

MUIR BORN TODAY!

Dr. John Galbraith who handed in his resignation as Chancellor of UCSD last Friday, is seen here reviewing the model of John Muir College. The second college will adopt its own campus in 1969.

GREATER ACADEMIC CHOICE OFFERED AT UCSD's 2nd COLLEGE

What? Classrooms in Quonset huts? Temporary dormitories? Is this John Muir College?

Pioneering Muirians will find further primitive accommodations as they move into their Matthews Campus headquarters today. After the first rains, entering freshmen and juniors will understand why last year's residents in Matthews were known as the "Dirty Diehards." It's a long walk from Matthews to Revelle, especially when the rains come. But these men can take it--they're following in the footsteps of their hero, John Muir, pioneer of the wild, wild West.

But, says John Stewart, provost of UCSD's second college, Muir is for the adventuresome.

"One difference between the two colleges," Stewart explains, "is that Muir students have more options and time to meet the breadth requirements than their colleagues in Revelle have."

In fact there are 5 different ways to meet the math require-

ment, 4 for humanities, 2 for science, and 12 for contemporary issues.

Having such a freedom of choice, however, challenges the student to define his educational goals before he even samples his tough college curriculum. Each freshman is assigned a faculty adviser during Orientation Week in order to plan an educational program with "balance and rationale."

"The student and adviser sit down together," says Stewart, "and plan an academic program for the whole year, which the student has developed by himself beforehand. At this time the adviser helps the student define his goals, and after considering the results of the placement tests taken during this week, a schedule of classes is worked out."

Unlike Muir, Revelle College offers a vigorous curriculum, which leaves little time for electives in the lower division.

GALBRAITH RESIGNS

TWO MAJOR TOP-LEVEL ADMINISTRATIVE CHANGES GREATLY AFFECTING THE UNIVERSITY OF CALIFORNIA AND ITS SAN DIEGO CAMPUS WERE ANNOUNCED FRIDAY AFTERNOON BY THE UNIVERSITY BOARD OF REGENTS MEETING ON THE LOS ANGELES CAMPUS.

In a late afternoon session the board accepted the resignation of Dr. John S. Galbraith as Chancellor of the San Diego campus, a post he has held since December 1, 1964. In an earlier session, the board named Vice President Charles J. Hitch as President of the University.

Galbraith resigned his post--effective September 1968--in order to accept the prestigious Smuts Visiting Fellowship at Cambridge University for the year 1968-69. Galbraith's resignation, submitted a year in advance to permit the Regents ample time to select a successor, was announced following the meeting by Regents' Chairman Theodore R. Meyer and UC's Acting President Harry R. Wellman.

The 50-year old Galbraith, a native of Glasgow, Scotland, is an authority on British Empire history. The Smuts Fellowship is named after Jan Christian Smuts, the famed Prime Minister during the two World Wars.

of the Union of South Africa.

Galbraith has been Chancellor at San Diego since December 1, 1964. In the intervening three years, under his leadership, enrollment at UCSD has grown from 500 to about 3,100 students. Wellman, in a letter acknowledging "with regret" Galbraith's resignation, noted that he had "made very important contributions to the welfare of that campus and to the University," assembling "an excellent administrative staff" and adding "to an already outstanding faculty."

Wellman told Galbraith that "you can be justifiably proud of the progress which the campus has made under your leadership." And he termed the Cambridge appointment "a well deserved recognition of your high scholarship" which "adds to the distinction of the University" of California.

Galbraith said he would leave San Diego "with very great regret" but believed "that I should return to teaching and scholarship."

The Chancellor received a B.A. degree from Miami University, Oxford, Ohio, in 1938, and Master's and the Ph.D. degrees from the University of Iowa. He taught at Osceola Junior College and the University of Iowa, with time out during

DR. JOHN GALBRAITH

World War II to serve as Historical Officer for the Army's Third Air Force. In 1946-47 he was Associate Professor and chairman of the history department at Mount Union College in Alliance, Ohio, and Assistant Professor at Ohio University in 1947-48.

Dr. Galbraith joined the faculty of UCLA in 1948 as an Assistant Professor, becoming Associate Professor in 1952 and Professor in 1958. In July, 1964, he went to San Diego, serving briefly as Vice Chancellor and Professor of History until his appointment as Chancellor.

Following the announcement of his resignation, Dr. Galbraith released the following prepared statement:

During the past three years I have been an administrator in one of the most exciting educational developments in the United States and in the most attractive environment, physically and climatically, in the country.

The Regents searched for more than a year before naming Galbraith as Chancellor.

If I were to continue in administration, I can think of no other university with which I would wish to be associated. But I have had to make a choice between administration and scholarship, and I have concluded that if I am to return to scholarship, I must do so soon.

The invitation from Cambridge brought the issue to a focus, and I have decided to accept the Smuts Visiting Fellowship in 1968-69. This is the reason--the sole reason--for the decision.

Galbraith is the second chancellor to serve UCSD in the short history of the campus. He succeeded Dr. Herbert York who announced his resignation in 1963 for reasons of health. Dr. York has remained on the UCSD campus as a Professor of Physics.

Hitch, 57, former assistant U.S. Secretary of Defense, was named to succeed ousted President Clark Kerr. Reliable sources said that Hitch was given the backing of Governor Reagan, who voted for Kerr's dismissal last January 20.

Grants Go To 23 Frosh

Twenty-three students who will be entering freshmen this fall have been named to receive UCSD Honorary Alumni Scholarships. Sixteen of the students are from San Diego County.

Tom Ham, president of the Honorary Alumni, announced that a total of \$20,524 has been made available in financial aids to the students, who were chosen on the basis of their educational promise and financial need.

The scholarship money includes donations by Honorary Alumni, matched by Regents' funds from the New Campus Program, and Educational Opportunity Grants, student loans and work-study grants, Ham said.

UCSD Honorary Alumni consist of San Diegans dedicated to assisting the young campus, which does not yet have an alumni group of its own. For several years, the Honorary Alumni have provided financial assistance to entering freshmen showing high academic promise.

A complete list of Honorary Alumni scholarship recipients follows: Lenora Adams, Lynn Andrews, Patricia Bennett, John Bersell, Jess Boyer, Michael Connole, Charlotte Cysner, Gary Elem, Kenneth Fabricatore, John Garrison, Susan Gretz, Kim Hamilton, Linda Hardin, Carolina Holguin, Frances Jenkins, Valerie King.

Editorial "Incidental Fee" - The Mysterious Benefactor

The guns of complaint always spew forth when the word is out that tuition may be demanded or that some other miscellaneous fee may be tacked onto the increasing list of student grievances. Yet while this barrage of artillery is going on outside, very few seek to find out where the \$700,000 we pay every year is ending up.

This huge sum, mysteriously labeled "Incidental Fees," has some tremendous uses of which we should all be aware. Contrary to the idea that California state taxes are providing all of our spacious monuments to architecture, these student paid "Incidental Fees" have produced the newly completed natatorium.

How will the future Matthews student activities building be able to rise from the ground level? Only incidental fees paid by the students will nourish its growth. The bleachers at the new gym from which the University students will cheer our basketball team will be provided by these "Incidental Fees."

Similarly, when the radio station has been completed, incidental fees will have paid a sizeable chunk of the final bill.

Despite the immensity of these projects, the greatest single service these fees uphold is the Student Health Service. One third of the entire quarter's revenue made through "Incidental Fees" keeps the growing ranks of UCSD student physically capable to face one of the most rigorous curriculums in the country.

Just a few more illustrations.

The \$75 check we make out to the University each quarter also pumps the blood of the intercollegiate sports system. Guidance counseling, laboratory fees, use of library books, placement services, student publication equipment, and student planned lectures and programs all pinch their pennies from the same pocket.

What makes these dollars greener than those donated by the Regents of the University is that the expenditure and control of these funds are, in large part, a privilege of the students. In particular, A. S. Vice-President Herv Sweetwood, UCSD undergraduate Helen Cost and graduate student D. A. Johnson comprise the advisory committee which works closely with the Chancellor in the channelling of the money.

Yet, there are students who would have us believe that the University is an evil usurper of student influence which has its great bulk deployed for exclusive use in the "Sap-Student-Strength" league of America.

While the University maintains certain controls over students' activities, some would want student activities free from such social, political and academic "barriers to progress." What would the rest of us have in exchange? A ship without a rudder, a tree without roots.

These mysterious "Incidental Fees," then, are one of the students' most effective assets at UCSD. They provide the student body with an excellent means of translating its enthusiastic hopes into the tangible hallmarks of a fine university.

There is even some comfort for the wary, for they can feel confident that students are there to help out and divide this big pie. After all, isn't this one of our best assurances against the possibility of a "tyrannical" administration?

- BIG MEN ON CAMPUS -

UCSD CHANCELLOR Dr. John Galbraith

Chancellor's Welcome:

Whatever else one may say of UCSD, it cannot be said that we are static and unchanging. Those of you who are returning will see quite a change in the physical appearance of the campus. There will be continued physical change throughout your tenure here, and for many years thereafter. I hope that this characteristic also reflects our receptivity to new ideas. This campus is young, and it would be sad if it were already suffering from hardening of the arteries. I think I can speak for the provosts and for the faculty when I say that we welcome student participation in making UCSD a truly outstanding university and that we hope that you will join with us

as members of the university community to that end.

My best wishes to all of you for a successful year.

Background:

After 16 years at UCLA as a history professor, Chancellor Galbraith succeeded Herbert York on December 1, 1964 as the second chancellor of UCSD. Chancellor John S. Galbraith is a noted authority on British Empire History. He also is a member of several organizations, including the American Historical Association, Society of American Historians, Royal Historical Society, the African Studies Association, Canadian Historical Association, and Phi Beta Kappa.

The Galbraiths have three children and reside at University House in La Jolla Farms.

AS PRESIDENT Richard Altenhoff

Welcome from Associated Student Body President:

There was a time when Revelle College was nothing more than a conglomeration of mud flats and bulldozers. Returning students will recall this chaotic period with a touch of nostalgia. Notice, however, that Revelle is now completed and for the first time has usable sidewalks. Revelle, rejoice!

Muir College students beware... your "home" is not your own. You are now located in the "staging college." That dust blowing across Miramar Road is part of your permanent campus; when the dust clears Muir College will appear.

Yes, all UCSD students have been and will continue to be subjected to a life of wet cement and plywood sidewalks. New

students must be oriented to this life at "Malleable U," those of you continuing must re-orient yourselves to the fact that we are now UCSD and not just Revelle College.

Things, however, are not as grim as they appear. In addition to physical construction, construction is also taking place in Educational Policy, your AS and a multitude of other aspects concerning students.

We've come a long way through the mud and plywood sidewalks, and now with the addition of the new students and the anticipated cooperation of many--optimism is the word for '67-'68.

Welcome to UCSD!

MUIR PROVOST

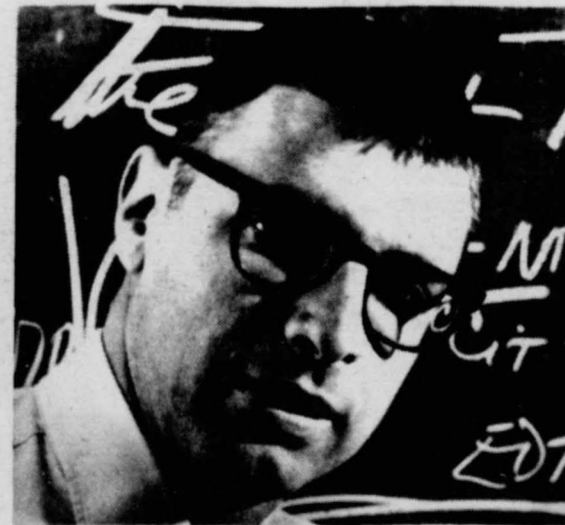

Dr. Stewart

Dr. John Stewart was born in Alton, Illinois in 1917. He received an A.B. degree in English and music in 1938 from Denison University. He received his M.A. degree in 1939 and his Ph.D. degree in English in 1947, both from Ohio State University. From 1939 to 1947 he served at Ohio State University as a Teaching Assistant and, following three years in the army, as an instructor. He joined the staff of the University of California, Los Angeles in 1947 as an instructor in English. In 1949 he was appointed Professor at Dartmouth College and in 1962 was named Associate Director of Hopkins Center at Dartmouth. He joined the UCSD staff as Professor of American Literature in 1964 and six months later was named Provost of John Muir College.

As Provost, Dr. Stewart has a voice in nominating

REVELLE PROVOST

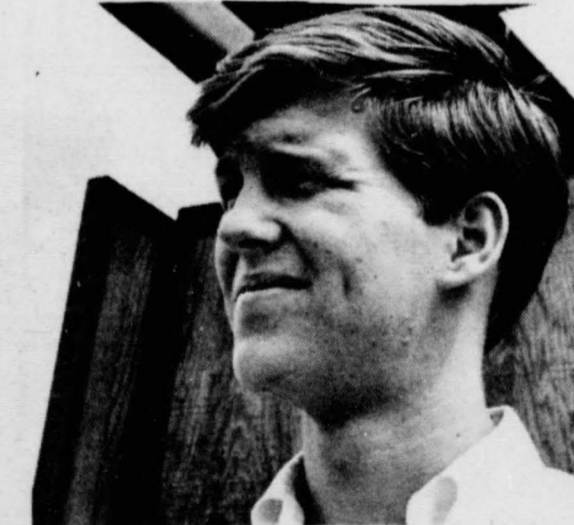

Dr. Saltman

A transfer from the University of Southern California, Provost Paul Saltman succeeds Dr. Hugh Bradner as Revelle College's academic chief. At USC Saltman was a professor of biochemistry for undergraduates and graduates. He also conducted graduate classes in metabolism enzyme chemistry and specialized techniques in biochemistry.

Saltman was born in Los Angeles in 1928. He graduated from the California Institute of Technology with a B.S. degree in Chemistry in 1949 and did graduate research work in biochemistry at the College de France in Paris in 1949-50. In 1953 he received a Ph.D. in Biochemistry at Cal Tech. In the same year, he joined the USC faculty as an instructor of Biochemistry.

Appointed by the Regents on Feb. 15, 1967, Saltman became the fourth provost or acting provost of

AS VICE-PRESIDENT

Herv Sweetwood

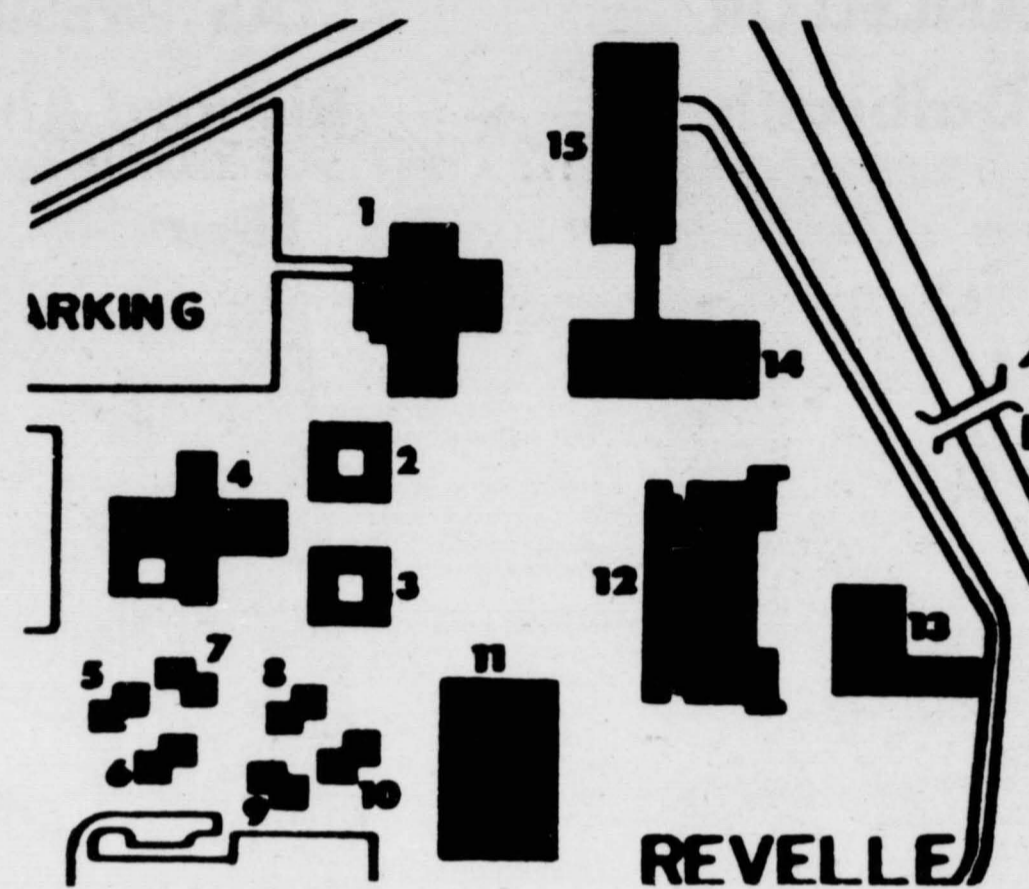

Herv Sweetwood, a junior with an AMES major, was born in Glendale, California. For the last eight years he has resided in El Cajon in East San Diego County where he attended Grossmont High School.

Upon entering the University of California at San Diego, Herv joined the inter-mural sports program at the University.

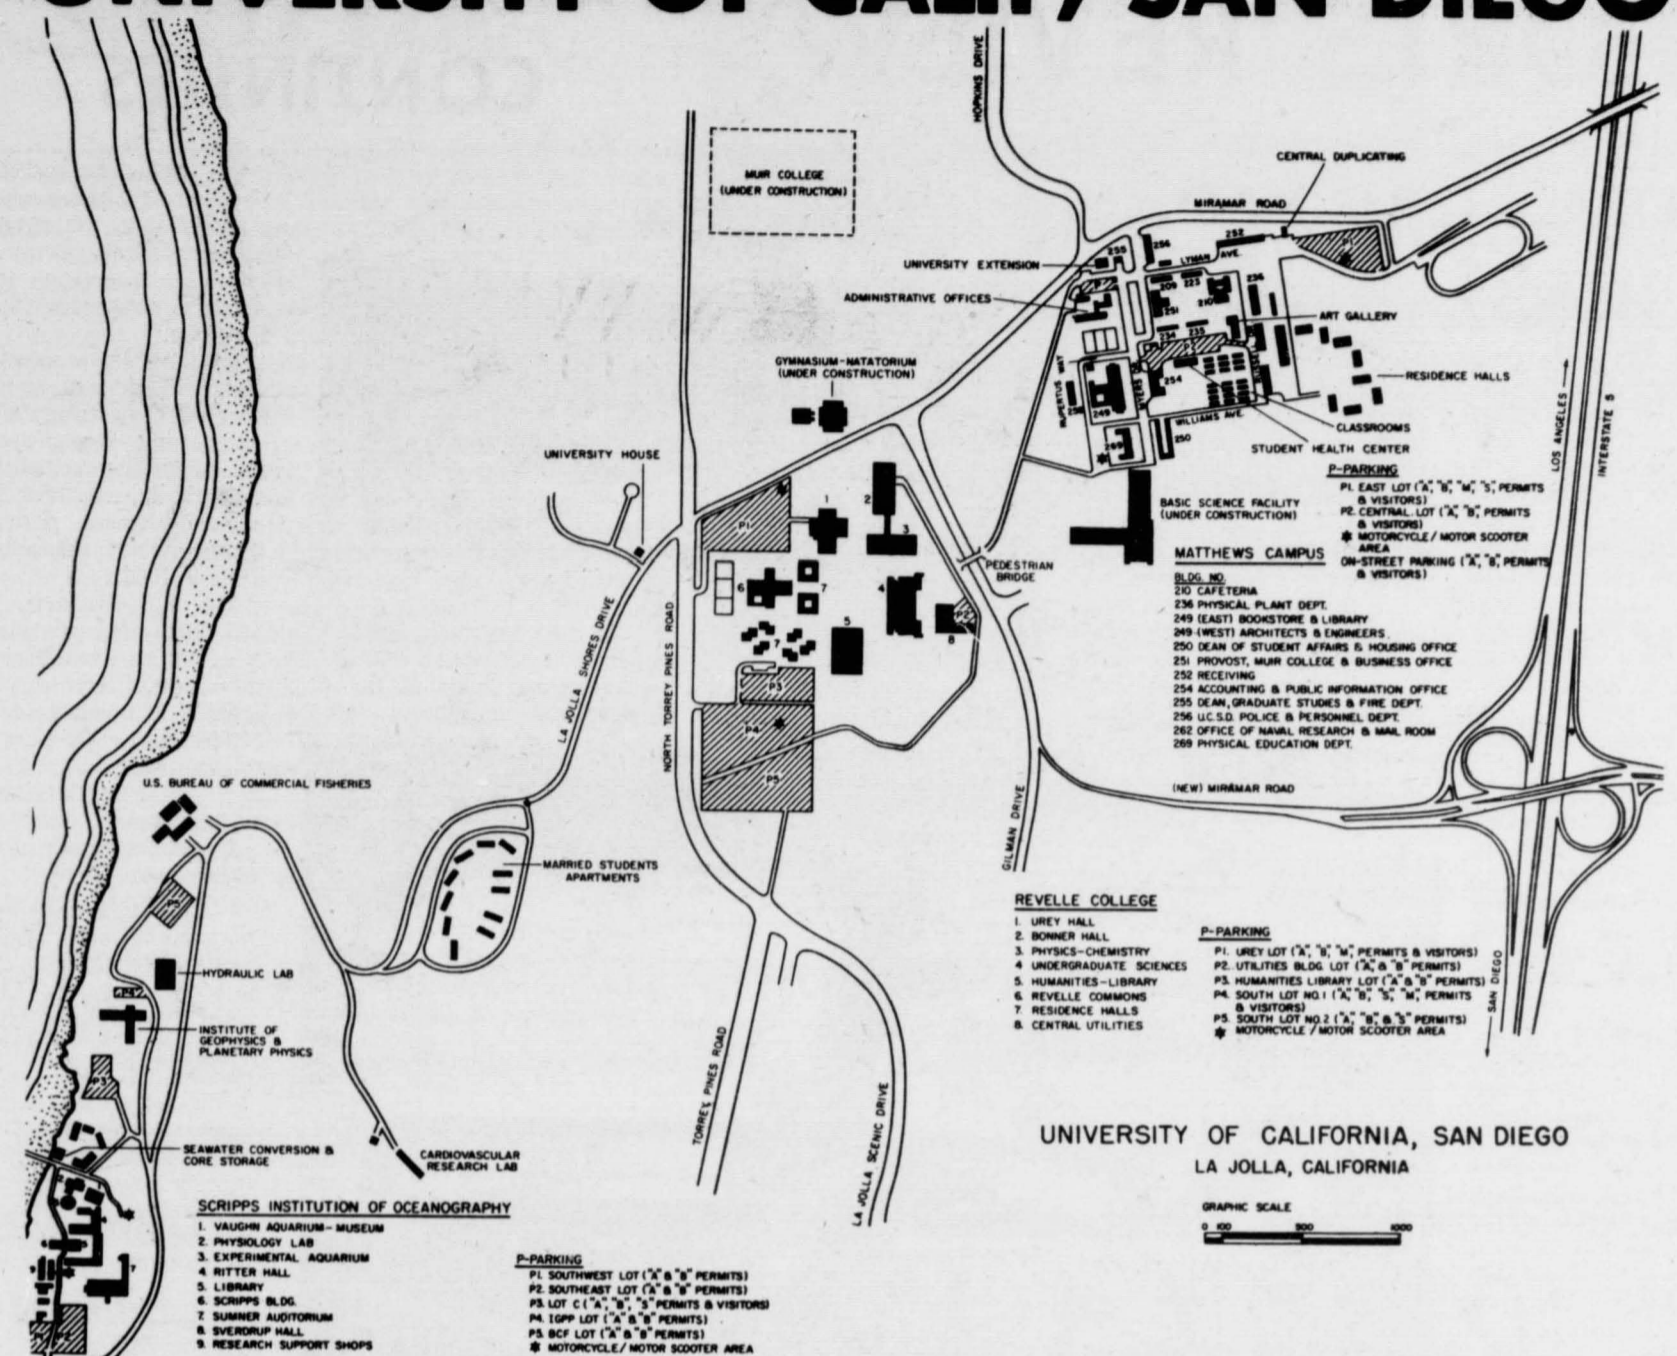

In his second year here, he was the president of Beagle Hall and a member of the "California Club." Maintaining his athletic record from the year before, Sweetwood became a member of the UCSD inter-collegiate Rugby team.

Our AS Vice-President's interest in politics stemmed from last year's "Buses to Sacramento" tuition rally, at which time he became an active

- SOCIEDAD HISPANICA (SPANISH CLUB): Robert Tyce.
- SCRAM: Student Committee for the Return of Aristocratic Monarchy. "To present the case for an aristocratic monarchy and show its cultural heritage and relativeness to the UCSD campus."
- SDS: Students for a Democratic Society. "To create a sustained community of educational and political concern. (We) feel the urgency to put forth a radical democratic program, whose methods embody the democratic vision."
- HUELGA: "To publicize and raise funds for the Ntional Farm Workers Association." Robert M. Philmus.
- SYNANON, UCSD STUDENT SPONSORS OF: Connected with the correction facility for narcotics addicts.
- YOUNG REPUBLICANS: Promotion of the principles and ideals of the Republican Party. Charles Booth.
- UNIVERSITY INTERNATIONAL ASSOCIATION: To promote international understanding (connected with the American Field Service--AFS). Martin McAllister.
- Clubs and Organizations who have not turned in the budget form required by the Student Activities Office as of September 19, 1967.
- CCC: Campus Concerns Committee. "To investigate and release facts concerning student affairs." Paul Woodson.
- CHRISTIAN SCIENCE ORGANIZATION: Can Camp.
- EARLY MUSIC SOCIETY: Raymond Zavednick.
- FRENCH CLUB: Ronald Pezenas.
- GUN CLUB: Ted Skingel.
- UNIV. POCKET BILLIARDS CLUB: Joe Iwashita.
- SHATC: Society for Human Awareness in the Twentieth Century. "To create a discussion and service club with emphasis upon study of philosophers."
- SIL: Students of the Independent Left. James T. Bauerlein.
- SIL-ALTERNATIVES: "To issue a quarterly magazine published by students at UCSD." William Leiss.
- SURF CLUB: Ed Hutchins.

For information regarding formation of new clubs and organizations, contact the Student Activities Office.

YR'S PLAN YEAR

The Young Republicans Club of UCSD has announced its plans for the 1967-68 school year.

According to Charles Booth, president of the one year old organization, YR will present numerous speakers "who will speak about present issues of the day and the policies and goals of Republican Party."

Among the speakers expected to address the club and any interested students will be Sen. John Tower (R-Texas), Rep. Robert Wilson (R-San Diego), Assemblymen Pete Wilson and John Stull (R-San Diego), and Curtis Lemay (Ret. Gen., U.S. Army).

"Gov. Reagan may address our club in December if he attends the UC Regents meeting, scheduled at UCSD," Booth says.

Besides speakers, YR will also participate actively in local elections. "Such experience will benefit the members of our club, who wish to gain real knowledge of party politics," he said.

Among local GOP leaders to be invited to speak to students at UCSD, Booth lists Councilmen Jack Walsh and Mike Shaffer, who are both up for reelection this fall.

Because YR at UCSD is affiliated with the local and State Young Republicans organization, members are eligible to participate in conventions and county-wide meetings to be held throughout the year. YR members receive Republican materials and books along with these outside activities available to them.

YR also sponsors parties throughout the year and works with other San Diego colleges in promoting the GOP point of view, says Booth.

"We simply want to expose students to the Republican concepts of government and to let them share in policy-making on the local and state level. The College YR Convention in April affords a great opportunity to meet others from around the State and to share their views with other Republicans."

In addition to manning a club booth during Orientation Week, Young Republicans will also reach students through personal visits to the residence halls on campus.

For further information, contact Charles Booth, 488-8798.

With the help of interested students, faculty, and staff, a HAM RADIO STATION will be established on campus this quarter. There will be an organizational meeting on October 3, (Tuesday), at 6:30 p.m., in the Revelle Formal Lounge. Ham Radio has something to interest everyone, and one function of the club will be to help newcomers obtain their Ham Radio licenses. Questions??? Call Mike Ransom, ext. 2051.

SPORTS REVIEW

P.E. CONSTRUCTION CONTINUES

BASKETBALL TEAM HAS

HIGH HOPES

With six returning lettermen as a nucleus, Coach Neale Stoner plans to build an improved basketball team to match the improved schedule.

John Thomas leads the continuing cagers back on the court. Thomas was the team's leading scorer and top rebounder last year. Dick Reitherman, the 6'6" center from two years ago who sat out this last season, will be back to vie for that position.

Coach Stoner, speaking of his new prospects, spoke highly of a junior college transfer. Bill Flatley, 6'1" guard brings impressive credentials from the Glendale Junior College.

The freshmen team will take on a much more ambitious schedule than last year, said Stoner. The frosh coach, Barry Cunningham, is expected to greatly improve the junior circuit. The stan-out player from 5 years ago at Cal Western will welcome 21 freshmen prospects to UCSD. One of the top players of these newcomers is 6'2" guard Steve Thompson from Costa Mesa. The coaches see him as a fine player with a good style.

The possibility has arisen for a local tournament to be planned for the frosh teams of the area's four-year schools. This would be an annual event with the site rotating between the four schools involved. Coach Stoner said he would like to see the same type of tournament set up with the varsity teams competing. He felt that such a city-wide championship would create enthusiasm in both the players and the spectators.

When asked what he thought the highlights of the season would be, Coach Stoner said that the Christmas Tournament, Dec. 28 through 30 and the Riverside Classic in January could be counted as top events. Stoner's two toughest opponents, however, are thought to be Cal Western and the University of Redlands. Discussing this idea, Stoner observed, "Redlands always fields an excellent team."

BOOKS

Guinness Book of Olympic Records, by Norris and Ross McWhirter, Bantam Books, 75¢

This book is a must for the serious fan of the Olympic Games. Compiled by two of the world's leading factfinders, this volume provides a complete look at the modern Olympics, and provides short histories on the Games since their start in 1896. Not content with just the gold medal winners, the authors have included all medal winners in all events from both the Summer and Winter Games. By categorizing each event, it is quite easy to refer to records and compare them with present-day marks. World records are noted, and lists of medal winners by nations are included. A complete schedule of time and place for each event at next year's Mexico Olympiad caps this guide "to the greatest show on earth"

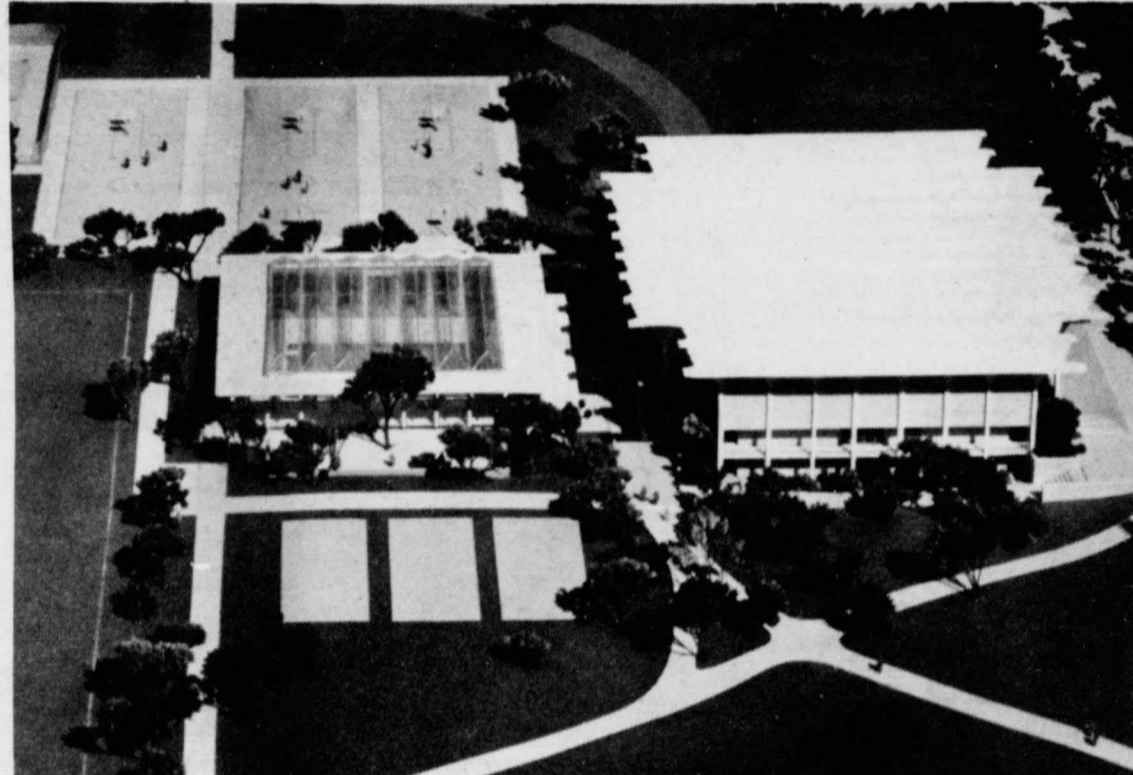

The UCSD sports program is extremely diversified, and is growing all the time. We have such sports as karate and intercollegiate surfing, and this year we will offer swimming, water polo, crew, and baseball for the

The 24 game slate provides for 7 home, 8 tournament, and 9 away games. The site of the home games has been moved to the Miramar NAS gym rather than La Jolla Country Day, which has been home ground in the past. The P.E. department is working out an arrangement with the Navy to provide easy student access to the gym.

All told, Stoner looks at the approaching season with cautious optimism for his improved team undertaking improved opponents.

Exterior view of the completed, but unlandscaped, pool. Architects model of the new P.E. Complex.

An intramural sports program is designed to offer all students an opportunity to participate in competitive athletics. Individual and team sports are scheduled for each quarter with the champions qualifying for the All-University week-end. This year forty-eight students, male and female, will travel to Berkeley for three days of fun and competition. An intramural handbook is available that offers schedules of activities, rules of conduct and eligibility for participation, and other intramural information. This handbook is free and may be picked up at the Department of Physical Education.

FOOTBALL ON THE GO (SOCCER STYLE)

The UCSD Soccer Team, under the management of Mike Pelling, is starting its third season of play today against the Spartan Soccer Club.

After a session of summer practices, with attendances that fluctuated greatly, the team is hopefully ready for a good season against local college and amateur teams.

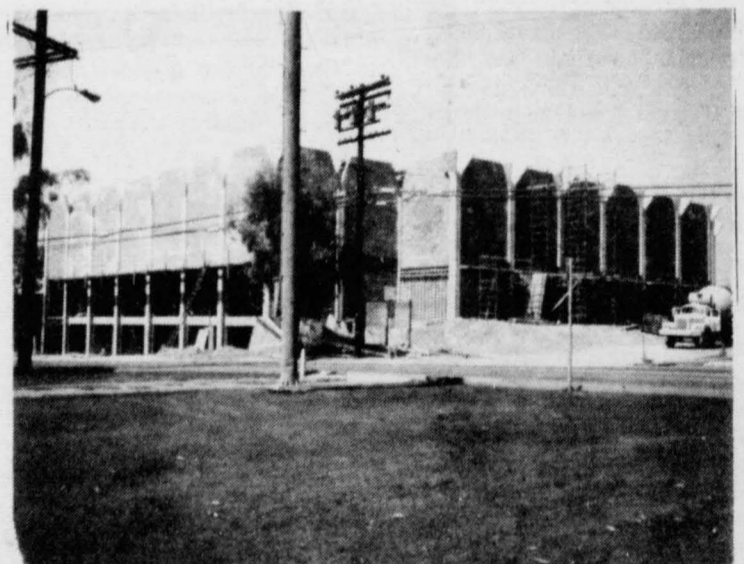

Since soccer at UCSD is not yet intercollegiate (though they do play against other colleges), any player or interested student can attend the practice sessions and enjoy playing a couple of hrs of the most popular sport in the world. This gives anyone the chance to learn and play soccer with the possibility of playing against organized teams every Sunday.

Regular practices are held on Tuesdays and Thursdays at 5:30 p.m. on the grass field south of the Matthews dorms. For further information, contact Mike

YOUR INVITATION

Each Wednesday evening from 6:00 to 9:30 pm, is Campus Recreation Night, at UCSD. All UCSD staff, faculty, and students are invited to attend these nights of exercise, relaxation, and fun. Facilities are available for those desiring such activity as weight-lifting, gymnastics, wrestling, karate, and trampoline.

"Rec. Nite" is designed to meet the athletic needs of the faculty, staff, and students as well as affording them a relaxing break from studies and schedules. It is likely that this program will be expanded to several nights of recreation a week in the near future. For further information contact the Department of Physical Education, Bldg. 269, MC, Telephone 453-2000, ext. 1362.

View of the gymnasium being constructed for the new P.E. complex.

Open Letter to Prospective Athletes

Dear Student: We invite you to extend your activity by joining us in the University of California at San Diego intercollegiate athletic program. Now in its fourth year of development, the program is growing by leaps and bounds, and includes basketball, baseball, wrestling, rub-y, crew, sailing, golf, cross-country, track, tennis, swimming and water polo, and is well worth your consideration. The number of teams is mushrooming, and the quality of the existing ones is soaring. Your participation will benefit you tremendously and can help better the program even more.

You undoubtedly have heard of the tremendous academic work load here at UCSD, but be assured, you will have time for sports if you merely budget your time wisely. There will be a meeting on Wednesday, Sept. 27, to explain the program. It will be held at 7:00 in the Blake Hall Lounge, (Revelle), and any questions you have concerning our activities can be answered. Here to see you there.

The architect's model of the Physical Education complex consists of the Natatorium, or indoor swimming pool and the Physical Education building which is now under construction.

The pool is now open for student use, and will be the site for the swimming and water polo teams. Though scheduled for completion sometime this year, the P.E. Building has run into unfortunate delays, and hopes are now set on finishing early in 1968.

The P.E. Building, located just north of the Revelle campus, will have two floors and a mezzanine (intermediate floor area) with a combined area of 52,000 sq. ft. When completed, the facilities will include lockers, showers, dressing and training rooms, and the intercollegiate squads will operate from there.

The main floor has room for two regulation size basketball courts and seating. With this in mind, the basketball team is hopeful of playing their last two home games in the gym.

The 1.4 million dollar gymnasium is so designed that later additions will make it adequately large to serve the first four colleges of the twelve planned for the San Diego campus of the University of California.

they're a must!

WHITE LEVI'S

Don't get caught without your WHITE LEVI'S — they're the pants to wear — unless you're square! You'll like their long, lean lines — and the way they wear — and wear. WHITE LEVI'S in popular off-white and smart-sportswear colors.

Sports

by DAVE STEARNS

Coach Bob Wilson has a great deal to cheer about for the coming cross-country season. Win or lose, he feels that the school has finally come of age, at least as far as his harriers are concerned. Most of last year's athletes are returning to the 4.7 mile course, with the major exception being distance-ace Lane Mason, who has returned to Cal Tech.

"This may hurt us at first," said Wilson, "but we have plenty of good returnees and upcoming freshmen." Jim Haury, Charles Lindsey, and hopefully Mike Morales will all be back. Times of incoming freshmen are quite good, and Wilson points out a 4.15 miler.

Interest in the sport is way up. The team is scheduled to run 10 meets, with the highlight of the season the all-Cal meet on this campus. "We couldn't be more pleased," said Wilson. "Teams from UCLA, Riverside, Santa Barbara, and the other UC campuses will compete." The biggest rival right now is probably Cal-Western. There has been enough of a turn out that the squad will go with two full teams this year, a varsity and a "B" team. "Two full teams will travel with us to all the meets," Wilson stressed.

The facilities are in good shape, with better drainage on the course (north of old Miramar Road). The course has always had excellent potential. In fact, the AAU held their Southern California meet here last year. Wilson would now like to make a bid for the National meet, which would give the course and the school nation-wide attention.

Anyone who remembers the way the intercollegiate track looked last year will appreciate the changes made. Equipped with a new running surface, grass infield, and bleachers, the new track should stimulate some student support.

And speaking of support, this writer smells activity in the air. With the announcement of the all-sports meeting this Wednesday night, and the fact that a Mister Hackett is now on the coaching staff, can we leave some room for speculation? Watch this column for further developments.

Even this Jeep sometimes has trouble getting through UCSD's Cross Country course, rated one of the toughest in the nation.

INTERCOLLEGIATE WORKOUTS ANNOUNCED

Muir Uses Big Crane

A gigantic crane is speeding up work on the \$4,758,000 John Muir College.

Constructed in West Germany and possessed by a Los Angeles firm, the largest crane on the West Coast is under lease to Nielsen Construction Co., of San Diego, prime contractor for the University project.

Anchored in a free-standing position outside the building area, the crane extends 101 feet from the ground to the main jib and counter jib. As work develops on the seven story plus basement building, the crane can be gradually "jacked-up" to a maximum height of 150 feet.

The usual route of Channel swimmers, from Cape Griz, France, to Dover, England, is about 20 miles. Those swimming in the opposite direction are so noted. Times are expressed in hours and minutes and are considered official by the Channel Swimming Association only if swimmers are accompanied by official observers who note discrepancies.

Orientation Week Sports

Pool: The swimming pool will be open Thursday and Friday of Orientation week from 11:30AM to 4:00PM and on Saturday, Oct. 30, from 1:00 to 4:00PM. It is made available to all new incoming UCSD students and faculty.

Volleyball: During Orientation week, the various dorms on both campuses will form freshmen teams (men and women) to vie in volleyball competition. Commuters will play on teams according to their assigned dorm for the week. The Muir College champs will play the Revelle College champs during the beach party at the end of the week. Trophies will be awarded. See your sponsor for more information.

For those students interested in intercollegiate swimming and/or water-polo, there will be a meeting Monday, Sept. 26 at 3:00 pm at the Pool. You will meet the coach, Mike Gerry, a graduate of San Diego State, and obtain further information.

Football: Teams will be set up among the freshmen in the same manner as the volleyball. Same applies to commuting students. The Playoffs will be on the intercollegiate track, Matthews Campus.

SPORTS

Two classes not listed in the schedule of courses for UCSD are being offered and administered by the Recreation Department. These courses are for the most part non-credit and are not offered by the school but are being made available to UC students.

Recreational sailing is available for undergraduates and graduates with sailing instruction in two classes. The classes begin Tuesday, Oct. 3 from 2:30-4:30PM and on Friday, Oct. 6 from 2:30-4:30PM.

The classes will be conducted by the City Recreation Department at the Sailing Facilities on Santa Clara Point in Mission Bay.

The cost will be \$6.00 payable to the City of San Diego, 2581 Quivira Cr., San Diego, Calif. The fees are not refundable. Sign up will be at the Physical Education desk during registration. In addition, all interested should be at poolside on Sat., Sept. 30 between 1:00 and 4:00 PM to pass a necessary swimming test.

Open to all students without pre-requisite is a non-credit instructional Horseback riding class conducted by the Shadowland Ranch Stables in North La Jolla.

Two classes that meet twice weekly will be offered with a maximum of 12 students in each class. They will meet on Monday and Wednesday at 11:00 to 11:50 and Tuesday and Thursday from 11:00 to 11:50.

The classes will commence on Monday, October 2, at the Stables which are located about one-half mile north of the UC campus.

The cost is about \$3.00 per student per session which is about \$60.00 per quarter. This can be made payable to the riding stable in advance.

Softball: There will be a freshmen vs. faculty softball game on the Revelle Campus during the week. See your sponsor or R.A. for information.

Athletic equipment: Individual and team equipment may be checked out during Orientation week at the P.E. Building, #269, Matthews Campus.

There will be many organized free-for-all events during the Orientation week for both residents and commuters. Wed., Sept. 27, will see an exhibition football game among returning Revelle students. Time is from 2:00 to 3:00 on the Revelle Campus. All welcome.

CHANCELLOR TO RECEIVE NEW FOREIGN STUDENTS

In-coming foreign students at U.C.S.D. will be welcomed at a reception given by Chancellor and Mrs. John S. Galbraith on Tuesday, Sept. 26.

Sponsored by the University International Association, the reception will give foreign students a chance to meet American students and guests.

Those invited to the reception at University House include all new foreign students, foreign students already on campus, families in the community who participate in the host family program by having these students stay in their homes, members of the English in Action program, and all contributors to the International Center.

Martin McAllister, president of UIA, expects an exciting evening. There will be entertainment with an international flavor. Some of the groups who will perform are the Sutorius Scottish bagpipers and dancers, Gary Allen with his flaming sword dance and Tahitian dancers, and the International Folk dancers.

According to McAllister, there will be 75 new students from Africa, Asia, Latin America, Europe and the Middle East attending UCSD this year. They will join approximately 130 students already at the university from other countries.

Most of the foreign students are here for graduate work in all fields of study, especially physics and aerospace. But their number also includes some undergraduates, whose classes are scheduled primarily at Revelle College. A few, however, will be at new Muir College.

Speaking for the UIA, McAllister welcomes these students to UCSD and urges them and other foreign students to join and participate in the club.

The goal of UIA, continues McAllister, is for a high degree of "international understanding and activity based on communication between students from other countries and Americans at the college and in the community."

Acting as a liaison between

New Math Offered At Muir

The creation of Muir College, accepting its first students this Fall, has made necessary the addition of two more sequences on the list of mathematics courses.

The first addition, the 5 series essentially provides a review of high school mathematics. Very basic calculus concepts are included only in the last quarter of the sequence.

As an alternative to Muir students, the 10 series of math courses is offered. This sequence consists of varied topics in math not including calculus.

Although these two series may not be used for satisfaction of the Revelle College math requirement, Muir recognizes them as bona-fide courses.

Requirements for Revelle students are the same this year as last. Only the 1 or 2 will fill the bill.

To meet the needs of an enlarging department, eight assistant professors and two visiting professors have been welcomed to the mathematics staff. Aside from adding two new sequences, the new profs have enabled the department to enlarge its scope of undergrad mathematics. Some of the topics receiving greater breadth will be logic, numerical analysis, complex variables, probability theory, algebra and topology.

these two groups, the UIA sponsors activities including all students.

Some of last year's activities included beach parties for groups of Mexican and African students visiting U.C.S.D., and a day on campus for students with the San Diego high school foreign exchange program.

Anyone interested in joining the University International Association may contact Martin McAllister, 1716 Beryl St., S.D., tele. 274-0028, or the office of International Education in Bldg. 250, Matthews Campus.

9 Students Named For Who's Who

Nine students from the University of California at San Diego have received membership in the esteemed ranks of "Who's Who in American Universities and Colleges."

The selection of such students from various institutions in America is made by an on-campus committee. At the UCSD campus the organization selecting the students for this honor is made up of students, faculty and staff.

Students receiving the honor have excelled in scholarship, citizenship, leadership, and promise.

UCSD has chosen nine students from its 3,100 to be honored: Ray Tice (Biology major, junior), Larry Baker (Biology, senior, first UCSD AS President), Marsha Penner (Philosophy, senior), Richard Altenhoff (Biology, senior), Roy Dimon (Nominated UCSD's Athlete-of-the-Year), John Nuber (Math, graduate student), Janet Albin (Math, senior), Chris Hollinshead (AS Comptroller, helped to form AS), Roy Verdery (Physics, junior).

Realism is Goal of Language Program

The language program of UCSD will not provide returning students with any great surprises this year. Despite this lack of change in the program itself, the language department, headed by Professor Newmark, intends to continually reevaluate its teaching methods.

This intense scrutiny will help to engineer future programs according to the performance of the students themselves. Presently, the program is heading in two major directions.

The first aim of the language program is to achieve a high degree of "psychological realism" for the student. Discussing this problem of student environment, Professor Newmark admits that, "It is hard to make a classroom anything but a classroom."

The second main desire of the department is to provide better ways for the student to realize exactly what he must do to learn a language.

To satisfy these aims, the department has instituted a complete language laboratory, tutorials led by natives in the respective languages, and conferences where grammar and linguistics are taught.

The language courses themselves have several distinct parts. The tutorials and the language lab are designed to make the student use the language in practical situations.

Muir Born cont'd

The second college's program of study is geared to more experimentation and independent study by students, since they can fulfill their breadth requirements in so many different ways.

Muir's curriculum, however, cannot be chosen cafeteria-style. Most requirements must be met by sequences of 3 to 6 courses. Yet, after all breadth requirements have been met, and even if a student has started a language at UCSD, he will still have time for some electives.

But Muir students will not have an easy curriculum because of this freedom of choice, warns Stewart.

"Some students might be bewildered by the challenge Muir offers them. They would tell us, 'You're the experts; you know what the best program ought to be.' Thus Muir College is for those who are willing to use their own initiative."

On the other hand, a student may decide to concentrate all of his time in one field. "One student I have talked to," says Stewart, "wants to spend two years studying only mathematics. Although I discourage such a limited program, there is nothing in the Muir academic scheme to prevent such a passionate pursuit of one subject."

John Muir College, of course, is now a partner of Revelle College in the ultimate make-up of UCSD. A student of one college can now take certain courses in the other, such as Anthropology and the Nature of Music.

If a student wants to transfer completely from one college to another, says Stewart, all that is necessary is "fulfillment of lower division requirements in the other college. But one may not take half of the Revelle Natural Science sequence in hopes of getting the other half in an easier sequence at Muir. He will surely lose the benefit of a coherent course of study and, perhaps, credit in the other college's program."

to increase the student's understanding of the nature and techniques of language.

Starting this year the scripts used in language tutorials may be written by the students. If this is the decision of the department, it will increase the students' freedom and participation in the program.

For the future, several interesting ideas are being formulated. More economical and efficient video-tape machines are being designed to enable students to see and hear their foreign language spoken. Experiments are now being made to determine whether the student learns faster in a group or by himself. Other experiments are providing information concerning the necessity of student participation.

The fusion of these ideas and experiments may lead eventually to the student who is able to learn a foreign tongue entirely in a language lab.

Although any concrete evidence of these ideas is several years away, the language department already has a small television studio where videotaping may be done.

While the mechanics of the language program will remain unchanged this year, the department's teaching aspirations will keep moving ahead. Ideally the program should be able to teach students who have no interest to learn. Professor Newmark expressed his desire

THOROUGHLY MODERN MATTHEWS

An act of Congress deeded Camp Matthews, a Marine Corps rifle range, to the University of California, San Diego on October 7, 1964. The land, 545 acres adjacent to the main University property, was acquired for use as a staging facility for each of the University's twelve colleges.

The Marine buildings, quonset huts included, will be classrooms, and research and administrative offices for students and faculty for two years while the physical plant of their respective college is under construction. Plans call for a new college every three years.

Mac A. Cason, Campus Architect, estimates that the use of the land and Marine buildings has resulted in a savings of almost \$3 million. The cost of remodeling was \$6.50 per square foot as opposed to the cost of approximately \$40 a square foot for new buildings such as those located on Revelle College. The facilities are of particular value because they enable the University to move up its development program by

at least three years.

Robert Messmer and Lloyd Konig, under Mac Cason, have directed the remodeling, which is scheduled for completion in October 1967. The project architect chose a color and decorative scheme suitable for campus life.

For the Quonset huts, Robert Messmer adopted the semi-circular shape of the huts and developed that theme in every phase of land and building improvement. Windows and doors of the quonset huts repeat the circular theme of the huts. The effect is reproduced in the landscaping, the ramps, the walkways and even the wood detailing of the rain gutters.

New brick paving surrounds pines which have been transplanted and placed in the middle of a group of quonset huts, creating a campus mall.

One building which might have been demolished because of its location on the sight of the UCSD School of Medicine was removed and taken in two parts to another location on the campus. The building is now the Student Health Center.

Prime Minister to Meet Chancellor

Dr. John S. Galbraith, Chancellor of the University of California, San Diego, and Mrs. Galbraith will be hosts at a reception Wednesday evening for Prime Minister Leabua Jonathan of Lesotho, South Africa, in the University House.

More than 100 guests are expected to attend the reception for the Prime Minister, who is here to meet with Peace Corps officials from Washington and Peace Corps trainees at UCSD.

Invited to the reception are members of the Prime Minister's party, members of the Chancellor's Club and their wives, Mayor Frank Curran and his wife, staff members of the Mayor, and administrators of the campus and of University Extension.

Thursday the Prime Minister will tour the Peace Corps training camp, which is located at Mataguay Reservation, between Santa Ysabel and Warner Hot Springs. He will talk to the 100 new trainees, who will be sent to Lesotho after the 10-month training program.

Prime Minister Leabua Jonathan, who met with President Johnson and also addressed the United Nations before coming to San Diego, will leave here on Friday, September 29.

in this direction when he said, "I won't feel that the program will be fixed until all students can learn a language and enjoy it."

Although the grammar and linguistics divisions of the language program do not greatly excel similar programs at other institutions, the tutorial system is thought to be one of the most carefully planned and one of the finest programs anywhere. In actuality, the language department at UCSD provides students with a teaching experience unique in the world.

Humanities will Focus on Century's Writers

Some of the major works of the Twentieth century will be the object of intensive scrutiny in freshman humanities courses this fall.

There will be four freshman humanities classes on the Revelle campus.

Dr. Crowne will be teaching the Subject A Humanities sections and Subject A for Muir.

Dr. Moore, Professor of Philosophy, is also teaching freshman this fall. A large percentage of the students who had Dr. Moore last year were very enthusiastic about his class and lectures.

Dr. Moore's booklist contains two works apiece by Freud, Shaw and Lenin. There are also works by Kafka, Malraux (Man's Fate), and F. Scott Fitzgerald (The Great Gatsby).

Dr. Kirkby's reading list shows his concern with contemporary issues. It includes the autobiography of Malcolm X, Sheer's How the U. S. Got Involved in Viet Nam and Shurmann's Politics of Escalation. Dr. Kirkby is an Assistant Professor of Philosophy. Most of his former students feel that he is an interesting lecturer.

Jack Behar, Ph.D., is an Assistant Professor of American Literature. His reading list includes Freud's Civilization and It's Discontents, some poetry by T.S. Eliot, and Jame's The Varieties of Religious Experience.

New Library

The Humanities Library now has a sister department on the Matthews Campus. The building housing the new cluster library also contains the University bookstore. This undergraduate library will remain in this location for the next two to three years. The Central Library's new division will also contain undergraduate materials for Music and Fine Arts.
