CONNECT: The UCSD Program in Technology and Entrepreneurship

CONNECT was started as a University-private sector partnership to serve the needs of high-tech entrepreneurs by linking them with the technical, financial, and managerial skills and resources which they need for success. In addition, CONNECT works with high-tech companies to foster innovation and entrepreneurship. Another important focus is to be a resource to University researchers interested in identifying commercial applications for their work.

CONNECT is entirely supported by fees charged for its programs and by funds from its sponsors, who are the leading banks, accounting firms, law firms, venture capital companies, financial institutions, investment bankers, real estate developers, financial printers, marketing firms, and high-tech companies.

CONNECT offers a series of lectures, courses, and seminars on a broad range of subjects related to starting and operating a high-tech enterprise. In addition, it provides individual counseling to high-

tech entrepreneurs who are seeking financing, developing marketing strategies, or looking for business services for their companies. The San Diego Technology Financial Forum, an annual event co-sponsored by CONNECT, brings venture capitalists and investment bankers from around the country to San Diego for the opportunity to hear 30 entrepreneurs present their business plans.

CONNECT has won two prestigious awards for its work with entrepreneurs. In 1987, the American College Testing Program/National University Continuing Education Association presented CONNECT with their annual award for the most innovative continuing education program in the country. The U.S. Small Business Administration recognized CONNECT Director William W. Otterson as the person in the southwest region who contributed the most to the development of entrepreneurship in 1986.

Staff:

The director of CONNECT is William W. Otterson, a successful entrepreneur best known as a founder of Cipher Data Products, Inc., now the leading supplier of computer tape drives. At CONNECT Otterson is called the "Entrepreneur-in-Residence." He is an investor in several high-tech companies and was past chairman of the San Diego Council of the American Electronics Association. He has a B.S. in engineering and an M.B.A. from Stanford University.

The associate director is Barbara Bry, who was a business writer for the Los Angeles Times. She has done consulting for Girard Capital, a San Diego-based venture capital firm, has served on the board of Girard Savings Bank, and is an investor in several high-tech companies. She has a BA. in sociology from the University of Pennsylvania and an M.B.A. from Harvard Business School.

Offices are located in San Diego, Newport Beach, Los Angeles, Palo Alto, San Francisco, Seattle, Minneapolis, Chicago, Washington, DC, Hartford, and New York.

HIGH-TECH COMPANIES

AGOURON PHARMACEUTICALS, INC.

Peter Johnson, President and CEO
H025 North Torrey Pines Road
La Jolla, CA 92037
(619) 535-5500

Agouron Pharmaceuticals, Inc. designs and develops drugs that are engineered to provide significant advantages in treating major human diseases. Founded in 1984, Agouron became a public company in 1987 and is pursuing a long-term plan to establish itself as an independent pharmaceutical firm. The company has pioneered an inter-disciplinary drug design technology based upon the three-dimensional structure of proteins that play key roles in disease processes.

BROOKTREE CORPORATION

James A. Bixby, President
9950 Barnes Canyon Road
San Diego, CA 92121
(619) 452-7580

Formed in 1981, Brooktree Corporation designs, develops and markets high performance data conversion and mixed signal (analog/digital) devices based on a proprietary design technology which allows system designers to integrate complex, high performance analog and digital functions on a single chip using standard CMOS or bipolar manufacturing technologies.

CELERITY COMPUTING

Steve Vallender, President
9692 Via Excelencia
San Diego, CA 92126
(619) 271-9940

Celerity Computing, founded in 1983, manufactures and distributes two series of high-performance scientific and engineering computer systems. Celerity's first product series, the C1200 distributed systems, are supermini class computers. The Celerity 6000, Celerity's more powerful line of departmental supercomputers,

provides engineers and scientists with even more power for computer-intensive applications such as mechanical computer-aided engineering, imaging and animation, and scientific research.

COMPUTER COGNITION

Pamela Coker, Ph.D., President
6696 Mesa Ridge Road
San Diego, CA 92121
(619) 453-6660

Computer Cognition has developed and sells sophisticated commercial software applications. The company also conducts research and development in the area of advanced artificial intelligence systems. Commercial products include ACUCOBOL® and ACUITY v general accounting, wholesale distribution, manufacturing, and project job cost systems. In artificial intelligence, the company has developed the Context Activated Memory Device (patent pending) which is capable of understanding English. There are 29 employees.

DIGMSION, INC.

John D. Cambon, President
5626 Oberlin Drive
San Diego, CA 92121
(619) 458 -tm

DigiVision, Inc. manufactures and sells electronic imaging products to the health care industry. DigiVisions products are used in a wide variety of interventional and diagnostic clinical procedures to enhance medical images. The Company was founded in 1982 and currently employs 25 people.

FISHER-SCIENTIFIC GROUP INC.

Richard Cramer, Chairman and CEO
11255 North Torrey Pines Road
La Jolla, CA 92037
(619) 457-3565

Fisher-Scientific Group Inc., a technology-driven company, supplies a broad spectrum of essential products for the medical and research industries.

GEN-PROBE INCORPORATED

Thomas A. Bologna, President and CEO 9880
Campus Point Drive
San Diego, CA 92121
(619) 546-8000

Gen-Probe is a leader in the development, manufacture, and marketing of clinical products based upon proprietary genetic probe technology. Gen-Probe has focused its initial development programs on infectious disease diagnostic products, followed by cancer and viral diagnostics and therapeutic applications. Current customers include Roche Biomedical Laboratories, Memorial Sloan-Keffering Cancer Center, and UCLA Medical Center.

GENSIA PHARMACEUTICALS

David Hale, President
11075 Roselle Street
San Diego, CA 92121-1207
(619) 546-8300

Gensia Pharmaceuticals is a biopharmaceutical company formed in 1986 to discover, develop, manufacture, and market novel drugs for the treatment and diagnosis of human diseases, with focus on the treatment and diagnosis of cardiovascular disease, and the treatment of cerebrovascular, neurological and inflammatory disease. The company was founded based on technology discovered at UCSD.

HNC, INC.

Robert L. North, President
5501 Oberlin Drive
San Diego, CA 92121
(619) 546-8877

HNC, Inc., formerly Hecht-Nielsen Neuro-Computer, was founded in October 1986 by Dr. Robert Hecht-Nielsen and Todd Gutchow. HNC is the first company solely devoted to supplying neural network hardware, software, applications training, and customer support to commercial and aerospace/defense industries. Neurocomputers, the hardware implementation of neural networks, are self-programming computer systems whose structure resembles that of the brain and nervous system.

HYBRITECH INCORPORATED
Donald Grimm, President
11085 Torreyana Road
San Diego, CA 92121
(619) 455-6700

Hybriftech Incorporated is a worldwide research-based corporation that develops, manufactures, and markets human medical diagnostic products utilizing monoclonal antibodies. Hybriftech is also engaged in the research and development of therapeutic products from monoclonal antibodies.

IMMUNETECH PHARMACEUTICALS
Gordon V Ramseier, President
11045 Roselle Street
San Diego, CA 92121
(619) 457-2553

Immunetech Pharmaceuticals was founded in 1981 and employs 80. The company is pioneering the discovery and commercialization of small peptides for the treatment of human immune system abnormalities. The company's first compound, pentigetide, is an anti-allergy product line which is awaiting FDA approval. The second product, TCMP-80, for autoimmune diseases, will begin human testing on multiple sclerosis during 1988.

KAYPRO CORPORATION
David Kay, President
R.O. Box N
Del Mar, CA 92014
(619) 481-4300

Kaypro Corporation develops, manufactures, and supports a wide range of quality microcomputer systems. The company markets its general purpose computers primarily to businesses and professionals. Currently, the company has over 500 employees.

MICROBIO RESOURCES, INC.
Dexter W Gaston, Jr., President
6150 Lusk Blvd., B 105
San Diego, CA 92121
(619) 587-0600

Microbio Resources is a biotechnology company dedicated to the commercialization of products from algae. Microbio produces provatene[®], an all natural beta carotene concentrate, and is currently focusing its attentions upon the use of natural carotenoids as nutritional supplements, food colorants, and animal feed ingredients.

MYCOGEN CORPORATION
Deborah J. Ferris
Director, Public and Shareholder Relations 5451
Oberlin Drive
San Diego, CA 92121
(619) 453 8030

Mycogen Corporation develops bio-pesticides to protect agricultural crops from insect and weed damage. Founded in 1983, Mycogen was the first company to receive ap-proval from the EPA to field test a microbial bio-pesticide product developed with recombinant DNA techniques. Mycogen's products are based on microorganisms and the biotoxins they produce. These products effectively eliminate targeted weeds and insects but do not harm other closely related plant species or beneficial insects. Since Mycogen products are developed from natural agents, they are safer to use and more environmentally compatible than chemical pesticides.

QUALCOMM INCORPORATED
Dr. Irwin M. Jacobs, President and CEO
10555 Sorrento Valley Road
San Diego, CA 92121
(619) 587 1121

QUALCOMM specializes in telecommunications and information processing to provide systems design, research, development, and manufacturing services for a broad range of satellite, airborne, and terrestrial applications for both government and commercial applications. QUALCOMM began operations in July 1985. Two of the founders, Dr. Irwin M. Jacobs and Dr. Andrew J. Viterbi, Chief Technical Officer, were the founders of Linkabit Corporation.

QUIDEL

Joseph Stemler, President and CEO
11077 N. Torrey Pines Road
La Jolla, CA 92037
(619) 450-1533

QUIDEL is a biotechnology company with a strong science base in immunology protein chemistry, and molecular biology in both diagnostics and therapeutics. It produces rapid immunodiagnostic assays such as tests for pregnancy, fertility, Strep A, allergies, and bovine progesterone, which require no instrumentation for the professional and home health care markets. Therapeutics are targeted for the treatment of allergy, allergic asthma, and autoimmune diseases.

ROHR INDUSTRIES, INC.

Dr. Alek Mikolajczak, Vice President, Technology & New Products
P.O. Box 878
Chula Vista, CA 92012-0878
(619) 691-2478

Rohr, a leading aerospace supplier, provides propulsion system integration, design, development, manufacturing, and support services to the aerospace industry worldwide. Rohr conducts product research and development in advanced composites and metals, high-temperature materials, acoustics and manufacturing processes for existing and future applications.

SCIENCE APPLICATIONS INTERNATIONAL CORPORATION, INC.

Dr. J.R. Beyster, President
10260 Campus Point Drive
San Diego, CA 92121
(619) 546-6503

Science Applications International Corporation (SAIC) was started in San Diego 19 years ago as an ownership sharing company. A high-technology company, SAIC's business is largely research and development. Its employees now number nearly 7,000 throughout the U.S. While maintaining an annual growth rate of about 15-20%, SAIC remains employee-owned and committed to that concept.

SCIENTIFIC COMPUTER SYSTEMS CORPORATION

Barry Rosenbaum, President and CEO 10180 Barnes Canyon Road
San Diego, CA 92121
(619) 546-1212

Scientific Computer Systems Corporation (SCS) is a privately held company founded in 1983 that manufactures, sells and services the SCS-40, the fastest near-supercomputer and only true Cray-compatible system available to day. Currently, systems are installed in Fortune 500 companies, government laboratories and universities. The SCS system achieves 50 to 300 percent faster performance than comparably-priced competitive systems by virtue of its unique architecture that includes a patented, high-speed bus structure.

SYNBIOTICS CORPORATION

Edward I Maggio, Ph.D., President
natlViaFrontera
San Diego, CA 92127
(619) 451-3770

Synbiotics is a leading biotechnology company applying proprietary monoclonal antibody technology to the commercialization of human and veterinary products useful in diagnosis, prevention, and treatment of disease. The firm currently markets nine products. For the future, it is establishing a leadership position in anti-idiotypic monoclonal antibody technology. The company was founded in 1982, employs 119 people, and has recently completed a profitable fiscal year.

SYNTRO CORPORATION

Cam Garner, President
10655 Sorrento Valley Road
San Diego, CA 92121
(619) 453-4000

Syntro uses the tools of modern biotechnology to produce products for animal health market, specialty chemicals, and human health markets. Syntro's first products, vaccines against diseases of swine, cattle, and poultry, are being produced and marketed from SyntroVet, a subsidiary located near Kansas City, Kansas. Founded in 1981, Syntro currently has 90 employees.

SYSTECH CORPORATION

Dean B. McDaniel, President
6465 Nancy Ridge Drive
San Diego, CA 92121
(619) 453 8970

Systech Corporation is a producer of data communication products for the OEM computer market. The company, which was started in 1981, currently has 150 employees and sells its products internationally.

TALARIS SYSTEMS INC.

Lawrence J. Alves, Vice President, Finance & Administration
6059 Cornerstone Court West
PO. Box 261580
San Diego, CA 92126
(619) 587 0787

Talaris Systems Inc. develops advanced laser printing systems and markets them to businesses and organizations needing solutions for quality in-house document preparation and production. Talaris recently developed a sophisticated new laser printer architecture designed to support local area printing in a networked or multi-user computing environment. Founded in January 1983, Talaris has 90 employees.

TEST, Inc.

Gloria Ma, Chairman
4025 Avati Drive
San Diego, CA 92117
(619) 272 2299

TEST is a manufacturer of instruments used to measure critical, physical properties of composite materials. The company's customers include aerospace manufacturers, automotive manufacturers, sporting goods manufacturers, composite material suppliers, government agencies, universities and research institutions.

VALOR ELECTRONICS

Jack VanderKnyff, President
6275 Nancy Ridge Drive
San Diego, CA 92121
(619) 458-1471

Valor is a rapidly growing magnetic technology-based company which produces components and subsystems for the computer and communications market. Valor has strong off-shore manufacturing in Mexico, Hong Kong, and China.

INVESTMENT BANKING FIRMS

FIRST AFFILIATED SECURITIES

William Patton, Senior Vice President 6970
Miramar Road
San Diego, CA 92121
(619) 578-9030
