THE UNITED STATES OF AMERICA

Social Studies for Grade VI, broadcasts 15 September.

* The photo above shows American Negro scientist, Miss Delores Brown. She is one of 22,000,000 Negroes in the U.S.A. Every eleventh American is a Negro. Its capital city, Washington, is more than half Negro. Nowhere in the world do so many Negroes occupy such high and well paying positions in education, sports, government and business as in the United States.

There are also 18,000,000 Spanish speakers in the USA. These come mainly from South and Central America.

No country in the world accepts so many new citizens. Each day more than 1,000 new people arrive in the USA who will become citizens in the course of time.

* America has the biggest buildings in the world. Imagine the one pictured below: there is an entire football field under this roof, and 75,000 people watching the game.

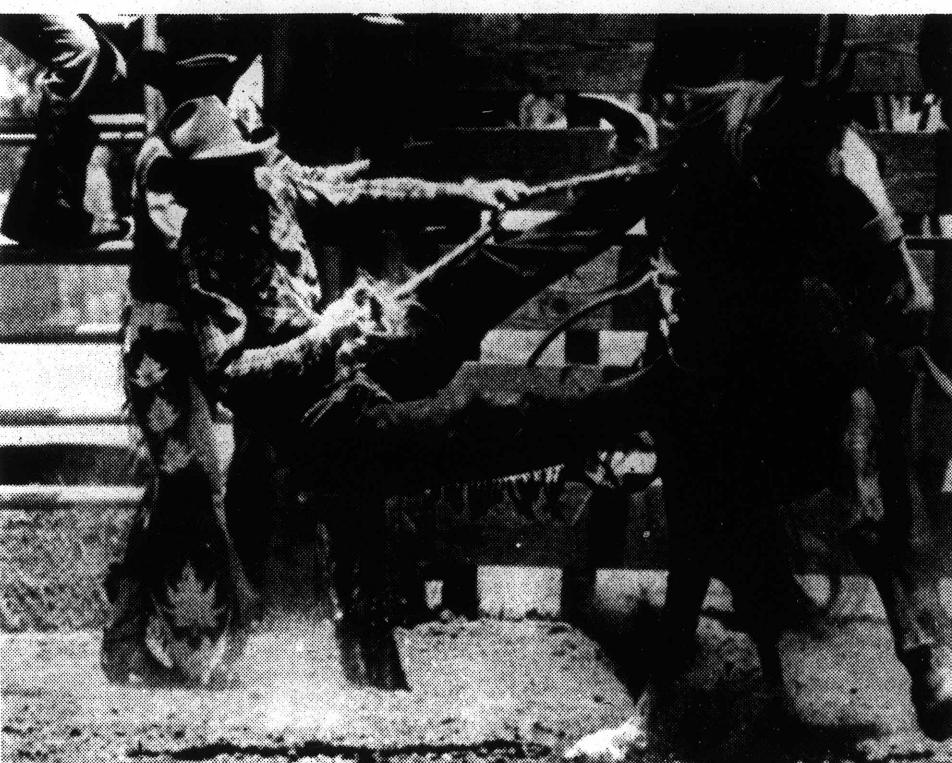

* Americans are the only men who have walked on the moon. To date twelve of them have. They also invented the first atomic weapons as well as the airplane.

* Movies like this cowboy film usually come from U.S.A. America invented movies.

* Below is a picture showing wheat filling a truck. The USA raises more grain than any other country. Every year it exports more food than it eats.
