LATE BULLETIN

Steve Harter, acting spokesman for General Council said, this mands for an active student voice in university affairs are being continued. "Rules, after being approved by the Chancellor must be brought back to the students," said Harter.

Broadcasters from NBC and CBS are on campus.

Resident Assistants with whom our reporters talked to, were optimistic. They felt students would eventually attain their desired position with the administration. Some refused comment

Dean Forbes issued statement. Will not be made public until tomorrow. Reliable sources indicate he has asked the Chancellor to give his office control of the dorms. This report is unconfirmed.

In a letter sent this afternoon to the Chancellor the General Council made clear its revision of the rules was not an "ultimatum" as has been charged. The letter says the rules have clear student support, and are an asertion of their rightful position. A willingness to sit down at the bargaining table is expressed.

General Council Issues New Rules John L. Stewart, Acting Provost Appeal for Student Support

Chancellor Takes Hard Line

the removal of jurisdiction from the Times, Chancellor Galbraith, administrations unwarranted in- old rules by following the G. C. Also significant is the resigna- proclamation. Galbraithstressed that student government does not addministration - student communication and the evolution of a policy based on compromises at the philosophical and practical levels. When asked what would happen if a large percentage of the students decided to follow the rules set by their goveernment, the Chancellor said that though it afternoon the COUNCIL is meeting with the Administration. Dewas ask if the students have been looking for "alternative accom-modations."

Dr. Stewart expanded on the Chancellor's remarks stating

In an exclusive interview with that if the administration were pushed to the point where, in the light of their responsibility to the University community, they had no alternative but to act harshly it would lead to massive division and bewilderment among students and their friends in the faculty. Stewart conceded that the possibility that strong administration action may unify the students also existed, but added that he hoped there would be no serious conflict on this campus.

ADVISE ON STUDENT POLICY

The program of action outlined by the administration has two main points. First, that the ultimatum must be withdrawn as soon as possible, and second that strong efforts at communication be made. Dean Forbes emphasized this point by suggesting that if the students had come to his office with their complaints, rather than rushing to issue an ultimatum, there perhaps could have been some constructive agreements reached.

BUILDING B NOW UREY HALL

Friday, February 18, the Regents of the University of California decided, upon recommendation of the Chancellor, to name Building B after Harold and Frieda Urey. Dr. Urey, who won the Nobel Prize for Chemistry in 1934, and his wife, Frieda, who is very active in community affairs, were thought to be representative of the ideals of the University of California et San sentative of the ideals of the University of California at San

Editorials

The Beginning

In the past two issues, the SANDSCRIPT has prepared you for our debut with editorials and slants to the effect "United we stand, divided we fall . . . "In our dingy little office in the South Dining Room we have reviewed these attacks with fear and trepidation. We have begun to feel like Avis:"Tentamos sempre fazer melhor ainda" as they say in South America, where the roots of our paper are. Nevertheless, now we break the ice, our heads emerging above water.

We have discovered in the past four weeks it's hard work. If anyone wants to help they may. We are going to try to stir the University; this might take some good kicks, we don't know . . . The general reaction to the fine work of the DISSENTER did make us wonder. In any case the office has a thick door and is easily defendable. . . .

We have a grant from the General Council and through the generous help of the La Jolla Light and Journal Staff and Facilities, we will make ends meet.

This is our editorial policy:

- 1. The paper will be run according to the highest college journalism standards.
- We will employ as many competent students as possible.
 We will keep the paper financially sound as possible.

Severed Tie Lines

It seems that campus crises have a way of repeating themselves and proceding inexorably to a foregone conclusion. Students take issue with dicta from the administration and are in turn accused of not using channels, of forcing issues and of eliminating the possibilities for constructive communication. A certain self-rightousness on the part of the administration amuses us. Examination of the history of the dorm rules issue reveals that student dissatisfaction began as early as September after the lawless "two weeks of chaos." Since then students have been asked to abide by and enforce a set of rules of uncertain origin. That after all this time the administration has been unaware of the widespread student objections to the rules is difficult to believe. Last weel, the administration finally noticed the rules, and noticed that there was widespread disobedience to them. This notice took the form of a severe statement from the Provost's office which, with but little perspicacity could be interpreted as by-passing the student judiciary or at least making of it a rubber stamp. General Council, after a vote of confidence from Suite Reps, finally recognised itself as the constitutional dorm government and set down a declaration of mildly liberalised and quite realistic rules. With cries of shock and hurt surprise the administration abhored the students' unwillingness to use channels and hastiness in issuing ultimata. We consider this accusation unrealistic and urge that the administration reexamine their own ultimatum file before hurling invectives.

BENEATH COMMENT...

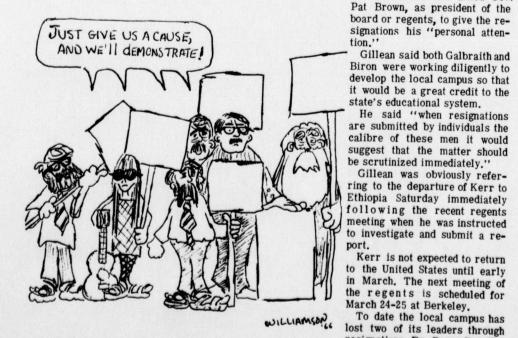

LAWMAKER PROPOSES **CURBS ON VIETNIKS**

WASHINGTON (UPI)-Rep. Olin E. Teague, D-Tex., yesterday introduced legislation and a Constitutional amendment to outlaw actions by what he called "beatnik types" and pseudo-intellectuals" protesting the war in Viet Nam.

Teague, chairman of the House Veterans Committee, said the United States is at war, although no war has been declared.

Teague's bill would impose fines up to \$10,000 and imprisonment up to 10 years on any person who "during war or armed conflict" solicits or contributes to the enemy money or anything of value or gives aid and comfort to the enemy by utterances, written or spoken, or by picketing, parading or other demonstration.

He introduced a separate bill calling for a constitutional amendment to make it unlawful to give aid or encouragement to enemies by such means as public demonstrations, writings and speeches when armed conflict exists.

When there is no discussion, and when apathy towards civil liberties sets in, it is coutbful that ties sets in, it is doubtful that any civil liberties will be left to talk about.

There are questions in the Cisneros-Bain affair. Perhaps the largest is, how often do equally questionable situations arise in the individual's dealing with public officials. And how many of these do we never hear about? And finally, if we don't hear about it, is it just the same as not being there? I seriously doubt it.

Tureck Lectures Popular

By BOB RICHMAN Rosalyn Tureck, current Regent's Lecturer in music, has provided the UCSD community a unique glimpse into the world of Johann Sebastian Bach's music. What Miss Tureck offers in her weekly four-hour workshop is unique because her insights are the product of years of rigorously disciplined and scholarly endeavor as both performer and musicolegist.

Her widely acclaimed piano performances, unfortunately limited mostly to New York City, have in the past ten years been the source of much discussion, for her interpretations often have conflicted sharply with those of other noted figures such as Wanda Landowska Ralph Kirkpatrick, and Glen Gould. As a musicologist, Miss Tureck has extensively traveled Europe, examining documents and performing on instruments in Bach's musical significant development. Her interpretations highly individualistic, remain impressive for they reflect not only her native sensitivity as an artiste, but also conclusions based on documentation and ex-

the New York Times, will present her final seminar as a Regents' Lecturer today at 2:00 p.m. in the Humanities-Library Auditorium. Miss Tureck will perform on a harpsichord as well as the piano for the first time in the lecture series.

haustive analysis - something most appropriate for academic

In three week's time, lecturing to and performing for a fairly large, heterogeneous, and for the most part technically unsophisticated audience, Rosalyn Tureck succeeded in defining and lucidly discussing problems generally reserved for graduate and professional musicians.

She emphasized the structural solidarity of Bach's works and contended that this framework, although mighty, is not rigid. Musical rules are never absolute; music remains a blending of textures. To her, contrary to most twentieth century instruction, the validity of the use of dynamics

in interpreting Bach is unquestionable, as is seen both by the need for development of keyboard registration and by example of what a rigidly interpreted fugue from the "Well Tempered Clavier" sounds like.

Notable also was her deemphasis of the problem of instrumentation in the performance of Baroque keyboard works. Miss Tureck stressed the problem of whether to use piano, harpsichord or clavichord - often the most highly discussed problem - to be one of secondary importance in comparison to problems of rythmic interpretation, ornamentation, improvisation, note inegale,

Carefully pointed out was that there is no one absolutely reliable edition of Bach's keyboard works, and that because of the conventions of script, several levels of interpretation remain

Mendelsohn was discussed as the rediscoverer of Bach's music; Wanda Landowska viewed as artist and figure instrumental in reviving interest in the harp-

Unfortunately discussions were scant and confined to topics not usually of general interest to Rosalyn Tureck, "The High the audience. Important, how-Priestess of Bach" according to ever, were those concerning

teaching methods to youngsters. Above all, Rosalyn Tureck proved herself an artiste. She believes her art to be concept- nificantly liberalized. ually as well as emotionally oriented - and as an artist, will not admit to rigidity or absolute-ness in her art.

Council Issues

Continued

students while not penalizing the more liberal ones. He further stated that liberalization can only be contemplated if students get behind their government and make a serious point of following the new rules.

Kurata visualised an eventual increase in the true power of General Council if it evolves into Revell College government. Eventually, he felt, it would be able to institute such sweeping reforms as the establishment of a college-wide honor system if the students so desire.

Student opinion, after a rash of suite meetings on the night of 22 February, ranged from pleasant surprise, to thoughtful acceptance. Many students reflected the tense quiet which preceeds the storm they knew would inevitably follow their governments declaration. In the midst of this virtually unanimous support, the only mild dissent en-countered was from students who felt the reforms were not suffifelt the reforms were not sufficiently sweeping.

In speaking of student government, Dean Forbes stated that student representatives must not be puppets of administration.' He also felt that "student judiciary must be strong, must not resign, and must make recommendations in the name of the stuents " on the other hand, he made it clear that "students do not have the right to set their own rules because the Chancellor has not delegated that responsibility." Within this framework, however, he stated that he wants "to be as fair as possible. Let them (the student government) be as strong as possible.'

The future fate of these rules which is to be re-examined early in the Spring Quarter is, according to Dean Forbes, in the hands of the students. It was his opinion that the rules would be sig-
