19th January, 1973

The District Commissioner
Bougainville District
P.O. Box 123/124
ARAWA

The purpose of this patrol was to report myself with (a) local
Government, and (b) the Special Purpose Patrols operating within
KIETA O.L.G. SPECIAL REPORT PATROL NO.1 of 1972/73.

Reference your minute of 11th December, 1972.

I acknowledge with thanks receipt of Patrol Report arising out of the
above patrol of NAGOVISI and SIWAI Areas, as submitted by Mr. A. McGrail,
Assistant Patrol Officer.

This report is of routine nature and therefore not required by this office.
However Mr. McGrail's comments on the Adviser would be of interest to the
Office of Local Government.

An informative report.

Whilst the patrol did not have contact in actual village, contact
with the people of the areas visited occurred especially at the
Chambers and the road camp at Koro.

Throughout the patrol reception was good and the people were
about the road, council work, M.C.P. and Village Government.

Numerous roads required if the Special Purpose Patrols were to
S.J. PEARSALL
a/Secretary
Informed the people that better roads were needed
of the particular council in whose area they lay and it was up to
the councils to allocate funds for such roads if they were available.

Govt. Print.—1792/40,000.—5.72.

INTRODUCTION.

The purpose of this patrol was to acquaint myself with (a) Local Government, and (b) the Special Purpose Authority operating within the Buin, Bana and Siwai areas, and (c) liaison with Mr. Ray (Kiwi) Blanchfield, Road Operations Manager, District Local Government Office and the three Councils concerned with the Special Purpose Authority.

The Bana, Buin and Siwai Councils are situated in the South Bougainville Electorate. Buin, which is at the southern point of Bougainville, adjoins Siwai which, in turn, meets with Bana. The Boku Patrol Post is situated between the Bana and Siwai Councils. Koro is north of Morotana Base Camp.

RECEPTION OF PATROL.

Whilst the patrol did not have contact in actual villages, contact with the people of the areas visited occurred regularly at Council Chambers and the road camp at Koro.

Throughout the patrol reception was good and the people spoke freely about the road, council work, B.C.P. and things in general.

Numerous people enquired if the Special Purpose Authority would also work on the feeder roads, thus enabling them easy access for their produce. I informed the people that feeder roads were the concern of the particular council in whose area they lay, and it was up to the councils to allocate funds for such roads if they were available.

The purpose of the Special Purpose Authority was the Island Highway and as such was a priority, at a later date when the councils had purchased all their machinery and the Highway did not require it any longer, then the councils may use it for secondary roads, but that would be some time in the future.

COUNCILS.

The two Councils at which the patrol spent most of its time were Bana and Siwai.

Both of these Councils have as their Adviser, Andrew Vinoko, who although competent in his work, does not possess the necessary enthusiasm. He has expressed his desire to leave his present position, and judging by the amount of backlog in his work, I can only gather that this decision was reached some time ago.

At the time of the patrol's first visit to these Councils, both had not submitted a monthly financial statement from the end of June this year. Although not a happy state of affairs, it did present the opportunity for me to inspect figures for the past three months which was done with the Adviser as well as the Clerk, thereby affording me more experience than I would normally have gained had the books for each Council been up to date.

I repeatedly impressed upon both the Clerks and the Adviser the advantages of keeping books and records up to date, as we observed numerous cases of entries either not having been made or they were incorrect, thus making it extremely difficult to balance the monthly statements for the councils. The books and financial statements for both councils are now up to date and balanced

The Councillors of both councils were, at the commencement of this patrol, worried regarding the state of the three (3) Isuzu trucks which had been donated by B.C.P. to the combined councils. Breakdowns occurred frequently, some of a major nature, mainly due to the fact that the trucks had long ago had their day.

This aspect will be enlarged upon in a later paragraph.

Some of the Councillors did not fully understand the meaning of the Special Purpose Authority, although all were in favour of the road operations; The functions of the Steering Committee were also fully explained to them at meetings held

with Mr. D. C. Bretherton, and also at a meeting of the Siwai Local Government Council which was attended by Mr. N. McNamara, Mr. C. Liddle, Mr. D. C. Bretherton and myself on the 25th October, 1972.

ROADS AND BRIDGES.

The Trans Island Highway concerning the three Councils mentioned, runs from Buin to Panguna. Progress on the road under the Special Purpose Authority was at first hampered by the breakdowns which occurred regularly in the trucks donated by B.C.P. This, however, has now been rectified by the replacement and major overhaul of the three trucks which are now working full time on the road.

Bad weather at times also hampered progress and a stretch of the road at Koro, approximately 2 miles, was almost impassible after heavy rains. However this section has now received a considerable amount of work and is at present passible under all weather conditions.

The road, on the whole, is quite good and a four wheel drive vehicle should have little difficulty traversing it.

The only river that could cause difficulty between Koro and Siwai would be the Pangara River which may rise considerably after heavy rains, although the patrol crossed it on numerous occasions during and after moderately heavy rains, very little difficulty was experienced.

Between Siwai and Buin, the Mibo River is presenting difficulties as the river bed is of soft sand and therefore moving considerably with the flow of the river. It is difficult to cross after rains when the river has risen owing to the soft sand combined with the fast flow of the water, vehicles are therefore likely to become bogged.

B.C.P. INVOLVEMENT.

B.C.P. donated to the Councils of the Special Purpose Authority, three Isuzu trucks which in their present state were totally unsuitable for the work to be done. Numerous breakdowns

①

occurred, one of which happened to a truck one hour after delivery.

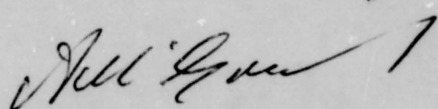

The Councillors were most unhappy with this state of affairs and repeatedly made this known as they thought B.P.C. had let them down after promising donations of serviceable trucks. Meetings with B.C.P. at Panguna, between Mr. Blanchfield, Mr. Bretherton and myself finally resulted in the Presidents and Vice Presidents of the Councils holding a meeting with Mr. Ken McKenzie and Mr. Ken Graham of B.C.P. at Panguna, it was decided that B.C.P. would either replace or completely overhaul the trucks to the satisfaction of the Councils concerned. This has now been done and the trucks are now working full time with no problems.

B.C.P. are also donating two D8 Bulldozers and one Front End Loader to enable the Special Purpose Authority to get off to a good start.

CONCLUSION.

As an introduction to Local Government, the patrol was quite successful. Bana and Siwai Local Government Councils are now completely up to date with their books.

The experience and knowledge gained of Local Government Councils was of great value, in addition to this the Special Purpose Authority and the committee of the combined Councils are now firmly established as are the road operations.

A. McGRAIL,
A.P.O.

KIETA PATROL NO.1 of 1972/73

Reference your 67-1-6 of 7th November, 1972.

I acknowledge with thanks receipt of Situation Reports 1 to 3 arising out of the above patrol of NORTH NASIOI Census Division, together with the appropriate assessments, as submitted by Mr. Ania K. Os, Patrol Officer and Mr. A. McGrail, Assistant Patrol Officer.

As there has been rapid social and economic changes in recent years there is bound to be a certain amount of confusion among the people, with the result that regressive steps become one of the means of reassuring the people of their identity. This is what I believe is happening in the NORTH NASIOI area.

As the area itself has always been under the influence of cult activities I doubt very much whether we could ever eradicate cultist tendency from the minds of the people. The best that we can do under the present circumstances is to merely observe and assess the situation.

KIETA PATROL NO. 2 - 1972/73

I acknowledge with thanks receipt of the Report arising out of the above patrol of the KONGARA No.2 Census Division, together with the appropriate assessments, as submitted by Mr. A. Moliola, Patrol Officer.

Patrol reports are not required at Headquarters, these should be retained by you and only Situation Reports sent on to Headquarters. If no Situation Reports are submitted then you should only send in the Report Cover, which I require for my records.

Nevertheless I have read Mr. Moliola's report with interest. It is very well compiled and presented.

S.J. PEARSALL
a/Secretary

The top layer of soil of the airstrip is soft and boggy and some available for the construction of a airstrip. The layout is very flat except for a few mounds which will have to be levelled before the first landing can be achieved.

Presently only four villages are contributing labour for the airstrip, the villages being, Kiboni, Kapiawa and ... and the other two are not engaged in cargo cult activities. Approximately the majority of the population of the Kungara No. 2 is very attached to the present policies of the Government and always hope for new developments to take place in their own area as ...

PATROL REPORT No. 2 of 1972/73

Station Kieta Sub District Office Officer Compiling Aiden Moliola, Patrol Officer
 District Bougainville Subdistrict Kieta
 Census Division Kongara No. 2 L.G. Council Kieta

(For recording of routine information not of a situation report nature, actionable at Subdistrict or District level, and of value to succeeding officers. No copy is required at Headquarters.)

(For further pages, use foolscap blanks.)

Govt. Print.—1792/40,000.—5.72.

INTRODUCTION

This patrol was instructed to supervise construction of the Kapikave airstrip which has been under construction for the last three years. It is one of the major projects of the Kieta Local Government Council and details can be seen in the body of the Patrol Report.

Geographically the airstrip is located in the Kongara No. 2 Census Division of the South Bougainville District. It is 2,000 feet in length and 200 feet wide with an irregular surface.

The initial stages have been completed but completion on half of the airstrip is desperately urgent so as to provide Bougainville Air Services with enough space to land a small tractor to assist the work progress.

PHYSICAL FEATURES

The top layer of soil of the airstrip is soft and boggy and seems unsuitable for the construction of an airstrip. The layout is very flat except for a few bumps which will have to be levelled before the first landing can be achieved.

DRAINAGE

The drainage system is the most essential requirement for the airstrip. Drains have been dug along the first 1,000 feet on which the work is concentrated and the two drains branch out to reach the main source of the stream which runs practically 300 feet away from the airstrip. Water which was noticed on some parts of the airstrip gradually disappeared and the ground remained dry most of the time. The drains are also planned to be dug on the other side of the 1,000 foot strip as soon as the first are completed. It appears that the drainage system is vitally important for the airstrip and drains should be dug right along both sides to provide drainage as well as compression of the top layer of soil.

WORK FORCE

Apparently ~~only~~ only four villages are contributing labour for the Kapikave airstrip. The villages Isina, Bakakani, Kapikave and Keremona are the only exceptions who are not engaged in cargo cult activities. Comparatively the minority of the population of the Kongara No. 2 is very attached to the present policies of the Government and always hope for new developments to take place in their own area so as to assist them and raise the st

saw. Otherwise everything is adequate for the work and the tools should be well looked after by Committeeman Kanoko.

to assist them and raise the standard of living.

The work is arranged in turns and Keremona & Kapikave form one labour force while Isina and Bakakani form the other. The average number working each day varies due to either the people engaging in their home duties or the distance they have to travel from their villages to the airstrip. In this instance the people were not asked why they were absent on a certain day. This of course explains why the progress is relatively slow but the airstrip appears to have improved since construction commenced.

WORK SUPERVISORS

The two ward committee members are selected to supervise the work throughout and they are Committeemen Kanoko of Kapikave village and Une of Keremona village. They are quite good at supervising the work and the workmen obey their directions for building up the airstrip. At the time the two Administration officers were supervising the work, Committeeman Une was not available so the writer is in no position to comment but the workmen say that he is a good character in encouraging the progress of the airstrip. Committeeman Kanoko has two responsibilities: the biggest being to look after the welfare of the Govt. officer and he made sure the officer was well provided with plates of potatoes for meals. Both committeemen are good and proved to be very competent work supervisors and are quite able to work on their own if the Admin officer is not available.

WORK VOLUNTEERS

Among the rest of the workmen, Bireung (a former Tultul) who has established a new village called Kunda adjacent to the airstrip, appeared to be one of the best regular attendants for work. He has worked for thirteen weeks and the amount of money credited to him for payment was far beyond that of any other worker.

However the question was raised by the officers regarding the shortage of money for the airstrip, and everyone volunteered to work regardless of pay. They feel that the airstrip is going to be a tremendous help once it is in operation. The Bakakani and Isina people queried the rates of pay for a day and suggested that \$1.00 should be the rate. This amount was not promised as it is not known whether the Kieta Local Government Council will agree. Generally everybody volunteered to work on the airstrip for their own benefit.

COUNCILLORS

During the period of supervision, apart from the councillors mentioned above, the Councillor of Isina was the only one present and he conversed with officers regarding matters arising from the other councillors who are engaged with the cargo cult beliefs. Councillor Rup uinu has strongly advised his people not to become involved in any cargo cult activities. He encouraged them to work at the airstrip with Keremona, Kapikave and Bakakani people even though they are small in number. Councillor Ivona was not available due to his thorough engagement at Tavatava village. The councillor of Bakakani was not seen at all and people advised he was one of the great followers of the cargo cult. He in fact refused to let the people work at the airstrip. He has some council equipment in the village had has been told to return them to the airstrip.

COUNCIL TOOLS

There are plenty of tools sent over by the Kieta Local Government to help with the construction of the airstrip. There are some repairs to be made such as replacing nuts for wheelbarrows and sharpening the saw. Otherwise everything is adequate for the work and the tools should be well looked after by Committeeman Kanoko.

PAYMENTS

So far the Council has used \$600 from the Rural Development Fund to pay for the labour that has been done on the airstrip. All payments are recorded and copies of each payment made can be found on the Payment Schedule Sheet indicated. Everyone has received enough cash and there should be no complaints raised regarding payment.

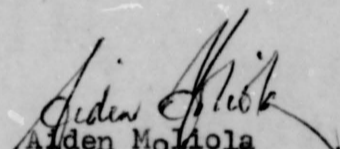

CONCLUSION

Generally the work progress on the first 1,000 ft of the airstrip is progressing relatively well and it should be completed not later than the end of the next year. The camber should be built as anticipated to suit the weather conditions that usually occur in this area. The people are quite co-operative and enthusiastic and the airstrip should be completed within two years from now.

MISCELLANEOUS

The regular news broadcasts from Radio Bougainville about the progress of the area should provide a lot of encouragement and help for the people. Despite this fact, the people felt that they are so isolated from Kieta town and the government of this country has forgotten them completely.

Prior to the officers' arrival at the airstrip the people had already commenced digging up the top layer of soil leaving holes one foot deep. However the fault was recognised and the area dug up was filled in again and levelled off with the marks provided for the suitable construction of the airstrip.

KIETA PATROL NO. 2-1972/73

Reference your minute of 25th September, 1972.

I acknowledge with thanks receipt of Situation Report 1 arising out of the above patrol of part of the KONGARA Census Division, together with the appropriate assessment, as submitted by Mr. M.W. HEGGEN, Assistant District Officer.

An interesting Sitrep which has been referred to the Assistant Secretary (District Services) for his information. It would have been worthwhile if the patrolling officer had ascertained who actually collects the 'fines' and the ultimate disposal of the sums collected.

I note that the Assistant District Commissioner has not commented upon the emergence of the cult. This is unusual as the presence of any form of cultism is normally something of administrative concern.

Only one copy of the Assessment of the Sitrep was received. In future, please ensure that all Sitreps are accompanied by two copies of the Assessment.

(For further pages, use foolscap blanks.) Govt. Print.—1792/40,000.—5.72.

The prime object of this patrol was to check progress on the construction of the Kapikavi airstrip (R.D.P. Project No. 18-19) and to supervise further work.

Work on Kapikavi airstrip has now been in progress for over two years, however a great deal of work still remains to be done.

Overall dimensions of the cleared area are 2000' x 200' however work is at present being concentrated on a section 1000' x 100' at the southern end. In order that landings may be made to deliver more equipment to help with the remaining work.

The airstrip is sited on gently undulating land which becomes very swampy after any period of wet weather. A solid base of what appears to be volcanic ash is overlaid by a layer of red clay and a layer of black topsoil, the last two together varying in depth from 1 foot to 2 feet.

When an Administration Officer last inspected work, he marked out the 1000' x 100' strip and instructed the people to first remove the layer of black topsoil, then level out any irregularities. What actually took place was quite different. Having removed some of the black topsoil, the workers noticed that the now-exposed layer of clay was also quite soft. This is understandable as, ever since the cyclone in April, there has been practically constant rain. This layer of clay was therefore also in the process of being removed when the patrol arrived to inspect and supervise work. In places, the surface had been removed to a depth of 18" and excess surface water had of course drained into this "trench". Wheel barrows were also turning the wet ground into an even worse quagmire. Work was therefore halted on the actual landing strip, and the digging of drains commenced (see attached plan) in order to remove the excess surface water and aid the drying out process when the rainy period eventually ends.

When the ground has dried sufficiently work will again commence on the actual landing strip.

Mr. Aiden Moliola, Patrol Officer, is remaining at Kapikavi for a further two or three weeks to supervise work.

The people of Kapikavi and Keremona villages bear the main workload and are helped occasionally by people from Bakakani and Isina villages. Officers visiting the project are made extremely welcome by the people of Kapikavi, Keremona and Bakakani (all of the S.D.A. faith) However most other villages in the area are carrying on cargo cult activities (see accompanying Situation Report) and the visit of the patrol seemed to be of no particular interest to them.

(2)

While the Rest House (a rare luxury in the area) is solid and comfortable, and the people extremely hospitable at Kapikavi village, the one-hour walk to and from the airstrip each day is rather inconvenient, especially during a wet spell such as that which is now being experienced. It is therefore recommended that if an officer should go to Kapikavi to supervise work on the airstrip for any length of time, he should establish a camp at or near the airstrip.

Reference your 67-1-6 of the 25th October, 1972.

I acknowledge with thanks receipt of notification of the above patrol of part of the Kongara Census Division as submitted by Mr. M.W. Heggen, Assistant District Officer.

This is a patrol report which should have been retained by your office. If no Situation Reports are included in the Report then all I require is the Patrol Report cover which is used for record purposes. I notice that you have done this with Wakunai Report 1-72/73.

KIETA PATROL REPORT NO. 2
OF 1972/73

...
...
Attached herewith are three copies of the above report together with copies of the patrol instructions and comments on the report by the Assistant District Commissioner.

I endorse the comments made by the Assistant District Commissioner on the report. Mr. Moliola definitely gained useful experience from this report in view of the fact that he was operating in an area where the majority of the village people are involved in cargo cult activities.

PATROL REPORT NO.2 of 1972/73

Attached please find above report from Mr. Moliola.

The patrol has been of benefit to the area not only on the airstrip but in contact with people at the remote end of the Sub-District. Mr. Moliola has benefitted from the experience and will be returning next week to check on progress.

The cargo cult appeared to lack direction after National Day fized and Damen has returned to the fore with his promise of people's court after independence and anti-progress teachings. Continued effort on the airstrip is a vital anti-cult activity. Damen's cults have yet to achieve anything and as yet our efforts have born little fruit.

PATROL INSTRUCTIONS

Please prepare to depart Kieta for Kapikave in the Kongara Census Division on the 22/8/72. Mr. Patrol Officer Aiden Moliola is to accompany you and stay after you leave to continue supervision on the airstrip.

You are to check on work to date, reorganise the people's efforts if necessary (I believe it is) and instruct Mr. Moliola in what is required. Please liaise with Mr. Deverell (Kieta Council Adviser) regarding R.D.F. money in regard to this airstrip and any other relevant matters.

I also require you to inquire into the cargo cult activities in the area and be back and have this part of your report ready for the District Commissioner in time before National Day.

R.W. Henderson
Assistant District Commissioner

PATROL REPORT No. 2 of 1972/73

Station.....Kieta Sub District Office.....Officer Compiling.....Aiden Moliola, Patrol Officer
 District.....Bougainville.....Subdistrict.....Kieta
 Census Division.....Kongara No. 2.....L.G. Council.....Kieta

(For recording of routine information not of a situation report nature, actionable at Subdistrict or District level, and of value to succeeding officers. No copy is required at Headquarters.)

(For further pages, use foolscap blanks.)

Govt. Print.—1792/10,000.—5.72.

INTRODUCTION

This patrol was instructed to supervise construction of the Kapikave airstrip which has been under construction for the last three years. It is one of the major projects of the Kieta Local Government Council and details can be seen in the body of the Patrol Report.

Geographically the airstrip is located in the Kongara No. 2 Census Division of the South Bougainville District. It is 2,000 feet in length and 200 feet wide with an irregular surface.

The initial stages have been completed but completion on half of the airstrip is desperately urgent so as to provide Bougainville Air Services with enough space to land a small tractor to assist the work progress.

PHYSICAL FEATURES

The top layer of soil of the airstrip is soft and boggy and seems unsuitable for the construction of an airstrip. The layout is very flat except for a few bumps which will have to be levelled before the first landing can be achieved.

DRAINAGE

The drainage system is the most essential requirement for the airstrip. Drains have been dug along the first 1,000 feet on which the work is concentrated and the two drains branch out to reach the main source of the stream which runs practically 300 feet away from the airstrip. Water which was noticed on some parts of the airstrip gradually disappeared and the ground remained dry most of the time. The drains are also planned to be dug on the other side of the 1,000 foot strip as soon as the first are completed. It appears that the drainage system is vitally important for the airstrip and drains should be dug right along both sides to provide drainage as well as compression of the top layer of soil.

WORK FORCE

Apparently ~~only~~ only four villages are contributing labour for the Kapikave airstrip. The villages Isina, Bakakani, Kapikave and Keremona are the only exceptions who are not engaged in cargo cult activities. Comparatively the minority of the population of the Kongara No. 2 is very attached to the present policies of the Government and ~~always hope for new developments~~ always hope for new developments to take place in their own area so as

saw. Otherwise everything is adequate for the work and the tools should be well looked after by Committeeman Kanoko.

to assist them and raise the standard of living.

The work is arranged in turns and Keremona & Kapikave form one labour force while Isina and Bakakani form the other. The average number working each day varies due to either the people engaging in their home duties or the distance they have to travel from their villages to the airstrip. In this instance the people were not asked why they were absent on a certain day. This of course explains why the progress is relatively slow but the airstrip appears to have improved since construction commenced.

WORK SUPERVISORS

The two ward committee members are selected to supervise the work throughout and they are Committeemen Kanoko of Kapikave village and Une of Keremona village. They are quite good at supervising the work and the workmen obey their directions for building up the airstrip. At the time the two Administration officers were supervising the work, Committeeman Une was not available so the writer is in no position to comment but the workmen say that he is a good character in encouraging the progress of the airstrip. Committeeman Kanoko has two responsibilities the biggest being to look after the welfare of the Govt. officer and he made sure the officer was well provided with plates of potatoes for meals. Both committeemen are good and proved to be very competent work supervisors and are quite able to work on their own if the Admin officer is not available.

WORK VOLUNTEERS

Among the rest of the workmen, Bireung (a former Tultul) who has established a new village called Kunua adjacent to the airstrip, appeared to be one of the best regular attendants for work. He has worked for thirteen weeks and the amount of money credited to him for payment was far beyond that of any other worker.

However the question was raised by the officers regarding the shortage of money for the airstrip, and everyone volunteered to work regardless of pay. They feel that the airstrip is going to be a tremendous help once it is in operation. The Bakakani and Isina people queried the rates of pay for a day and suggested that \$1.00 should be the rate. This amount was not promised as it is not known whether the Kieta Local Government Council will agree. Generally everybody volunteered to work on the airstrip for their own benefit.

COUNCILLORS

During the period of supervision, apart from the councillors mentioned above, the Councillor of Isina was the only one present and he conversed with officers regarding matters arising from the other councillors who are engaged with the cargo cult beliefs. Councillor Rup uinu has strongly advised his people not to become involved in any cargo cult activities. He encouraged them to work at the airstrip with Keremona, Kapikave and Bakakani people even though they are small in number. Councillor Ivona was not available due to his thorough engagement at Tavatava village. The councillor of Bakakani was not seen at all and people advised he was one of the great followers of the cargo cult. He in fact refused to let the people work at the airstrip. He has some council equipment in the village had has been told to return them to the airstrip.

COUNCIL TOOLS

There are plenty of tools sent over by the Kieta Local Government to help with the construction of the airstrip. There are some repairs to be made such as replacing nuts for wheelbarrows and sharpening the saw. Otherwise everything is adequate for the work and the tools should be well looked after by Committeeman Kanoko.

PAYMENTS

So far the Council has used \$600 from the Rural Development Fund to pay for the labour that has been done on the airstrip. All payments are recorded and copies of each payment made can be found on the Payment Schedule Sheet indicated. Everyone has received enough cash and there should be no complaints raised regarding payment.

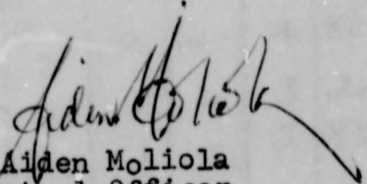

CONCLUSION

Generally the work progress on the first 1,000 ft of the airstrip is progressing relatively well and it should be completed not later than the end of the next year. The camber should be built as anticipated to suit the weather conditions that usually occur in this area. The people are quite co-operative and enthusiastic and the airstrip should be completed within two years from now.

MISCELLANEOUS

The regular news broadcasts from Radio Bougainville about the progress of the area should provide a lot of encouragement and help for the people. Despite this fact, the people felt that they are so isolated from Kieta town and the government of this country has forgotten them completely.

Prior to the officers' arrival at the airstrip the people had already commenced digging up the top layer of soil leaving holes one foot deep. However the fault was recognised and the area dug up was filled in again and levelled off with the marks provided for the suitable construction of the airstrip.

Aiden Moliola
Patrol Officer

KIETA PATROL REPORT NO. 3 OF 1972/73

Two copies of the report are enclosed together with the Assistant District Commissioner's comments. It is of interest to note the build up of enthusiasm for the road work from the people. This enthusiasm could only be maintained with continual advisory service from the field staff and the P.W.D. personnel. Hence the Assistant District Commissioner and the District Works Engineer have recently visited the area to inspect the swampy areas for alternative routes.

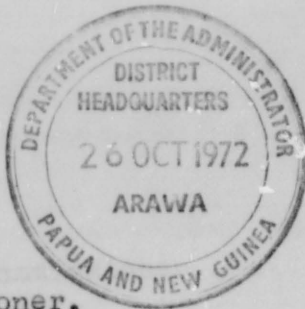

H. W. I. BROWN,

KIETA PATROL REPORT NO. 3 OF 1972/73

Please find attached the above report submitted by
Assistant Field Officer David Kathinoolley.

David has succeeded in building enthusiasm for the
road even if material results are little as yet. The
bulldozer is a small agricultural International and
about the equivalent of a D2. I have some doubt whether
it will be of a great deal of use. No outboard has
prevented inspection by the D.W.P. and myself. Tools
are vital to the project and are being sought.

R.W. Henderson
Assistant District Commissioner

PATROL REPORT

Attached hereto please find four (4) copies of the patrol report to the Eivo Census Division by D.W. Kathimooley A.F.O.

Field Officer's Journal foliols 39 to 44 of 1972-3 is attached.

Claim for Camping Allowance is also attached for your approval, please.

D.W. Kathimooley
D.W. Kathimooley
A.F.O.

Inquiry was also made as to whether there is any local material available for surfacing the road and it was found that there is some but not in great quantity.

Nothing much was done on this project due to three factors:

1. Prior to the arrival of the patrol the majority of the people from Kieta and some inland people suggested that they would rather build the road from Torvi village to Mariri Point as this is much closer to them than Mariri Mission (Mariri Point is about 20 minutes walk down from Torvi village and is between Vito village and Torvi Plantation).
2. It rained for one week and this of course spoilt the work's progress. Due to this all rivers and streams nearby were flooded and the people were unable to appear for work.
3. The second week was spent on the National Day Celebrations so people were engaged in preparation for this.

As stated due to all these facts nothing much was actually done.

Govt. Print.—1792/40,000.—5.72.

INTRODUCTION

The prime object of this patrol was to assist and supervise the Eivo people in construction of Mabiri-Manetai Road (section between Mabiri Mission and Borvi plantation).

Before the patrol's arrival in the area, a special announcement was broadcast over Radio Bougainville informing the people of the patrol's arrival and its nature. The abovementioned patrol departed Kieta on 23/8/72 for the Eivo Census Division.

MABIRI-MANETAI (section between Tarara village and Borvi Plantation)

This section of the road has been inspected on the same day of the patrol's arrival at Tarara village and the following things were sighted:

- a) this section of the road lies on low land and thus requires heavy drainage and formup.
- b) grass needs to be cut and the bush and trees on either side of the road are to be cut down and burnt.
- c) Big logs and stumps which were carried down by the heavy rains and winds are also to be cut and removed.
- d) Small creeks and rivers that run across the road are to be culverted and bridged.

Inquiry was also made as to whether there is any local material available for surfacing the road and it was found that there is some but not in great quantity.

ROAD WORK

Nothing much was done on this project due to three facts:

1. Prior to the arrival of the patrol the majority of the people from Borvi and some inland people suggested that they would rather build the road from Borvi village to Kuwiri Point as this is a much closer port to them than Mabiri Mission (Kuwiri Point is about 15 minutes walk down from Borvi village and is in between Vito village and Borvi plantation).

2. It rained for one week and this of course spoilt the work's programme. Due to this all rivers and streams nearby were flooded and the people were unable to appear for work.

3. The second week was nearing the National Day Celebrations so people were engaged in preparation for this.

As stated due to all these facts nothing much was actually done on this patrol.

WORK VOLUNTEERS

The Eivo Census Division is composed of eleven (11) villages, all of which are in the Kieta Council area with the exception of the two coastal villages Vito and Tarara. These villages are isolated and thus create some difficulty in personal contact.

It appeared that the inland villages of Borvi, Atamo, Boira, Alakabau, Kopikiri, Karnovitu, Korpei and Nasiwoiwa volunteered to contribute labour for the project. The Korpani villagers are involved with cargo cult activities so ignored to contribute and to develop their area. They mainly concentrate on the cargo cult movement. Vito and Tarara villages, regardless of whether or not they are in the Council area prepared to assist on the project if the council villages started working on it.

COUNCIL TOOLS

It appeared to me that there have been no tools issued to this project at all. As this is one of the Kieta Local Government Council's major projects, the first priority should be given to providing sufficient tools. This project cannot be efficiently carried out without the proper tools. The only tools in the vicinity were some grass knives, knives and a couple of axes belonging to the local people. I suggest that the above mentioned tools should be bought locally and sent on the first available patrol to the area.

BULLDOZER

To facilitate work on the project Brother Patrick of Mabiri Mission was contacted re hiring of his bulldozer D.4. This is just to assist in formation of the road. Brother Patrick after some length of discussion agreed to it. However he regretted that he had no operator to work the machine. The hire rate per hour is being discussed.

Regarding an operator, I suggest the Kieta Local Government Council should provide one with the assistance of the Assistant District Commissioner, Kieta.

CONCLUSION

As stated above, the people are willing to work together ignoring the minor social and geographical differences.

Immediate action should be taken in supplying tools before the start of this project as it would reduce any delays that may arise.

D.W. Kathimooley
D.W. Kathimooley
Assistant Field Officer

Govt. Print.—1792/40,000.—5.72.

INTRODUCTION

The prime object of this patrol into the Eivo Census Division was to give constant assistance and supervision on the construction of Borvi-Mabiri Road. However the work of this road was started two weeks before the writer's arrival at Borvi village. For these past two weeks about fifty people were already working on the road, mainly cutting grass, clearing thick secondary growth on either sides of the road and also removing felled trees and stumps away from the middle of the road from the main section commencing from the northern end of Borvi Plantation and the southern end of Mabiri Roman Catholic Mission station. This main section was later divided into two sub sections - first one commencing from the northern end of Borvi Plantation and Tarara village and the second commencing from Tarara village to Mabiri Mission. This was done to give much more attention to the lower swampy area of the sub section before the rainy season begins, towards the end of the year.

ROAD WORK

Work on this road went on pretty well with the average attendance of 30-40 people working per week. Almost all of the Borvi people were engaged on the project to the last two weeks. The inland people of Atamo, Korpani, Nasiwoiwa contributed to the job but have little interest.

WORK VOLUNTEERS

Apart from other villages in the area, the Borvi people showed great interest in the project. Atamo, Nasiwoiwa and Kopani villagers also showed some interest, but to a lesser degree. The rest of the Council villages and the two non-Council villages on the coast, namely Tarara and Vito, simply ignored to contribute to the project. The abovementioned two coastal villages, as they are on the coast and can easily ship their produce to Kieta, care less in contributing to the job than their neighbours from the inland villages. Nasiwoiwa, Korpikiri and Atamo people later on refused to work on Borvi-Mabiri road claiming that this road will only benefit the Borvi people and not them. They further stated that they have their own road, which has already been built by them from Nasiwoiwa to Vito village which is on the coast. Therefore they prefer to work on this road, rather than contribute their labour to Borvi-Mabiri road. Regardless of what the other inland villages of the division say, the Borvi people have their hearts set on the project, believing that the upgrading of this road will be a great advantage to them and the other village in the Division who now refuses to contribute on the project.

FEMALE VOLUNTEERS

At Borvi, a committeeman Moris Siwi and a group of girls and a couple of old women approached me and said they would also like to work on the road. However I considered the work was too hard or heavy so refused to accept their offer.

DRAINAGE

One quarter of a mile of the first sub section has been drained on both sides, 20 feet wide by 3 feet deep. Materials dug from the drain were placed in the middle of the road so as to raise the base of the road a bit higher to let water run into the drain instead of settling after the rain. The base has been raised to 6" above ordinary surface of the ground. At present the surface is loose, however this will be covered when new vegetation grows.

RIVER BRIDGE

This section of the road consists of six rivers, three of which have been bridged. However during the last cyclonic wind and rain, two have been washed away by high flood. The Bonuana River has three tributaries, two of which are reasonably shallow and I suggest they could easily be culverted or a swing bridge built over them.

CULVERTS - CEMENT & CORRIGATED IRON

Some cement culverts were sighted along this section of the road, which I believe were supplied by the Kieta Local Government Council for the project some two years ago. Brother Patrick of Mabiri Mission has also indicated to me that there are stacks of corrugated iron culvert at the foot of Mabiri Mission wharf which have not yet been picked up by the people. I suggested these could be gathered and stored for later use when required.

BULLDOZER

A further investigation has been made re hiring of Mabiri Mission's bulldozer by the Assistant District Commissioner, Kieta and the District Works Engineer, Public Works Kieta, and found that it is too small to be of any real use on the project. However due to this, some arrangement was made to bring down from Wakunai a D6 which is mainly engaged on the Rural Development Fund work, early next year.

PAYMENTS

Payments on this project have been introduced mainly to get more people working on the road and also to facilitate the unuseable and unrecognised road to be useful. Each person is paid 50¢ per day as suggested by the Assistant District Commissioner, Kieta. Knowing that they get paid for the work, some unexpected people from Kopani eventually appeared for work - Kopani people are strong cargo cult believers.

\$452.00 has been spent on this project during this patrol.

GENERAL

Generally speaking work on this road went on pretty well to the last week of the patrol when people abruptly stopped appearing for work. Brief reason for this is given in the second section of this report.

MISCELLANEOUS

Land Investigation : This patrol was also instructed to carry out a land investigation and survey work at Borvi. However this was not done as the land concerned is under dispute. The two clans were asked to settle the matter amongst themselves and when it is settled they should call at the Sub District Office, Kieta.

KIETA PATROL NO. 6 - 1972/73

Reference your 67-1-6 of the 5th February, 1973.

I acknowledge with thanks receipt of Situation Report 1 arising out of the above patrol of the KORORUA Census Division, together with the appropriate assessments, and also the Area Study appendants, as prepared by Mr. J. G. G., Patrol Officer.

In returning the F.O.J. folios which were inadvertently sent by you with the other papers, I notice that most of the patrol was carried out by vehicle on-day trips presumably because of the absence of rest houses. However, in view of the assessment that the FONDONA cult has about folded up, it would have been advantageous to have an officer move slowly through the area using a van if necessary.

I think your conclusion that the FONDONA Cult is "on it's last leg" is a very optimistic view. The history of cults in the KORORUA shows a pattern of persistence; with lulls in activity followed by renewed practices and I tend to consider that the present phase is heading to a lull before a further upsurge.

The Area Study is well documented and statistically comprehensive in parts. I find though, that the section under C (page 1) is difficult to reconcile with the Sitren on Cargo Cult and with part H (page 4). Some comment from the Assistant District Commissioner, Kieta on yourself of the correct position would have been helpful.

TOTAL CASH EARNING BY WAGE LABOURERS

Kekere Plantation 70 c/labourers @ \$8.50 per fortnight
 10 casual workers @ \$10.20 per fortnight
 Carpenters & driver @ \$20.00 per fortnight
 Highest paid carpenter - \$35.00 " "

Toiomanapu - To be forwarded when obtained

Keromira Mission 3 To be forwarded when obtained

Iwi 60 c/labourers @ \$8.50 per fortnight
 7 casual workers @ \$8.50 per fortnight
 Highest paid casual carpenter \$30.00

APPENDIX XII
CENSUS STATISTICS
KOROMIRA

Births and Deaths

The Census Statistics show that there were 39 deaths and 125 births recorded since Census was last conducted in May and 1st June 1970.

The birth rate is 10.9 per 100, the death rate is 3.5 per 100; natural increase therefore 7.4 per 100.

N.B. These figures are a little bit high and it should be noted that the last census revision was in May 1970. A period of about 2 years 5 months has gone past since then.

Migrations

The figures for migrations show that there were fifty people recorded for Migrations In and 45 people recorded for Migrations Out.

Absent Workers/Students

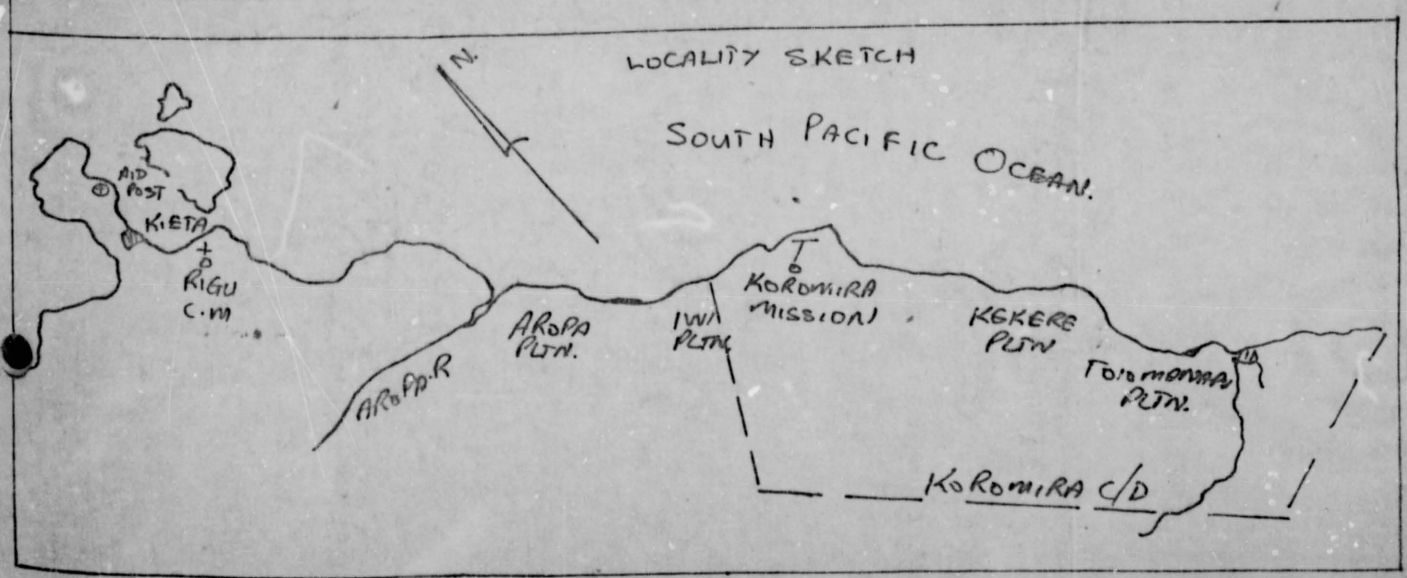

The statistics show that there were 28 people who were absent outside the Electorate (Central Bougainville) These people are either students in schools outside the Electorate or employed elsewhere outside the Electorate.

General Comment

The total population of the Koromira Census Division is 1,366 compared with the 1970 figure of 1275, an increase of 91 people.

7

KIETA PATROL No 6 of 1972/73
CONDUCTED BY: A.K. DA
PATROL OFFICER.

6

AREA STUDY

KOROMIRA CENSUS DIVISION

A. INTRODUCTION

(a) Geographical Description

The Koromira Census Division is situated in Kieta Sub-District of the Bougainville District.

It is the southern most Census Division in the Sub-District with the Pacific Ocean being the southern boundary, South Nasioi the northern boundary, the western boundary being Kongara Census Division and the Kono Census Division being the southern boundary.

Average annual rainfall supplied by Toiomanapu Plantation is 120" per year. Variability is dependant on prevailing weather. No mark dry and wet season. Temperature hot and humid to mild on foothills.

The Census Division has a narrow coastal strip rising to the undulating hills. The highest altitude is the peak of Mt. Bon Martini with 4918 feet.

(b) Access

(i) Road - Kieta-Toiomanapu Road is 28 miles. Taurava River which breaks into two tributaries cannot be crossed during heavy storms.

(ii) Sea - Anchorage points at Koromira Mission, Darumai Society, Kekere Pāntation and Toiomanapu. Experienced mariners utilize these anchorage points.

(iii) Air - No airstrips exist in the Koromira Census Division. Main airstrip (Aropa) which is outside the Census Division serves any required purposes.

(c) Brief Background of Administration Contact

The people have been in contact with the Australian Administration since the Australian Army takeover from Germany. Period of time of World War II is exclusive of this.

2 Few instances were feelings of mistrust with the Administration have been reported or encountered. However during the course of the patrol no opposition was encountered upon from the people by the patrol.

B. POPULATION DISTRIBUTION AND TRENDS

(a) Population Register - see inside cover.

(b) Outward flow of labour and absenteeism - As per new format of the population Register, 5 children and 23 adults, a total of 28 people were absent outside the Central Bougainville Electorate. There is very little outward flow of labour and the number of absentees is relatively small.

(c) Brief Details of Roads and Walking Tracks - Kieta-Toiomanapu links up all coastal villages from Ioro to Toiomanapu Plantation. All villages which are not near the road have good walking tracks adjoining each other. The road from Toiomanapu to Taki is of a vehicular standard. Present state of the road is that two creeks filled up and a bridge built to allow the water to flow through.

C. SOCIAL GROUPING

No change in the following:

- a. Number of District Component Social Groups
- b. Functional Social Unit
- c. Language Pattern
- d. Relationship between Component Social grouping
- e. Relationship of component groups with groups outside the division.

D. LEADERSHIP

(a) Potential or Real leadership

<u>Village</u>	<u>Councillor</u>	
Taki		Traditional
Amapong	Onai Kopana	Charismatic
Siorovi		
Pondona		Charismatic
Matana	Mellie Hakoutu	Traditional
Minani	Tompai	
Sirowai		
Kamarovi	Joseph Maoro	Traditional
Munias		
Mangona		Traditional
Romeina	John Dakeni	Charismatic
Sipurei		
Peiwana		
Ioro	William Piau	Traditional

(b) Brief Details of Leaders

No change in particulars except for new councillor Tompai Boreure who was a driver at Kekere plantation a couple of years back. He is at present a villager.

(c) Leadership Change

The only change which took place in the election of a new councillor was at Sirowai. This was because the councillor previous to the present elected one was called up by the Seventh Day Adventist Mission to take up teaching again. No other significant change apart from this.

E. LAND TENURE AND USE

- (a) No change in the traditional system of land tenure and inheritance.

The following follow suit.

- (b) Individuals holding leases from the Administration.
- (c) Method of Cash Cropping.

F. LITERACYa) List of Schools in the Koromira

1. Koromira Roman Catholic Mission Primary School
2. Tarumi Roman Catholic Mission Primary School
3. Amapong/Koianu Roman Catholic Mission Primary School.

1. Koromira - see Appendix 1

2. Tarumi - see appendix 2

3. Amapong/Koianu - see appendix. 3 & 4

The only real change is that Sirowai S.D.A. School is no longer there. Children are sent mainly to Nulendi S.D.A. in North Nasioi Society or elsewhere for primary education.

b) Number of Literate and Semi-literate Adults

See appendix. 5

c) Number of People Residing in the Area who have received Higher Education - see appendix 6d) Names of Students Currently Receiving Higher Education

See appendix 7

e) Interest in Newspapers, Bulletins and Radio

Interest in radio is very high mostly at the end of the day, in the morning and during lunch hour. Weekend programmes particularly listener's requests in Radio Bougainville are very common.

G. STANDARD OF LIVINGa) Housing and Sanitation

Relatively high living standard, water supply is very abundant and no problem with garbage disposal and sanitation.

Material needed for housing is easily obtained from the bushes if a native material type house is to be built.

Money for semi-permanent type houses comes mainly from cash earned from cocoa and coconut and to a small extent from selling goods at the market.

b) Staple Diet

Staple diet is mainly vegetables grown in the garden and green leaves.

Introduced food such as rice, meat and fish also come into their diet.

c) Community Centres and Organisations

The patrol did not come across any community centre or organisation.

The Women's Club at Amapong mentioned in the last report was not encountered.

H. ACCOMMODATION SERVICES FACILITIES

Nil.

I. MISSIONS

- a) Villages Identifying Themselves with Missions - no change
- b) Services provided by each Mission -
 - 1. Catholic: no change
 - 2. Seventh Day Adventist - Sirowai Primary School not in existence at present.
 - 3. United Church - Women's Club said to be organised by the church was encountered up.
- c) General Attitude to Missions - no real change except for people who have involved themselves with cargo cult.

J. NON INDIGENES - See appendix 9

K. COMMUNICATIONS

- a) Roads - Kieta Toiomanapu 28 miles road
- b) Sea - no change
- c) Air - no change

L. TECHNICAL AND CLERICAL SKILLS - See appendix 10

M. STAGE OF POLITICAL DEVELOPMENT

A lot of the fears mentioned in the last report have either faded away or if they are still in the minds of the people, the patrol did not come across them.

It was mentioned in the last patrol report that there was mistrust directed towards the Administration and Local Government was an exception with unanimous support. I personally as a writer of this report do not agree with the above. The degree of mistrust directed towards Administration is just as much as that towards Local Government. Support for these objections are as follows:

- 1. Numerous times when people have asked for certain items from the Council through their councillor, they have waited and waited with no return. Obvious reason being no funds.
- 2. Where there were funds, it was not the Council alone that supplied the money and officers to supervise the work on whatever the project was. The Administration supplied field officers to supervise the work. So without Administration Field Officers, the Council's work on whatever projects could not have been done anyway.

Therefore if mistrust is directed towards Administration, Local Government fall in the same line too.

The Administration has always given assistance in finance, through R.D.F. and has always been prepared to put field staff on supervisory work undertaken by Council which the trust is given to by the people with unanimous support.

Awareness in major political affairs of today is not very wide. This is quite understandable because quite a large number of people have not had the chance to be educated.

The coming day for Papua New Guinea to have its self government is not very impressive as indicated by expressions on people's faces and actions, however they realised that it has to come and they just have to prepare for it.

N. ECONOMY OF THE AREAa) No. of Economic Trees in each villageKoromira Census Division

<u>COCONUT</u>	<u>1969-70</u>
Trees not yet bearing	40,000
Trees of bearing age	64,000
Production in tons	240
Estimated number of growers	160

COCOA

Not available

COCOA1972

Mature	44,670
Immature	100,842

COCONUT

Mature	31,306
Planted	5,540

b) Total Actual Production - volume and value

Figures from various producers are not available.

c) Market Gardening

D.R.A. only goes on Tuesdays now to purchase fresh foods from Tavatava market place. So two days market which were Tuesdays and Thursdays have now been reduced to one day market which is on Tuesdays.

d) Total Cash Earnings by Wage Labourers

See appendix. ||

e) Co-operatives

Darumai Co-operative Society - within the Division.

Dakehatu Producers Co-operative Limited - a branch of which is at ~~Maui~~ outside the Census Divisionf) Outstanding Entrepreneurs

Nil

g) Number of Bank Accounts

The exact number of bank books held in Koromira Census Division is impossible to obtain, bearing in mind the cult activity in the area and the present state of the people as far as political unrest is concerned.

h) Apparent Difficulty in Meeting Tax Obligation

Nil

i) Average per Capita Income

Unobtainable.

o. POSSIBILITIES OF EXPANDING THE ECONOMY

a) Availability of Arable Land

There is plenty of arable land in Koromira Census Division. The people are making use of this by planting economic crops such as cocoa and coconut.

Patches where the above two crops are not planted are made use of by shifting cultivation.

The Department of Agriculture, Stock and Fisheries and Trade and Industry (co-operative) advise within their capacity as to the utilization of the arable land.

b) Market Gardening

The potential cash crops is still in the Census Division however the C.R.A. is not as encouraging nowadays as it used to be in the last couple of years.

The reason being that there are not as many contractors working with C.R.A. now therefore two marketing days out at Koromira had to be cut down to one.

c) Wage Earnings

The percentage of wage earners compared to that of normal villager is very small. No significant change in increase of number of people engaged in wage labour.

d) Possibilities of Introducing Cash Crops

Nil

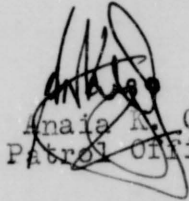

e) Probable Reaction to Increased Plantations

Nil due to shortage of labour.

P. ATTITUDE TOWARD CENTRAL GOVERNMENT

The present form of Government which ^{is} Democratic Type, is accepted by the people. Knowledge in other form of Government if there is any is very little.

This patrol was through the Koromira Census Division just before the incident which happened in Goroka in the Highlands. No dissatisfaction was encountered during the course of the patrol.

Anaia M. Oa
Patrol Officer

KIETA PATROL REPORT NO. 10 OF 1972/73

... I am attaching Patrol Report cover with statistics, Situation Report of the Patrol and comments by the Assistant District Commissioner for a Patrol into the Kongara area of the Kieta Sub-District.

Sections of the report retained at this office include useful biographical information on Councillors and entrepreneurs of the area as well as notes on the rural development and supervision of the construction of the Arampa (Kongara) airstrip. In regard to the latter, several officers in the past year or so have spent some time in supervisory work. It is expected that the airstrip will be completed in 1974.

In the Situation Report comments made by Mr. Moliola are somewhat vague but it is of interest to note the nature of his reaction and interpretation. Much progress and development in the Kongara area has been retarded or impeded on different occasions because of this cultism. It is difficult to gauge the extent of House of Assembly members in this field after considering current enthusiasm to preserve customary procedures and beliefs.

Mr. Moliola has written an interesting report and has presented it well.

W.T. BROWN
a/DISTRICT COMMISSIONER

PATROL REPORT

Report number: 11 of 1972/73

Objects of patrol: Supervision of airstrip construction at Kapikavi

District: Bougainville

Station: Kieta Sub District Office

Patrol conducted by: M.W. Heggen A.D.O.

Subdistrict: Kieta

Area patrolled: Kongara C.D.

Designation: Assistant District Officer

Duration of patrol: 12/2/73-23/2/73

Personnel accompanying: nil

Last D.D.A. patrol: Nov. '72

Number of days: 12
