (F)

#### 215B. Applied Mathematics for Oceanographers II (4)

An introduction to the mathematical description of waves, beginning with a description of the linear oscillator, and followed by normal modes, the flexible string, membranes, water waves, ray theory, method of characteristics, and basic linear algebra. **Prerequisites:** graduate standing and SIO 215A or consent of instructor. Hendershott, Lerley, Winant (W)

#### 215C. Applied Mathematics for Oceanographers III (4)

An introduction to Perturbation theory, including regular and singular expansions, Poincaré's method, two-scale method, the WKB approximation and boundary layer theory. **Prerequisites:** graduate standing and SIO 215B or consent of instructor. Hendershott, Lerley, Winant. (S)

#### 216. Introduction to the Physics of Complex Systems (4)

Emergent complex behavior in nonlinear, dissipative, open dynamical systems will be investigated by studying fundamental properties and their manifestation in examples drawn from the physical and biological sciences. Topics to include fractals, chaos, self-organization, artificial life, and neural networks. **Prerequisite:** graduate standing or consent of instructor. (S/U grades permitted.) Werner (W)

#### 217A. Atmospheric and Climate Sciences I (4)

Thermodynamics and statics of dry and moist air, atmospheric composition, Earth radiation budget, vertical structure of the atmosphere, global energy balance, thermodynamic feedbacks in the climate system. **Prerequisite:** graduate standing or consent of instructor. (S/U grades permitted.) (F)

#### 217B. Atmospheric and Climate Sciences II (4)

Structure of midlatitude synoptic systems; equations of motion, scale analysis, elementary applications and wave solutions; baroclinic instability theory; atmospheric general circulation and energetics; tropical dynamics; relationships between atmospheric dynamics, CO<sub>2</sub> clouds, precipitation, and other weather and climate phenomena. **Prerequisites:**

graduate standing and SIO 217A or equivalent background, or consent of instructor. J. Norris (W)

#### 217C. Atmospheric and Climate Sciences III (4)

Physical and dynamical processes that determine climate and climate change; role of aerosols; water vapor; CO<sub>2</sub> and other greenhouse gases; cloud-radiative interactions; atmospheric general circulation; role of convection; tropical climate including El Niño. **Prerequisites:** graduate standing and SIO 217A and SIO 217B or equivalent background, or consent of instructor. Ramanathan (S)

#### 217D. Atmospheric and Climate Sciences IV (4)

Atmospheric chemistry that impacts climate change, including photochemical reactions, ozone chemistry, and aerosol evolution in the troposphere and stratosphere. Atmospheric applications of catalytic cycles, heterogeneous chemistry, and microphysical processes will include the ozone hole, urban smog, and aerosol-cloud interactions. **Prerequisites:** undergraduate general physics, chemistry, and mathematics (including differential equations). Russell (S)

#### 219. Special Topics in Physical Oceanography (1-4)

Example topics are case histories and methods in physical oceanography, theories of the ocean circulation, numerical methods in large-scale ocean and atmospheric models, and natural electromagnetic phenomena in the earth and the oceans. (S/U grades permitted.) Staff (F,W,S)

#### 220. Observations of Large-Scale Ocean Circulation (4)

General circulation of the oceans; tropical, subtropical, and high-latitude current systems of the Atlantic, Indian, and Pacific Oceans and marginal seas; ocean heat flux and thermohaline circulations; observational basis of large-scale dynamics. **Prerequisite:** graduate standing or consent of instructor. (S/U grades permitted.) Roemmich (S)

#### 221A. Analysis of Physical Oceanographic Data (A) (4)

Fundamental elements of analysis of geophysical and oceanographic time series, including sampling problems, least squares techniques, spectral analysis, interpretation of series, design of experiments. **Prerequisite:** consent of instructor. Pinkel (F)

#### 221B. Analysis of Physical Oceanographic Data (B) (4)

Techniques for analysis of physical oceanographic data involving many simultaneous processes including probability densities, sampling errors, spectral analysis, empirical orthogonal functions, correlation, linear estimation, objective mapping. **Prerequisite:** graduate standing or consent of instructor. (S/U grades permitted.) Rudnick (W)

#### 221C. Data Analysis Laboratory (4)

This course is to give students practical experience with analysis techniques. Students complete three projects. Topics include empirical orthogonal functions, objective mapping, complex demodulation, inference of geostrophic flow, minimization of CTD salinity spiking, isolation of wind-driven currents, wavelets. **Prerequisite:** graduate standing or consent of instructor. (S/U grades only.) Rudnick, Gille (F)

#### 222. Underwater Bioacoustics (4)

Introductory course to familiarize a broad spectrum of participants to underwater sound and its relationship to underwater animals. Basic physics of sound propagation, use of sound to study underwater animals and, the sounds made by the animals themselves for echolocation and communication will be covered. **Prerequisite:** consent of instructor. (S/U grades permitted.) J. Hildebrand, Jaffe (W)

#### 223A. Geophysical Data Analysis I (4)

Probability and statistics and their application to make inferences from geophysical data: point processes, distributions, maximum likelihood estimation, hypothesis testing and confidence intervals, least squares, density estimation, interpolation and smoothing. **Prerequisite:** graduate standing or consent of instructor. Agnew, C. Constable (W)

#### 223B. Geophysical Data Analysis II (4)

Analysis of geophysical measurements, especially time series, Fourier theory digital signal processing, and spectral analysis. **Prerequisites:** graduate standing and SIO 223A or consent of instructor. Agnew, C. Constable (S)

#### 224. Internal Constitution of the Earth (4)

An examination of current knowledge about the composition and state of the earth's interior revealed by geophysical observations. Seismic velocity and mass density distributions; equations of state; phase changes; energy balance and temperatures; constraints on composition from extraterrestrial samples and exposed rocks; spherical and aspherical variations of properties. **Prerequisites:** calculus and differential equations, basic chemistry and physics, or consent of instructor. Masters (S)

#### 225. Physics of Earth Materials (4)

Mathematics and physics of continuous media, focusing on geophysical problems. Topics include deformation, stress, conservation laws, elasticity, attenuation, viscoelasticity, fracture mechanics, and porous media. **Prerequisite:** graduate standing or consent of instructor. Agnew, Fialko (W)

#### 226. Introduction to Marine Geophysics (4)

Methods of exploration geophysics with emphasis on those useful at sea. Magnetic and gravitational potential field methods, multi-beam echo sounding reflection and refraction seismology will be covered. Recent papers from the literature will also be read and discussed. **Prerequisites:** differential equations; at least one geology course. (S/U grades permitted.) Dorman, Hildebrand (S)

#### 227A. Introduction to Seismology (4)

Introduction to seismometers and seismograms; stress and strain; potentials and the wave equation; geometrical ray theory and travel times in layered media; representation of seismic sources; WKBJ and synthetic seismograms; seismic hazards and other applications of seismology. **Prerequisite:** consent of instructor. (S/U grades permitted.) Shearer (F)

#### 227B. Advanced Seismology I (4)

Introduction to low-frequency digital data; continuum mechanics and the equations of motion; free oscillation solutions; construction of Earth models; excitation of free-oscillations and source mechanism retrieval; array processing of long-period data; modelling aspherical structure; surface waves. **Prerequisite:** consent of instructor. (S/U grades permitted.) Staff (W)

#### 227C. Advanced Seismology II (4)

High-frequency wave propagation; methods for computing synthetic seismograms including WKBJ, reflectivity and finite differences; body-wave spectra; attenuation of body waves; source physics; reflection and refraction seismology; seismic tomography. **Prerequisite:** consent of instructor. (S/U grades permitted.) Staff (S)

#### 229. Gravity and Geomagnetism (4)

Introduction to potential theory, with applications to gravity and geomagnetism. Topics include the geoid, spherical harmonics, Laplace's equation, the Dirichlet problem on a sphere, and Fourier methods. Gravity anomalies and geomagnetic field modeling and sources are discussed; also paleomagnetic observations. **Prerequisite:** graduate standing or consent of instructor. (S/U grades permitted.) C. Constable, Parker (S)

#### 230. Introduction to Inverse Theory (4)

Solution of linear and nonlinear inverse problems in geophysics by optimization techniques such as norm minimization and linear programming. Construction of models by regularization; inference by bounding functionals. Illustrations from gravity, geomagnetism, and seismology. **Prerequisite:** graduate standing or consent of instructor. (S/U grades permitted.) (W)

#### 231. Introduction to EM Methods in Geophysics (4)

Introduction to electromagnetic methods for both global geophysics and applied/exploration methods. Covers history of EM induction, conduction in rocks, binary mixing laws, self potential, induced polarization, DC resistivity, magnetotellurics, geomagnetic depth sounding, elementary inverse methods, global conductivity structure, and marine EM methods. **Prerequisite:** graduate standing or consent of instructor. (S/U grades permitted.) S. Constable (F)

#### 233. Introduction to Computing at SIO (4)

Introduction to the SIO computing environment and common software tools in geophysics and other disciplines.

Topics include UNIX, Matlab, Postscript, GMT, LaTeX, HTML, and a scientific programming language such as C or Fortran90. **Prerequisite:** graduate standing or consent of instructor. (S/U grades permitted.) Agnew, Shearer (F)

#### 234. Geodynamics (4)

A general course on the dynamics and kinematics of the solid earth based on the text of Turcotte and Schubert. Topics include plate tectonics, heat flow, lithospheric cooling, flexure, viscous flow, gravity, crustal dynamics, and other related topics. **Prerequisite:** graduate standing or consent of instructor. (S/U grades permitted.) Sandwell (W)

#### 236. Satellite Remote Sensing (4)

Satellite remote sensing provides global observations of Earth to monitor environmental changes in land, oceans, and ice. Overview physical principles of remote sensing including: orbits, electromagnetic radiation, diffraction, electro-optical, and microwave systems. Weekly labs explore remote sensing data sets. Graduate students will also be required to write a term paper and do an oral presentation. Conjoined with SIO 135. **Prerequisite:** graduate standing or consent of instructor. Sandwell (S)

#### 237A. Introduction to Ocean Optics (4)

Overview of ocean optics. Concepts in radiometry. Inherent and apparent optical properties. Radiative transfer equation. Light absorption and scattering by seawater constituents. Optics of air-water interface. Light fields within and leaving the ocean. Optics of marine particles. Measurement methods and instrumentation. **Prerequisites:** basic physics and differential calculus, or consent of instructor. Stramski (F)

#### 237B. Ocean Color Remote Sensing (4)

Overview of ocean color satellite missions. Concepts in radiometry. Inherent and apparent optical properties. Radiative transfer equation. Solar radiation and elements of atmospheric optics. Propagation of light across the sea surface and within the ocean. Light absorption and scattering by seawater. Water-leaving radiance and remote-sensing reflectance. Ocean color algorithms and applications. **Prerequisites:** basic physics and differential calculus, or consent of instructor. (S/U grades permitted.) Stramski (F)

#### 237C. Optical-Biological Interactions in the Ocean (2)

A discussion class with emphasis on the interaction of light with marine plankton. Topics will include light absorption, fluorescence, and scattering by phytoplankton and effects of growth conditions on phytoplankton optical properties. Classic and contemporary papers dealing with these topics will be discussed. **Prerequisites:** basic physics and biology, or consent of instructor. (S/U grades only.) Stramski (F)

#### 238. Sensor Networks (4)

Characteristics of chemical, biological, seismic, and other physical sensors; signal processing techniques supporting distributed detection of salient events; wireless communication and networking protocols supporting formation of robust sensor fabrics; current experience with low power, low cost sensor deployments. Conjoined with MAE 149 and ECE 156. **Prerequisite:** upper-division standing and approval of instructor, or graduate student in science or engineering. (S/U grades permitted.) Hodgkiss (S)

#### 239. Special Topics in Geophysics (1-4)

Special course offerings by staff and visiting scientists. Example topics are seismic source theory, geophysical prospecting methods, dislocation theory and seismic mechanisms, tectonic interpretation of geodetic data, and dynamo theory. (S/U grades permitted.) Staff (F,W,S)

#### 240. Marine Geology (4)

Introduction to the geomorphology, sedimentation, stratigraphy, vulcanism, structural geology, tectonics, and geological history of the oceans. **Prerequisites:** the physics and chemistry required for admission to the graduate curriculum in SIO, and ES 101 or equivalent, or consent of instructor. Cande, Charles, Hilton (F)

#### 242. Marine Biotechnology (4)

The class will contain lectures discussing current topics and new technologies in the marine sciences (biology, chemistry). Faculty that are part of the marine biotechnology training grant will lecture on their own research and techniques that are being used. The students will select and present a paper that is an application of topics discussed.

The areas of genomics, proteomics, expression analysts, mutagenesis, microbial diversity, etc., will be presented. Bartlett (F)

#### 243. Marine Paleoecology (4)

Paleoecology of marine plankton, nekton, and benthos. Patterns and changes in marine communities and ecosystems over geological time in relation to changes in the physical, chemical, and geological environment and biotic interactions. The preservation filter and inference of ecological processes from fossils and biogeochemical proxies. Biotic interchanges, incumbency, escalation and trends, mass extinctions, and recovery. Lectures, seminar discussion, laboratory, and field trips. **Prerequisites:** bachelor's degree in science or consent of instructor; open to undergraduates with completion of SIO 104 and either BIEB 130 or BIEB 140, or equivalent. Jackson, Staff (S)

#### 244. Shape and Structure of the Ocean Floor (4)

Description and explanation of the structural geomorphology of oceanic crust, and of the tectonic and volcanic processes responsible for it. Description and interpretation of deep-sea sedimentary landforms (e.g., deep-sea fans, drifts, bedforms) and of the bottom currents that shape them. Offered in alternate years. **Prerequisite:** any previous graduate/undergraduate earth science or geology course. Lonsdale (W)

#### 245. Sedimentary Geochemistry for Chemical Paleoceanography (2)

Chemical paleoceanography will be the focus, emphasis on seawater and/or sediment chemical and isotopic records; discussions will concentrate on some of the following isotopic systems: Li, B, C, O, S, Sr, and Nd, and on select chemical tracers such as Cd and Ir; on the marine phases that most reliably record seawater chemical and isotope compositions; and on diagenetic problems, how to identify and deal with them. **Prerequisite:** SIO 260 and consent of instructor. (Offered in alternate years.) (S/U grades permitted.) Kastner (S)

#### 246. Global Tectonics and Basin Formation (4)

Plate tectonics of the crust and upper mantle, examining a variety of environments from ridge crests to continental margins, including plate interiors, with an emphasis on basin formation in these tectonic settings. **Prerequisite:** graduate standing. Cande, Driscoll (W)

#### 247. Rock Magnetism and Paleomagnetism (4)

Rock magnetism and acquisition of magnetic remanence in geological materials as well as laboratory procedures and data analysis (isolating remanence components and statistical approaches). The paleomagnetic literature will be used to illustrate applications in geological and geophysical problems. **Prerequisites:** one year each of college-level physics and geology; mathematics through calculus. (S/U grades permitted.) Tauxe (S)

#### 248. Evolution of Earth's Biosphere (4)

Paleoecological development of marine and terrestrial environments during Earth's evolution. Ecological and chemical evolution of the oceans, atmosphere, biogeochemical cycles, and environments with particular emphasis on the long-term history and climate of the Earth's surface. Substantial field component (three weekend field trips in San Diego County) complement and extend the lecture material. Additionally, at graduate level oral presentation or research paper required. Conjoined with SIO 148. **Prerequisite:** graduate-level standing or consent of instructor. Jackson, R. Norris (S)

#### 249. Special Topics in Marine Geology (1-4)

Special course offerings by staff and visiting scientists. (S/U grades only.) Staff (F,W,S)

#### 251. Petrology and Geochemistry of the Solid Earth (4)

A geochemical and petrogenetic overview of the Earth and planets. Topics include formation and differentiation of the Earth into core, mantle, crust, and atmosphere/hydrosphere, generation of magma, and isotope and trace element geochemistry of igneous and metamorphic rocks. Graduate students, additionally, must submit a term paper in one aspect of work discussed during the quarter to be presented orally in class. Conjoined with SIO

155. **Prerequisite:** graduate-level standing or consent of instructor. Castillo (W)

#### 252A. Introduction to Isotope Geochemistry (4)

Radioactive and stable isotope studies in geology and geochemistry, including geochronology, isotopes as tracers of magmatic processes, cosmic-ray produced isotopes as tracers in the crust and weathering cycle, isotopic evolution of the crust and mantle. Graduate level requires student presentation. Conjoined with SIO 144. **Prerequisite:** graduate-level standing or consent of instructor. Hilton, Keeling, Lal (W)

#### 252B. Advanced Isotope Geochemistry I (4)

An advanced treatment of noble gas and stable isotope geochemistry. Offered in alternate years with SIO 252C. **Prerequisites:** SIO 252A/SIO 144. Hilton, Keeling, Lal (S)

#### 252C. Advanced Isotope Geochemistry II (4)

An advanced treatment of radiogenic and cosmogenic isotope geochemistry. Offered in alternate years with SIO 252B. **Prerequisites:** SIO 252A/SIO 144. Lal (S)

#### 253. Interactions of Oceanic Plates and the California Margin (4)

How the geology of Alta and Baja California has been shaped, especially in the past 30MYR, by changing patterns of ocean plates and microplates that have subducted beneath the North American Margin, slid obliquely past it, and captured continental crust. **Prerequisites:** graduate standing, or consent of instructor and any other earth science class for undergraduates. Lonsdale, Castillo (S)

#### 254. Macroevolution (4)

Tempo and mode of evolution with emphasis on the marine fossil record. Large-scale patterns and trends in diversity, speciation, and extinction. Innovation, disparity, and adaptive radiation. Evolutionary turnover and the role of the environment in macroevolution. Additionally, oral presentation or research paper required. Conjoined with SIO 154. **Prerequisite:** graduate-level standing or consent of instructor. Jackson, R. Norris (S)

#### 255. Paleobiology and History of Life (6)

An introduction to the major biological transitions in Earth history from the origins of metabolism and cells to the evolution of complex societies. The nature and limitations of the fossil record, patterns of adaptation and diversity, and the tempo and mode of biological evolution. Laboratories and substantial field component complement and extend lecture material. Program and/or material fee may apply. Graduate students, additionally, will give oral presentation or research paper. Conjoined with SIO 104. **Prerequisite:** graduate-level standing or consent of instructor. Jackson, R. Norris (S)

#### 255A. Topics in Paleobiology and History of Life (3)

Lecture topics on the major transitions in the evolutionary history of life including origin of metabolisms, microbes, major eukaryote radiations, ecosystems and societies. **Prerequisite:** graduate standing or consent of instructor. Jackson, R. Norris (S)

#### 256A. Introduction to Field Geology (4)

Principles of stratigraphy and structural geology applicable to field geologic studies. Discussion and laboratory exercises. **Prerequisites:** consent of instructor. Brown (W)

#### 256L. Structural Geology (4)

Principles of stratigraphy and structural geology applicable to field geologic studies. Discussion and laboratory exercises. Two to three field trips required. Graduate students will complete an in-depth literature-based focused study consisting of a written report and a forty-five-minute seminar on topics related to structural geology. **Prerequisite:** graduate-level standing or consent of instructor. (W)

#### 257. Seminar in Petrology (4)

Discussion of current research in petrology and mineralogy. (S/U grades permitted.) Castillo (W)

#### 259. Atmospheric Geochemistry (4)

Topics in this introductory course include: structure and composition of the atmosphere; chemistry and isotopes of natural and man-made carbon-, nitrogen-, and sulfur-bearing trace gases; ozone and hydroxyl radical; haloge-

nated gases; air-sea exchange; aerosols; climatic effects. (S/U grades permitted.) Weiss (S)

#### 260. Marine Chemistry (4)

Chemical description of the sea; the distribution of chemical species in the world oceans, and their relationships to physical, biological, and geological processes. Aluwihare, Barbeau, R. Keeling (W)

#### 261. Energetics and Kinetics in Marine Systems (4)

This course teaches the physical chemical principles that control chemistry in marine systems. After a basic introduction to thermodynamics and its application to an understanding of the marine environment, the emphasis will be on the study of a variety of kinetic processes. **Prerequisite:** graduate standing or consent of instructor. Dickson (S)

#### 262. Seminar in Marine Natural Products (1)

Students will give seminars on current research topics in marine natural products chemistry. **Prerequisite:** graduate standing or consent of instructor. (S/U grades only.) Fenical, W. Gerwick, Moore (F,W,S)

#### 263. Aqueous Chemistry (4)

This course emphasizes the chemical principles that control basic aqueous chemistry in marine systems. The focus will be to show that the geochemistry of the various elements in sea water and biological systems can be understood as a consequence of basic general chemical concepts such as electron structure, chemical bonding, and group and periodic properties. **Prerequisite:** undergraduate chemistry equivalent to UCSD Chemistry 6 sequence. Dickson (F)

#### 264. Special Topics in Marine Natural Products Chemistry (3)

This course provides the foundation for advanced study in the field of marine natural products chemistry. Topics vary from the history of natural products to the organic chemistry of terpenes, alkaloids, acetogenins, and other natural product classes. Varying by topic quarterly, this class is given each quarter and may be repeated. **Prerequisite:** one year general organic chemistry. (S/U grades only.) Fenical, W. Gerwick, Moore (F,W,S)

#### 267. Biogeochemistry (4)

Examines quantitatively the impact of the biota on the chemistry of the atmosphere and ocean. Emphasis given to isotopes as tracers of biogeochemical processes. Attention given to paleoclimatic and paleoatmospheric data from ice cores to reveal mechanisms. **Prerequisite:** graduate standing or consent of instructor. Severinghaus, R. Keeling (S)

#### 268. Seminar in Geochemistry and Marine Chemistry (1)

Student seminars on topics related to geochemistry and the chemistry of the marine environment. (S/U grades only.) Dickson (S)

#### 269. Special Topics in Marine Chemistry (1-4)

Special course offerings by staff and visiting scientists. (S/U grades permitted.) Staff (F,W,S)

#### 270. Pelagic Ecology (4)

An analysis of the concepts and theories used to explain the biological events observed in the water column. Alternate years. **Prerequisites:** SIO 210, 280, or consent of instructor. Checkley, Ohman (S)

#### 270A. Fisheries Oceanography (4)

Aspects of marine ecology relevant to the reproduction, survival, and distribution of commercially important marine species. Alternate years only. **Prerequisite:** graduate standing or consent of instructor. Checkley (S)

#### 271. Marine Zooplankton (5)

Lectures and laboratories treating the morphological, behavioral, and life history variations of the principal phyla of planktonic invertebrates and heterotrophic protists. Constraints of life at low Reynolds numbers; principles of allometry; growth processes of heterotrophic organisms. **Prerequisite:** graduate standing or consent of instructor. (S/U grades permitted.) Ohman (S)

#### 272. Biogeography (3)

A lecture course concerning the origin, development, and perpetuation of distributional patterns with emphasis on benthic marine organisms. (W)

#### 273A. Professional Ethics in Science (2)

A seminar on the historical and contemporary ethics and ethos of scientific research, based on published documents. Given in alternate years. Dayton (W)

#### 275A. Benthic Ecology (4)

Evolution and maintenance of benthic communities from the terrestrial margins to the deep sea. Special emphasis will be placed on physical and biological scaling and processes determining patterns of distribution and abundance; interrelationships between community structure and population phenomena, including trophic relationships, reproductive and recruitment patterns, succession, and life history biology. Offered in alternate years with SIO 275B. **Prerequisite:** consent of instructor; open to undergraduates. (S/U grades permitted.) Levin, Dayton (W)

#### 275B. Natural History of Coastal Habitats (6)

Two three-hour lecture/laboratories per week, three week-long field trips to coastal habitats in the Southwest and northern Mexico. Several day field trips to local habitats. Offered in alternate years with SIO 275A. **Prerequisite:** consent of instructor. (S/U grades permitted.) Dayton, R. Norris (S)

#### 276. Quantitative Theory of Populations and Communities (4)

An introduction to the quantitative tools and conceptual issues underlying the study of the dynamics and structure of ecological systems. **Prerequisite:** calculus (three quarters) or consent of instructor. (S/U grades permitted.) Sugihara (F)

#### 277. Deep-Sea Biology (4)

The ecology, zoogeography, taxonomy, and evolution of deep-sea organisms, with emphasis on the benthos. Course includes one day cruise to the San Diego Trough to examine deep sea organisms (700-1200 meters) (two-hour steam from Point Loma). Offered alternate years. **Prerequisite:** graduate standing or consent of instructor. Levin (W)

#### 278. Seminar in Ocean Biosciences (2)

Presentations of reports, review of literature, and discussion of current research in the marine biological and oceanographic sciences. (S/U grades permitted.) Staff (F,W,S)

#### 279. Special Topics in Biological Oceanography (1-4)

(S/U grades permitted.) Staff (F,W,S)

#### 280. Biological Oceanography (4)

The biology and ecology of marine plankton, nekton, and benthos. Emphasis will be on processes regulating species, community, and ecosystem patterns and changes, including productivity, trophic relationships and species interactions with the physical, chemical, and geological environment. One or more field trips. **Prerequisite:** bachelor's degree in science or consent of instructor. Franks or Checkley, Levin (F)

#### 281. Environmental Physiology and Biochemistry of Marine Organisms (4)

Biochemical mechanisms of adaptation of organisms to the marine environment. Special emphasis is on the effects of pressure, temperature, salinity, oxygen, and light on the physiology and biochemistry. Conjoined with BIBC 130. **Prerequisite:** BIBC 102 or consent of instructor. Felbeck (F)

#### 282. Phytoplankton Diversity (4)

Molecular, biochemical, ecological, and evolutionary perspectives on the diversity of eukaryotic and prokaryotic phytoplankton. **Prerequisite:** consent of instructor. Palenik (W)

#### 285. Physical-Biological Interactions (4)

Physical and biological processes affecting growth and patchiness of plankton. Concepts and equations from physical oceanography will be presented and explored in a biological context. Ideas will be treated both theoretically and with examples from the literature. **Prerequisites:** introductory calculus and SIO 210, or consent of instructor. Franks (S)

#### 286. Marine Science, Economics and Policy (4)

This course investigates global issues in marine conservation and potential policy solutions. The approach is interdisciplinary, fast-paced, and discussion oriented. Students will become acquainted with sufficient background in

marine biology, ecology, marine and conservation economics, international law, and policy as preparation for participation in discussion on real-world issues in marine conservation. Topics and instructors change each quarter. **Prerequisite:** graduate standing or consent of instructor. (S/U grades permitted) Staff (F,W)

#### **287A. Marine Microbial Ecology (4)**

Recent developments in the study of marine bacteria. Emphasis will be on biochemical and physiological adaptations of marine bacteria to the ocean environment. Bacterial metabolism, growth, and death will also be discussed in the context of trophic interactions and flows of material and energy in marine ecosystems. Molecular biology techniques used in the study of bacterial ecology will also be discussed. **Prerequisite:** consent of instructor. (S/U grades permitted.) Azam (W)

#### **287B. Microbial Physiology (4)**

Prokaryotic microbial physiology will be discussed primarily from a biochemical standpoint with emphasis on mechanism. Topics will vary from year to year but will include the following themes: Central Metabolism. Bioenergetics, Biosynthesis, Regulation, Differentiation. Prokaryotic Structure-Function Relationships. Conjoined with BIMM 130. **Prerequisites:** BIBC 100 or BIBC 102 or equivalent. Saier (S).

#### **288. Marine Microbiology Laboratory (4)**

Advanced techniques and theory in environmental microbiology. Students will perform experiments concerning (a) enrichment of diverse microbes (b) microbial enumeration and identification (c) metabolic and physiochemical adaptations, and (d) biotechnology, along with an independent project. **Prerequisite:** consent of instructors. Brahmsha, Palenik (S)

#### **290. Marine Biology (4)**

An introduction to the field of marine biology, especially to the diversity of marine organisms at all taxonomic levels and their adaptations to the marine environment. **Prerequisite:** graduate standing. N. Holland, Palenik (W)

#### **291. Biology Graduate Research Presentations (1)**

Graduate students in the biological sciences present their research in a seminar or poster format. Class participants and instructors provide written feedback on the presentations. Required of third-year and beyond marine biology curricular group students during spring quarter. Open to all SIO graduate students. (S/U grades only.) Latz (S)

#### **292. Communicating Science to Informal Audiences (4)**

Students develop fundamental science communication and instructional skills through the understanding and application of learning theory, interpretative techniques, and pedagogical practices, which occurs in the context of communicating ocean science concepts to a diverse audience at Birch Aquarium at Scripps. Graduate science students will develop fundamental communication, and instructional skills through the understanding and application of learning theory, interpretive techniques, and pedagogical practices, including the development of an education/outreach plan to support a competitive research proposal. Conjoined with SIO 180. **Prerequisite:** graduate standing or consent of instructor. (F)

#### **294. Biology of Fishes (5)**

The comparative evolution, morphology, physiology, and ecology of fishes. Special emphasis on local and deep-sea and pelagic forms in laboratory. **Prerequisite:** graduate standing or consent of instructor. Hastings (S)

#### **295S. Introduction to Marine Biodiversity and Conservation—Seminar (8)**

Lectures on ecological, economic, social, and legal issues related to marine biodiversity and case studies on socio-economic and legal issues. Students are expected to attend field trips at sea and to various sites around San Diego County as a part of the corequisite course. Students who have taken SIO 295 may not receive credit for SIO 295S. **Corequisite:** SIO 295LS. **Prerequisites:** MAS students only; consent of instructor. Jackson (Su)

#### **295LS. Introduction to Marine Biodiversity and Conservation—Lab (8)**

Laboratory work on major biological taxa, field trips on biodiversity in situ, computer labs for informatic tools. Students are expected to attend field trips at sea and to various sites around San Diego County as a part of the course. Students who have taken SIO 295L may not receive credit for SIO 295LS. **Corequisite:** SIO 295S. **Prerequisites:** MAS students only; consent of instructor. Jackson (Su)

#### **296. Special Topics in Marine Biology (1-5)**

Example topics are reproduction in marine animals, adaptation to marine environments, larval biology, marine fisheries, macromolecular evolution, physical chemical topics in physiology, philosophy of science. (S/U grades permitted.) Staff (F,W,S)

#### **297. Marine Biology Seminar (1)**

Lectures given by visiting scientists and resident staff and students. (S/U grades only.) Staff (F,W,S)

#### **298. Special Studies in Marine Sciences (1-4)**

Reading and laboratory study of special topics under the direction of a faculty member. Exact subject matter to be arranged in individual cases. **Prerequisite:** graduate standing. (S/U grades permitted.) Staff (F,W,S)

#### **299. Research (1-12)**

(S/U grades only.) Staff (F,W,S)

# Senior Seminar Program

---

Office of the Senior Vice Chancellor—Academic Affairs

Associate Vice Chancellor—Undergraduate Education

OFFICE: University Center, Room 104

(858) 822-5855

<http://ugseminars.ucsd.edu>

The Senior Seminar Program was launched in fall 2006 as an additional venue to enhance the undergraduate student experience at UC San Diego. By design, the small informal class setting promotes intellectual discussions with faculty, and fosters an ideal learning environment for polishing critical thinking and analytical skills.

Some twenty unique seminars are offered each quarter by faculty representing most UCSD academic departments. Senior seminars are designated by the course number 192 (e.g., POLI 192), are graded Pass/Not Pass, and carry one unit of credit. A department stamp is required prior to enrollment and is obtained by simply contacting the department or program offering the seminar. Prerequisites vary by seminar. Students are highly encouraged to incorporate senior seminars into their upper-division studies at UCSD.

Please visit the Senior Seminar Program Web site at <http://ugseminars.ucsd.edu> for a description of seminars currently offered. This site also contains useful information such as enrollment procedures and additional program details. Questions about a specific senior seminar should be directed to the department offering the seminar.

# Sixth College

---

Provost, Naomi Oreskes  
Pepper Canyon Hall, Second Floor  
<http://sixth.ucsd.edu>

## CULTURE, ART, AND TECHNOLOGY

See "[Culture, Art, and Technology](#)" core sequence.

## SIXTH COLLEGE HONORS PROGRAM

OFFICE: Academic Advising

Pepper Canyon Hall, 2nd floor

Sixth College Honors Program nurtures academically high achieving students intellectually and socially, increases their awareness about opportunities of academic, social, and cultural engagement, and motivates them to become community leaders in Sixth College, at UC San Diego, and in communities outside the university.

- Through seminars, research, and social and cultural events, students are introduced to the academic, cultural, artistic, and social richness of the campus, provide information about resources, support students in finding extracurricular activities, and create opportunities to make connections to people, peers, faculty, staff, and campus community leaders.
- Through special advising by Sixth College provost and Sixth College associated faculty, honors students will receive mentoring and guidance.

## FRESHMAN HONORS SEQUENCE

Students who have distinguished themselves academically in their high schools are invited to participate in the Freshman Honors Program. The qualifications are outstanding high school grade-point averages (3.8) and College Board Scholastic Aptitude Test scores (SAT math: 700 and above, and SAT reading and writing: 700 and above). In the fall quarter, freshmen are invited to enroll in SXTX 20—Freshmen Honors Seminar, which is noted on the UCSD transcript for zero units. Students who were not originally invited and who completed at least twelve graded units with a 3.7 cumulative GPA, will be invited to join the honors program. Students need to maintain a 3.5 cumulative GPA in order to remain in the honors program.

The weekly Freshman Honors seminars include cultural and social events such as lectures, hikes, dinners, plays, music events, and visits to museums are also an important component of the program.

## SOPHOMORE HONORS SEQUENCE

Sixth College students who distinguish themselves academically during their freshman year and maintain a minimum cumulative GPA of 3.5 have two additional academic enrichment opportunities available to them:

- Second-year honors can participate in the Sixth College Honors Apprentice Research Program

by enrolling in SXTX 96 (2 units P/NP)—Honors Project. Second-year projects may extend for one to three quarters and may lead to the creation of a Practicum project. Students are encouraged to present their projects at the UCSD Undergraduate Research Conferences held each spring and summer.

- A second option is participation in SXTX 60 (1 unit)—Sophomore Honors Seminar, a series that deals with Technology and Society and the Arts issues.

## COURSES

---

*For course descriptions not found in the UC San Diego General Catalog, 2010–11, please contact the department for more information.*

### SXTX 20. Freshmen Honors Seminar (0)

Weekly seminars with faculty members from a variety of disciplines (chosen by the provost to match the interests of participating students). This seminar provides students with opportunities to learn more about research and scholarly activities being conducted by faculty and instill in students a sense of participation in the scholarly life at UCSD. **Prerequisite:** by invitation only. Pass/Not Pass grade only.

### SXTX 60. Sophomores Honors Seminar (1)

This sophomore weekly seminar is the continuation of the Freshman Honors Seminar. This series will deal specifically with Culture, Art, and Technology issues/topics. **Prerequisite:** by invitation only. Pass/Not Pass grade only.

### SXTX 96. Honors Project (2)

Individual project on a topic related to Culture, Art, and Technology done under the direction of a faculty member. College stamp required. Pass/Not Pass grade only.

# Sociology

## PROFESSORS

Harvey S. Goldman, Ph.D.  
Jeffrey M. Haydu, Ph.D.  
Bennetta W. Jules-Rosette, Ph.D.  
Rebecca E. Klatch, Ph.D. *Academic Senate Distinguished Teaching Award*  
Richard P. Madsen, Ph.D., Chair  
David P. Phillips, Ph.D.  
Andrew T. Scull, Ph.D., *Academic Senate Distinguished Teaching Award*  
Gershon Shafir, Ph.D.  
John D. Skrentny, Ph.D.  
Carlos H. Waisman, Ph.D.

## PROFESSORS EMERITI

Rae Lesser Blumberg, Ph.D.  
Aaron V. Cicourel, Ph.D.  
Jack D. Douglas, Ph.D.  
Joseph R. Gusfield, Ph.D.  
Hugh B. Mehan, Ph.D., *Academic Senate Distinguished Teaching Award*  
Jacqueline P. Wiseman, Ph.D.

## ASSOCIATE PROFESSORS

Richard G. Biernacki, Ph.D.  
Amy J. Binder, Ph.D.  
Mary F. Blair-Loy, Ph.D.  
Ivan T. Evans, Ph.D.  
John H. Evans, Ph.D.  
David S. Fitzgerald, Ph.D.  
Martha Lampland, Ph.D.  
Isaac Martin, Ph.D.  
Akos Rona-Tas, Ph.D.  
Charles Thorpe, Ph.D.  
Cihan Tugal, Ph.D.  
Christena Turner, Ph.D.  
Leon Zamosc, Ph.D.

## ASSISTANT PROFESSORS

April Linton, Ph.D.  
Thomas Medvetz, Ph.D.  
Kwai Ng, Ph.D.

## ADJUNCT PROFESSORS

Yen Espiritu, Ph.D.  
Chandra Mukerji, Ph.D.  
Mary L. Walshok, Ph.D.

OFFICE: Social Sciences Building, Room 401  
<http://sociology.ucsd.edu>

## SOCIOLOGY AT UC SAN DIEGO

Sociology studies societies and human groups: their composition, organization, culture, and development. It combines scientific and humanistic methods to investigate a subject that is both relevant and broad—ranging from social interaction in everyday life to social changes taking place on a global scale. The Department of Sociology at UC San Diego offers an innovative program that covers

the breadth of the discipline while giving students opportunities to specialize in areas of their choice, to conduct independent research, and to participate in an Honors Program. The department also encourages majors to study abroad and to take courses in other humanities and social science departments in order to expand their perspective on sociological topics.

Students at UCSD can explore a full range of sociological inquiry through courses in such established fields as Third World development, law, culture, social movements, religion, race and ethnic relations, gender roles, medicine, and mental illness. In addition, students have the opportunity to participate in courses found in few other sociology departments, such as the politics of language, ethnographic film, the Holocaust, comparative sex stratification, mass media, and revolutions. The faculty also teach an exceptional array of courses focusing on specific societies or world regions, including Africa, Japan, China, Latin America, eastern Europe, the former Soviet Union, and the United States.

Thus sociology is a valuable major for students who want to enter law, medicine, architecture, business, or politics. It also provides a solid liberal arts education for students who plan careers in such fields as criminal justice, public health, urban planning, social welfare, counseling, public administration, international relations, or market research. For students who wish to pursue graduate study in the social sciences for careers in teaching or scholarly research, an undergraduate degree from the Department of Sociology will provide a thorough grounding in recent theoretical and methodological advances in the discipline. A sociology major offers excellent preparation for teaching in the elementary schools. If you are interested in earning a California teaching credential from UCSD, contact the Teacher Education Program for information about the prerequisite and professional preparation requirements. It is recommended that you contact TEP as early as possible in your academic career. Whatever the career choice, the study of sociology can help the student cultivate a critical awareness of social life.

Students interested in majoring or minoring in sociology should stop by the Department of Sociology office, SSB 401, for program information and handouts. These clarify specific procedures and guidelines, and provide recommendations for areas of specialization within the major, as well as for graduate studies and careers in sociology.

## THE UNDERGRADUATE PROGRAM

### THE MAJOR

Students may choose to major in general sociology or in one of several concentrations, described below. Some basic requirements for the B.A. are common to all of these majors. All students must complete four lower-division and twelve upper-division courses in sociology.

A 2.0 GPA is required in the major, and students must earn at least a C– in each course used for the major. No courses taken to apply toward the major may be taken on a Pass/Not Pass basis except Sociology 199. Only one such special studies course (including internships) may be applied toward the major. Special studies courses must be applied for and

approved by the department before the beginning of the quarter in which the student wishes to enroll, and can only be taken on a Pass/Not Pass basis. See the staff undergraduate coordinator for the necessary application forms and deadlines.

### Lower-Division

The four lower-division requirements for a major in sociology are

- Sociology 1, 2 and 60. (We strongly recommend you take Sociology 1 and 2 in sequence.)
- One course from the following: Sociology 10, 20, 30, 40 or 50

It is advisable that students complete these required lower-division courses (which should be taken during the freshman or sophomore year) before continuing with their upper-division work. Sociology 60 is a prerequisite for all upper-division methods courses.

### Upper-Division

Twelve upper-division courses are needed for the major. Sociology 100 is required (students are strongly advised to complete this course by the end of their junior year), as well as one of the following methods courses:

- Sociology 103M
- Sociology 104
- Sociology 105
- Sociology 106
- Sociology 106M
- Sociology 108
- Sociology 109
- Sociology 110

Sociology 60 is a prerequisite for these methods courses.

Students are encouraged to complete their theory and methods courses early in their program, since theoretical perspectives and skills in methods will enhance their subsequent course work. Ten additional upper-division classes are required for the major. The specific choices will depend on the student's major concentration.

### REQUIREMENTS FOR MAJOR IN GENERAL SOCIOLOGY

Students who seek a B.A. in General Sociology may complete any ten additional upper-division Sociology classes.

### Requirements for Major Concentrations

Students may graduate with a B.A. in one of seven concentrations by choosing at least five upper-division classes from the course offerings in that concentration, as part of the ten upper-division courses for the major. Only one major concentration is allowed.

#### Concentration in International Studies

Students may graduate with a B.A. in Sociology/International Studies by completing at least five of the following courses as part of the ten

upper-division courses required for the major. This concentration would be especially appropriate for those interested in international business, foreign service, or international law.

SOCI 111E. Human Rights: Principles and Problems  
SOCI 111F. Human Rights: Practices and Cases  
SOCI 130. Population and Society  
SOCI 145. Violence and Society  
SOCI 148. Political Sociology  
SOCI 151. Comparative Race and Ethnic Relations  
SOCI 152. Urban Sociology  
SOCI 157. Religion in Contemporary Society  
SOCI 158. Islam in the Modern World  
SOCI 162R. Religion and Popular Culture in East Asia  
SOCI 169. Citizenship, Community, and Culture  
SOCI 176. War and Society  
SOCI 177. International Terrorism  
SOCI 178. The Holocaust  
SOCI 179. Social Change  
SOCI 180. Social Movements and Social Protest  
SOCI 181. Modern Western Society  
SOCI 182. Ethnicity and Indigenous Peoples in Latin America  
SOCI 183. Minorities and Nations  
SOCI 185. Globalization and Social Development  
SOCI 187. African Societies through Film  
SOCI 188D. Latin America: Society and Politics  
SOCI 188E. Community and Social Change in Africa  
SOCI 188F. Modern Jewish Societies and Israeli Society  
SOCI 188G. Chinese Society  
SOCI 188J. Change in Modern South Africa  
SOCI 189. Special Topics in Comparative-Historical Sociology

**Note:** Sociology SOCI 189 must be preapproved by undergraduate advisor.

It is recommended that students concentrating in this area take Sociology 20 as part of their lower-division requirements.

#### Concentration in American Studies

Students may graduate with a B.A. in Sociology/American Studies by completing at least five of the following courses as part of the ten upper-division courses required for the major. This concentration is especially appropriate for those interested in careers in American politics, education, and social work.

SOCI 115. Social Problems  
SOCI 117. Language, Culture, and Education  
SOCI 125. Sociology of Immigration  
SOCI 127. Immigration, Race, and Ethnicity  
SOCI 126. Social Organization of Education  
SOCI 129. The Family  
SOCI 148. Political Sociology  
SOCI 151. Comparative Race and Ethnic Relations  
SOCI 151M. Chicanos in American Society  
SOCI 153. Urban Sociology  
SOCI 154. Religious Institutions in America  
SOCI 155. The City of San Diego  
SOCI 157. Religion in Contemporary Society  
SOCI 163. Migration and the Law  
SOCI 180. Social Movements and Protest  
SOCI 188K. American Society

It is recommended that students concentrating in this area take Sociology 10 as part of their lower-division requirements.

#### Concentration in Science and Medicine

Students may graduate with a B.A. in Sociology/Science and Medicine by completing at least five of the following courses as part of the ten upper-division courses required for the major. This concentration is especially appropriate for those interested in careers in the health professions or technology-related fields.

SOCI 113. Sociology of the AIDS Epidemic  
SOCI 134E. The Making of Modern Medicine  
SOCI 135. Medical Sociology  
SOCI 136E. Sociology of Mental Illness: An Historical Approach  
SOCI 136F. Sociology of Mental Illness in Contemporary Society  
SOCI 138. Genetics and Society  
SOCI 149. Sociology of the Environment  
SOCI 167. Science and War  
SOCI 168E. Sociology of Science  
SOCI 168T. Sociology of Technology

It is recommended that students concentrating in this area take either Sociology 30 or 40 as part of their lower-division requirements.

#### Concentration in Culture and Communication

Students may graduate with a B.A. in Sociology/Culture and Communication by completing at least five of the following courses as part of the ten upper-division courses required for the major. This concentration is especially appropriate for those interested in careers related to education, the media, or marketing.

SOCI 116. Gender and Language in Society  
SOCI 117. Language, Culture, and Education  
SOCI 118. Sociology of Gender  
SOCI 120T. Special Topics in Communication and Culture  
SOCI 131. Sociology of Youth  
SOCI 137. Sociology of Food  
SOCI 156. Sociology of Religion  
SOCI 157. Religion in Contemporary Society  
SOCI 160. Sociology of Culture  
SOCI 162. Popular Culture  
SOCI 162R. Religion and Popular Culture in East Asia  
SOCI 165A. American News Media  
SOCI 166. Sociology of Knowledge  
SOCI 172. Films and Society  
SOCI 174. Sociology of Literature  
SOCI 184. Gender and Film

**Note:** Sociology SOCI 120T must be preapproved by undergraduate advisor.

It is recommended that students concentrating in this area take Sociology 10 as part of their lower-division requirements.

#### Concentration in Social Inequality

Students may graduate with a B.A. in Sociology/Social Inequality by completing at least five of the following courses as part of the ten upper-division courses required for the major. This concentration is especially appropriate for those interested in social services and education.

SOCI 114. Culture and Ethnicity  
SOCI 116. Gender and Language in Society  
SOCI 117. Language, Culture, and Education  
SOCI 118. Sociology of Gender

#### SOCI 119. Sociology of Sexuality and Sexual Identities

SOCI 126. Social Organization of Education  
SOCI 127. Immigration, Race, and Ethnicity  
SOCI 129. The Family  
SOCI 132. Gender and Work  
SOCI 139. Sociology Inequality: Class, Race, and Gender  
SOCI 148. Political Sociology  
SOCI 151. Comparative Race and Ethnic Relations  
SOCI 151M. Chicanos in American Society  
SOCI 153. Urban Sociology  
SOCI 161. Sociology of the Life Course  
SOCI 163. Migration and the Law  
SOCI 180. Social Movements and Protest  
SOCI 184. Gender and Film

It is recommended that students concentrating in this area take Sociology 10 or 20 as part of their lower-division requirements.

#### Concentration in Law and Society

Students may graduate with a B.A. in Sociology/Law and Society by completing at least five of the following courses as part of the ten upper-division courses required for the major. This concentration is especially appropriate for those interested in careers in law and criminology.

SOCI 111E. Human Rights: Principles and Problems  
SOCI 111F. Human Rights: Practices and Cases  
SOCI 140. Sociology of Law  
SOCI 140F. Law and the Workplace  
SOCI 141. Crime and Society  
SOCI 142. Social Deviance  
SOCI 146. Law Enforcement in America  
SOCI 147. Organizations, Society, and Social Justice  
SOCI 159. Special Topics in Social Organizations and Institutions  
SOCI 160E. Law and Culture  
SOCI 163. Migration and the Law  
SOCI 173. Elite Crime

**Note:** Sociology SOCI 159 must be preapproved by undergraduate advisor.

It is recommended that students concentrating in this area take Sociology 50 as part of their lower-division requirements.

#### Concentration in Economy and Society

Students may graduate with a B.A. in Sociology/Economy and Society by completing at least five of the following courses as part of the ten upper-division courses required for the major. This concentration is especially appropriate for those interested in careers related to contemporary business.

SOCI 121. Economy and Society  
SOCI 125. Sociology of Immigration  
SOCI 137. Sociology of Food  
SOCI 132. Gender and Work  
SOCI 139. Social Inequality: Class, Race, and Gender  
SOCI 140F. Law and the Workplace  
SOCI 148E. Inequality and Jobs  
SOCI 152. Social Inequality and Public Policy  
SOCI 163. Migration and the Law  
SOCI 167. Science and War  
SOCI 185. Globalization and Social Development

It is recommended that students concentrating in this area take either Sociology 10 or 20 as part of their lower-division requirements.

## Education Abroad Program

Students are encouraged to participate in the UC Education Abroad Program (EAP) or UCSD's Opportunities Abroad Program (OAP) while still making progress toward completing their major. Students considering this option should discuss their plans with the undergraduate advisor prior to going abroad, and courses taken abroad must be approved by the department. It may be possible to use some related courses outside of the discipline of sociology toward the major. For more information on EAP, see the section of this catalog on the Education Abroad Program. Interested students should contact the Programs Abroad Office in the International Center. To petition particular courses taken abroad, see the undergraduate advisor in the Department of Sociology.

## RECOMMENDATIONS FOR TRANSFER STUDENTS

Students transferring from a community college or other university may petition for sociology credit for courses taken at their previous institution. For students transferring from the California Community College System, articulation agreements for many courses have been developed that facilitate the petition process.

## Transferring Lower-Division Credit

The four lower-division requirements for a major in sociology are

- Sociology 1, 2, and 60: Articulations exist at most community colleges
- Sociology 10, 20, 30, 40, or 50: If your community college does not offer an already articulated course, please see the undergraduate coordinator for information about petitioning potential lower-division sociology transfer credit.

It is important to note that eight of the twelve upper-division courses in the undergraduate program must be taken in the Department of Sociology at UCSD, unless students obtain special acceptance of additional courses from the chair and the faculty undergraduate advisor.

## THE MINOR

The minor consists of seven sociology courses: two lower-division and five upper-division. Unless colleges specify specific courses to be taken, the student may choose any two lower-division sociology courses (Soc. 1, 2, 10, 20, 30, 40, or 60) and any five upper-division courses (Soc. 100 to 190). Courses for the minor must be taken for a letter grade only. Special study courses or internships may not be applied toward the minor.

## THE HONORS PROGRAM

The Department of Sociology offers an honors program to those students who have demonstrated excellence in the sociology major. Successful completion of the honors program enables the student to graduate "With Highest Distinction," "With High Distinction," or "With Distinction," depending upon performance in the program.

## Eligibility

Students may apply to the honors program if they meet the following requirements:

1. junior standing (ninety units completed)
2. GPA of 3.5 or better in the major
3. recommendation of a faculty sponsor familiar with student's work
4. must have completed at least four upper-division sociology courses
5. overall GPA of 3.2 or better
6. must have completed SOCI 100 and one upper-division methods course prior to the fall quarter when the honors course begins; alternatively, the consent of the honors program director or the undergraduate advisor must be obtained

Interested students may pick up an application from the staff undergraduate coordinator in the Department of Sociology. Completed applications must be in the department office no later than week five of the spring quarter prior to the start of the honors program in the fall.

Students traveling abroad during their junior year should note that the deadline for applications still applies to them and should make arrangements accordingly.

Enrollment in the honors program is limited. Final decisions on acceptance into the program will be made by the presiding faculty member.

## Course Requirement

The student must take Sociology 196A, Advanced Studies in Sociology, and Sociology 196B, Supervised Thesis Research, which will count as two of the twelve upper-division courses required for the major. Each student will choose a faculty advisor to help supervise the thesis research and writing with the honors program director.

Students whose GPA in the major falls below 3.5 or who do not earn at least an A- in the honors seminars will not graduate with distinction, but they may count the two honors courses among the twelve upper-division courses required for the major. Students must maintain a 3.5 GPA in the major and a 3.2 overall GPA until final graduation, in order to receive honors in the sociology honors program. To graduate "With Highest Distinction" the student must earn an A+; to graduate "With High Distinction" the student must earn an A; and to graduate "With Distinction" the grade must be an A-.

## THE GRADUATE PROGRAM

The graduate program in sociology at the University of California, San Diego is organized on the basis of programs of specialization in comparative and historical sociology, the sociology of culture, social inequalities, and science, technology, and medicine. It is designed to prepare students for two main goals: to contribute to the increase of knowledge about societies and thereby advance the discipline of sociology; and to teach sociology at the graduate and undergraduate levels. The majority of graduates from the program find teaching and research positions in colleges and universities, although some also work in non-academic research

and social policy positions. The department offers a course of study leading to the doctor of philosophy degree. While the Master of Arts degree is awarded as a step toward the completion of the Ph.D., applicants seeking only an M.A. degree are not accepted.

Departmental Research and Teaching Members of the department are engaged in a wide variety of research and teaching activities that fall into four broad areas of concentration that correspond to our programs of specialization. Much of the research carried out by departmental students and faculty is distinguished by unique intersections of these areas.

## Comparative and Historical Sociology

Many members of our faculty have research interests in the historical and/or comparative analysis of social institutions, structures, and processes, and social change in general. Using methods of comparative historical research and concepts drawn from social theory, individual faculty are engaged in research on, among other things: (1) political sociology, including revolution, social and political movements, and the evolution of the modern state, (2) economic transformation in contemporary societies (industrial countries, "emerging markets," and agrarian societies), including the labor process, stratification and the organization of work, and the development of market economies, (3) collective identities and social relations, including nationalism, class, gender, race, and ethnicity, and (4) social control and institutionalization. The department is among the most internationally oriented departments of sociology in the world, with specialists in most regions of the world, including Eastern and Western Europe, the former Soviet Union, Japan, China, southern Africa, Latin America, the Middle East, as well as the United States.

## Sociology of Culture

A great number of the faculty have research and teaching interests in the sociology of culture broadly conceived. Sociology of culture involves topics such as: (1) the interpretation of the symbol systems that constitute meaningful resources for social action, (2) the analysis of the processes through which patterns of meaning are socially reproduced, and (3) the study of the interaction between culture change and social change. Many faculty have an interest in the comparative study of cultural traditions around the world. Others are interested in the relationship of culture to social movements and collective identities. And some see the sociology of culture not simply as a subdiscipline but as a general theoretical perspective on social experience. More specific substantive interests include sociology of knowledge and intellectuals, political culture, the culture of work, education and socialization, comparative moral cultures, the cultural dimensions of ethnicity, gender, sexuality, and popular culture.

## Sociology of Social Inequalities

A large number of departmental faculty have expertise in the study of social inequalities, including those based on distinctions of gender, race, ethnicity, class, language, citizenship, and sexuality. Unique to our program are (1) focus on the processes by which social distinctions and identities

are themselves constructed, represented, and maintained over time, (2) comprehensive training in both qualitative and quantitative approaches to studying inequality, (3) emphasis on international and historical inequality research, and (4) expertise in social movements as products of and challenges to inequality. Many members of the department study inequalities in workplaces, schools, markets, states, families, politics, law, and medicine.

### ***Sociology of Science, Technology, and Medicine***

A substantial fraction of the faculty has research and teaching interests focused on the interrelationships between science, technology, and medicine and modern society. Drawing on a range of sociological and historical methodologies, individual faculty are engaged in research on science and social movements, scientists and the state, biomedicine, the social history of madness and psychiatry, the historical sociology of scientific knowledge and practice, and sociological approaches to the Scientific Revolution. (For information on the interdisciplinary Science Studies Program, see below "[Interdisciplinary Programs of Study](#).")

### **ADMISSION**

Admission to the graduate program in sociology is open to students with excellent undergraduate records in any field. Some previous work in sociology or the social and behavioral sciences is advisable, but not required. New students are admitted in the fall quarter of each academic year. A bachelor's degree from an accredited college or university is a prerequisite for admission to the graduate program. Prospective applicants should submit the official online application for admission and awards (same form), one set of official transcripts from each institution attended after high school, official scores from the Graduate Record Examination, application fee, at least three letters of recommendation, and one or more samples of the applicant's own writing, such as a term paper. Additionally, foreign applicants must submit official scores from the Test of English as a Foreign Language (TOEFL) and the Test of Written English (TWE). Applicants are encouraged to contact and communicate with the department to talk with faculty and graduate students. The application deadline is January 4, of each year.

### **PROGRAM OF STUDY**

The graduate programs in the University of California system work under the "normative time" standard. Normative time refers to the time period in which students, under normal circumstances, are expected to complete their requirements for the Ph.D. degree. Each department establishes a normative time for its doctoral program, and for the Department of Sociology, as for most graduate programs in the university, it is six years.

### **Course Requirements**

Students are required to enroll as full-time graduate students, to carry a minimum enrollment of twelve units of graduate-level courses each quarter, and to maintain a grade-point average of 3.0 or better.

### **Theory and Methods Requirements**

Students take almost all the courses on theory and methods in their first year in the program. They are required to take two courses in classical sociological theory (Sociology 201A/B) and one in contemporary theory (Sociology 202), two in quantitative methods (Sociology 205 and 206), and two in qualitative methods (from among Sociology 203, Field Methods; Sociology 204, Text and Discourse Analysis; or Sociology 207, Comparative-Historical Methods). In addition, students enroll in a two-credit introduction to the faculty and their research (Sociology 208). Note: Sociology 208 is in addition to other requirements.

The remaining theory and methods requirements are Sociology 252 and 253, a two-quarter practicum sequence, which will be taken in the fall quarters of the second and third year. In these courses, students will complete a piece of research they have started in a previous seminar, write a paper, and revise it for submission to a journal. The emphasis in the first quarter will be on the completion of the research for this project, and the second quarter will focus on the writing of the results and revision of drafts.

### **Core Seminars**

These are survey courses in major substantive fields. Students must take three out of the following eight, which the department offers regularly: Sociology 264, Economic Sociology; Sociology 226, Political Sociology; Sociology 216, Sociology of Culture; Sociology 234, Intellectual Foundations of the Study of Science, Technology, and Medicine; Sociology 212, Social Stratification; Sociology 267, Sociology of Gender; Sociology 244, Sociology of Race and Ethnicity; and Sociology 222, Social Movements. These are major areas of sociology and fields in which several of the members of our faculty specialize. Moreover, several of these seminars serve as introductions to the programs of specialization on which the program is based (see below).

### **Remaining Courses**

Beyond these requirements, students must take four seminars, at least two of which must be in the program of specialization selected by the student. In total, sixteen graduate courses, plus the introduction to the faculty, are required for advancing to candidacy.

### **The Programs of Specialization**

The department currently offers specialized Ph.D. programs in comparative and historical sociology, sociology of culture, sociology of social inequalities, and the sociology of science, technology, and medicine. Affiliation to the clusters is voluntary and non-exclusive, and the department encourages multiple participation and joint activities among the groups. Students could qualify in more than one concentration, if they wish, and they will not be required to specialize in any one of them (although we are confident that most will find it advantageous to do so). The curriculum for each specialization is relatively light, in order to provide students with a solid common background in theory and methods, and allow for as much interface as possible between the programs. The requirements are: appropriate qualitative methods courses, one of the core seminars (see

above) in areas relevant for the concentration, two specialized seminars, pertinent specialties for the field examination, and the dissertation.

The qualitative methods requirement varies according to the program of specialization. Students who concentrate in comparative and historical sociology must take Sociology 207, Comparative-Historical Methods. For sociology of culture, Sociology 203, Field Methods, is required. Students specializing in social inequalities should take at least one of the following courses: Sociology 203, Field Methods; Sociology 204, Text and Discourse Analysis; or Sociology 207, Comparative-Historical Methods. Finally, students specializing in sociology of science, technology, and medicine must choose two of the following three courses in qualitative methods: Sociology 203, Field Methods; Sociology 204, Text and Discourse Analysis; and Sociology 207, Comparative-Historical Methods. The required core seminars are survey courses in major substantive fields. Students must take three out of the following eight, which the department offers regularly: Sociology 264, Economic Sociology; Sociology 226, Political Sociology; Sociology 216, Sociology of Culture; Sociology 234, Intellectual Foundations of the Study of Science, Technology, and Medicine; Sociology 212, Social Stratification; Sociology 267, Sociology of Gender; Sociology 244, Sociology of Race and Ethnicity; and Sociology 222, Social Movements. These are major areas of sociology and fields in which several of the members of our faculty specialize. Moreover, several of these seminars serve as introduction to the programs of specialization on which the program is based.

The core seminars required for each program of specialization are the following:  
**Sociology 264, Economic Sociology or Sociology 226, Political Sociology, for comparative and historical sociology**  
**Sociology 216, Sociology of Culture, for sociology of culture**  
**Sociology 212, Social Stratification or Sociology 244, Sociology of Race and Ethnicity or Sociology 267, Sociology of Gender, for social inequalities**  
**Sociology 234, Intellectual Foundations of the Study of Science, Technology, and Medicine, for sociology of science, technology, and medicine**

### **PROGRAM OVERVIEW**

#### **First-Year Evaluation**

All students are evaluated by the department faculty toward the end of the academic year. At the end of the student's first year in the program, student performance is also evaluated by the Graduate Program Committee, including the director of Graduate Studies, the faculty teaching the core sequences, and by their faculty advisor. Students whose performance is satisfactory are allowed to continue the regular course of study; others may be asked to repeat some courses or to do additional course work; others may be asked to withdraw from the program. Evaluations are communicated to students in writing.

## Second-Year Evaluation and the M.A. Degree

The master's degree is earned as one of the requirements of the Ph.D. and is based on the quality of the student's course work described below. At the end of the second year, students are evaluated by the Graduate Program Committee for the master's degree. At that time, the committee ascertains the student's suitability for doctoral work.

The fifteen core courses required to receive the M.A. degree are

**Sociology 201A. Classical Sociological Theory I**  
**Sociology 201B. Classical Sociological Theory II**  
**Sociology 202. Contemporary Sociological Theory**  
**Sociology 205. Quantitative Methods I**  
**Sociology 206. Quantitative Methods II**  
**Sociology 252. Research Practicum I**

Two courses chosen from

**Sociology 203. Field Methods**  
**Sociology 204. Text and Discourse Analysis**  
**Sociology 207. Comparative-Historical Methods**

Three seminars from

**Sociology 212. Social Stratification**  
**Sociology 216. Sociology of Culture**  
**Sociology 222. Social Movements**  
**Sociology 226. Political Sociology**  
**Sociology 234. Intellectual Foundation of the Study of Science, Technology, and Medicine**  
**Sociology 244. Sociology of Race and Ethnicity**  
**Sociology 264. Economic Sociology**  
**Sociology 267. Sociology of Gender**

Three elective sociology graduate seminars.

**One may be outside the department and may be taken S/U.**

At the beginning of the spring quarter of their second year in the program or at the beginning of the quarter in which they wish to be considered, students must submit to the committee for evaluation three papers they have written for seminars taught by different faculty. Reviewers assess the quality of the overall record and determine whether it indicates a potential for conducting doctoral research.

The final decision regarding the M.A. degree is based on the student's GPA, the three papers, and yearly faculty evaluations. The committee makes one of the following three recommendations: pass, M.A. only, and non-pass. Pass means that students may proceed toward the Ph.D. Those given M.A. only evaluations are granted the degree but may not continue toward the Ph.D. Students who received non-pass evaluations are asked to withdraw without a graduate degree.

Students admitted for a Ph.D. with a master's degree in sociology may not be candidates for a second master's degree.

## The Field Examination

In the quarter in which students expect to finish the theory and methods requirements, the three core seminars, and the six elective seminars, students become eligible to take the field examination. This examination **must be completed** by the end of the student's third year in the program. The object of the field examination is to demonstrate mastery of two established, broad, and distinct fields

of sociological inquiry, selected from a list of fields provided by the department. The examination is carried out by a faculty committee composed of no fewer than four departmental faculty, one of whom serves as chair. The choice of fields and the composition of the committee **must be approved** by the Graduate Program Committee **before the student starts preparing for the exam**. Faculty from departments other than sociology may be added (or, if necessary, substituted) by petition to the Graduate Program Committee.

The demonstration of mastery has both written and oral components. The written part consists of two papers, one in each field, and a course syllabus for a course they would teach in one of the two fields in which they take their orals. In these papers, students are expected to demonstrate a grasp of key issues and debates, and of the broad, conceptual history of the field. These reviews are based on a bibliography drawn up by the student in consultation with relevant committee members and other faculty in each field. Students are expected to know the central arguments of all the books and papers in the bibliographies, regardless of the extent to which these books and articles have been used in the papers. Field papers **must** be a minimum of thirty and a maximum of fifty pages each, exclusive of notes and should include at least twenty to thirty books or article equivalents. The two bibliographies may not significantly overlap, either in literature surveyed or in specific titles. The papers, the bibliographies, and the syllabus **must** be submitted to the committee **at least two weeks before orals**, or the orals cannot go forward.

The oral part lasts two hours and covers both fields. It is given by the examining committee, sitting as a whole, and is based on the bibliographies, papers, and course syllabus submitted by the student. The exam does not focus on the papers, but on the students' knowledge of the fields. Following the oral examination, the committee evaluates the student on the basis of both the written and the oral components of the examination. Possible grades are high pass, pass, conditional pass, and no pass. High pass recognizes exceptional performance. Conditional pass indicates that the committee has passed the student pending the completion of additional work. Students receiving a grade of no pass will have an opportunity to retake the examination, should they so desire, no later than the end of the subsequent quarter. Students electing not to retake the examination or receiving a grade of no pass a second time will be asked to withdraw from the graduate program.

Students will have to constitute their field exam committee **two months** before the proposed date of the exam. Once the committee is constituted it can be changed only if a faculty member becomes unavailable. Students will have to submit one copy per member of a substantial draft of their field papers **one month in advance** to the graduate coordinator, who then distributes them to the committee members. Faculty, in, turn will commit to read and comment on the papers in two weeks time.

All papers (as opposed to the drafts) and the syllabus must be submitted to the committee **two weeks before** the fields.

## The Dissertation Prospectus and Hearing

The central intellectual activity leading to the award of the Ph.D. degree is the doctoral dissertation: an original contribution to knowledge, based on substantial, original research on a topic of intellectual significance within the field of sociology.

Following successful completion of the field examination, the student establishes a doctoral committee to supervise dissertation research. This is a five-person committee, including three faculty from within the department and two from other departments within the university. The committee should include the faculty members whose fields of expertise make them most appropriate for supervising the students' research. The student approaches the faculty member he or she would like to include, but the committee **must** be approved by the director of Graduate Studies and the department chair **before** the student starts working on the prospectus. The composition of the committee may or may not overlap with the committee that carried out the field examination. If the student elects to have a six member committee, the sixth member has all the same obligations as the other committee members.

By the end of the spring quarter of the fourth year in the department, the student must have a dissertation prospectus approved by his or her doctoral committee. The dissertation prospectus is a document that presents the research topic of the dissertation, places it in the context of the relevant literature, discusses its significance, specifies and justifies the methods the student intends to use, establishes the feasibility of the research, and indicates the anticipated steps leading to completion.

Following submission of the dissertation prospectus, the student must defend it at a hearing before the doctoral committee. The purpose of the hearing is to certify that the prospectus is significant and feasible, that the research design is appropriate, and that the student is prepared to carry it out successfully. Based on the written prospectus and the hearing, the committee may choose to approve the prospectus or to ask for revisions and resubmission. The prospectus hearing serves, in effect, as a qualifying examination, and approval of the dissertation prospectus is the final step to advancement to candidacy for the Ph.D. Degree

Students will have to constitute their dissertation committee **three months** before the proposed date of the exam. Once the committee is constituted it can be changed only if a faculty member becomes unavailable. Students will have to submit one copy per member of a substantial draft of their prospectus **one month in advance** to the graduate coordinator, who then distributes them to the committee members. Faculty in turn, will commit to read and comment on the papers in two weeks time.

## The Doctoral Dissertation

Upon approval of the dissertation prospectus, the student proceeds with dissertation research. Students are expected to consult with committee members as the research progresses and to keep the committee chair advised of progress made.

Once the dissertation is substantially completed and committee members have had the opportunity to review drafts of the written work, the committee

meets at least one month before the defense takes place, with or without the student present, to consider the progress made and to identify concerns, changes to be made, or further work to be done. Once the committee members are substantially satisfied with the written work, the student, in consultation with the committee, schedules the oral defense of the dissertation. By university regulation, this defense is open to the public.

The final version of the dissertation must be approved by each member of the doctoral committee. All members of the committee **must** be present at the defense. Exceptions may be made **only** under very restrictive conditions. Further, the student **must** consult with the Office of Graduate Studies to be told of appropriate requirements for the thesis to be filed. Having obtained this approval and successfully defended the dissertation in oral examination, the student is eligible to receive the Ph.D. Degree. The final version of the dissertation is then filed with the university librarian via the Office of Graduate Studies. Acceptance of the dissertation by the university librarian is the final step in completing all requirements for the Ph.D.

### Ph.D. Time Limit Policies

Students must be advanced to candidacy by the end of four years (PCTL—Precandidacy Time Limit). Normative time is six years. Total university financial support (SUTL—Support Time Limit) cannot exceed seven years. Total registered (TRTL—Total Registered Time Limit) time at UCSD cannot exceed eight years.

## INTERDISCIPLINARY PROGRAMS OF STUDY

### Sociology of Science, Technology, and Medicine and the Science Studies Program

Students interested in the interrelationships between science, technology, and medicine (STM) and the larger social order can opt for one of two specialized programs of study. The first of these is undertaken wholly within the department (see above). The second approach is to seek admission to the Science Studies Program, a joint doctoral program that brings together graduate students from the Departments of Sociology, History, Philosophy, and Communication. Students in the Program pursue a cross-disciplinary curriculum leading to dissertation research in the sociology of science, technology, or medicine, broadly conceived. Sociology faculty affiliated with this Program have research interests across the broad spectrum of science studies, from the philosophy and history of science to the organization of scientific discovery and the culture of specific work.

Students may seek admission to the Science Studies Program at the same time they apply for admission to the Department of Sociology, or may, in certain circumstances, request to be accepted into the Program at some point after entering the University of California, San Diego. The requirements of the Science Studies Program are similar to those of the standard graduate program. However, there are some distinct curricular requirements in the first two years of the Program, as well as some distinct

emphases in the qualifying examination. The core of the Program is a two-quarter team-taught seminar sequence taken in the first year, the first quarter being an interdisciplinary introduction to science studies and the second quarter (or core seminar) being devoted to special topics in science studies which vary from year to year.

For details on the Science Studies Program, including information about requirements, write to the University of California, San Diego, Coordinator, Science Studies Program, 9500 Gilman Drive # 0104, La Jolla, CA 92093-0104; or telephone the program coordinator at (858) 534-0491. Visit their Web site: <http://sciencestudies.ucsd.edu>.

### Interdisciplinary Program in Sociology and Cognitive Science

This program allows students to earn a Ph.D. in sociology and cognitive science. Students must complete all the regular sociology requirements. In addition, they take six cognitive science seminars and select a dissertation committee composed of three Sociology and three Cognitive Science Program faculty. Admission to this program requires a separate application and is contingent on acceptance into the Department of Sociology. For more information, contact the coordinators in the Department of Sociology, (858) 534-4626, or the Cognitive Science Department, (858) 534-7141. Please view our Web site for application and department handbook information: <http://sociology.ucsd.edu>.

## COURSES

*For course descriptions not found in the UC San Diego General Catalog, 2010–11, please contact the department for more information.*

### LOWER-DIVISION

#### SOCI 1. The Study of Society (4)

An introduction to the organizing themes and ideas, empirical concerns, and analytical approaches of the discipline of sociology. The course focuses on both classical and contemporary views of modern society, on the nature of community, and on inequality, with special attention to class, race, and gender. Materials include both theoretical statements and case studies. Will not receive credit for SOCI 1 and SOCL 1A.

#### SOCI 2. The Study of Society (4)

A continuation of Sociology/L 1A. The focus here is on socialization processes, culture, social reproduction and social control, and collective action. As in 1A, materials include both theoretical statements and case studies. While 1B may be taken as an independent course, it is recommended that students take 1A and 1B in sequence, as the latter builds on the former. Will not receive credit for SOCI 2 and SOCL 1B.

#### SOCI 10. American Society: Social Structure and Culture in the U.S. (4)

An introduction to American society in historical, comparative, and contemporary perspectives. Topics will include American cultural traditions; industrialization; class structure; the welfare state; ethnic, racial, and gender relations; the changing position of religion; social movements; and political trends. Will not receive credit for SOCI 10 and SOCL 10.

#### SOCI 20. Social Change in the Modern World (4)

A survey of the major economic, political, and social forces that have shaped the contemporary world. The course will provide an introduction to theories of social change, as well as prepare the student for upper-division work in

comparative-historical sociology. Will not receive credit for SOCI 20 and SOCL 20.

#### SOCI 30. Science, Technology, and Society (4)

A series of case studies of the relations between society and modern science, technology, and medicine. Global warming, reproductive medicine, AIDS, and other topical cases prompt students to view science-society interactions as problematic and complex. Will not receive credit for SOCI 30 and SOCL 30.

#### SOCI 40. Sociology of Health Care Issues (4)

Designed as a broad introduction to medicine as a social institution and its relationship to other institutions as well as its relation to society. It will make use of both micro and macro sociological work in this area and introduce students to sociological perspectives of contemporary health care issues. Will not receive credit for SOCI 40 and SOCL 40.

#### SOCI 50. Introduction to Law and Society (4)

Interrelationships between law and society, in the U.S. and other parts of the world. We examine law's norms, customs, culture, and institutions, and explain the proliferation of lawyers in the U.S. and the expansion of legal "rights" worldwide. Will not receive credit for SOCI 50 and SOCL 50.

#### SOCI 60. The Practice of Social Research (4)

This course introduces students to the fundamental principles of the design of social research. It examines the key varieties of evidence, sampling methods, logic of comparison, and causal reasoning researchers use in their study of social issues. Will not receive credit for SOCI 60 and SOCL 60.

#### SOCI 87. Freshman Seminar (1)

The Freshman Seminar Program is designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminar topics will vary from quarter to quarter. Enrollment is limited to fifteen to twenty students, with preference given to entering freshmen.

#### SOCI 98. Directed Group Study (4)

Small group study and research under the direction of an interested faculty member in an area not covered in regular sociology courses. (P/NP grades only.) **Prerequisites:** lower-division standing; completion of thirty units of UCSD undergraduate study; minimum UCSD GPA of 3.0; completion and approval of Special Studies form. Consent of instructor and department approval required.

#### SOCI 99. Independent Study (4)

Individual study and research under the direction of an interested faculty member. P/NP grades only. **Prerequisites:** lower-division standing; completion of thirty units of UCSD undergraduate study; minimum UCSD GPA of 3.0; completion and approval of Special Studies form. Consent of instructor and department approval required.

### UPPER-DIVISION

#### SOCI 100. Classical Sociological Theory (4)

Major figures and schools in sociology from the early nineteenth century onwards, including Marx, Tocqueville, Durkheim, and Weber. The objective of the course is to provide students with a background in classical social theory, and to show its relevance to contemporary sociology. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 100 and SOCA 100.

#### SOCI 103M. Computer Applications to Data Management in Sociology (4)

Develop skills in computer management and analysis of sociological data. Practical experience with data produced by sociological research. Students will develop competency in the analysis of sociological data, by extensive acquaintance with computer software used for data analysis and management (e.g., SPSS). **Prerequisite:** SOCI 60.. Will not receive credit for SOCI 103M and SOCA 103M.

#### SOCI 104. Field Research: Methods of Participant Observation (4)

Relationship between sociological theory and field research. Strong emphasis on theory and methods of participant observation: consideration of problems of entry into field settings, recording observations, description/analysis

of field data, ethical problems in field work. Required paper using field methods. **Prerequisite:** SOCI 60; majors only. Will not receive credit for SOCI 104 and SOCA 104.

#### **SOCI 104Q. Qualitative Interviewing (4)**

This course provides students with tools to conduct original research using qualitative interviews. Students will learn how to prepare, conduct, and analyze qualitative interviews. Special emphasis will be placed on the presentation of research in written form. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 104Q and SOCA 104Q.

#### **SOCI 105. Ethnographic Film: Media Methods (6)**

(Conjoined with Soc/G 227.) Ethnographic recording of field data in written and audiovisual formats including film, video, and CD Rom applications. Critical assessment of ethnographies and audiovisual ethnographic videotape. **Prerequisite:** graduate standing or consent of instructor for Soc/G 227 and SOCI for SOCI 105. Will not receive credit for SOCI 105 and SOCA 105.

#### **SOCI 106. Comparative and Historical Methods (4)**

A broad-based consideration of the use of historical materials in sociological analysis, especially as this facilitates empirically oriented studies across different societies and through time, and their application in student research projects. **Prerequisite:** SOCI 60. Will not receive credit for SOCI 106 and SOCA 106.

#### **SOCI 106M. Holocaust Diaries (4)**

Methods for interpreting diaries, letters, and testaments written by victims and perpetrators of the Holocaust. Students use these sources for original research about life in hiding, ghettos, and death camps. Includes techniques for making comparisons and for generalizing from evidence. **Prerequisites:** SOCI 60 and SOCI 178 or the consent of instructor. Will not receive credit for SOCI 106M and SOCA 106M.

#### **SOCI 107. Epidemiological Methods: Statistical Study of Disease (4)**

Epidemiology is the statistical study of disease, and epidemiological methods are a powerful tool for understanding the causes of certain diseases, e.g., AIDS, scurvy, cholera, and lung cancer. These fundamental epidemiological methods will be taught. **Prerequisite:** SOCI 60. Will not receive credit for SOCI 107 and SOCA 107.

#### **SOCI 108. Survey Research Design (4)**

Translation of research goals into a research design, including probability sampling, questionnaire construction, data collection (including interviewing techniques), data processing, coding, and preliminary tabulation of data. Statistical methods of analysis will be limited primarily to percentages. **Prerequisite:** SOCI 60. Will not receive credit for SOCI 108 and SOCA 108.

#### **SOCI 109. Analysis of Sociological Data (4)**

Students test their own sociological research hypotheses using data from recent American and International social surveys and state-of-the-art computer software. Application of classical scientific method, interpretation of statistical results, and clear presentation of research findings. **Prerequisite:** SOCI 60. Will not receive credit for SOCI 109 and SOCA 109.

#### **SOCI 110. Qualitative Research in Educational Settings (4)**

Basic understanding of participant observation, interviewing, and other ethnographic research techniques through field experiences in school and community settings sponsored by CREATE. Students will learn to take field notes, write-up interviews, and compose interpretive essays based on their field experiences. **Prerequisite:** SOCI 60. Will not receive credit for SOCI 110 and SOCA 110A.

#### **SOCI 111E. Human Rights: Principles and Problems (4)**

An inquiry into the concept of human rights, the history of human rights in the twentieth century, and problems in both the concept and its implementation in modern societies. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 111E and SOCB 111A.

#### **SOCI 111F. Human Rights: Practices and Cases (4)**

An investigation into human rights practices in contemporary society, focusing on abuses and understanding both

their causes and responses to them. We will look at several key cases, probably including the Islamic world and East Asia. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 111F and SOCB 111B.

#### **SOCI 112. Social Psychology (4)**

This course will deal with human behavior and personality development as affected by social group life. Major theories will be compared. The interaction dynamics of such substantive areas as socialization, normative and deviant behavior, learning and achievement, the social construction of the self, and the social identities will be considered. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 112 and SOCB 112.

#### **SOCI 113. Sociology of the AIDS Epidemic (4)**

This course considers the social, cultural, political, and economic aspects of HIV/AIDS. Topics include the social context of transmission; the experiences of women living with HIV; AIDS activism; representations of AIDS; and the impact of race and class differences. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 113 and SOCB 113.

#### **SOCI 114. Culture and Ethnicity (4)**

Examines culture and inter-ethnic relations, the links between culture and ethnic variations in socio-economic achievement, and the intersection of culture and ethnicity with politics and policy. Topics include intermarriage, ethnic conflict, multicultural education and affirmative action. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 114 and SOCB 114.

#### **SOCI 115. Social Problems (4)**

Analyzes selected social problems in the United States, such as those regarding education, race relations, and wealth inequality, from various sociological perspectives, and also examines the various sites of debate discussion, like political institutions, TV and other media, and religious institutions. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 115 and SOCB 115.

#### **SOCI 116. Gender and Language in Society (4)**

(Same as LIGN 174.) This course examines how language contributes to the social construction of gender identities, and how gender impacts language use and ideologies. Topics include the ways language and gender interact across the life span (especially childhood and adolescence); within ethnolinguistic minority communities; and across cultures. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 116 and SOCB 118A.

#### **SOCI 117. Language, Culture, and Education (4)**

(Same as EDS 117.) The mutual influence of language, culture, and education will be explored; explanations of students' school successes and failures that employ linguistic and cultural variables will be considered; bilingualism; cultural transmission through education. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 117 and SOCB 117.

#### **SOCI 118. Sociology of Gender (4)**

An analysis of the social, biological, and psychological components of becoming a man or a woman. The course will survey a wide range of information in an attempt to specify what is distinctively social about gender roles and identities; i.e., to understand how a most basic part of the "self"—womanhood or manhood—is socially defined and socially learned behavior. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 118 and SOCB 118.

#### **SOCI 118E. Sociology of Language (4)**

An examination of how the understanding of language can guide and inform sociological inquiries and a critical evaluation of key sociological approaches to language, including ethnomethodology, frame analysis, sociolinguistics, structuralism and poststructuralism, and others. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 118E and SOCB 118L.

#### **SOCI 119. Sociology of Sexuality and Sexual Identities (4)**

Introduction both to the sociological study of sexuality and to sociological perspectives in gay/lesbian studies. Examines the social construction of sexual meanings, identities, movements, and controversies; the relation of sexuality to other institutions; and the intersection

of sexuality with gender, class, and race. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 119 and SOCB 119.

#### **SOCI 120T. Special Topics in Culture, Language, and Social Interaction (4)**

This course will examine key issues in culture, language, and social interaction. Content will vary from year to year. **Prerequisite:** upper-division standing.

#### **SOCI 121. Economy and Society (4)**

An examination of a central concern of classical social theory: the relationship between economy and society, with special attention (theoretically and empirically) on the problem of the origins of modern capitalism. The course will investigate the role of technology and economic institutions in society; the influence of culture and politics on economic exchange, production, and consumption; the process of rationalization and the social division of labor; contemporary economic problems and the welfare state. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 121 and SOCC 121.

#### **SOCI 125. Sociology of Immigration (4)**

Immigration from a comparative, historical, and cultural perspective. Topics include: factors influencing amount of immigration and destination of immigrants; varying modes of incorporation of immigrants; immigration policies and rights; the impact of immigration on host economies; refugees; assimilation; and return migration. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 125 and SOCB 125.

#### **SOCI 126. Social Organization of Education (4)**

(Same as EDS 126.) The social organization of education in the U.S. and other societies; the functions of education for individuals and society; the structure of schools; educational decision making; educational testing; socialization and education; formal and informal education; cultural transmission. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 126 and SOCC 126.

#### **SOCI 127. Immigration, Race, and Ethnicity (4)**

Examination of the role that race and ethnicity play in immigrant group integration. Topics include: theories of integration; racial and ethnic identity formation; racial and ethnic change; immigration policy; public opinion; comparisons between contemporary and historical waves of immigration. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 127 and SOCB 127.

#### **SOCI 129. The Family (4)**

An examination of historical and social influences on family life. Analyzes contemporary families in the United States, the influences of gender, class, and race, and current issues such as divorce, domestic violence, and the feminization of poverty. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 129 and SOCC 129.

#### **SOCI 130. Population and Society (4)**

This course offers insight into why and how populations grow (and decline), and where and under what conditions changes in population size and/or structure change have positive and negative consequences for societies and environment. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 130 and SOCC 130.

#### **SOCI 131. Sociology of Youth (4)**

Chronological age and social status; analysis of social processes bearing upon the socialization of children and adolescents. The emergence of "youth cultures," generational succession as a cultural problem. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 131 and SOCB 131.

#### **SOCI 132. Gender and Work (4)**

Examination and analysis of empirical research and theoretical perspectives on gender and work. Special attention to occupational segregation. Other topics include: the interplay between work and family; gender, work and poverty; gender and work in the Third World. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 132 and SOCC 132.

**SOCI 133. Immigration in Comparative Perspective (4)**

Societies across the world are confronting new immigration. In this course, we will focus on Europe, Asia, and North America, and examine issues of nationalism, cultural diversity and integration, economic impacts, and government policy. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 133 and SOCB 133.

**SOCI 134E. The Making of Modern Medicine (4)**

A study of the social, intellectual, and institutional aspects of the nineteenth-century transformation of clinical medicine, examining both the changing content of medical knowledge and therapeutics, and the organization of the medical profession. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 134E and SOCC 134A.

**SOCI 135. Medical Sociology (4)**

An inquiry into the roles of culture and social structure in mediating the health and illness experiences of individuals and groups. Topics include the social construction of illness, the relationships between patients and health professionals, and the organization of medical work. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 135 and SOCC 135.

**SOCI 136E. Sociology of Mental Illness: An Historical Approach (4)**

An examination of the social, cultural, and political factors involved in the identification and treatment of mental illness. This course will emphasize historical material, focusing on the eighteenth, nineteenth, and early twentieth centuries. Developments in England as well as the United States will be examined from an historical perspective. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 136E and SOCC 136A.

**SOCI 136F. Sociology of Mental Illness in Contemporary Society (4)**

This course will focus on recent developments in the mental illness sector and on the contemporary sociological literature on mental illness. Developments in England as well as the United States will be examined. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 136F and SOCC 136B.

**SOCI 137. Sociology of Food (4)**

Topics include food as a marker of social differences (e.g., gender, class, ethnicity); the changing character of food production and distribution; food as an object of political conflict; and the symbolic meanings and rituals of food preparation and consumption. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 137 and SOCB 137.

**SOCI 138. Genetics and Society (4)**

The class will first examine the direct social effects of the "genetic revolution": eugenics, genetic discrimination, and stratification. Second, the implications of thinking of society in terms of genetics, specifically—sociobiology, social Darwinism, evolutionary psychology, and biology. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 138 and SOCC 138.

**SOCI 139. Social Inequality: Class, Race, and Gender (4)**

Massive inequality in wealth, power, and prestige is ever-present in industrial societies. In this course, causes and consequences of class, gender, racial, and ethnic inequality ("stratification") will be considered through examination of classical and modern social science theory and research. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 139 and SOCC 139.

**SOCI 140. Sociology of Law (4)**

This course analyzes the functions of law in society, the social sources of legal change, social conditions affecting the administration of justice, and the role of social science in jurisprudence. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 140 and SOCC 140.

**SOCI 140F. Law and the Workplace (4)**

This course examines how the U.S. legal system has responded to workplace inequality and demands for employee rights. Particular attention is given to racial, gender, religious, and disability discrimination, as well as the law's role in regulating unions, the global economy, and

sweatshop labor. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 140F and SOCC 140F.

**SOCI 141. Crime and Society (4)**

A study of the social origins of criminal law, the administration of justice, causes, and patterns of criminal behavior, and the prevention and control of crime, including individual rehabilitation and institutional change, and the politics of legal, police, and correctional reform. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 141 and SOCC 141.

**SOCI 142. Social Deviance (4)**

This course studies the major forms of behavior seen as rule violations by large segments of our society and analyzes the major theories trying to explain them, as well as processes of rule making, rule enforcing, techniques of neutralization, stigmatization and status degradation, and rule change. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 142 and SOCB 142.

**SOCI 143. Suicide (4)**

Traditional and modern theories of suicide will be reviewed and tested. The study of suicide will be treated as one method for investigating the influence of society on the individual. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 143 and SOCB 143.

**SOCI 144. Forms of Social Control (4)**

The organization, development, and mission of social control agencies in the nineteenth and twentieth centuries, with emphasis on crime and madness; agency occupations (police, psychiatrists, correctional work, etc.); theories of control movements. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 144 and SOCC 144.

**SOCI 145. Violence and Society (4)**

Focusing on American history, this course explores violence in the light of three major themes: struggles over citizenship and nationhood; the drawing and maintenance of racial, ethnic, and gender boundaries; and the persistence of notions of "masculinity" and its relation to violence. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 145 and SOCB 145.

**SOCI 146. Law Enforcement in America (4)**

Provides a sociological understanding of policing in practice in the United States. Examines the social, political, and historical forces behind the development and shaping of policing in America—including the functions of police, the "working personality" of police officers, as well as police misconduct and its control. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 146 and SOCB 146.

**SOCI 147. Organizations, Society, and Social Justice (4)**

Organizations are dynamic forces in society. This course examines how organizations address human health and social justice issues in national and international settings, focusing on the links between internal dynamics of organizations and macro-level political, economic, and cultural factors. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 147 and SOCC 147.

**SOCI 148. Political Sociology (4)**

Course focuses on the interaction between state and society. It discusses central concepts of political sociology (social cleavages, mobilization, the state, legitimacy), institutional characteristics, causes, and consequences of contemporary political regimes (liberal democracies, authoritarianism, communism), and processes of political change. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 148 and SOCC 148.

**SOCI 148E. Inequality and Jobs (4)**

Some people do much better than others in the world of work. Causes and consequences of this inequality will be examined: How do characteristics of individuals (e.g., class, gender, race, education, talent) and characteristics of jobs affect market outcomes? **Prerequisite:** upper-division standing. Will not receive credit for SOCI 148E and SOCC 148L.

**SOCI 149. Sociology of the Environment (4)**

The "environment" as a socially and technically shaped milieu in which competing values and interests play out. Relation of humanity to nature; conflicts between

preservation and development; environmental pollution and contested illnesses. Will not receive credit for SOCI 149 and SOCC 149.

**SOCI 150. Madness and the Movies (4)**

Hollywood has had an ongoing obsession with mental illness. This course will examine a number of important or iconic films on this subject. By examining them against a background provided by relevant scholarly materials, we shall develop a critical perspective on these cultural artifacts. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 150 and SOCC 150.

**SOCI 151. Comparative Race and Ethnic Relations (4)**

An historical and comparative analysis of race and ethnic relations in various national settings, with emphasis on the United States. The course will analyze the origins of ethnic stratification systems, their maintenance, the adaptation of minority communities, and the role of reform and revolutionary movements and government policies in promoting civil rights and social change. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 151 and SOCC 151.

**SOCI 151M. Chicanos in American Society (4)**

Survey of contemporary sociological issues affecting Mexican-origin people in the United States. Lectures and reading will be oriented toward understanding the range of experiences within the Mexican-origin population. Focus will also be placed on evaluating theories and evidence used to understand this population. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 151M and SOCC 151M.

**SOCI 152. Social Inequality and Public Policy (4)**

(Same as USP 133.) Primary focus on understanding and analyzing poverty and public policy. Analysis of how current debates and public policy initiatives mesh with alternative social scientific explorations of poverty. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 152 and SOCC 152.

**SOCI 153. Urban Sociology (4)**

(Same as USP 105.) Introduces students to the major approaches in the sociological study of cities and to what a sociological analysis can add to our understanding of urban processes. **Prerequisite:** upper-division standing or consent of instructor. Will not receive credit for SOCI 153 and SOCC 153.

**SOCI 154. Religious Institutions in America (4)**

Examination of sociological theories for why people have religious beliefs. Also examines types of religious organizations, secularization, fundamentalism, religion and immigration, religion and politics, and religiously inspired violence and terrorism. The class will tend to focus on the American context. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 154 and SOCC 154.

**SOCI 155. The City of San Diego (4)**

A research-oriented course studying a specific city. Students will describe and analyze a local community of San Diego. Additional work on one citywide institution. Guest lecturers from San Diego organizations and government. Readings largely from city reports and news media. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 155 and SOCC 155.

**SOCI 156. Sociology of Religion (4)**

Diverse sociological explanations of religious ideas and religious behavior. The social consequences of different kinds of religious beliefs and religious organizations. The influence of religion upon concepts of history, the natural world, human nature, and the social order. The significance of such notions as "sacred peoples" and "sacred places." The religious-like character of certain political movements and certain sociocultural attitudes. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 156 and SOCC 156.

**SOCI 157. Religion in Contemporary Society (4)**

Sacred texts, religious experiences, and ritual settings are explored from the perspective of sociological analysis. The types and dynamic of religious sects and institutions are examined. African and contemporary U.S. religious data provide resources for lecture and comparative analysis.

**Prerequisite:** upper-division standing. Will not receive credit for SOCI 157 and SOCC 157.

#### **SOCI 158. Islam in the Modern World (4)**

The role of Islam in the society, culture, and politics of the Muslim people during the nineteenth and twentieth centuries; attempts by Muslim thinkers to accommodate or reject rival ideologies (such as nationalism and socialism); and a critical review of the relationship between Islam and the West. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 158 and SOCD 158.

#### **SOCI 159. Special Topics in Social Organizations and Institutions (4)**

Readings and discussion of particular substantive issues and research in the sociology of organizations and institutions, including such areas as population, economy, education, family, medicine, law, politics, and religion. Topics will vary from year to year. **Prerequisite:** upper-division standing.

#### **SOCI 160. Sociology of Culture (4)**

This course will examine the concept of culture, its "disintegration" in the twentieth century, and the repercussions on the integration of the individual. We will look at this process from a variety of perspectives, each focusing on one cultural fragment (e.g., knowledge, literature, religion) and all suggesting various means to reunify culture and consequently the individual. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 160 and SOCB 160.

#### **SOCI 160E. Law and Culture (4)**

This course examines major formulations of the relationship between law and culture in the sociological literature. Topics include formal law versus embedded law, law and morality, law and the self, legal consciousness, the rule of law, and the construction of legality. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 160E and SOCB 160L.

#### **SOCI 161. Sociology of the Life Course (4)**

This course explores concepts, theory and empirical research related to demographic, socio-psychological, and institutional aspects of the different stages of human development. It considers social influences on opportunities and constraints by gender, class, race/ethnicity, and historical period. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 161 and SOCB 161.

#### **SOCI 162. Popular Culture (4)**

An overview of the historical development of popular culture from the early modern period to the present. Also a review of major theories explaining how popular culture reflects and/or affects patterns of social behavior. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 162 and SOCB 162.

#### **SOCI 162R. Religion and Popular Culture in East Asia (4)**

(Same as HIEA 119.) Historical, social, and cultural relationships between religion and popular culture. Secularization of culture through images, worldviews, and concepts of right and wrong, which may either derive from or pose challenges to the major East Asian religions. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 162R and SOCB 162R.

#### **SOCI 163. Migration and the Law (4)**

Provides a global sociological perspective on the development and consequences of laws regulating migration within and across nation-state borders. The ability of the nation-state to control migration using law and its policy instruments. The effects of different legal statuses on political and socio-economic outcomes. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 163 and SOCC 163.

#### **SOCI 165A. American News Media (4)**

History, politics, social organization, and ideology of the American news media. 165A surveys the development of the news media as an institution, from earliest newspapers to modern mass news media. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 165A and SOCC 165A.

#### **SOCI 166. Sociology of Knowledge (4)**

This course provides a general introduction to the development of the sociology of knowledge, and will explore questions concerning social determination of consciousness as well as theoretical ways to articulate a critique of ideology. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 166 and SOCB 166.

#### **SOCI 167. Science and War (4)**

This class examines how science has been mobilized in the development of nuclear weapons and other weapons of mass destruction. The class applies sociological concepts to the analysis of modern technological violence. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 167 and SOCC 167.

#### **SOCI 168E. Sociology of Science (4)**

A survey of theoretical and empirical studies concerning the workings of the scientific community and its relations with the wider society. Special attention will be given to the institutionalization of the scientific role and to the social constitution of scientific knowledge. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 168E and SOCC 168E.

#### **SOCI 168T. Sociology of Technology (4)**

An introduction to classic and recent sociological perspectives on technology, giving special attention to the relations between technology and science, technology and work, and technology and politics. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 168T and SOCC 168T.

#### **SOCI 169. Citizenship, Community, and Culture (4)**

Will survey the liberal, communitarian, social-democratic, nationalist, feminist, post-nationalist, and multicultural views on the construction of the modern citizen and good society. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 169 and SOCD 169.

#### **SOCI 172. Films and Society (4)**

An analysis of films and how they portray various aspects of American society and culture. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 172 and SOCB 172.

#### **SOCI 173. Elite Crime (4)**

Explores theoretical and conceptual dimensions in the analysis of the systematic violation of the laws and ethics of business and politics in the United States. Covers a range of illegal and unethical practices, the social and political advantages of such violators, as well as the historical bias in both theory and research that has contributed to our lack of understanding of such issues in sociology and criminology. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 173 and SOCB 173.

#### **SOCI 174. Sociology of Literature (4)**

Literature will be discussed in the context of the ideas of national and regional culture, "historical situation," and "social order." Other issues to be studied are literary men and women as spokespersons and as rebels, literary movements and social conditions, and literary works as social documents. **Prerequisite:** upper-division standing.

#### **SOCI 175. Nationality and Citizenship (4)**

Surveys the development of nationality and citizenship law in historical and comparative perspective with an emphasis on the United States, Latin America, and Europe. Examines competing sociological accounts for national variation and convergence; consequences of the law; and local, transnational, and extraterritorial forms of citizenship. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 175 and SOCD 175.

#### **SOCI 176. War and Society (4)**

This course considers classical and contemporary theories that address the social organization of war-making and the effects of war on society since the Middle Ages, emphasizing more recent history. Topics include state formation, citizenship, gender, social stratification, and social protest. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 176 and SOCD 176.

#### **SOCI 177. International Terrorism (4)**

(Same as POLI 1420.) This course covers the definitions, history, and internationalization of terrorism; the interrelation of religion, politics and terror; and the representation

of terrorism in the media. A number of organizations and their activities in Europe and the Middle East are examined.

**Prerequisite:** upper-division standing. Will not receive credit for SOCI 177 and SOCD 177.

#### **SOCI 178. The Holocaust (4)**

The study of the unique and universal aspects of the Holocaust. Special attention will be paid to the nature of discrimination and racism, those aspects of modernity that make genocide possible, the relationship among the perpetrators, the victims and the bystanders, and the teaching, memory, and denial of the Holocaust. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 178 and SOCD 178.

#### **SOCI 179. Social Change (4)**

Course focuses on the development of capitalism as a worldwide process, with emphasis on its social and political consequences. Topics include: precapitalist societies, the rise of capitalism in the West, and the social and political responses to its expansion elsewhere. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 179 and SOCD 179.

#### **SOCI 180. Social Movements and Social Protest (4)**

An examination of the nature of protests and violence, particularly as they occur in the context of larger social movements. The course will further examine those generic facets of social movements having to do with their genesis, characteristic forms of development, relationship to established political configurations, and gradual fading away. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 180 and SOCC 180.

#### **SOCI 181. Modern Western Society (4)**

This course examines the nature and dynamics of modern western society in the context of the historical process by which this type of society has emerged over the last several centuries. The aim of the course is to help students think about what kind of society they live in, what makes it the way it is, and how it shapes their lives. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 181 and SOCD 181.

#### **SOCI 182. Ethnicity and Indigenous Peoples in Latin America (4)**

Ethnicity and the reassertion of Indian identity in contemporary Latin America. Issues related to these trends are examined in comparative perspective, with attention to changes in global conditions and in the socioeconomic, political, and cultural contexts of Latin American modernization. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 182 and SOCD 182.

#### **SOCI 183. Minorities and Nations (4)**

We will study minority rights and aspirations as well as the logic and dynamic of nationalist movements in selected cases. We will conclude by examining the chances and challenges of a post-nationalist world. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 183 and SOCD 183.

#### **SOCI 184. Gender and Film (4)**

This class will examine issues of masculinity and femininity through analysis of films. Emphasis is on contemporary American society and will include varying issues such as race, class, and sexualities; worlds of work; romance, marriage, and family. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 184 and SOCC 184.

#### **SOCI 185. Globalization and Social Development (4)**

Social development is more than sheer economic growth. It entails improvements in the overall quality of human life, particularly in terms of access to health, education, employment, and income for the poorer sectors of the population. Course examines the impact of globalization on the prospects for attaining these goals in developing countries. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 185 and SOCD 185.

#### **SOCI 187. African Societies through Film (4)**

Exploration of contemporary African urbanization and social change via film, including 1) transitional African communities, 2) social change in Africa, 3) Western vs. African filmmakers' cultural codes. Ideological and ethnographic representations, aesthetics, social relations, and market demand for African films are analyzed. **Prerequisite:**

upper-division standing. Will not receive credit for SOCI 187 and SOCD 187.

#### **SOCI 187T. The Sixties (4)**

A sociological examination of the era of the 1960s in America, its social and political movements, its cultural expressions, and debates over its significance, including those reflected in video documentaries. Comparisons will also be drawn with events in other countries. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 187T and SOCD 187S.

#### **SOCI 188D. Latin America: Society and Politics (4)**

Course focuses on the different types of social structures and political systems in Latin America. Topics include positions in the world economy, varieties of class structure and ethnic cleavages, political regimes, mobilization and legitimacy, class alignments, reform and revolution. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 188D and SOCD 188D.

#### **SOCI 188E. Community and Social Change in Africa (4)**

The process of social change in African communities, with emphasis on changing ways of seeing the world and the effects of religion and political philosophies of social change. The methods and data used in various village and community studies in Africa will be critically examined. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 188E and SOCD 188A.

#### **SOCI 188F. Modern Jewish Societies and Israeli Society (4)**

Contradictory effects of modernization on Jewish society in Western and Eastern Europe and the plethora of Jewish responses: assimilation, fundamentalism, emigration, socialism, diaspora nationalism, and Zionism. Special attention will be paid to issues of discontinuity between Jewish societies and Israeli society. Simultaneously, we will scrutinize the influence of the Palestinian-Israeli conflict on Israeli society, state, and identity. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 188F and SOCD 188F.

#### **SOCI 188G. Chinese Society (4)**

The social structure of the People's Republic of China since 1949, including a consideration of social organization at various levels: the economy, the policy, the community, and kinship institutions. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 188G and SOCD 188B.

#### **SOCI 188J. Change in Modern South Africa (4)**

Using sociological and historical perspectives, this course examines the origins and demise of apartheid and assesses the progress that has been made since 1994, when apartheid was officially ended. Contrasts of racism in South Africa and the United States. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 188J and SOCD 188J.

#### **SOCI 188K. American Society (4)**

Comparative and historical perspectives on U.S. society. The course highlights "American exceptionalism": did America follow a special historical path, different from comparable nations in its social relations, politics, and culture? Specific topics include class relations, race, religion, and social policy. **Prerequisite:** upper-division standing. Will not receive credit for SOCI 188K and SOCD 188K.

#### **SOCI 189. Special Topics in Comparative-Historical Sociology (4)**

Readings and discussion in selected areas of comparative and historical macro-sociology. Topics may include the analysis of a particular research problem, the study of a specific society or of cross-national institutions, and the review of different theoretical perspectives. Contents will vary from year to year. **Prerequisite:** upper-division standing.

#### **SOCI 192. Senior Seminar in Sociology (1)**

The Senior Seminar Program is designed to allow senior undergraduates to meet with faculty members in a small group setting to explore an intellectual topic in sociology (at the upper-division level). Topics will vary from quarter to quarter. Senior Seminars may be taken for credit up to four times, with a change in topic, and permission of the department. Enrollment is limited to twenty students, with preference given to seniors. (P/NP grades only.)

**Prerequisites:** instructor permission or department stamp, upper-division standing.

#### **SOCI 194. Research Seminar in Washington, D.C. (4)**

(Same as PS 194, COGN 194, EARTH 194, HIST 193, USP 194.) Course attached to six-unit internship taken by students participating in the UCDC Program. Involves weekly seminar meetings with faculty and teaching assistant and a substantial research paper. **Prerequisites:** department approval. Participating in UCDC Program. Will not receive credit for SOCI 194 and SOCE 194.

#### **SOCI 196A. Honors Seminar: Advanced Studies in Sociology (4)**

This seminar will permit honors students to explore advanced issues in the field of sociology. It will also provide honors students the opportunity to develop a senior thesis proposal on a topic of their choice and begin preliminary work on the honors thesis under faculty supervision. **Prerequisite:** acceptance into Department of Sociology Honors Program.

#### **SOCI 196B. Honors Seminar: Supervised Thesis Research (4)**

This seminar will provide honors candidates the opportunity to complete research on and preparation of a senior honors thesis under close faculty supervision. **Prerequisite:** completion of Soc/E 196A.

#### **SOCI 198. Directed Group Study (4)**

Group study of specific topics under the direction of an interested faculty member. Enrollment will be limited to a small group of students who have developed their topic and secured appropriate approval from the departmental committee on independent and group studies. These studies are to be conducted only in areas not covered in regular sociology courses. **Prerequisites:** junior standing and departmental approval required.

#### **SOCI 199. Independent Study (4)**

Tutorial: individual study under the direction of an interested faculty member in an area not covered by the present course offerings. Approval must be secured from the departmental committee on independent studies. **Prerequisites:** junior standing and departmental approval required.

## **GRADUATE**

#### **Soc/G 201A. Classical Sociological Theory I (4)**

A discussion of major themes in the work of Tocqueville and Marx. **Prerequisite:** graduate standing in sociology.

#### **Soc/G 201B. Classical Sociological Theory II (4)**

An examination of major themes in the work of Weber and Durkheim. **Prerequisite:** graduate standing in sociology.

#### **Soc/G 202. Contemporary Sociological Theory (4)**

Themes important for social theory at the turn of the twenty-first century: Marxism (Gramsci, Althusser), Critical Theory (Adorno, Habermas), Interpretation (Geertz), Social Systems (Parsons), post-structuralism (Foucault), postmodernism, and social constructivism (Bourdieu). **Prerequisite:** graduate standing in sociology.

#### **Soc/G 203. Field Methods (4)**

Research will be conducted in field settings. The primary focus will be on mastering the problems and technical skills associated with the conduct of ethnographic and participant observational studies. **Prerequisite:** graduate standing in sociology.

#### **Soc/G 204. Text and Discourse Analysis (4)**

Techniques of gathering and analyzing transcripts of naturally occurring conversations, interviews, discourse in institutional settings, public political discourse, and text of historical materials. **Prerequisite:** graduate standing in sociology.

#### **Soc/G 205. Quantitative Methods I (4)**

This course covers some of the elementary techniques used 1) to select random samples, 2) to detect statistical patterns in the sample data, and 3) to determine whether any patterns found in sample data are statistically significant. The course also stresses the benefits and drawbacks of survey and aggregate data and some common ways in which

these data are used incorrectly. **Prerequisite:** graduate standing in sociology.

#### **Soc/G 206. Quantitative Methods II (4)**

The course covers some of the more advanced techniques used 1) to select random samples, 2) to detect statistical patterns in the sample data, and 3) to determine whether any patterns found in sample data are statistically significant. The course also stresses the benefits and drawbacks of survey and aggregate data and some common ways in which these data are used incorrectly. **Prerequisite:** graduate standing in sociology.

#### **Soc/G 207. Comparative-Historical Methods (4)**

A broad-based consideration of the use of historical materials in sociological analysis, especially as this facilitates empirically oriented studies across different societies and through time. **Prerequisite:** graduate standing in sociology.

#### **Soc/G 208. Faculty Research Seminar (2)**

An introduction for entering graduate students to the range and variety of research and scholarly interest of the department's faculty. Through this introduction students will be better able to relate their own research interests and professional objectives to the ongoing work of faculty. **Prerequisite:** graduate standing in sociology. (S/U grades only.)

#### **Soc/G 212. Social Stratification (4)**

The causes and effects of social ranking in various societies. Theories of stratification; the dynamics of informal social grouping; determinants of institutional power, and the nature of struggles for power; the distribution of wealth and its causes; the dynamics of social mobility; the effects of stratification on life-styles, culture, and deviance. **Prerequisite:** graduate standing in sociology.

#### **Soc/G 216. Sociology of Culture (4)**

The history of the concept of culture; cultural pluralism in advanced industrialized societies; the differentiation of cultural institutions; cultural policy and social structure; culture as a property of social groups; conflict and accommodation over efforts to change and sustain traditional culture.

#### **Soc/G 217. Globalization, Culture, and Everyday Life (4)**

This course explores the cultural, economic, and political processes which constitute globalization. Particular emphasis will be placed on understanding how consciousness and daily life practices are formed and transformed in a globalizing world. **Prerequisite:** graduate standing in sociology.

#### **Soc/G 222. Social Movements (4)**

An examination of theories accounting for the causes and consequences of social movements, including a discussion of the strengths and weaknesses of such theories for understanding historically specific revolutions, rebellions, and violent and nonviolent forms of protest in various parts of the world. **Prerequisite:** graduate standing in sociology.

#### **Soc/G 226. Political Sociology (4)**

This course discusses the relationship between state and society in a comparative perspective. The focus is on the interaction among states, domestic economic elites, and external economic and political processes in the determination of different developmental paths. Analytically, it includes topics such as characteristics and functions of the state in different types of society throughout history (with an emphasis on the varieties of capitalist and socialist state), the autonomy of the state and its causes in different settings, and developmental and predatory consequences of state activity. Readings will include both theoretical and empirical materials, the latter dealing mostly with nineteenth- and twentieth-century Europe and twentieth-century Latin America. **Prerequisite:** graduate standing in sociology.

#### **Soc/G 227. Ethnographic Film: Media Methods (6)**

Ethnographic recording of field data in written and audiovisual formats, including film, video, and CD Rom applications. Critical assessment of ethnographies and audiovisual data in terms of styles, format, and approaches. Graduate students are required to submit a fifteen-page mid-term paper comparing a written and an audiovisual ethnography and a final video ethnography with a project

abstract. **Prerequisites:** graduate standing/Soc/L 1A, 1B or consent of instructor.

**Soc/G 232. Advanced Issues in the Sociology of Knowledge (4)**

The social construction of 'knowledge' and the social institutions in which these processes take place are examined. Topics include relationships between knowledge and social institutions, foundations of knowledge in society, knowledge and social interactions, and contrasting folk and specialized theories. **Prerequisites:** graduate standing in sociology.

**Soc/G 234. Intellectual Foundation of the Study of Science, Technology, and Medicine (4)**

This course focuses on some classic methodological and theoretical resources upon which the sociology of science, technology, and medicine all draw. It gives special attention to relationships between knowledge and social order, and between knowledge and practice, that are common to science, technology, and medicine. **Prerequisites:** graduate standing in sociology.

**Soc/G 238. Survey of the Sociology of Scientific Knowledge (4)**

An introduction to some enduring topics in the sociology of scientific knowledge and to some resources for addressing them. Attention is drawn to problems of accounting for scientific order and change, and to recurrent debates over the proper method for sociological accounts of science. **Prerequisite:** graduate standing.

**Soc/G 243. Sociology of Social Control (4)**

An examination of the sociological literature on social control, looking at theoretical developments over time, and examining the contemporary literature dealing with social control in historical and comparative perspective. **Prerequisite:** graduate standing.

**Soc/G 244. Sociology of Race and Ethnicity (4)**

Analysis of enduring topics in the study of race and ethnicity, including stratification, discrimination conflict, immigration, assimilation, and politics. Other topics include racial and ethnic identity and the social construction of race and ethnic categories. A special focus is on the role of 'culture' and 'structure' for explaining race/ethnic differentiation. **Prerequisites:** graduate standing in sociology.

**Soc/G 246. The Welfare State (4)**

Surveys major theories of the development and functioning of the welfare state, addressing the roles of economic development, political institutions, stratification, and culture. The course focuses on the development of the U.S. social provision in comparison with other advanced industrial societies.

**Soc/G 247. Madness and Society (4)**

An examination of changing Western responses from the age of Bedlam to the age of Prozac. Topics include: the rise and decline of the total institution; the emergence of psychiatry; changing cultural meanings of madness; and the therapeutics of mental disorder. **Prerequisites:** graduate standing in sociology.

**Soc/G 249. Technology and the Human (4)**

This course explores the ethical and political implications of technological interventions into human life. Approaches from science studies, the sociology of the body, and philosophy. Topics include transformations in domains of life such as work, health, childhood, and death.

**Soc/G 252. Research Practicum I (4)**

In this seminar students work on a research project, which might have originated in a paper written for another course. The goal is to produce the first draft of a paper that will be submitted to an academic journal. **Prerequisite:** graduate standing in sociology.

**Soc/G 253. Research Practicum II (4)**

In this seminar students revise an existing research paper (usually the one they wrote for Sociology 252) for submission to an academic journal. Emphasis is placed on conceptual development, writing style and structure, and drawing links to the existing theoretical and empirical literature. **Prerequisite:** graduate standing in sociology.

**Soc/G 255A. Introduction to Science Studies (4)**

(Same as Phil. 209A, HIGR 238, and COGR 225A.) Study and discussion of classic work in history of science, sociology of science, and philosophy of science, and of work that attempts to develop a unified science studies approach. Required for all students in the Science Studies Program. **Prerequisite:** enrollment in Science Studies Program.

**Soc/G 255B. Seminar in Science Studies (4)**

(Same as Phil. 209B, HIGR 239, and COGR 225B.) Study and discussion of selected topics in the science studies field. Required for all students in the Science Studies Program. **Prerequisite:** enrollment in Science Studies Program.

**Soc/G 255C. Colloquium in Science Studies (4)**

(Same as Phil. 209C, HIGR 240, and COGR 225C.) A forum for the presentation and discussion of research in progress in science studies, by graduate students, faculty, and visitors. Required of all students in the Science Studies Program. **Prerequisite:** enrollment in the Science Studies Program.

**Soc/G 255D. Advanced Approaches to Science Studies (4)**

(Same as COGR 225D, HIGR 241, Phil. 209D.) Focus on recent literature in the history, philosophy, and sociology of science, technology, and medicine. Required of all students in the Science Studies Program. **Prerequisites:** Soc/G 255A is a prerequisite for Soc/G 255D; enrollment in Science Studies Program or instructor's permission.

**Soc/G 258. Institutional Change in the Contemporary World; Latin American Societies in a Comparative Perspective (4)**

This course explores institutional change in contemporary Latin America, and compares this area with other transitional societies. Issues include social consequences of economic liberalization, changing forms of inequality, dynamics of civil society, conceptions of citizenship, quality and future of democracy. **Prerequisite:** graduate standing.

**Soc/G 260. Sociology of Religion (4)**

This seminar will examine major theories and debates in the sociology of religion. Possible topics include secularization, religion and immigration, and religion and politics. **Prerequisite:** graduate standing in sociology.

**Soc/G 263. Graduate Seminar in the Sociology of Art (4)**

This seminar explores the production and interpretation of art forms in cross-cultural context. Processes of symbolic and economic exchange in art worlds will be examined from sociological and semiotic perspectives. Contemporary and popular art forms will be analyzed as types of cultural reproduction. Graduate students will be required to submit a project abstract and final research paper of twenty-seven pages. **Prerequisite:** graduate standing in sociology.

**Soc/G 264. Economic Sociology (4)**

This course provides an overview of the classical and current debates in the economic sociology literature. It presents theories of the rise of industrial economics and addresses how economic activities are constituted and influenced by institutions, culture, and social structure. **Prerequisite:** graduate standing in sociology.

**Soc/G 267. Sociology of Gender (4)**

Course examines social construction of gender focusing on recent contributions to the field, including micro- and macro-level topics, i.e., social psychological issues in the development of gender, gender stratification in the labor force, gender and social protest, feminist methodologies. **Prerequisite:** graduate standing in sociology.

**Soc/G 268. Sociology of Masculinities (4)**

This course introduces students to recent developments in the field of masculinities with attention to theoretical conceptualizations as well as empirical analyses of social organization of masculinity. Topics include the development of masculinity in boys, historical and cultural influences on male identity, differences of race, class, sexuality, the male body, and the meaning of work and family in men's lives.

**Soc/G 269. The Citizenship Debates (4)**

Will examine the controversies surrounding the construction of the modern citizen and the good society of the liberal outlook, and their alternatives in the communitarian,

social-democratic, nationalist, feminist, and multiculturalist perspectives. **Prerequisite:** graduate standing in sociology.

**Soc/G 270. The Sociology of Education (4)**

A consideration of the major theories of schooling and society, including functionalist, conflict, critical and interactional; selected topics in the sociology of education will be addressed in a given quarter, including the debate over inequality, social selection, cultural reproduction and the transition of knowledge, the cognitive and economic consequences of education. Major research methods will be discussed and critiqued. **Prerequisite:** graduate standing in sociology.

**Soc/G 278. Immigration, Assimilation, and Identity (4)**

This course focuses on theoretical and empirical approaches to the study of immigration, assimilation, and identity. The course will focus primarily on the post-1965 immigrants, but consideration will also be given to earlier waves of immigration. **Prerequisites:** graduate standing in sociology.

**Soc/G 282. Immigration and Citizen (4)**

Alternative theories of the relations of immigrants and host societies, and an examination on the debates on, and dynamic of, immigration expansion and restriction. Comparison of the bearing of liberal, communitarian, and ethnic citizenship discourses on the inclusion and exclusion of immigrants and their descendants. **Prerequisite:** graduate standing in sociology.

**Soc/G 284. Contemporary Biomedicine (4)**

Develops central themes in medical sociology in order to understand twentieth- and twenty-first-century medical practice and research. Topics include authority and expertise; health inequalities; managed care; health activism; biomedical knowledge production; and the construction of medical objects and subjects. **Prerequisite:** graduate standing.

**Soc/G 288. Knowledge Capitalism (4)**

This seminar examines the place of scientific knowledge and information and communication technology in the transformation of capitalist economy and society. The class explores new interactions between science studies and social theory of advanced capitalism. **Prerequisite:** graduate standing in sociology.

**Soc/G 290. Graduate Seminar (4)**

A research seminar in special topics of interest to available staff, provides majors and minors in sociology with research experience in close cooperation with faculty. (S/U grades permitted.) **Prerequisite:** graduate standing in sociology.

**Soc/G 298. Independent Study (1-8)**

Tutorial individual guides study and/or independent research in an area not covered by present course offerings. (S/U grades only.) **Prerequisite:** graduate standing in sociology; departmental approval.

**Soc/G 299. Thesis Research (1-12)**

Open to graduate students engaged in thesis research. (S/U grades only.) **Prerequisite:** graduate standing in sociology.

**Soc/G 500. Apprentice Teaching (2-4)**

Supervised teaching in lower-division contact classes, supplemented by seminar on methods in teaching sociology. (S/U grades only.) **Prerequisite:** graduate standing in sociology.

# Theatre and Dance

## PROFESSORS

Steven Adler, M.F.A., *Provost, Warren College, Stage Management and Directing*  
Andrei Both, M.F.A., *Scenic Design*  
Alan Burrett, GCE (U.K.), *Lighting Design*  
Frantisek Deak, Ph.D., *Emeritus, Criticism and Theory*

Yolande Snaith, B.A., *Dance*  
Gabor Tompa, Ph.D., *Directing*  
Arthur Wagner, Ph.D., *Emeritus, Acting*  
Les Waters, B.A., *Emeritus, Directing*  
James R. Winker, M.F.A., *Academic Senate, Distinguished Teaching Award, Acting*

## ASSOCIATE PROFESSORS

James Carmody, Ph.D., *Dramatic Literature*  
Mary Corrigan, M.A., *Emerita, Voice*  
Tony Curiel, M.A., *Emeritus, Chicano Literature, Acting*  
Nadine George-Graves, Ph.D., *Dramatic Literature and Dance History*  
Lisa Porter, M.F.A., *Stage Management*  
Victoria Petrovich, M.F.A., *Design*  
John Rouse, Ph.D., *Dramatic Literature*  
Kim Rubinstein, B.S., *Head of Undergraduate Acting*  
Jonathan Saville, Ph.D., *Emeritus, Literature/Criticism*  
Shahrokh Yadegaari, Ph.D., *Sound Design/Composition/Audio Technology*

## ASSISTANT PROFESSORS

Robert Castro, M.F.A., *Acting, Directing, Chicano Literature*  
Liam Clancy, M.F.A., *Dance*  
Emily Roxworthy, Ph.D., *Dramatic Literature*

## SENIOR LECTURERS WITH SECURITY OF EMPLOYMENT

Eva W. Barnes, M.F.A., *Speech and Acting*  
Margaret Marshall, M.F.A., *Emerita, Ballet, Dance History, Choreography*  
Ursula Meyer, M.F.A., *Voice and Acting*

Charlie Oates, M.F.A., *Movement and Acting*  
Patricia A. Rincón, M.F.A., *Modern and Jazz Dance*

## LECTURER WITH POTENTIAL SECURITY OF EMPLOYMENT

Eric Geiger, M.A., *Dance*

## LECTURERS

Kristin Arcidiacono, M.A., *Dance*  
Tony Caligagan, *Dance*  
Sandra Foster-King, M.F.A., *Dance*  
Mark Guirguis, M.F.A., *Design*  
Jean Isaacs, B.A., *Emerita, Dance*  
Alicia E. Rincón, M.F.A., *Dance*  
Todd Salovey, M.F.A., *Acting and Directing*  
Tonnie Sammartano, B.A., *Dance*  
Judith A. Sharp, B.S., *Dance*  
Linda Vickerman, D.M.A., *Singing*  
Terry Wilson, M.F.A., *Dance*

## THE UNDERGRADUATE PROGRAM

The curriculum of the Department of Theatre and Dance is based on the belief that a good undergraduate education in theatre or dance should provide the student with a solid background in dramatic literature and the aesthetics and history of theatrical performance as well as exposure to the different artistic components of theatrical art—performance, playwriting, design, and choreography.

In addition to providing an integrated program for students desiring a theatre or dance major, the curriculum provides a sequence of courses to fulfill the fine arts and/or humanities requirements for Muir College; courses fulfilling Warren College's program of concentration requirements; courses to fulfill Revelle, Thurgood Marshall, and Eleanor Roosevelt Colleges' fine arts requirements; public speaking courses to fulfill requirements in the Schools of Engineering and Pharmacy; and elective courses for the general student desiring experience in theatre or dance.

Any student who has been accepted to the University of California, San Diego is eligible to declare theatre or dance as a major, double major, or minor. Auditions are not required. Continuing UCSD students who are changing their major to theatre or dance must file a Change of Major form with the UCSD Registrar's Office.

## DEPARTMENT OF THEATRE AND DANCE ADVISING

The department's undergraduate faculty advisors can provide guidance and answers to students' questions concerning specific course content, transfer course work, honors research projects, academic success, production, auditioning procedures, postgraduate opportunities, and departmental policy changes.

The undergraduate coordinator can answer students' questions regarding major requirements, procedural matters, class enrollment, and the petition process, and give referrals to faculty and other campus resources for specific information.

Undergraduate student representatives are another important resource for theatre and dance majors. The student reps organize quarterly meetings at which students and faculty discuss departmental issues and concerns.

The department regularly communicates with the majors and minors, as well as other students involved in classes and productions, through the campus e-mail and Listserv systems. Students are strongly urged to check their campus e-mail accounts for timely messages or to make arrangements with Academic Computing Services to have campus e-mail forwarded to any other e-mail account they may use. Additionally, a handbook containing useful information is available in the department office, Room 202, Galbraith Hall.

## PROGRAMS ABROAD

The department encourages students to enrich their undergraduate experience by studying abroad. Students majoring in theatre and/or dance are encouraged to participate in the Education Abroad Program (EAP) and to investigate other options of foreign study through the Opportunities Abroad Program (OAP). By petition, credits earned through EAP/OAP can fulfill UCSD degree and major requirements. Please visit the Programs Abroad Web site at <http://pao.ucsd.edu/pao> for further details. Financial aid is applicable and special study abroad scholarships are readily available.

The Department of Theatre and Dance will accept a maximum of three courses per semester abroad, and students are encouraged to take courses abroad that will fulfill major elective requirements. Please meet with the undergraduate coordinator prior to the EAP/OAP application deadline.

## THE THEATRE MAJOR

The theatre major provides a student with a solid artistic and academic background. The required lower-division courses equip the student with the skills and knowledge necessary for more advanced work in each of the areas of study. The major is structured to respond to the needs of students who seek a broad-based liberal arts education in theatre as well as those who plan to pursue their studies at the graduate level with the aim of acquiring either an M.F.A. or a Ph.D. degree. Students should meet with the department's undergraduate coordinator during the quarter in which they declare a theatre major in order to plan an appropriate individual course of study.

The major requirements are those published in the catalog in effect for the first quarter that a first-year student attends UCSD; transfer students will be held to the catalog requirements two years previous to their first quarter at UCSD. Any student in good standing may declare a theatre major by completing a Change of Major form and delivering it to the Registrar's Office. A department stamp is not required.

## THE DANCE MAJOR

The dance major offers students an opportunity to specialize their training in the creative, aesthetic, and conceptual discipline of expressive movement as a contemporary art form, within the context of a broad undergraduate education. The primary focus

of the dance major will be the study of contemporary and ballet techniques, dance history, theory, and choreographic methods, emphasizing innovation and interdisciplinary collaboration, and pushing forward the boundaries of dance as a contemporary art form. It will provide the rigor of an academic program that fosters the balanced development of the dancer's creative artistic potential, physical skills, and intellectual growth. The aim is to provide students with a broad range of artistic and conceptual tools for achieving goals in a variety of career areas and for pursuing advanced study in dance and dance related fields. Growth of individual artistic potential is encouraged through the integration of creative, physical and intellectual process, which provide a foundation for the creative and critical thinking needed for success in all career paths.

The major requirements are those published in the catalog in effect for the first quarter that a first-year student attends UCSD; transfer students will be held to the catalog requirements two years previous to their first quarter at UCSD. Any student in good standing may declare a theatre major by completing a Change of Major form and delivering it to the Registrar's Office. A department stamp is not required.

### THE THEATRE-DANCE DOUBLE MAJOR

The double major in Theatre and Dance provides students with a solid academic base and an artistic base in both theatre and dance disciplines. Furthermore, requirements for this double major will create stronger and more experienced directors (for their exposure to choreography), choreographers (for their exposure to directing), actors (for the poise and strength they will attain from dance), and dancers (for having confronted text and character).

Students should meet with the department's undergraduate coordinator as soon as practical (but no later than the quarter in which they declare the major) in order to plan an appropriate individual course of study.

Double majors should complete the Petition for Double Major form obtained from their college and submit it to the department for review and approval.

### THEATRE MINOR

The theatre minor consists of seven theatre courses, one of which is the Practicum. It is recommended that students declare the theatre minor as soon as possible as priority enrollment in the Practicums is given to majors and minors.

### DANCE MINOR

The dance minor consists of seven courses, one of which is the Practicum. The dance minor will provide a balanced educational experience for the student who has a strong interest in dance but who wishes to major in another area of study. It is recommended that students declare the dance minor as soon as possible as priority enrollment in the Practicums is given to majors and minors.

### SATISFYING YOUR MAJOR REQUIREMENTS

Fifty percent of all course work required for the theatre or dance major (including both upper- and lower-division courses) must be taken at UCSD, regardless of approved transfer work and petitions.

Theatre practicum (TDPR) classes completed elsewhere do not satisfy the theatre and dance department's requirements unless they have been formally petitioned and approved. Only one practicum class from another institution may be petitioned. All courses required for the major or minor must be taken for a letter grade. A theatre and dance department course for which a student earns a grade lower than C- will not satisfy any of the department's graduation requirements. Four units of Instructional Assistance (TDGE 195, P/NP credit) may be used as an upper-division elective for the theatre major, double major, or minor. Courses taken outside the Department of Theatre and Dance will not satisfy core or elective major requirements.

### MAJOR REQUIREMENTS

Theatre majors are required to complete ten lower-division courses. Dance majors are required to complete three lower-division courses. All lower-division courses should be satisfied before starting upper-division course work in the respective areas.

Theatre and Dance majors and minors should complete a Practicum course—either TDPR 1, TDPR 2, TDPR 3, or TDPR 5—within three quarters of declaring their major or minor. Theatre majors should plan to complete their second Practicum requirement as soon as possible thereafter, as space in these classes is limited. The second Practicum course must be in an area different from the initial Practicum course.

Theatre History 10, 21, 22, and 23 are prerequisites for most upper-division theatre history and theory courses. Introduction to Acting (TDAC 1), Theatre Design (TDDE 1), and Theatre Playwriting (TDPW 1) are all prerequisites for any upper-division course work in their respective areas. Students should take these classes as soon as possible after declaring their major. Prerequisites ensure that students are properly prepared for the work required.

### Theatre Major

Please refer to the major requirements section for an overview of the theatre major.

#### Lower-Division Requirements

- Two courses selected from
  - TDPR 1. Practicum—Scenery
  - TDPR 2. Practicum—Costume
  - TDPR 3. Practicum—Lighting
  - TDPR 5. Practicum—Sound
- Each of the following:
  - TDHT 10. Introduction to Play Analysis
  - TDHT 21. Performance Dynamics: Spaces, Performers, and Audiences
  - TDHT 22. One Actor, Two, or More: How Theatre Peoples the World
  - TDHT 23. Social Contexts of Performance
- TDGE 1. Introduction to Theatre
- Each of the area threshold classes:
  - a. TDAC 1. Introduction to Acting
  - b. TDDE 1. Introduction to Design
  - c. TDPW 1. Introduction to Playwriting

**Note:** The threshold classes listed above must be completed before taking upper-division courses in their respective areas.

### Upper-Division Requirements

- One upper-division four-unit acting course
- One upper-division four-unit design course
- One upper-division four-unit directing course
- One upper-division four-unit playwriting course
- One upper-division four-unit stage management course
- Three upper-division four-unit theatre history courses
- Four upper-division four-unit theatre electives

**Note:** THGE 197 and 199 may not be used as upper-division electives by theatre majors unless approved by petition.

### Dance Major

#### Lower-Division Requirements

- One course from
  - TDPR 1. Practicum—Scenery
  - TDPR 2. Practicum—Costume
  - TDPR 3. Practicum—Lighting
  - TDPR 5. Practicum—Sound
- TDTR 10. Introduction to Dancing
- TDCH 40. Principles of Choreography

#### Upper-Division Requirements

- TDTR 101. Dance Movement Analysis
- Two choreography courses chosen from the following:
  - TDCH 140. Improvisation/Composition
  - TDCH 142. Choreographic Workshop
  - TDCH 145. Music for Dance Composition
- One design course chosen from the following:
  - TDDE 113. Costume Design for Dance
  - TDDE 121. Lighting Design for Dance
- Four dance history and theory courses chosen from the following:
  - TDHD 171. Dance History I (Ancient to 1900)
  - TDHD 172. Dance History II (1900 to 1960)
  - TDHD 173. Dance History III (1960 to present)
  - TDHD 174. Dance Aesthetics and Criticism
  - TDHD 175. Cultural Perspectives on World Dance
- Forty-eight units of movement courses in ballet and contemporary dance chosen from the following (each of the courses listed below may be repeated up to six times):
  - TDMV 110. Intermediate Ballet
  - TDMV 111. Advanced Ballet
  - TDMV 112. Advanced Ballet for Contemporary Dance
  - TDMV 120. Intermediate Contemporary Dance
  - TDMV 122. Advanced Contemporary Dance
- Eight units of electives chosen from the following:
  - TDAC 109. Singing for the Actor
  - TDAC 111. Freeing the Voice
  - TDAC 115. Movement for Actors
  - TDCH 143. Choreography and Dramatic Text
  - TDMV 133. Advanced Jazz
  - TDMV 142. Latin Dance of the World
  - TDMV 143. West African Dance

TDMV 144. Asian Dance  
TDTR 102. Movement Research  
TDTR 103. Dance and Technology  
TDTR 104. Dance Theory and Pedagogy

### **Theatre and Dance Double Major**

#### **Lower-Division Requirements**

1. One course from  
TDPR 1. Practicum–Scenery  
TDPR 2. Practicum–Costumes  
TDPR 3. Practicum–Lighting  
TDPR 5. Practicum–Sound
2. TDAC 1. Introduction to Acting
3. TDCH 40. Principles of Choreography
4. Each of the following threshold classes:  
TDDE 1. Introduction to Design  
TDPW 1. Introduction to Playwriting

#### **Upper-Division Requirements**

5. One upper-division four-unit acting course
6. One upper-division four-unit design course
7. One upper-division four-unit directing course
8. One upper-division four-unit playwriting course
9. One upper-division four-unit stage management course
10. Six upper-division four-unit theatre and dance history courses (TDHT 114 required as one of the six upper-division history courses)
11. Four upper-division theatre electives (with no more than two from the core dance curriculum)
12. TDTR 101. Dance Movement Analysis
13. TDDE 121. Theatre Process: Lighting
14. TDCH 140. Improvisation/Composition  
TDCH 142. Choreographic Workshop  
TDCH 145. Music for Dance Composition
15. Twelve units of advanced movement courses in one of the following areas of emphasis:  
TDMV 111. Advanced Ballet  
TDMV 122. Advanced Contemporary Dance  
TDMV 133. Advanced Jazz
16. One four-unit advanced movement course outside the area of emphasis selected in number 15.

**Note:** TDGE 197 and 199 may not be used as upper-division electives by theatre and dance majors unless approved by petition.

#### **THE THEATRE MINOR**

Minor forms are available at the advising office of the student's college. Minor courses may not be taken on a Pass/Not Pass basis.

The minor requirements are those published in the catalog in effect for the first quarter that a first-year student attends UCSD; transfer students will be held to the catalog requirements two years previous to their first quarter at UCSD.

#### **Lower-Division Requirements**

1. One course from  
TDPR 1. Practicum–Scenery  
TDPR 2. Practicum–Costumes  
TDPR 3. Practicum–Lighting  
TDPR 5. Practicum–Sound
2. One course from the following list:  
TDHT 21. Performance Dynamics: Spaces, Performers, and Audiences  
TDHT 22. One Actor, Two, or More: How Theatre Peoples the World  
TDHT 23. Social Contexts of Performance  
TDAC 1. Introduction to Acting  
TDDE 1. Introduction to Design  
TDPW 1. Introduction to Playwriting

#### **Upper-Division Requirements**

3. Any five four-unit, upper-division theatre courses chosen from the following subjects: TDAC, TDDE, TDDR, TDGE, TDHT, TDPR, TDPW.

#### **THE DANCE MINOR**

Minor forms are available at the advising office of the student's college. Minor courses may not be taken on a Pass/Not Pass basis.

The minor requirements are those published in the catalog in effect for the first quarter that a first-year student attends UCSD; transfer students will be held to the catalog requirements two years previous to their first quarter at UCSD.

#### **Dance Minor Requirements**

##### **Lower-Division Requirements**

1. One course from  
TDPR 1. Practicum–Scenery  
TDPR 2. Practicum–Costumes  
TDPR 3. Practicum–Lighting  
TDPR 5. Practicum–Sound
2. TDTR 10. Introduction to Dance

##### **Upper-Division Requirements**

3. One choreography course chosen from  
TDCH 140. Improvisation/Composition  
TDCH 142. Choreographic Workshop  
TDCH 145. Music for Dance Composition  
or  
One dance history course chosen from  
TDHD 171. Dance History I (Ancient to 1900)  
TDHD 172. Dance History II (1900 to 1960)  
TDHD 173. Dance History III (1960 to present)  
TDHD 174. Dance Aesthetics and Criticism  
TDHD 175. Cultural Perspectives on World Dance
4. Three movement courses:  
TDMV 110. Intermediate Ballet  
TDMV 111. Advanced Ballet  
TDMV 112. Advanced Ballet for Contemporary Dance  
TDMV 120. Intermediate Contemporary Dance  
TDMV 122. Advanced Contemporary Dance
5. Four units movement, theory, or choreography chosen from  
TDMV 133. Advanced Jazz  
TDMV 142. Latin Dance of the World

TDMV 143. West African Dance  
TDMV 144. Asian Dance  
TDTR 101. Dance Movement Analysis  
TDTR 103. Dance and Technology  
TDTR 104. Dance Theory and Pedagogy  
TDCH 143. Choreography and Dramatic Text

#### **Honors Program**

The department offers a special program of advanced study for outstanding undergraduates majoring in theatre or dance. Successful completion of the Honors Program enables the student to graduate With Highest Distinction (A+), With High Distinction (A), or With Distinction (A-), depending upon performance in the program.

#### **Eligibility**

1. Junior standing (ninety units or more completed)
2. 3.7 GPA or better in the major
3. 3.5 GPA or better overall, which student must maintain until final graduation
4. Completion of at least four upper-division theatre courses
5. Recommendation of a faculty sponsor who is familiar with the student's work

#### **Guidelines**

Application to the Honors Program may be made upon completion of ninety units or no later than the fifth week of the quarter preceding the final two quarters before graduation. The Undergraduate Committee will consider the application and, if approved, the student and the principal advisor will have the responsibility of proposing an Honors Thesis Committee to the Undergraduate Committee for final approval.

Students are required to take THGE 196A, Honors Studies in Theatre, and 196B, Honors Thesis in Theatre, in addition to the thirteen upper-division required courses for the major. THGE 196A-B are to be taken consecutively and may not be taken concurrently.

#### **Placement and Proficiency for Dance Majors**

The technical command and the expansion of a vocabulary of movement are essential to the dancer's creative expression. The faculty advise new students in dance to participate in beginning dance in all areas for a minimum of one year, as well as enrolling in TDTR 10, Introduction to Dance. These courses are designed to give the student the basic information needed to move on to the intermediate level. Students should remain in this level for a minimum of one year unless the instructor encourages them to move up to the advanced level. All students are required to audition and be approved by the faculty to be enrolled in advanced dance courses. If you come to UCSD with a background in dance and would like to take an advanced class, you need to audition in the class of your choice on the first day of the class meeting so that the teacher can

accept you in the class or recommend another more appropriate class.

### **Undergraduate Student Petitions**

Undergraduate student petitions are required whenever an exception to a rule is being requested. They are required for major or minor requirement substitutions, substitution of courses from other departments or institutions, late course adding or dropping, or requesting a retroactive incomplete grade. Students should submit petitions for course substitutions well in advance of taking the course. If they have difficulty with the form, students should have the Department of Theatre and Dance undergraduate coordinator assist them with the petition process to ensure that the petition is complete and well documented.

### **Receiving Transfer Credit**

Students must petition the department to substitute courses taken in another department or institution for courses required by the Department of Theatre and Dance. The following procedures and guidelines will help students with the transfer petition process.

First, review the Department of Theatre and Dance residency requirement. It is generally a good idea to petition a course before taking it. The Department of Theatre and Dance undergraduate coordinator will review petitions for all transfer courses. Students may obtain a General Undergraduate Student Petition form on TritonLink. A detailed syllabus for the course to be evaluated must be attached to the completed petition form. Any petition relating to courses within the Department of Theatre and Dance should be dropped off at the main office during normal business hours.

Transfer credits must be accepted by the Admissions Office at the appropriate level and for the appropriate number of units for the substitution to be effective. Upper-division credit cannot be given for lower-division work. Course work done at a junior college can only transfer to UCSD as lower-division credit.

### **Theatre and Dance Performance and Production Opportunities**

The Department of Theatre and Dance produces undergraduate productions throughout the academic year. These productions range in scale from student directed "black box" productions to full-scale faculty directed undergraduate productions on the main stage. Every effort is made to provide a faculty directed opportunity for undergraduates each quarter.

Each of these productions is staged with undergraduate actors and dancers. Historically, where there are design assignments to be made (sets, costumes, lights, sound), those assignments are given to qualified undergraduates. Upper-division credit is available for students involved in the design or staging of department productions. Students may not work on department productions unless they are formally enrolled in a related class. Information regarding design and advanced crew opportunities is typically available from the design faculty or may

be posted on the bulletin board in the lobby of Galbraith Hall as opportunities arise.

### **Cabaret**

Cabarets are independent productions that are produced in Galbraith Hall Studio Theatre 157. Students may submit proposals for cabarets one quarter in advance to the cabaret manager. The cabaret policy is subject to revision on a quarterly basis. Please check at the front desk for details and deadlines.

### **Undergraduate Audition Policy**

Undergraduates are encouraged to audition for all shows produced in the department. Auditions are typically held in the quarter preceding the staging of a production. Audition announcements will be posted on the bulletin board in the lobby of Galbraith Hall. Undergraduates who have completed or are currently enrolled in TDAC 1, Introduction to Acting are eligible to audition. Qualified undergraduates may audition for roles in graduate productions as they are available.

### **UCSD Dance Repertory**

This repertory is open to dance students through auditions. The company will perform lecture-demonstrations, and performances, and teach master classes in the community or at other UC campuses.

### **Annual Dance Concerts**

Two main stage and one studio theatre dance concert are presented each year. In fall quarter a small-scale faculty-directed laboratory or cabaret performance is presented in the Molli and Arthur Wagner Dance Building's Studio Theatre. In winter quarter's *Dance Alive* concert, students perform choreography created by the professional faculty and international guest artists in the Mandell Weiss Center for the Performing Arts, Forum Theatre, or the Potiker Theatre; and in spring quarter's *New Works* student dance concert, students perform the faculty-directed experimental choreographic works for other students at the Potiker Theatre. In addition, smaller productions and student cabarets take place in our intimate Studio Theatre, located in the dance facility. Auditions are held at the beginning of the quarter for all productions. Students interested in performing in the winter concert must audition for a specific repertory class taught by the faculty or guest choreographer with whom they wish to work. Students who are then cast must enroll in both the appropriate Dance Repertory (TDPF 160, 161, 162) and Studies in Performance (TDPF 163). Students interested in performing in the spring concert must audition at the beginning of spring quarter; if cast, they enroll in Studies in Performance (TDPF 160, 161, 162). Students participating in either dance production are required to be concurrently attending a technique class. Students who wish to choreograph for the spring concert must have completed or be concurrently enrolled in a choreography class.

### **Ushering**

A fantastic and simple way for students to become involved with the Department of Theatre and Dance is to be a volunteer usher. When a student volunteers, he or she will receive a complimentary

ticket and a guaranteed seat to a predetermined performance in exchange for carrying out easy but important front-of-house tasks (such as tearing tickets, seating patrons, or handing out programs). Ushering is fun and easy—no experience is required and all majors are welcome.

To inquire about usher availability, contact the Theatre and Dance promotions manager at [promotions@ucsd.edu](mailto:promotions@ucsd.edu) and put the word "USHER" (in all caps) in the subject line. Someone will respond to your inquiry with more information in a timely manner.

### **Comps**

Declared Theatre or Dance majors are eligible to receive one free complimentary ticket per departmental production. The complimentary tickets are on a first-come-first-served basis. Majors need to come into the department office and fill out a complimentary request form at least forty-eight hours prior to the performance. Majors will be notified through e-mail if the request cannot be filled. For the complete Complimentary Ticket Policy, please visit our Web site (<http://theatre.ucsd.edu>) or come into the office.

---

## **THE GRADUATE PROGRAM**

---

### **MASTER OF FINE ARTS IN THEATRE JOINT DOCTORAL DEGREE PROGRAM**

#### **M.F.A. IN THEATRE**

The Department of Theatre and Dance at UC San Diego has set an ambitious goal for its M.F.A. program: the training of artists who will shape the future direction of the theatre. The professional theatre training program is ranked third in the nation (and first west of the Hudson River), according to U.S. News & World Report, 1997.

The curriculum for all students involves studio classes and seminars. These are integrated with a progressive sequence of work on productions and with a professional residency at the La Jolla Playhouse.

The M.F.A. program at UCSD is built around the master-apprentice system of training. All the faculty are active professionals who teach at UCSD because of a shared commitment to training young artists. Instruction takes place not just in the classroom, but in theatres around the country where faculty, with students as assistants, are involved in professional productions, including those at the La Jolla Playhouse.

Students graduating from the M.F.A. program at UCSD should be prepared to take positions in the professional theatre in the United States and abroad. Students are now working in New York, in resident theatres, in the film and television industry, and in European repertory theatres. M.F.A. candidates in acting, dance theatre, design, directing, playwriting, and stage management will complete at least ninety quarter-units of academic work during their tenure in the program.

## PROGRAM DESCRIPTIONS

### Acting

The body and mind of the actor are synthesized to serve as an instrument of expression. Actors must depend on their instrument to perform, and the program places great emphasis on the strengthening and tuning of that instrument. The innate talent of the student is nurtured, coaxed, and challenged with individual attention from an extraordinary team of professionals and specialists in actor training.

#### Classes

Each year, intensive studio work in movement, voice, speech, and singing accesses, expands, and frees the physical body. Acting process introduces a range of improvisational and rehearsal techniques that help the actor approach onstage events with imagination and a rich emotional life. In the first year, studio classes guide the actor through daily explorations that encourage, change, and enhance artistic expression. The second year is devoted to the study of classical texts as well as the specific vocal and physical skills required to perform them. In the final year, classes focus on the needs of individual actors as they prepare to enter the professional world.

#### Productions

Actors work on classical and contemporary texts as well as new plays with graduate students, faculty, and professional guest directors. Each year the department schedules from fifteen to twenty productions of varying size and scope. Graduate students are given casting priority for all but a few plays. Student-scheduled and produced cabaret/workshop productions occur year-round and provide additional acting opportunities.

#### Externship

All graduate students serve a residency with the La Jolla Playhouse and are cast in positions ranging from supporting to leading roles alongside professional actors and directors of national and international stature. For many actors this opportunity establishes valuable networking relationships and exposure for future employment.

#### Research and Other Opportunities

Modest funds are sometimes available for the pursuit of research, special technique workshops, and travel to auditions and festivals. In addition, in the third year, the entire acting class receives a showcase presentation in both Los Angeles and New York at which specially invited groups of film, television, and theatre professionals are in attendance.

### Dance Theatre

With an emphasis on the collaborative process, the purpose of the Dance Program is to create an intensive laboratory for candidates to pursue artistic processes that will hone their unique artistic voices. Dance Theatre artists are encouraged to explore and develop processes that employ both theatre and dance methodology, leading to the synthesis between choreographic, theatrical, visual, technological, and sound media.

#### Classes

The M.F.A. program in Dance Theatre provides an intensive laboratory for candidates to pursue processes that will hone their particular artistic voice in dance theatre. The curriculum is designed to allow graduate students to explore their own unique creative processes, to define their own particular aesthetic, and to discover and develop their own distinctive movement and performance language. Core courses consist of Choreography Seminars in the study and practice of aesthetic concepts, history, and methodology for choreographic creation of dance theatre; Dance Theatre Topics Seminars that provide in-depth discussion and research on a full spectrum of topics from collaborative processes to professional practice; costume, lighting, sound, and scenic design; and a rich offering of electives across media and between disciplines that allow each student to pursue individual areas of interest. Graduate students maintain a physical practice chosen from Graduate Studio offerings in contemporary practices, improvisation, ballet for contemporary dance, yoga, Pilates, and a range of Latin, African, and Asian dance forms.

#### Productions

Dance Theatre students will have the opportunity to create work throughout their time at UCSD in studio, workshop, cabaret, and site-specific productions. Second-year students will present a short work in the existing production in the spring quarter. Thesis projects of a significant dance theatre work will be fully executed by the extensive production talents of the M.F.A. design program in the winter quarter of the third year.

#### Externship

Students are encouraged to work or research in the field when time permits, and they are assisted with professional opportunities, typically in the spring or summer of the second year. Dance Theatre candidates may have an opportunity to gain production experiences in a variety of theatres and venues in San Diego, New York, Seattle, Los Angeles, and London, at the La Jolla Playhouse, or through a comparable professional residency experience.

### Design

The design program aims to train students in the best professional practices of regional and commercial theatre. The design faculty are award-winning working professionals also committed to teaching. The design training program stresses an interaction with the works of many visual and sound artists from a wide range of disciplines. Students are trained to create designs that “comment” on the play and the text, not merely “illustrate” it. Students’ talent and design work are showcased at a number of venues that have directly resulted in many national grants, awards, and other work opportunities for our alumni.

#### Classes

All students take a core curriculum of first-year design studio classes in scenery, costume, lighting, and sound (taken together with directors), and a design seminar where all three years come together in a forum to share production experiences, portfolios, and professional career techniques and skills. This is

followed in subsequent years by more specialized advanced design classes that combine with production work in the student’s own area of concentration. A double-emphasis study (e.g., scenery and costume design combined) is offered to appropriate students. Classes in other areas (e.g., drafting, text analysis, visual arts, music) are also normally offered.

#### Productions

There are a generous number of (fully executed) production opportunities, and generally all productions are designed by students. Designers collaborate with student, faculty, and internationally prominent guest directors. Students are fully supported by the same professional workshop staff as the La Jolla Playhouse and are not expected to build or run their own productions.

#### Externship

Student designers participate in a residency program at the La Jolla Playhouse, and normally work as assistants to visiting professional designers. However, there are also some opportunities for talented students to be hired as principal designers by the Playhouse during its season.

#### Research and Other Opportunities

Students may also be offered opportunities to travel with faculty as assistants on professional assignments to major regional theatres, Broadway, England, or Europe. Modest funds are sometimes available for student research and travel to see productions and to attend conferences and workshops.

### Directing

With an emphasis on the collaborative process, the purpose of the Directing Program is to develop directors with a solid foundation in the components of production and the interpretation of text. Individuals are encouraged to make challenging choices, to break down barriers, and to create exciting, meaningful theatre. Graduates of the program are prepared to select and get to the heart of a text, to communicate effectively with and inspire production designers, and to elicit expressive performances from the actors with whom they work.

#### Classes

The core curriculum of the Directing Process Program offers students opportunities to hone their skills in text analysis and scene work in all three years. The first-year student also completes a sequence in the acting process, develops a visual vocabulary in theatrical design and visual arts courses, and explores the nature of the collaborative process.

#### Productions

Directing students will direct from two to four department scheduled and supervised productions in the Mandell Weiss Center for the Performing Arts during their time at UCSD. In addition, studio, workshop, and cabaret productions of the director’s choice are strongly encouraged. The production season also offers opportunities to assist guest and faculty directors.

## Externship

In the students' second year, the La Jolla Playhouse provides a residency during which students typically serve as assistant directors.

## Additional Opportunities

It is common for the directing faculty to take M.F.A. directors with them to work as assistant directors at theatres around the United States and the world.

## Playwriting

Playwrights are more than mere writers. They are artists who unleash their imagination in incredibly dramatic ways. The successful playwright writes with intellectual power and emotional honesty, with a distinct and essential voice that speaks with vulnerability and sentience to the heart and soul of the audience. The dedicated, individual attention and formidable production opportunities of the program offer talented writers the ability to stretch, expand, and witness the unfolding of their work onstage in the bodies of very gifted actors.

## Classes

In Playwriting Seminar—the core course—writers in all three years read and discuss their ongoing work, focusing on style, character, and structure. They also observe their work being read by M.F.A. actors at times throughout the year. Writing for Television, Screenwriting, and Dramatization/Adaptation are offered in rotation within a three-year cycle. In addition, students take a variety of topics in theatre and dramatic literature along with individual practicum classes. Playwrights can take advantage of rich offerings in literature, music, visual arts, and language study, as well as in dramatic texts, theory, and design.

## Production

First-year students receive a one-act showcase production each year, while second- and third-year students receive a fully designed production. These are produced in the New Plays Festival each spring, which is attended by literary managers, agents, and artistic directors from across the country. Typically, these productions are directed, designed, and acted by students in the M.F.A. program. Production of plays in any year of study is dependent on the readiness of the work for staging.

## Externship

Each student is assisted with a carefully chosen assignment, typically in the summer of the second year. Our playwrights may have an opportunity to gain exceptional literary and production experiences in a variety of theatres and venues in New York, Seattle, Los Angeles, London, Germany, and Romania.

## Stage Management

The stage manager is a pivotal member of the collaborative process and creates the environment that supports the work of the other members of the artistic team. The stage manager is the prime communicator and liaison who synthesizes the disparate elements of production into a cohesive whole and is

responsible for the implementation of diverse artistic choices throughout the production process.

The Stage Management Program at UCSD integrates a comprehensive knowledge of all critical components of this complex field in order to prepare students for work in leading professional theatres. The program develops individualized, creative artists with personal approaches to their work. UCSD creates a supportive and stimulating environment that allows each student to develop the confidence and flexibility necessary to meet the challenges of production in a wide variety of professional venues.

## Classes

All first-year students take a core curriculum in stage management process that explores the role of the stage manager in professional theatre today and offers a comprehensive investigation of the work from pre-production to closing a show. Students in all three years attend the stage management seminar, which serves as a weekly forum for sharing insights and solving problems on current production assignments, meeting with a variety of guest artists, and examining the bigger picture of stage management and theatre in America today. Additional course work is offered in various aspects of theatre administration and management, professional practice, directing, design, and collaborative process.

## Productions

Great emphasis is placed on the student's ability to apply the theories learned in class to the production process. Students typically serve as both assistant stage manager and stage manager on a number of studio and main stage productions in a variety of theatrical spaces. In addition to established scripts directed by M.F.A. students, faculty, and nationally prominent guest directors, students also work on new plays by graduate or guest playwrights, as well as faculty and student choreographed dance concerts.

## Research Opportunities

Students are encouraged to work or research in the field when time permits. Past projects have included stage managing at the National Playwrights Conference at the O'Neill Center in Connecticut, interning at Warner Brothers Feature Animation, working as production assistant for the Broadway production of *Play On*, stage managing Andrei Serban's production of *Our Country's Good* at the Romanian National Theatre, and researching stage combat and weaponry at the Royal Shakespeare Company.

## Externship

Each student is guaranteed at least one production opportunity at the La Jolla Playhouse, or a comparable professional residency experience.

## PH.D. IN THEATRE AND DRAMA

The UCSD Department of Theatre and Dance and the Department of Drama at UC Irvine began to recruit students for the new Joint Doctoral Program in Theatre and Drama in fall 1999 for admission in fall 2000. Within the context of the program's twin focus on theory and history, an innovative structure permits each student to pursue a custom designed curriculum that draws from a rich variety of seminars

in faculty research areas that include Greek classical theatre; Shakespeare and his contemporaries; Italian, French, and German theatre; U.S.-Latino, African-American, and Asian-American theatre; and critical, historical, and performance theories.

Interested students are encouraged to request detailed information about the program and application materials, which will be available from either department each September.

## Preparation

Students with a B.A. (minimum GPA: 3.5), M.A., or M.F.A. degrees in drama and theatre are eligible for admission to the doctoral program. Students with training in literature (or another area in the humanities) will also be considered, provided they can demonstrate a background in drama or theatre. Experience in one of the creative activities of theatre (acting, directing, playwriting, design, dramaturgy) will enhance chances of admission.

All applicants are required to take the Graduate Record Examination and to submit samples of their critical writing.

While not required for admission, a working knowledge of a second language is highly desirable (see "[Language Requirement](#)").

## Course of Study

Students are required to take a minimum of 144 units, which is equivalent to four years of full-time study (full-time students must enroll for a minimum of twelve units each quarter). Forty of these units will be taken in required seminars; the balance will be made up of elective seminars, independent study, and research projects (including preparing the three qualifying papers), and dissertation research. Students must take a minimum of one seminar per year in the Department of Drama at UC Irvine. The program of study makes it possible for students to take a significant number of elective courses and independent studies both with faculty in drama and theatre and in other departments.

## Required Seminars

1. A minimum of twelve units of TDGR 290 (Dramatic Literature and Theatre History to 1900).
2. A minimum of twelve units of TDGR 291 (Dramatic Literature and Theatre History 1900 to the Present).
3. A minimum of sixteen units of TDGR 292 (Cultural and Critical Theory).

These required seminars must be completed before the end of the student's third year. In addition to the ten required seminars, students must pass comprehensive examinations at the end of the first and second years (see "[Comprehensive Examinations](#)" below).

## Comprehensive Examinations

In the first year, students prepare for the written comprehensive examination, which is based on a reading list of approximately 150 titles ranging from the ancient Greeks to the present. Students take the written comprehensive at the beginning of the fall quarter of the second year. (Comprehensive examinations are scheduled at the beginning of fall

quarter in order to allow the students the summer to prepare.) Students who fail the written comprehensive may retake it no later than the first week of winter quarter of the second year. Students who fail the written comprehensive for a second time are dismissed from the program.

In the second year, students prepare for oral comprehensive examination. The reading list for this examination is designed to permit the student to acquire a knowledge of his or her dissertation subject area, broadly conceived. The reading list is compiled by the student and his or her dissertation advisor, in consultation with other members of the faculty, as appropriate; the reading list must be established by the end of winter quarter of the second year. Students take the oral comprehensive at the beginning of the fall quarter of the third year. Students also submit a dissertation prospectus (approximately five pages) at the time of the oral comprehensive. Students who fail the oral comprehensive may retake it no later than the first week of winter quarter of the third year. Students who fail the oral comprehensive for a second time are dismissed from the program.

#### Advancement to Candidacy: Three Qualifying Papers

Students normally select a dissertation advisor during the second year and must do so before the end of spring quarter of that year. In consultation with the dissertation advisor and other faculty members, students develop topics for three qualifying papers, which are written during the third year. The three qualifying papers—one long (approximately fifty pages) and two short (approximately thirty pages each)—must be completed by the end of the third year; when completed, the qualifying papers provide the basis for the oral qualifying examination. Students write the long paper under the direction of the dissertation advisor; it is understood that the long paper is preparatory to the dissertation. The short papers deal with other related topics, subject to the approval of the student's advisors; the two short papers are understood as engaging in exploring the larger contexts of the dissertation. Students normally pass the qualifying examination and advance to candidacy at the end of the third year; students must advance to candidacy no later than the end of fall quarter of the fourth year. Once admitted to candidacy, students write the dissertation that, upon completion, is defended in a final oral examination. Students may select a dissertation advisor from either UCSD's Department of Theatre and Dance or UC Irvine's Department of Drama. All UCSD doctoral dissertation committees must include at least one faculty member from UC Irvine.

#### Language Requirement

Students are required to complete an advanced research project using primary and secondary material in a second language ("materials" should be understood as including live and/or recorded performance; interviews with artists, critics, and scholars; and other non-documentary sources, as well as more conventional textual sources). This requirement may be satisfied by writing a seminar paper or a qualifying paper (see "[Advancement to Candidacy](#)") that makes extensive use of materials in a second language. The second language requirement must be satisfied before the end of the third year. This

requirement will not be waived for students who are bi- or multilingual; all students are required to do research level work in more than one language.

It is assumed that students will have acquired a second language before entering the doctoral program, although second-language proficiency is not a requirement for admission. While students may study one or more second languages while at UC Irvine or UCSD, language classes may not be counted toward program requirements.

#### Teaching

Students are required to teach a minimum of four quarters. No more than eight units of apprentice teaching (TDGR 500) may be counted toward the required 144 units.

#### Departmental Ph.D. Time Limit Policies

Students must advance to candidacy by the end of the fall quarter of their fourth year. Departmental normative time for completion of the degree is five years; total registered time in the Ph.D. program at UCSD or UC Irvine cannot exceed seven years. While students with an M.A. or M.F.A. degree may be admitted to the Ph.D. program, they will be required to take all required doctoral seminars.

#### Financial Support

Students entering the Ph.D. program may be supported (by either employment or fellowships) for four years. Support depends on the funds available and on the student's rate of progress toward the degree.

## COURSES

*For course descriptions not found in the UC San Diego General Catalog, 2010–11, please contact the department for more information.*

**Note:** For changes in major requirements and in course offering implemented after publication, inquire at the office of the Department of Theatre and Dance.  
The subject codes are

TDAC (formerly THAC) Theatre Acting  
TDCH Dance Choreography  
TDDE (formerly THDE) Theatre Design  
TDDR (formerly THDR) Theatre Directing/Stage Management  
TDGE (formerly THGE) Theatre General  
TDGR (formerly THGR) Theatre Graduate  
TDHD Dance History  
TDHT (formerly THHS) Theatre History and Theory  
TDMV Dance Movement  
TDPF Dance Performance  
TDPR (formerly THPR) Theatre/Dance Practicum  
TDPW (formerly THPW) Theatre Playwriting  
TDTR Dance Theory

### TDAC—THEATRE ACTING

#### TDAC 1. Introduction to Acting (4)

A beginning course in the fundamentals of acting: establishing a working vocabulary and acquiring the basic skills of the acting process. Through exercises, compositions, and improvisations, the student actor explores the imagination as the actor's primary resource, and the basic approach to text through action. **Prerequisite:** none.

#### TDAC 101. Acting I (4)

This course focuses on beginning scene study with an emphasis on exploring action/objective and the given circumstances of a selected text. **Prerequisite:** THAC or TDAC 1 or consent of instructor.

#### TDAC 102. Acting II (4)

Further study in the application of the given circumstances to a text and the development of characterization. **Prerequisite:** THAC or TDAC 101 or consent of instructor.

#### TDAC 103A. Acting Intensive I (4)

An intensive foundation class for students interested in professional actor training. Using Viewpoints, students will train the physical, vocal, and emotional aspects of their actor instrument toward developing character and relationships by using scenes from contemporary and modern plays. **Prerequisites:** THAC 101 or TDAC 101, department stamp, and consent of instructor.

#### TDAC 103B. Acting Intensive II (4)

A continuation of TDAC 103A. Working from Meisner technique, students will learn to deepen and detail their objectives, spontaneous response, and deep listening skills. Focus on the process that will lead to scenework using this technique. **Prerequisites:** TDAC 103A, department stamp, and consent of instructor.

#### TDAC 104. Classical Text (4)

Studies in the heightened realities of poetic drama. Verse analysis, research, methods and how to approach a classical dialogue. **Prerequisites:** THAC or TDAC 102, and department stamp.

#### TDAC 105. Rehearing Shakespeare (4)

Advanced exploration of Shakespeare's language through examining and performing scenes from the plays. Admission by audition/interview. **Prerequisites:** THAC 102 or TDAC 102, department stamp, interview/audition, consent of instructor.

#### TDAC 106. Chekhov Acting (4)

Practical exercises, discussion, text analysis, and scene work on the writings of Anton Chekhov. Admission by audition/interview. **Prerequisites:** THAC 101 or TDAC 101, THAC 102 or TDAC 102, interview/audition, and consent of instructor.

#### TDAC 107. Improvisation for the Theatre (4)

Improvisation for the Theatre explores improvisation techniques as an alternative and unique approach to acting. Students should have a performance background. **Prerequisite:** THAC or TDAC 1.

#### TDAC 108. Advanced Topics (4)

Advanced topics in acting, such as avant garde drama, multimedia, or Beckett, for students who possess basic acting techniques. **Prerequisites:** THAC or TDAC 102, admission by audition, and department stamp.

#### TDAC 109. Singing for Actors (4)

This course introduces basic skills of breathing, placement, diction, musicianship, harmony, interpretation, and presentation needed by actors for roles requiring singing. Through a combination of group and individual coaching in class, students will prepare a program of short solo and ensemble pieces for a finals-week presentation. **Prerequisites:** THAC or TDAC 1 and audition; department stamp.

#### TDAC 111. Freeing the Voice (4)

Intensive workshop for actors and directors designed to "free the voice," with special emphasis on characteristics and vocal flexibility in a wide range of dramatic texts. This proven method combines experimental and didactic learning with selected exercises, texts, tapes, films, and total time commitment. **Prerequisite:** concurrent enrollment in THAC or TDAC 101.

#### TDAC 112. Major Seminar in Acting (4)

An in-depth study seminar focused on special issues in acting as they relate to contemporary theatre. Of particular interest to students who plan to pursue a career in this area of theatre. **Prerequisites:** department stamp; theatre majors only; upper-division only.

#### TDAC 115. Movement for Actors (4)

An exploration of the wide array of physical skills necessary for the actor. Using techniques derived from mime, clowning, sports, acrobatics, and improvisation, students

will investigate their individual physical potential as well as their sense of creativity and imagination. **Prerequisite:** THAC or TDAC 101.

#### **TDAC 120. Ensemble (4)**

An intensive theatre practicum designed to generate theatre created by an ensemble with particular emphasis upon the analysis of text. Students will explore and analyze the script and its author. Ensemble segments include black theatre, Chicano theatre, feminist theatre, and commedia dell'arte. Audition may be required. A maximum of four units may be used for major credit. (Cross-listed with ETHN 146A.) **Prerequisite:** department stamp.

#### **TDAC 122. Ensemble: Undergraduate Production (4)**

Participation in a fully staged theatre production directed by an M.F.A. or Ph.D. student for the Department of Theatre and Dance. Admission by audition only. A maximum of four units may be used for major credit. **Prerequisites:** consent of the instructor; department stamp.

#### **TDAC 123. Advanced Studies in Performance (4)**

Participation in a fully staged season production that is directed by a faculty member or guest for the Department of Theatre and Dance. Admission by audition only. A maximum of four units may be used for major credit. **Prerequisites:** consent of the instructor; department stamp.

#### **TDAC 126. Acting-Directing Process (4)**

A studio class that investigates the relationship between the actor and the director. Working alongside directors, students learn how to animate the writer's and director's vision onstage through status exercises and scene work while expanding their skills in the acting process. **Prerequisites:** THAC or TDAC 1 and THAC or TDAC 101, or consent of instructor.

### **TDCH—DANCE CHOREOGRAPHY**

#### **TDCH 40. Principles of Choreography (4)**

Presents the fundamentals of the concepts, elements, aesthetics, and process of choreographic creation through practical studies, discussions, and examination of theories and major choreographic works. **Prerequisite:** TDTR 10.

#### **TDCH 140. Improvisation/Composition (4)**

The study of compositional and improvisation methods concerning the aesthetic awareness of movement, and organization of elements in time, space, and energy. Both structured and unstructured tasks facilitate development of movement vocabulary, imagination, timing, spontaneity, contact skills, and compositional choices. **Prerequisite:** TDTR 10.

#### **TDCH 142. Choreographic Workshop (4)**

Advanced problem solving through practical and conceptual studies. Choreographic projects enable students to create short works for solo, duet, and small group situations, with options of focus on cross-media collaboration, site specific work, dramatic text, and advanced partner work. **Prerequisites:** TDTR 10, TDCH 40.

#### **TDCH 143. Choreography and Dramatic Text (4)**

Choreographic problems in movement style and purpose will be explored through analysis of both historical and contemporary dramatic text. Emphasis will be placed on dance as a complement to verbal communication and a medium for nonverbal communication. **Prerequisites:** TDTR 10, TDCH 40.

#### **TDCH 145. Music for Dance Composition (4)**

Presents the fundamentals of the concepts, elements, aesthetics, and process of music; explores choreographer/composer/musician collaborations. Rhythmic analysis will include the physical application of relating movement and sound. **Prerequisites:** TDTR 10, TDCH 40.

#### **TDCH 146. Advanced Improvisation: Partnering (4)**

Advanced problem solving through practical and conceptual studies pertaining to improvisation and partnering. **Prerequisites:** TDTR 10, TDCH 40, or consent of instructor.

#### **TDCH 196A. Senior Honors Focus Choreographic (4)**

Selected seniors create a significant choreographic work or media project under faculty mentorship for presentation in

the studio theatre, spring dance production, or site-specific alternative location. All courses in the choreography series must be completed or concurrent with the senior honors focus. Individual honors contract for selected senior dance majors. Honors content noted on transcript. Requirements: 3.5 overall GPA, 3.7 major GPA, 90 units completed, and 2 quarter commitment. **Prerequisites:** TDCH 40, TDCH 140, TDCH 142, TDCH 145, consent of instructor, and department stamp. May be taken two times for credit.

#### **TDCH 196B. Senior Honors Focus Choreographic (4)**

Continuation of TDCH 196A. Selected seniors present a significant choreographic work or media project under faculty mentorship in the studio theatre, spring dance production, or site-specific alternative location. All courses in the choreography series must be completed or concurrent with the senior honors focus. Individual honors contract for selected senior dance majors. Honors content noted on transcript. Requirements: 3.5 overall GPA, 3.7 major GPA, 90 units completed, and 2 quarter commitment. **Prerequisites:** TDCH 40, TDCH 140, TDCH 142, TDCH 145, TDCH 196A, consent of instructor, and department stamp. May be taken two times for credit.

### **TDDE—THEATRE DESIGN**

#### **TDDE 1. Introduction to Design for the Theatre (4)**

A survey of contemporary and historical concepts and practices in the visual arts of the theatre; studies in text analysis, studio processes and technical production; elementary work in design criticism, scale model making, and costume design. A course serving as an introduction to theatre design and production.

#### **TDDE 101. Theatre Process—Scenery (4)**

A hands-on course develops craft skills and solution-finding process in design including script analysis, concept sketches, research, and scale model making. An exploration of fundamental ways of seeing and understanding visual design. **Prerequisite:** THDE or TDDE 1 or THPR 1.

#### **TDDE 102. Advanced Scenic Design (4)**

An advanced course based on the "practice" of scenic design, dealing with the solution finding process, from text to idea to realized work. **Prerequisite:** THDE or TDDE 1, THDE or TDDE 101, or consent of instructor.

#### **TDDE 111. Theatre Process—Costume Design (4)**

The process of the costume designer from script analysis and research visualization of ideas, through the process of costume design. Lecture and demonstration labs parallel lecture material. This course is intended for those interested in a basic understanding of the costumer's process. No previous drawing or painting skills required. **Prerequisite:** THDE or TDDE 1.

#### **TDDE 112. Advanced Costume Design (4)**

An advanced course based on the "practice" of costume design, dealing with the solution finding process, from text to idea to realized work. **Prerequisite:** THDE or TDDE 1, THDE or TDDE 111, or consent of instructor.

#### **TDDE 113. Costume Design for Dance (4)**

This course covers the basics of costume design specific to the needs of choreographers and dance productions. Topics include principles of design, rendering techniques, fabrics, and construction. The course also explores the collaborative process of design for dance. **Prerequisite:** TDDE 1 or consent of instructor.

#### **TDDE 121. Theatre Process—Lighting Design (4)**

One of three classes in theatre process. The course aims to develop basic skills in lighting design through practical projects, lab work and lecture. These emphasize collaborating, manipulating light and color, and developing craft skills. **Prerequisite:** THDE or TDDE 1 or THPR or TDPR 3 or consent of instructor.

#### **TDDE 122. Advanced Lighting Design (4)**

Creative projects and topics in lighting design. Work to include studies and design research, concepts, collaboration, professional procedures and systems, paperwork, and organization. Varies scales of theoretical and practical projects in the light lab and classroom will be addressed by the student for presentation and critique. Final project will be a lighting design suitable for a design portfolio.

**Prerequisite:** THDE or TDDE 1, THDE or TDDE 121, or consent of instructor.

#### **TDDE 130. Assistant Designer (2–6)**

A production-oriented course that continues to introduce students to the fundamentals of design assisting. Laboratory format allows the student to work with faculty, graduate, or advanced undergraduate theatre designers, doing research, developing design concepts, and supporting the designer in a number of professional ways. **Prerequisites:** THDE or TDDE 1, any upper-division undergraduate theatre design class, THPR or TDPR 1, 2, 3, or 5; and consent of instructor; department stamp. May be taken twice for credit.

#### **TDDE 131. Special Topics in Theatre Design (4)**

A course designed to expose the theatre design students to a variety of specialized topics that will vary from quarter to quarter. **Prerequisite:** THDE or TDDE 1 or consent of instructor. May be taken three times for credit.

#### **TDDE 132. Undergraduate Mainstage Production: Design (4)**

A course that will guide a student in a design assignment on the undergraduate main stage production. Specialized topics dependent on the design requirements of the production. **Prerequisites:** THDE or TDDE 1 and THDE or TDDE 101 or THDE or TDDE 121, or THDE or TDDE 131, or consent of instructor. May be taken three times for credit.

#### **TDDE 141. Theatre Process—Sound Design (4)**

A hands-on course on the process of sound design from conception to planning and implementation. The course will concentrate equally on the technical and artistic aspects of the sound design process and will include a survey of modern audio technologies. **Prerequisite:** TDPR 5 or MUS 173 or consent of instructor.

#### **TDDE 142. Advance Sound Design (4)**

This course focuses on advancing students in their artistic and technical skills in sound design. A large-scale project will be identified with special attention given to text analysis and technical specification of the sound design. **Prerequisites:** TDDE 1 and TDDE 141 or equivalent, or consent of instructor.

#### **TDDE 190. Major Project in Design/Theatre Production (4)**

For the advanced design/production student. Concentration on a particularly challenging design or theatre production assignment, including such areas as assistant designer (scenery, lighting, or costumes), technical director, master cutter, or master electrician. May be repeated one time for credit. A maximum of eight units of major project study, regardless of area (design, directing, or stage management) may be used to fulfill major requirements. **Prerequisite:** admission by consent of instructor only. See department for application form. May be taken two times for credit.

### **TDDR—THEATRE DIRECTING/STAGE MANAGEMENT**

#### **TDDR 101. Stage Management (4)**

Discussion and research into the duties, responsibilities, and roles of a stage manager. Work to include studies in script analysis, communication, rehearsal procedures, performance skills, and style and conceptual approach to theatre. THGE or TDGE 1, THAC or TDAC 1, and THDE or TDDE 1 recommended.

#### **TDDR 108. Text Analysis for Actors and Directors (4)**

This is an introductory class in the process of understanding the play script. The class will focus on analyzing the story and the underlying dramatic structure in terms of dramatic action. Objectives, actions, choices, given circumstances, and character will be examined. **Prerequisite:** upper-division standing or consent of instructor.

#### **TDDR 111. Directing-Acting Process (4)**

A studio class that investigates the fundamental skills a director needs to work with actors. Working with actors, students learn how to animate the text onstage through status exercises and scene work as they develop their skill in

text work, staging, and dramatic storytelling. **Prerequisite:** THDR or TDDR 108 or THHS or TDHT 10.

#### **TDDR 190. Major Project in Directing (4)**

For the advanced student in directing. Intensive concentration on the full realization of a dramatic text from research and analysis through rehearsal and into performance. A maximum of eight units of major project study, regardless of area (design, directing, or stage management) may be used to fulfill major requirements. See department for application. **Prerequisites:** THDR or TDDR 108, THDR or TDDR 111, consent of instructor, and department stamp. May be taken two times for credit.

#### **TDDR 191. Major Project in Stage Management (4)**

For the advanced student in stage management. Intensive concentration on the full realization of a dramatic text, from research and analysis through rehearsal and final performance. A maximum of eight units of major project study regardless of area (design, directing, stage management, or playwriting) may be used to fulfill major requirements. See department for application. **Prerequisites:** THPR or TDPR 4, THPR or TDPR 104, THDR or TDDR 101, consent of instructor, and department stamp. May be taken two times for credit.

### **TDGE—THEATRE GENERAL**

#### **TDGE 1. Introduction to Theatre (4)**

An introduction to fundamental concepts in drama and performance. Students will attend performances and learn about how the theatre functions as an art and as an industry in today's world. **Prerequisite:** none.

#### **TDGE 2. Solo Performance (4)**

Analysis, history, and literature of solo performance in the United States; screening of pivotal one-person shows; workshops to design and mount students' own solo theatre pieces; focus on delivery of American experiences through performance. **Prerequisite:** none.

#### **TDGE 10. Theatre and Film (4)**

Theatre and Film analyzes the essential differences between theatrical and cinematic approaches to drama. Through selected play/film combinations, the course looks at how the director uses actors and the visual languages of the stage and screen to guide and stimulate the audience's responses. **Prerequisite:** none.

#### **TDGE 11. Great Performances on Film (4)**

Course examines major accomplishments in screen acting from the work of actors in films or in film genres. **Prerequisite:** none. May be taken three times for credit.

#### **TDGE 25. Public Speaking (4)**

This course is designed to establish a clear understanding of the fundamentals of effective oral communication. The methodologies explore the integration of relaxation, concentration, organization, and clear voice and diction as applied to various public speaking modes. **Prerequisite:** none.

#### **TDGE 87. Freshman Seminar in Theatre and Dance (1)**

Seminar on a topic in theatre or dance on a level appropriate for first-year students, conducted in an informal, small group setting limited to ten to twenty students. Topics will vary. **Prerequisite:** open to freshmen only.

#### **TDGE 90. Undergraduate Seminar (1)**

Discussion of various theatre topics.

#### **TDGE 108. Production (4)**

The collaborative process from the rehearsal process through public performance. All participants will enroll for the same number of units with the director of theatre. **Prerequisite:** consent of instructor.

#### **TDGE 122. The Films of Woody Allen (4)**

Students explore a variety of issues: screenwriting, directing, cinematography, and editing; the intersection of comedy and tragedy in Allen's works; recurring themes; and critical responses. Students view thirteen films and write two three-page essays and one ten-page research paper. **Prerequisite:** upper-division standing.

#### **TDGE 123. Mary Poppins Meets Bladerunner (4)**

A lecture class that examines significant historical and contemporary art direction/scenic design that effectively supports film narration in a unique manner. Highlights and video clips accompany each feature film presentation. (THDE 1 recommended.) **Prerequisite:** upper-division standing.

#### **TDGE 124. Cult Films: Weirdly Dramatic (4)**

A select survey of eight to ten exceptional offbeat, frequently low-budget films from the last sixty years that have attained cult status. The mix includes Tod Browning's *Freaks* (1932) to John Water's *Pink Flamingos* (1973). Aspects of bad taste, cinematic irony, and theatrical invention will be highlighted. **Prerequisite:** upper-division standing.

#### **TDGE 125. Topics in Theatre and Film (4)**

Great films and the performance of the actors in them are analyzed in their historical, cinematic, or theatrical contexts. This course examines the actor's contribution to classic cinema and the social and aesthetic forces at work in film. **Prerequisites:** upper-division standing or consent of instructor.

#### **TDGE 126. Storytelling and Design in Animation (4)**

This course will use a broad range of animation styles and genres to examine larger issues in art practice, focusing closely on the relationship between form and content, and how sound/set/costume/character design impacts narrative. **Prerequisite:** upper-division standing or consent of instructor.

#### **TDGE 127. The Films of Spike Lee (4)**

Students view eight to ten films of this important filmmaker to examine style; genre; screenwriting; directing; cinematography; recurring themes; the place of this work in (African) American history; race and movie industry politics; and critical responses. **Prerequisite:** upper-division standing or consent of instructor.

#### **TDGE 130. Let There Be Light! (4)**

An adventure-theory class investigating the power of light and color in art, architecture, theatre, film, and television, and exploring its impact on students' lives. Students will perform research, submit papers, and create practical examples. No prior light/design skills required. **Prerequisites:** none.

#### **TDGE 192. Senior Seminar in Theatre and Dance (1)**

The Senior Seminar Program is designed to allow senior undergraduates to meet with faculty members in a small group setting to explore an intellectual topic in theatre and dance (at the upper-division level). Topics will vary from quarter to quarter. Senior seminars may be taken for credit up to four times, with a change in topic, and permission of the department. Enrollment is limited to twenty students, with preference given to seniors. **Prerequisites:** senior standing; department stamp and/or consent of instructor.

#### **TDGE 195. Instructional Assistance (2 or 4)**

Assist with instruction in undergraduate theatre courses. Full description of duties will appear on the "Application for Instructional Assistance." **Prerequisites:** upper-division standing; 3.0 GPA; department stamp. May be repeated for a total of 8 units.

#### **TDGE 196A. Honors Study in Theatre (4)**

Theatre honors students undertake research for a scholarly thesis or a creative project in playwriting or in directing under the guidance of a faculty mentor. Creative projects will culminate in a written thesis that is either a full-length play or a dramaturgical discussion of the directing project. **Prerequisites:** upper-division course work in the area of thesis, department stamp, 3.5 GPA in major, approval of faculty member.

#### **TDGE 196B. Honors Study in Theatre (4)**

Theatre honors students complete the thesis, play, or dramaturgical analysis of a directing project under the close supervision of a faculty mentor. **Prerequisites:** upper-division course work in the area of thesis, TDGE 196A, 3.5 GPA in major, approval of faculty member.

#### **TDGE 197. Field Studies (1–12)**

Designed for advanced students, this course significantly extends their knowledge of the theatre through intensive participation in the creative work of a major professional

theatre, television, or film company under the guidance of artists resident in those theatres or companies. Students will submit regular written evaluations each week of their ongoing field study. **Prerequisites:** consent of instructor, upper-division standing, and department stamp. May be taken two times for credit.

#### **TDGE 198. Directed Group Studies (0-2-4)**

Group studies, readings, projects, and discussions in theatre history, problems of production and performance, and similarly appropriate subjects. **Prerequisites:** upper-division standing, 2.5 GPA, consent of instructor, and department stamp. May be repeated for a total of 12 units.

#### **TDGE 199. Special Projects (0-2-4)**

Qualified students will pursue a special project in theatre history, problems of production and performance, and similarly appropriate topics. **Prerequisites:** upper-division standing, 2.5 GPA, consent of instructor, and department stamp.

### **TDHD—DANCE HISTORY**

#### **TDHD 171. Dance History I (Ancient to 1900) (4)**

The study of the history of dance from antiquity to the early twentieth century. An analysis and understanding of the social, political, and cultural forces on the development of early dance theories and practices. **Prerequisite:** TDTR 10. Not equivalent to THDA 151, Dance History–Ballet.

#### **TDHD 172. Dance History II (1900 to 1960) (4)**

The study of the history of dance from the early twentieth century to the 1960s. An analysis and understanding of the social, political, and cultural forces on the development of dance theories and practices. **Prerequisite:** TDTR 10. Not equivalent to THDA 152, Dance History–Modern.

#### **TDHD 173. Dance History III (1960 to Present) (4)**

The study of the history of dance from the 1960s to the present. An analysis and understanding of social, political, and cultural forces on the development of current dance theories and practices. **Prerequisite:** TDTR 10. Not equivalent to THDA 151, Dance History–Jazz Dance and Related Ethnic Studies.

#### **TDHD 174. Dance Aesthetics and Criticism (4)**

An historical overview of the aesthetic concepts that form the foundation for the creation, performance, and critical analysis of dance. Critical and aesthetic theory in related arts will be discussed and contrasted. **Prerequisite:** TDTR 10 or consent of instructor.

#### **TDHD 175. Cultural Perspectives on World Dance (4)**

The study of world dance forms from a global perspective. An analysis and understanding of ethnic dance traditions and their connections to religion, ritual, folklore, custom, festive celebration, popular culture, and political movements. **Prerequisite:** TDTR 10 or consent of instructor.

#### **TDHD 176. Dance History—Special Topics (4)**

An in-depth exposure to an important topic in dance history, theory, aesthetics, and criticism. Topics vary from quarter to quarter. **Prerequisites:** TDTR 10, upper-division standing.

#### **TDHD 196A. Senior Honors Focus Scholarly (4)**

Selected seniors will complete a scholarly research project on a dance topic of their choice under faculty mentorship that will be reviewed by the faculty and archived. All courses in the history series must be completed or concurrent with the senior honors focus. Individual honors contract for selected senior dance majors. Honors content noted on transcript. Requirements: 3.5 overall GPA, 3.7 major GPA, 90 units completed, and 2 quarter commitment. **Prerequisite:** TDHD 171, TDHD 172, TDHD 173, TDHD 174, TDHD 175, consent of instructor, and department stamp.

#### **TDHD 196B. Senior Honors Focus Scholarly (4)**

Continuation of TDHD 196A. Selected seniors will present a scholarly research project on a dance topic of their choice under faculty mentorship that will be reviewed by the faculty and archived. All courses in the history series must be completed or concurrent with the senior honors focus. Individual honors contract for selected senior dance majors. Requirements: 3.5 overall GPA, 3.7 major GPA, 90 units completed, and 2 quarter commitment. **Prerequisites:**

TDHD 171, TDHD 172, TDHD 173, TDHD 174, TDHD 175, TDHD 196A, consent of instructor, and department stamp.

## TDHT—THEATRE HISTORY

### TDHT 10. Introduction to Play Analysis (4)

An introduction to the fundamental techniques of analyzing dramatic texts. Focus is on the student's ability to describe textual elements and their relationships to each other as well as on strategies for writing critically about drama. **Prerequisites:** none.

### TDHT 21. Ancient and Medieval Theatre (4)

Ancient and medieval theatre. Explores the roots of contemporary theatre in world performance traditions of ancient history with a focus on humans' gravitation toward ritual and play. Examples come from Egypt, Greece, Rome, Mesoamerica, Japan, China, India, Indonesia, Persia, and England. **Prerequisite:** none.

### TDHT 22. Theatre 1500–1900 (4)

Explores varieties of drama in professional theatre from 1500 to 1900 in Europe, Japan, and China, and their interconnections both formal and historical. **Prerequisite:** none.

### TDHT 23. Twentieth-Century Theatre (4)

Twentieth-century theatre: a survey of drama from 1900 to 1990, with attention also paid to the development of avant-garde performance forms. Plays discussed reflect developments in Europe and the U.S., but also transnational, postcolonial perspectives. **Prerequisite:** none.

### TDHT 101. Topics in Dramatic Literature and Theatre History (4)

An in-depth exposure to an important individual writer or subject in dramatic literature and/or theatre history. Topics vary from quarter to quarter. Recent courses have included Modern French Drama, and the History of Russian Theatre. **Prerequisite:** THHS or TDHT 10 or consent of instructor. May be taken three times for credit.

### TDHT 101XL. Topics in Dramatic Literature and Theatre History: Foreign Language Discussion Section (1)

Foreign-language discussion of materials in the English-language course with corresponding number. This section is taught by the course professor, has no final exam, and does not affect the grade in the parent course. **Prerequisite:** concurrent enrollment in TDHT 101.

### TDHT 102. Masters of Theatre (4)

Focus on the artists of seminal importance in the theatre. Consideration will be given to theory and practice of the artist, with emphasis on theatrical realizations that can be reconstructed by integrated research. Examples of recent courses include Molière, Fugard, and Strindberg. **Prerequisite:** THHS or TDHT 10 or consent of instructor. May be taken three times for credit.

### TDHT 103. Asian American Theatre (4)

This course examines pivotal dramatic works in the history of professional Asian American theatre in the U.S. (1960s to the present). Issues include interculturalism, the crossover between minority theatres and mainstream venues, and the performance of identity. **Prerequisite:** THHS or TDHT 10 or consent of instructor.

### TDHT 104. Italian Comedy (4)

Continuities and changes in Italian comedy from the Romans through the Renaissance and commedia dell'arte to modern comedy. **Prerequisite:** THHS or TDHT 10 or consent of instructor.

### TDHT 105. French Comedy (4)

Masterpieces of French farce and comedy from the seventeenth century to the twentieth century studied their theatrical and cultural contexts. Readings include plays by Molière, Marivaux, Beaumarchais, and Feydeau. **Prerequisite:** THHS or TDHT 10 or consent of instructor.

### TDHT 106. Brecht and Beyond (4)

Examination of the German playwright and director, Bertolt Brecht and of recent representative plays and performances from world theatre that reveal a creative assimilation of Brecht's influence on artists including Peter Weiss, Heiner

Muller, Augusto Boal, and Tony Kushner. **Prerequisite:** THHS or TDHT 10 and TDHT 21 or consent of instructor.

### TDHT 106XL. Brecht and Beyond: Foreign

#### Language Discussion Section (1)

Foreign language discussion of materials in the English-language course with corresponding number. This section is taught by the course professor, has no final exam, and does not affect the grade in the parent course. **Prerequisite:** concurrent enrollment in TDHT 106.

### TDHT 107. American Theatre (4)

In this course we will examine representative plays and playwrights who write about the American experience from a variety of historical periods and diverse cultural communities. Playwrights will include O'Neill, Glaspell, Miller, Williams, Hellman, Wasserstein, Wang, and Parks. **Prerequisite:** THHS or TDHT 10 or consent of instructor.

### TDHT 108. Luis Valdez (4)

In this course examines the works of Luis Valdez, playwright, director, screenwriter, film director, and founder of the Teatro Campesino. Readings include plays and essays by Valdez and critical books and articles about this important American theatre artists. **Prerequisite:** THHS or TDHT 10 or consent of instructor.

### TDHT 109. African American Theatre (4)

This course provides a survey of the contributions to the theatre arts made by African Americans. Analytic criteria will include the historical context in which the piece was crafted; thematic and stylistic issues; aesthetic theories and reception. **Prerequisite:** THHS 10 or TDHT 10 or consent of instructor.

### TDHT 110. Chicano Dramatic Literature (4)

Focusing on the contemporary evolution of Chicano dramatic literature, this course will analyze playwrights and theatre groups that express the Chicano experience in the United States, examining relevant "actors," plays, and documentaries for their contributions to the developing Chicano theatre movement. (Cross-listed with Ethnic Studies 132.) **Prerequisite:** THHS or TDHT 11 or 12 or 13 or consent of instructor.

### TDHT 111. Hispanic-American Dramatic Literature (4)

Course examines the plays of leading Cuban-American, Puerto-Rican, and Chicano playwrights in an effort to understand the experience of these Hispanic-American groups in the United States. (Cross-listed with Ethnic Studies 133.) **Prerequisite:** THHS or TDHT 11 or 12 or 13 or consent of instructor.

### TDHT 112. Gay and Lesbian Themes in U.S. Latino Theatre (4)

This course examines plays by Latina and Latino playwrights that include characters who are gay, lesbian, bisexual, or transgendered. Readings include the plays as well as articles and essays about the plays, playwrights, and queer theory. **Prerequisites:** THHS or TDHT 10 and 13.

### TDHT 113. Avant-Garde Theatre (4)

Innovations in theatre production and performance since the late nineteenth century. Artists and movements studied include Jarry, Appia, Constructivism, Expressionism, Dada cabaret, performance art, and dance theatre. Complements TDHT 13's focus on dramatic innovation. **Prerequisite:** THHS or TDHT 10 or consent of instructor.

### TDHT 114. American Musical Theatre (4)

The class will explore this vital and unique theatre form by examining its origins, evolution components, and innovators. Special emphasis is placed on the process of adaptation and the roles of the director and choreographer. **Prerequisites:** upper-division standing; THHS or TDHT 10; or consent of instructor.

### TDHT 115. History and Theory of Directing (4)

Evolution of directing theory from 1850 to the present with reference to the work of internationally influential directors such as Saxe-Meiningen, Antoine, Stanislavski, Meyerhold, Brecht, and Brook, among others. **Prerequisite:** THHS or TDHT 10, TDHT 21 and THAC 101 or TDAC 101 or consent of instructor.

### TDHT 116. Old Myths in New Films (4)

The course will address the work of different writers each quarter, showing how their films derive from classic myths, legends, and traditions of a specific ethnic group. Authors discussed may include Kurosawa (Japanese), Herzog (German), Neil Jordan (Irish), and other moderns. **Prerequisite:** upper-division standing or consent of instructor. May be taken three times for credit.

### TDHT 118. Dramaturgy in Practice (4)

Provides opportunities for students to undertake dramaturgy assignments for productions or as projects. Class meetings will create a mentoring atmosphere focused on the concrete, day-to-day process of dramaturging a project. **Prerequisites:** Theatre major, THHS or TDHT 11, 12, 13, and TDHT 118; at least two UD History courses; consent of instructor.

## TDMV—DANCE MOVEMENT

### TDMV 1. Beginning Ballet (2)

An introduction to classical ballet principles, technique, and terminology. Develops the body for strength, flexibility, and artistic interpretation. Emphasis on developing a foundation in classical movement for continuation of ballet training. Historical origin of ballet will be discussed. **Prerequisite:** none. May be taken six times for credit.

### TDMV 2. Beginning Contemporary Dance (2)

Introduction to contemporary dance as an expressive medium, building technical skills at the beginning level. Pattern variations analyzed in time, space, design, and kinetic sense. Movement exploration includes improvisation and composition. **Prerequisite:** none. May be taken six times for credit.

### TDMV 3. Beginning Jazz (2)

Introduction to the technique of jazz dance, while placing the art form in its historical context as an American vernacular form. Builds a beginning technical jazz vocabulary with a focus on rhythmic exercises, isolations, turns, and locomotor combinations. **Prerequisite:** none. May be taken six times for credit.

### TDMV 11. Theatrical Tap (2)

The study of theatrical tap dance. Various styles of tap—such as classical, rhythm, and musical theatre—will be introduced. Emphasis on rhythm, coordination, timing, and theatrical style. Includes basic through intermediate tap movement. **Prerequisite:** none.

### TDMV 110. Intermediate Ballet (4)

Continued studio work in ballet technique at the intermediate level and terminology. Emphasis on increasing strength, flexibility, and balance, and the interpretation of classical musical phrasing. Includes proper alignment training and artistic philosophy of classical ballet. **Prerequisite:** six units of THDA or TDMV 1 or consent of instructor. May be taken six times for credit.

### TDMV 111. Advanced Ballet (4)

Further emphasis on advanced ballet technique, performance, terminology, and an introduction to point work. Introduces historical ballet choreographic variations. Individual and group composition will be examined and aesthetic criticism applied. **Prerequisite:** twelve units of THDA 101A-B-C or TDMV 110 or consent of instructor. May be taken six times for credit.

### TDMV 112. Advanced Ballet for Contemporary Dance (4)

Designed for students with advanced training in contemporary modern dance and intermediate to advanced training in ballet. Emphasis is on increasing composition and performance skills in ballet through contemporary modern dance aesthetics. **Prerequisite:** twelve units of THDA 101A-B-C or TDMV 111 or consent of instructor. May be taken six times for credit.

### TDMV 120. Intermediate Contemporary Dance (4)

The development of contemporary dance as an expressive medium, with emphasis on technical skills at the intermediate level. Includes the principles, elements, and historical context of contemporary modern postmodern dance. **Prerequisite:** six units of THDA 2 or TDMV 2 or consent of instructor. May be taken six times for credit.

#### **TDMV 122. Advanced Contemporary Dance (4)**

The development of contemporary dance as an expressive medium, with emphasis on advanced technical skills, expressive style, and performance elements. Choreography and aesthetic concepts will be explored. Incorporates applied physiological principles of human movement. **Prerequisite:** twelve units of THDA 110A-B-C or TDHA 111A-B-C, or TDMV 112, or TDMV 120 or consent of instructor. May be taken six times for credit.

#### **TDMV 130. Intermediate Jazz (2)**

Designed to provide training in the technique of jazz dance, while placing the art form in its historical context as an American vernacular form. Builds an intermediate technical jazz level with a focus on style, musicality, dynamics, and performance. **Prerequisite:** six units of THDA 3 or TDMV 3 or consent of instructor. May be taken six times for credit.

#### **TDMV 133. Advanced Jazz Dance (4)**

Further development in the technique of jazz dance, while placing the art form in its historical context as an American vernacular form. Builds an advanced technical jazz level with a focus on style, musicality, dynamics, and performance. **Prerequisite:** six units of THDA 120A-B-C or THDA 121A-B-C or TDMV 130 or consent of instructor. May be taken six times for credit.

#### **TDMV 138. Hip-Hop (2)**

An introduction to the basic technique of hip-hop, studied to enhance an understanding of the historical cultural content of the American form hip-hop and street dances in current choreography. **Prerequisite:** THDA 3 or TDTR 10 or consent of instructor. May be taken twice for credit.

#### **TDMV 139. Pilates Dance Conditioning (2)**

A conditioning program based on the teachings of Joseph Pilates, designed to correct muscular imbalances, and body alignment by incorporating strength, flexibility, and relaxation techniques. **Prerequisite:** THDA 1 or THDA 2 or THDA 3 or TDMV 1 or TDMV 2 TDMV 3 or consent of instructor. May be taken three times for credit.

#### **TDMV 140. Beginning Dances of the World (2)**

Courses designed for the in-depth study of the dances and historical context of a particular culture or ethnic form: Afro-Cuban, Spanish, Balinese, Japanese, Latin, etc. Specific topic will vary from quarter to quarter. **Prerequisite:** upper-division standing.

#### **TDMV 141. Advanced Dances of the World (4)**

Courses designed for the advanced continuing study of the dances and historical context of a particular culture or ethnic form: Afro-Cuban, Spanish, Balinese, Japanese, Latin, etc. Specific topic will vary from quarter to quarter. **Prerequisite:** THDA 132 or TDMV 136 or TDMV 142 or TDMV 143 or TDMV 144, or consent of instructor.

#### **TDMV 142. Latin Dance of the World (4)**

To develop an appreciation and understanding of the various Latin dances. Emphasis on learning basic social dance movement vocabulary, history of Latin cultures, and use of each dance as a means of social and economic expression.

#### **TDMV 143. West African Dance (4)**

An introductory course that explores the history of West African cultures and diasporas through student research, oral presentation, dance movement, and performance. Contemporary African dances influenced by drum masters and performing artists from around the world are also covered. **Prerequisite:** upper-division standing.

#### **TDMV 144. Asian Dance (4)**

To develop an appreciation and understanding of the dances from various Asian cultures. Emphasis on learning the basic forms and movement vocabularies, their historical context, and the use of each dance as a means of cultural and artistic expression. **Prerequisite:** upper-division standing.

### **TDPF—DANCE PERFORMANCE**

#### **TDPF 160. Studies in Performance— Fall Production (2–4)**

The in-depth study of a major dance production in a fall dance cabaret led by faculty. Admission by audition only.

**Prerequisites:** audition; department stamp; concurrent enrollment in TDMV 110, 111, 112, 120, 122, 130, or 133.

#### **TDPF 161. Studies in Performance— Winter Production (2–4)**

The in-depth study for a fully staged dance production in various venues, including a fall dance cabaret led by faculty, a winter faculty concert with guest choreographers, and a spring student choreographed concert directed by faculty. Admission by audition only. **Prerequisites:** audition, department stamp, concurrent enrollment in TDMV 163, TDMV 110 or TDMV 111 or TDMV 112 or TDMV 120 or TDMV 122 or TDMV 130 or TDMV 133. May be taken four times for credit.

#### **TDPF 162. Studies in Performance Winter Production (2–4)**

The in-depth study for a fully staged dance production in various venues, including a fall dance cabaret led by faculty, a winter faculty concert with guest choreographers, and a spring student choreographed concert directed by faculty. Admission by audition only. **Prerequisites:** audition, department stamp, concurrent enrollment in TDMV 163, TDMV 110 or TDMV 111 or TDMV 112 or TDMV 120 or TDMV 122 or TDMV 130 or TDMV 133. May be taken four times for credit.

#### **TDPF 162. Studies in Performance Spring Production (2–4)**

The in-depth study for a fully staged dance production in various venues, including a fall dance cabaret led by faculty, a winter faculty concert with guest choreographers, and a spring student choreographed concert directed by faculty. Admission by audition only. **Prerequisites:** audition, department stamp, concurrent enrollment in TDMV 163, TDMV 110 or TDMV 111 or TDMV 112 or TDMV 120 or TDMV 122 or TDMV 130 or TDMV 133. May be taken four times for credit.

#### **TDPF 163. Dance Repertory (1–4)**

The study and aesthetic examination of major choreographic works by dance faculty or distinguished guest artists. Students will experience the creative process, staging, production, and performance of a complete dance work in conjunction with a conceptual study of its form and content. Audition is required. **Prerequisite:** concurrent enrollment in TDPF 160 or TDPF 161 or TDPF 162. May be taken four times for credit.

#### **TDPF 164. Performance Laboratory (2–4)**

A faculty directed dance theatre project culminating in a public performance. Both purely choreographic approaches to creating dance and collaborations with visual design, musical composition, texts, film, and video will be explored, as well as participation in production elements. **Prerequisites:** audition and department stamp.

### **TDPR—THEATRE/DANCE PRACTICUM**

#### **TDPR 1. Practicum—Scenery (4–6)**

A production performance oriented course that introduces fundamentals of scenery construction and its theatrical operation. Laboratory format allows students to work through the scenery production process culminating in a crew assignment for a fully mounted theatrical production. **Prerequisite:** department stamp required.

#### **TDPR 2. Practicum—Costume (4–6)**

A production performance oriented course that introduces fundamentals of costume construction and its integration into theatre operations. Laboratory format allows students to work through the costume production process culminating in a crew assignment for a fully mounted theatrical performance. **Prerequisite:** department stamp required.

#### **TDPR 3. Practicum—Lighting (4–6)**

A production performance oriented course that introduces fundamentals of stage lighting or sound and its technical operation. Laboratory format allows a student to work through the lighting or sound production process culminating in a crew assignment for a fully mounted theatrical production. **Prerequisite:** department stamp.

#### **TDPR 5. Practicum—Sound (4–6)**

A production performance-oriented course that introduces fundamentals of theatre sound and its technical operation. Laboratory format allows a student to work through the sound production process culminating in a crew assignment for a fully mounted theatrical production. **Prerequisite:** department stamp.

#### **TDPR 102. Advanced Theatre Practicum (4–6)**

A production performance-oriented course that continues the development of costume, lighting, scenery, or sound production and introduces greater responsibilities in the laboratory format. Students serve as crew heads on major departmental productions or creative projects. **Prerequisites:** THPR or TDPR 1, 2, 3, or 5; permission of instructor; department stamp required. May be taken for credit two times.

#### **TDPR 104. Advanced Practicum in Stage Management (4–6)**

A production performance oriented course that continues the development of stage management skills and introduces greater responsibilities in the laboratory format. Students serve as either assistant stage managers on mainstage productions or stage managers on studio projects. **Prerequisites:** THDR or TDDR 101 and consent of instructor. May be taken two times for credit.

### **TDPW—THEATRE PLAYWRITING**

#### **TDPW 1. Introduction to Playwriting (4)**

Beginning workshop in the fundamentals of playwriting. Students discuss material from a workbook that elucidates the basic principles of playwriting, do exercises designed to help them put those principles into creative practice, and are guided through the various stages of the playwriting process that culminate with in-class readings of the short plays they have completed. **Prerequisite:** none.

#### **TDPW 101. Playwriting Workshop (4)**

A workshop where students present their plays at various stages of development for group analysis and discussion. Students write a thirty-minute play that culminates in a reading. Also includes writing exercises designed to stimulate imagination and develop writing techniques. **Prerequisite:** THPW or TDPW 1 or consent of instructor. May be taken two times for credit.

#### **TDPW 102. Playwriting Workshop II (4)**

Advanced workshop where students study the full-length play structure and begin work on a long play. Students present their work at various stages of development for group discussion and analysis. **Prerequisite:** THPW or TDPW 101 or consent of the instructor. May be taken for credit two times.

#### **TDPW 104. Screenwriting (4)**

Basic principles of screenwriting using scenario composition, plot points, character study, story conflict, with emphasis on visual action and strong dramatic movement. **Prerequisite:** THPW or TDPW 1. May be taken twice for credit.

#### **TDPW 105. Writing for Television: Situation Comedy (4)**

Basic principles of writing comedy for television. Course incorporates study of sample episodes. Analysis focuses on structure and character development. **Prerequisite:** THPW or TDPW 1. May be taken twice for credit.

#### **TDPW 106. Writing for Television: Hour-Long Drama (4)**

Basic principles of writing in the hour-long format for television. Course incorporates study of sample programs. Analysis of structure and character development. Students create concepts, structure, pitch, and write treatments and partial script. **Prerequisite:** THPW or TDPW 1. May be taken twice for credit.

#### **TDPW 108. Topics (4)**

Topics in playwriting, such as documentary theatre, adaptation and modernization, writing for media, for students who possess basic knowledge of playwriting. Admission by interview with instructor. **Prerequisites:** THPW or TDPW 1 and department stamp.

### **TDPW 190. Major Project in Playwriting/Screenwriting (4)**

For the advanced student in playwriting/screenwriting. This intensive concentration in the study of playwriting and/or screenwriting will culminate in the creation of a substantial length play. A maximum of eight units of major project study, regardless of area (design, directing, stage management, playwriting) may be used to fulfill major requirements. Applicants must have completed the playwriting sequence, THPW or TDPW 1, 101, and/or consent of instructor. See department for application form. **Prerequisite:** THPW or TDPW 1 and THPW or TDPW 101.

## **TDTR—DANCE THEORY**

### **TDTR 10. Introduction to Dance (4)**

An overview of dance, examining its social and cultural history and its evolution as an art form. Focus is on dance and its many genres as an expressive medium and form of communication. **Prerequisite:** none.

### **TDTR 101. Dance Movement Analysis (4)**

An overview and analysis of movement theory systems that offer approaches to improve movement quality, prevent injuries, aid in rehabilitation, develop mental focus and kinesthetic control, establish a positive body language, and develop vocabulary for creative research. **Prerequisite:** TDTR 10.

### **TDTR 102. Movement Research (4)**

Students will study images of anatomical alignment and use their bodies to translate those images into physical action. They will expand their movement potential, deepen their awareness of body language and alignment and develop their dance coordination and technique. **Prerequisites:** TDTR 10, TDTR 101, or THDA 101B-C or THDA 110A-B-C, or consent of instructor; department stamp.

### **TDTR 103. Dance and Technology (4)**

This course introduces the theoretical and practical understanding of both available and developing computer-assisted media for the design and production of choreography. **Prerequisites:** TDTR 10, TDCH 40; or consent of instructor.

### **TDTR 104. Dance Theory and Pedagogy (4)**

The study of the theoretical aspects of dance education, including an analysis of movement concepts for all ages. Development of basic technique training in all forms, curriculum planning, social awareness, and problem solving. Fundamental elements of cognitive and kinetic learning skills. **Prerequisites:** TDTR 10, TDMV 110, 120, 130 or THDA 101A-B-C, or THDA 110A-B-C, or THDA 120A-B-C; consent of instructor, department stamp.

### **TDTR 195. Instructional Assistance (2–4)**

Assist with instruction in undergraduate dance courses. Full description of duties will appear on the Application for Instructional Assistance. **Prerequisite:** upper-division standing, 3.0 GPA, etc. (per CEP guidelines).

### **TDTR 197. Field Studies in Dance (1–12)**

Designed for advanced students, this course significantly extends their knowledge of the theatre and dance through intensive participation in the creative work of a major professional theatre or dance company, under the guidance of artists resident in those theatres or companies. Students will submit regular written evaluations each week of their ongoing field study. **Prerequisites:** upper-division standing and consent of instructor required, 3.0 overall GPA, 90 units completed.

## **TDGR—THEATRE GRADUATE**

### **TDGR 200. Dynamics (1)**

A daily program of physical, vocal, and speech exercises designed to prepare the student to move in a focused way into specific class areas with minimum amount of warm-up time. The exercises work on development of flexibility, strength, and coordination throughout the body. Strong emphasis is placed on physical and mental centering within a structured and disciplined approach to preparation. **Prerequisite:** admission to the M.F.A. Theatre program.

### **TDGR 201. Stage Combat (2)**

A study of the dramatic elements of stage violence, and practical work in developing the physical skills necessary to fully realize violent moments on the stage. At the core of the study is the process from text to convincing theatrical action. Physical work revolves around basic principles of energy, focus, and center inherent in unarmed and weapons combat. **Prerequisite:** admission to the M.F.A. Theatre program.

### **TDGR 202. Joint Stock (3)**

The process of collaborative creation from idea to performance. **Prerequisite:** admission to the M.F.A. program or consent of instructor.

### **TDGR 203. Seminar and Supervision for ArtsBridge Scholars (1)**

A workshop to address the specific pedagogical requirements and techniques to be employed by students as ArtsBridge (outreach) Scholars and Mentors of ArtsBridge Scholars. Instructor will mentor the students on-site as well as in seminars. **Prerequisites:** graduate standing and consent of instructor.

### **TDGR 204A. Text Analysis (4)**

Topics to be covered will include (1) concept of poetic language; lexical and syntactic analysis of dialogue; (2) the semantic context of dialogue; (3) thematic structure, from motive to themes; (4) the concept of dramatic character or hero; (5) dramatic narrative; (6) the material of drama; the relationship of myth and ritual to drama; (7) analysis versus interpretation; (8) practical applications. **Prerequisite:** admission to the M.F.A. Theatre program.

### **TDGR 204B. Contemporary Theories of Theatre (4)**

An investigation of contemporary theories of theatre with an emphasis on structural and poststructural perspectives on text and textuality. The seminar will focus on adapting contemporary techniques of close reading to the interpretive and creative process in the theatre. **Prerequisites:** TDGR 204A; admission to M.F.A. Theatre program or consent of instructor.

### **TDGR 204C. Collective Creation (4)**

The culmination of the TDGR 204 sequence, in which students in all disciplines create and perform publicly presented original theatre pieces. **Prerequisites:** TDGR 204B; admission to M.F.A. Theatre program or consent of instructor.

### **TDGR 205. Improvisation for the Theatre (3)**

A course designed to introduce improvisational techniques to professional acting students. A variety of approaches to the art of improvisation will be presented and practiced, both serious and comic. Small and large group improvisations will be offered. **Prerequisite:** admission to the M.F.A. program or consent of instructor.

### **TDGR 206. Faculty Directed Production (4)**

Faculty directed production, from the rehearsal process through public performance. All participants will enroll in the same section, the number of units depending upon degree of involvement. **Prerequisite:** admission to the M.F.A. Theatre program.

### **TDGR 207. Production (4)**

The collaborative process from the rehearsal process through public performance. All participants will enroll in the same section, the same number of units. **Prerequisite:** admission to the M.F.A. Theatre program.

### **TDGR 209. Commedia and Comic Techniques (3)**

A course designed to provide actors with tools, both physical and verbal, to play comedy. Included will be commedia dell'arte techniques, clown work, masks, circus techniques, mime, and scene work from comic scripts. **Prerequisite:** admission to the M.F.A. Theatre program.

### **TDGR 210A. Process I—Part I (4)**

The actors focus on the nature of the acting process, using various exercises to stimulate imagination and to inspire instinctual choices. Later work includes improvisational and imaginative experiences to explore character and text. The class culminates in intensive scene work chosen for the particular actor to meld the improvisational approach with scripted material. The class is a combination of both actors and directors so that a common language is developed.

**Prerequisite:** admission to the M.F.A. program or consent of instructor.

### **TDGR 210B. Process I—Part II (4)**

Intensive studio examination of realistic texts using improvisational and imaginative techniques to realistically based texts commonly from American theatre. Second course in a three course sequence. **Prerequisites:** TDGR 210A and admission to the M.F.A. program or consent of instructor.

### **TDGR 210C. Process I—Part III (4)**

The intensive study of the dramatic and fictional work of Anton Chekhov and an actor's approach to that work. This course includes many of the techniques begun in earlier classes and applies them to this material. Also included is a study of Chekhov's short stories and plays, and involves adapting and staging these works. Third course of a three course sequence. **Prerequisites:** TDGR 210B and admission to the M.F.A. program or consent of instructor.

### **TDGR 211 Choreography Seminar (4)**

The study and practice of aesthetic concepts, history, and methodology for choreographic creation of dance theatre; and expanding the choreographers' ability to establish innovative creative processes with performers and craft their material, both independently and in conjunction with other theatrical and technological elements. **Prerequisite:** admission to the M.F.A. Theatre program or consent of instructor.

### **TDGR 211A. Speech for the Actor (2–4)**

Introduction of the principles of phonetics and articulation. Constant study and drill to prepare the actor for standard speech and flexibility. **Prerequisite:** admission to the M.F.A. Theatre program or consent of instructor.

### **TDGR 211B. Speech for the Actor (2–4)**

Continued introduction of the principle of phonetics and articulation. Constant study and drill to prepare the actor for standard speech and flexibility. Second course in a three-course series. **Prerequisites:** TDGR 211A and admission to the M.F.A. program or consent of instructor.

### **TDGR 211C. Speech for the Actor (2–4)**

Continued introduction of the principle of phonetics and articulation. Constant study and drill to prepare the actor for standard speech and flexibility. Third course in a three-course series. **Prerequisites:** TDGR 211B and admission to the M.F.A. program or consent of instructor.

### **TDGR 212. Acting Practicum (2)**

One-on-one laboratory workshop that examines practical applications of accents, speech and voice work, dialect, movement and combat work specific and ancillary to the productions in which the students have been cast. **Prerequisite:** admission to the M.F.A. Theatre program.

### **TDGR 213. Dance Theatre Topics Seminar (2)**

A topics seminar in current dance theatre history, issues and research, with varying content by faculty. **Prerequisite:** admission to the M.F.A. program or consent of instructor.

### **TDGR 213A-B-C. Movement for Theatre I (2-2-2)**

An intensive studio course in the art of movement as a basis for theatre performance. Theory and practice of energy flow, weight, spatial focus, time consumption, and the shape factor. (S/U grades only.) **Prerequisites:** THGR or TDGR 213A for B, THGR or TDGR 213B for C; admission to the M.F.A. Theatre program.

### **TDGR 214. Dance Theatre Topics: Collaborative Processes (2)**

This seminar examines the nature of collaborative creative processes and artistic relationships between choreographers and other primary artists in the creation of interdisciplinary dance theatre, from the initial concepts, themes, and inspiration through the research, rehearsal and final presentation. **Prerequisite:** admission to the M.F.A. program or consent of instructor.

### **TDGR 214A. Voice for Theatre I—Part I (3)**

Voice exercises designed to "free the voice" with emphasis on diaphragmatic breathing, articulation exercises, and singing exercises. Course designed to broaden pitch, range, projection, and to expand the full range of potential characterizations. **Prerequisites:** admission to the M.F.A. program or consent of instructor.

**TDGR 214B. Voice for Theatre II—Part I (3)**

Voice exercises designed to “free the voice” with emphasis on diaphragmatic breathing, articulation exercises, and singing exercises. Course designed to broaden pitch, range, projection, and to expand the full range of potential characterizations. Second course in a three-course sequence. **Prerequisites:** TDGR 214A and admission to the M.F.A. program or consent of instructor.

**TDGR 214C. Voice for Theatre I—Part III (3)**

Voice exercises designed to “free the voice” with emphasis on diaphragmatic breathing, articulation exercises, and singing exercises. Course designed to broaden pitch, range, projection, and to expand the full range of potential characterizations. Third course in a three course series. **Prerequisites:** TDGR 214B and admission to the M.F.A. Theatre program or consent of instructor.

**TDGR 215. Dance Theatre Seminar (2)**

This seminar focuses on the aesthetic concepts that form the foundation for the creation, performance, research, and critical analysis of dance theatre. Students will discuss critical theory in related arts and develop individualized projects that advance their creative and intellectual goals. **Prerequisite:** admission to the M.F.A. Theatre program or consent of the instructor.

**TDGR 216. Principles of Curriculum Theory (2)**

This comprehensive seminar provides an assessment of the field of curriculum theory as preparation for teaching general dance education courses. Conceptual thinking, problem solving, current publications, methods of inquiry, assessment, and a range of practical teaching issues will be discussed. **Prerequisite:** admission to the M.F.A. Theatre program or consent of instructor.

**TDGR 217. New Media and Technology (2)**

This seminar explores the interaction of new media and technologies for collaboration, research, and creation in performance. Students will pursue diverse and innovative research in technology as a medium for new forms of expression in dance theatre. **Prerequisite:** admission to the M.F.A. Theatre program or consent of instructor.

**TDGR 218. Dance Theatre: Professional Practice (2)**

This seminar focuses on the skills and tools needed for the professional practice of self-production in performance. Areas introduced include grant writing, press kits, media relations, marketing, Web sites, documentation, budgets, artistic management, and nonprofit organization administration. **Prerequisite:** admission to the M.F.A. Theatre program or consent of instructor.

**TDGR 219. Directing Process Studio (4)**

Preparation, presentation, and discussion of representative scenes from various periods of dramatic literature. **Prerequisite:** admission to the M.F.A. Theatre program or consent of instructor.

**TDGR 220. Advanced Contemporary Dance (2)**

Designed for graduates with advanced training in contemporary modern dance and intermediate to advanced training in ballet. Emphasis is on increasing composition and performance skills in ballet through contemporary modern dance aesthetics. **Prerequisite:** admission to the M.F.A. Theatre program or consent of instructor.

**TDGR 220A. Process II: Classical Text I (4)**

An intensive studio examination of problems and potentials associated with the theatrical realization of the classical text. **Prerequisite:** admission to the M.F.A. Theatre program or consent of instructor.

**TDGR 220B. Process II: Classical Text II (4)**

An intensive studio examination of problems and potentials associated with the theatrical realization of the classical text. This course is a continuation of TDGR 220A. **Prerequisites:** TDGR 220A and admission to the M.F.A. Theatre program or consent of instructor.

**TDGR 220C. Process II: Classical Text III (4)**

An intensive studio examination of problems and potentials associated with the theatrical realization of the classical text. This course is a continuation of TDGR 220B. **Prerequisites:** TDGR 220B and admission to the M.F.A. Theatre program or consent of instructor.

**TDGR 221. Graduate Studio: Contemporary Movement Practices (2)**

Designed for development of a movement practice in various modalities including contemporary dance, yoga, Pilates, and Alexander. Emphasis on advanced technical skills, expressive style, and performance elements. Aesthetic concepts will be explored. Incorporates applied physiological principles of human movement. **Prerequisite:** admission to the M.F.A. Theatre program or consent of instructor.

**TDGR 221A–B. Speech for the Actor II (3-3)**

Advanced work in phonetics and articulation. Intensive study of stage dialects to prepare actor for variety of roles. **Prerequisites:** graduate standing; THGR or TDGR 221A **Prerequisite:** THGR or TDGR 221B; admission to the M.F.A. Theatre program.

**TDGR 222. Topics in World Dance (2)**

Course designed for study of specific world dances. Historical and contemporary context of a particular culture or ethnic form: Afro-Cuban, West African, Asian, Spanish, Balinese, Japanese, Latin, American jazz, hip-hop, etc. Specific topic will vary from quarter to quarter. **Prerequisite:** admission to the M.F.A. Theatre program or consent of instructor.

**TDGR 222A–B–C. Theatre Production II (1–4)**

Range from staged reading of new plays, documentary drama, or synthetically created dramatic text to totally integrated production of full-length plays (faculty or student directed), and incorporating the creative contribution of actors, directors, playwrights, and critics, this intensive involvement of multiple forms of theatre will serve as the necessary creative laboratory for the M.F.A. program. **Prerequisite:** admission to the M.F.A. Theatre program or consent of instructor.

**TDGR 223. Improvisation Ensemble (2)**

A course for dance theatre practitioners to exchange ideas, work with scores, text, expository writing, contact improvisation, in a supportive and focused environment. Students will participate as group leaders allowing participants to explore new areas of their artistic practice. **Prerequisite:** admission to the M.F.A. program or consent of instructor.

**TDGR 223A–B. Movement for Theatre II (3-3)**

An advanced course in the art of movement for the theatre, building on the knowledge gained in Theatre 213. (S/U grades only.) **Prerequisites:** THGR or TDGR 223A for B; admission to the M.F.A. Theatre program.

**TDGR 224A–B. Voice for Theatre II (3-3)**

Advanced voice training designed to help the actor fuse voice, emotion, and body into a fully realized reflection of the text. (S/U grades only.) **Prerequisites:** THGR or TDGR 224A for B; admission to the M.F.A. Theatre program.

**TDGR 225A–B. Singing for the Actor II (1-1)**

Continuing vocal technique for the musical theatre. More complicated musical material investigated and prepared. **Prerequisite:** admission to the M.F.A. Theatre program.

**TDGR 227. Directing Assistantship (6–12)**

Assisting faculty with productions off-campus. Perform research necessary for project. Assist with casting. Participate in design meetings. Observe and participate in rehearsal. Direct, if delegated to do so. **Prerequisite:** admission to the M.F.A. Theatre program.

**TDGR 228. Designing Assistantship (6–12)**

Assisting faculty with productions off-campus. To draft some or all of the project design. To perform research, either visual, historical or technical. To create and maintain all production plans and paperwork records from pre-production through opening night. To organize the staff for focus and work calls. **Prerequisite:** admission to the M.F.A. Theatre program.

**TDGR 229. Theatre Externship (6–12)**

Selected professional opportunities in repertory and commercial theatre, designed to engage the student in particular creative responsibilities under the guidance of master artist-teachers. Student is expected to give biweekly reports detailing his/her experience with the professional company. **Prerequisite:** admission to the M.F.A. Theatre program, or consent of instructor.

**TDGR 230. Acting Process III: Actors' Studio (4)**

An advanced studio for graduate actors and directors, this work will explore a single text from the modern theatre under the direction of a master teacher-artist. Concentration will be on multiple possible modes of encountering a text, varieties of interpretation and performance realization, and the development of a theatre ensemble. **Prerequisite:** admission to the M.F.A. Theatre program.

**TDGR 231A. Professional Preparation for the Actor (4)**

A twice-weekly seminar focusing on the actor's confrontation with the industry, including in-depth preparation for auditions; cold readings; and meetings/interviews with producers, casting directors, agents, and managers. Actors will also begin to create material that could be crafted into solo performances. **Prerequisite:** admission to M.F.A. Theatre program or consent of instructor.

**TDGR 233. Acting for the Camera (1)**

This course is designed to aid the actor in the transition from stage to film work. Examination of film production and its physical characteristics and the acting style needed for work in film and television. Students will rehearse and perform in simulated studio setting. **Prerequisite:** admission to the M.F.A. Theatre program.

**TDGR 235. Singing for the Actor III (1)**

Continuing vocal technique for the musical theatre. More complicated musical material investigated and prepared. **Prerequisite:** admission to the M.F.A. Theatre program.

**TDGR 239. Skills (4)**

A unifying approach to acting skills (voice, movement, and speech) designed to result in providing the graduating actor with a daily regimen appropriate for professional work. **Prerequisite:** admission to the M.F.A. Theatre program.

**TDGR 240. Directing Seminar (1–6)**

A seminar focusing on the current directing projects of all graduate directing students. Depending upon individual student needs, the work may include play selection, historical or sociological research, and discussion of emerging directorial concepts, the rehearsal process, and post-production evaluation. **Prerequisite:** admission to the M.F.A. Theatre program.

**TDGR 242. Director Designer Collaboration Seminar (4)**

A seminar focusing on the creative application of design solutions to problems presented by specific texts, and how they function in directorial and design production concepts. **Prerequisite:** admission to M.F.A. Theatre program or consent of instructor.

**TDGR 243. Director/Playwright/Choreographer Lab (4)**

Collaborative process between directing and playwrighting students providing a focused exploration of a broad range of directing and writing methodologies. Students work in teams to develop and create pieces based on the methodology of guest directors. **Prerequisite:** admission to M.F.A. Theatre program or consent of instructor.

**TDGR 244. New Plays Workshop (2)**

A course where playwrights and actors work together to develop new plays-in-progress. **Prerequisite:** admission to the M.F.A. Theatre program or consent of instructor.

**TDGR 245. Directing Practicum (4)**

Students enrolled in this course will work on productions in the function of a director. This will include staging, creative interpretation, blocking, etc. **Prerequisite:** admission to the M.F.A. Theatre program.

**TDGR 249A. Music Theatre Workshop (4)**

A workshop in which students from music and theatre departments study examples of various forms of music theatre and collaboratively develop creative projects that are presented at the end of the two-quarter sequence. **Prerequisite:** admission to M.F.A. Theatre program or consent of instructor.

**TDGR 249B. Music Theatre Workshop (4)**

Continuation of workshop in which students from music and theatre departments study examples of various forms of music theatre and collaboratively develop creative

projects that are presented at the end of the two-quarter sequence. **Prerequisite:** admission to M.F.A. Theatre program or consent of instructor.

#### **TDGR 250. Playwriting Seminar (4)**

A seminar focusing on the current playwriting project of all graduate playwriting students. Work for each quarter is individually determined according to student needs, but may include exploration of an inception idea, development of a scenario or other structural work, and writing dialogue. Students present work to be discussed in class. May include group or individual playwriting exercises. **Prerequisite:** admission to the M.F.A. Theatre program.

#### **TDGR 251. Playwriting Practicum (2)**

Creative writing project developing original scripts from outline to the final play. Plays may vary depending on the quarter, but will include writing of a realistic one-act, a nonrealistic one-act, a one-act documentary or dramatization of fiction, a full-length play. **Prerequisite:** admission to the M.F.A. Theatre program.

#### **TDGR 252. Dramaturgy Seminar (4)**

The seminar will deal with all dramaturgical issues pertaining to departmental productions: production research, textual and analysis, translation, adaptation, rehearsal process, and critique. Concurrently with the dramaturgy issues of the given year, the seminar will discuss possible choices of plays for future production seasons. **Prerequisite:** admission to the M.F.A. Theatre program.

#### **TDGR 253. Dramaturgy Practicum (1-6)**

Students enrolled in this course will work on productions in the function of a dramaturg. This will entail preparation of texts, research, participation at rehearsals, etc. **Prerequisite:** admission to the M.F.A. Theatre program.

#### **TDGR 254. Television Writing (4)**

A one-quarter course covering the hourlong format (five weeks) and situation comedies (five weeks). Includes study and discussion of television script format and structure. Students will create the concept and structure for spec scripts in each genre. **Prerequisite:** admission to M.F.A. Theatre program or consent of instructor.

#### **TDGR 256. Contemporary Plays (1-4)**

A guided reading course focusing exclusively on very recent plays in an attempt to become aware of what is being written now. Course may be repeated for credit. **Prerequisite:** admission to the M.F.A. Theatre program.

#### **TDGR 257A-B. Screenwriting (4-4)**

Students will develop the concept for an original piece for television or film and will write the screenplay. Student work will be discussed in seminar at each phase of the development. **Prerequisites:** admission to the M.F.A. Theatre program and THGR or TDGR 250.

#### **TDGR 258A-B. Dramatization and Adaptation (4-4)**

Seminar will deal with dramatization and adaptation of literary texts for the purpose of theatrical production. The class will study some significant examples of such practice from the past, and subsequently, students will develop their own projects of dramatization, adaptation, or modernization of texts. **Prerequisite:** admission to the M.F.A. Theatre program.

#### **TDGR 260. New-Play Festival (4)**

The collaborative process of new-play development through readings, rehearsals, and public performance. M.F.A. actors, designers, directors, playwrights, and stage managers enroll in one section and collaborate in creating the annual festival of full-length and one-act plays. **Prerequisite:** admission to M.F.A. Theatre program or consent of instructor.

#### **TDGR 262. Crossing Boundaries: Design Improvisations (4)**

Conceiving interactive designs. A project/performance-based course, concentrating on the conception of designs adaptable to improvisatory contexts, in which technological strategies such as real-time processing and control of sound and light are encouraged and discussed. **Prerequisite:** admission to M.F.A. Theatre program or consent of instructor.

#### **TDGR 267. Automated Lighting (4-6)**

Introduces the design student to the technology, control, and creative use of automated lighting in the entertainment lighting field. The class involves substantial independent research. Students create both theoretical and realized design projects. **Prerequisite:** admission to M.F.A. Theatre program or consent of instructor.

#### **TDGR 268. Storyboarding (4)**

Course will cover multiple applications of storyboarding as a tool of communication and expression; comic books, theatre, opera, film, TV, and commercial applications will be explored. Individual and team assignments will be given to develop the basic vocabulary and techniques. **Prerequisite:** admission to M.F.A. Theatre program or consent of instructor.

#### **TDGR 269A. Photoshop I (4)**

Course will introduce the basic functions and applications of Photoshop as they may be applied to theatrical design. Emphasis on using Photoshop as an artistic tool. **Prerequisite:** admission to M.F.A. Theatre program or consent of instructor.

#### **TDGR 269B. Photoshop II (4)**

Advanced Photoshop techniques will be explored and applied to the creation of multimedia projects. **Prerequisite:** admission to M.F.A. Theatre program or consent of instructor.

#### **TDGR 270A. Design Studio I (4)**

This course will focus on beginning-level problems in theatre design, including text analysis, research, conceptualization, and visual expression. Students will work on individual projects in lighting, costume, and scenic design. The course will include group critiques of completed designs and works in progress. 270A, Scenic Design (fall); 270B, Costume Design (winter); 270C, Lighting Design (spring). **Prerequisite:** admission to the M.F.A. Theatre program.

#### **TDGR 270B. Design Studio I: Costume Design (4)**

This course will focus on beginning-level problems in theatre design, including text analysis, research, conceptualization, and visual expression. Students will work on individual projects in lighting, costume, and scenic design. The course will include group critiques of completed design and works in progress. 270A, Scenic Design (fall); 270B, Costume Design (winter); 270C, Lighting Design (spring). **Prerequisites:** THGR 270A, graduate standing, consent of instructor.

#### **TDGR 270C. Design Studio I: Lighting Design (4)**

This course will focus on beginning-level problems in theatre design, including text analysis, research, conceptualization, and visual expression. Students will work on individual projects in lighting, costume, and scenic design. The course will include group critiques of completed design and works in progress. 270A, Scenic Design (fall); 270B, Costume Design (winter); 270C, Lighting Design (spring). **Prerequisites:** THGR 270A or TDGR 270A, THGR 270B or TDGR 270B, graduate standing, and consent of instructor.

#### **TDGR 270D. Design Studio I: Sound Design (4)**

This course will focus on beginning-level problems in theatre design, including text analysis, research, conceptualization, and visual/auditory expression. Students will work on individual projects in sound, lighting, costume, and scenic design. This course will include group critiques of completed design and works in progress. 270A, Scenic Design (fall); 270B, Costume Design (winter); 270C, Lighting Design (spring). **Prerequisites:** THGR 270A, THGR 270B, graduate standing, consent of instructor.

#### **TDGR 271. Design Seminar (2)**

A seminar focusing on all aspects of the design profession, including current projects of graduate design students. The work may also include portfolio presentations, research presentations, and guest lectures. **Prerequisite:** admission to the M.F.A. Theatre program.

#### **TDGR 272. Master Class in Design (1-4)**

Special topics in design taught in an intensive workshop format by professionals in the respective fields of study. Topics could include, but are not limited to, sound design techniques, new development in set design, AutoCAD. **Prerequisite:** admission to the M.F.A. Theatre program.

#### **TDGR 273. Fashioning the Body (4)**

A survey/history of artistic and cultural stylistic change as embodied in clothing from early Western civilization to the contemporary period. **Prerequisite:** admission to the M.F.A. Theatre program.

#### **TDGR 274. Advanced Scenic Design (4)**

This course explores advanced problems in scenic design through development and critique of creative class projects and production works-in-progress. **Prerequisite:** admission to the M.F.A. Theatre program.

#### **TDGR 275. Advanced Lighting Design (4)**

Creative projects and topics in lighting design to develop the student's techniques and professional practices. Work to include studies in design research, concepts, psychophysical considerations, collaboration, professional procedures and systems, paperwork, and organization. Various scales of production projects will be addressed by the student for presentation and critique, and may be theoretical or productions in the departmental calendar. **Prerequisites:** second- or third-year design students only; admission to the M.F.A. Theatre program.

#### **TDGR 276. Advanced Costume Design (4)**

Projects in costume design, emphasizing script analysis, research, conceptualization, and visual expression. Studio work includes costume rendering in various media for specific plays. **Prerequisite:** admission to the M.F.A. Theatre program.

#### **TDGR 278. Special Topics in Theatre Design (1-6)**

A course designed to expose the theatre design student to a variety of specialized topics, including millinery, pattern drafting and draping, scenic painting, model making, figure drawing, drafting, fitting, rendering. Topics will vary from quarter to quarter. **Prerequisite:** admission to the M.F.A. Theatre program.

#### **TDGR 279. Design Practicum (4)**

This course covers the artistic, aesthetic, and practical aspects of the designers' work as they develop and execute the design toward a fully realized production. **Prerequisite:** admission to the M.F.A. Theatre program.

#### **TDGR 280A. Stage Management 1 (4)**

Discussion and research into the duties, responsibilities, and roles of a stage manager. Work to include studies in script analysis, communication, conflict resolution, rehearsal procedures, performance skills, style, and conceptual approach to stage management. **Prerequisite:** admission to M.F.A. Theatre program or consent of instructor.

#### **TDGR 280B. Stage Management 2 (4)**

The second of the three-part introductory stage management series, this course further explores the stage manager's process, focusing on the technical rehearsal period through the opening of a production. **Prerequisites:** TDGR 280A; admission to M.F.A. Theatre program or consent of instructor.

#### **TDGR 280C. Stage Management 3 (4)**

The final course in the three-part introductory stage management series focuses on the stage manager's role once a production has opened. The course will also address topics such as new plays, touring, dance, multimedia productions, and music. **Prerequisites:** TDGR 280A and TDGR 280B; admission to M.F.A. Theatre program or consent of instructor.

#### **TDGR 282. Advanced Sound Design (4)**

Creative projects to develop student's techniques and professional practices. Studies include research, concepts, collaboration, professional procedures, systems and organization. Various scales of projects will be addressed for presentation and critique; may be theoretical or productions in the Department calendar. **Prerequisite:** admission to the M.F.A. program or consent of instructor.

#### **TDGR 286. Special Topics in Stage Management (1-6)**

A course for M.F.A. students in stage management. Topics will focus on various aspects of theatre administration, and advanced stage management, including nonprofit theatre, commercial theatre, advanced problems, venues, musicals/dance, production management, theatre development, business problems, and theatre marketing. **Prerequisite:** admission to the M.F.A. Theatre program.

**TDGR 288. Stage Management Seminar (4)**

A weekly seminar in which all graduate stage managers participate. Includes discussions of problems encountered on current productions, paperwork, methodology, and production approaches. **Prerequisite:** admission to the M.F.A. Theatre program.

**TDGR 289. Introduction to Doctoral Studies (4)**

Seminar acquaints doctoral students of all levels with research methods, theoretical models, publishing protocol, professional preparation, and pedagogical approaches particular to theatre and performance studies. Course assignments are tailored to students' scholarly interests and progress toward degree. **Prerequisite:** admission to Ph.D. program in theatre or consent of instructor.

**TDGR 290. Dramatic Literature and Theatre History Prior to 1900 (4)**

Selected material from following topics: Classical Drama, Asian Drama, Medieval and Early Modern Drama, Shakespeare, European Drama 1600–1900. May be taken eight times as content varies. **Prerequisite:** admission to Ph.D. program in Theatre.

**TDGR 291. Dramatic Literature and Theatre History 1900 to the Present (4)**

Selected material from following topics: European Theatre 1900–Present, American Theatre 1900–Present, Contemporary Theatre and Performance. May be taken eight times as content varies. **Prerequisite:** admission to Ph.D. program in Theatre.

**TDGR 292. Cultural and Critical Theory (4)**

Selected material from following topics: Performance Theory, Dramatic Theory, Critical Theory, Cultural Studies. May be taken eight times as content varies. **Prerequisite:** admission to Ph.D. program in Theatre.

**TDGR 293. Directed Studies (4–12)**

Individual or small group directed study.

**TDGR 294. Dissertation Research (4–12)**

Research and preparation of doctoral dissertation.

**TDGR 295. Acting Practicum (2)**

This course covers the artistic, aesthetic, and practical aspects of the actors' work as they develop and execute the character/role toward a fully realized production. **Prerequisite:** admission to the M.F.A. Theatre program.

**TDGR 296. Stage Management Practicum (4)**

Taken each term by all graduate stage management students. The class focuses on the development of knowledge and skills necessary for the contemporary stage manager. Seminar format is augmented by lab work that may include departmental productions. **Prerequisite:** admission to the M.F.A. Theatre program.

**TDGR 297. Thesis Research (2–12)**

Thesis research for M.F.A. degree. (S/U grades only.) **Prerequisite:** admission to the M.F.A. Theatre program.

**TDGR 298. Special Projects (0–4)**

Advanced seminar and research projects in theatre. (S/U grades only.) **Prerequisite:** admission to the M.F.A. Theatre program.

**TDGR 299. Thesis Project (2–12)**

Specific projects in theatre individually determined to meet the developing needs, interests, and abilities of M.F.A. candidates. (S/U grades only.) **Prerequisite:** admission to the M.F.A. Theatre program.

**TDGR 500. Introduction to Apprentice Teaching (4)**

This course, designed to meet the needs of the graduate students who serve as teaching assistants, includes analysis of texts and materials, discussion of teaching techniques, conducting discussion sections, formulation of topics and questions for papers, and examinations and grading. 2 units = 25% TAship. 4 units = 50% TAship. **Prerequisites:** graduate standing and consent of the instructor.

**TDGR 501. Teaching—Non-Departmental (4)**

Consideration of pedagogical applications in the teaching of literacy, historical and philosophical text at the undergraduate level. Pedagogical aids for the teaching of composition and supervised teaching in sections of undergraduate courses such as the Revelle Humanities sequence

and in the CAT programs of Sixth College. **Prerequisite:** admission to the M.F.A. Theatre program.

<http://tws.ucsd.edu>

The Third World Studies Program has three main objectives:

1. To provide an understanding of the Third World and its relationships to the West. In order to understand these relationships, it is necessary to study the historical context out of which the present relationships developed. For example, besides trying to understand what kind of society existed in Meso-America when the Spaniards arrived in 1520, the student must also have an understanding of the historical development in Europe which resulted in Spain's decision to seek wider trade abroad. There is insistence on both the similarities and differences which Third World societies have among themselves and the similarities and differences with Western societies.
2. To provide an interdisciplinary approach to the study of the Third World. The program is not conceived as being exclusively historically oriented nor as being predominantly a social science program, but rather one that integrates both the social sciences and the humanities.
3. To provide an understanding of the shifting economic and political nature of the countries designated as belonging to the "Third World," especially in light of the dramatic political and economic changes worldwide in the late 1980s and 1990s. To this end, our Third World studies courses will, where appropriate, address and contextualize the history of the term "Third World" and its current applications in scholarship and the broader international media.

## THE MAJOR PROGRAM

Students interested in Third World studies may focus on a theme, problem, or geohistorical area. A Third World studies program of study must be interdisciplinary. Students must choose course offerings from at least three disciplines (anthropology, economics, history, literature, political science, sociology, etc.).

A Third World studies major requires a minimum of *twelve* upper-division courses plus three lower-division courses from the Third World studies sequence (TWS 21, 22, 23, 24, 25, or 26). Students at Eleanor Roosevelt College may substitute up to two courses, Making of the Modern World 4 and 5, for two of the three-course lower-division sequence, but must take at least one course in the TWS 21–26 sequence. Selection of a specific concentration, discipline, or department should be determined in consultation with a Third World studies faculty member or program advisor.

Students majoring and minoring in Third World studies are encouraged to experience their areas first-hand by studying abroad in any number of ways. Most convenient, depending on the area, is the University of California's Education Abroad Program, whereby students can gain UC credit for study at foreign universities. This is especially convenient for students who cannot find sufficient courses at UC San Diego pertaining to such regions as the Caribbean and the Indian subcontinent. Moreover, Latin America, Asia, and Africa course work is available in these regions through the Education Abroad Program and various programs available through other U.S. universities.

## DOUBLE MAJOR

Students interested in Third World studies as a double major must have at least ten upper-division courses that are unique to each departmental major. The courses required for Third World studies may cover one or more disciplines. Courses may focus on a theme or problem or on a geo-historical area. The remaining two courses may overlap with the other major requirements. Approval from both departments is required for overlaps. Students should consult a Third World studies faculty member or program advisor for approval of a major program.

## MINOR

A student may minor in Third World studies by selecting two courses from the lower-division Third World studies sequence (TWS 21, 22, 23, 24, 25, or 26) and five upper-division courses in disciplines dealing with the Third World.

Third World studies faculty members offer courses in the Departments of Anthropology, Communication, Literature, Political Science, Sociology, History, and in the Third World Studies Program. Appropriate courses in other departments may also be considered. Students should consult departmental and program listings for Third World area offerings.

## COURSES

*For course descriptions not found in the UC San Diego General Catalog, 2010–11, please contact the department for more information.*

See listings also under the Departments of Anthropology, Communication, History, Literature, Political Science, and Sociology for other Third World area offerings.

## LOWER-DIVISION

### 21-22-23-24-25-26. Third World Literatures (4-4-4-4-4)

An introduction to the cultures of various Third World countries through close reading of selected literary texts. TWS 21 focuses on African literature, TWS 22 deals with Latin American literature, TWS 23 examines Chinese literature, TWS 24 examines Caribbean literature, TWS 25 focuses on Middle Eastern literature, and TWS 26 treats literature of the Indian Subcontinent. Topics will vary each quarter. (F, W, S)

## UPPER-DIVISION

### 132. Literature and Third World Societies (4)

This course will investigate novelistic and dramatic treatments of European society in the era of nineteenth-century imperialism, Third World societies under the impact of colonialism, and the position of national minorities inside the United States to the present day. Attention will center on the interplay between the aesthetic merits and social-historical-philosophical content of the works read.

### 135. Bilingualism: Research and Field Studies (4)

A study of sociolinguistic findings on bilingualism throughout the world and an evaluation of bilingual education theories. The students will also engage in surveys of local communities to assess bilingualism and educational needs of bilingual communities. **Prerequisite:** upper-division standing.

### 190. Undergraduate Seminars (4)

Seminars will be organized on the basis of topics with readings, discussions, and papers. Specific subjects to be covered will change each quarter depending on particular interest of instructors or students. May be repeated for credit.

### 197. Field Work (4)

In an attempt to explore and study some unique processes and aspects of community life, students will engage in research in field settings. Topics to be researched may vary, but in each case the course will provide skills for carrying out these studies.

### 198. Directed Group Studies (2 or 4)

Directed group study on a topic or in a field not included in the regular department curriculum, by special arrangement with a faculty member. **Prerequisite:** upper-division standing.

### 199. Independent Study (2 or 4)

Tutorial, individual guided reading and research projects (to be arranged between student and instructor) in an area not normally covered in courses currently being offered in the department. (P/NP grades only.) **Prerequisites:** upper-division standing and consent of instructor. (F, W, S)

Third World studies offerings in other departments:

## ANTHROPOLOGY: REGIONAL

**ANRG 104. Traditional African Societies and Cultures**

**ANRG 170. Traditional Chinese Society**

**ANRG 173. Chinese Popular Religion**

**ANRG 182. Ethnography of Island Southeast Asia**

**ANTHROPOLOGY: SOCIOCULTURAL**

ANSC 131. Urban Cultures in Latin America

ANSC 142. Anthropology of Latin America

ANSC 165. Contemporary South Asia

**COMMUNICATION AND CULTURE**

COCU 179. Colonialism and Culture

**ETHNIC STUDIES**

ETHN 142. Medicine, Race, and the Global Politics of Inequality

**HISTORY**

HIAF 111. Modern Africa since 1880

HIAF 112. West Africa since 1880

HIAF 113. Small Wars and the Global Order: Africa and Asia

HIAF 120. History of South Africa

HIAF 130. African Society and the Slave Trade

HIAF 160. Special Topics in the Economic History of Africa

HIAF 161. Special Topics in African History

HIEA 113. The Fifteen-Year War in Asia and the Pacific

HIEA 130. History of the Modern Chinese Revolution: 1800–1911

HIEA 131. History of the Modern Chinese Revolution: 1911–1949

HIEA 132. History of the People's Republic of China

HIEA 137. Women and Family in Chinese History

HILA 100. Latin America: Colonial Transformation

HILA 101. Latin America: The Construction of Independence 1810–1898

HILA 102. Latin America in the Twentieth Century

HILA 112. Economic and Social History of Andean Region

HILA 113. Lord and Peasant in Latin America

HILA 114. Dictatorships in Latin America

HILA 115. The Latin American City: A History

HILA 116. Encounter of Two Worlds: Early Colonial Latin America

HILA 120. History of Argentina

HILA 121. History of Brazil

HILA 122. Cuba: From Colony to Social Republic

HILA 126. From Columbus to Castro: Caribbean Culture and Society

HILA 127. History, Culture, and Power

HILA 131. A History of Mexico

HILA 132. A History of Contemporary Mexico

HILA 160. Topics in Latin America Colonial History: 1500–1820

HILA 161. History of Women in Latin America

HILA 162. Special topics in Latin America

HINE 114. History of the Islamic Middle East

**LITERATURE**

**SOCIOLOGY: C**

SOCC 139. Social Inequality: Class, Race, and Gender

**SOCIOLOGY: D**

SOCD 151. Comparative Race and Ethnic Relations

SOCD 158. Islam in the Modern World

SOCD 179. Social Change

SOCD 182. Ethnicity and Indigenous Peoples in Latin America

SOCD 183. Minorities and Nations

SOCD 185. Globalization and Social Development

SOCD 187. African Societies through Film

SOCD 188A. Community and Social Change in Africa

SOCD 188B. Chinese Society

SOCD 188D. Latin America: Society and Politics

SOCD 188J. Change in Modern South Africa

Students wishing to include additional related courses from these and other departments should consult a Third World studies advisor.

# Thurgood Marshall College

OFFICE: Provost, Thurgood Marshall College Administration Building

## HONORS PROGRAM

The Thurgood Marshall College Honors Program is designed to address one of the greatest responsibilities and challenges of public higher education: the education of students of exceptionally high academic achievement. The program provides the organization and the environment within which students are encouraged to pursue individual excellence.

Honors activities and events are designed to introduce Thurgood Marshall students to the excitement of pioneering research and innovative scholarship in all disciplines at UC San Diego and to create opportunities for discussion on public issues with locally and nationally known figures. This happens primarily through the honors seminar, offered every quarter, and open to all class levels of honors students.

To qualify for the honors program, incoming transfer and freshmen students must check the Marshall College Honors eligibility criteria on the Marshall Web site: <http://marshall.ucsd.edu>. Continuing UCSD students are eligible upon successful completion of at least twelve graded units with a 3.8 or better cumulative GPA. All honors students must maintain a 3.50 or better cumulative GPA.

Thurgood Marshall College annually recognizes superior achievement. The Provost Award is presented at commencement to a graduating senior who is recognized for outstanding academic achievement and breadth of scholarship. In addition, students may be eligible for universitywide and departmental honors, Provost Honors, Thurgood Marshall College Honors, Phi Beta Kappa membership, and participation in small honors classes in science.

## PUBLIC SERVICE MINOR

Thurgood Marshall College sponsors the Public Service Minor at UCSD, which encourages students to understand the history and practices of public service and to participate in the development of civic skills. This minor is open to all UCSD students in good standing. Please see "Public Service Minor" in the departmental listings or visit the Web site at <http://publicsvminor.ucsd.edu>.

## COURSES

*For course descriptions not found in the UC San Diego General Catalog, 2010–11, please contact the department for more information.*

### 10. Thurgood Marshall College Methods of Inquiry (2)

In this course, students learn analytical thinking strategies routinely used by professional scholars, historians, and social planners. Each student applies methodologies from the materials presented in lectures, films, and readings relevant to the current course work. **Prerequisite:** department stamp. (P/NP only.)

### 15. Introduction to Public Service in America (4)

This course is designed to study, discuss, and analyze the history and current role of public service in the United States. Students will be introduced to the different roles held by the three sectors of the American economic structure (government, business, and nonprofit/public service) with opportunity to provide a critical analysis of those roles within American society.

### 20. Thurgood Marshall College Honors Seminar (1)

Weekly seminar conducted by UCSD faculty and distinguished guest lecturers on topics related to the core curriculum: diversity, justice, and imagination. (P/NP only.)

### 90. Undergraduate Seminar (1)

These seminars are designed to expose undergraduate students, especially freshmen and sophomores, to exciting research conducted by UCSD faculty. **Prerequisite:** none. (P/NP only.)

### 198. Thurgood Marshall College Directed Group Studies (4)

Directed group studies of a creative project. Designated for TMC students to work as a group on a project supervised by faculty; not included in regular curriculum, where group emphasis would be more beneficial and constructive than individual special studies. **Prerequisites:** upper-division standing (ninety units) including lower-division writing requirement (DOC 2 and DOC 3), minimum overall GPA of 2.5 and consent of instructor.

### 199. Marshall College Special Project (1–4)

Individual, independent research, or creative work intended to satisfy Marshall College graduation requirement. Designated for Marshall College students, topics are supervised by Marshall faculty in association with the honors seminar and honors projects. A written application describing the project is required. See Office of the Provost. **Prerequisites:** upper-division students with 2.5 GPA and 90 units and approval of the provost or faculty designee. Honors standing required for honors projects. (P/NP only)

# UC San Diego Washington Program (UCDC)

---

Career Service Center, Room 112  
<http://career.ucsd.edu/sa/UCDC.shtml/>  
<http://www.ucdc.edu>

Since 1997, the UC San Diego Washington Center has provided students an opportunity to intern in the nation's capital while continuing their academic course work. The program is open to all students who have completed ninety units toward graduation with a 2.5 grade-point average. Students earn fourteen units of academic credit, continue to be registered full-time, and fulfill university residency requirements.

Students maintain financial aid eligibility; the amount can be adjusted to reflect the additional costs of the program. In addition, eligible students are considered for the University of California President's Washington Scholarship Program. Students live in the University of California Washington Center, located in the heart of Washington, D.C.

**Internship**—Students work twenty-four hours per week as interns in federal agencies, interest groups, trade associations, the national news media, museums, research institutions, or in other organizations related to policy, politics, science, and culture and geared to the interests and objectives of individual students. *Political Science 197*: six or eight units of academic credit.

**Research Seminar**—Drawing on the internship experience, each student participates in a seminar and undertakes an independent research project. *Political Science 194* (or depending on the student's major, one of the cross-listed equivalents): four units of academic credit.

**Elective Course**—Each student also enrolls in one upper-division seminar course at the Washington Center. These courses are taught by the different campuses' resident faculty and change each quarter. Typically they include a mix of political science, international relations, other social sciences, history, and the arts and humanities. In addition to regular instruction, these seminars may take advantage of the Washington locale and often include guest speakers and fieldwork activities.

## THE URBAN STUDIES AND PLANNING PROGRAM

The great majority of U.S. citizens, and a growing proportion of people throughout the world, live in cities. Cities provide the environment in which people work, learn, play, and make decisions together. Local governments make critical interventions in the quality of life. At the same time, the cities of the world are increasingly linked in a global economic system, making diverse contributions to the international division of labor.

Urban studies and planning (USP) is an interdisciplinary program providing students with a variety of perspectives for understanding the development, growth, and culture of cities and the communities within them. Course work introduces students to the ways different disciplines understand cities and the societies of which they are a part. Upper-division requirements educate students about the parameters within which urban choices are made.

One of the outstanding features of the Urban Studies and Planning Program is the upper-division research requirement. During a two-quarter sequence designed to be taken in the fall and winter of the senior year, all USP majors are guided through a research internship and writing process. The upper-division field studies sequence allows students to work on specific policy projects in the San Diego region. Eligible students may choose to enroll in USP 190 in the spring to write an honors thesis. The honors option is an opportunity to do advanced research and writing that builds on work already completed in the senior sequence.

Urban studies and planning is an undergraduate community of students with diverse interests and goals. After graduation some majors pursue graduate work in social science disciplines. Others pursue graduate study in public policy, law, planning, or architecture. Urban studies has always also attracted students interested in medicine and public-health issues, who continue to study in these areas at schools of medicine or public health. Urban studies and planning provides students with a solid liberal arts background for graduate study or for professional work in a number of fields. Many students find employment opportunities through their internship placement. More generally, graduates of urban studies and planning will have the analytic skills to think clearly and act creatively about the problems and prospects of the urban environment.

## THE URBAN STUDIES AND PLANNING MAJOR

A bachelor of arts degree in urban studies and planning will be given to students who satisfactorily complete the general-education requirements of Muir, Revelle, Marshall, Warren, Roosevelt, or Sixth College in addition to the urban studies and planning courses described below. The undergraduate program in urban studies and planning requires a three-quarter lower-division sequence in urban studies (USP 1-2-3), Political Science 30, and twelve courses in upper-division urban studies and planning. Students are encouraged to complete the lower-division prerequisites before they enroll in the upper-division courses.

In accordance with campus academic regulations, courses used to satisfy the major cannot be applied toward a minor, although some overlap is allowed for double majors. All lower-division and upper-division requirements must be taken for a letter grade. A 2.0 grade point average is required in the major, and students must earn at least C- in each course used for the major. Transfer students should see the USP major affairs advisor to determine whether courses taken elsewhere satisfy USP major requirements. No more than one special studies course, USP 198 or USP 199, will be accepted to count toward the major.

## LOWER-DIVISION REQUIREMENTS

Students majoring in urban studies and planning must complete the introductory sequence:

**USP 1. History of U.S. Urban Communities (4)**

**USP 2. Urban World System (4)**

**USP 3. The City and Social Theory (4)**

and  
**Political Science 30. Political Inquiry (4)**

(Psychology 60, Introduction to Statistics or Sociology 60, The Practice of Social Research may be substituted for Political Science 30.)

## UPPER-DIVISION REQUIREMENTS

The upper-division requirements in urban studies and planning are

1. three foundation courses
2. one research methods course to be taken junior year
3. two senior sequence courses
4. six upper-division elective courses

### Foundation Courses

Foundation courses provide the conceptual tools for the major. Students are to choose three of

**USP 102. Urban Economics (Economics 135) (4)**

**USP 103. U.S. Cities in the Twentieth Century (HIUS 148) (4)**

(USP 165/HIUS 147, History of the American Suburb may be substituted for USP 103.)

**USP 104. Ethnic Diversity and the City (Ethnic Studies 105) (4)**

**USP 105. Urban Sociology (Sociology 153) (4)**

**USP 107. Urban Politics (Political Science 102E) (4)**

**USP 124. Land Use Planning (4)**

(USP 173, History of Urban Planning and Design may be substituted for USP 124.)

### Research Methods Courses

Students are to choose one course of

**USP 125. The Design of Social Research (4)**

**USP 129. Research Methods: Studying Racial and Ethnic Communities (Ethnic Studies 190) (4)**

**USP 130. Field Work in Racial and Ethnic Communities (Ethnic Studies 107) (4)**

**USP 191. GIS for Urban Community Planning (4)**

**USP 193. San Diego Community Research (4)**

### Senior Sequence Requirement

In their senior year, all students must complete the senior sequence: USP 186 in the fall, and USP 187 in the winter. These courses must be taken *in order*. The sequence develops each student's ability to (1) critically review literature research; (2) formulate interesting research questions of their own; (3) design an original research project and investigative strategy; (4) conduct research; and (5) analyze, interpret, and write up findings. The final requirement of USP 186 is a research proposal. By the end of USP 187, each student must complete a Senior Research Project.

Because the senior sequence includes an internship, no other internship or field placement will be counted toward the major.

## **Honors in Urban Studies and Planning**

Candidates for Honors in Urban Studies and Planning are required to take USP 190 Senior Honors Seminar, in which students write a senior thesis. Prerequisites for enrolling in USP 190 are a minimum 3.5 GPA in the major, senior standing, USP 186 and USP 187, and consent of instructor. Majors who plan to enroll in USP 190 must declare their intent fall quarter in USP 186.

**USP 190. Senior Honors Seminar (4)**

## **Upper-Division Elective Courses**

Students are encouraged to pick an area of concentration, and choose upper-division electives listed under that cluster. Students may also define their own area of concentration and design an appropriate curriculum drawn from courses offered by USP and other related departments. USP 199, Independent Study taken for Pass/Not Pass counts for one USP upper-division elective course.

### **Urban/Regional Policy and Planning**

**USP 100. Introduction to Urban Planning**

**USP 101/Political Science 160AA. Introduction to Policy Analysis**

**USP 102/Economics 135. Urban Economics**

**USP 107/Political Science 102E. Urban Politics**

**USP 109/Political Science 103A. California Government and Politics**

**USP 110/Political Science 102J. Advanced Topics in Urban Politics**

**USP 111/Political Science 102JJ. Field Research in Urban Politics**

**USP 113/Political Science 103B. Politics and Policymaking in Los Angeles**

**USP 115/Political Science 103C. Politics and Policymaking in San Diego**

**USP 116. California Local Government: Finance and Administration**

**USP 120. Urban Planning, Infrastructure, and Real Estate**

**USP 122. Redevelopment Planning, Policymaking, and Law**

**USP 124. Land Use Planning**

**USP 133/Sociology 152. Social Inequality and Public Policy**

**USP 137. Housing and Community Development Policy and Practice**

**USP 170. Sustainable Planning**

**USP 171. Sustainable Development**

**USP 173. History of Urban Planning and Design**

**USP 174. Regional Governance and Planning Reconsidered**

**USP 180. Transportation Planning**

**USP 181. Public Transportation**

**USP 191. GIS for Urban and Community Planning**

**USP 193. San Diego Community Research**

**Anthropology (ANBI) 132/Biology (BIEB) 176. Conservation and the Human Predicament**

**Economics 116. Economic Development**

**Economics 118. Law and Economics: Torts, Property, and Crime**

**Economics 130. Public Policy**

**Economics 131. Economics of the Environment**

**Economics 139. Labor Economics**

**Economics 150. Economics of the Public Sector: Taxation**

**Economics 151. Economics of the Public Sector: Expenditures**

**Economics 155. Political Economics**

**Envi 102. Selected Topics in Environmental Studies**

**Envi 130. Environmental Issues: Social Sciences**

**Political Science 160AB. Introduction to Policy Analysis**

**Political Science 162. Environmental Policy**

**Political Science 168. Policy Assessment**

**Sociology 121. Economy and Society**

**Sociology 146. Law Enforcement in America**

**Sociology 155. The City of San Diego**

**Sociology 169. Citizenship, Community, and Culture**

**Sociology 179. Social Change**

**Sociology 180. Social Movements and Social Protest**

**Urban Design/Built Environment**

**USP 103/History (HIUS) 148. American Cities in the Twentieth Century**

**USP 124. Land Use Planning**

**USP 137. Housing and Community Development Policy and Practice**

**USP 165/History (HIUS) 147. History of the American Suburb**

**USP 170. Sustainable Planning**

**USP 171. Sustainable Development**

**USP 173. History of Urban Planning and Design**

**USP 174. Regional Governance and Planning Reconsidered**

**USP 177. Urban Design Practicum**

**USP 178. Urban Design for Redevelopment**

**USP 179. Urban Design, Theory, and Practice**

**USP 180. Transportation Planning**

**USP 191. GIS for Urban and Community Planning**

**USP 193. San Diego Community Research**

**ENVR 102. Selected Topics in Environmental Studies**

**ENVR 110. Environmental Law**

**ENVR 130. Environmental Issues: Social Sciences**

**Ethnic Studies 103. Environmental Racism**

**Ethnic Studies 104. Race, Space, and Segregation**

**History (HISC) 172/272. Building America: Technology, Culture, and the Built Environment in the United States**

**Political Science 125A. Communities and the Environment**

**Political Science 162. Environmental Policy**

**Visual Arts 110 G. The Natural and Altered Environment**

**Visual Arts 111. Structure of Art**

**Health, Social Services, and Education**

**USP 101/Political Science 160AA. Introduction to Policy Analysis**

**USP 133/Sociology C/152. Social Inequality and Public Policy**

**USP 143. The U.S. Health Care System**

**USP 144. Environmental and Preventive Health Issues**

**USP 145. Aging-Social and Health Policy Issues**

**USP 147. Case Studies in Health Care Programs/ Poor and Underserved Populations**

**Economics 130. Public Policy**

**Economics 139. Labor Economics**

**Economics 150. Economics of the Public Sector: Taxation**

**Economics 151. Economics of the Public Sector: Expenditures**

**Economics 155. Political Economics**

## THE MINOR PROGRAM

The urban studies and planning minor consists of seven courses in urban studies and planning, selected with the prior approval of the USP student affairs advisor. Students who wish to minor in urban studies may do so by taking any two courses from among the lower-division sequence and the upper-division foundation courses, and five upper-division courses from among those that serve the USP major. All courses must be taken for a letter grade not lower than a C-. Courses selected need approval from the USP program advisor. Students can declare the minor online.

## EDUCATION ABROAD PROGRAM

Students are encouraged to participate in the UC Education Abroad Program (EAP) or Opportunities Abroad Program (OAP) while still making progress toward completing their USP major. For more information on EAP, see the section of this catalog on the Education Abroad Program or visit <http://programsabroad.ucsd.edu>. Students considering this option are advised to discuss their plans with the USP student affairs advisor before going abroad.

## COURSES

*For course descriptions not found in the UC San Diego General Catalog, 2010–11, please contact the department for more information.*

## LOWER-DIVISION

### 1. History of US Urban Communities (4)

This course charts the development of urban communities across the United States both temporally and geographically. It examines the patterns of cleavage, conflict, convergence of interest, and consensus that have structured urban life. Social, cultural, and economic forces will be analyzed for the roles they have played in shaping the diverse communities of America's cities.

### 2. Urban World System (4)

Examines cities and the environment in a global context. Emphasizes how the world's economy and the earth's ecology are increasingly interdependent. Focuses on biophysical and ethicosocial concerns rooted in the contemporary division of labor among cities, Third World industrialization, and the post-industrial transformation of U.S. cities.

### 3. The City and Social Theory (4)

An introduction to the sociological study of cities, focusing on urban society in the United States. Students in the course will examine theoretical approaches to the study of urban life; social stratification in the city; urban social and cultural systems—ethnic communities, suburbia, family life in the city, religion, art, and leisure.

### 87. Freshman Seminar (1)

The Freshman Seminar Program is designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminars are offered in all campus departments and undergraduate colleges, and topics vary from quarter to quarter. Enrollment is limited to fifteen to twenty students, with preference given to entering freshmen.

## UPPER-DIVISION

### 100. Introduction to Urban Planning (4)

This course is designed to provide an introduction to the fundamentals of urban planning. It surveys important topics in urban planning, including economic development, urban design, transportation, environmental planning,

housing, and the history of urban planning. **Prerequisite:** upper-division standing or consent of instructor.

### 101. Introduction to Policy Analysis (4)

(Same as Political Science 160AA.) This course will explore the process by which the preferences of individuals are converted into public policy. Also included will be an examination of the complexity of policy problems, methods for designing better policies, and a review of tools used by analysts and policy makers. **Prerequisite:** upper-division standing or consent of instructor.

### 102. Urban Economics (4)

(Same as Economics 135.) Economic analysis of why and where cities develop, problems they cause, and public policies to deal with these problems. Determination of urban land rent/use, reasons for suburbanization. Transportation and congestion in cities, zoning, poverty and housing, urban local government. **Prerequisites:** Economics 1A-B or 1-2 and Mathematics 10A or 20A.

### 103. American Cities in the Twentieth Century (4)

(Same as HIUS 148.) This course surveys changes in U.S. cities since about 1900. Case studies of individual cities illustrate the social, political, and environmental consequences of rapid urban expansion, as well as the ways in which "urban problems" have been understood historically. **Prerequisite:** upper-division standing or consent of instructor.

### 104. Ethnic Diversity and the City (4)

(Same as Ethnic Studies 105.) This course will examine the city as a crucible of ethnic identity exploring both the racial and ethnic dimensions of urban life in the U.S. from the Civil War to the present. **Prerequisite:** upper-division standing.

### 105. Urban Sociology (4)

(Same as Sociology 153.) Introduces students to the major approaches in the sociological study of cities and to what a sociological analysis can add to our understanding of urban processes. **Prerequisite:** upper-division standing or consent of instructor.

### 107. Urban Politics (4)

(Same as Political Science 102E.) This survey course focuses upon the following six topics: the evolution of urban politics since the mid-nineteenth century; the urban fiscal crisis; federal/urban relationships; the "new" politics; urban power structure and leadership; and selected contemporary policy issues such as downtown redevelopment, poverty, and race.

### 109. California Government and Politics (4)

(Same as Political Science 103A.) This survey course explores six topics: 1) the state's political history; 2) campaigning, the mass media, and elections; 3) actors and institutions in the making of state policy; 4) local government; 5) contemporary policy issues; e.g., Proposition 13, school desegregation, crime, housing and land use, transportation, water; 6) California's role in national politics. **Prerequisite:** upper-division standing.

### 110. Advanced Topics in Urban Politics (4)

(Same as Political Science 102J.) Building upon the introductory urban politics course, the advanced topics course explores issues such as community power, minority empowerment, and the politics of growth. A research paper is required. Students wishing to fulfill the paper requirement with field research should enroll in the subsequent Political Science 102JJ course offered Summer Session II. **Prerequisites:** upper-division standing, consent of instructor.

### 111. Field Research in Urban Politics (4)

(Same as Political Science 102JJ.) To be taken with the approval of the Political Science 102J instructor, this course allows students to do original field research on topics in urban politics. This course is offered in Summer Session II subsequent to a spring 102J course. May not be used to fulfill any major or minor requirements in politics science or urban studies and planning. **Prerequisites:** USP 110/Political Science 102J and consent of instructor.

### 113. Politics and Policymaking in Los Angeles (4)

(Same as Political Science 103B.) This course examines politics and policymaking in the five-county Los Angeles region. It explores the historical development of the city,

suburbs, and region; politics, power, and governance; and major policy challenges facing the city and metropolitan area. **Prerequisite:** upper-division standing.

**115. Politics and Policymaking in San Diego (4)**  
(Same as Political Science 103C.) This course examines how major policy decisions are made in San Diego. It analyzes the region's power structure (including the roles of non-governmental organizations and the media), governance systems and reform efforts, and the politics of major infrastructure projects. **Prerequisite:** upper-division standing or consent of instructor.

**116. California Local Government: Finance and Administration (4)**  
This course surveys public finance and administration. It focuses upon California local governments—cities, counties, and special districts—and also examines state and federal relationships. Topics explored include revenue, expenditure, indebtedness, policy responsibilities, and administrative organization and processes. **Prerequisite:** upper-division standing.

**120. Urban Planning, Infrastructure, and Real Estate (4)**  
This course will explore the interrelationships of urban planning, public infrastructure, and real estate development. These three issues are critical to an examination of the major challenges facing California's and America's major metropolitan centers. **Prerequisite:** upper-division standing or consent of instructor.

**122. Redevelopment Planning, Policymaking, and Law (4)**  
This course examines key elements of land use, planning, and law as related to urban redevelopment. It focuses on San Diego case studies, including the Petco Park/East Village redevelopment project and the Naval Training Center (NTC) Redevelopment Area (Liberty Station). **Prerequisite:** upper-division standing or consent of instructor.

**124. Land Use Planning (4)**  
Introduction to land use planning in the United States: zoning and subdivision, regulation, growth management, farmland preservation, environmental protection, and comprehensive planning. **Prerequisite:** upper-division standing or consent of instructor.

**125. The Design of Social Research (4)**  
Research methods are tools for improving knowledge. Beginning with a research question, students will learn to select appropriate methods for sampling, collecting, and analyzing data to improve their research activities and research results. **Prerequisite:** upper-division standing or consent of instructor.

**129. Research Methods: Studying Racial and Ethnic Communities (4)**  
(Same as ETHN 190.) The course offers students the basic research methods with which to study ethnic and racial communities. The various topics to be explored include human and physical geography, transportation, employment, economic structure, cultural values, housing, health, education, and intergroup relations. **Prerequisite:** upper-division standing or consent of instructor.

**130. Field Work in Racial and Ethnic Communities (4)**  
(Same as ETHN 107.) This is a research course examining social, economic, and political issues in ethnic and racial communities through field work. Topics are examined through a variety of research methods which may include interviews and archival, library, and historical research. **Prerequisite:** upper-division standing.

**132. African Americans, Religion, and the City (4)**  
(Same as Ethnic Studies 188.) This course details the history of African-American migration to urban areas after World War I and World War II and explores the role of religion in their lives as well as the impact that their religious experiences had upon the cities in which they lived. **Prerequisite:** upper-division standing.

**133. Social Inequality and Public Policy (4)**  
(Same as SOC 152.) Primary focus on understanding and analyzing poverty and public policy. Analysis of how current debates and public policy initiatives mesh with alterna-

tive social scientific explanations of poverty. **Prerequisite:** upper-division standing.

**135. Asian and Latina Immigrant Workers in the Global Economy (4)**  
(Same as ETHN 129.) This course will explore the social, political, and economic implications of global economic restructuring, immigration policies, and welfare reform on Asian and Latina immigrant women in the United States. We will critically examine these larger social forces from the perspectives of Latina and Asian immigrant women workers, incorporating theories of race, class, and gender to provide a careful reading of the experiences of immigrant women on the global assembly line. **Prerequisite:** upper-division standing.

**137. Housing and Community Development Policy and Practice (4)**  
History, theory, and practice of U.S. housing and community development. Public, private, and nonprofit sectors shape and implement planning and policy decisions at the federal, state, local and neighborhood levels. **Prerequisite:** upper-division standing.

**143. The U.S. Health Care System (4)**  
This course will provide an overview of the organization of health care within the context of the community with emphasis on the political, social, and cultural influences. It is concerned with the structure, objectives, and trends of major health and health-related programs in the United States to include sponsorship, financing, training and utilization of health personnel. **Prerequisite:** upper-division standing or consent of instructor. (Offered winter quarter.)

**144. Environmental and Preventive Health Issues (4)**  
This course will analyze needs of populations, highlighting current major public health problems such as chronic and communicable diseases, environmental hazards of diseases, psychiatric problems and additional diseases, new social mores affecting health maintenance, consumer health awareness and health practices, special needs of economically and socially disadvantaged populations. The focus is on selected areas of public and environmental health, namely: epidemiology, preventive services in family health, communicable and chronic disease control, and occupational health. **Prerequisite:** upper-division standing or consent of instructor. (Offered fall quarter.)

**145. Aging—Social and Health Policy Issues (4)**  
This course will provide a brief introduction to the nature and problems of aging, with emphasis on socioeconomic and health status; determinants of priorities of social and health policies will be examined through analysis of the structure and organization of selected programs for the elderly. Field visits will constitute part of the course. **Prerequisite:** upper-division standing.

**147. Case Studies in Health Care Programs/Poor and Underserved Population (4)**  
The purpose of this course is to identify the special health needs of low income and underserved populations and to review their status of care, factors influencing the incidence of disease and health problems, and political and legislative measures related to access and the provision of care. Selected current programs and policies that address the health-care needs of selected underserved populations such as working poor, inner city populations, recent immigrants, and persons with severe disabling mental illnesses will be studied. Offered in alternate years. **Prerequisite:** upper-division standing or consent of instructor. (Offered spring quarter.)

**165. History of the American Suburb (4)**  
(Same as HIUS 147.) This lecture course explores the development of suburbs in America, from the early nineteenth century to the contemporary era. Topics include suburban formation, class, ethnic and racial dimensions, government influences, social life, and cultural responses to suburbia. The class will explore competing theories of suburbanization as it surveys the major literature. **Prerequisite:** upper-division standing.

**166. History of San Diego (4)**  
Course surveys the social, political, economic, cultural and environmental history of the San Diego region from pre-colonial times to the present, with an emphasis on

the urban development that has occurred since 1900. **Prerequisite:** upper-division standing.

**167. History of New York City (4)**  
(Same as HIUS 123.) New York City breathes history. Whether it is in the music, the literature, or the architecture, the city informs our most basic conceptions of American identity. This course examines the evolution of Gotham from the colonial era to today. **Prerequisite:** upper-division standing or consent of instructor.

**170. Sustainable Planning (4)**  
This course will explore the different factors and processes that shape a sustainable city. Contemporary green planning techniques and values will be evaluated. The course will also discuss planning, designing, and implementation of sustainable facilities that will reduce sprawl. **Prerequisite:** upper-division standing or consent of instructor.

**171. Sustainable Development (4)**  
Sustainable development is a concept invoked by an increasingly wide range of scholars, activists, and organizations dedicated to promoting environmentally sound approaches to economic development. This course critically examines the diverse, often contradictory, interests in sustainability. It provides a transdisciplinary overview of emergent theories and practices. **Prerequisite:** upper-division standing.

**173. History of Urban Planning and Design (4)**  
The analysis of the evolution of city designs over time; study of the forces that influence the form and content of a city: why cities change; comparison of urban planning and architecture in Europe and the United States. **Prerequisite:** upper-division standing.

**174. Regional Governance and Planning Reconsidered (4)**  
Regional planning and local governance in California, focusing upon San Diego. Current system, the state/local relationship, and the incentives and disincentives for restructuring regional and local governance and planning. **Prerequisite:** upper-division standing.

**177. Urban Design Practicum (4)**  
This course is designed to introduce the student to the theory and practice of urban design, the form of the built environment, and how it is created. There is an emphasis on the development within a larger urban context. **Prerequisite:** upper-division standing or consent of instructor.

**178. Urban Design for Redevelopment (4)**  
This course addresses inner-city and suburban redevelopment focusing on urban design, ecological, and ethnic issues using advanced physical planning and urban design methods. Also included will be the environmental-impact assessments of redevelopment projects. **Prerequisite:** upper-division standing.

**179. Urban Design, Theory, and Practice (4)**  
Roles of the urban designer, preparing schematic proposals and performance statements, identifying opportunities for and constraints on designers. Each student will prepare a practical exercise in urban design using various urban design methods. **Prerequisite:** upper-division standing.

**180. Transportation Planning (4)**  
Introduction to the history and current state of urban transportation planning, including the relationship between transportation and urban form; role of automotive, mass transit, and alternative modes; methods for transportation systems analysis; decision-making, regulatory, and financing mechanisms; and public attitudes. **Prerequisite:** upper-division standing.

**181. Public Transportation (4)**  
Livable cities rely on balanced transportation systems that can mitigate the negative impacts of a car-oriented environment and society. This course will explore the role of public transit in creating a balanced transportation system. A variety of public transportation systems will be analyzed. **Prerequisite:** upper-division standing or consent of instructor.

**186. Senior Sequence Research Proposal (6)**

Introduces students to the theory and practice of social research including the challenges of writing a scholarly proposal. Students are required to complete 100 hours of an internship experience while critically examining the relations between social science and society. **Prerequisites:** upper-division standing, USP major.

**187. Senior Sequence Research Project (6)**

An intensive research, internship, and writing experience that culminates in an original senior research project. Students learn about the theoretical, ethical, and technical challenges of scholarly research and publication. **Prerequisite:** USP 186.

**190. Senior Honors Seminar (4)**

Each student enrolled will be required to write an honors essay, a substantial research paper on a current urban policy issue, under the supervision of a member of the faculty. Most often the essay will be based on their previous fieldwork courses and internship. This essay and other written exercises, as well as class participation, will be the basis of the final grade for the course. The seminar will rotate from year to year among the faculty in urban studies and planning. **Prerequisites:** USP 186, USP 187, major GPA 3.5, and permission of instructor.

**191. GIS for Urban and Community Planning (4)**

Introduction to Geographic Information Systems and using GIS to make decisions: acquiring data and organizing data in useful formats, demographic mapping, geocoding. Selected exercises examine crime data, political campaigns, banking and environmental planning, patterns of bank lending and finance. **Prerequisites:** upper-division standing, USP major.

**193. San Diego Community Research (4)**

Using the San Diego region as a case study, students will be introduced to the process of collecting, evaluating, and presenting urban and regional data using a variety of methods, including aggregate data analysis, historical research, and ethnography. **Prerequisite:** upper-division standing.

**194. Research Seminar in Washington, D.C. (4)**

(Same as Cognitive Science 194, Communication 194, Earth Science 194, History 193, Political Science 194, Sociology E/194.) Course attached to six-unit internship taken by students participating in the UCDC program. Involves weekly seminar meetings with faculty and teaching assistant and a substantial research paper. **Prerequisites:** department approval and participating in UCDC program.

**195. Teaching Apprentice—Undergraduate (2–4)**

Introduction to teaching activities associated with course. Responsibilities include preparing reading materials assigned by the instructor, attending course lectures, meeting at least one hour per week with the instructor, assisting instructor in grading, and preparing a summary report to the instructor. **Prerequisites:** consent of instructor and an A in the course in which the student plans to assist.

**198. Directed Group Study (2–4)**

Directed group study on a topic or in a field not included in the regular departmental curriculum by special arrangement with a faculty member. **Prerequisites:** upper-division standing and consent of instructor.

**199. Independent Study (2–4)**

Reading and research programs and field-study projects to be arranged between student and instructor, depending on the student's needs and the instructor's advice in terms of these needs. **Prerequisites:** upper-division standing and consent of instructor.

## PROFESSORS

David Antin, M.A., *Emeritus*  
Eleanor Antin, B.A., *Emerita*  
Sheldon G. Brown, M.F.A.  
Norman Bryson, Ph.D.  
Harold Cohen, *Diploma of Fine Arts, Emeritus*  
Steve Fagin, M.A.  
Anya Gallaccio, B.A.  
Jean-Pierre Gorin, *Licence de Philosophie*  
Helen Mayer Harrison, M.A., *Emerita*  
Newton A. Harrison, M.F.A., *Emeritus*  
Louis J. Hock, M.F.A.  
Fred S. Lonidier, M.F.A.  
Kim R. MacConnel, M.F.A., *Emeritus*  
Babette M. Mangolte  
Lev Manovich, Ph.D.  
Sheldon A. Nodelman, Ph.D.  
Rubén Ortiz-Torres, M.F.A.  
Patricia A. Patterson, *Emerita*  
Faith Ringgold, M.A., *Emerita*  
Jerome Rothenberg, M.A., *Emeritus*  
Kuiyi Shen, Ph.D.  
Ernest R. Silva, M.F.A.  
Haim Steinbach, M.F.A.  
Lesley F. Stern, Ph.D.  
John C. Welchman, Ph.D.

## ASSOCIATE PROFESSORS

Amy Adler, M.F.A.  
Amy J. Alexander, M.F.A.  
Benjamin Bratton, Ph.D.  
Jordan Crandall  
Edwin Teddy Cruz, M.Des.S.  
Ricardo Dominguez, M.A.  
Jack M. Greenstein, Ph.D.  
Grant Kester, Ph.D.  
Standish D. Lawder, Ph.D., *Emeritus*  
Elizabeth Newsome, Ph.D.  
Kyong Park, B.S.  
Jennifer Pastor, M.F.A.  
Cauleen Smith, M.F.A., *Acting*  
Susan L. Smith, Ph.D.  
Phel Steinmetz, *Academic Senate Distinguished Teaching Award*

## LECTURERS WITH SECURITY OF EMPLOYMENT

Claudio Fenner-Lopez, M.A., *Emeritus*  
Brett Stalbaum, M.F.A.

## LECTURER WITH POTENTIAL FOR SECURITY OF EMPLOYMENT

Michael Trigilio, M.F.A.  
OFFICE: 216 Mandeville Center for the Arts  
<http://visarts.ucsd.edu>

The Department of Visual Arts offers courses in painting, drawing, sculpture, performance, computing in the arts, film, video, photography, and art history/criticism (including that of film and video). A bachelor's degree from this department provides

students with a solid liberal arts background and is preparatory training for careers as artists, art historians, filmmakers, video artists, photographers, digital media artists, and art critics. It also provides students the initial skills required for teaching and work in museums, television, and the commercial film, photography, and internet industries.

By its composition, the Department of Visual Arts is biased in the direction of actively producing artists and critics whose presence at the center of the contemporary art world necessitates reconsideration and reevaluation of artistic productions, their information structure, and significance. Consequently, a flexible introductory program of historically based courses has been devised mainly to provide the student an opportunity to concentrate on areas involving significantly different aesthetic and communication structures. A series of studio courses, in which painting and sculpture are included, is presented to bring the student into direct contact with the real contingencies compelling redistribution of aesthetic attitudes and reinterpretation of genres. Because of the exploratory nature of our program, the department is prepared to emphasize new media that would traditionally be considered to have scant relation to the visual arts. Thus, courses in theatrical events, linguistic structures, etc., are provided. In this context, theoretical courses with a media orientation, as in film, video, photography, or computing, are also offered.

The Department of Visual Arts is located in the Mandeville Center for the Arts. In addition, the master of fine arts program office, as well as faculty and graduate students' studios/research spaces are located in the Visual Arts Facility sited in Sixth College. Ph.D. student offices are located in the Literature Building. Facilities and equipment are available to undergraduates in both the Mandeville Center and at the campuswide Media Center, providing the opportunity to study painting, drawing, photography, computing in the arts, 16mm film, performance, sculpture, and video. Facilities at the Media Center include portable video recording equipment, video and audio editing suites, non-linear editing, and production studios. Additional film equipment available includes an animation stand, optical printer, two sound-mixing studios, and numerous film editing suites. Courses in computing in the arts take place in the Silicon Graphics/Mac/NT lab located at the Visual Arts Facility, the INTEL-shared lab in the Applied Physics and Mathematics building, and a dedicated ICAM lab in building 201 University Center.

The University Art Gallery displays a continually changing series of exhibitions, and the Mandeville Annex Gallery, located on the lower level, is directed by visual arts undergraduate students. A gallery and performance space, located in the Visual Arts Facility, are directed by graduate students.

## THE UNDERGRADUATE PROGRAM

### COLLEGE REQUIREMENTS

The Department of Visual Arts teaches courses applicable toward the Muir, Sixth, and Warren general-education requirements, the Marshall humanities requirement, the Eleanor Roosevelt and Revelle fine arts requirements. Optional minors may be taken within any college.

## MINOR IN VISUAL ARTS

The Department of Visual Arts offers minors in seven areas of study: studio painting/drawing/sculpture, photography, computing, art history, history and criticism of film and video, digital video and film production, and ICAM. A minor consists of seven specific courses, of which at least five must be upper-division. Because the requirements differ for each minor, prospective visual arts minors should consult with the departmental advisor for a complete list of appropriate classes acceptable for the minor.

Students are advised to begin their program in the second year; otherwise, they cannot be guaranteed enough time to complete the classes required for a minor.

### Art History (VA26)

#### Required Courses

#### 20. Introduction to Art History

Choose one from

#### 21A. Introduction to Art of the Americans or Africa and Oceania

#### 21B. Introduction to Asian Art

Choose one course from three of the five Distribution areas A–E.

Please refer to the Art History major for the course options in each area:

- European Pre-Modern: Ancient and Medieval
- European early Modern: Renaissance and Baroque
- Modern and Contemporary
- Arts of the Americas
- Arts of Asia

Choose two additional Art History courses from any area A–E.

### Studio Minor (VA28)

#### Required Courses

#### 22. Formations of Modern Art

#### 111. Structure of Art

Choose one course from

1. Introduction to Art-Making: Two-Dimensional Practices
2. Introduction to Art-Making: Motion- and Time-Based Art
3. Introduction to Art-Making: Three-Dimensional Practices

Choose four courses from:

- 104A. Performing the Self
- 104BN. Verbal Performance
- 104CN. Personal Narrative
- 105A. Drawing: Representing the Subject
- 105B. Drawing: Practices and Genre
- 105C. Drawing: Portfolio Projects
- 105D. Aesthetics in Chinese Calligraphy
- 105E. Chinese Calligraphy Installation
- 106A. Painting: Image Making
- 106B. Painting: Practices and Genre
- 106C. Painting: Portfolio Projects
- 107A. Sculpture: Making the Object
- 107B. Sculpture: Practices and Genre
- 107CN. Sculpture: Portfolio Projects

## ICAM: Interdisciplinary Computing and the Arts (VA29)

### Required Courses

ICAM 40/VIS 40. Introduction to Computing in the Arts  
ICAM 110. Computer Arts: Current Practice  
ICAM 150/VIS 159. History of Art and Technology  
Choose one from  
1. Introduction to Art-Making: Two-Dimensional Practices  
2. Introduction to Art-Making: Motion and Time-Based Art  
3. Introduction to Art-Making: Three-Dimensional Practices  
MUS 4. Introduction to Western Music  
Choose one from  
ICAM 101/VIS 140. Digital Imaging: Image and Interactivity  
ICAM 103/MUS 170. Musical Acoustics  
Choose two from  
ICAM 102/VIS 145A. Time and Process Based Digital Media I  
145B. Time and Process Based Digital Media II  
ICAM 120. Virtual Environments  
ICAM 130/VIS 149. Seminar in Contemporary Computer Topics  
MUS 171. Computer Music I  
MUS 172. Computer Music II  
MUS 176. Music Technology Seminar  
132. Installation Production and Studio  
141A. Computer Programming for the Arts I  
141B. Computer Programming for the Arts II  
147A. Electronic Technologies for Art I  
147B. Electronic Technologies for Art II

## Computing (MO53)

### Required Courses

22. Formations of Modern Art  
VIS 40/ICAM 40. Introduction to Computing in the Arts  
111. Structure of Art  
VIS 159/ICAM 150. History of Art and Technology  
Choose three upper-division Computing courses:  
ICAM 101/VIS 140. Digital Imaging: Image and Interactivity  
ICAM 102/VIS 145A. Time and Process Based Digital Media I  
145B. Time and Process Based Digital Media II  
147A. Electronic Technologies for Art I  
147B. Electronic Technologies for Art II

## Photography (MO54)

### Required courses

22. Formations of Modern Art  
60. Introduction to Digital Photography  
111. Structure of Art  
158. Histories of Photography  
VIS 159/ICAM 150. History of Art and Technology  
164. Photographic Strategies  
165. Camera Techniques

## History and Criticism of Film and Video (MO72)

### Required courses

70N. Introduction to Media  
84. History of Film  
111.\* Structure of Art  
Choose four upper-division courses in the history and/or criticism of film and video. (Courses numbered 150–157 except 156N)  
\*Five unique upper-division courses in media history/criticism are required if you are also completing a Visual Arts major or minor.

## Digital Video and Film Production (MO71)

### Required courses

70N. Introduction to Media  
84. History of Film  
111.\* Structure of Art  
174. Media Sketchbook  
Choose one upper-division course in digital video and film production listed below:  
171. Digital Cinema: Theory and Production  
175. Editing: Theory and Production  
176. 16 mm Filmmaking  
177. Scripting Strategies  
178. Sound: Theory and Production  
Choose two upper-division courses in the history and/or criticism of film and video listed below:  
150. History of Silent Cinema  
151. History of Experimental Film  
152. Film in Social Context  
153. The Genre Series  
154. Hard Look at the Movies  
155. The Director Series  
157. Video History and Criticism  
194S. Fantasy in Film  
\*Five unique upper-division courses in media are required if any of these courses overlap with your major or minor.  
\*\*Students may not major in Visual Arts Media (VA27) and minor in Digital Video and Film Production.

## EDUCATION ABROAD PROGRAM

Students are often able to participate in the UC Education Abroad Program (EAP) and UC San Diego's Opportunities Abroad Program (OAP) while still making progress toward completing their major. Financial aid is applicable to study abroad and special study abroad scholarships are readily available. Students considering this option should discuss their plans with an Education Abroad advisor before going abroad, and courses taken abroad must be approved by the departmental faculty advisor. More information on EAP/OAP is detailed in the Education Abroad Program of the *UC San Diego General Catalog* or on their Web site <http://programsabroad.ucsd.edu/pao/>. Interested students should contact the Programs Abroad Office in the International Center.

## RESIDENCY REQUIREMENTS

A minimum of two-thirds of the course work completed for the major must be taken at UCSD. Students who transfer to UCSD in their second or third year may petition to substitute courses

taken at other colleges and universities for major requirements.

Visual Arts 111, Structure of Art, must be taken at UCSD by all students, including transfer students, in the art history, media, and studio majors.

## HONORS PROGRAMS

The department offers honors programs in art history, in media, and in studio for outstanding students.

The **art history** honors program will provide outstanding students with pre-professional experience. It consists of an issue-oriented seminar followed by a directed group study and will result in an exhibition with catalogue, a scholarly conference with a mock publication and/or series of research papers. Students who meet the criteria may, with permission of the art history faculty advisor or the art history honors seminar instructor, enroll in the art history honors program during the last quarter of their junior year or as a senior. This program is open to juniors and seniors who meet eligibility requirements: minimum major GPA of 3.5 (3.3 overall), completion of all lower-division art history requirements, completion of all upper-division art history distribution requirements, and completion of Art Historical Methods (VIS 112) and at least one additional art history seminar. The level of distinction will be determined by the faculty committee on the basis of work in the honors seminar and on the research project.

The **media** honors program will help students develop high-quality professional portfolios. The honors thesis project is a sequence of individual studies that runs the length of an academic year to provide sufficient time for ideas to develop and critically aware work to be produced. Students may arrange to work with different faculty advisors each term or may engage a single advisor for the year. To be eligible for the honors thesis sequence, students must have at least a 3.5 GPA in the major and have approval of all the advisors with whom they will work. Qualified students may begin their sequence the last quarter of their junior year or during their senior year. At the end of the third quarter, all involved media faculty will meet to critique the overall quality of the final thesis work to determine level of distinction.

Through exhibition, verbal and written presentations and course work, the studio honors program is intended to give the student as strong a technical, critical, and theoretical base as possible. The program is open to juniors and seniors with a minimum 3.5 GPA in the major (3.0 overall), who have completed all lower-division studio requirements and all upper-division groups I, II, III, and IV (subgroup A) requirements.

Students interested in participating in an honors program should consult with the departmental advisor.

## DOUBLE MAJOR WITHIN THE DEPARTMENT

There are three double majors within the Department of Visual Arts: Art History/Theory/Criticism paired with either studio, media, or ICAM. Students interested in a double major within the department must have at least ten upper-division

courses that are unique to each departmental major and the remaining courses may overlap with other major requirements. Students should consult with the departmental advisor for additional information.

## MAJOR REQUIREMENTS

Twenty courses are required in studio, media, and ICAM and eighteen courses in art history for the attainment of the bachelor of arts degree. A minimum of twelve of these courses must be upper-division, however, some majors may require more upper-division courses.

All courses taken to satisfy major requirements must be taken for a letter grade, and only grades of C– or better will be accepted in the visual arts major.

## STUDIO MAJOR

The studio major is aimed at producing a theoretically based, highly productive group of artists. Lower-division courses are structured to expose students to a variety of ideas in and about the visual arts. Introductory skills are taught, but their development will occur at the upper-division level in conjunction with the student's increasing awareness of the range of theoretical possibilities in the field. The curriculum includes courses in drawing, painting, sculpture, performance, photography, video, 16mm film, many offerings in art history/criticism, as well as new courses in digital imaging and electronics.

### Group I: Lower-Division

#### Foundation Level

Five courses required.

1. Introduction to Art Making: Two-Dimensional Practices
2. Introduction to Art Making: Motion and Time Based Art
3. Introduction to Art Making: Three-Dimensional Practices
22. Formations of Modern Art  
Choose one from
20. Introduction to Art History
- 21A. Introduction to the Arts of the Americas or Africa and Oceania
- 21B. Introduction to Asian Art
84. History of Film

### Group II: Upper-Division

#### Entry Level

Five courses required.

111. Structure of Art

Choose four from

- 40/ICAM 40.\* Introduction to Computing in the Arts
- 60.\* Introduction to Digital Photography
- 70N.\* Introduction to Media
- 104A. Performing the Self
- 105A. Drawing: Representing the Subject
- 106A. Painting: Image Making
- 107A. Sculpture: Making the Object

**Note:** Required for Visual Arts studio, media, and art history majors.

\*VIS 40, 60, or 70N can be taken to fulfill Group II entry level studio requirements, but will not count toward the fifteen upper-division courses needed to fulfill the major requirements.

### Group III: Upper-Division

#### Intermediate Level

Two courses required.

- 104BN. Verbal Performance
- 105B. Drawing: Practices and Genre
- 105D. The Aesthetics of Chinese Calligraphy
- 106B. Painting: Practices and Genre
- 107B. Sculpture: Practices and Genre
- 140/ICAM 101. Digital Imaging: Image and Interactivity
- 147A. Electronic Technologies for Art I

### Group IV: Upper-Division

#### Advanced Level

Five courses required.

#### Group A

Choose two from

- 104CN. Personal Narrative
- 105C. Drawing: Portfolio Projects
- 105E. Chinese Calligraphy as Installation
- 106C. Painting: Portfolio Projects
- 107CN. Sculpture: Portfolio Projects
- 147B. Electronic Technologies for the Art II

#### Group B

Group A must be completed before Group B can be taken.

Choose three from

108. Advanced Projects in Art
- 110A. Contemporary Issues and Practices
- 110B. New Genres/New and Old Technologies
- 110C. Proposals, Plans, Presentations
- 110D. Visual Narrative/Tableau
- 110E. Art in Public Places/Site Specific Art
- 110F. Installation: Cross-Disciplinary Projects
- 110G. The Natural and Altered Environment
- 110H. Image and Text Art
- 110I. Performing for the Camera
- 110J. Ritual Performance
- 110K. Installation Performance
130. Special Projects in Visual Arts
132. Installation Production and Studio

### Group V: Upper-Division

#### Non-Studio

Three courses required.

- Upper-division art history, film history, and theory/ criticism courses such as
- 113CN.\* History of Criticism III: Contemporary (1950–Present)
  - 117B.\* Theories of Representation
  - 117I.\* Western and Non-Western Rituals and Ceremonies
  - 124CN. Nineteenth-Century Art
  - 125A. Twentieth-Century Art
  - 125BN. Contemporary Art
  152. Film in Social Context

154. Hard Look at the Movies
157. Video History and Criticism
158. Histories of Photography
- 159/ICAM 150. History of Art and Technology
- 194S. Fantasy in Film  
\*seminar

### Honors Program in Studio

#### 110M. Studio Honors I

#### 110N. Studio Honors II

The Studio Honors I and the attached Studio Honors II count as one course towards the fulfillment of a Group IV requirement.

## ART HISTORY/THEORY/CRITICISM MAJOR

The major in art history, theory, and criticism is designed both for students who desire a broadly based education in the humanities and for those who plan to pursue a career in an art-related profession. In both cases, the foundation for study is proficiency in the languages of artistic expression. Through the study of art history, students learn to treat works of art as manifestations of human belief, thought, and experience in Western and non-Western societies from prehistory to the present day. Courses in criticism review the theoretical approaches that are used to understand artistic achievement. By combining art historical and critical study, the program promotes in the student an awareness of the cultural traditions that have shaped his or her intellectual outlook and provides a framework for informed judgment on the crucial issues of meaning and expression in contemporary society.

Majors are encouraged to take relevant courses in allied disciplines such as history, communication, anthropology, and literature, and in such area programs as classics and Italian studies. In addition, students who plan to apply to graduate schools are strongly advised to develop proficiency in one or more foreign languages, as is dictated by their area of specialization.

### FOUNDATION LEVEL—Lower-Division

Five courses required.

20. Introduction to Art History
22. Formations of Modern Art
23. Information Technologies in Art History  
Choose one from 21A. Introduction to the Art of the Americas or Africa and Oceania
- 21B. Introduction to Asian Art

Choose one from

- 1, 2, 3. Introduction to Art-Making
60. Introduction to Digital Photography
- 70N. Introduction to Media

**Note:** VIS 23 should be completed by the end of the sophomore year or taken the first time it is offered after a junior declares an art history major or transfers into the program. VIS 23 is a prerequisite for VIS 112.

### ADVANCED LEVEL—Upper-Division

Thirteen courses required.

#### GROUP I—Required Courses

Two courses.

These two courses are required for all art history and criticism majors:

**111. Structure of Art\***

**112. Art Historical Methods**

**Note:** Majors must complete VIS 112 by the end of their junior year and are strongly advised to do so earlier.

\*Required of Visual Arts art history, media, and studio majors.

**GROUP II—Distributional Requirement**

Six courses.

Choose one course from each of the following areas:

**A. European Pre-Modern: Ancient and Medieval**

**120A. Greek Art**

**120B. Roman Art**

**120C. Late Antique Art**

**120D. Prehistoric Art**

**121AN. The Idea of Medieval Art**

**121B. Castles, Cathedrals, and Cities**

**121D.\* The Illuminated Manuscript in the Middle Ages**

**128A. Topics in Pre-Modern Art History**

**129A.\* Seminar in Pre-Modern Art History**

**B. European Early Modern: Renaissance and Baroque**

**122AN. Renaissance Art**

**122CN. Defining High Renaissance Art**

**122D. Michelangelo**

**122GS. The City in Italy**

**122F.\* Leonardo's La Gioconda**

**123AN. Between Spirit and Flesh: Northern Art of the Early Renaissance**

**123BN.\* Jan van Eyck**

**124AN. Baroque Art**

**128B. Topics in Early Modern Art History**

**129B.\* Seminar in Early Modern Art History**

**C. Modern and Contemporary**

**124BN. Art and the Enlightenment**

**124CN. Nineteenth Century Art**

**125A. Twentieth Century Art**

**125BN.\* Contemporary Art**

**125DN.\* Marcel Duchamp**

**125F. Latin American Film**

**128C. Topics in Modern Art History**

**129C.\* Seminar in Modern Art History**

**158. Histories of Photography**

**159/ICAM 150. History of Art and Technology**

**D. Arts of the Americas**

**126AN. Pre-Columbian Art of Ancient Mexico and Central America**

**126BN. The Art and Civilization of the Ancient Maya**

**126C.\* Problems in Mesoamerican Art History**

**126D.\* Problems in Ancient Maya Iconography and Inscriptions**

**126HN. Pacific Coast American Indian Art**

**126I. Southwest American Indian Art**

**126J. African and Afro-American Art**

**126K. Oceanic Art**

**126P. Latin American Art, 1890–1950**

**126Q. Latin American Art, 1950–Present**

**126R. Latin American Photography**

**128D. Topics in Art History of the Americas**

**129D.\* Seminar in Art History of the Americas**

**E. Arts of Asia**

**127B. Arts of China**

**127C. Arts of Modern China**

**127D.\* Early Chinese Painting**

**127E.\* Later Chinese Painting**

**127F.\* Japanese Buddhist Art**

**127G.\* Twentieth-Century Chinese Art**

**127N. Twentieth-Century Art in China and Japan**

**127P. Arts of Japan**

**127Q.\* Japanese Paintings and Prints**

**128E. Topics in Art History of Asia**

**129E.\* Seminar in Art History of Asia**

**F. Theory**

**113BN.\* History of Criticism II: Early Twentieth Century (1900–1950)**

**113CN.\* History of Criticism III: Contemporary (1950–Present)**

**117A.\* Narrative Structures**

**117B.\* Theories of Representation**

**117E.\* Problems in Ethnoaesthetics**

**117F. Theorizing the Americas**

**117G. Critical Visual Theory and Practice since 1980**

**117H. Constructing Gender in Fifth-Century BC Athens and Eighteenth-Century France**

**117I.\* Western and Non-Western Rituals and Ceremonies**

**128F. Topics in Art Theory and Criticism**

**129F.\* Seminar in Art Theory and Criticism**

\*seminar

Students must take at least three upper-division seminars in addition to VIS 112. These three additional seminars may come from any area and be taken in fulfillment of the distribution requirements or as open electives.

In accordance with standard university policy, the department requires that students take two-thirds of the upper-division courses in their major at UCSD. The distribution requirement must be fulfilled with courses taken at UCSD. Courses taken abroad or at other U.S. institutions do not count towards, and will not be substituted for, the six-course distribution requirement.

**GROUP III—Electives**

Five courses.

Students are required to take five upper-division courses in addition to VIS 111, VIS 112, and those used to fulfill the distribution requirements. At least three of these must be courses in art history or theory. For the remaining two, choose from the following:

- Any upper-division art history course(s) in history or theory
- any upper-division course(s) in media history and criticism (e.g., VIS 150, 151, 152, 153, 154, 155, 156N, 157);
- up to two upper-division courses in studio or media production; or
- with permission of art history faculty advisor, one upper-division course in a related department or program such as anthropology, history, literature, or critical gender studies.

- two two-unit curatorial practices workshop courses (VIS 128P) count as one course towards the fulfillment of an elective.

**Honors Program in Art History**

**129G.\* Art History Honors Seminar**

**129H.\* Art History Honors Directed Group Study**  
\*seminar

The completion of both the Art History Honors Seminar and the Art History Honors Directed Group Study counts as one course towards the fulfillment of the Group III requirement.

Students who meet the criteria may, with permission of the art history faculty advisor or the Art History Honors Seminar instructor, enroll in the Art History Honors Program during the last quarter of their junior year or as a senior. This program is open to juniors and seniors who meet eligibility requirements. Please consult with the departmental advisor for these requirements.

**MEDIA MAJOR**

With a visual arts foundation, the program is designed for students who want to become creative videomakers, filmmakers, photographers, and computer artists, encouraging the hybridity of media. The curriculum combines hands-on experience of making with practical and theoretical criticism, provides historical, social, and aesthetic backgrounds for the understanding of modern media, and emphasizes creativity, versatility, and intelligence over technical specializations. It should allow students to go on to more specialized graduate programs in the media arts, to seek careers in film, television, computing, or photography, or to develop as independent artists. All media majors should see the Visual Arts Undergraduate advisor upon entrance into UCSD.

**FOUNDATION LEVEL—Lower-Division**

Six courses required.

**Group A**

**1 or 2 or 3. Introduction to Art Making**

**22. Formations of Modern Art**

**84. History of Film**

**Group B**

**40/ICAM 40. Introduction to Computing in the Arts**

**670. Introduction to Digital Photography**

**70N. Introduction to Media**

All six courses listed under Groups A and B above are required. VIS 70N is prerequisite for use of the Media Center facilities; no further production courses may be taken until VIS 70N is completed.

**INTERMEDIATE LEVEL—Upper-Division**

Nine courses required: six from Group A and three from Group B.

**Group A**

Two courses required. Required courses for all emphases:

**111. Structure of Art**

**174. Media Sketchbook**

## Choose One Emphasis

Four courses required.

### Computing Emphasis

Three courses plus one from photography or video and digital cinema.

140/ICAM 101. Digital Imaging: Image and Interactivity

145A/ICAM 102. Time- and Process-Based Digital Media I

147A. Electronic Technologies for Art I

### Photography Emphasis

Two courses plus two from computing or video and digital cinema.

164. Photographic Strategies

165. Camera Techniques

### Video and Digital Cinema Emphasis

Three courses plus one from computing or photography.

171. Digital Cinema—Theory and Production

175. Editing—Theory and Production

176. 16mm Filmmaking

177. Scripting Strategies

178. Sound—Theory and Production

## GROUP B—History, Criticism, and Theory

Three courses required.

113BN. History of Criticism II: Early Twentieth Century (1900–1950)

113CN. History of Criticism III: Contemporary (1950–Present)

117B. Theories of Representation

150. History of Silent Cinema

151. History of Experimental Film

152. Film in Social Context

153. The Genre Series

154. Hard Look at the Movies

155. The Director Series

156N. Special Problems in Film History and Theory

157. Video History and Criticism

158. Histories of Photography

159/ICAM 150. History of Art and Technology

**Note:** Any courses in the art history distributional requirement may be taken to fulfill the Group B requirement.

VIS 158 is required for all students with a photography emphasis.

VIS 159/ICAM 150 is required for all students with a computing emphasis.

## ADVANCED LEVEL—Upper Division

Five courses required.

180A. Documentary Evidence and the Construction of Authenticity in Current Media Practices

180B. Fiction and Allegory in Current Media Practices

183A. Strategies of Self

183B. Strategies of Alterity

Three of the above are required for the photography and video and digital cinema emphases and two are required for the computing emphasis. The A and B portion of VIS 180 and VIS 183 courses cannot be taken concurrently.

## Electives

Three courses required.

### Computing Emphasis

Three courses required.

145B. Time- and Process-Based Digital Media II

147B. Electronic Technologies for Art II

149/ICAM 130. Seminar in Contemporary Computer Topics

### Photography Electives

Two courses required.

166. Advanced Camera Techniques

167. Social Engagement in Photography

168. Color Techniques in Photography

### Video and Digital Cinema Electives

Two of the courses below required.

181. Sound and Lighting

182. Advanced Editing

184. Advanced Scripting

If not taken previously, one of the 180A, 180B, 183A, or 183B courses may be used toward the upper-division elective requirement.

Students must have senior standing before any of the following four courses may be taken and instructor approval is required to enroll.

109. Advanced Projects in Media

131. Special Projects in Media

132. Installation Production and Studio

197. Media Honors Thesis

**Note:** Enrollment in production courses is limited to two per quarter. Production courses are numbered VIS 109, 131, 132, 140/ICAM 101, 145A/ICAM 102, 145B, 147A-B, 164–184.

## INTERDISCIPLINARY COMPUTING AND THE ARTS (ICAM)

The Interdisciplinary Computing and the Arts major in the Departments of Music and Visual Arts draws upon, and aims to bring together, ideas and paradigms from computer science, art, and cultural theory. It takes for granted that the computer has become a metamedium and that artists working with computers are expected to combine different media forms in their works. All of this makes the program unique among currently existing computer art or design programs which, on the one hand, usually focus on the use of computers for a particular media (for instance, specializing in computer animation, or computer music, or computer design for print) and, on the other hand, do not enter into a serious dialogue with current research in computer science, only teaching the students “off-the-shelf” software.

The program also recognizes that creating sophisticated artistic works with computers requires a new model of the creative process, one which combines traditional artistic procedures with the experimental research characteristic of the sciences. All in all, it aims to train a new type of cultural producer, who is familiar with art and media history, who is equally proficient with computer programming and artistic skills, who is always ready to learn new technologies, and who is comfortable interacting with scientists and computer industry resources.

The goals of the program are

- to prepare the next generation of artists who will be functioning in a computer-mediated culture

- to give students necessary technical, theoretical, and historical backgrounds so they can contribute to the development of new aesthetics for computer media
- to prepare students to mediate between the worlds of computer science and technology, the arts, and the culture at large by being equally proficient with computing and cultural concepts
- to give students sufficient understanding of the trajectories of development in computing so they can anticipate and work with the emerging trends, rather than being locked in particular software currently available on the market

## Lower-Division

Eight courses required.

### Arts

Four courses required.

MUS 4. Introduction to Western Music

VIS 1. Introduction to Art-Making: Two-dimensional Practices

VIS 22F. Formations of Modern Art

VIS 77N. Introduction to Media

### Computer Science

One course required.

CSE 11. Introduction to Computer Science: JAVA

**Note:** CSE 11 is an accelerated course in the JAVA programming language. CSE 8A/8L and 8B, which cover the same material in a non-accelerated format, may be substituted.

### Mathematics

Two courses required.

Math. 20A. Calculus for Science and Engineering

Math. 20B. Calculus for Science and Engineering

**Note:** MATH 20A and 20B are accelerated calculus courses for Science and Engineering. MATH 10A, 10B, and 10C, which cover similar material in a non-accelerated format, may be substituted.

### Computing and the Arts

One course required.

ICAM 40/VIS 40. Introduction to Computing in the Arts

## Upper-Division

Twelve courses required.

### Survey

One course required.

ICAM 110. Computing in the Arts: Current Practice Foundation

Three courses required.

ICAM 101/VIS 140. Digital Imaging: Image and Interactivity

ICAM 102/VIS 145A. Time- and Process-Based Digital Media I

ICAM 103/MUS 170. Musical Acoustics

### Advanced

Four courses required.

Choose three from

ICAM 120. Virtual Environments

### ICAM 130/VIS 149. Seminar in Contemporary Computer Topics

VIS 109. Advanced Projects in Media

VIS 131. Special Projects in Media

VIS 132. Installation Production and Studio

VIS 141A. Computer Programming for the Arts I

VIS 147A. Electronic Technologies for Art I

VIS 174. Media Sketchbook

MUS 171. Computer Music I

MUS 173. Audio Production: Mixing and Editing

MUS 174A-B-C. Recording/MIDI Studio Techniques

MUS 175. Musical Psychoacoustics

MUS 176. Music Technology Seminar

Choose one from

VIS 141B. Computer Programming for the Arts II

VIS 145B. Time- and Process-Based Digital Media II

VIS 147B. Electronic Technologies for Art II

MUS 172. Computer Music II

### Theory and History

Two courses required.

ICAM 150/VIS 159. History of Art and Technology

and one of

VIS 150. History of Silent Cinema

VIS 151. History of the Experimental Film

VIS 152. Film in Social Context

VIS 153. The Genre Series

VIS 154. Hard Look at the Movies

VIS 155. The Director Series

VIS 156N. Special Problems in Film History and Theory

VIS 157. Video History and Criticism

VIS 158. Histories of Photography

VIS 194. Fantasy in Film

MUS 111. Topics/World Music Traditions

MUS 114. Music of the Twentieth Century

### Senior Project

Two courses required.

ICAM 160A. Senior Project in Computer Arts I

ICAM 160B. Senior Project in Computer Arts II

**Note:** Enrollment in production courses is limited to two per quarter. Production courses are numbered VIS 109, 131, 132, 140/ICAM 101, 141A-B, 145A/ICAM 102, 145B, 147A-B, 174. ICAM 120, 160A-B.

### MASTER OF FINE ARTS PROGRAM

The program is designed to provide intensive professional training for the student who proposes to pursue a career within the field of art—including art making, criticism, and theory. The scope of the UC San Diego program includes painting, sculpture, performance, installation art, public art, photography, film, video, and digital media. The program is unique in that the course of study provides for and encourages student mobility within this range of traditional and media-based components. It also offers opportunities for collaborative work.

The educational path of students is focused around their particular interests in art. The department seeks to provide an integrated and comprehensive introduction to the possibilities of contemporary art production, the intellectual structures that underlie them, and the “world view” which they entail. All art-making activities are considered serious intellectual endeavors, and all students in the program find themselves confronted by the need

to develop their intellectual and critical abilities in working out their artistic positions. A body of theory-oriented courses is required. Therefore, we have no craft-oriented programs or facilities; nor do we have any courses in art education or art therapy. The courses offered are intended to develop in the student a coherent and informed understanding of the past and recent developments in art and art theory. The program also provides for establishing a confident grasp of contemporary technological possibilities, including those involved in film, video, photography, and the electronic media.

The program includes formal education in lecture and seminar courses as well as study groups, studio meetings, independent studies, and quarterly departmental critiques. Course work is intended to place art making in critical and intellectual context but doesn't underestimate the central importance of the student's own work. In fact, this aspect of the student's activity is expected to be self-motivated and forms the core around which the program of study operates and makes sense.

No two students will necessarily follow the same path through the degree program, and the constitution of individual programs will depend upon the analysis of their individual needs and interests, worked out by students in collaboration with their individual faculty advisors.

### Admission Requirements

**Grade-Point Average**—An overall GPA of 3.00 and a 3.50 in a student's undergraduate major is required.

**Art History**—Students are expected to have had at least four semester courses or six quarter courses in art history and/or film history/criticism at the undergraduate level. Those who have a broader art history background will have a better chance of being awarded teaching assistantships. Students without this requirement can be admitted, but they may be expected to make up the six courses in excess of the seventy-two units required for the degree. If there are questions concerning this requirement, check with the department student affairs advisor.

**Statement**—Students are required to submit an essay of one-to-three pages on the direction of their work and its relationship to contemporary art. This essay should be critical in nature, refer explicitly to the student's own work, and may refer to other artists, recent events in art history, and issues in domains other than art that have bearing on the student's process, thought, and work.

**Work**—Students are asked to submit documentation of their best work and upload images and files into our online portfolio Web site. Access to the website is given once a UCSD online application has been filed through the Office of Graduate Studies.

### REGULAR UNIVERSITY ADMISSION POLICIES

*Please note that no application will be processed until all required information has been received.* Students should submit applications with the application fee to the graduate admissions office using the UCSD online application on or before Tuesday, January 18, 2011. Official transcripts should be sent directly to the department and postmarked no later than January 18, 2011. The statement of purpose

and letters of recommendation must be sent electronically through the online application.

### REQUIREMENTS FOR THE DEGREE

The M.F.A. is considered a terminal degree in studio work, and is a two- to three-year program. The following requirements must be completed in order to receive the M.F.A.:

**First Year Review**—This review takes place in the third quarter in residence. Students make a formal presentation of their work to a faculty committee; this includes a position paper and an oral examination. This presentation is considered a departmental examination, and if at its conclusion the student's work is judged to be inadequate, the student may be dismissed regardless of GPA, or may be reviewed again in the fourth quarter.

Seventy-two units of course work, including a four-unit apprentice teaching course, are required. Students may select sixteen of these units (four courses) from upper-division undergraduate course offerings. (See listings in this catalog.) There are six required Visual Arts core seminars:

- Contemporary Critical Issues (VIS 201)
- Art Practice Seminar (VIS 202)
- Working Critique Seminar (VIS 203)
- Introduction to Graduate Studies in Art Practice (VIS 205)
- one course in either Art Practice/Theory group or the Art History/Theory/Criticism group
- one additional seminar in Art Practice/Theory group (VIS 210-219)

Specific information on other course distribution requirements can be obtained from the department. One additional graduate course is required and must be taken in another department.

Students who remain registered in the third (optional) year must average one graduate course per quarter.

### THE M.F.A. FINAL PRESENTATION

**Presentation of Work**—During the last quarter in residence, each student is required to present to the public a coherent exhibition or screening of his or her work.

**Oral Examination**—A committee of three Department of Visual Arts faculty members and one faculty member from another department will administer an oral examination to each student covering the student's work and its relationship to the field of art.

**Thesis**—Students are required to submit some form of written work for the M.F.A. degree. Four options are available:

1. Catalog—The student would design and have printed an actual catalog. This would include a critical essay of approximately 1,500 words.
2. Critical paper—The student would write a critical paper of 3,000 words analyzing his or her process and the relationship of his or her work to recent art history, with references to contemporary styles and specific artists.
3. Analytical essay on some phase of art—Students who have focused on both art production and art

criticism would write a 3,000 word critical essay on any current art position. A brief discussion (750 words) of the student's work would also be included.

4. Critical thesis—Students whose emphasis is essentially criticism and who do not present an M.F.A. exhibition would write a forty- to fifty-page thesis—the topic to be decided by the student and his or her advisor.

Additional information can be obtained from the graduate office of the Department of Visual Arts.

## PH.D. PROGRAM

The Department of Visual Arts offers the Ph.D. degree in art history, theory, and criticism with concentrations in any of the areas in which faculty do research (see below). Offering a distinct alternative to existing Ph.D. programs in art history, the program centers on a unique curriculum that places art objects and practice at the center of inquiry, both past and present, and encompassing fine art, media, and mass culture, even as it encourages examination of the larger frameworks—historical, cultural, social, intellectual, and theoretical—within which the category “art” has been contextualized in the most recent developments in the discipline.

This program is also distinctive in that it is housed within a department that has been for many years one of the nation's leading centers of art practice and graduate education in studio, media, and—most recently—digital media. The offering of the Ph.D. and M.F.A. degrees is based on the department's foundational premise that the production of art and the critical, theoretical, and historical reflection upon it inherently and necessarily participate in a single discursive community. This close integration of art history and art practice is reflected in the inclusion of a concentration in art practice within the Ph.D. in art history, theory, and criticism.

The innovative character of this program is most evident in a unique curricular structure that is broadly organized into three groups of seminars. The importance of critical theory to the field today is reflected in the seminars under the **Theories/New Visions** group, while the study of art in its concrete historical, social, and cultural contexts, across different cultures and media, is emphasized in time, place, and media specific seminars listed under **Times/Terrains**.

The program builds most distinctively on recent developments in the field in the seminars under the heading **Categories/Constructs**. These seminars address the core questions about artworks and practices that the department believes every doctoral student in art and media history, whatever his or her area of specialization, should engage. How is the category “art” itself produced, now and in the past, in the urbanized West and in other cultures, in the context of ever-changing technologies? How are artistic identities constructed across distinct epochs and societies, and with reference to categories such as gender and ethnicity? What are the circumstances and contexts (social, intellectual, institutional, and the like) within which art is both produced and disseminated? What are the alternative modes of engaging art objects and practices and what are the histories and theoretical assumptions of the

specialized discourses used to describe and analyze them?

Seminars in the **Categories/Constructs** group are unique in the degree to which they foreground the self-critical turn in recent art and media history by making reflection upon the central concepts, constructs, categories, and languages of art historical inquiry a key programmatic concern. They are also distinctive in that they are designed to cut across traditional categories of history and contemporaneity, art and media (film, video, photography, digital media), history and theory, and to promote cross-cultural inquiry insofar as they center on questions crucial to the study of art of diverse cultures as well as diverse art forms and historical epochs.

## ADMISSION

Applicants may apply to the Ph.D. program only. The policy of UCSD is to admit in the fall quarter only. Applications for admission must be postmarked January and selections will be made by April 1. For circumstances under which the M.A. is granted, see below. Prior to matriculation, students must have obtained a bachelor's or master's degree in art history, art practice, or another field approved by the departmental committee on graduate studies, such as (but not limited to) history, literature, anthropology, or philosophy.

Applicants must submit their academic transcripts, scores on the Graduate Record Examination, three letters of recommendation, a statement of purpose (no more than 750 words), and a sample of written work (e.g., senior honors thesis, M.A. thesis, or other research or critical paper, preferably in art or media history). An overall GPA of 3.00 and a 3.50 in a student's undergraduate major are required. The Test of English as a Foreign Language (TOEFL) is required for international applicants. Applicants must have a good reading knowledge of at least one foreign language at the time they enter the program.

Please note that no application will be processed until all required information has been received. Students should submit applications with the application fee to the graduate admissions office on or before Tuesday, January 11, 2011. The Statement of Purpose and letters of recommendation must be submitted online along with the application. Official transcripts should be sent directly to the department and postmarked no later than Tuesday, January 11, 2011. Students are asked to upload their writing samples and images (for art practice concentration) into our online portfolio Web site. Access to the Web site is given once a UCSD online application has been filed through the Office of Graduate Studies.

## AREAS OF CONCENTRATION

During the first year of study, each student must declare an area of major concentration in consultation with his or her individual faculty advisor and with the approval of the Ph.D. graduate advisor. The major concentration may be selected from the following: ancient art; medieval art; Renaissance art; early modern art; modern art (nineteenth and twentieth centuries); contemporary art; media studies (film, video, photograph, digital media); Meso-American art; and art practice. A student may also choose, in consultation with his or her advisor and the Ph.D. graduate advisor, a field of emphasis that

cuts across the areas within the department (e.g., art or media theory and criticism) or, with appropriate approvals, one that involves another department (e.g., early modern art history and history). Once the field of emphasis is established, it will be the responsibility of the student and his or her advisor to devise a program of courses, independent study and outside reading, over and above the required program, that will ensure that the student will attain command of the major field of emphasis.

## COURSE WORK

A normal full-time program consists of twelve units per quarter. Prior to the qualifying examination, students will be expected to complete eighty-four units, equivalent to twenty-one four-unit courses (normally accomplished in seven to nine quarters). This twenty-one-course requirement will normally be satisfied by a combination of graduate seminars, reading courses, independent studies, and apprentice teaching. No more than three may be apprentice teaching; no more than two may be reading courses; and no more than two may be graduate seminars in art practice or art practice/theory. By reading course, we mean an upper-division undergraduate course that a student takes with additional reading and writing requirements. Full-time study is expected. Graduate seminars in art history, theory, and criticism should comprise the bulk of the student's twenty-one-course requirement.

All students are required to take VIS 204, Re-Thinking Art History, in their first year of study. For students in the art practice concentration, VIS 206, Seminar in Art Practice Research, must also be taken in their first year of study. Students must also take, at some point, two seminars from the Art Practice/Theory group, VIS 210-VIS 219. One four-unit apprentice teaching course, VIS 500, is also required.

In order to ensure that students attain a reasonable measure of historical and cultural breadth, all students are required to take one seminar from at least four of the following areas: 1) ancient or medieval art; 2) Renaissance or early modern art; 3) modern or contemporary art; 4) media studies; 5) non-Western art.

If a student has completed some graduate work in art history, theory, and criticism before entering UCSD, there may be some appropriate adjustments in course work as approved by petition to the Ph.D. graduate advisor and the department chair.

## FOREIGN LANGUAGE REQUIREMENTS

Students will be required to demonstrate reading knowledge of at least two of the foreign languages required for advanced study in art history, theory, and criticism. One should be the language most directly relevant to the student's area of specialization. The student and his or her individual advisor will jointly determine the examination languages.

Foreign language requirements will normally be satisfied by passing examinations requiring sight translation of texts in art history, theory, and criticism. Students are required to pass their entering language examination in order to be advanced to their second year in the program. The first-year language examination will be offered during the fall quarter of the entering year. The second required language examination will be offered during the fall

quarter of the second year in the program. Students must pass both language examinations by the end of their second year to continue in the program.

## EXAMINATIONS

No later than the first quarter of the third year, the student, in consultation with his or her individual advisor, will form a qualifying examination committee that will consist of four members drawn from the visual arts department faculty and one tenured faculty member outside the department. The composition of the qualifying examination committee and the dissertation defense for students in the Art Practice degree program is: four department faculty (two art history, theory, and criticism faculty, and at least one tenured studio faculty) and one tenured faculty member outside the department. This committee will conduct the qualifying examination required by university policy and oversee completion of the dissertation. The membership of the committee must be approved by the Ph.D. graduate advisor and ultimately the dean of Graduate Studies. The qualifying examination will consist of a three-hour written examination, followed within the next two days by a two-hour oral examination, in the student's major field. A student must have completed all required course work and passed all language examinations before taking the qualifying examination, which will be held no later than the end of the third year. Upon successful completion of the qualifying examination, the student will be advanced to candidacy.

A student who fails either the written or the oral examination may petition the committee and Ph.D. graduate advisor to repeat the examination. Any student who fails a second time will not be advanced to candidacy. In some cases, the committee and graduate program director may judge such student eligible to receive a terminal M.A. (see below).

## DISSERTATION

Following successful completion of the qualifying examinations, the student will complete a doctoral dissertation in his or her field of emphasis. Upon selection of the dissertation topic, a colloquium will be held at which the student will present a prospectus that outlines the topic and program of research for discussion by the graduate group and for approval by his or her committee. After the committee has reviewed the finished dissertation, the student will defend his or her thesis orally. Students in the Art Practice concentration will submit a written dissertation that observes the same regulations and conventions, except that its length may be reduced by one quarter. In addition, the student will present the visual component, the nature of which will be decided by the student and his or her committee.

## NORMATIVE TIME FROM MATRICULATION TO DEGREE

The student will normally advance to candidacy in two and one-half to three years and must be advanced to candidacy by the end of four years. He or she will normally complete the research for and writing of the dissertation by the end of his or her sixth year of study. Total university support may not exceed seven years, and total registered time at UCSD may not exceed eight years.

## M.A. DEGREE

All students will apply for and be admitted to the Ph.D. Program. An M.A. degree may be awarded to continuing Ph.D. students upon successful completion of the following: (1) at least twelve four-unit courses, including VIS 204, *Re-Thinking Art History*, and two seminars from the group VIS 210–219; (2) a three-hour written examination in a designated field of emphasis (see “Examinations” above); (3) one language examination; and (4) an M.A. thesis. The M.A. is not automatically awarded; students must apply in advance to the Ph.D. graduate advisor and in accordance with university procedures, no later than the first two weeks of the quarter in which they expect to receive the degree.

Students interested in an M.A. only are not admitted to our program.

## COURSES

*For course descriptions not found in the UC San Diego General Catalog, 2010–11, please contact the department for more information.*

**Note:** The following list of courses represents all visual arts offerings; not all courses offered each year.

### LOWER-DIVISION

#### 1. Introduction to Art-Making: Two-Dimensional Practices (4)

An introduction to the concepts and techniques of art making with specific reference to the artists and issues of the twentieth century. Lectures and studio classes will examine the nature of images in relation to various themes. Drawing, painting, found objects, and texts will be employed. **Prerequisite:** none. This course is offered only one time each year.

#### 2. Introduction to Art-Making: Motion and Time Based Art (4)

An introduction to the process of art making utilizing the transaction between people, objects, and situations. Includes both critical reflection on relevant aspects of avant-garde art of the last two decades (Duchamp, Cage, Rauschenberg, Gertrude Stein, conceptual art, happenings, etc.) and practical experience in a variety of artistic exercises. **Prerequisite:** none. This course is offered only one time each year.

#### 3. Introduction to Art-Making: Three-Dimensional Practices (4)

An introduction to art making that uses as its base the idea of the “conceptual.” The lecture exists as a bank of knowledge about various art world and non-art world conceptual plays. The studio section attempts to incorporate these ideas into individual and group projects using any “material.” **Prerequisite:** none. This course is offered only one time each year.

#### 20. Introduction to Art History (4)

This course examines history of Western art and architecture through such defining issues as the respective roles of tradition and innovation in the production and appreciation of art; the relation of art to its broader intellectual and historical contexts; and the changing concepts of the monument, the artist, meaning, style, and “art” itself. Representative examples will be selected from different periods, ranging from Antiquity to Modern. Content will vary with the instructor. **Prerequisite:** none.

#### 21A. Introduction to the Art of the Americas or Africa and Oceania (4)

Course offers a comparative and thematic approach to the artistic achievements of societies with widely divergent structures and political organizations from the ancient Americas to Africa and the Pacific Islands. Topics vary with

the interests and expertise of instructor. **Prerequisites:** none. Student may not receive credit for VIS 21 and VIS 21A.

#### 21B. Introduction to Asian Art (4)

Survey of the major artistic trends of India, China, and Japan, taking a topical approach to important developments in artistic style and subject matter to highlight the art of specific cultures and religions. **Prerequisites:** none. Student may not receive credit for VIS 21 and VIS 21B.

#### 22. Formations of Modern Art (4)

Wide-ranging survey introducing the key aspects of modern art and criticism in the nineteenth and twentieth centuries, including Neo-Classicism, Romanticism, Realism, Impressionism, Post-Impressionism, Symbolism, Fauvism, Cubism, Dada and Surrealism, Abstract Expressionism, Minimalism, Earth Art, and Conceptual Art. **Prerequisite:** none.

#### 23. Information Technologies in Art History (4)

This seminar introduces fundamentals of art historical practice such as descriptive and analytical writing, compiling annotated bibliographies with traditional and online resources, defining research topics, and writing project proposals. **Prerequisite:** none. Art history majors only.

Note: Prerequisite for VIS 112 and highly recommended for all other seminars. Must be taken within a year of declaring major or transferring into the art history program.

#### 40. Introduction to Computing in the Arts (4)

(Cross-listed with ICAM 40.) An introduction to the conceptual uses and historical precedents for the use of computers in art making. Preparation for further study in the computer arts area by providing overview of theoretical issues related to the use of computers by artists. Introduces the students to the program's computer facilities and teaches them basic computer skills. **Prerequisite:** none. Materials fee required.

#### 60. Introduction to Digital Photography (4)

An in-depth exploration of the camera and image utilizing photographic digital technology. Emphasis is placed on developing fundamental control of the processes and materials through lectures, field, and lab experience. Basic discussion of image making included. **Prerequisite:** none. Materials fee required.

#### 70N. Introduction to Media (6)

Operating as both a lecture and production course, this introductory class provides a technical foundation and theoretical context for all subsequent production-oriented film and video studies. In the laboratory, the student will learn the basic skills necessary to initiate video production. Completion of Visual Arts 70N is necessary to obtain a media card. **Prerequisite:** none. Materials fee required.

#### 84. History of Film (4)

A survey of the history and the art of the cinema. The course will stress the origins of cinema and the contributions of the earliest filmmakers, including those of Europe, Russia, and the United States. **Prerequisite:** none. Materials fee required. This course is offered only one time each year.

#### 87. Freshman Seminar (1)

The Freshman Seminar program is designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminars are offered in all campus departments and undergraduate colleges, and topics vary from quarter to quarter. Enrollment is limited to fifteen to twenty students with preference given to entering freshmen. **Prerequisite:** none.

## UPPER-DIVISION

#### 104A. Performing the Self (4)

Using autobiography, dream, confession, fantasy, or other means to invent one's self in a new way, or to evoke the variety of selves in our imagination, the course experiments with and explores the rich possibilities available to the contemporary artist in his or her own persona. **Prerequisites:** two from VIS 1, 2, 3 and 111.

#### 104BN. Verbal Performance (4)

The course is designed to introduce the student to the part played by language in contemporary performance art.

Monologues, musically derived sound poetry, vocalizations, verbally inscribed installations, and the uses of language and voice in film and video are some of the areas explored. **Prerequisite:** VIS 104A.

#### **104CN. Personal Narrative (4)**

The course will explore primary experiential materials to more fully understand the relationship of voice, style, language, and personality, to issues of memory, identity, self-awareness, and desire. Instructor and student will discuss student work as well as published personal narrative. **Prerequisite:** VIS 104BN.

#### **105A. Drawing: Representing the Subject (4)**

A studio course in beginning drawing covering basic drawing and composition. These concepts will be introduced by the use of models, still life, landscapes, and conceptual projects. **Prerequisites:** two from VIS 1, 2, 3 and 111.

#### **105B. Drawing: Practices and Genre (4)**

A continuation of VIS 105A. A studio course in which the student will investigate a wider variety of technical and conceptual issues involved in contemporary art practice related to drawing. **Prerequisite:** VIS 105A.

#### **105C. Drawing: Portfolio Projects (4)**

A studio course in drawing, emphasizing individual creative problems. Class projects, discussions, and critiques will focus on issues related to intention, subject matter, and context. **Prerequisite:** VIS 105B.

#### **105D. The Aesthetics of Chinese Calligraphy (4)**

This course examines Chinese calligraphy as an art form. This conceptually based introductory course combines fundamental studio exercises with creative explorations. Students are exposed to traditional and contemporary forms of Chinese calligraphy while encouraged to experiment with basic aesthetic grammars. **Prerequisite:** VIS 105A.

#### **105E. Chinese Calligraphy as Installation (4)**

This course concerns East-West aesthetic interactions. What are the conceptual possibilities when calligraphy, an ancient form of Chinese art, is combined with installation, a contemporary artistic Western practice? Emphasis is placed on such issues as cultural hybridity, globalization, multiculturalism, and commercialization. **Prerequisite:** VIS 105D.

#### **106A. Painting: Image Making (4)**

A studio course focusing on problems inherent in painting—transferring information and ideas onto a two-dimensional surface, color, composition, as well as manual and technical procedures. These concepts will be explored through the use of models, still life, and landscapes. **Prerequisites:** two from VIS 1, 2, 3 and 111.

#### **106B. Painting: Practices and Genre (4)**

A continuation of VIS 106A. A studio course in which the student will investigate a wider variety of technical and conceptual issues involved in contemporary art practice related to painting. **Prerequisite:** VIS 106A.

#### **106C. Painting: Portfolio Projects (4)**

A studio course in painting emphasizing individual creative problems. Class projects, discussions, and critiques will focus on issues related to intention, subject matter, and context. **Prerequisite:** VIS 106B.

#### **107A. Sculpture: Making the Object (4)**

A studio course focusing on the problems involved in transferring ideas and information into three-dimensions. Course will explore materials and construction as dictated by the intended object. Specific problems to be investigated will be determined by the individual professor. **Prerequisites:** two from VIS 1, 2, 3 and 111.

#### **107B. Sculpture: Practices and Genre (4)**

A studio course in which the student will investigate a wider variety of technical and conceptual issues as well as materials involved in contemporary art practice related to sculpture. **Prerequisite:** VIS 107A.

#### **107CN. Sculpture: Portfolio Projects (4)**

A studio course in sculpture emphasizing individual creative problems. Class projects, discussions, and critiques will focus on issues related to intention, subject matter, and context. **Prerequisite:** VIS 107B.

#### **108. Advanced Projects in Art (4)**

A studio course for serious art students at the advanced level. Stress will be placed on individual creative problems. Specific orientation of this course will vary with the instructor. Topics may include film, video, photography, painting, performance, etc. May be repeated twice for credit. **Prerequisite:** consent of instructor, department stamp required.

#### **109. Advanced Projects in Media (4)**

Individual or group projects over one or two quarters. Specific project organized by the student(s) will be realized during this course with instructor acting as a close advisor/critic. Concept papers/scripts must be completed by the instructor prior to enrollment. **Prerequisites:** VIS 180A and VIS 180B for media majors, or consent of instructor for ICAM majors. Open to media and ICAM majors only. Two production course limitation.

#### **110A. Contemporary Issues and Practices (4)**

An examination of contemporary studio art practice. The course is divided among research, discussion, and projects. Field trips to galleries and discussions with artists will combine with the students moving their work into a dialogue with the issues raised. **Prerequisites:** two from VIS 104CN, 105C, 106C, 107CN and 147B.

#### **110B. New Genre/New and Old Technologies (4)**

Advances the idea of different materials, methods, and practices raised at the intermediate level in drawing, painting, and sculpture, and explores and utilizes new and traditional media in studio production of work. Emphasis on multiple media, combining traditional and electronic media, as well as different genres, in an attempt to create new directions for the student's ideas. **Prerequisites:** two from VIS 104CN, 105C, 106C, 107CN and 147B.

#### **110C. Proposals, Plans, Presentations (4)**

Explores the use of the maquette, or sketch, in the process of developing, proposing and planning visual works in various media for public projects, site specific works, grants, exhibition proposals, etc. The student will work on synthesizing ideas and representing them in alternate forms that deal with conception, fabrication and presentation. **Prerequisites:** two from VIS 104CN, 105C, 106C, 107CN and 147B.

#### **110D. Visual Narrative/Tableau (4)**

Examination and use of multimedia in exploring narrative issues in art making. The identification of subject leads to the determination of choice or mix of media and construction of narrative. Traditional studio practice surrounding narrative painting and sculpture, forms such as comic drawing or story boards, and the use of photo, video, and computing. **Prerequisites:** two from VIS 104CN, 105C, 106C, 107CN, or 147B, or consent of instructor

#### **110E. Art in Public Space/Site-Specific Art (4)**

Course takes painting, sculpture, and related media out of the studio/gallery and into the public sphere by examining the contemporary history of public artworks with traditional and nontraditional site-specific work, focusing on production, critical discussion, and writing. **Prerequisites:** two from VIS 104CN, 105C, 106C, 107CN, or 147B, or consent of instructor.

#### **110F. Installation: Cross-Disciplinary Projects (4)**

Attempts to expand the idea contained in a singular work, or object, into the use of multiple objects, images, and media that redefines the idea as well as the space for which it is intended. Examination of historic, modern, and contemporary works would be brought into discussion of project development and execution. **Prerequisites:** two from VIS 104CN, 105C, 106C, 107CN and 147B.

#### **110G. The Natural and Altered Environment (4)**

Explores the natural and altered environment as a basis for subject as well as placement of work pertaining to the environment. **Prerequisites:** two from VIS 104CN, 105C, 106C, 107CN and 147B.

#### **110H. Image and Text Art (4)**

Devoted to the study and practice of the multiple ways in which writing and other forms of visible language have been incorporated into contemporary and traditional artworks, including artists' books, collaging and poster art, visual and concrete poetry, typographical experiments, and

calligraphies. **Prerequisites:** two from VIS 104CN, 105C, 106C, 107CN and 147B.

#### **110I. Performing for the Camera (4)**

The dematerialization of the performer into a media based image—video, film, slides, still photographs, using the camera as a spy, a co-conspirator, a friend or a foe—employing time lags, spatial derangement, image deconstruction, along with narrative, text, history, to invent time based pieces that break new ground while being firmly rooted in an understanding of the rich body of work done in this area over the last three decades. **Prerequisites:** two from VIS 104CN, 105C, 106C, 107CN and 147B.

#### **110J. Ritual Performance (4)**

The course will explore forms of art making that use dream and myth, body art, dance, social drama, happenings, story telling, and enactments of contemporary and traditional forms of performance art that involve a crossing of the lines between different arts and genres. **Prerequisites:** two from VIS 104CN, 105C, 106C, 107CN and 147B.

#### **110K. Installation Performance (4)**

The artist as performer working with materials, objects, props, technology, to create multi-layered, experimental, interesting three-dimensional art spaces in which the artist's body, voice, actions, or memory, moves through, enlivens, or haunts the physical space. **Prerequisites:** two from VIS 104CN, 105C, 106C, 107CN and 147B.

#### **110M. Studio Honors I (4)**

An advanced studio course intended for the productive, motivated, and self-disciplined student with a clear and unified body of work. The intent is to help refine and expand the student's work and ideas towards an exhibition and verbal written position. **Prerequisite:** consent of the instructor, department stamp required. Note: The Studio Honors I and the attached Studio Honors II count as one course toward the fulfillment of a Group IV requirement.

#### **110N. Studio Honors II (4)**

The second advanced studio course in the Honors Program in Studio, the successful completion of which will lead towards an honors degree in the studio major. The course builds on the critical and technical issues raised in Studio Honors I. **Prerequisite:** VIS 110M.

#### **111. The Structure of Art (4)**

This course will address the structure of signification in art. We will consider the modes of signification in a wide range of representational and nonrepresentational artworks from architecture through drawing, painting, sculpture, photography, video, and film to performance. Examples will be selected from various places and epochs. This course is required for transfer students. This course is offered during winter quarter only.

#### **112. Art Historical Methods (4)**

A critical review of the principal strategies of investigation in past and present art-historical practice, a scrutiny of their contexts and underlying assumptions, and a look at alternative possibilities. The various traditions for formal and iconographic analysis as well as the categories of historical description will be studied. Required for all art history and criticism majors. **Prerequisites:** VIS 23 and one upper-division art history course; two recommended.

#### **113AN. History of Criticism I: Early Modern (4)**

Introducing Classical, Medieval, and Renaissance theories of the image, we concentrate on developments in the eighteenth and nineteenth centuries: Neo-Classicism, Romanticism, Realism, and Symbolism. **Prerequisite:** one from VIS 20, VIS 21A, VIS 21B, VIS 22 or upper-division standing.

#### **113BN. History of Criticism II: Early Twentieth Century (1900–1950) (4)**

The principal theories of art and criticism from Symbolism until 1945: formalism and modernism, abstraction, Surrealism, Marxism, and social art histories, phenomenology, existentialism. **Prerequisite:** none; VIS 112 or two upper-division courses in art history strongly recommended.

#### **113CN. History of Criticism III: Contemporary (1950–Present) (4)**

Recent approaches to the image in art history and visual culture: structuralism, semiotics, psychoanalysis,

post-structuralism, post-modernism, feminism, post-colonialism, cultural studies. **Prerequisite:** none; VIS 112 or two upper-division courses in art history strongly recommended.

#### 117A. Narrative Structures (4)

How can a fixed image represent events in time? The strategies of storytelling and their consequences for the meaning of works of art will be investigated. Content of the course will vary. May be repeated twice for credit with permission of the instructor. **Prerequisite:** none; VIS 112 or two upper-division courses in art history strongly recommended.

#### 117B. Theories of Representation (4)

A discussion of major Western theories of representation with a critique of their applicability to art. Material is drawn from a wide variety of historical periods from Antiquity to Modern. Emphasis is given to theories special significance for art history, but some attention is given to representation theories in other contexts. Readings may include selections from such modern theorists as Peirce, Panofsky, Gombrich, Bernheimer, Barfield, Barthes, Goodman, Foucault, Bryson, Summers, and Mitchell and from classic texts by Plato, Aristotle, John of Damascus, Alberti, and Leonardo. **Prerequisite:** none; one or more upper-division courses in art history strongly recommended. Note: Majors must have taken VIS 23.

#### 117E. Problems in Ethnoaesthetics (4)

This seminar will address and critique various approaches to studying the art of non-Western societies with respect to their own aesthetic and cultural systems. Students are encouraged to explore comparative philosophies of art and test paradigms of Western aesthetic scholarship. **Prerequisite:** none; VIS 21A or 21B or 112 or two upper-division courses in art history strongly recommended.

#### 117F. Theorizing the Americas (4)

Examines the philosophical debates that locate the Americas in relation to the modern world. **Prerequisite:** upper-division standing.

#### 117G. Critical Theory and Visual Practice since 1980 (4)

This seminar will examine key moments in the interaction between the world of art and the world of ideas: the goal is to get you thinking about the whole theory/practice relation, as it connects with your own projects and research. **Prerequisite:** upper-division standing.

#### 117H. Constructing Gender in Fifth-Century BC Athens and Eighteenth-Century France (4)

Ideas concerning gender and sexuality are crucial in every human society, but there are enormous shifts between cultures and historical periods. This course examines the changing cultural constructions of sexuality by examining in detail two very different epochs. **Prerequisite:** upper-division standing.

#### 117I. Western and Non-Western Rituals and Ceremonies (4)

This course will examine the process of image-making within specific ceremonies and/or rituals. Selected ceremonies from West Africa, Melanesia, Nepal, and the United States, including both Christian and non-Christian imagery, will be considered. Performance art and masquerade will be analyzed within a non-Western framework. **Prerequisite:** upper-division standing. VIS 21A recommended. Student may not receive credit for VIS 126F and VIS 117I.

#### 120A. Greek Art (4)

Greek classical civilization was a turning point in the history of humanity. Within a new kind of society, the idea of the individual as free and responsible was forged, and with it the invention of history, philosophy, tragedy, and science. The arts which expressed this cultural explosion were no less revolutionary. The achievements of Greek art in architecture, sculpture, and painting will be examined from their beginnings in the archaic period, to their epoch-making fulfillment in the classical decades of the fifth century B.C., to their diffusion over the entire ancient world in the age of Alexander and his successors. **Prerequisite:** none; VIS 20 recommended.

#### 120B. Roman Art (4)

Roman art was the "modern art" of antiquity. Out of their Italic tradition and the great inheritance of Greek classic and Hellenistic art, the Romans forged a new language

of form to meet the needs of a vast empire, a complex and tumultuous society, and a sophisticated, intellectually diverse culture. An unprecedented architecture of shaped space used new materials and revolutionary engineering techniques in boldly functional ways for purposes of psychological control and symbolic assertion. Sculpture in the round and in relief was pictorialized to gain spatial effects and immediacy of presence, and an extraordinary art of portraiture investigated the psychology while asserting the status claims of the individual. Extreme shifts of style, from the classicism of the age of Augustus to the expressionism of the third century A.D., are characteristic of this period. The new modes of architecture, sculpture, and painting, whether in the service of the rhetoric of state power or of the individual quest for meaning, were passed on to the medieval and ultimately to the modern West. **Prerequisite:** none; VIS 20 recommended.

#### 120C. Late Antique Art (4)

During the later centuries of the Roman Empire, the ancient world underwent a profound crisis. Beset by barbarian invasions, torn by internal conflict and drastic social change, inflamed with religious passion which was to lead to a transformed vision of the individual, the world, and the divine, this momentous age saw the conversion of the Roman world to Christianity, the transfer of power from Rome to Constantinople, and the creation of a new society and culture. Out of this ferment, during the centuries from Constantine to Justinian, there emerged new art forms fit to represent the new vision of an otherworldly reality: a vaulted architecture of diaphanous space, a new art of mosaic which dissolved surfaces in light, a figural language both abstractly symbolic and urgently expressive. The great creative epoch transformed the heritage of classical Greco-Roman art and laid the foundations of the art of the Christian West and Moslem East for the next thousand years. **Prerequisite:** none; VIS 20 or 120B recommended.

#### 120D. Prehistoric Art (4)

Tens of thousands of years before the dawn of history, the hunting peoples of Ice Age Europe invented the first language of visual images. Their painted cave sanctuaries, such as Lascaux and Altamira, are dazzling in their expressive vitality and mystifying in meaning. This course links cave art with what is known about contemporary conditions of nature, society, and human life. **Prerequisite:** none; VIS 20 recommended.

#### 121AN. The Idea of Medieval Art (4)

This course introduces the art and architecture of Western Europe from the fourth through the thirteenth centuries. A leading theme is the changing idea of what "medieval" has come to mean, from the coining of the terms "Middle Ages" and "Dark Ages" by Renaissance humanists, to the Romantic fascination with Gothic ruins, and finally to the fantasy medievalisms of twentieth century popular culture and current approaches to medieval art in art historical scholarship. **Prerequisite:** none; VIS 20 recommended.

#### 121B. Castles, Cathedrals, and Cities (4)

This course explores European art and architecture of the twelfth through the fourteenth centuries against the background of the rituals of chivalry, church, and civic life that made a dazzling spectacle of art and life in the High Middle Ages. **Prerequisite:** upper-division standing; VIS 20 recommended.

#### 121D. The Illuminated Manuscript in the Middle Ages (4)

This seminar charts the changing pictorial problematics presented by the illuminated manuscript from its origins in late antiquity to the disintegration of the manuscript tradition under the impact of the first printed books. Works such as the Book of Kells and the Tres Riches Heures of the Duke of Berry, among the most brilliant achievements of Western painting, are among those considered. **Prerequisite:** none; VIS 112 or two upper-division courses in art history strongly recommended.

#### 122AN. Renaissance Art (4)

Italian artists and critics of the fourteenth through sixteenth centuries were convinced that they were participating in a revival of the arts unparalleled since Antiquity. Focusing primarily on Italy, this course traces the emergence in painting, sculpture and architecture, of an art based on

natural philosophy, optical principles, and humanist values, which embodied the highest intellectual achievement and deepest spiritual beliefs of the age. Artists treated include Giotto, Donatello, Masaccio, Brunelleschi, Jan van Eyck, Mantegna, Botticelli, Leonardo da Vinci, Michelangelo, Raphael, Bramante, Durer, and Titian. **Prerequisite:** none; VIS 20 recommended.

#### 122CN. Defining High Renaissance Art (4)

Since the sixteenth century, the names of Leonardo da Vinci, Raphael, and Bramante have conjured up images of the highest artistic achievement. This course shows the intellectual concerns common to the artist and scientific productions of Leonardo help illuminate the distinctive character of the art of two of his greatest contemporaries. **Prerequisite:** none; VIS 20, 122AN, or 122BN recommended.

#### 122D. Michelangelo (4)

This course offers new approaches to understanding Michelangelo's greatest creations. By considering how each work relates to the setting for which it was intended, by regarding critical literature and artistic borrowings as evidence about the works, and by studying the thought of the spiritual reformers who counseled Michelangelo, new interpretations emerge which show the artist to be a deeply religious man who invested his works with both public and private meanings. **Prerequisite:** upper-division standing; or one of the following courses: VIS 20, 21, 22 or 23; or any upper-division course in art history and criticism or in European history.

#### 122F. Leonardo's La Gioconda (4)

A critical, art historical look at the world's most famous painting and its interpretations. **Prerequisite:** VIS 23. One upper-division course in art history (113AN-129F) is recommended.

#### 123AN. Between Spirit and Flesh: Northern Art of the Early Renaissance (4)

The art of the Early Renaissance in Northern Europe is marked by what appears to be striking conflict: on the one hand, a new love of nature and of the pleasures of court society; and on the other, an intensified spirituality and focus on personal devotion. This course explores these provocative cross-currents in works by master painters like Jan van Eyck and Hieronymus Bosch as well as in lesser known mass-produced objects of everyday use. **Prerequisite:** none; VIS 20, 121AN, and/or 122AN recommended.

#### 123BN. Jan van Eyck (4)

Intensive study of the career of Jan van Eyck, whose magical paintings have always fascinated viewers with their microscopically detailed naturalism and subtly disguised spiritual meanings. Masterpieces such as the Arnolfini Wedding are emphasized. **Prerequisite:** none; VIS 112 or two upper-division courses in art history recommended.

#### 124AN. Baroque Art (4)

This course discusses the achievement of such major artists as Caravaggio, Gentileschi, Bernini, Borromini, Rubens, Rembrandt, Velasquez, and Vermeer within a culture marked by increasing intellectual specialization, the entrenchment of modern national boundaries, the co-existence of rival religious organizations, the formations of artistic academies, and the rise of an art market serving the flourishing middle class. **Prerequisite:** none; VIS 20 recommended.

#### 124BN. Art and the Enlightenment (4)

Eighteenth century artists and critics were convinced that art could be a force to improve society. This course places Rococo and Neo-Classical artists such as Watteau, Fragonard, Tiepolo, Hogarth, Reynolds, Vigee Lebrun, Blake, and David, within the context of art academies, colonialism, the Grand Tour, Enlightenment conceptualizations of history and nature, and the American and French Revolutions. **Prerequisite:** none; VIS 20 or 22 recommended.

#### 124CN. Nineteenth-Century Art (4)

A critical survey discussing the crisis of the Enlightenment, Romanticism, Realism and Naturalism, Academic Art and History Painting, representations of the New World, the Pre-Raphaelites, Impressionism, international Symbolism, Post-Impressionism, and the beginnings of Modernism. **Prerequisite:** none; VIS 20 or 22 recommended.

#### 125A. Twentieth-Century Art (4)

A critical survey outlining the major avant-gardes after 1900: Fauvism, Cubism, Metaphysical Painting, Futurism, Dada, Surrealism, Neo-Plasticism, Purism, the Soviet avant-garde, Socialist Realism, and American art before Abstract Expressionism. **Prerequisite:** none; VIS 20 or 22 recommended.

#### 125BN. Contemporary Art (4)

Art after Abstract Expressionism: Happenings, Post-painterly Abstraction, Minimalism, Performance, Earth Art, Conceptual Art, Neo-Expressionism, Post-Conceptualism and development in the 1990s, including non-Western contexts. We also explore the relation of these tendencies to Postmodernism, Feminism, and ideas of Postcoloniality. **Prerequisite:** none; VIS 20 or 22 recommended.

#### 125DN. Marcel Duchamp (4)

A critical examination of the work of one of the most radical twentieth century artists. In Duchamp's four dimensional perspective, the ideas of art-object, artist, and art itself are deconstructed. The Large Glass and Etant Donnees . . . are the twin foci of an oeuvre without boundaries in which many twentieth-century avant-garde devices such as chance techniques, conceptual art, and the fashioning of fictive identities, are invented. **Prerequisite:** none.

#### 125F. Latin American Film (4)

An overview of film and filmmaking in Latin America and its reception in a national context and beyond. **Prerequisite:** upper-division standing.

#### 126AN. Pre-Columbian Art of Ancient Mexico and Central America (4)

An introduction to the cities and monuments of the ancient civilizations which flourished in Mexico and Central America before the Spanish Conquest. This course will cover the major cultures of Mesoamerica, including the Olmec, Aztec, and neighboring groups. **Prerequisite:** none; VIS 21 recommended.

#### 126BN. The Art and Civilization of the Ancient Maya (4)

This course offers a history of Maya society from its formative stages to the eve of the Spanish Conquest through an investigation of its art and archeology. Special attention is given to its unique calendar and writing systems. **Prerequisite:** none; VIS 21 recommended.

#### 126C. Problems in Mesoamerican Art History (4)

Topics of this seminar will address special problems or areas of research related to the major civilizations of ancient Mexico and Central America. Course offerings will vary to focus upon particular themes, subjects, or interpretive problems. **Prerequisite:** upper-division standing. VIS 21A recommended. Student may not receive credit for VIS 126B and VIS 126C.

#### 126D. Problems in Ancient Maya Iconography and Inscriptions (4)

This seminar focuses upon the art, architecture, and inscriptions of the ancient Maya. Topics will vary within a range of problems that concern hieroglyphic writing, architecture, and visual symbols the Maya elite used to mediate their social, political, and spiritual words. **Prerequisite:** upper-division standing. VIS 21A recommended.

#### 126HN. Pacific Coast American Indian Art (4)

Explores the art and expressive culture of American Indians of far western United States, including California and Pacific Northwest. Social and cultural contexts of artistic traditions and their relations to the lifeways, ceremonialism, beliefs, and creative visions of their makers. **Prerequisite:** upper-division standing. VIS 21A recommended. Student may not receive credit for VIS 126CN and VIS 126HN.

#### 126I. Southwest American Indian Art (4)

Examines the history, art, and architecture of Navajo, Hopi, Zuni, and other Native American communities of New Mexico and Arizona; the origins of their civilization; and how their arts survived, adapted, and changed in response to Euro-American influences. **Prerequisite:** upper-division standing. VIS 21A recommended. Student may not receive credit for VIS 126D and VIS 126I.

#### 126J. African and Afro-American Art (4)

The dynamic, expressive arts of selected West African societies and their subsequent survival and transformation in the New World will be studied. Emphasis will be placed on Afro-American modes of art and ceremony in the United States, Haiti, Brazil, and Suriname. **Prerequisite:** upper-division standing. VIS 21A recommended. Student may not receive credit for VIS 126DN and VIS 126J.

#### 126K. Oceanic Art (4)

An examination of the relation of art to ritual life, mythology, and social organization in the native Polynesian and Melanesian cultures of Hawaii, New Guinea, the Solomon Islands, and Australia. **Prerequisite:** upper-division standing. VIS 21A recommended. Student may not receive credit for VIS 126E and VIS 126K.

#### 126P. Latin American Art: Modern to Postmodern, 1890–1950 (4)

A survey of major figures and movements in Latin American art from the late-nineteenth century to the mid-twentieth century. **Prerequisite:** upper-division standing.

#### 126Q. Latin American Art: Modern to Postmodern, 1950–Present (4)

A survey of major figures and movements in Latin American art from the mid-twentieth century to the present. **Prerequisite:** upper-division standing.

#### 126R. Latin American Photography (4)

An overview of the history of photography, concentrating on developments in Latin America. **Prerequisite:** upper-division standing.

#### 127B. Arts of China (4)

Course will survey major trends in the arts of China from a thematic point of view, explore factors behind the making of works of art, including political and religious meanings, and examine contexts for art in contemporary cultural phenomena. **Prerequisite:** upper-division standing. VIS 21B recommended.

#### 127C. Arts of Modern China (4)

Course will explore Chinese art of the twentieth century. By examining artworks in different media, we will investigate the most compelling of the multiple realities that Chinese artists have constructed for themselves. **Prerequisite:** upper-division standing. VIS 21B recommended.

#### 127D. Early Chinese Painting (4)

Explore representations of figures and landscapes from the dawn of Chinese painting through the Yuan dynasty, with stress on developments in style and subject matter and relationships to contemporary issues in philosophy, religion, government, society, and culture. **Prerequisite:** upper-division standing. VIS 21B recommended.

#### 127E. Later Chinese Painting (4)

Explores major schools and artists of the Ming and Qing periods, including issues surrounding court patronage of professional painters, revitalization of art through reviving ancient styles, commercialization's challenges to scholar-amateur art, and the influences of the West. **Prerequisite:** upper-division standing. VIS 21B recommended.

#### 127F. Japanese Buddhist Art (4)

Explore the development of Buddhist art and architecture in Japan. Focus on the role of art in Buddhist practice and philosophy and the function of syncretic elements in Japanese Buddhist art. **Prerequisite:** upper-division standing. VIS 21B recommended.

#### 127G. Twentieth-Century Chinese Art (4)

Through examining artworks in different media, theoretical writings and documentary data, will explore the ways in which Chinese artists of the twentieth century have defined modernity and their own tradition against the complex background of China's history. **Prerequisite:** upper-division standing. VIS 21B recommended.

#### 127N. Twentieth-Century Art in China and Japan (4)

Surveys the key works and developments in the modern art and visual culture of Japan from Edo and Meiji to the present and of China from the early twentieth century to contemporary video, performance, and installation art. **Prerequisite:** upper-division standing. VIS 21B recommended.

#### 127P. Arts of Japan (4)

Course is a survey of the visual arts of Japan, considering how the arts developed in the context of Japan's history and discussing how art and architecture were used for philosophical, religious, and material ends. **Prerequisite:** upper-division standing. VIS 21B recommended.

#### 127Q. Japanese Painting and Prints (4)

Explore major trends in Japanese pictorial art from the seventh century to the nineteenth century, with focus on function, style and subject matter, and with particular emphasis on the relationship between Japanese art and that of continental Asia. **Prerequisite:** upper-division standing. VIS 21B recommended.

#### 128A–F. Topics in Art History and Theory (4)

These lecture courses are on topics of special interest to visiting and permanent faculty. Topics vary from term to term and with instructor and many will not be repeated. These courses fulfill upper-division distribution requirements. As the courses under this heading will be offered less frequently than those of the regular curriculum, students are urged to check for availability and descriptions of these supplementary courses in the annual catalogue listings. Like the courses listed under VIS 129, below, the letters following the course number designate the general area in which the courses fall. Students may take courses with the same number but of different content, with consent of instructor and/or program advisor. May be taken three times for credit. **Prerequisite:** none; courses in art history recommended.

#### 128A. Topics in Pre-Modern Art History (4)

A lecture course on a topic of special interest in ancient or medieval art. **Prerequisites:** upper-division standing; courses in art history (VIS 113AN–129F) are recommended.

#### 128B. Topics in Early Modern Art History (4)

A lecture course on a topic of special interest in Renaissance or Baroque art. May be taken three times for credit. **Prerequisites:** upper-division standing; courses in art history (VIS 113AN–129F) are recommended.

#### 128C. Topics in Modern Art History (4)

A lecture course on a topic of special interest on Modern or Contemporary art. May be taken three times for credit. **Prerequisites:** upper-division standing; courses in art history (VIS 113AN–129F) are recommended.

#### 128D. Topics in Art History of the Americas (4)

A lecture course on the topic of special interest in the Ancient Americas or Africa and the Pacific Islands. **Prerequisite:** upper-division standing. Courses in art history (VIS 113AN–129F) are recommended.

#### 128E. Topics in Art History of Asia (4)

A lecture course on the topic of special interest in India, China, and Japan. **Prerequisites:** upper-division standing. Courses in art history (VIS 113AN–129F) are recommended.

#### 128F. Topics in Art Theory and Criticism (4)

A lecture course on a topic of special interest in art theory, art criticism, or the history of literature on art. May be taken three times for credit. **Prerequisites:** upper-division standing. Courses in art history (VIS 113AN–129F) are recommended.

#### 128P. Curatorial Practices Workshop (2)

Students will be exposed to the professional context of institutional art research, preparation, exhibition and publication. The content of the course will revolve around the curatorial experience of the particular faculty member. May be repeated once for credit. Two two-unit curatorial practices workshop courses count as one course towards the fulfillment of a Group III Elective requirement in the major. **Prerequisites:** VIS 112 or two upper-division courses in art history (VIS 113AN–129F).

#### 129A–F. Seminar in Art Criticism and Theory (4)

These seminar courses provide the opportunity for in-depth study of a particular work, artist, subject, period, or issue. Courses offered under this heading may reflect the current research interests of the instructor or treat a controversial theme in the field of art history and criticism. Active student research and classroom participation are expected. Enrollment is limited and preference will be given to majors. The letters following 129 in the course

number designate the particular area of art history or theory concerned. Students may take courses with the same number but of different content more than once for credit, with consent of the instructor and/or the program advisor. May be taken three times for credit. **Prerequisite:** VIS 112 or two upper-division courses in art history.

**129A. Seminar in Pre-Modern Art History (4)**

A seminar on an advanced topic of special interest in ancient or medieval art. **Prerequisites:** VIS 112 or two upper-division courses in art history (VIS 113AN–129F).

**129B. Seminar in Early Modern Art History (4)**

A seminar on an advanced topic of special interest in Renaissance or Baroque art. **Prerequisites:** VIS 112 or two upper-division courses in art history (VIS 113AN–129F).

**129C. Seminar in Modern Art History (4)**

A seminar on an advanced topic of special interest in Modern or Contemporary art. **Prerequisites:** VIS 112 or two upper-division courses in art history (VIS 113AN–129F).

**129D. Seminar in Art History of the Americas (4)**

A seminar on an advanced topic of special interest in the Ancient Americas to Africa and the Pacific Islands. **Prerequisites:** VIS 112 or two upper-division courses in art history (VIS 113AN–129F).

**129E. Seminar in Art History of Asia (4)**

A seminar on an advanced topic of special interest in India, China, and Japan. **Prerequisites:** VIS 112 or two upper-division courses in art history (VIS 113AN–129F).

**129F. Seminar in Art Theory and Criticism (4)**

A seminar on an advanced topic of special interest in art theory, art criticism, or the history of literature on art. **Prerequisites:** VIS 112 or two upper-division courses in art history (VIS 113AN–129F).

**129G. Art History Honors Seminar (4)**

This research seminar, centered on a series of critical, thematic, theoretical, and/or historical issues that cut across disciplinary specializations, provides outstanding advanced students with the opportunity to undertake graduate-level research. The first part of a two-part sequence completed by Art History Honors Directed Group Study (VIS 129H). **Prerequisite:** consent of instructor or art history faculty advisor, department stamp required. Note: The Art History Honors Seminar and the attached Art History Honors Directed Group Study counts as one course towards the fulfillment of the Group III requirement.

**129H. Art History Honors Directed Group Study (4)**

The second part of the honors program sequence, this course provides a forum for students engaged in research and writing to develop their ideas with the help of a faculty advisor and in conjunction with similarly engaged students. **Prerequisite:** consent of instructor or art history faculty advisor, department stamp required.

**130. Special Projects in Visual Arts (4)**

Specific content will vary each quarter. Areas will cover expertise of visiting faculty. May be repeated twice for credit. **Prerequisite:** two from (VIS 104CN, 105C, 106C, 107CN, and 147B) or one from (VIS 180A, 180B, 183A, and 183B) or consent of instructor/department stamp required. Visual arts/media, studio, ICAM majors only.

**131. Special Projects in Media (4)**

Specific content will vary each quarter. Areas will cover expertise of visiting faculty. May be repeated twice for credit. **Prerequisites:** two from (VIS 104CN, 105C, 106C, 107CN, or 147B) or one from (VIS 180A, 180B, 183A, and 183B) or consent of instructor. Open to studio, visual arts/media, and ICAM majors only.

**132. Installation Production and Studio (4)**

Through discussions and readings, the class will examine the issues and aesthetics of installation art-making. Using media familiar to them, students will produce several projects. May be repeated once for credit. Studio and visual arts/media majors only. **Prerequisites:** two from (VIS 104CN, 105C, 106C, 107CN, or 147B) or one from (VIS 180A, 180B, 183A, and 183B) or consent of instructor. Open to studio, media majors only.

**140. Digital Imaging: Image and Interactivity (4)**

(Cross-listed with ICAM 101.) Introduction to digital image involving images, texts, and interactive display and operates both within computer-mediated space (i.e., Web site) and in physical space (i.e., artist book). Interactive narrative and computer programming are explored. Materials fee required. **Prerequisite:** VIS 40 or ICAM 40. Open to media, ICAM, and studio majors; computing and ICAM minors only. Two production course limitation.

**141A. Computer Programming for the Arts I (4)**

Introduces external API's currently of interest in the arts (example: OpenGL, J2ME, Servlet/JSP, Java3D) extending a common programming language such as C++ or Java. Students gain API fluency through planning and coding software or software mediated art projects. CSE 11 or equivalent recommended. Materials fee required. **Prerequisites:** (VIS 40 or ICAM 40) and (VIS 140 or ICAM 101). Open to ICAM majors and minors only. Two production-course limitation.

**141B. Computer Programming for the Arts II (4)**

Students extend their programming capabilities to include the creation of reusable software libraries, packages, database API's, tools, utilities, and applications intended to be publishable and useful to other practicing artists, or as preparatory work for the student's senior thesis sequence. Materials fee required. **Prerequisite:** VIS 141A. Open to ICAM majors and minors only. Two production-course limitation.

**145A. Time- and Process-Based Digital Media I (4)**

(Cross-listed with ICAM 102.) Introduces time- and process-based digital media artmaking. Contemporary and historical works across time- and process-based media will be studied and projects produced. Topics may include software art, software and hardware interfacing, interaction, and installation in an art context. CSE 5A or equivalent programming experience recommended. Materials fee required. **Prerequisites:** (VIS 40 or ICAM 40) and (VIS 140 or ICAM 101). Open to media and ICAM majors and ICAM minors only. Two production-course limitation.

**145B. Time- and Process-Based Digital Media II (4)**

Students will implement time- and process-based projects under direction of faculty. Projects such as software and hardware interfacing, computer mediated performance, software art, installation, interactive environments, data visualization and sonification will be produced as advanced study and portfolio project. Materials fee required. **Prerequisite:** VIS 145A or ICAM 102. Open to media and ICAM majors; ICAM minors only. Two production course limitation.

**147A. Electronic Technologies for Art I (4)**

Develop artworks and installations that utilize digital electronics. Techniques in digital electronic construction and computer interfacing for interactive control of sound, lighting, and electromechanics. Construction of devices which responsively adapt artworks to conditions involving viewer participation, space activation, machine intelligence. Purchase of components kit required. **Prerequisite:** VIS 1. Open to media, studio, and ICAM majors; ICAM minors only. Two production course limitation.

**147B. Electronic Technologies for Art II (4)**

Continuation of the electronics curriculum. Design of programmable microcontroller systems for creating artworks that are able to respond to complex sets of input conditions, perform algorithmic and procedural processing, and generate real time output. Purchase of components kit required. **Prerequisite:** VIS 147A. Open to media, studio, and ICAM majors; computing and ICAM minors only. Two production course limitation.

**149. Seminar in Contemporary Computer Topics (4)**

(Cross-listed with ICAM 130.) Topics relevant to computer-based art- and music-making, such as computer methods for making art/music, design of interactive systems, spatialization of visual/musical elements, critical studies. Topics will vary. May be repeated twice. Materials fee required. **Prerequisite:** VIS 140 or ICAM 101, VIS 145A or ICAM 102, and MUS 170 or ICAM 103 recommended. Open to media and ICAM majors; ICAM minors only. Two production course limitation.

**150. History of Silent Cinema (4)**

An investigation of silent films from early cinema to the development of a classical style in the twenties, exploring issues of spectatorship, analyzing differences between American and European cinema, and highlighting the interaction between film and other arts. Materials fee required. **Prerequisites:** VIS 84 or consent of instructor.

**151. History of the Experimental Film (4)**

An inquiry into a specialized alternative history of film, consisting of experimental works made outside the conventions of the movie industry and which in their style and nature are closer to modernist painting, poetry, etc., than to the mainstream theatrical cinema. Works by such film artists as Man Ray, Salvador Dali, Maya Deren, Stan Brakhage, and Michael Snow will be examined in depth. Materials fee required. **Prerequisite:** VIS 84 or consent of instructor.

**152. Film in Social Context (4)**

This collection of courses gathers, under one cover, films that are strongly marked by period, geography, and the culture within which they received their dominating local quality. These courses pay particular attention to the stamp of place—climate, dress, habitation, language, music, politics—as well as the filmic moves that helped color such works as environmental. The series takes in the following subjects: Third World films, the Munich films (the new wave of Germans who made their first features in Munich following 1967), Japanese movies, films of the American thirties and their relationship to current thought, American Westerns, Ethnographic Film, Brazil's Cinema Novo, etc. Specific topics to be covered will vary with the instructor. May be repeated twice for credit. Materials fee required. **Prerequisite:** VIS 84 or consent of instructor.

**153. The Genre Series (4)**

A group of related courses exploring the conventions within such generic and mythic forms as the cowboy, shamus, chorus girls, and vampire films. May be repeated twice for credit. Materials fee required. **Prerequisite:** none; VIS 84 recommended.

**154. Hard Look at the Movies (4)**

Examines a choice of films, selected along different lines of analysis, coherent within the particular premise of the course. Films are selected from different periods and genres among Hollywood, European, and Third World films. May be repeated once for credit. Materials fee required. **Prerequisite:** VIS 84 or consent of instructor.

**155. The Director Series (4)**

A course that describes the experiences, looks, and structure of director-dominated films. A different director will be studied each quarter. The student will be required to attend the lecture in the course and to meet with the instructor at least once each week. May be repeated three times for credit. Materials fee required. **Prerequisite:** VIS 84 or consent of instructor.

**156N. Special Problems in Film History and Theory (4)**

Seminar on an advanced topic in the history and theory of film. Content will vary from quarter to quarter. **Prerequisite:** VIS 84 or consent of instructor. Note: Materials fee required.

**157. Video History and Criticism (4)**

A lecture course that examines video as an art form, its relationship to the development from television and other art forms, and surveys current work in the medium. Materials fee required. **Prerequisites:** VIS 22, 84, and 111.

**158. Histories of Photography (4)**

Photography is so ubiquitous a part of our culture that it seems to defy any simple historical definition. Accordingly, this course presents a doubled account of the medium; it explores both the historical and cultural specificity of a singular photography as well as some of the multitude of photographs that inhabit our world. Will examine a number of the most important photographic themes from the past 200 years. **Prerequisite:** none.

**159. History of Art and Technology (4)**

(Cross-listed with ICAM 150.) Aims to provide historical context for computer arts by examining the interaction between the arts, media technologies, and sciences in different historical periods. Topics vary (e.g., Renaissance perspective, futurism and technology, and computer art of

the 1950s and 1960s). **Prerequisite:** none. Note: Materials fee required.

#### 164. Photographic Strategies (4)

Introduction to the aesthetic problems in photography. Both historical and contemporary art practices will be examined. Students will create photo pieces to engage these conceptual issues. Materials fee required. **Prerequisites:** VIS 60 and consent of instructor. Open to media majors and photography minors only. Two production-course limitation.

#### 165. Camera Techniques (4)

An intermediate course designed to teach students to develop fiber-based black and white printing skills, to introduce the fundamentals of digital photography, and to address the issues of text in relation to image in art practice. Materials fee required. **Prerequisites:** VIS 60 and consent of instructor. Open to media majors and photography minors only. Two production-course limitation.

#### 166. Advanced Camera Techniques (4)

Advanced-level course working with refined techniques in traditional and digital photographic art practices. The student will also be instructed in the development of a portfolio for use in post-graduation career development. Materials fee required (photo lab). **Prerequisites:** VIS 164, 165, and consent of instructor. Open to media majors only. Two production-course limitation.

#### 167. Social Engagement in Photography (4)

This course will explore the use of photography to examine social issues. Working in both the documentary and fictional modes, students will produce projects on social concerns to present for critical feedback in class. **Prerequisites:** VIS 158, VIS 164, VIS 165.

#### 168. Color Techniques in Photography (4)

Instruction in color photography and printing. Lectures on theory and demonstration in shooting and printing color negatives. Materials fee required. **Prerequisites:** VIS 60, 164, 165. Open to media majors only. Note: Portfolio required for admission. Two production-course limitation.

#### 171. Digital Cinema—Theory and Production (4)

A digital image is not a film image, and this reality and its technological and conceptual implications are what this course will attempt to map out, exploring its possibilities and the massive overhaul of media aesthetics it implies. **Prerequisites:** (VIS 40/ICAM 40), VIS 60, VIS 70N and VIS 174, plus one from VIS 1, VIS 2, VIS 3, VIS 22 or VIS 84. Open to media majors only. Two production-course limitation.

#### 174. Media Sketchbook (4)

Video medium used both as production technology and as device to explore the fundamental character of film-making and time-based computer art practices. Students perform all aspects of production with attention to developing ideas and building analytical/critical skills. **Prerequisite:** VIS 70N. Open to media and ICAM majors only. Two production-course limitation.

#### 175. Editing—Theory and Production (4)

The evolving aims and grammars of editing practice in film and digital media will be examined. These histories will create a context for exploring contemporary editing strategies. The production projects will be centered on digital editing practice. **Prerequisites:** (VIS 40/ICAM 40), VIS 60, VIS 70N, and VIS 174 plus one from VIS 1, VIS 2, VIS 3, VIS 22, or VIS 84. Open to media majors only. Two production-course limitation.

#### 176. 16mm Filmmaking (4)

A technical foundation and creative theoretical context for film production will be provided. Students will produce a short film with post-synchronized sounds and final mixed-track. **Prerequisites:** (VIS 40/ICAM 40), 60, 70N and 174, plus one from VIS 1, VIS 2, VIS 3, VIS 22 or VIS 84. Open to media majors only. Two production-course limitation.

#### 177. Scripting Strategies (4)

Script writing, reading, and analysis of traditional and experimental media productions. The emphasis will be on the structural character of the scripting process and its language. Students will write several short scripts along with analytical papers. **Prerequisites:** VIS 70N and VIS 174. Open to media majors only. Two production-course limitation.

#### 178. Sound—Theory and Production (4)

Sound design plays an increasing role in media production and has opened up new structural possibilities for narrative strategies. A critical and historical review of sound design and a production methodology component. Critical papers and soundtracks for short film projects will be required. **Prerequisites:** VIS 70N and VIS 174. Open to media majors only. Two production-course limitation.

#### 180A. Documentary Evidence and the Construction of Authenticity in Current Media Practices (4)

Exploration of concepts in representational artworks by critically examining “found” vs. “made” recorded material. Advanced film/video, photography, computing work. Issues of narrative and structure; attention to formal aspects of media work emphasized. Cannot be taken same quarter as VIS 180B. **Prerequisites:** VIS 174 and one from VIS 140/ICAM 101, 145A/ICAM 102, 145B, 164, 165, 172, 175, 176, 177; VIS 177 strongly recommended. Open to media majors only. Two production-course limitation.

#### 180B. Fiction and Allegory in Current Media Practices (4)

Exploration of choices in invention, emphasizing “made” over “found.” Advanced film/video, photography, and computing. Issues of narrative and structure, and formal aspects of media work emphasized. Cannot be taken same quarter as VIS 180A. **Prerequisites:** VIS 174 and one from VIS 140/ICAM 101, 145A/ICAM 102, 145B, 164, 165, 172, 175, 176, 177; VIS 177 strongly recommended. Open to media majors only. Two production-course limitation.

#### 181. Sound and Lighting (4)

Advanced course to gain sophisticated control of lighting and sound recording techniques with understanding of theoretical implications and interrelation between production values and subject matter. Interactions between sound and image in various works in film, video, or installation. **Prerequisite:** VIS 174, and three of the following courses depending on emphasis: VIS 164, 165, 172, 175, 176, 177. Open to media majors only. Two production-course limitation.

#### 182. Advanced Editing (4)

Film/video editing and problems of editing from theoretical and practical points-of-view. Films and tapes analyzed on a frame-by-frame, shot-by-shot basis. Edit stock material and generate own materials for editing final project. Aesthetic and technical similarities/differences of film/video. **Prerequisites:** VIS 175 and two courses from the 180 and 183 series. Open to media majors only. Two production-course limitation.

#### 183A. Strategies of Self (4)

Looks at the way that self-identity is reflected and produced through various media practices. Focus is on rhetorical strategies of biography and autobiography in media, comparing and contrasting these strategies with those drawn from related cultural forms. Cannot be taken the same quarter as VIS 183B. **Prerequisites:** VIS 174 and one from (VIS 140/ICAM 101), (VIS 145A/ICAM 102), VIS 147A, VIS 164, VIS 165, VIS 175, VIS 176, VIS 177; VIS 177 strongly recommended. Open to media majors only. Two production-course limitation.

#### 183B. Strategies of Alterity (4)

Looks at difference as it is reflected and constructed in various media practices. Course will examine a wide range of forms and genres such as ethnography, science fiction, crime narratives, documentary film, political drama, and animated shorts. Cannot be taken same quarter as VIS 183A. **Prerequisites:** VIS 174 and one from (VIS 140/ICAM 101), (VIS 145A/ICAM 102), VIS 147A, VIS 164, VIS 165, VIS 175, VIS 176, VIS 177; VIS 177 strongly recommended. Open to media majors only. Two production course limitation.

#### 184. Advanced Scripting (4)

Film/video production will be framed through the script writing process, focusing on the problems of longer duration, density, and adaptation from other media. Students will both read and analyze both historical and contemporary scripts and produce a thirty- to sixty-minute script. **Prerequisites:** VIS 177 and two courses from VIS 180A, VIS 180B, VIS 183A, VIS 183B. Open to media majors only. Two production-course limitation.

#### 194S. Fantasy in Film (4)

This course will explore the path of the deliberately “un-real” in movies. Fantasy in film will be considered both in terms of its psychological manifestations and also in terms of imaginary worlds created in such willfully anti-realistic genres as science-fiction, horror, and musical films. Materials fee required. **Prerequisite:** upper-division standing. Offered in summer session only.

#### 197. Media Honors Thesis (4)

This advanced-level sequence coordinates three consecutive independent research courses to culminate in a completed thesis project in the third quarter of study. After the project’s public presentation, the faculty involved in the project will determine whether the student will graduate with departmental honors. **Prerequisite:** consent of instructor. **Note:** Requires a written proposal, 3.5 GPA in the major, prior consent from all involved, and approvals by the department chair and provost.

#### 198. Directed Group Study (2–4)

Directed group study on a topic or in a group field not included in regular department curriculum, by special arrangement with a faculty member. **Prerequisite:** consent of instructor. **Note:** Open only to upper-division students. Requires instructor’s, department chair’s, and provost’s approval. Pass/Not Pass grades only.

#### 199. Special Studies in the Visual Arts (4)

Independent reading, research, or creative work under direction of a faculty member. **Prerequisite:** consent of instructor. **Note:** Open only to upper-division students. Requires instructor’s, department chair’s, and provost’s approval. Pass/Not Pass grades only.

#### ICAM 103. Musical Acoustics (4)

(Cross-listed with MUS 170.) An introduction to the acoustics of music with particular emphasis on contemporary digital techniques for understanding and manipulating sound. **Prerequisites:** MUS 1A, 2A, or 4.

#### ICAM 110. Computing in the Arts: Current Practice (4)

Designed around the presentations by visiting artists, critics, and scientists involved with contemporary issues related to computer arts. Lectures by the instructor and contextual readings provide background material for the visitor presentations. **Prerequisite:** none. **Note:** Materials fee required.

#### ICAM 120. Virtual Environments (4)

Students create virtual reality artworks. Projects may be done individually or in groups. Exploration of theoretical issues involved will underlie acquisition of techniques utilized in the construction of virtual realities. Materials fee required. **Prerequisites:** VIS 145A or ICAM 102; CSE 11 recommended. Open to ICAM majors and minors only. Two production course limitation.

#### ICAM 160A. Senior Project in Computer Arts I (4)

Students pursue projects of their own design over two quarters with support from faculty in a seminar environment. Project proposals are developed, informed by project development guidelines from real-world examples. Collaborations are possible. Portfolio required for admission. **Prerequisites:** VIS 141B or VIS 145B or VIS 147B or MUS 172. Open to ICAM majors only. Department stamp required.

#### ICAM 160B. Senior Project in Computer Arts II (4)

Continuation of ICAM 160A. Completion and presentation of independent projects along with documentation. **Prerequisites:** ICAM 160A. Open to ICAM majors only. Department stamp required.

#### ICAM 198. Directed Group Study (2–4)

Directed group study on a topic or in a group field not included in regular department curriculum by special arrangement with a faculty member. May be repeated twice for credit. **Prerequisites:** consent of instructor. **Note:** Only open to upper-division students. Requires instructor approval. Pass/Not Pass grades only.

#### ICAM 199. Special Studies (2/4)

Independent reading, research or creative work under direction of faculty member. **Prerequisites:** department stamp and upper-division standing and consent of instructor required.

## GRADUATE

### CORE SEMINARS

#### 201. Contemporary Critical Issues (4)

An exploration of a range of issues important on the contemporary critical scene through readings and writing assignments. Topics will vary from year to year. Offered every fall. (Required, M.F.A.)

#### 202. Art Practice (4)

A workshop/seminar devoted to a particular materials practice (e.g., media, painting, digital media, etc.) that engages with critical questions arising within that discipline. Content will vary from quarter to quarter. May be repeated once for credit. (Required, M.F.A.)

#### 203. Working Critique (4)

Workshop in which students engage in an extensive evaluation of each others' ongoing work in preparation for either the First Year Review or MFA Review. Offered every winter. May be repeated once for credit. (Required, M.F.A.)

#### 204. Re-Thinking Art History (4)

Critical evaluation of the methods, practices, and disciplinary commitments of art history, encompassing both revisionist interventions of the late twentieth century and earlier paradigms, in order to envision new discipline-specific and interdisciplinary directions for the future of art history and visual culture. (Required, Ph.D.)

#### 205. Introduction to Graduate Studies in Art Practice (4)

This seminar introduces art practice students to the graduate program in a workshop environment. Emphasis is on the production of new work and on situating that work in relation to a larger art context. (Required, M.F.A.) Offered every fall and required of all first-year M.F.A. students.

#### 206. Seminar in Art Practice Research (4)

Seminar examines the interrelationship between theory and practice and the nature of artistic production as a form of research. **Prerequisites:** none. (Required for Ph.D. in art practice concentration.)

### ART PRACTICE/THEORY

#### 210. Narrative (4)

Examination of narrative issues in contemporary art-making. Traditional and experimental narrative practices in painting, drawing, sculpture, and performance are explored alongside narrative strategies in media and digital media.

#### 211. Fact and Fiction (4)

This seminar addresses the space between narrative work generated from a factual base and that generated from a fictional one. Special attention will be given to discussing work that confounds the assumed gap between the two.

#### 212. History and Memory (4)

This seminar will engage the space between personal and larger histories. How is one's own past both intertwined with and determined by larger social histories?

#### 213. Public Space (4)

An exploration of what public space is and how it operates, with a view toward an expanded context for considering how public artwork can operate within it. Included are areas such as mass media, activism, community action, computer networks, ecology, and alternative forums.

#### 215. Human Interface (4)

Examines human interface as it informs or transforms how we read and participate in culture at large. Concepts such as subject/author/object relationships, abstraction, metaphor, analogy, visualization, and complexity are discussed to establish context.

#### 216. The Object (4)

An investigation of the world of artifacts ("works of art" and others) and how they function as agents of communication and modifiers of consciousness. Contemporary perspectives drawn from the fields of art theory, anthropology, contemporary art, and semiotics will be utilized.

#### 217. Communities and Subcultures (4)

A critical examination of the practices of self-defined communities (e.g., Bauhaus, Shaker, Surrealists), which have attempted to change the social and spiritual quality of life by aesthetic means and of communities and subcultures defined by other means.

#### 218N. Imaging Selves and Others (4)

Explores various strategies exhibited in a wide range of contemporary art practices engaging in the representation of personality, spirituality, and the physical self.

#### 219. Special Topics in Art Practice/Theory (4)

Examines a topic of special interest to permanent and visiting faculty that is not addressed in the regular curriculum. As in other Art Practice/Theory seminars, students will both produce work and read and write critically about the topic. Topics will vary.

### HISTORY/THEORY/CRITICISM

#### Categories/Constructs

#### 230. "Art" as Category (4)

Explores the complex and changing criteria by which certain (categories of) objects and practices are designated as "art" in culturally and historically diverse societies.

#### 231N. Confronting the Object (4)

Investigates the nature and status of art objects and practices and the forms of engagement with them through topics such as the practice and metaphysics of description; phenomenological analysis; film analysis; and ekphrasis and visual analysis.

#### 232. Artistic Identities (4)

Explores the historical, theoretical, and cross-cultural concepts of the artist/auteur and his/her varied and shifting identities as inscribed in works of art, recorded in biography and critical literature, and enacted through social roles.

#### 234N. Frames of View (4)

Critical and historical analysis of the institutions, social networks, and communicative media through which art is presented to its audiences. May also address theories of vision and visibility, spectatorship, public space, originality and reproduction, and public space.

#### 235N. Frames of Analysis (4)

Historical critique and philosophical analysis of the central terminology and constructs of art history, theory, and criticism. May address such key terms as style, genre, and periodization or a topic such as theories of representation and narrative. **Prerequisite:** graduate standing or consent of instructor.

#### Theories/New Visions

#### 240. Histories of Theory and Criticism:

##### Plato to Post-Modernism (4)

Historical and cross-cultural investigations of art theory and criticism, antiquity to the present. May be taught as an historical overview or focus on a particular topic, e.g., Critical Currents Since World War II, Renaissance Foundations, From Culture to Popular Culture.

#### 241. Topics in Contemporary Critical Theory (4)

Focused studies, changing from year to year, in contemporary theoretical positions and perspectives (e.g., New Social Theory, Post-Colonialism, Gender Theory) and one or more leading theorists (e.g., Deleuze, C. S. Peirce, Steinberg).

#### 242. Theories of Media and New Media (4)

Critical study of the ways in which media (film, video, photography) and new media have been theorized. May be taught from an historical or comparative perspective or focus on a single topic or theorist.

#### 243. Aesthetic Theory (4)

Study of the philosophical concepts of the function of art and visual culture and the criteria for its evaluation in diverse epochs and cultures. May be taught as an historical overview or comparative study or focus a single topic or theorist.

#### 244. Studies in the Relationship of Theory and Practice (4)

Investigations of one or more artist-theorists or movements, contemporary or historical, that put in issue the interface between theory and practice. May also focus on a topic such as perspective, color, or narrative, or genre such as film or new media.

#### Times/Terrains

#### 250N. Seminar in Ancient Art (4)

The arts of Greece, Rome, and allied cultures in the ancient world. Topics will vary, e.g., Roman Portraiture: Self and Social Mask; The Invention of Perspective and Revolution in Two-Dimensional Representation; The "Modern" Art of Antiquity (late third to early fourth century A.D.). May be taken three times for credit. **Prerequisite:** graduate standing or consent of instructor.

#### 251. Seminar in Medieval Art (4)

European art from late antiquity through the fourteenth century and the historical processes by which "medieval" art has been constructed as a category. Topics may include Devotional Vision and the Sacred Image; Medieval Comic Genres; Neo-Medievalisms, Fifteenth Century to Today. May be taken three times for credit. **Prerequisite:** graduate standing or consent of instructor.

#### 252. Seminar in Renaissance Art (4)

Concentrates on the art of the Renaissance in Italy and the North through a changing series of topics, e.g., Vision and Composition in Perspective; The Sistine Chapel; Envisioning Jan Van Eyck; Renaissance Print-Making; Leonardo da Vinci's La Gioconda. May be taken three times for credit. **Prerequisite:** graduate standing or consent of instructor.

#### 253. Seminar in Early Modern Art (4)

European and American art, 1580s to 1850. Topics might include Deconstructing the Enlightenment: Images of Disorder; Escaping History: Genre Painting, Rococo to Impressionism; Politics and Love in the Art of Jacques-Louis David; Art and Urbanism in Baroque Rome. May be taken three times for credit. **Prerequisite:** graduate standing or consent of instructor.

#### 254. Seminar in Modern Art (4)

European and American art, ca. 1850 to 1960. Questions in Impressionism and Post-Impressionism; The Cubist Revolution: Marcel Duchamp and the Anti-Formalist Tradition; American Modernism; Reckoning with Abstract Art; Issues of Dada and Surrealism; Soviet Avant-Gardes. May be taken three times for credit. **Prerequisite:** graduate standing or consent of instructor.

#### 255. Seminar in Contemporary Art (4)

Thematic and critical discussions of recent U.S. and international art, 1960s to the present. Art/Text; Mixed Media Practices; Conceptual Art; Art After Appropriation; Global Art at the Millennium; New Genres of Public Art; Mike Kelly and the Conceptual Vernacular: Art and Activism. May be taken three times for credit. **Prerequisite:** graduate standing or consent of instructor.

#### 257. Seminar in Meso-American Art (4)

Topics relating to the art and civilizations of Precolumbian Mexico and Central America, either specifically art historical (such as iconographic, formal, and stylistic analysis) or encompassing a spectrum of interdisciplinary and cultural/historical problems. May be taken three times for credit. **Prerequisite:** graduate standing or consent of instructor.

#### 258. Seminar in Chinese Art (4)

Advanced studies in the secular and religious art traditions of China. From year to year, the seminar may focus on early China (Neolithic to the end of the T'ang dynasty), on later dynasties (Sung, Yuan, Ming) or on art of the People's Republic. May be taken three times for credit. **Prerequisite:** graduate standing or consent of instructor.

#### 259. Seminar in Latin American Art (4)

Historical and theoretical problems in the art of Mexico, Central, and South America art from the colonial period to today, as well as from the Hispanic traditions of the American Southwest. May be taken three times for credit. **Prerequisite:** graduate standing or consent of instructor.

**260. Seminar in North American Indian Art (4)**

Topics for this seminar concern Native American art history from ancient to contemporary times. Seminars may focus on archaeological and art historical approaches, philosophy and aesthetics, archaeoastronomy, and cultural contexts. Issues of globalization and transculturation may be examined as well.

**269. Contextual Studies: Special Topics (4)**

Studies in the art of cultures and time periods not covered in the currently published curriculum (e.g., African Art, Japanese Art, Byzantine Art, Islamic Art) or of issues and genres crossing epochal, cultural, and media boundaries.

**OTHER****280. Workshop in Critical Writing (4)**

Practice in writing about art (both one's own and others) accompanied by analysis of selected contemporary critical writings.

**281. Curatorial Practice (4)**

Methodological investigation of and training in the practices of art museums, galleries, film and digital environments, public arts organizations, and the like. Instruction by museum and gallery curators and opportunities for participation in ongoing programs at local art institutions.

**282. Special Projects in Art Practice (4)**

Advanced workshop in specialized areas of art practice (e.g., Sound and Lighting, Editing).

**295. Individual Studies for Graduate Students (1-12)**

Individual research with the student's individual faculty advisor in preparation for their comprehensive examinations for the M.F.A. degree or qualifying exam for the Ph.D. These units are intended to be with the chair of the student's review committee. For the M.F.A. degree, these units can only be taken after completing the First Year Review. (Required, M.F.A., Ph.D.)

**298. Directed Group Study (1-12)**

Directed group study on specific topics not covered at present in the normal curriculum. Used as an experimental testing of courses that may be given regular course numbers if proved successful. Special arrangement with faculty member. **Prerequisite:** consent of department.

**299. Graduate Research (1-4)**

Graduate-level research under the direct guidance of a faculty member. **Prerequisite:** consent of instructor.

**500. Apprentice Teaching (1-4)**

Apprentice teaching in undergraduate courses given by the Department of Visual Arts. Graduate students are required to teach a minimum of one quarter (four units) within the department to fulfill degree requirements.

**501. Apprentice Teaching in Culture, Art, and Technology (CAT) (4)**

Consideration and development of pedagogical methods appropriate to undergraduate teaching in the interdisciplinary Sixth College Core Sequence, Culture, Art and Technology. Supervised by the Core Program faculty, director and associate directors for the Writing and Thematic Programs. **Prerequisites:** graduate student and consent of instructor.

# Warren College

---

OFFICE: Warren College Administration, EBU 3B,  
Computer Science and Engineering Building  
<http://warren.ucsd.edu/>

## THE WRITING PROGRAM

Within four quarters following successful completion of the UC Entry Level Writing Requirement, all students entering as freshman must complete a two-course sequence at UC San Diego in Warren Writing (10A and 10B). The purpose of the sequence is to teach and thereby enable students, through intensive practice, to read critically and write appropriately in a variety of academic contexts. Classes are seminar-size and center on discussion of student work.

In both 10A and 10B, student writing is duplicated and discussed by the class in a workshop setting. Instructors hold conferences with students individually during the quarter and provide written and oral commentaries on student work. The minimum writing requirement is 8,000 words per quarter.

## ETHICS AND SOCIETY

All Warren students entering as freshmen must take two core courses in Ethics and Society. The courses are cross-listed as Political Science 27 and 28 and Philosophy 27 and 28 (see departmental listings). A student may enroll in these courses through either department. The courses are to be taken immediately following completion of Warren Writing 10A-B (or Scholars Seminar 11A-B). Poli./Phil. 27 must be taken before Poli./Phil. 28.

## THE WRITING CENTER

OFFICE: EBU 3B, Computer Science and Engineering Building, Room 1109

The Writing Center, staffed by trained undergraduate mentors, provides academic support for all Warren College student writers. The center offers individual peer mentoring sessions on a one-time or ongoing basis. The center director also provides group workshops addressing specific writing tasks, such as application essays and timed essay exams. Writing mentors enroll in Warren 189 to receive training and supervision.

## WARREN COLLEGE HONORS PROGRAM

OFFICE: EBU 3B, Computer Science and Engineering Building, Room 1102

The Warren College Honors Program offers students educational, cultural, and social experiences designed to broaden their intellectual interests. The activities vary each quarter and are planned to foster student interaction and promote a sense of community.

Entering freshmen with a high school GPA of 3.8 or above and SAT I scores of 700 reading/700

math/700 writing, or the ACT equivalent, are eligible to participate in the Honors Program. To remain in the program, students must maintain a cumulative GPA of 3.7 on all graded units completed at UC San Diego.

Students who do not qualify for the Honors Program at the time of admission and all transfer students may join as soon as a cumulative GPA of 3.7 is attained on twelve or more graded units completed at UC San Diego. In all subsequent quarters, students must maintain a cumulative GPA of 3.7 on all graded units completed at UC San Diego to remain in the program. Students in the Warren College Honors Program are not required to apply to the program or produce research projects in order to continue in the program.

Any Warren Honors student who writes a research paper for a departmental honors course may submit his or her paper to the Warren College Provost's Office for consideration for the Michael Addison Award. The award is presented annually at commencement to the Warren Honors student who is judged to have written the most distinguished research paper. The submission must be accompanied by a letter of support from the faculty departmental honors advisor.

For more information, please contact the program coordinator at (858) 534-1709 or [warren-honors@ucsd.edu](mailto:warren-honors@ucsd.edu).

## WARREN SCHOLARS SEMINAR

The Warren Scholars Seminar offers an interdisciplinary curriculum that is designed to help students broaden their intellectual interests and prepare them for rigorous academic inquiry. Students enroll in two seminars, Warren 11A-B, which fulfill the college writing requirement. The seminars are taught by a Warren College lecturer and feature distinguished guest speakers from a variety of disciplines.

Entering first-year Honors Program students are admitted to the Warren Scholars Seminar by application and invitation.

Students in the Honors Program may serve as undergraduate assistants in Warren 11A-B (Warren 195, Apprentice Teaching). Undergraduate assistants participate in planning class meetings, introducing guest speakers, facilitating small-group discussions, and supporting students in the paper-writing process.

---

## COURSES

---

*For course descriptions not found in the UC San Diego General Catalog, 2010–11, please contact the department for more information.*

### 10A. The Writing Course A (4)

A workshop course in reading and writing required of all Warren College students. The course emphasizes argumentation and critical writing based on sources. (Letter grade only.) **Prerequisites:** satisfaction of the university entry level writing requirement and must be a Warren College student.

### 10B. The Writing Course B (4)

A workshop course in reading and writing required of all Warren College students who have completed 10A. The course continues the emphasis on argumentation and critical writing based on sources. (Letter grade only.) **Prerequisites:** completion of WCWP 10A and must be a Warren College student.

### 11A. Warren Scholars Seminar A (4)

The Warren College Scholars Seminar A allows students to develop and refine their expressive and analytical skills. The seminar offers an interdisciplinary approach to topics on the relation of individuals and society, and the function of evidence and observation in the formation of theories. The course emphasizes argumentation and critical thinking. (Letter grade only.) **Prerequisites:** limited to freshman Warren College Honors Program students upon approval of a submitted writing sample.

### 11B. Warren Scholars Seminar B (4)

The Warren Scholars Seminar B allows students to develop and refine their expressive and analytical skills by exploring a topic that offers viewpoints from a wide range of disciplines. The seminar emphasizes argumentation and critical writing. The topic will vary each year. (Letter grade only.) **Prerequisite:** Warren 11A or by consent of instructor.

### 189. Academic Mentoring and the Writing Process (2)

Students will gain a fundamental understanding of all stages of the writing process and will develop the necessary skills to serve as productive mentors for their peers. **Prerequisites:** students must have completed WCWP 10A and 10B (or WARR 11A and 11B) and Phil./Poli. 27 with B grade or higher, have upper-division standing, and a minimum GPA of 3.0. Enrollment is restricted to Warren students only. Submission of a writing portfolio and departmental authorization is required to enroll.

### 195. Apprentice Teaching (1)

Undergraduate instructional assistance. Responsible both in area of learning and instruction. Student must prepare reading materials assigned by the professors and lead student discussions in Warren 11A or 11B. (P/NP grade only.) **Prerequisite:** student must be in the Warren College Honors Program.

# Appendix

## NONDISCRIMINATION AND AFFIRMATIVE ACTION POLICY STATEMENT FOR THE UNIVERSITY OF CALIFORNIA

It is the policy of the university not to engage in discrimination against or harassment of any person employed by or seeking employment with the University of California on the basis of race, color, national origin, religion, sex, gender identity, pregnancy (includes pregnancy, childbirth, and medical conditions related to pregnancy or childbirth), physical or mental disability, medical condition (cancer-related or genetic characteristics), ancestry, marital status, age, sexual orientation, citizenship, or service in the uniformed services (as defined by the Uniformed Services Employment and Reemployment Rights Act of 1994). This policy applies to admissions, access, and all employment practices, including recruitment, selection, promotion, transfer, merit increase, salary, training and development, demotion, and separation. This policy is intended to be consistent with the provisions of applicable state and federal laws and university policies.

University policy also prohibits retaliation against any employee or person seeking employment for bringing a complaint of discrimination or harassment pursuant to this policy. This policy also prohibits retaliation against a person who assists someone with a complaint of discrimination or harassment, or participates in any manner in an investigation or resolution of a complaint of discrimination or harassment. Retaliation includes threats, intimidation, reprisals, and/or adverse actions related to employment.

In addition, it is the policy of the university to undertake affirmative action, consistent with its obligations as a federal contractor, for minorities and women, for persons with disabilities, and for covered veterans (disabled veterans, recently separated veterans; Vietnam-era veterans; veterans who served on active duty in the U.S. military, ground, naval, or air service during a war in a campaign or expeditions for which a campaign badge has been authorized; or armed forces service medal veterans) The university commits itself to apply every good faith effort to achieve prompt and full utilization of minorities and women in all segments of its workforce where deficiencies exist. These efforts conform to all current legal and regulatory requirements, and are consistent with university standards of quality and excellence.

Inquiries regarding the University of California, San Diego's (UCSD) equal employment opportunity policies and student-related nondiscrimination policies may be directed to:

## UC SAN DIEGO POLICIES AND PROCEDURES APPLYING TO STUDENT ACTIVITIES

Students enrolling at UC San Diego are required to observe campus regulations, including but not limited to the Standards of Conduct and the Policies and Procedures Applying to Student Activities, which are available to students at <http://ugr8.ucsd.edu/judicial/> as well as the following locations:

- Student Legal Services
- Center for Student Involvement
- College Dean Offices
- Office of Graduate Studies
- Office of the Student Affairs Dean, School of Medicine
- Student Policies and Judicial Affairs
- SIO, Graduate Student Department

## NOTIFICATION OF RIGHTS UNDER FERPA FOR POSTSECONDARY INSTITUTIONS

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. They are

1. The right to refuse permission for any or all of the categories of personally identifiable information to be designated as directory information with respect to themselves.
2. The right to inspect and review the student's education records within forty-five days of the day UC San Diego receives the student's written request.

Students should submit written requests that identify the record(s) that the student wishes to inspect. The UCSD official to whom the request was submitted will notify the student of the time and place where the records may be inspected.

3. The right to request amendments of the student's education records that the student believes are inaccurate or misleading.

The request may be submitted in writing to the UCSD official responsible for the record, clearly identifying the part of the record they want changed, and specifying why it is inaccurate or misleading. If the UCSD official decides not to amend the record as requested by the student, that official will notify the student of the decision and advise the student of the procedures to appeal the denial.

4. The right to consent to disclosures of personally identifiable information contained in the student's education records, except to the extent that FERPA authorizes disclosure without consent.

Exceptions: One exception that permits disclosure without consent is disclosures to UCSD or UC officials with legitimate educational interests. A UCSD or UC official is a person employed by UCSD

or UC in an administrative, supervisory, academic, research, or support staff position; a person or company with whom UCSD or UC has contracted (such as attorney, auditor, or collection agent); or a student serving on an official committee, such as a disciplinary or grievance committee. A UCSD or UC official has a legitimate educational interest if the information requested is relevant and necessary for the official to perform a task or determination that is an employment responsibility or to perform a task that is related specifically to the official's participation in the student's education or to perform a task that is related specifically to the discipline of the student, and provides a service or benefit to the student or the student's family.

UCSD may also disclose personally identifiable information from an education record to appropriate parties, including parents of an eligible student, in connection with an emergency if knowledge of the information is necessary to protect the health or safety of the student or other individuals.

5. The right to file a complaint with the U.S. Department of Education concerning alleged failures by UCSD to comply with the requirements of FERPA. The name and address of the office that administers FERPA is

Family Policy Compliance Office  
U.S. Department of Education  
400 Maryland Ave. SW  
Washington, DC 20202-4605

Questions about these rights or any other aspect of student records management by UCSD officials may be referred to the director of Student Policies and Judicial Affairs, Student Center, Building B, or by telephone at (858) 534-6225 or e-mail at [judicialaffairs@ucsd.edu](mailto:judicialaffairs@ucsd.edu). The text of FERPA may be found in the government documents section of the UCSD Geisel Library. Copies of the UCSD student records policy, PPM 160-2, may be accessed electronically at <http://adminrecords.ucsd.edu/ppm/docs/160-2.html>.

### Directory or Public Information

The following has been designated by UCSD as "directory information": a student's name, address (local and/or permanent), e-mail address, telephone numbers, date and place of birth; major fields of study; dates of attendance; grade level; enrollment status (e.g., paid or unpaid enrollment, undergraduate, full time, or part time); number of course units in which enrolled; degrees and honors received; the most recent previous educational institution attended; participation in officially recognized activities, including intercollegiate athletics; and the name, weight, and height of participants on intercollegiate UCSD athletic teams.

---

## UCSD SEXUAL HARASSMENT PREVENTION AND POLICY

---

UC San Diego is committed to creating and maintaining a community where all persons who

participate in UC San Diego programs and activities can work and learn together in an atmosphere free of all forms of harassment, exploitation, or intimidation. Every member of the UC San Diego community should be aware that UC San Diego is strongly opposed to sexual harassment and that such behavior is prohibited both by law and UC San Diego policy. Retaliation against a person who brings a complaint of sexual harassment is also strictly prohibited and may result in separate disciplinary action. UC San Diego will respond promptly and effectively to reports of sexual harassment and will take appropriate action to prevent, correct, and if necessary, discipline behavior that violates this policy.

### LAWS AND UNIVERSITY POLICIES PROHIBITING SEXUAL HARASSMENT

The University of California Policy on Sexual Harassment applies to UC San Diego, including the medical centers and all auxiliary university locations. The California Fair Employment and Housing Act and Title VII of the Federal Civil Rights Act of 1964, as amended, prohibit sexual harassment in employment. Title IX of the Education Amendments of 1972 prohibits sexual harassment in educational institutions that are recipients of federal funds.

### DEFINING SEXUAL HARASSMENT

Sexual harassment is defined as unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature when submission to or rejection of this conduct explicitly or implicitly affects a person's employment or education; unreasonably interferes with a person's work or educational performance; or creates an intimidating, hostile, or offensive working or learning environment. UC San Diego will respond to reports of any such conduct.

In determining whether the reported conduct constitutes sexual harassment, consideration shall be given to the record of the conduct as a whole and to the totality of the circumstances, including the context in which the conduct occurred.

Sexual harassment does not typically include verbal expression or written material that is relevant and appropriately related to course subject matter or curriculum. This policy is intended to protect members of the UC San Diego community from discrimination, not to regulate protected speech.

Sexual harassment may occur between persons of differing power or between peers. In addition, sexual harassment may involve a female harassing a male, or a male or female harassing a person of the same gender. Harassment that is not sexual in nature but is based on gender, gender identity, sex stereotyping, or sexual orientation also is prohibited if it is sufficiently severe to deny or limit a person's ability to participate in or benefit from UC San Diego educational programs, employment, or services. In determining whether a hostile environment due to sexual harassment exists, UC San Diego may take into account acts of discrimination based on gender, gender identity, sex stereotyping, or sexual orientation.

### CONSENSUAL RELATIONSHIPS

UC San Diego's consensual relationship policy addresses potential ethical and legal issues that arise when individuals develop romantic or sexual relationships. In addition, the UC Regents have approved a systemwide faculty-student relationship policy that prohibits a faculty member from becoming romantically or sexually involved with students for whom the faculty member has or should expect to have supervisory responsibility.

### PREVENTION AND EDUCATION

To implement UC San Diego's policy regarding sexual harassment, the Office of Sexual Harassment Prevention and Policy (OSHPP) provides assistance in investigating and resolving complaints and provides education to the entire UC San Diego community. Emphasis is on prevention and early resolution. Copies of UC San Diego's policy and procedures may be obtained at OSHP at 201 University Center or <http://oshpp.ucsd.edu>. Sexual harassment prevention materials, including the university policy, are available in Spanish. Students are encouraged to review the interactive online education program, Preventing Sexual Harassment, available on the OSHP Web page.

Under California state law, large employers are required to provide their supervisors with two hours of sexual harassment prevention training every two years. At the University of California, for the purpose of sexual harassment prevention training, supervisors include all faculty.

### COMPLAINT RESOLUTION

UC San Diego has established guidelines for resolving sexual harassment complaints. There are several early resolution options, depending on the circumstances, including educational programs for targeted campus units or for particular individuals and mediation between the parties. Where early resolution is unsuccessful or inappropriate, a formal complaint may be filed and a formal investigation undertaken. There is no prescribed sequence, so choosing one option first does not prevent a complainant from choosing a different option for resolution later on.

Because complaints are most effectively resolved at the earliest possible stage, UC San Diego encourages early reporting of concerns or complaints regarding sexual harassment. If you believe you have been sexually harassed, you are encouraged to discuss your options and to learn about UC San Diego procedures by contacting OSHP at (858) 534-8298. You may obtain advice without filing a complaint. Unreasonable delay in reporting sexual harassment or failure to utilize UC San Diego's complaint resolution procedures may affect your legal rights.

A number of governmental agencies also accept complaints of sexual harassment, including the California Department of Fair Employment and Housing; the U.S. Equal Employment Opportunity Commission; and the Office for Civil Rights, U.S. Department of Education. The time deadlines for filing such complaints vary between 180 and 365 days.

## RETALIATION

Threats, other forms of intimidation, and retaliation against a faculty member, student, or staff employee for bringing a complaint of sexual harassment or for assisting another in bringing a complaint are prohibited. Retaliation is itself a violation of UC San Diego policy and applicable law, and is a serious offense. Complaints of retaliation may be brought through the sexual harassment complaint procedures. Acts of retaliation may result in discipline.

## STUDENT SEX OFFENSE POLICY

UC San Diego does not tolerate sex offenses in any form, including sexual assault, sexual misconduct, harassment, exploitation, or intimidation. Reports of sex offenses may be made to the Sexual Assault & Violence Prevention Resource Center, the UC San Diego Police Department, the Office of Sexual Harassment Prevention and Policy, Counseling and Psychological Services, Student Health Service, and other campus resources outlined in the UC San Diego Sex Offense Policy. Investigations of reports of sex offenses are conducted by the Office of Sexual Harassment Prevention and Policy. A student who has been accused of a sex offense may seek assistance from Student Legal Services, Counseling and Psychological Services, the Office of Student Advocacy, and other campus resources outlined in the policy.

Sex offenses can be addressed both through university administrative procedures and through the criminal justice system. Any criminal proceeding is entirely separate from administrative proceedings of the university.

The UC San Diego Sex Offense Policy is available online at <http://oshpp.ucsd.edu>.

## TITLE IX COMPLIANCE COORDINATOR/ SEXUAL HARASSMENT OFFICER

Persons who wish to bring a complaint alleging a violation of Title IX of the Education Amendments of 1972 may contact the Title IX Coordinator as follows:

Lori Chamberlain, Title IX Compliance  
Coordinator/Sexual Harassment Officer  
University of California, San Diego  
9500 Gilman Dr. # 0024  
La Jolla, CA 92093-0024  
(858) 534-8298

## THE REGENTS OF THE UNIVERSITY OF CALIFORNIA

### REGENTS EX OFFICIO

*Governor of California and President of the Board of Regents*

**Arnold Schwarzenegger**

*President of the University*

**Mark G. Yudof**

*Speaker of the Assembly*

**Karen Bass**

*State Superintendent of Public Instruction*

**Jack O'Connell**

*President of the Alumni Associations of the University of California*

**Ronald W. Stovitz**

*Vice President of the Alumni Associations of the University of California*

**Yolanda Nunn Gorman**

### APPOINTED REGENTS

The term of office of appointed regents is twelve years, and terms expire on March 1 of the year indicated.

Jesse Bernal (2010)\*

Richard C. Blum (2014)

William de la Peña (2018)

Russell Gould, Chair (2017)

Eddie Island (2017)

Odessa Johnson (2012)

George Kieffer (2021)

Monica Lozano (2013)

Hadi Makarechian (2020)

George M. Marcus (2012)

Norman J. Pattiz (2014)

Bonnie Reiss (2020)

Frederick Ruiz (2016)

Leslie Tang Shilling (2013)

Bruce D. Varrner (2018)

Paul Wachter (2016)

Charlene Zettel (2021)

Jesse Cheng, Student Regent Designate

Rex Hime, Alumni Regent Designate

Darek DeFreece, Alumni Regent Designate

Dan Simmons, Faculty Representative

Henry Powell, Faculty Representative

Juliann Martinez, Staff Advisor

Edward L. Abeyta, Staff Advisor

\*Student Regent appointed to one year term July 1 to June 30

### PRINCIPAL OFFICERS OF THE REGENTS

*President of the Regents*

**Arnold Schwarzenegger**

*Chair of the Regents*

**Russell Gould**

*Vice Chair of the Regents*

**Sherry L. Lansing**

*Acting Treasurer*

**Marie Berggren**

*Ethics, Compliance and Audit*

**Sheryl Vacca**

*General Counsel*

**Charles F. Robinson**

*Secretary and Chief of Staff to the Regents*

1111 Franklin Street, 12th Floor

Oakland, CA 94607

**Diane M. Griffiths**

### UC SYSTEMWIDE ADMINISTRATION

*President of the University*

**Mark G. Yudof**

*Executive Vice President*

**Bruce B. Darling**

*Executive Vice President—Business Operations*

**Nathan Brostrom**

*Interim Provost and Executive Vice President—*

*Academic Affairs*

**Lawrence Pitts**

*Executive Vice President—Chief Financial Officer*

**Peter J. Taylor**

*Senior Vice President—Health Sciences and Services*

**John D. Stobo**

*Senior Vice President—External Relations*

**Daniel M. Dooley**

*General Counsel and Vice President for Legal Affairs*

**Charles F. Robinson**

*Senior Vice President—Chief Compliance and*

*Audit Officer*

**Sheryl Vacca**

*Special Advisor to the President*

**Christopher F. Edley**

*Chief Investment Officer and Vice President for*

*Investments and Acting Treasurer of the Regents*

**Marie N. Berggren**

*Director, Institutional Research*

**Kathleen Dettman**

*Executive Director—Issues Management, Policy*

*Analysis and Coordination*

**Jenny Kao**

*Interim Chief of Staff and Associate Vice President—*

*Policy and Analysis*

**Marsha Kelman**

*Interim Deputy Chief of Staff*

**Deanna Dudley**

## CHANCELLORS OF THE UC CAMPUSES

*Berkeley*

**Robert J. Birgeneau**

Davis

**Linda Katehi**

Irvine

**Michael V. Drake**

Center for Pain and Palliative Medicine  
**Mark Wallace, Director**

Center for Community Health, Division of Community Pediatrics  
— —

Center for AIDS Research  
**Douglas Richman, Director**

Center for Neural Circuits and Behavior  
**Anirvan Ghosh, Director**

General Clinical Research Center  
**Michael Ziegler, Director**

HIV Neurobehavioral Research Center  
**Igor Grant, Director**

Ludwig Institute for Cancer Research, San Diego Branch  
**Webster Cavenee, Director**

BIOGEM-Biomedical Genomics Microarray  
**Gary Hardiman, Director**

#### SCRIPPS INSTITUTION OF OCEANOGRAPHY

Center for Clouds Chemistry and Climate  
**V. Ramanathan, Director**

Center for Marine Biodiversity and Conservation  
**Jeremy Jackson, Director**

Center for Marine Genomics  
**Terry Gaasterland, Director**

Joint Institute for Marine Observations  
**W. Kendall Melville, Director**

Center for Observations, Modeling and Prediction at Scripps  
**Bruce Cornuelle, Director**

#### BIOLOGICAL SCIENCES

SD-CAB (San Diego Center for Algae Biotechnology)  
**Steve Mayfield, Director**

#### ENGINEERING

Bernard and Sophia Gordon Engineering Leadership Center  
**Ingolff Krueger, Director**

CASB (Center for Algorithmic and Systems Biology)  
**Pavel Pevzner, Director**

CWC (The Center for Wireless Communications)  
**Bhaskar Rao, Director**

Charles Lee Powell Structural Research Laboratories  
**Gil Hegemier, Director**

Cymer Center for Control Systems and Dynamics  
**Miroslav Krstic, Director**

Information Theory and Applications Center  
— —

von Liebig Center for Entrepreneurism and Technology Advancement  
**Rosibel Ochoa, Director**

#### INTERNATIONAL RELATIONS AND PACIFIC STUDIES

Center for U.S. Mexican Studies  
**Christopher Woodruff, Director**

Center on Pacific Economies  
**Gordon Hanson, Director**

Global Information Industry Center  
**Roger Bohn, Director**

#### PHYSICAL SCIENCES

Center for NMR Spectroscopy and Imaging of Proteins  
— —

Center for Theoretical Biological Physics  
**Herbert Levine and Jose Onuchic, Codirectors**

Center for Computational Mathematics  
**Randolph Bank, Phillip Gill, and Michael Holst, Codirectors**

Laboratory for Mathematics and Statistics  
— —

#### SOCIAL SCIENCES

Center for Research on Educational Equity, Assessment, and Teaching Excellence  
**Hugh Mehan, Director**

Laboratory of Comparative Human Cognition  
**Michael Cole, Director**

Center for Environmental Economics  
**Ted Groves, Director**

Center for Research on Gender in the Professions  
**Mary Blair-Loy, Director**

#### Projects

African and African American Studies Project  
**Bennetta Jules-Rosette, Director**

Project for Explaining the Origin of Humans  
**Ajit Varki, Director**

Project for the Responsible Conduct of Research Education  
**Michael Kalichman, Director**

Project in Econometric Analysis  
**Graham Elliott, Coordinator**

Project in Geometry and Physics  
**James Bunch, Coordinator**

Project on International Affairs  
**Barbara Walter, Director**

Public Policy Research Project  
**Mathew McCubbins, Director**

#### UCSD MEDICAL CENTER

**Tom E. Jackiewicz, Chief Executive Officer, UC San Diego Medical Center**

**Thomas McAfee, Dean for Clinical Affairs, Health Sciences**

**Vacant, Chief Operating Officer, Medical Group**

**Edward Babakanian, Chief Information Officer**

**Lawrence S. Friedman, Medical Director, Ambulatory and Primary Care**

**Robert W. Hogan, Associate Director, Director of Finance, UCSD Medical Center**

**James D. Kaufman, Purchasing Manager**

**Dennis E. Goodrich, Director, Facilities and Safety Management, UCSD Medical Center**

**Margarita Baggett**, Associate Director, Patient Care Services, Chief Nursing Officer, UCSD Medical Center

**Dennis Moran**, Associate Director, Professional Services, UCSD Medical Center

**Angela Scioscia**, Chief Medical Officer, UCSD Medical Center

**Mona Sonnenshein**, Chief Operating Officer, UCSD Medical Center

## UC SAN DIEGO SCHOOL OF MEDICINE

**Aaron J. Byzak**, Director, Government Affairs

**Ruth Covell**, Associate Dean, Program and Policy Analysis

**Terence Davidson**, Associate Dean, Continuing Medical Education

—, Chief Health Sciences Marketing and Communications Officer

**Gordon N. Gill**, Dean, Scientific Affairs

**David A. Brenner, M.D.**, Vice Chancellor, Dean, School of Medicine

**Ronaldo G. Espiritu**, Assistant Vice Chancellor, Finance and Administration Health Sciences

**Leland M. Giddings**, Corporate Compliance/Privacy Officer, Medical Group

**Jacqueline Parthemore**, Chief of Staff/Medical Director, VA San Diego Healthcare Center

**Carolyn Kelly**, Associate Dean, Admissions and Student Affairs

**Dennis Carson**, Director, Cancer Center

**Maria Savoia**, Vice Dean for Medical Education, Professor of Medicine

**Brian Zeglen**, Director of Admissions

## ENDOWED CHAIRS UNIVERSITY OF CALIFORNIA, SAN DIEGO

Akamai Chair of Internet Mathematics  
**Fan Chung Graham**

Victor C. Alderson Chair of Applied Ocean Science  
**Veerabhadran Ramanathan**

Henry E. Allison Endowed Chair in the History of Philosophy  
—

Daniel L. Alspach Endowed Chair in Dynamic Systems and Controls  
**Miroslav Kristić**

Amylin Endowed Chair in Lifesciences Education and Research  
**Therese Ann Markow**

Atkinson/Epstein Chair in Management Leadership  
**Allan Timmermann**

Atkinson Family Chair  
**Keith Rayner**

Richard C. Atkinson Endowed Chair  
**Steve Kay**

Rita Atkinson Endowed Chair  
**Efim Zelmanov**

Distinguished Chair in Atmospheric Chemistry  
**Kimberly Prather**

Endowed Chair in Behavioral Genomics  
**Ming Tsuang**

Benedek Chair in Ocean Sensor Science  
—

Sanford I. Berman Chair in Language and Human Communication  
**Michael Cole**

J. Robert Beyster Chair in Engineering  
**Joseph Pasquale**

Blasker Chair in Environmental Engineering  
**Paul Linden**

Simon Bolivar Chair in Latin American Studies  
**Peter H. Smith**

Harriet and Louis Bookheim Chair in Biblical Hebrew and Related Languages  
**William Propp**

Arthur Brody Endowed Chair in Management Leadership  
**Uri Gneezy**

Dan Broida Chair in Elementary Particle Physics  
**Kenneth Intriligator**

Callaway Golf Chair in Structural Mechanics  
**John Kosmatka**

Endowed Chair in Cardiothoracic Surgery  
**Stuart W. Jamieson**

Center for Magnetic Recording Research Chair IV  
**Paul Siegel**

Center for Magnetic Recording Research Chair V  
—

Center for Magnetic Recording Research Chair III  
**Frank E. Talke**

Center for Magnetic Recording Research Chair II  
**Eric Fullerton**

Chancellor's Associates Chair I (Cognitive Science)  
**Jeffrey Elman**

Chancellor's Associates Chair II (Economics)  
**Halbert White**

Chancellor's Associates Chair III (Theatre)  
—

Chancellor's Associates Chair IV (Physics)  
**Arthur Wolfe**

Chancellor's Associates Chair V  
—

Chancellor's Associates Chair VI (Chemistry and Biochemistry)  
**Mark Thiemens**

Chancellor's Associates Chair VII (Biology)  
**Stephen Hedrick**

Chancellor's Associates Chair VIII  
—

William S. C. Chang Endowed Chair in Electrical and Computer Engineering  
—

Chuan Lyu Endowed Chair in Taiwan Studies  
**Ping-Hui Liao**

Chugai Pharmaceutical Chair in Cancer  
**Dennis A. Carson**

Communications Industry Professorship in Engineering  
**Lawrence Larson**

Chair in Computer-Aided Drug Discovery  
**Michael Gilson**

Francis Crick Chair in Physical Science  
**Peter G. Wolynes**

Cymer Corporation Endowed Chair  
**Robert Bitmead**

CYMER Inc. Endowed Chair in Advanced Optical Technologies  
**Yeshaiahu Fainman**

Ericsson Endowed Chair in Wireless Access Networks  
**Bhaskar Rao**

Ericsson Chair in Wireless Communications Access Techniques  
**Laurence Milstein**

Robert F. Engle Endowed Chair in Econometrics  
**Patrik Guggenberger**

Epstein/Atkinson Chair in Management Leadership  
—

Stanley and Pauline Foster Endowed Chair  
**Robert Sullivan**

Edward A. Frieman Chair in Global Observation Research  
**Uwe Send**

Y. C. Fung Endowed Chair in Bioengineering  
**Shu Chien**

Pierre M. Galletti Professor of Bioengineering Innovation  
**Bernhard Palsson**

Gildred Chair for United States-Mexican Relations  
**David Fitzgerald**

Morris Gleich, M.D., Endowed Chair in Glaucoma  
**Robert Weinreb**

Murray Goodman Endowed Chair in Chemistry and Biochemistry  
—

Frank Caylus Grandier Chair in Medieval European History  
—

Sir Clive W.J. Granger Chair in Econometrics  
—

Harry E. Gruber Professor of Computer Science and Information Technologies Chair  
**Larry Smarr**

Chair in Hebrew Biblical Studies  
—

Walter F. Heiligenberg Professorship in Neuroethology  
**Stefan Leutgeb**

Ingrid and Joseph W. Hibben Chair in Space Science and Education  
—

Rebeca Hickel Chair in Elizabethan Literature  
—

Chair in High Performance Computing  
—

Larry L. Hillblom Foundation Endowed Chair in Geriatrics  
**Laura Dugan**

Hwei-Chih and Julia Hsiu Chair in Chinese Studies  
**Joseph W. Esherick**

Institute of the Americas Chair for Inter-American Affairs  
**Paul W. Drake**

John Dove Isaacs Chair in Natural Philosophy  
**Stephen Mayfield**

Kazuo Iwama Chair in Materials Science  
**Sungho Jin**

Joan and Irwin Jacobs Endowed Chair in Bioengineering and Systems Biology  
**Shankar Subramaniam**

Irwin Mark and Joan Klein Jacobs Chair of Information and Computer Science  
**Ronald Graham**

Jerri-Ann and Gary E. Jacobs Endowed Chair in Social Sciences  
**David Lake**

Helen A. Jarrett Chair in Alzheimer's Disease Research  
**David Salmon**

Chair of Judaic Studies  
**David Goodblatt**

Nancy Kaehr Chair in Pediatric Research  
**Sanjay Nigam**

Jerome Katzin Chair in Corporate Governance  
**David Schkade**

Katzin Chair of Jewish Civilization  
—

Norma Kershaw Chair in the Archaeology of Ancient Israel and Neighboring Lands  
**Thomas Levy**

Tamara and Kevin Kinsella Chair in Neurobiology  
—

Lawrence B. and Sallye K. Krause Chair in Korean Studies  
**Stephan Haggard**

Stephen W. Kuffler Chair in Biology  
**Anirvan Ghosh**

Ho Miu Lam Chair in China and Pacific Relations  
**Susan Shirk**

Richard K. Lansche, M.D. and Tatiana A. Lansche Endowed Chair in Ophthalmology  
**Stuart Brown**

George W. and Carol A. Lattimer Campus Professorship  
**David Meyer**

Estelle and Edgar Levi Memorial Chair in Aging  
**Dilip Jeste**

Benard L. Maas Chair in Inherited Metabolic Disease  
**Bruce Barshop**

Mary Gilman Marston Chair in Psychiatry  
**Lewis Judd**

Quinn Martin Chair in Drama  
**Visiting Professors**

Bernd T. Matthias Chair in Physics  
**M. Brian Maple**

Joseph E. Mayer Chair of Theoretical Chemistry  
**Andrew McCammon**

McQuown Chair in Natural Science at SIO  
**George Sugihara**

Endowed Chair in Modern Chinese History  
**Paul Pickowicz**

Hajime Mori Chair in Japanese Language and Literature  
—

Kenneth M. Moser Endowed Chair  
**Patricia Finn**

Jerome Namais Chair  
—

Professorship in Neuroregeneration  
—

Nicholas Family Endowed Chair in Modern Greek History  
**Thomas Gallant**

Elizabeth Hamman and Morgan Dene Oliver Chair in Marine Biodiversity and Conservation Science  
—

Nancy Olmsted Chair in Pediatric Pulmonology  
**Paul Quinton**

M. J. Orloff Family Endowed Chair in Surgery  
**Mark Talamini**

The Marcie and Michael Oxman Professorship in Infectious Diseases  
**Joshua Fierer**

Pacific Economic Cooperation Chair in International Economic Relations  
**Takeo Hoshi**

George E. Palade Endowed Chair  
**Peter Novick**

Stanford S. and Beverly P. Penner Endowed Chair in Engineering or Applied Science  
**Juan C. Lasheras**

Edith and William Perlman Chair in Clinical Cardiology  
**Kirk L. Peterson**

Distinguished Chair in Physical Chemistry  
—

John G. Pickard Chair in Cardiac Surgery  
—

Charles Lee Powell Endowed Chair in Mathematics I  
—

Charles Lee Powell Endowed Chair in Mathematics II  
—

Charles Lee Powell Chair in Wireless Communication  
**Bang-Sup Song**

Presidential Chair in Energy and Combustion Research  
**Forman Williams**

Presidential Chair in Philosophy  
**Patricia Churchland**

Qualcomm Endowed Chair in Communications and Technology Policy  
**Peter Cowhey**

Qualcomm Endowed Chair in Embedded Microsystems  
**Rajesh Gupta**

Qualcomm Endowed Chair in Information Theory and its Application  
**Alon Orlitsky**

Qualcomm Endowed Chair in Mobile Computing  
**Yuanyuan Zhou**

Qualcomm Endowed Chair in Telecommunications and Information Technologies  
**Ramesh Rao**

Gerry & Jeannie Ranglas Chair in Ancient Greek History  
—

Helen Ranney Endowed Chair in Medicine  
**Kenneth Kaushansky**

Anne Ratner Chair in Pediatric Ophthalmology  
**David Granet**

Eric and Johanna Reissner Chair in the Department of Structural Engineering  
**Frieder Seible**

Roger Revelle Chair in Environmental Science  
—

Stephen O. Rice Chair in Magnetic Recording Research  
**Jack K. Wolf**

Florence Riford Chair for Alzheimer's Disease Research I  
**William Mobley**

Florence Riford Chair for Research in Neurodegenerative Disease and Dementia  
—

Florence Seeley Riford Chair for Acquired Immune Deficiency Syndrome Research  
**Douglas Richman**

William E. and Mary B. Ritter Memorial Chair  
**Jeremy Jackson**

Rohr Chair in Pacific International Relations  
**Miles Kahler**

Paul D. Saltman Chair in Science Education  
**Robert Schmidt**

San Diego County Heart Association Chair in Cardiovascular Research  
—

Science Applications International Corporation Chair in Engineering

**Amin Vahdat**

Shiley Endowed Chair in Alzheimer's Disease Research in Honor of Dr. Leon Thal

**Roberto Malinow**

Harold Simon Chair in International Health and Cross-Cultural Medicine

**Steffanie Strathdee**

Skyworks Endowed Chair in High Performance Communications Devices and Circuits

**Peter Asbeck**

Sokwanlok Chair in Chinese International Affairs

**Barry Naughton**

Martin Stein Endowed Chair in Developmental and Behavioral Pediatrics

**Sheila Gahagan**

Herbert Stern Chair in Biology

**William McGinnis**

Structural Systems Research Chair  
—

Tasch Endowed Chair in Parkinson's Disease Research  
—

Evelyn and Edwin Tasch Chair in Cancer Research

**Thomas Kipps**

Ronald R. Taylor Chair in Information Technology in Computer Science

**Pavel Pevzner**

Torrey Mesa Research Institute Chair in Plant Science

**Julian Schroeder**

Sandra and Monroe Trout Chair in Pharmacology

**Palmer Taylor**

Monroe E. Trout Chair in Surgery

**Raul Coimbra**

Harold Clayton Urey Chair in Chemistry

**Clifford Kubiak**

Endowed Chair in Urology  
—

Valtz Family Chair in Philosophy

**Paul M. Churchland**

Alkiviadis Vassiliadis Endowed Chair in Byzantine Greek History  
—

Arthur and Molli Wagner Chair in Acting

**Kyle Donnelly**

Sam M. Walton Chair for Cancer Research

**John Pierce**

Stefan E. Warschawski Endowed Chair in Mathematics

**Kiran Kadlaya**

Judith and Jack White Chair in Cardiology

**Anthony DeMaria**

Sheryl & Harvey White Chair in Management Leadership

**Vish Krishnan**

Muriel Jeanette Whitehill Chair in Bio-Medical Ethics

**Theodore Friedmann**

Winkler Endowed Chair for Type I Diabetes Research  
—

Herman Wouk Chair of Modern Jewish Studies

**Deborah Hertz**

Daniel Yankelovich Endowed Chair on Social Thought  
—

Samuel S. C. Yen Chair in Reproductive Medicine  
—

Walter J. Zable Chair in Engineering

**Frieder Seible**

## UC SAN DIEGO FOUNDATION

### CHANCELLOR

**Marye Anne Fox**

### PRESIDENT

**Steven W. Relyea**

### CHAIR

**Pauline Foster**

### VICE CHAIRS

**Dr. John D. Cambon '74**

**Julia Brown**

### TREASURER

**Brian Walsh '89**

### CHAIRS EMERITI

**William E. Beamer**

**Dr. J. R. Beyster**

**Malin Burnham**

**Jerome S. Katzin**

**Richard C. Levi**

**R. Barry McComic**

**Duane J. Roth**

**Dr. Monroe E. Trout**

### TRUSTEES

**Dr. Richard Atkinson**

**Mary Ann Beyster**

**Darcy Bingham**

**Arthur Brody**

**Deborah Bronston-Culp '80**

**Carol Littlejohn Chang**

**John G. Davies**

**Mark Diamond '87**

**Sheldon C. Engelhorn '72**

**Elaine Galinson**

**Augustine Gallego**

**George Haligowski**

**Lucy A. Haugh**

**Darcel L. Hulse**

**Dr. Irwin M. Jacobs**

**Dr. Kenneth F. Kroner '88**

**George W. Lattimer**

**Susan Lew**

**Robert S. Marren '86**

**Judith B. Morgan**

**James B. Morris**

**Anne S. Otterson**

**Ernest S. Rady**

**Stephen Schreiner '80**

**Thomas Schwartz '80**

**Kwan So**

**Leo Spiegel '83**

**William R. Stensrud**

**Prof. Suresh Subramani**

**Dr. Jerome Swartz**

**Ronald R. Taylor**

**Elizabeth Van Denburgh '78**

**Dr. Daniel Yankelovich**

**Teresa T. Young '74**

## BOARD OF OVERSEERS UC SAN DIEGO

**Jennifer Adams-Brooks** 2012

**Ron Baza** 2010

**Dr. R. Lee Brown** 2012

**Ann S. Campbell** 2012

**Linda Canada** 2010

**Hope Chau** 2011

**Hugh Davies** 2010

**Cecilia Estrada** 2011

**Maria Garcia** 2010

**Ian Gill** 2011

**Adolfo Gonzales** 2010

**Ricardo Guthrie** 2010

**Ann Lipscomb Hill** 2011

**Gary Jacobs** 2010

**Reese Jarrett** 2010

**Martha King** 2010

**Richard Kiy** 2012

**Jessie Knight** 2011

**George Lattimer** 2010

**Linda LeGerrette** 2010

**Arthur Lipper** 2010

**Bertha J. Lopez** 2012

**Judith Morgan** 2010

**Luis Osuna** 2011

**Paul Peterson** 2010

**Carmen Sandoval** 2012

**Elsa Saxod** 2010

**Gary Shaw** 2010

**Abby Silverman** 2012

**Robert Spanjian** 2010

**Susan L. Taylor** 2012

**Carol Veit** 2010

**Robert Villareal** 2011

**Fredrick Walker, Jr.** 2011

**Robert Witty** 2012

**Richard Ybarra** 2010

**Tony Yip** 2012

Members are appointed for a three-year term, and terms expire in the year indicated.

## UCSD FACTS\* AND FACULTY AWARDS

### On-campus student enrollment (Fall 2009)

Undergraduate	23,143
Revelle	3,757
John Muir	4,171
Thurgood Marshall	3,962
Earl Warren	4,162
Eleanor Roosevelt	3,687
Sixth	3,404
Graduate	4,231
School of Medicine and School of Pharmacy and Pharmaceutical Sciences	1,736
<b>Total</b>	<b>29,110</b>
Grade-point averages	
Freshman	2.90
Sophomore	3.00
Junior	3.02
Senior	3.07

### Number of undergraduates in most populous departments

Biology	5,768
Economics	2,486
Psychology	1,474
Political Science	1,261
Mechanical and Aerospace Engineering (MAE)	1,161
Chemistry	1,039
Communication	897
International Studies	876
Bioengineering	827
Computer Science and Engineering (CSE)	789
Miscellaneous	
UCSD Extension enrollment	23,248
Summer Session enrollment	20,073
On campus teaching faculty members	2,200
Bound books in library collection	3,118,440

Based upon the previous year's experience, 94 percent of all new freshmen enrolled at UCSD in the fall quarter are also enrolled in the subsequent fall quarter. Eighty-five percent of all students who begin their undergraduate studies as freshmen at UCSD complete their degree requirements here within six years. Questions or requests for more detailed information should be directed to the Office of Student Research and Information/Student Affairs.

### Members of Honorary Societies/ Faculty Prizes and Awards

A.B. Wood Medal Prize	2
Acoustical Society of America	1
Albert Lasker Award for Basic Medical Research	1
American Academy of Arts and Sciences	109
American Association for the Advancement of Science	101
American Association of Physicians	1
American Chemical Society	12
American Council of Learned Societies Fellowship	2
American Geophysical Union	36
American Philosophical Association	1
American Philosophical Society	20
American Physical Society	30
American Society of Mechanical Engineers	1
Andrew Mellon Foundation Fellowship	3
Arthur C. Cope Scholar Award	1
Association for the Advancement of Artificial Intelligence Fellow	1
Balzan Prize	2
California Scientist of the Year	3
Council on Foreign Relations	1
Crafoord Prize	1
Dreyfus New Faculty Award	1
Econometric Society Fellow	5
Emmy Award	1
Fields Medal	2
Ford Foundation Fellowship	15
Fulbright Scholarship	56
Goldschmidt Medal	2
Guggenheim Fellowship	132
Harvey Prize	1
Howard Hughes Medical Investigator Award	2
Howard Hughes Medical Investigator	1
Professors Award	1
Humboldt Fellowship	3
IEEE Fellow	38
IEEE/NPSS Early Achievement Award	1
Institute of Medicine	37
Jacob Javits Neuroscience Investigator Award	1
James B. Macelwane Medal	3
John Adam Fleming Medal	2
Keck Foundation: Distinguished	3
Young Scholars Program	3
Klingenstein Fellowship	2
Kyoto Prize	1
Landis Award	1
LSE Seed Fund	1
MacArthur Fellowship	6
Maurice Ewing Medal	5
McDonnell-Pew Fellow	1
McKnight Scholar Award	1
MERIT Award (NIMH)	1
National Academies Education Fellow in the Life Sciences	1
National Academy of Education	4
National Academy of Engineering	22
National Academy of Sciences	89
National Book Critic Circle Award	2
National Endowment for Humanities	7
National Endowment for the Arts	10
National Humanities Medal	1
National Kidney Foundation Young Investigator Award	1
National Medal of Science	5
National Science Foundation Creativity Award	1
New Innovator Award, National Institutes of Health	2
NIH Clinical Investigator Award	1
Nobel Peace Prize	4
Nobel Prize	6

NSF Early Career Development Program	40
Overton Prize	1
Packard Fellowship	9
Presidential Early Career Award for Scientists and Engineering (PECASE)	11
Pulitzer Prize	2
Residency at the Getty Center for Arts and Humanities	2
Residency at the National Humanities Center	3
Rockefeller Fellowship	11
Royal Society	4
Shaw Prize	1
Searle Scholar	21
Sloan Research Fellowship	54
Spencer Foundation Fellowship	2
Theodore Bulcher Neuroscience Award	2
Truman Capote Award for Literary Criticism	1
Tyler Prize	2
Vannevar Bush Award	1
Walter H. Bucher Medal	1
William Bowie Medal	2
Wolf Prize	1
World Computer Smithsonian Award 1	
Young Investigator Award, Biomedical Engineering Society	1
Young Investigator Award, Child Neurology Society	1
Young Investigator Award, International Society for Matrix Biology	1

\*As of spring 2010
