

# MARSHALL'S ELECTRO MAGNETIC RODS

—FOR—

## LOCATING MINES OF GOLD, SILVER

And Other Metals; Also for the Discovery of Buried Treasures.

This instrument has become the most efficient force in detecting the presence of Gold and Silver deposits, whether in the form of hidden coin or quartz rock. The maker claims that a careful investigation is sure to be directed to the exact locality of the treasure, and unlike many of the so-called Mineral Rods will not mislead the operator in the direction of water. In proof of this we offer a few testimonials from persons of high standing.

The Hon. C. Chamberlain publishes in the *Observer*, December 25, 1884, the following, a portion only of which we copy: "Accidentally I came in communication with an ingenious mechanic who is called by a neighbor, eccentric—probably eccentric like Newton or Franklin—who claimed to have made Mineral Rods which, when handled by some persons, would indicate the presence of certain metals in or upon the earth beneath the feet. So confident was he of success that he sent to my care, to be tested, two of his instruments, one of which has repeatedly been tried in the last two years. It is a metallic cylinder, three inches long, and weighing  $4\frac{1}{2}$  ounces. On each of opposite sides are a pair of eyes or thimbles in which are inserted sticks by which it is to be carried.

"It would be a severe strain on average credulity to accept this simple outfit as an implicit guide to mines of gold and silver. But no one is asked to take stock in the story, further than the proof has cleared the way, in the presence of or fixed it by competent witnesses. I have seen this instrument tested at the silver mines, by tracing the vein of ore for a long distance, and showing its width. I have seen it tried in this town, where silver ore has been taken, and where, by it, the same vein can be traced across several farms. By its indications the bed rock was uncovered in a tillage field, and samples taken that were recognized by practical miners as silver ore. It has been repeatedly tested by hiding silver and gold coin along a line to be passed over. These varied tests have proven the instrument to have all the virtue claimed by the maker, viz.: a sure guide to silver or gold in the pure, or mixed with other metals.

"All I have named here has been done in the presence of reliable witnesses.  
C. CHAMBERLAIN."

"DEAR SIR:—I have discovered two mines with your Rod, three feet from surface. Assays 6.50 and 6.30 ounces. I hit the lode the second day I had the Rod.  
C. DOELING."

"DEAR SIR:—I sold one of your Rods to a man who says he can find 50 cents anywhere in 100 yards.  
W. J. PORTER, *Agent*."

Many more testimonials can be given if desired. Money can be sent by Money Order or Express at our risk. PRICE OF RODS IS \$5 FOR EACH ROD. We prepay all charges on these Rods to their destination. We do not send these Rods out on TIME; neither do we put any GUARANTEE on them. Please bear this in mind. Be careful and write your name, Postoffice, County and State, plainly.

H. A. ELLS & CO., SOLE AGENTS.

# What Those Say Who have Used the Rod.

## Read Them Carefully.

We make the standing offer of \$500 in cash if the following testimonials are not truthful reproductions of letters, and extracts from same, which are on file with us for inspection, and which were written in entire honesty and good faith, to the best of our knowledge and belief. We omit writers' names for their protection, but same will be cheerfully furnished to responsible parties.

BRANDSVILLE, Howell Co., Mo., April 6, 1888.

DEAR SIR: I am behind a little, but will forward the \$10 for that Rod, which forward it as quick as possible, for I want to start right away. The one that I have got I can sell it for \$35 without any trouble.  
M. W. M.

(The above party sent first for a \$5 Rod, and soon after \$10 for higher priced one.)

HENDERSON, Texas, July 10, 1888.

H. A. ELLS & Co.—Messrs: I received the Mineral Rod O. K. ordered of you. I have given it a thorough trial, and there is no mistake but it is attracted by gold or silver.  
J. W. P.

FRELSBURG, Colorado Co., Texas, April 7, 1888.

H. A. ELLS & Co.—Dear Sir: I received your Rod March 30, and I am well pleased with it. I cannot tell you how proud I am of it. I can take it and find 50 cents anywhere in 100 yards from me. I can find hidden treasure anywhere. I will write you more after a while.  
Yours truly,  
Miss S. P.

(First Letter.)

KEY WEST, Fla., March 6, 1888.

H. A. ELLS & Co.: I received the Rod, and it has proved satisfactory. I have buried coin two feet under ground and gone straight to it. I would like for you to send me a sample of your \$100 ones—that is, a small pamphlet of one. There are two parties that want me to send and order them one of your high priced Rods.  
Respectfully,  
E. G. R.

(Second Letter.)

KEY WEST, Fla., April 22, 1888.

MESSRS. H. A. ELLS & Co.—Gents: Enclosed you will find \$100, which please forward to me by express one of your high-priced Mineral Rods as soon as possible. If any one in this county writes to you for one of your Rods, please refer them to me, as I have the right of the agency. There are several parties that wants one.  
Yours truly,  
E. G. R.

(Third Letter.)

KEY WEST, Fla., June 2, 1888.

H. A. ELLS & Co.—Gents: I received the Rod in good condition. I believe the parties are perfectly satisfied with the Rod. I also received the certificate of agency, and will do all that lays in my power to sell them. I am in hopes to send you a good order soon. I remain, yours truly,  
E. G. R.

Parties interested are invited to a trial of these Rods, on the testimony of those who have practically tested them as above. PRICE IS \$5 FOR EACH ROD, charges prepaid.
