Childhood in an Anti-Black World: The Question of the Human in Developmental Psychology
 May 29 | 12:00 AM - 1:30 PM | Cross-Cultural Center

Ecological systems theory scholars in the field of Psychology correctly detected a problem: that of dehumanization occurring in the world (Bronfenbrenner: Making Human Beings Human, 2004). However, as Sylvia Wynter has explained, a fundamental error is being made when modern/colonial capitalist Man is assumed to represent the human and the color line is ignored. This discussion addresses that problem directly by elaborating an explicitly critical framework that accounts for capitalism's history of colonialism in which ecological perspectives can be nested. Further, we explore the theoretical and practical implications of a deepened conceptualization of macrosystemic and chronosystemic contributors to development for black youth.
