# Introduction

Now in its 13th year, the CONNECT team takes pride in presenting the Most Innovative New Products Awards, we fondly refer to as "MIP." The homegrown products we will showcase today are truly world-class and a testament to San Diego's burgeoning innovation and entrepreneurship. MIP is a centerpiece of CONNECT 2.0, our push to provide more value to you—the members of the high-tech business and university communities. I hope you will share in our excitement in unveiling San Diego's most exciting products, and look forward to your active participation in upcoming CONNECT 2.0 programs and initiatives—stay tuned.

**CONNECT®**

Fred G. Cutler,  
Director, UCSD CONNECT

## ABOUT UCSD CONNECT

UCSD CONNECT is widely regarded as the nation's most successful regional program linking high-technology entrepreneurs with the resources they need for success: technology, money, markets, management, partners, and support services. Focused on assisting growth companies in the San Diego region, CONNECT has been directly involved with over 500 companies during its 15-year history. Part of the University of California, San Diego, CONNECT has a dual role in accelerating growth: it assists growth companies in the San Diego region and promotes the commercialization of technology from university-based research. CONNECT's programs also help business service providers, attorneys, accountants, bankers, investors, and marketing professionals with the knowledge about emerging technologies and access to new business opportunities. CONNECT is entirely self-supporting and receives no funding from the University or the State of California. It is supported by membership dues, course fees, and corporate underwriting for specific programs.

# AGENDA

**10:00 a.m. Finalists Exhibits Open**

**12:00 p.m. Welcome**

Fred G. Cutler  
Director, UCSD CONNECT

**12:45 p.m. Program Begins**

## **Presentation of Gray Cary Award for Technology Innovation**

Paul Kreutz  
Senior Partner, Gray Cary

This annual award recognizes an individual in the San Diego Region who, through his/her business activities and community involvement, has encouraged innovation and diversity of thought, thereby supporting the advancement of San Diego entrepreneurs.

## **Awards Presentation Begins**

### **Presentation of Bill Otterson Award**

The purpose of the Bill Otterson Award is to honor a product chosen from the finalists that transcends categories in its ability to transform our region. This award will recognize unique innovation, and a substantial and long-lasting contribution to society, our community, and our quality of life. The award will be given only when the judges feel that there is a product that meets the criteria.

## DISTINGUISHED JUDGES

*Peter Ashkin*  
Chief Technology Officer, Gateway

*Howard C. Birndorf*  
Chairman & CEO, Nanogen, Inc.

*Robert W. Conn, Ph.D.*  
Dean, UCSD Jacobs School of Engineering

*Dr. Charles Edwards*

## GRAYCARY.

TECHNOLOGY'S LEGAL EDGE<sup>®</sup>

Gray Cary Ware & Freidenrich LLP is a Silicon Valley-based law firm that represents emerging growth and high technology companies, with more than 450 attorneys practicing in Palo Alto, San Diego, San Francisco, Austin, Sacramento, and Seattle. Clients include public and private companies, from start-ups to Fortune 500.

Their Golden Triangle office places the firm in the geographical heart of San Diego's technology, venture capital, biotechnology, and emerging growth industries. With over 30 years of experience in Silicon Valley and more than 70 years of leadership in San Diego, the firm provides corporate, securities, litigation, intellectual property, patent, tax, trusts and estate planning, employment, and real estate services to a broad spectrum of industries throughout the United States.

Learn more about Gray Cary by visiting their website at [www.graycary.com](http://www.graycary.com).

**CB  Richard Ellis****CB RICHARD ELLIS**

CB Richard Ellis is San Diego's largest and most experienced commercial real estate company. CB Richard Ellis, through its brokerage services, mortgage banking, property management and financial services groups, services the entire spectrum of industrial, office, life science, and retail users within the county, with particular emphasis in the bioscience and high-technology industries. CB Richard Ellis is committed to providing the life science and high-technology industries with consistently delivered specialized consultation and implementation services that enhance their profitability and flexibility through true value-added services. CB Richard Ellis is the world leader in real estate services. Headquartered in Los Angeles, the company serves real estate owners, investors, and occupants through over 230 principal offices in 30 countries. The company's core services portfolio includes property sales and leasing, property management, corporate advisory services and facilities management, mortgage banking, investment management, capital markets, appraisal/valuation, research and consulting.

**INFLOW, Inc.**

INFLOW, Inc. provides businesses with single-source equipment and network management, network connectivity, system monitoring and Internet security from Data Networking Exchanges nationwide. The nationwide facilities feature a highly secure environment, integrated network engineering and management services, a staff of technical experts and 24-hour a day, seven day a week services to ensure reliability. INFLOW's products and services are designed to meet the needs of e-business information service providers and other technology-focused companies. These services allow INFLOW's customers to seamlessly offer uninterrupted availability of their mission-critical data applications.

**KPBS****KPBS**

It is the purpose of KPBS to educate, inform, entertain and empower our audience by acquiring, producing and delivery high quality programming which is of value and worthy of respect. KPBS values community building, lifelong learning and providing a service that is accessible to all. KPBS staff are committed to creating engaging and appealing programs and services, and through their endeavors, reflect the values of civility, respect, integrity and individual responsibility. KPBS will continue to thrive in a time of radical change.

**MARSH**  
An **MMC** Company**MARSH**

Created by the mergers of Johnson & Higgins, Marsh & McLennan and Sedgwick, Marsh USA Risk & Insurance Services is the world leader in risk and insurance services, with 30,000 employees serving clients in over 100 countries. As San Diego's premier professional services firm, specializing in risk and insurance services, Marsh deploy teams of professionals to work in partnership with clients to find solutions to their business issues and protect the assets of their company. To address the business and insurance needs of San Diego companies, Marsh San Diego has created dedicated practice groups in the specific areas of Technology, Life Sciences, Consumer Products, Healthcare and Municipalities. Whether a client's business is software, telecommunications, electronics, life sciences or healthcare they have dedicated professionals who can help control the total cost of risk and create solutions to business issues.

**PRICEWATERHOUSECOOPERS** **PRICEWATERHOUSECOOPERS LLP**

PricewaterhouseCoopers technology industry professionals deliver a broad spectrum of services to meet the needs of fast growth technology start-ups and agile, global giants in key industry segments. As business advisors to the technology

industry, they help their clients make the most of converging technologies, meet the financial market's expectations, expand and succeed in global markets, manage fast growth, obtain financing, and attract and retain the best and brightest knowledge workers. With more than 150,000 professionals worldwide, the people of PricewaterhouseCoopers have the scope, depth, and expertise to advise every fast-growth and global technology company on the challenges facing their business; the scale and systems to do it expediently; the worldwide network to deliver it seamlessly; and the experience to get results. PricewaterhouseCoopers refers to the U.S. firm of PricewaterhouseCoopers LLP and other members of the worldwide PricewaterhouseCoopers organization.

## **Silicon Valley Bank**

### **SILICON VALLEY BANK**

Silicon Valley Bank, with total assets over \$4 billion, has established an unparalleled reputation in lending to emerging growth and middle market companies as a result of its expertise in the technology and life sciences niches. With a solid understanding of the risks and rewards of these high-growth companies, the bank is recognized for its ability to develop innovative solutions to meet clients' banking needs. These solutions are tailored to clients' changing needs throughout the business development life cycle. The bank currently serves over 4,000 clients in more than 40 states. Silicon Valley Bank's San Diego office provides commercial lines of credit, term loans, depository services, cash management, and international banking services, as well as executive banking. The office also provides factoring, asset-based financing, leasing, and other corporate finance products, for middle market and emerging-growth companies.

(Member FDIC)

The San Diego  
**Union-Tribune**

**THE SAN DIEGO UNION-TRIBUNE**

The San Diego Union-Tribune is the oldest business in San Diego County and the second-oldest newspaper in Southern California. It is the second largest daily in Southern California and ranks in the top 20 newspapers in the country in terms of circulation. With daily circulation over 380,000 and Sunday sales topping 450,000, the newspaper serves San Diego County and portions of Imperial Valley, Riverside and Orange Counties. In addition, The San Diego Union-Tribune is expanding its presence in Tijuana, Mexico. The newspaper was created when the San Diego Union, founded on October 10, 1868, and the Evening Tribune, founded on December 2, 1895, merged into a morning newspaper on February 2, 1992. They had been published by the same company since 1901.

**ALITUM**

In today's aggressive, time-sensitive business environment, being the first to market with products and services can mean the difference between a million-dollar or a billion-dollar market valuation. Alitum understands this urgency and gives fast and emerging-growth companies the infrastructure support and services they need to get their products and services to market quickly. They have developed a new, unique business integration model to define the new direction of business that combines the knowledge capital of their business strategists with the latest in new technologies. Alitum is building the next generation of business infrastructure services available via the Internet through their comprehensive understanding of current market trends, company growth stages and business infrastructure needs.

## FINALISTS:

### **DriveCam ■ I-Witness, Inc.**

DriveCam is an automobile Video Event Recorder that captures unanticipated events, such as crashes, road rage, erratic driving or theft. DriveCam incorporates a digital looping memory that continuously records video, sound, and G-forces. DriveCam is a low-cost, fully self-contained, small unit that mounts out of sight behind the rear view mirror.

### **Minstrel V ■ Novatel Wireless, Inc.**

The Minstrel V is an affordable, pocket-size, two-way wireless solution for the Palm Computing Platform, providing wireless WAN access from coast to coast. The internal and rechargeable lithium ion battery provides up to eight hours of access to e-mail, corporate networks, and native Internet connectivity. Using CDPD technology, the Minstrel V provides real-time data transmission speed of 19.2 kbps.

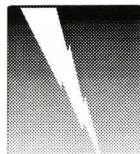

### **iCEBOX ■ Stellcom, Inc.**

The iCEBOX is a revolutionary Internet appliance designed for state of the art kitchens in upscale homes. It integrates DVD, CD audio, and cable TV entertainment with a Bose quality sound system and Internet browser - including email connectivity (DSL/Cable modem ready). The iCEBOX fits in a compact under-the-cabinet mount package.

**FINALISTS:**

ThunderVolt

**ThunderVolt TB30HT Turbine Hybrid Electric Drive System ■ ISE Research/ThunderVolt Incorporated**

The ThunderVolt TB30HT hybrid-electric drive system offers the power and response required by urban transit bus operators, while providing unparalleled reductions in emissions, both particulate and acoustic. Buses get >50% better mileage and >80% reduction in particulate emission when compared to a propane fueled engine. The improvements when compared to a diesel bus are more striking.

**PoliceMobile ■ Mobile Access Software, Inc.**

PoliceMobile includes three integrated applications. PoliceReports helps officers collect crime, accident and critical information in the field, and transmit clean, accurate reports electronically for review and approval. PoliceBrowser enables officers to instantly search and access files in the field. PoliceAccess allows reliable, compatible wireless access to data networks, delivering critical information to officers in the field.

**Vuetopia ■ Vuetopia**

Vuetopia is the first ultra-large-screen, Internet-delivered, digital advertising medium in major shopping malls.

The screens are super-large format (from 64 to 192 square feet) with multimedia capabilities allowing the presentation of high-resolution graphics, full-motion video and high-fidelity audio. Vuetopia utilizes proprietary Sitecasting technology to ensure secure, accurate scheduling, distribution, and presentation of complex multimedia information at each screen.

M A S S H Y S T E R I A

### **SyncTV ■ Mass Hysteria**

SyncTV is the first application to leverage the power of TV to aggregate mass audiences, deliver personalized information on-demand, prompt impulse e-commerce purchases, and incorporate user-generated content into the broadcast experience. SyncTV combines the best of Television, Web, and Community based applications within one seamless experience for shared user experiences.

### **iResearch System ■ ChemNavigator.com**

The iResearch System is a Web-based application for life science researchers involved in the discovery of new chemical entities. By cross indexing research information generated on chemical compounds with those available for purchase in the iResearch System Library, ChemNavigator has created a cost-effective way of allowing researchers to more strategically purchase chemical compounds used in drug discovery testing.

### **Hand-Held Banking<sup>sm</sup> ■ SensCom, Inc.**

SensCom enables financial institutions to offer wireless Internet Hand-Held Banking services to their customers. The company acts as a gateway between financial institutions' systems and their customers' wireless devices over the wireless Internet. Using a web-enabled wireless phone or personal digital assistant, consumers are able to check account balances, review account history, transfer funds, pay bills, and perform stock trades.

## FINALISTS:

### FormWare v3.0 ■ Captiva Software Corp.

FormWare 3.0's features include: I-Forms—an easy way to extend data capture to the web and take advantage of the Internet as a cost effective platform for data capture; Free Form Recognition Technology – provides the ability to locate data on complex forms – without defining a unique template for each form type; and XML Import and Export – enables data capture from Internet forms, e-commerce transactions and other electronic data sources in an XML format.

### iVISTA 3.0 Personal Webcasting Software ■ Inetcam, Inc.

With iVISTA 3.0, anyone with a Windows based PC computer can now stream live video onto the Internet and allow live real-time viewing from any remote Internet on-ramp ... without any plug-ins or software downloads required by the viewer. iVISTA 3.0 also includes simultaneous video and audio streaming, multiple image streaming, motion detection, remote screen transmission, and WAP and i-mode enabled output.

### Intel NetStructure 7280 XML Director ■ Intel Corporation

The Intel NetStructure 7280 XML Director is a high performance network appliance designed for enterprises engaged in Business-to-Business (B2B) e-commerce. Customers can use the XML Director to identify, classify, and route XML transactions based on the data contained within the actual transaction itself. This allows business policies to be embedded within their network.

## FINALISTS *continued*

### **WIDCOMM, Inc. ■ BlueStack**

BlueStack is a thorough implementation of the Bluetooth 1.0b specification and the only Bluetooth certified product on the market today. BlueStack is based on the core specification of the Bluetooth system and has been designed to be compliant with it, yet the layers of the stack are architected in a way which make it modular, lean, portable, robust and maintainable.

**FINALISTS:**

**2020tc Imager ■ Digirad**

The 2020tc Imager is the world's first solid-state digital gamma camera for nuclear imaging and uses patented, solid-state radiation detection technology. It weighs approximately 425 pounds and is highly mobile versus the 3,000 to 5,000 pound stationary vacuum tube cameras. This lightweight design makes it the world's first truly portable gamma camera for nuclear medicine.

**QuickVue Influenza Test ■ Quidel**

Quidel's QuickVue Influenza Test provides physicians with accurate test results that allow them to test and treat patients in less than 10 minutes. The test detects both A & B types of influenza. The testing kit offers everything that is needed to perform the test including positive and negative controls and test kits are individually packaged for single-use testing and disposal.

**The ReliefBand Device ■ Woodside Biomedical, Inc.**

The ReliefBand device is a watch-like device worn on the ventral side of the wrist. When activated, the device emits a low-level electrical current across two small electrodes on its underside. The ReliefBand is the only commercially available electronic medical device with FDA clearance for treating post-operative nausea and the nausea and vomiting associated with chemotherapy, pregnancy (all by Rx), and motion sickness (OTC).

## *FINALISTS:*

### **Fiberless™ Broadband Wireless Access (BWA) System ■ Ensemble Communications Inc.**

Fiberless® is a third generation, point-to-multipoint microwave radio system providing broadband connections to business users. For the 95 percent of U.S. businesses without access to fiber networks, the Fiberless® system offers affordable high-bandwidth services. Fiberless® is the only system capable of delivering the full range of existing telecommunications services and new, differentiated offerings such as instantaneous broadband bandwidth-on-demand, Virtual Private Networks and Voice over IP.

### **SPICE Wireless Network Infrastructure ■ Littlefeet, Inc.**

SPICE is an innovative wireless infrastructure solution that can be easily and economically deployed by network operators worldwide to address escalating consumer requirements for high quality voice, data, and Internet-enabled services. Littlefeet combines the best features of micro base stations, repeaters and intelligent modems – and improves upon them in a pioneering product called SPICE.

### **OMM MEMS 2D Photonic Switching Subsystems ■ OMM**

OMM MEMS-based photonic switching subsystems provide the entire optical cross-connect switching solution to communications equipment manufacturers. OMM 2D switching subsystems provide non-blocking connections of multiple inputs to multiple outputs in milliseconds and eliminate the need to rearrange physical connections. OMM's family of switches function independently of data rate, wavelength, or signal protocol to accommodate changing requirements in long-haul, metro, and access networks.
