BANK OF PAPUA NEW GUINEA

PRESS RELEASE

KINA FACILITY RATE (KFR) FOR AUGUST 2006

The Bank of Papua New Guinea released its Monetary Policy Statement (MPS) on schedule on 31 July 2006 and the Government presented its Supplementary Budget on 1 August 2006. The MPS noted that macroeconomic conditions remained favourable but highlighted that there are several perceived risks to the maintenance of macroeconomic stability. Given the favourable macroeconomic conditions the KFR will remain unchanged at 6.0 percent in August 2006.

The Supplementary Budget presented by the Minister for Treasury, the Rt. Hon. Sir Rabbie Namaliu CSM, KCMG, MP, has allocated 65 percent of the K682.5 million towards development expenditure. The increase in development expenditure is consistent with the Medium Term Development Strategy (MTDS), with notable increases in transport infrastructure, education, health and law and order. This needs to be enhanced by an increase in implementation capacities without which there will be little impact on the economy to generate growth and strengthen the Government's revenue base in the future.

The current fiscal surplus is the result of favourable commodity prices and the Government must restrain recurrent expenditure that is too reliant on windfall gains from favourable commodity prices. Adverse movements in commodity prices in the future will make it difficult for the Government to adjust expenditure downwards and could increase reliance on borrowing to finance the budget deficit.

The Government's debt management strategy of restructuring debt from short to long term to reduce refinancing risk has led to issuance of Inscribed stocks. This has led to an increase in domestic interest cost by 65.1 percent in the first six months to June 2006, compared to the corresponding period in 2005. (Domestic interest expenses increased by 32.7 percent in the first five months to May 2006). Such a substantive increase in interest expenses and recourse to domestic borrowing is in the Bank's view inconsistent with the medium term debt strategy. Given that the Government is maintaining positive cash balances, it should defer any further issuance of Inscribed stocks in the remaining part of this year, and make early retirement of some of its expensive foreign debt.

The international reserves have reached historical levels of US\$1,250.4 million on 4 August 2006, sufficient for around 11 months of non-mineral import cover. Given the high level of international reserves the Bank will continue to smooth volatility in the foreign exchange market to maintain stability in the exchange rate. Inflation is projected to remain low in 2006.

The Bank will continuously assess market conditions, and if necessary make changes to the monetary policy stance to maintain price stability.
