POLICE CHIEF HOMME IS A CROOK

He has robbed the citizens of Brawley as well as the rest of the residents of Imperial County of free speech and free press as guaranteed by the first amendment of the U.S. Constitution.

When I, Ben Yellen, M.D., put out my political leaflets, that is free speech and free press. You have all read in the American newspapers that in Russia, you are arrested if you do this. That is what happened to me on Nov. 10, 1984 when I was distributing the leaflet BOYCOTT THE CATTLE CALL in which I told how the cause of the unemployment of 43% are the agriculture and cattle industries, the biggest employers, who use workers from Mexicali, Mexico at 50 cents per hour.

The local newspapers in Imperial County do not give you 100% free speech and free press because they have to make a living on their advertising much of which comes from the agriculture and cattle industries and their allies.

In order to discredit the distributors of pamphlets in Russia, the police put the distributors in the crazy hospitals to make the readers believe that the distributor is crazy and not believe what is written in the political pamphlets. As far as known, Police Chief Homme is the only police chief in the United States who attempts to put distributors of political pamphlets into crazy hospitals. He should be a police chief in Russia or the other Communist countries like Poland where similar suppression of free press and free speech is done.

Now to fight Homme and the others with him who are part of the power structure that do not want me to teach the people, I have to do it yourself lawyering to defend myself and not go bankrupt paying lawyer bills. So I have to teach you some law. Suppose there is a hole in the street and you step in and break a leg and get concussion of the brain. You sue the city and get compensatory damages. This pays for the medical bills and suffering. But then there are punitive damages. Suppose nobody reported the hole in the street to the city. Then suppose that for one half year, many people reported the hole to the city. So when you sue for punitive damages, you get a lot more money if the hole had been reported many times and the city did nothing about it.

Now Congress passed a Federal law making it a felony for police to arrest people who distribute political papers. The criminal case is done in Federal Courts. Then Congress passed a Federal law where those who give pamphlets can sue for damages in a civil lawsuit in Federal Courts. All this was done because Congress knew that local police, local district attorneys and local judges would be in a conspiracy to prevent the distributor from getting a fair trial for the power structure would force police, district attorneys and judges to do what it wanted. So when I point out in Federal Court in my claim for punitive damages that Homme got his promotion to Chief by doing a good job on Dr. Yellen with his crazy hospital trick, I will get more punitive damages. So you see City Manager Joseph Mulloy and the Brawley City Council are ignorant of the law. In addition, the city's insurance premium will cost much more because the City Council is part of the power structure and never complains about the unemployment or the \$53 millions yearly electricity swindle of the residents of Imperial County, Calif. We shall overcome the power structure if I live longer.
