PROPOSAL TO REVIVE DORMANT PNGNBA

by FAY DUEGA

A PROJECT proposal has been submitted to the Department of Commerce and Industry to revive the now dormant Papua New Guinea National Business Association (PNG-NBA).

The proposal was developed in conjunction with a report by Lukis Romaso, of Kum Gie, a consultancy firm. While the report highlighted various problems encountered by provincial business associations (PBAs), it also recommended a new strategy that emphasises a "bottom up" approach which fosters greater participation by members through their PBAs. This strategy would ensure formation of an umbrella body such as PNG-NBA will be made up of representatives from the provinces.

The Romaso Report (PNGNBA Study for UNDP, February 1997) recommended that "the obvious place to start... should be in the provinces which show interest to re-organise their associations. It should be a bottom-up

approach which will require dedication and voluntary services on the part of the members to start up."

The proposal was submitted by the president of the PNG-NBA, John Malai after its secretariat office was closed in June 1996. It said that the association had failed to realise its full potential due to a number of constraints; the main one being the lack of support from members.

A major conference that was held in Lae in October 1996 noted that PNG-NBA and its PBAs have not progressed to fostering the views of its members and to deliver and provide simple business services as required from time to time by financial members.

Some of the major areas of concern raised included:

- Mismanagement of associations at provincial levels. It was noted that provinces withheld funds because of the practice made by LIKRA in the past. Executives responsible for these centres have in the past not accounted for monies collected as membership fees. Such practices have discouraged potential members from

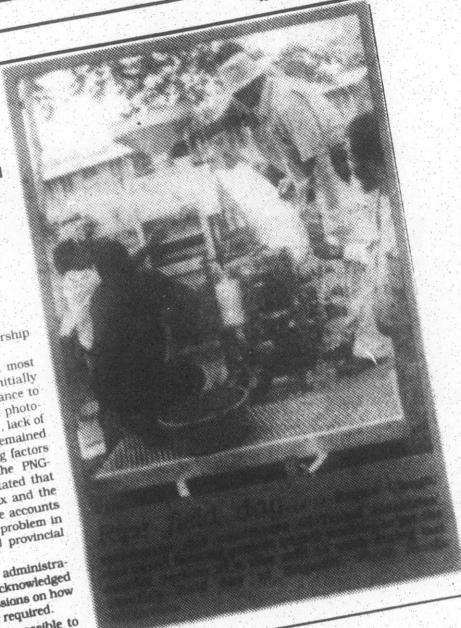

maintaining their membership fees.

Despite the fact that most provinces which initially received financial assistance to purchase fax machines, photocopies, typewriters etc., lack of communication has remained one of the contributing factors in the downfall of the PNG-NBA. The proposal stated that the cost of phone/fax and the non settlement of the accounts remains a common problem in the head office and provincial officers.

General lack of administration at PBAs was acknowledged and further discussions on how to improve that is required.

It has not been possible to sustain the operational costs of PNG-NBA and PBAs without government and external donor agencies. The proposal therefore called for financial assistance by PNG-NBA of its operations without outside assistance.

Most PBAs had no realistic budgets; some had no budgets at all; and
