Ra-Tor Beauty Clay

THE NEW, SCIENTIFIC BEAUTIFIER

 IN recent years various cosmetics, claimed to be radio-active, have been placed on the market at prices ranging from fifty cents to five dollars, and the general public, knowing little of Radium, have purchased these articles in the belief that they were of genuine value. These products usually contain either in infinitesimal amount of Radium or some of the cheaper derivatives of thorium, and are so weakly activated they have little, if any, real merit. The aim of our organization is to market genuine Radium products of the highest standard, made from Radium refined in our laboratories at our own Radium mines.

One of these fine, guaranteed products we are offering under our registered trade name is the Ra-Tor Beauty Clay, the new scientific beautifier. The superiority of this clay is unquestioned. It has an activity, due to Radium alone, of five million alpha rays per second, giving a constant ionizing power almost beyond computation. Thru the ionization of

RA-TOR BEAUTY CLAY

the skin by these tiny radio-active particles, increasing the blood supply, stimulating the nerve endings, and energizing the natural nutritive processes, sagging muscles and tissues are rejuvenated. Lifeless, sluggish circulation, undernourished tissues drooping into harsh, uncomely lines and unsightly, dingy, rough skin are replaced by glowing, healthy, firm flesh and skin of velvety softness.

No other thing will do for the skin just what Radium so thoroly accomplishes. By stimulating the underlying cells to new life and activity it creates Skin Health, which is Beauty.

The action of the clay in gently massaging and cleansing the pores of the skin produces an invisible desquamation, gradually flaking off the old skin, and leaving a fresh, youthful appearance.

Proper use of Ra-Tor Beauty Clay is all important and the most pleasing results will be gained by following these directions carefully:—Allow a half hour's time to each treatment. First wash the face and neck rather briskly with warm water and a good soap. Spread the clay in a thin, smooth layer over the face and neck, with a steel spatula. Relax perfectly and sit quietly for twenty-five minutes. Remove the clay with the spatula,

RA-TOR BEAUTY CLAY

gently wash the face in warm water and sponge it over with any good toilet water having a high alcohol content.

To facilitate saving the clay prepare an oilcloth bib long enough in front to reach out on the dressing table. When the clay is removed from the face allow it to collect on this oilcloth, replace it in the clay jar, and wet it with high alcohol content toilet water and screw the cover on. It will be just right for the next application when opened. If not wastefully used it will last for years and can be used over and over. It never loses its radio-activity.

Ra-Tor Beauty Clay is manufactured and packed in our own laboratories, and sold under our trade name of Ra-Tor—your guarantee of high standard and purity. Shipped prepaid for \$10.00 per jar.

Write for literature on other Ra-Tor Radium products—the Ra-Tor Plac for medicinal use, Ra-Tor Radium Mineral Water, and Ra-Tor Fertilizer, the greatest of all plant stimulants.
