

## Special Fellowships and Regents Fellowships Granted some UCSD students

**August 30, 1963**

James H. Benford, son of Lt. Col. and Mrs. James A. Benford, will attend the University of California, San Diego, during the coming year as one of four scholars to receive a Special Fellowship, Chancellor Herbert York has announced.

The Special Fellowships were founded under a recent grant from Aerojet-General Corporation, Azusa, California.

At the same time, James Benford's twin brother, Gregory A., will attend UCSD under a Woodrow-Wilson Fellowship.

Both will be enrolled in UCSD's Physics Department. They are 1963 graduates of the University of Oklahoma, Norman.

The San Diego campus of the University of California is at present a graduate school specializing in the sciences. It is the home of the world-famous Scripps Institution of Oceanography and the School of Science and Engineering. This year, the first graduate students in the humanities will be admitted. Undergraduates will be admitted in 1964.

C. W. Horton, Jr., son of Dr. and Mrs. C. W. Horton, will attend the University of California, San Diego during the coming year as one of four scholars to receive a Special Fellowship, Chancellor Herbert York has announced.

The Special Fellowships were founded under a recent grant from Aerojet-General Corporation, Azusa, California.

Horton will be enrolled in UCSD's Physics Department. He is a 1963 graduate of the University of Texas.

The San Diego campus of the University of California is at present a graduate school specializing in the sciences. It is the home of the world-famous Scripps Institution of Oceanography and the School of Science and Engineering. This year, the first graduate students in the humanities will be admitted. Undergraduates will be admitted in 1964.

Robert Henry Stewart II, son of Mr. and Mrs. Robert H. Stewart, will attend the University of California, San Diego, during the coming year as one of four scholars to receive a Special Fellowship, Chancellor Herbert York has announced.

The Special Fellowships were founded under a recent grant from Aerojet-General Corporation, Azusa, California.

A graduate of Laneri High School, Mr. Stewart, who is 21, received a B.S. in physics from Arlington State College in June.

At UCSD, he intends to specialize in physical oceanography, in which he will work with the faculty and staff of the world-famous Scripps Institution of Oceanography.

The San Diego campus of the University of California is at present a graduate school specializing in the sciences. This year, the first graduate students in the humanities will be admitted. Undergraduates will be admitted in 1964.

W. Linwood Sutton, of Kinston, North Carolina, and a 1963 graduate of Hampton Institute, has been awarded a Regents Fellowship to attend the University of California, San Diego, during the coming year Chancellor Herbert York has announced.

Regents Fellowships are given to scholars of demonstrated academic excellence." Mr. Sutton, 22, is one of five students to receive one at UCSD this year.

He will study geophysics in the Department of Earth Sciences.

The San Diego campus of the University of California is at present a graduate school specializing in the sciences. It is the home of the world-famous Scripps Institution of Oceanography and the School of Science and Engineering. This year, the first graduate students in the humanities will be admitted. Undergraduates will be admitted in 1964.

Lowell D. Brenneman, 1963 graduate of UCR, has been named one of five recipients of Regents Fellowships at the San Diego campus of the University this year Chancellor Herbert York has announced.

Regents Fellowships are given to scholars of "demonstrated academic excellence." Mr. Brenneman majored in chemistry at UCR.

He will work in the Biology Department of the School of Science and Engineering.

The San Diego campus is at present a graduate school specializing in the sciences. It is the home of the world-famous Scripps Institution of Oceanography and the School of Science and Engineering. This year, the first graduate students in the humanities., nine philosophy students, will be admitted. Undergraduates will be admitted in 1964.

Robert J. Livingston, son of Mr. and Mrs. Robert S. Livingston, will attend the University of California, San Diego, during the coming year as one of four scholars to receive a Special Fellowship, Chancellor Herbert York has announced.

The Special Fellowships were founded under a recent grant from Aerojet-General Corporation, Azusa, California.

A graduate of Ridgewood High and of Princeton, Mr. Livingston comes to TJCS D after two years at Columbia University, where he majored in zoology.

Mr. Livingston will specialize in the study of ocean vertebrates. He will work with the faculty and staff of the world-famous Scripps Institution of Oceanography.

The San Diego campus of the University of California is at present a graduate school specializing in the sciences. This year, the first graduate students in the humanities will be admitted. Undergraduates will be admitted in 1964.

Miss Kyoko Tokusei, 1963 graduate of International Christian University, Tokyo, has been awarded a Regents Fellowship to attend the University of California, San Diego, during the coming year, Chancellor Herbert York has announced.

Regents Fellowships are given only to scholars of "demonstrated academic excellence." Miss Tokusei, 22, is one of five students to receive one at UCSD this year. She is the only girl in the group.

She will study chemistry at UCSD. The San Diego campus of the University of California is at present a graduate school specializing in the sciences. It is the home of the world-famous Scripps Institution of Oceanography and the School of Science and Engineering. This year, the first graduate students in the humanities will be admitted. Undergraduates will be admitted in 1964.

Daniel L. Drake, has been named one of five recipients of Regents Fellowships at the San Diego campus of the University of California this year, Chancellor Herbert York has announced.

Regents Fellowships are given to scholars of "demonstrated academic excellence."

Mr. Drake, 21, is a 1963 graduate of Reed College. At UCSD, he will work in the Department of Biology of the School of Science and Engineering.

The San Diego campus is at present a graduate school specializing in the sciences. It is the home of the world-famous Scripps Institution of Oceanography and the School of Science and Engineering. This year, the first graduate students in the humanities will be admitted. Undergraduates will be admitted in 1964.
