

INFORMAL REPORT AND INDEX OF
NAVIGATION, DEPTH AND MAGNETIC DATA

(Issued November 21, 1978)

MARIANA EXPEDITION

LEG 4

Apra, Guam (23 September 1978)

to

Apra, Guam (11 October 1978)

R/V T. Washington

Co-Chief Scientists - R. N. Anderson (Lamont-Doherty
Geological Observatory)
and D. E. Karig (Cornell University)

Resident Marine Tech - J. L. Coatsworth

Post-Cruise Processing and Report Preparation
by S.I.O. Geological Data Center

Data Collection Funded by NSF

Grant Number OCE78-16758

Data Processing Funded by SIA, NSF, ONR and IDOE SEATAR

NOTE: This is an index of underway geophysical data edited and processed shortly after the completion of the cruise leg and is intended primarily for informal use within the institution. This document is not to be reproduced or distributed outside Scripps without prior approval of the Geological Data Center, Scripps Institution of Oceanography, La Jolla, California 92093.

Informal Report and Index of Navigation, Depth, Magnetic and Subbottom Profiler Data*

Contents:

- Index Chart** - gives track of cruise leg and boundaries of depth compilation plots (see below).
- Track Charts** - annotated with dates (day/month) and hour ticks. The scale is .3"/deg. long.
- Profiles** - Depth and magnetic anomaly vs. distance. Dates (day/month) and positions of major course changes (greater than 30 degrees) are annotated. Sections of track having subbottom profiler (airgun) records have a solid black line along the bottom of the profile.

For information on the availability and reproduction costs of data in the following forms contact S. M. Smith, Curator, Geological Data Center, Scripps Institution of Oceanography La Jolla, California 92093. Phone: (714) 452-2752.

1. Navigation listing of times and positions of course and speed changes, fixes and drift velocity.
2. Depth compilation plots - in fathoms (assumed sound velocity of 800 fm./sec.) at approximately 1 mile spacing, plotted at 4"/degree with standard U. S. Navy Oceanographic Office BC series boundaries (see index chart).
3. Plots of magnetic anomaly profiles along track - map scale = 1.2"/degree; anomaly scale between 15°N and 15°S latitude = 500 gamm/inch; anomaly scale north of 15°N and south of 15°S = 1000 gamm/inch; from values retrieved at approximately 1 mile spacing and regional field removed using the 1975 IGRF.
4. Card decks of navigation, depth and magnetics (for specific formats, contact S. M. Smith, Geological Data Center).
5. S. I. O. Sample Index - list of beginning and end times and positions of all underway records as well as all other samples (geology, biology, physical oceanography, etc.) collected on the cruise leg.
6. Microfilm or Xerox copies of:
 - a. Echosounder records - 12 and 3.5 kHz frequency
 - b. Subbottom profiler records (airgun)
 - c. Magnetometer records
 - d. Underway Data Log

* NO SUBBOTTOM PROFILER DATA COLLECTED

MARIANA EXPEDITION
LEG 4

Co-Chief Scientists - R. N. Anderson (Lamont-Doherty Geol. Obs.)

D. E. Karig (Cornell University)

Ports: Apra, Guam to Apra, Guam

Dates: 23 September to 11 October 1978

Ship: R/V T. Washington

TOTAL MILEAGE

- 1) Cruise - 1584 miles
- 2) Bathymetry - 1534 miles
- 3) Magnetics - 0828 miles
- 4) Seismic Reflection - none collected
- 5) Gravity - none collected

S.I.O. SAMPLE INDEX

(Issued November 22, 1978)

MARIANA EXPEDITION

LEG 4

Apra, Guam (23 September 1978)

to

Apra, Guam (11 October 1978)

R/V T. Washington

Co-Chief Scientists - R. N. Anderson (Lamont-Doherty)
D. E. Karig (Cornell Univ.)

Resident Marine Tech - J. L. Coatsworth

Post-Cruise Processing and Report Preparation
by S.I.O. Geological Data Center

Index Encoding Funded by NSF
Grant Number OCE76-80618
Index Processing and Report Preparation
Funded in part by SIA and IDOE SEATAR

The Sample Index is a first level interdisciplinary listing of time, position, sample identification and disposition of all samples, records and measurements collected on this cruise leg. The index data are encoded at sea by the Resident Technician and processed on shore by the S.I.O. Geological Data Center shortly after the completion of the cruise leg.

Positions are interpolated on the basis of sample time by comparison to a single, edited navigation file. Samples beginning at one time and position and ending at another are entered on two consecutive cards. Disposition and sample type are represented by three and four character codes to permit future computer searches on these parameters. (Listings defining these codes are available from the Geological Data Center.)

NOTE: This document is intended primarily for informal use within the institution and is not to be reproduced or distributed outside Scripps without prior approval of the Geological Data Center, Scripps Institution of Oceanography, La Jolla, California 92093.

NUMBER OF SAMPLES OF CLASS 'TYPE' GOING TO DESTINATION 'DISP'
