

New bookstore at UCSD under management of C.A. Valverde

September 10, 1963

A new bookstore for students at the San Diego campus of the University of California has been opened in Building B on Torrey Pines Mesa.

It is managed by C. A. Valverde.

The opening of the bookstore marks still another step in the expansion of activity on the Torrey Pines Mesa campus. Philosophy seminars will be held regularly in Building B when classes open on Monday, September 16.

Located in the building, first in the School of Science and Engineering to be occupied, are many of the campuswide administrative offices, the University Library, the office of the Dean of School of Science and Engineering, and other activities.

The student bookstore in Building B is the second to be established on the UCSD campus. The other is in Thomas Wayland Vaughan Aquarium-Museum.
