Principal office--1201-1207 Welton St Denver, Colo.

- I. Otto Shatz Location.
- 3. C. & H. No. 2, Survey No. 13048.
- 2. Golden Gad Survey No. 13048.
- 4. C. & H. Survey No. 11267.

The Williams, survey No. 295, which is the deepest mine in the Lake district, being 775 feet deep, has produced \$1,250,000.

The Justice, survey No. 394, has a record of \$1,500,000, whose vein has

been worked for nearly 3,000 feet along the surface, but one shaft has been sunk to a depth of 500 feet, and the present operators are sinking another 100 feet, which is still in good ore. This shaft has produced between \$300,000 and \$400,000.

The Notaway, survey No. 328, produced last year \$90,000, which is less than 1,000 feet from our present group.

The Pittsburg, survey No. 871, is producing about \$7,000 per month.

The Belmont Chemung property, survey No. 529, has produced \$100,000.
The Success, survey No. 5280, has

produced \$75,000.

We might continue indefinitely in describing the good producing mines surrounding our property, but that would not recommend our location any better than the above mines are doing.

Robert H. Hastie, our president and general manager, was raised in this vicinity and has been connected with mining since twelve years of age.

He has put in fifteen years in the underground workings of mines, and has made a greater success in the last three years than any one mining man in Gilpin county. His practical experience gives him the advantage over the theoretical expert. Mining has been his life study and therefore he should make a most valuable man for the company. References: Any of the banks and business men of Central City, Colo.

Otto Shatz, our treasurer, is a prominent, and one of the oldest business men in the city of Denver. Has been in the grocery and meat business for the past twenty-two years and he has made a wonderful success of it. During this time he has been inter-

ested to a great extent in mining and therefore is competent to carry on the financial end of the business, and will see that all interests of the company will be properly guarded.

References: "Dunn's," "Bradstreet," or any wholesale merchant, and the Colorado National Bank of

Denver, Colo.

This company was incorporated Oct. 31st, 1904, under the laws of the state of Colorado, for the purpose of doing a strictly legitimate mining business.

CAPITALIZATION

Is for \$500,000; divided into 500,000 shares of stock, of the par value of One Dollar each; fully paid and non-assessable

The company proposes to place 100,000 shares of stock in the treasury to raise a working fund to open up the property. We have three distinct veins that show up good values on the surface and are very promising. We consider them well worthy of a trial. If you want to join us now is your time. As soon as the first 25,000 shares which we now offer at 10 cents per share is sold, the price of the stock will be advanced.

ALL SHOULD BE INTERESTED

Mayor of Greater Denver Believes that Chances for Fortunes are Greater in Mining than in Any Other Line.

[&]quot;Every man in Denver should be a miner.

"I do not mean that every man here should take a pick and a shovel or a hammer and a drill and go into the mining camps and work for day's pay, but every man should be interested in mining according to his financial ability.

"Not every man can own a mine, because if there were a mine for every man gold would be so plentiful as to be of little or no value, but every man may own part of a mine or part of a prospect and can put a little—be it ever so little—into the development of the ground.

"Denver is now and must ever be the mining center of the country.

"Denver does not mine as she should," the mayor persisted. "Of course, a lot of mining is done here, and with very few exceptions all the big fortunes have been made in mining. Some of the shrewdest business men realized early in their career that mining has unlimited possibilities. They went at it energetically and great fortunes have resulted."

"Mining is a business, not a speculation, and the element of luck, if there be such a thing as luck, does not enter into it to any greater or less degree than in any other legitimate business, and the man who puts his brain and energy to mining will succeed. When we reflect on the interesting fact that after fifty years of uninterrupted mining in Colorado new ore shoots are still being discovered in Gilpin county, where the first gold was found, we are bound to conclude that mining is just in its infancy.

"I do not intend to encourage indiscriminate mining, but there are many ways that a man can invest a little or a big sum in prospecting or mining where he can see that it is honestly spent.

"Mining is the greatest business on earth, and every dollar that comes out of a mine helps everybody. It is the cleanest money that can be made, if we include the returns from the soil. No one lost that you might gain."—From the Denver Post, Aug. 5, 1904.
