**Constraints:** This work is protected by the U.S. Copyright Law (Title 17, U.S.C.) and the laws of Papua New Guinea. Use of this work beyond that allowed by "fair use" requires written permission of the National Archives of Papua New Guinea. Responsibility for obtaining permissions and any use and distribution of this work rests exclusively with the user and not the UC San Diego Library.

**Note on digitized version:** A microfiche copy of these reports is held at the University of California, San Diego (Mandeville Special Collections Library, MSS 0215). The digitized version presented here reflects the quality and contents of the microfiche. Problems which have been identified include misfiled reports, out-of-order pages, illegible text; these problems have been rectified whenever possible. The original reports are in the National Archives of Papua New Guinea (Accession no. 496).

CONCLUSION.

This hurried patrol which allowed the maximum amount to be spent on Native Affairs. Until very recent times, the Bundi people were a primitive highland people. With the establishment of the Patrol Post at BUNDI, it has been possible to establish close ties between the Administration and the "GENDE" people. I can see no reason why these relations cannot be maintained and further strengthened in the future years.

KARKAR PATROL No. 2/59-60

Even before the War there was a marked difference between the degrees of initiative displayed by the WASKIA, and the TAKIA of KARKAR island; it is difficult to account for the character divergence unless there was an influx of migrants at any particular stage. The Officer-in-Charge, Karkar, might find it an interesting exercise to account for this state of affairs, and I would appreciate his opinion in due course.

"Sister Exchange" was the subject of some discussion at the recent Mission Conference, but more in relation to sparsely populated areas.

It is agreed that the people themselves are probably responsible for their own lean times, if any, in view of the fertility of the volcanic soil.

Mortality Rate remains uniformly good over the Divisions.

The fact that the people are Aid Post conscious is a tribute to the patrolling officers of both Departments.

The matter of an Agricultural Officer for the Island should be handled at District level through the District Agricultural Officer.

KARKAR PATROL No.2-59/60

Receipt is acknowledged of your memorandum 30/8 of the 5th. October, 1959, together with the above Patrol Report and attachments.

With reference to Mr. Johnston's remarks concerning the Waskia people, Mr. Parr ish has visited the area since the conclusion of Mr. Johnston's report and held meetings with these people, and I do not consider that the situation is quite as black as Mr. Johnston paints it. Undoubtedly, these people need a patient approach and should be given full explanations as to what we are trying to accomplish, the workings of Native Local Government Councils, and objectives.

Undoubtedly the <sup>Island</sup> Waskia people lack the drive of the Takias but this is not something new and has been the subject of remark by all patrol officers since the end of the war.

With reference to your remarks under the heading of Census, I think that a check of your computations will reveal that at the present rate of increase the people are likely to double their population in approximately 22 years and not 40 years. This is another instance of the benefits of good medical services; a T.B. survey of the whole population of the Island is due to commence within the next 10 days.

Unfortunately, once again no funds have been forthcoming for a new hospital at Kar Kar this year, the Officer in Charge at Kar Kar will be forced to continue to patch the very dilapidated native material buildings already existing. The problem of accommodating the expected large influx of T.B. patients following the T.B. Survey, is under the notice of the District Commissioner and he is endeavouring to find ways and means.

I agree with your remarks concerning the age of students at Mission schools, however this is a private matter for the Missions concerned. It is hoped that Councils will be able to expand the educational facilities in the near future to cope with the young children of Kar Kar.

The report is a good one and Mr. Johnston is to be congratulated on a job well done.

KARKAR PATROL NO.2/59-60

Submitted herewith in duplicate is the Report of KARKAR Patrol No.2/59-60 to the TAKIA and WASKIA Tax/Census Divisions. Village Population Register forms are submitted in triplicate. Also submitted is a Camping Allowance Claim for Mr. J.A. Johnston, Patrol Officer who conducted the patrol.

Native Affairs:

I agree with Mr. Johnston that the difference in attitude between the WASKIA and TAKIA groups is most noticeable. I feel that the WASKIA group will need to be watched carefully as they tend to give the impression that they have a cultist outlook with regard to Native Local Government. Intensive education and propaganda concerning the aims and objects of area administration would serve to overcome any such tendencies. Such education and propaganda would not go astray in the TAKIA, N.L.G.C. area either.

Agriculture:

It is expected that an Agricultural officer will take up duties at KARKAR next month. Following upon this it is hoped that an overall improvement in the general agricultural situation on the island will soon be noticeable. This, I feel sure, will mean a consequent expansion of economic development as the Agricultural Officer will be able to assist the people to overcome and/or resolve the difficulties and problems with which they are now faced in the agricultural field.

Census:

The census figures are evidence that the population on KARKAR Island is rapidly expanding. If the present rate of increase is maintained the population of the island will double in 40 years. The present rate of natural increase is 2.85% for the TAKIA Tax/Census Division and 3.55% for the WASKIA Tax/Census Division.

Medical and Health:

The Administration hospital at KINIM is in a very dilapidated condition. However, Assistant Medical Practitioner Kahu Sugohe is a tireless worker and appears to do everything

possible while working under extremely poor and primitive conditions, to bring the benefits of medicine to as many persons as possible. It is planned that a new hospital will be built at MIAK but I have not heard anything to indicate that the work might be commenced in the immediate future. Such a new hospital is urgently required.

The Department of Public Health keeps close watch on all hospitalized T.B. cases. T.B. is rife on KARKAR but it is hoped that the efforts of both the Administrator and the Lutheran Mission will soon enable the disease to be overcome.

Education:

I consider it disappointing that the Missions are enrolling a large proportion of students in the 16-20 age group. I feel that their efforts would be best concentrated on the young children as is done in the Administration and Council schools.

General:

An officer of the Department of Forests is proceeding to KARKAR in approximately two weeks time to conduct a survey of the timber potential on the island. It is hoped that this survey may result in the establishment of a timber industry on the island.

I am not in agreement with the numbering of villages, e.g. KAUL No.1, KAUL No.2, etc. Each of these has its own native name and I think that should be the name by which it is known officially.

This was a good patrol, ably and competently conducted by Mr. Johnston.

KARKAR PATROL REPORT NO: 2 of 1959/60.

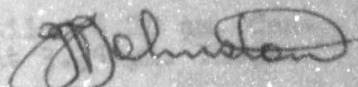

Officer Conducting Patrol: J. A. Johnston. Cadet Patrol Officer.

Area Patrolled: Takia and Waskia Census Divisions, Karkar Island.

Objects of the Patrol: To revise census and compile records for  
Tax Registers. Carry out general administration work.

Last census patrol of the area: Sept. - Oct. 1957.

Duration of Patrol: 17.8.59 to 15.9.59 -- 30 days.

  
( J. A. Johnston )  
Cadet Patrol Officer.

DIARY.

Monday 17th Aug. '59.

Departed Miak Government Station at 8.30 am. To Takia Council Chambers, then Kurum Rest House and then back to Moban Rest House. Left cargo and on to Kuduk, arriving 11.30 am. Inspected village and conducted census. Returned to Moban, arriving 4.30 pm. Spent the night.

Tuesday 18th.

Departed Moban 7.30 am. To Bafor arriving 8 am. Inspected village and conducted census. Returned to Moban at 1.45 pm, inspecting Kildem village en route. Census of Moban and Kildem villages conducted. Spent the night.

Wednesday 19th.

Departed Moban 8 am. To Mangar 2. Conducted census and inspected village. On to Mangar 1. Census and inspection of village. On to Marup village, arriving 3.45 pm. Spent the night.

Thursday 20th.

Census of Marup village conducted. Commenced 8.5 am and completed 6.20 pm. Spent the night.

Friday 21st.

Departed Marup 7.30 am; to Kevasop arriving 8 am. Inspected village and conducted census. On to Wakon at midday. Census and inspected village. Returned to Marup at 4.10 pm. Spent the night.

Saturday 22nd.

Departed Marup 7.45 am. Arrived Lilo 8.20 am. Census and village inspection. Returned to Marup at 3.35 pm. Inspected Marup village. Spent the night.

Sunday 23rd.

No official work carried out. Climbed to the top of Mt. Ulumam and viewed the volcanic crater and returned to Marup. Spent the night.

Monday 24th.

Departed Marup at 8.45 am. To Takia Council Chambers and then to Kurum. Census and inspected village. Spent the night.

Tuesday 25th.

Departed Kurum 7.55 am. To Dumad. Inspected village and conducted census. On to Biu at midday. Census and inspection. Up to Kumorian 2, arriving 4.50 pm. Spent the night.

Wednesday 26th.

Departed Kumorian 2 at 7.20 am. To Gamog, arriving 8.5 am. Census and inspection. On to Boroman at 12.30 pm. Census and inspection. Returned to Kumorian 2 at 5.55 pm. Spent the night.

Thursday 27th.

Departed Kumorian 2 at 7.25 am. Through Kumorian 1 and inspected same and on to Did, arriving 8.15 am. Census and inspection. On to Daup at 2 pm. Census and inspection. Returned to Kumorian 2 at 5.25 pm. Spent the night.

Friday 28th.

Census and inspection. Returned to Mapor at 5.30 pm. Spent the night.  
Census of Kumorian 1 and 2 conducted during showers of rain all day. Completed at 4.45 pm. Inspected Kumorian 2 village. Spent the night.

Saturday 29th.

Waited for Landrover to arrive as arranged, but failed to change carriers. Moved to Urugun, arriving 10.35 am. Census of Urugun and Urugun conducted. Completed at 8.35 pm. Spent the night. Departed Kumorian 2 at 8.30 am. To Dangsal. Census and inspection. On to Patilo. Census and inspection. On to Kavailo, 3.30 pm. Spent the night.

Sunday 30th.

Departed Urugun at 7.45 am. To Dangsal. Census and inspection. On to Patilo. Census and inspection. Returned to Urugun at 4.25 pm. Inspected. Spent the night.

Monday 31st.

Census and inspection of Kavailo and Warat villages. Spent the night. To Meron. Census and inspection. To Miak station by Landrover, arriving 3.40 pm.

Tuesday 1st Sept. '59.

To Ulun and Pain villages for census and inspection. Returned to Kavailo at 5.35 pm. Spent the night.

Wednesday 2nd.

To Katom and Kubam villages for census and inspection. Returned to Kavailo at 3.30 pm. Spent the night. On way back to Miak station, arriving 3.50 pm.

Thursday 3rd.

Departed Kavailo 8.30 am. To Yagadun - census. On to Wadau - census of Wadau and Muluk. On to Nor - census. On to Mapor, arriving 6.30 pm. Spent the night. Returned to Miak at 3.25 pm.

Friday 4th.

Departed Mapor 7.45 am. To Kaul villages. Inspected the 4 villages. Census of Kaul 3 completed at 1.30 pm as heavy rain began to fall; it continued until 4.40 pm. Returned to Mapor. Spent the night.

Saturday 5th.

Departed Mapor 7 pm. To Kaul villages. Census conducted of Kaul 1, 2 and 4. Returned to Mapor at 6.10 pm. Spent the night.

Sunday 6th.

Cycled back to Nor, Muluk, Wadau and Yagadun villages and inspected same. Returned to Mapor. Spent the night.

Monday 7th.

Census and inspection of Mapor. To Tugatuga at midday. Census and inspection. Returned to Mapor, arriving 5.5 pm. Spent the night.

Tuesday 8th.

Delayed by heavy rain until 9.45 am. To Beltigu. Census and inspection. On to Koropak; census and inspection. Returned to Mapor at 4.55 pm. Spent the night.

Wednesday 9th.

Departed Mapor at 6.45 am. To Gial and Bangami for cen-

sus and inspection. Returned to Mapor at 5.50 pm. Spent the night.

Thursday 10th.

This patrol was for the purpose of carrying out a check and waited for Landrover to arrive as arranged, but failed to turn up. Arranged carriers. Moved to Urugun, arriving 10.35 am. Census of Urara and Urugun conducted. Completed at 6.35 pm. Spent the night.

Friday 11th.

Departed Urugun at 7.45 am. To Sangani. Census and inspection. On to Dimer. Census and inspection. Returned to Urugun at 4.25 pm. Inspected Urugun village. Spent the night.

Saturday 12th.

Departed Urugun at 6.30 am. To Sikentiga. Census and inspection. On to Nareg. Census and inspection. To Miak station by Landrover, arriving 3.40 pm.

Sunday 13th.

Observed. Takia people appear to be taking an interest in what work is going on in their Council and will discuss matters with the UIC staff. The Waskia people present a rather untrusting group. They mostly seem to be a lifeless lot, showing little interest in their Council.

Monday 14th.

Departed Miak at 7.45 am. To Langlang, Apari and Kinim villages for census and inspection. Looked over Kinim Native Hospital on way back to Miak station, arriving 3.50 pm.

Tuesday 15th.

Departed Miak at 7.50 am. To Dorogodan and Kaviak villages for census and inspection. Returned to Miak at 3.25 pm. However, it is thought that the Karkar people, especially the Waskia, do not wish that they can take over their own lands and do as they like. Quite a few of the councillors used this impression on them.

The "star-exchange" marriage system which has been mentioned in previous reports has levelled itself gradually to some extent at least. The exchange still occurs quite often, but where one or another of the parties concerned has objection to it, proceedings are usually dropped and the position settled amicably between the parties.

Subsistence and Economic Development.

Subsistence agriculture is generally sufficient and the people usually well fed, although it appears that on some of the coastal villages there is a slight lack of food. However, this would appear to be only the people's own fault in not having enough foresight to plant up big enough gardens.

Cow coconuts continue to be planted from time to time in most areas and coconuts are being planted here and there in scattered large and sometimes small numbers.

Because of this it is believed that there are still many people with plantings of coconuts. The people are evidently showing little intention of working them up to the extent needed for registration on a large scale.

Many new plantings of coconuts, and also coconuts, were seen to be put in by the people. The plants together with the coconuts are being planted in large numbers.

KARKAR PATROL REPORT NO. 2 of 1959/60.

Introduction:

This patrol was for the purpose of carrying out a census check and making up lists from which to compile both the Council Tax Registers and Government Personal Tax Registers.

All villages were visited and censused by the writer except for 8 in the Waskia Division. These were Buson, Keng, Kulkul, Kurumlang, Kurumtaur, Marangis, Mater and Mom. These were censused by the OIC Karkar, P.O. Edwards at an earlier date, but pressure of work in connection with the two Councils prevented him from carrying on with the census of the island and thus this patrol was undertaken.

All census figures are included with this report.

Native Situation:

With every village on the island accessible by vehicular road at most times of the year, a constant watch can be kept on the people and a matter quickly investigated if trouble arises.

While the Takia people appear to be taking an interest in what work is going on in their Council and will discuss matters and follow advice given them, the Waskia people present a rather contrasting group. They mostly seem to be a listless lot, showing little care for Council matters and at times a general disregard for Administration law. While the writer was on Karkar Island, a run of events occurred, all involving breaches of the law and these were handled by the OIC Karkar.

However, it is thought that the Karkar people, especially the Waskia group, will have to be watched and guided carefully and made to realise that because they are now part of a Local Native Government Council does not mean that they can take everything into their own hands and do as they like. Quite a few of the councillors need this impressed on them.

The "sister-exchange" marriage system which has been mentioned in previous reports seems to have resolved itself gradually to some extent at least. The exchange still occurs quite often, but where one or another of the parties concerned has objection to it, proceedings are usually dropped and the position settled amicably between the parties.

Agricultural and Economic Development:

Subsistence agriculture is generally sufficient and the people usually well fed, although it appears that on occasions some villagers or the coast do have a slightly lean time. However this would appear to be only the peoples' own fault in not having enough foresight to plant up big enough gardens.

New coconuts continue to be planted from time to time in most areas and cocoa is being planted here and there in sometimes large and sometimes small numbers.

Because of this it is believed that there are still many people with plantings of less than the required 500 trees and evidently showing little intention of bringing them up to the number needed for registration on a permanent basis.

Also, many new plantings of cocoa, and also coconuts, were seen to be put in badly. Trees too close together and in somewhat indiscriminate lines are common.

*Mission  
Carpenter*

*Volcanic  
Zone*

In view of this and also in view of the previous requests that have been made, urgent consideration should be given to the appointment of a permanent D.A.S.F. officer to Karkar Island as soon as possible.

It is common knowledge that the richest soils in this area are on Karkar Island and that there is the opportunity for relatively large scale economic development, but without an efficient officer to supervise and guide such development effectively, it will only continue as it is now in a rather haphazard way.

The benefits that a permanent D.A.S.F. officer could bring to both the native and European inhabitants of Karkar Island are obvious.

Census Statistics:

Census figures show that the population in both divisions continues to increase at a steady rate.

In the Takia division there was an increase of births over deaths by 367, with an overall increase in the total population of 387.

In the Waskia division births exceeded deaths by 388, with an increase of 399 in the total population.

This shows a total increase of 786 on the island, this being over a 2 year period.

An increase is shown in the number of men absent at work; quite a large increase in those working inside the district and a minor increase in those working outside the district.

Of the number working inside the district, at least half are working on plantations etc on Karkar Island itself, many of them only being absent from their village during the day and others often returning each weekend.

There is also an increase in the number of children absent at schools ( see education ).

Medical and Health:

Generally, the health of the people was very good, being free from sores etc. This is no doubt the result of two good hospitals.

The N.M.A. at Kinim does regular tours of the villages and aid posts on the island, thus keeping a fairly constant watch on the people. The people themselves however are quite hospital and aid post conscious and readily bring their sick forward.

Further aid posts have been built and others are now being built by the Councils giving better facilities to the people.

The government hospital at Kinim is falling into disrepair all the time and much work is involved in trying to keep the buildings in reasonable order. The conditions available for treating the sick are rather poor and the erection of permanent type buildings and the provision of better facilities would seem a must in the near future.

It was noticed that a large incidence of tuberculosis was prevalent amongst the people. No actual count was taken, but the number would be quite high. Both the hospitals on the island are doing a lot of work in trying to combat this disease and the Lutheran

*Number Ratio*

*Indismissible*

*Not always the case*

Mission also sends many of its patients to Yagaum Hospital, Madang.

Education:

This is provided largely by the Lutheran Mission who have quite big schools at Narer and Anul.

The Catholic Mission has a small school at Tabel and the Administration now has a school operating at Miak.

There are also the usual mission village schools.

As well, the two Councils are getting school building projects under way and it will only be a short while before these are ready to accept pupils.

Quite a large increase in the number of children attending schools has occurred, most of them attending the Lutheran Mission schools on Karkar Island. Also, it was noticed that a large proportion of those newly enrolled at schools were in the 16 - 20 age group. Whether this is a genuine enthusiasm for education or just a means of escaping from paying the tax to the Council cannot be determined.

Villages and Housing:

Villages were generally found to be in a reasonably clean state.

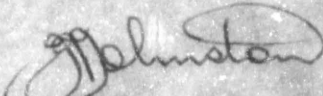

Houses were usually of a good design, but in many cases the state of repair was rather poor and in several instances instructions were issued for repairs or replacements to be effected.

Conclusion:

Generally, the position on Karkar appears to be fairly good.

These people have better natural resources than most others in the District and if they were prepared to work more and help themselves, their position and future would be quite bright.

With the introduction of Local Native Government Councils, a big step has been taken and they will undoubtedly help to develop the people along the many different avenues. However the handling and guiding of the people within these Councils will have to be carried out very carefully and with much consideration from all angles, in order that troubles and headaches do not arise, and that the people work with the Administration and not against it as some tend to be doing now.

  
( J. A. Johnston )  
Cadet Patrol Officer.

NOTE: In the Waskia Division census figures, the village previously listed as APARI is now shown as KAUL 4.
