Open House festivities draw thousands to campus

Attractions included entertainment, sports and academic panels

Game time: Carly Wasserman, 4, takes part in one of the many activities during Saturday's Open House

By KECIA R. FELTON and JENNIFER EASTERDAY

Contributing Writers

UCSD hosted a campuswide open house Saturday to mark the end of its 40th anniversary and celebrate homecoming for

An estimated 15,000 people attended the event, which ran from 9 a.m. until 4 p.m. and offered an array of free family activities, tours, educational demonstrations, entertainment, vendors and sporting

The purpose of the event was "to highlight and showcase to the community and the many programs going on at UCSD," said Judy Lane of Special Events and Protocol, a co-chair of the event.

Lane, along with co-chairs Mark Cunningham of Housing and Dining Services and Yolanda Leyva of Student Affairs, have been planning the UCSD Open House, the first in 11 years, since May with the assistance of a 65-member UCSD staff committee and hundreds of

Open House was designed to present fun, as well as educational aspects of

"We wanted it to be a fun day to show UCSD's diversity," Cunningham said.

The day began with campus tours for prospective students and seminars about

housing, financial aid and admissions. After touring the campus and attending seminars, high school student Jamie Wendell said she enjoyed the chance to see the campus and learn more about the uni-

"It was really cool. [The campus] is really pretty and we like that," Wendell said.

Faculty members gave talks on subjects ranging from music to politics. Communication professor Daniel Hallin spoke on "Patriotism and Professionalism: The Media and War." Ethnic Studies professor George Lipsitz presented a talk on the effects of migration, globalization and discrimination in the United States.

The Scripps Institution of Oceanography offered a series of family activities and entertainment as well. Scripps scientists conducted an instructional surf clinic and explained the science of surfing. Visitors learned the art of fish painting and watched Irish dancers and a nautical musi-

Open House featured an "Oktoberfest" beer garden sponsored by Karl Strauss with German food and polka dancers. Musical acts such as San Diego's own Mar Dels and award-winning Agent 22 performed at the event.

A range of entertainment from both UCSD students and community groups was offered throughout the day.

The Price Center served as "a showcase for student organizations and UCSD students with incredible talent," said student

Union: UC hospitals not prepared for crisis

Hospitals deny claim, angered by what they call bargaining tactics

By GEOFF DIETRICH

Associate News Editor

UCSD Medical Centers in La Jolla and Hillcrest are among hospitals that the University Professional and Technical Employees union is warning may be ill-prepared to handle the influx of patients that would follow a terrorist attack.

UPTE represents 330 employees at the two UCSD hospitals and 2,100 at UC hospitals statewide. lie at the root of the staffing prob-

Representatives of UCSD medical centers fiercely deny the union members' contention, saying they are taking advantage of public anxiety over terrorism to gain leverage at the bargaining table.

"I think it is unconscionable that any labor union would use scare tactics to achieve their aims at a time like this," said Dr. Jake Jacoby, commander of the UCSD Medical Center Disaster Medical Assistance

Members of the union said the Sept. 11 attacks were first mentioned by UC negotiators during a negotiation session and not brought up by them.

"We are not trying to use the current climate to scare people," said UPTE organizer Terry Bunting. "The university is using it to shut down negotiations and suppress negotiations.

Bunting said that during their last negotiation session, the union was encouraged to accept a final offer of 1 to 2 percent merit raises because of a looming recession and

Both sides have subsequently set a date to meet again.

were so aghast that they would bring it up and not take the problem more seriously," said UPTE Local 9119 President Jeliger Kalmijn.

The problem in a medical crisis, according to the union, is that current low staffing levels would exacerbate a medical crisis if a situation similar to that of Sept. 11 arises. Jacoby said the medical centers are well prepared to deal with a crisis by following their disaster plan.

Workers are leaving UC hospitals for better paying jobs elsewhere, and little is being done to hire qualified replacements and retain current employees, said UPTE member Wendy Mullen, a

Hospitals:

UCSD Med Centers say their plans are sufficient

Continued from page 1 clinical social worker at UCLA.

UPTE is asking for a wage hike to mitigate the 10 to 15 percent increase other employers can offer.

"Clearly, to say that any one hospital is prepared to deal with a disaster of that magnitude is unrealistic," said UCSD Medical Centers spokeswoman Leslie Franz. "Their need is about dayto-day [issues].

Referring to what she sees as similar needs in both day-to-day and crisis situations, Bunting said, "I don't see how they can go from one to the other." Jacoby said he disagrees.

'They are confusing daily [operating] systems with disaster planning," Jacoby said. "They don't understand how hospitals work.'

On a typical day, emergency rooms are busy assisting patients with minor injuries that do not require immediate attention. During a medical emergency, a triage system would be put in place to separate the different levels of needed attention and help the most needy, Jacoby said.

The San Diego medical disaster plan, like others across the nation, draws heavily on resources from within the region, state and at the federal level. Additionally, patients would be spread out to different hospitals to alleviate any possible strain, Jacoby said.

Doctors from out of the area would be flown in by the National Disaster Medical System, as they were to treat burn victims at the World Trade

"The situation worked well in treating victims in New York," Jacoby said. Jacoby said San Diego also benefits from the presence of many military installations which could, as they have

done in the past, provide assistance with doctors, hospital space and sup-The notion that support would have to be brought in from out of the area, according to Kalmijn, is evidence that the understaffing is equal to poor disas-

Jacoby disagreed, saying that understaffing is a characteristic of a disaster, that any single hospital would be understaffed to accommodate the sheer volume of people, and that is why disaster plans take advantage of other

UCSD Medical Centers have rehearsed what they call a welldesigned medical crisis and disaster preparedness plan. They drill every six months and learn form these exercises. Franz said.

UPTE said its lab technicians and pharmacists are often overworked, working double shifts of more than 12 hours in one day. The sheer number of hours of work causes exhaustion and stress that leads to errors that could prove horrible in a situation if bioterrorism occurs in San Diego, according

"If a disaster strikes and people want to be tested, if our lab is inundated with tests, there will be delays and an increase in error," Mullen said.

Jacoby noted the already high volume of lab work processed to show that the labs are capable

"Every day the hospitals process hundreds, if not thousands of microorganisms and lab tests without having a problem," Jacoby said.

Kalmijn disagreed. A problem does in fact exist, especially when in the middle of the night lab technicians have a

backlog of work to do, he said. Dialogue between the two sides regarding wages and staffing levels happened well before the Sept. 11 attacks. Mullen said, but the attacks highlight

the staffing problem. "The [UC] hospitals are understaffed. UC can stick its head in the sand and pretend this isn't a problem, but we think that is ill-advised,"

Kalmiin said. As commander of the Disaster Medical Assistance Team, Jacoby said he is upset that, if the situation is as bad as the UPTE contends it is, they have

Courage emerges among students Washington interns face terror on a daily basis

ollege students from across the nation are interning in Washington, D.C. on the frontlines of terror.

The interns who work on Capitol Hill do so at an extremely high risk, because it is the responsibility of most interns to open the bulk of mail that enters a House or Senate office. Because of this daily responsibility, four of my friends had to be tested for anthrax expo-

One friend interns on the same floor of the Hart building where Sen. Tom Daschle's office is located. After the first news last -Monday of the anthrax letter in Daschle's office, my friend waited and wondered why his senator's office remained open while Daschle's office was quarantined.

Staff from the Senate offices are in contact throughout the day on a regular basis, talking and passing on letters and papers between the two offices.

So my friend waited, wondered and worried - as did many of his fellow interns who work in that office or neighboring offices.

And after the House closed for business last Wednesday and all House interns and staff - including three of my friends - were sent home, my friend was left to wonder about his own fate. My friend questioned the motives of Daschle: Why was he keeping the Senate offices open, trying to continue business as usual, when things were far from normal, and productivity was close to nothing?

days after the contaminated letter was found, my friend in the Senate was told that he could informally leave, not officially since the Senate was still supposed to be conducting business as usual.

Then he was told that he needed to be tested for anthrax exposure. As of Friday, my friend coninues to wait for the results. Meanwhile, as a precaution, he is taking Cipro, the antibiotic used to treat those with possible

We have been exposed to danger and threat of death on the largest scale for

the first time in our lives, but our legs did not buckle. We did not cave in to the panic and fear we have all felt at some particular

My other three friends who ntern at the House have also been tested for anthrax exposure. They too are waiting for the results. However, this new terrorist

threat of anthrax not only puts political interns on the Hill at xtreme risk, but media interns as

CNN with "Larry King Live." One of her first tasks of the day is to open, read and respond to all mail that is addressed to King. She could very well have opened an anthraxcontaminated letter if one was sent

As a result, a task that was once routine is now something she not only tries putting off, but some-

Wednesday afternoon, two thing she now fears. She has also been tested for anthrax exposure and is waiting for the results. In the interim, she is taking Cipro.

Washington never signed up for nation, we had no choice and no

ger and threat of death on the largest scale for the first time in buckle. We did not cave in to the panic and fear we all felt at some particular time.

Many of our parents' generation accuse our generation of being too apathetic, lazy and hav-

ing no respect for authority.
Well, I have just one thing to say to our critics: Look at us now. Look at the thousands of interns who continue to go about their lives in a city where uncertainty and fear are our constant compan-

But not one of us that I know of is leaving. The terrorists' acts and the ensuing tragedy and panic have brought our college generation together into an awesome, cohesive and spirited unit. I know I am speaking for many interns here in D.C. when I say that no

Out with the old rules, in with the new

Strict general education requirements desperately need revisions

By MATTHEW LEPORI

Contributing Writer

Why is there a need for so much "general education"?

Eleanor Roosevelt College requires its undergraduates to take 19 general education courses, or 76 units. You know what that means for the student? Nineteen courses of subjects that we could not care less about.

I have heard the arguments for having a comprehensive GE course setup. It gives students a broad education. It makes sure they have some understanding in a variety of areas. After taking the GE course lineup, students will not have deficiencies in certain fields of their

education. Like communism, this theory works better on paper than in practice. Just because students are required to take certain courses does not mean students will attend the lectures or attempt to learn the

People say that GE classes such as Making of the Modern World, the ERC humanities course, result in well-rounded students. Well, how well-rounded are these students when they learn so little in these classes?

Students learn what they want to learn - nothing more. They will do what is necessary to garner themselves a decent grade. The grade is what is important in these classes, not the material.

After going through two years of MMW, I can safely say that the majority of students there did not want to be taking the course. Many students regularly skipped classes. Many did not study or do the reading at all, relying instead on

The result of this? These students were not truly learning anything. They actually retained very

little information. Now, I am certainly not calling for attendance rolls or weekly tests on the material to ensure that students are studying. Doing so would only antagonize students

College should be about learning the subject or subjects that

about learning material that some committee of administrators thinks is good for you. Forcing students to study in areas other than what they are interested in often results in disinterest and dissatisfaction among the student

OPINION 5

I did not come to this school to study sciences, math or non-Western fine arts. I do not have any great desire to learn about these

Many students have similar atti tudes. Want proof? Look at how many students would like to transfer to Muir College, the one with

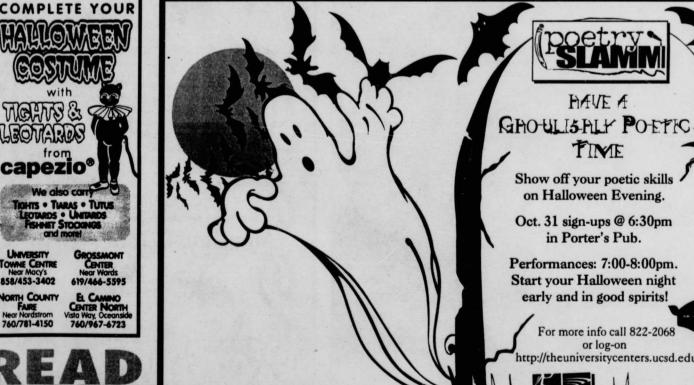

the fewest GE requirements. What is there to do about these classes? Simply tone them down. If GE courses must be in place, require two courses in math or science, two in literature and two in fine arts or language Students can then get these courses out of the way quickly and focus on the material that actually interests them. Your computer science and engineer-

ing friend could actually graduate

in four years with you. By not having to take two years of garbage, I would not have had to take courses such as astronomy or oceanography, which have little toward my writing skills. Does knowing how many moons Jupiter has makes me a better writer? No. Does knowing how the coastal currents near California work make me a better

person? No. Reducing GEs will result in happier students and even happier ofessors, who no longer would have to teach so many disinterested people. In some of these courses, it is obvious that the instructors do not want to be there. While they probably will not admit to this boredom, present. What does this do to the students, seeing their professors look as listless as they feel? Not much good.

Do a favor to the students and professors. Eliminate these outdated requirements. Give students more freedom and variety in the classes they can choose. Let the professors teach people who actually want to be there. The more freedom and flexibility, the better

There is more than meets the eye

Humans have the unique capacity to improve the world

By TAHA A. GAYA Contributing Writer

Self-recognition and its advanced form, introspection, are two of the defining characteristics that we tend to think of as uniquely human. Yet how many of us actually reflect on the miraculous

nature in which we have been formed, be it through creation or Perhaps the most excellent example of the miraculous nature of the human form is the human visual-perceptual system. When we open our eyes, we are immediately

presented with a three-dimensional

representation of the world around

We open our eyes and we see, and yet this process is not so simple; it's more complex than we ever imagined. How do we go from light-sensing photoreceptor cells on the retina to a two-dimensional image and from there to a world that has depth, motion and color? How does the visual system "know" the boundaries of distinct objects? Why is it that when we see a propeller or a wheel spinning we sometimes see it as spinning in the opposite direction from the direction in which we know it to be moving? Why is it that the leading edge of a moving object is distinct while its motion often blurs the trailing edge?

The answer lies in the various biophysical aspects of the eye, but also more importantly in problem-solving shortcuts or heuristics the brain employs to reduce the computational burden of perception. These computations are so complex that they have befuddled science's best efforts to replicate the visual system. It is perhaps these researchers who, recognizant of the ineptness of their own efforts, appreciate the human visual system most fully and in a way that should impress upon the

rest of us the greatness of this gift and the progress we make. that we have been given and often take for granted.

And it is not merely a case of vision against a backdrop of blindness by which we should measure our gratitude, but by an entire gradient of vision. People exist who have deficits that disable certain aspects of their vision.

Cortical achromatopsia results in an inability to see color, relegating the perceptual world to shades of gray. Balint's syndrome results in an inability to perceive motion, presenting the world as a

Let us use our vision and intellect ... for the betterment of ourselves as individuals, as a community, and as members of humanity, so that we may improve the human condition.

series of static snapshots instead of as a continuum. Blindsight results in a loss of visual consciousness so that, though the person has the ability to see, they have lost the ability to perceive that which has been seen.

I have tried to emphasize feelings of awe, humility and gratitude in explaining the visual system, not only because it is appropriate, but also because it is important to reflect outside the realm of graded curves and rote memorization of class material. This reflection will allow us to remind ourselves of the relative ble and perhaps thoughtful attitude reads the Quran in al-Baqarah toward the knowledge we acquire 2:20.8.

It is especially important for

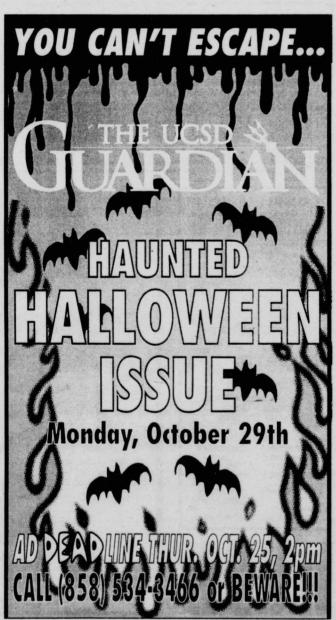

this to occur here at UCSD because of our position as a research school. Science has often given humanity powerful tools tools that allow for great benefits, but also great abuses. The most recent and obvious example of this being chemical and biological weaponry, but there have also been more historical abuses. The idea of eugenics - the prohibition of people with genetic "flaws" to reproduce in order to "improve" the gene pool resulted from a misapplication of our understanding of human genetic heretability. The unethical, inhumane experiments of Nazi scientists were carried out in the name of science and the list is long and unfortunate.

There will be times when the issues will not be as clear, such as stem cell research and genetically modified foods, and at these times approaching them with appropriate humility and reflection as to the consequences of the research is of paramount importance.

The recognition that although we possess the ability to do something, we should not always do it, should remain ubiquitous in the researcher's mind.

In conclusion, let us use our vision and our intellect, which is ultimately the source of our perception; for the betterment of ourselves as individuals, as a community and as members of humanity, so we may improve the human condi-

Management:

School to be part of Roosevelt College Continued from page 1

be designed for emerging industries

"The Management School will respond to the growing need of California industry for personnel with strong management skills in the high technology and biotechnology sectors," Dynes stated. "After extensive consultation with industry and community members, it became clear to us that there was a strong demand for employees who are skilled in technology and have man-agement skills as well."

The new school will be unique in its curriculum emphasis by devi-ating from the traditional business school program in favor of a more technical and technological-driven

International Relations/Pacific Studies professor Peter Cowhey, chair of the School of Management steering committee, said that one of the key goals is "to provide the type of technology-skilled managers that the San Diego community needs."

The new school will be specifically built for the new economy.

"We're leaning toward a strong focus on technology," Cowhey said. Some tech-driven schools, such as Massachusetts Institute of Technology's Sloan School of Management and Northwestern crossover, tech-experience that is the University's Kellogg School of wave of the future."

Management, are being examined by the steering committee and could be models for the new management

"The mix of students will be different than those at the top 10 management programs in the country,' believes the new graduate school will Cowhey said. "They will be more tech savvy and will include students with engineering, I.T., science and health care degrees.'

An undergraduate degree in business affiliated with the school is not in the works, said economics professor Theodore Groves, who is a part of the steering committee.

"Business education is traditionally a professional degree like law that's why you don't have an undergraduate curriculum in law or an undergraduate curriculum in medicine," Groves said.

However, Groves did say that there would be a close connection between the management school and school departments. Such integration would include management science courses being taught by the graduate school's faculty in the

Fred Cutler, executive director of UCSD Connect, has been in close contact with the San Diego business community and has said there has been overwhelming positive feed-

"[It's] an extremely important step forward," he said. "A worldclass management school would augment the technical aspect. The real feedback we received is high-tech, entrepreneurial skills. It's this

Dayton students seek alternative homecoming

Administration concerned about 'underground' events

DAYTON, Ohio - Students' "underground" efforts to stage a recognizes that these actions may "secret" homecoming celebration this weekend have failed.

University of Dayton officials got wind of the plans to circumvent the university's ban on such festivities soon after word began circulating among students and Web sites popped up on UD com-

UD now has its own plan for "homecoming weekend," which includes increased police patrols, surveillance by nonuniformed officers, strict visiting and parking restrictions, and no tolerance of disorderly behavior.

According to an e-mail message to faculty, staff and students last week from the Office of Student Development, as well as other university departments, the university plans "to ensure the security and safety of our campus community and protect its members and proper-

arrests, five fire hydrants opened, wasn't going to get out of hand." street signs damaged, couches set on fire and more.

The indefinite suspension of homecoming was announced Jan. 5. alcohol abuse. -Officials said the decision was not based on last year alone, but due to uncontrollable behavior demonstrated in recent years dur-

ing the weekend celebration. SGA directors of Public Safety Ryan Dei and Shawn Masterson sent a list of precautions for students to be aware of for the weekend of Oct. 18-20, including the fact that 10 undercover liquor patrol agents who are regulated by the state, not the university, can come at any time without notice. school year to work together to They also said that approximately change the UD culture concerning 20 public safety officers and 10 city alcohol. of Dayton police officers will be on

"The university administration seem overly intrusive to the student

"These actions are being put into place to deal specifically with what

John Delamer, director of public afety, does not believe homecoming will be as big as many people antici-

"From listening to students and listen to students, there isn't a big indication that there will be an underground homecoming," he said. "I think students clearly understand we can't have a repetition of

But Public Safety will be prepared anyway, he said.

"We have brought in additional part-time, on-call officers from within the city of Dayton to augment us with a number of Dayton The university is particularly city police officers," he said. "The concerned because of the problems state liquor control will be on campus. They heard of the upcoming According to university offi- event and they were very helpful cials, there were thousands of kegs several years ago when we had a simon campus, 18 citations, eight ilar statement that St. Patrick's Day

Delamer said the university has taken a stronger stance each year against out-of-control behavior and

Since the beginning of this school year, he said, 10 to 12 beerkeg citations and 93 alcohol citations have been issued.

This is very low in comparison to previous years, he said. Last year's homecoming resulted in 18 citations and eight arrests, all

alcohol-related. The crackdown on the "underground homecoming" is in keeping with Raymond Fitz's directive to faculty and staff at the beginning of the

THE UCSD GUARDIAN

Story by Eugene Kim, Contributing writer

Photos by Chris Padfield

Longboarders make their way around UCSD — for speed and love of the ride

of pedestrian students who are doomed to a while getting from point A to point B. life of sore feet and raw blisters.

Buildings blend together and the stu-dents of UCSD blur into a diverse rainbow of yellow, white and brown. People and obstacles become cones in his slalom course as he weaves in and out like a skilled tapestry artist embroidering a quilt that says "Walking Sucks."

He is riding a longboard and he is free from the burly grasp of this earth.

To many, the preferred means of transport around school is a longboard. The elongated wooden deck, extended wheel-base, wider stance and larger wheels meant for smoother riding differentiate a long-

board from a skateboard.

Often, longboards will have oddly shaped decks. Many are pointed for aerodynamics. Some pay homage to long-boarding's surfing roots and have flat decks. Others have curves and are molded to induce an eerie, floating feeling when riding. The length can range from a tiny two feet to a massive six feet.

One constant for all longboards is their larger, softer wheels designed to soak up bumps, dips and cracks. Simply put, skateboards are designed for tricks while longboards are meant for cruising. Their capacity for higher speed and ability to handle cracks and pavement irregularities make longboards a hit among UCSD students who prefer a fast route around cam-

Longboarders are everywhere at UCSD. Though not as prevalent as skateboarders, they are an undeniable presence between classes. The only quick mode of transport that skims swiftly over concrete like a jet hurtling does not require hands, longboarding frees over clouds. He sweeps past dreary masses the rider to eat, drink or chat on a cell phone

There have been 11 reported longboarding injuries on campus in the last five years, and many more unreported. Forty-five percent of organizations on campus. The Board Club

However, longboarding has its dangers. novice rider received multiple stitches after The love of boarding is also seen in the

conclusions), dichotomous thinking (right-wrong, good-bad) and perfectionist thinking ('I'm no good unless I'm perfect'). Then find ways to nudge yourself out of

Strangman took advantage of several of these stress-reducing techniques during her anthropology paper crisis.

"To combat my stress, I took a

"To combat my stress, I took a break and ran campus loop, made myself a salad, and drank OJ and water to re-hydrate myself," she said. "And I turned to my friends for support."

For especially stressful life events, nearly all experts agree on what to do: Seek professional help.
Students at UCSD seem to practice many of these techniques.

practice many of these techniques. Exercising, sleeping and going out with friends are popular methods of reducing stress. Efrat Stark, a Muir junior, said

Efrat Stark, a Muir junior, said she tries to "look at the big picture and realize it's not a big deal" when something is stressing her out. Amelia Winslow tries to prioritize her time by making a to-do list and

checking off each item as it is completed.

Under normal circumstances, Strangman prevents stress by trying to schedule things out in advance so she does not leave important things until the last minute. She also tries to remember "that most things aren't worth getting stressed out about," and while they might seem important at the time, she tries to maintain a healthy perspective.

UCSD Psychological and Counseling Services offers a number of resources for students feeling too stressed out or who want to learn better time- and stress-management skills.

In addition to individual counseling services, two workshops are being offered this quarter for all UCSD students. "Stress Management Skills" is a six-session workshop that will teach specific, personalized skills to help students cope with stress. "Time Management" is another series of workshops designed to assist busy students with managing their time and energy.

Soapbox:

Koala's Liddle raises important issues

Continued from page 10

can skip some formalities with someone who likened me to a "6year-old" calling him a "poopyhead." I would never call you a "poopy-head," by the way.)

Thank you for your letter. It made me laugh at a time when I needed to be distracted from falling grades and new wrinkles in my love

Don't think I'm trivializing your letter by complimenting its humor. Your letter was surprisingly well-

I should clear up a misunder-

What it did do was say that you again now. crossed a line from funny to shame-Koala from continuing to be Koala controversy.

bers of a particular ethnic group are made fun of in The Koala, I call that

I agree that it's completely ridiculous that everyone is getting their panties in a bunch over The Koala only now, when you guys have been offending the hell out of UCSD for years. If "cum-guzzling drag queen" (see the "Special Sungod Pornstar" issue of last spring) isn't hate speech, then what

Do I think what you print is offensive? Sure. Am I breaking out my torch to set alight The Koala office and string up your senior staff in the eucalyptus grove? Hell

Personally, I think when you come to a university like ours, you accept that your funds are going to Stop reading the Guardian. Stop standing evident in your letter. The be used to foster the free and open picking on our writers. Guardian's editorial criticizing The expression of people who don't Koala's publication of bigoted jokes agree with you and, in fact, make anced opinion section at the never advocated censorship or the your stomach turn. Obviously some Guardian is justified. However, if withdrawal of student funds from disagree, as we saw last year during you want an intelligent, conserva-Anti-Zionism Week and are seeing tive voice to be heard on a campus

I don't know what the solution more, give the space you so pointful and suggested you consider to all this brouhaha is. I didn't lessly consumed in the California some restraint in the future. The know when I sat on the editorial Review to someone with something Guardian is not, as you claimed in board that puzzled over what more to do than hurl hollow insults your response, trying "to stop The stance to take on the developing at liberals.

Water Polo loses in four OTs

Long Beach State triumphs over Tritons, 12-11

By COURTNEY FIELD Contributing Writer

In what seemed to be a clash of the NCAA water polo Titans, the eighth-ranked UCSD men's water polo team challenged sixthranked Long Beach State at Canyonview Pool last Friday - a faceoff that resulted in a 12-11 defeat for the Tritons.

Both teams came out strong to start the match, and at the end of the first quarter, the score was even at one goal apiece.

In the second quarter, UCSD's All-American captain Jonathan Hopkins scored to put the Tritons back in the game. At the end of the half, the 49ers led the Tritons by a score of 4-3 behind the superb play of Long Beach State's Chris Segesman, who had two goals in the quarter and finished with five goals in the game. But the game was far

The Tritons battled back in the third quarter with goals from seniors Brett Allan and Vladimir Djapic and Samuels to knot the

Both the Tritons and the 49ers scored three goals in the fourth quarter, including a crucial goal from Triton freshman driver Brandon Borso, who ended the night with two goals. Allan scored his third goal on a penalty shot aged to score. With 40 seconds that helped send this competition into the first of four overtime

Djapic scored his third goal in the first overtime to put the Tritons ahead by one, but the 49ers' Aaron Holloway countered with a goal of his own to tie

"It teaches dedication to something, whether it be sports or kicks before the game was stopped to give way to the women's alumni work," Flowers said. "It makes you goal-orientated. Working hard, Scott Goodman, who played left dedication — getting what you want the old fashioned way."

Goodman also feels that his participation in athletics helped him players who returned to the field to build a foundation of values that he "We had a lot of fun out there, now applies to his everyday life. seeing all the guys I played with

"I got friendship, teamwork and learning how to work as a group and achieve a goal," Goodman said "Being able to do that and win a national title, you saw everything annual competitions are a great way come together and you think about when we came here in August and we ended up winning the national title in November, and what we had to do to get there, the sacrifices the team together, so it was a great you learn how to apply that to thing to keep together and see each everyday life, whether it be your family or your job.'

Goodman, now a financial analyst residing in Mission Viejo, Calif., has noticed the strides the campus has made to advance the

"I left in 1990, and I think it was 1991 or 1992 when they put the lights on the soccer field and had the ability to play night games," Goodman said. "For the most part, we played on this field my last two years and it was day games only because we didn't have the lights yet. That brings out bigger, better crowds, and as a player you get more into the game when you have a bigger crowd.

He said he believes Homecoming is valuable for current players because it gives them connections with people who have been in their shoes.

"I think that it's very important," Goodman said. "When you play the sport, you need that support. It shows the current players what they are going to see in the future [and] helps them understand what they're doing — the sacrifices they make and the goal they're trying to achieve. And what better person to understand than someone who's been through it?"

Women's soccer beats CSUSB

Tritons win eighth game in a row to improve to 13-1 for the season

By ISAAC PEARLMAN

The fifth-ranked UCSD women's soccer team beat California State University San Bernardino 4-1 last Friday at Triton Soccer Stadium to increase its winning streak to eight games.

UCSD's Laura Dooly opened the scoring for UCSD at the 27:20 mark, scoring with a header off a corner kick from teammate Amy Goker to put the Tritons up 1-0.

UCSD's second goal came 39:58 into the first half courtesy of Kristen Conahan, who put in another header past San Bernardino goalie Kathleen Razor. The goal was set up by a cross-pass in front of the CSU San Bernardino goal from Christine Kwon and gave UCSD a 2-0 lead heading into

Senior Erika Alfredson tallied the third goal for the Tritons, scoring an unassisted goal by

beating Razor to a loose ball and finding the empty net. Less than two minutes after

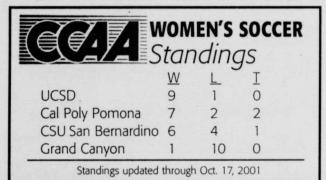

Alfredson's goal, Jessica Cordova, helped by Goker's second assist of the game, scored in front of the net to put the Tritons up 4-0.

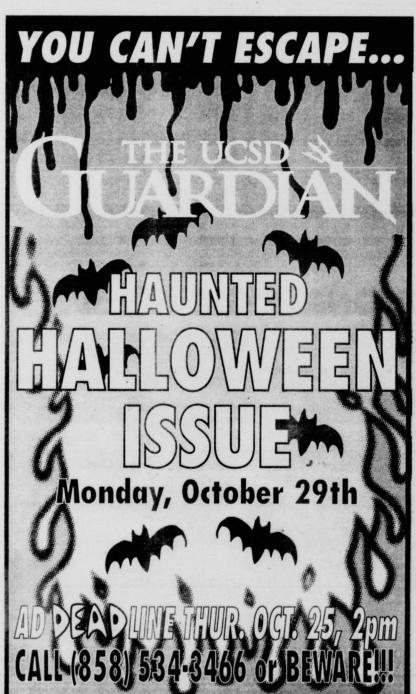

Triton sophomore goalie Kami Poma notched five saves in the game and was lifted in the 76th minute for Carolyn Cadei.

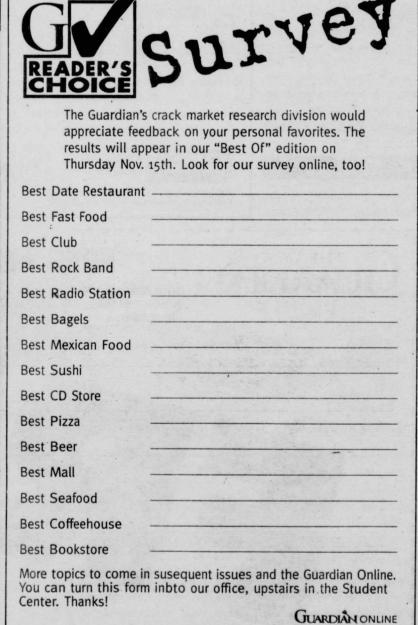

Cadei was tested early when CSU San Bernardino's Lisa Ament battled for a loose ball in front of the Triton goal and scored unassisted in the 80th minute of the game to push the score to its final total.

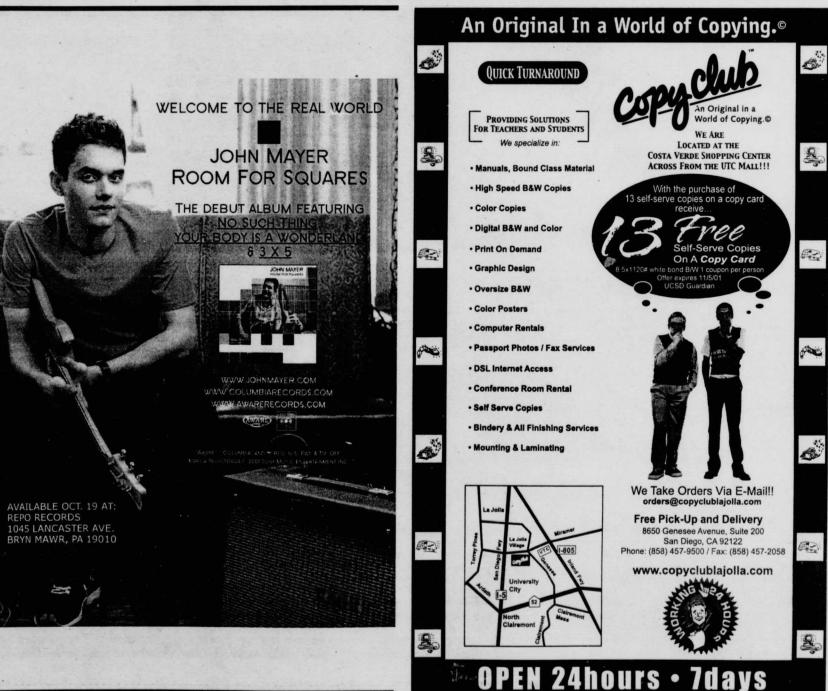

With the win, the Tritons push their league-leading record to 10-1 in CCAA action and 13-1 overall.

The Tritons will next lace up their cleats on Monday, Oct. 22 to complete a makeup game against UC Davis that was postponed due to fog on Sept. 28. The game is scheduled to start at 4:30 p.m. at Triton Soccer Stadium.

Men's soccer decreases postseason hopes with tie

Scoreless tie with California State University San Bernardino has Tritons watching scoreboard

That's mine: UCSD freshman midfielder David Ower battles a CSU San Bernardino opponent for possession last Saturday at Triton Soccer Stadium.

By ANU KUMAR

Contributing Writer

Heading into Saturday's game, the UCSD men's soccer team knew it would have to step up its level of play in the final three games of the regular season. Both the Tritons and their opponent, California State University San Bernardino, needed a win to remain in contention for the wildcard berth into the California Collegiate Atheletic Association Championship Tournament.

However, neither team managed to score in the match on Saturday at Triton Soccer Stadium, and the game ended with a 0-0 tie.

The Coyotes and the Tritons had their fair share of scoring opportunities during the two 45minute halves of regulation and 30 minutes of sudden-death over-

The Tritons had several quality opportunities to break the tie. With 10 minutes remaining in the first Triton midfielder Sean

Summers put the ball in front of the goal from the corner of the field to set up a header, but Coyote goalkeeper Joseph Kulm came up with a diving save.

The second overtime period provided UCSD with its best opportunity. With eight minutes left, freshman midfielder David Ower cracked a quick shot 20 yards away from the Coyote goal, but it hit the left goalpost and went out of bounds. Ower, who led the Tritons in shots on goal, had three other attempts during the game.

Throughout the match, the Tritons took good care of the ball, maintaining possession most of the time. The UCSD midfielders moved the ball well, getting by the defense with crisp passing and earning excellent scoring opportunities. In addition, players such as Ower and Summers controlled the midfield and were able to keep the pressure on San Bernardino.

On the opposite side of the ball, the Triton defense looked strong and prevented the Coyotes from setting an offensive rhythm. San Bernardino's forwards had a difficult time penetrating the UCSD defenders to get a good shot. Although sophomore Triton goalkeeper Jeremy Cookson was forced to make eight saves during the 120 minutes, he was never challenged with a threatening Coyote shot.

Despite playing a solid all-around game, the Tritons lacked the one strong attack that would have given them the lead against the Coyotes. This game marks the fifth game of the season in which UCSD has been shut out offensively. However, its front line has been hindered by the absence of senior All-American forward Bobby Saadati, who has been sidelined the entire season with an

"This is a real blow for us," Armstrong said. "A win would have given us a chance and put us in a much better position.'

Alumni return to UCSD for Homecoming

Former athletes reunite with former teammates, meet current players

By KEITH DO

Contributing Writer

UCSD alumni competed in the annual alumni athletic competitions on Saturday, marking the school's 40th anniversary year, allcampus Open House and Homecoming week-

The events, sponsored by the athletic department, took place in men's and women's soccer, swimming, water polo, volleyball, soccer and women's crew. The day of festivities also included a reunion dinner honoring the 20th anniversary of the 1981 national championship women's volleyball team.

According to assistant swimming coach Dan Peck, over 20 swimming alums — some former national champions, All-Americans and school record-holders — showed up for their scheduled meet against the current Triton swimmers at Canyonview Pool.

Any competitive atmosphere quickly disappeared as team members jumped in the pool during the races, poured ice onto swimmers' heads, and turned the meet into a playful gala. So relaxed was the atmosphere that the individ-

Volleyball stunned on the road by Warriors

19th-ranked Tritons lose to 5-7 CSU Stanislaus, falling to 9-3 in league

By JOSH CROUSE

Sports Editor

road can be place. It can be even lonelier when you lose a conference game. The UCSD women's volleyball team now knows that all too well.

The Tritons entered Thursday night's encounter against California State University Stanislaus, which is ranked No. 19 in the nation, and embarrassed themselves during a 3-1 loss at Warrior Gym. As a result, the team fell to 9-3 in the California Collegiate Athletic Association and 14-5 overall.

UCSD opened the game with sloppy play, little enthusiasm and no communication.

of the worst pass ing games that I have seen in my years with this program," Triton head coach Duncan McFarland said. "It was keeping us from setting up our offense and really getting going. We came out a little flat. We weren't talking on the floor."

The Warriors, who are now 5-7 in the CCAA and 13-11 overall, jumped out to the early lead and never looked back. CSU Stanislaus was serving UCSD off the floor through the first two games, which it won convincingly, 30-17 and 30-

"[The Warriors] served very well," McFarland said. "It was tense off.

Stunned by the scrappy play of CSU Stanislaus, the Tritons rallied in the third game and won convincingly, 30-23.

UCSD, apparently rejuvenated by the convincing win in game three, came out strong again in the fourth. The team was talking on the floor and had obvious intensity.

'We were able to turn it around in the third game and first half of the fourth," McFarland said. "We started passing the ball better and talking to each other."

The Tritons looked poised to force a deciding fifth game, leading by as much as 20-10 in the fourth, give up a 2-0 lead in their own gym.

CSU Stanislaus came roaring back, taking advantage of the sloppy play of the UCSD squad to tie the game at 26. The Warriors closed out strong to take the fourth game 30-27 along with the match.

Individually, the Tritons were led by Kathleen Hentz's eight kills and Jessica Bartter's 19 assists.

Stacy Dunsmore added six kills.
CSU Stanislaus was led by
Amanda Oliver's 14 kills and
Valerie Lopez's 41 assists.

the columns written by Isaac and myself. I say that this complaint comes up often, but that is a little deceiving. It basically comes from a few people over and over. Their main complaint is that the columns
