CALPIRGCampaigns

Each Christmas thousands of children are maimed and crippled across the nation as a result of dangerous toys. Legislation regulating toys is passed in Washington, but it is rarely enforced in local communities. This year a new student-oriented group is tackling this problem on a national scale to get dangerous toys off the market shelves.

CAL-PIRG, in connection with Public Interest Research Groups throughout the nation, has just begun a "Dangerous Toy Project" here in San Diego. Its goal is to locate stores which continue to sell toys which the government has already proved to be dangerous and unsafe. Then in one united effort all of the PIRGs across the country will publicize the dangerous toys and each of the stores that continues to sell them. In this way consumer action can force stores to consider safety instead of just profits.

The inspiration for this as well as many other PIRG projects is Ralph Nader. He was one of the first to realize that 1) large-scale problems must be attacked on an equally large scale; 2) effectiveness is a result of an efficient core of dedicated professionals; 3) success depends upon banding together for common goals.

Nader saw that huge corporations have succeeded in the U.S. because they have followed these three rules. Their common goal has been profit. Profit has held huge interests like ITT or GM together and allowed them to succeed on a massive scale.

Nader guestioned, why can't the public as a whole do the same thing? Why can't it unite to fight problems which all citizens have in common? Thus Nader organized the first of many Public Interest Research Groups, PIRGs, to accomplish this. Each PIRG would follow the same three rules but would not have profit as its goal. Instead, each PIRG would work to clean the environment, lower prices, protect consumers from fraud and make government more responsive to the people.

PIRGs have now been set up in large cities like San Diego throughout the country. But the backbone and drive of each group has come from college cam-

Last year CAL-PIRG San Diego was formed to work on local problems in conjunction with national PIRGs. CAL-PIRG now has representatives from rossmont Jr. College, Cal State San Diego, University of San Diego, Mesa Jr. College and UCSD.

The formation of UCSD-PIRG was unique. Because this was to be a majoritybased organization, PIRG organizers wanted a direct show of support. Thus they enlisted the aid of about 30 students and faculty members to distribute a petition supporting the formation of a PIRG

The petition was direct and straightforward. It called for the immediate establishment of a CAL-PIRG chapter "to articulate and pursue through the media, the institutions of government, the courts, and other legal means the concerns of students on issues of public interest." It also asked for each student to assess himself a \$4 per year fee to finance a UCSD-PIRG. In addition it made a point of resolving that if any student was not completely satisfied with UCSD-PIRG he would be entitled to a full refund.

Many doubted such a petition would get even 1,000 signatures. Within six weeks the volunteers had collected 2,859

Food and the Food Service

UCSD operate its own Food During this period many questions and suggestions have been made by you, so I would like to take this opportunity to anwer some of your questions, thank you for your helpful suggestions, and let you know what some of our plans for the future are.

When we opened on Sept. 25, the Food Service was short ten (10) full-time employees for a basic operation and fifteen (15) full-time employees for a complete operation; this included Managers, Cooks, dining rooms as a place to Bakers and Kitchen study, kill time until their Assistants. Also at the of opening, we had hired approximately 260 student employees, 90% of whom had had no previous experience in this type of operation. However, these students have come a long way through their hard work and taking an interest in providing a better operation. Due to the lack of personnel, the type of items being offered in the Dining Commons and Snacks Bars initially had to be limited, but now that we have obtained more employees and present employees are being trained towards a full service operation, more items and variety of items can be gradually offered.

We are planning in the near future to have our own Bakery where we can make our own donuts, cakes, pies, and other prepared desserts instead

from a vendor. On-campus Service has been in opera- catering is available to tion now for five weeks. those of you who might need special meals and coffee breaks for meetings, etc., but we need at least three working days notice to be certain we have the requested products available.

> A la Carte, guest meal and board only prices are presently being reevaluated, so be looking for specials to become effective on Dec. 1.

Many comments have been made as to why the commuting student is not allowed to use the main next class or to get out of bad weather. With the type of program of unlimited seconds being offered to the Residence Hall student who is required to pay for board, room and procedures are required to insure that only those persons who pay for full meal service use the service. All students, faculty and staff are welcome in these facilities for purposes of participating in the full meal service plan, at the scheduled prices. As noted above, we are re-evaluating the associated price structure to the end that the price of individual full service meals for anon residence hall students is reduced. Further, we are addressing the needs of commuting students for studying/recreational space by considering the possibility of providing

The new system of having or purchasing these items | enclosed areas within the dining hall complexes to be used for these purposes. Due to the short period of time between meals and the amount of cleaning necessary, the main dining rooms cannot be used to meet this need.

> As further background; in establishing the Room and Board rate past experience has shown that the average person misses 15% of their meals; therefore, this factor is taken into account; if it wasn't, the Room and Board rate would be about \$125.00 per year more. Food Service receives \$2.35 per day per student from their Room and Board payment of \$5.34 per day amount is to provide food, labor and supplies for three meals per day (2 meals per day on Saturday, Sunday and Holidays). In addition, the Room and Board rates include \$1.85 per day for debt service. When dorms and Dining Commons are built, the University borrows the money by selling bonds, then this amount must be repaid on a 40 year mortgage (very similiar to a person buying a home). We receive no other monies for this purpose - no State or Federal subsidies, no registration feed, etc. Thus, food service being a selfsupporting operation, it is necessary that the system be designed and operated to ensure that all participants pay their fair

3D View of Molecules

Hannah Cohen

A UC Regents grant, for the innovative teaching of undergraduates, has made it possible for a new technique to be used in the teaching of organic chemistry. Pioneered by Dr. Murray Goodman, acting provost of Revelle College, this technique will permit an entire lecture hall of students to view organic molecules in three dimensions.

This new teaching technique was first tried in Dr. Goodman's chemistry class last Friday, and by student reaction was deemed an immediate success. Each student was given a pair of polaroid glasses which contained lenses turned at right angles. A slide of an organic molecule was then projected on a special screen made for 3-D viewing. Before the students' eyes appeared a threedimensional view of the molecule.

Organic molecules used to be shown by models which the professor held up in front of his class. However, these models were quite large and cumbersome and did not give the realistic view that these three-dimensional slides can

This new way of depicting organic molecules is of major importance to the teaching of organic chemistry because it allows the viewer of the slide to easily identify which isomer is being projected. Besides aiding in the identification of molecules the technique also solves an age-old problem of teaching organic chemistry: the explanation to students of how the structure of an organic molecule affects its biological function biologically

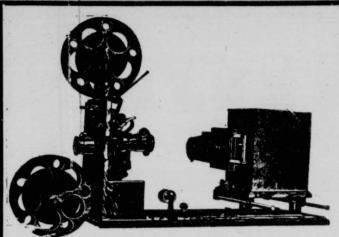

The slides used for projection are drawn by a computer. The slides that have been used so far are drawn straight on, which means a front view of the molecule. According to Dr. Goodman, it will be much more advantageous to draw the molecules at an angular view and to shade them artistically because this will give a more realistic view of the molecule.

Dr. Goodman hopes this technique can in the future be extended into the making of a three-dimensional movie which will show the dynamics of organic bonding

This method is similar to that used in the x-rated movie "The Stewardesses," this is the first time that threedimensional techniques have been applied for educational purposes.

work this week towards its next major production, which is due to open in late January. The goals of this production are human interraction with a large audience through use of the theater's technology. The entire show will be made portable for touring should local exposure prove successful.

Performers, artists, and technicians are needed to supplement the standing company in creating and performing this 'spectacle." Technical involvement will range from designing, assembling, and setting up portable equipment to programming the theater's computer for lighting and sc und control. An emphasis will be placed on the professionalism of the project, as time and money are at a premium. Interested persons should contact Dave Cunningham at the Factory (X1195) or attend the company meeting on Tuesday, Nov. 7, at 7:30 p.m. in 257

Film/John Berger (AFS)

Catonsville Nine

Here is the kind of film that really should be shown in Middle America and probably won't be. Within 90 minutes, it condemns the Vietnam war, lambasts the Catholic Church, and challenges the American legal system, and of course, by implication, the American

Is it any wonder that "The Trial of the Catonsville Nine" has already closed in New York and Los Angeles and has only been shown once in San Francisco—at an ACLU benefit? No, don't stop reading now...

Naturally, attacking the mainstays of American life automatically limits a film's audience and is bad for the box office. Americans catching their Friday night show don't want to hear a bunch of radicals running down the country, especially if the stars of the show bristle with righteous indignation as they attack the sacred majority's sickly cows, and proselytize passionately for civil disobedience.

The film opens with a series of jerky, hand-held black and white shots of nine militant Catholics, including priests Philip and Daniel Berrigan. The group is in the Selective Service Office of Catonsville, Maryland, where they seize the files of young men about to be

Outside the building, in full daylight, they set the records ablaze with homemade napalm, then stand around the burning embers for about a quarter of an hour explaining their act to newsmen while they wait to be arrested.

When the inevitable happens, the perpetrators voluntarily give their names to the police and step cooperatively into the paddy wagon. One participant obligingly spells out his name for the arresting officer. The date is May 17, 1968.

The ensuing trial holds no suspense in the traditional sense since it is evident throughout that the militants will be found guilty: they never seek the court's mercy or deny they have violated the law. Our attention must instead be welded to the screen by the power of the moral issues raised during the trial—and the film does succed in presenting these dramatically.

The Berrigans and their colleagues knowingly break federal law to save lives and bear witness to American genocide in Vietnam, thereby showing that a higher law takes precedence over the laws of men. But the court refuses to admit conscience or religious belief as justification for the commission of a "crime."

The prosecutor concedes that the entire Vietnam war may be illegal and the defense maintains that since this is so, the right to stop the war by interfering with the Selective Service System is clear. The court, in an attempt to exclude events of the world from the courtroom, recognizes only that laws were broken by the defendants and admits no extenuating cir-

With tremendous irony and pathos, the defendants are found guilty because they have risked their own fate

1 Q pieces of paper. They accept their verdict in religious ecstasy, aware of the glory of their act with ates with the shame of a nation which wages a parbarous war and crucifies those brave enough to stand up against its wrath. The reading of Daniel Berrigan's eloquent "Meditation on Catonsville" neightens the impact.

For its outspoken handling of pre-eminent political and moral issues seldom boldly confronted in commercial American films, "The Trial of the Catonsville Nine" is well worth seeing. Moreover, movement and campus film groups should try to show it to whatever audience they can muster, particularly in view of the distributors' flagging interest because the film isn't making enough

If shown to a mainstream audience composed of politically apathetic Americans, "The Trial" would probably goad people at least into examining some deeply held prejudices. It might even sway a few, but it is basically too strong and abrasive a statement. But, if as is more likely, the film attracts an audience already in sympathy with the Berrigans, then it stands a beautiful hance of maximizing its effect.

The defendants' willingness to stand up and suffer for their beliefs catches at the consciences of all who hold those beliefs too, without acting on them. Yet the Catonsville Nine's apparent urge to suffer, a Christian

revolutionary nature of their act. Had the defendants just wanted to commit a symbolic Continued on page 7

Theater / Tom Lindberg

A Half-LilOr Two

Like a cartooned quick-draw by a drunken Doc-Holliday, the New Heritage Theater's presentation of George Szantoand Milt Savage's "Chinchilla" bolted onto the stage of the Actor's Quarter last weekend an firmly established itself as the best non-musical musi to hit San Diego since the latter discovered Shakespeare. John Franklin III's country-rock score elton Jones directed the farcical rampage with a performed by his own band, Starfire, is likeable, and an struction deserving recognition. The Actors' performed by his own band, Starfire, is likeable, and an appropriately basic accompaniment to the stage antics; liter is a tiny theater, no more than a final refuge in but the endearing melodic flavor of the show is n dependent upon the tunes, which are at best a clever tting a chinchilla stampede in such intimate conafterthought, but upon the eloquently absurd and unabashed mudslinging comedy. "Chinchilla" is an ica imaginary and imaginative western farce about cattle parons and chinchilla magnates, the austere life of saloon girl, the perils of mercantilism, and the ev more perilous code of the West which so pedagogically states that "there is nothing like enlightened s interest to grease the wheels of free election."

The chinchilla herders, under the banner of t enterprising and uncompromising C. Snavely Frogoy are at war with the cattle ranchers, inspired by t Reverend Mayor Shank Horn, a bellowing, deve servant of God, the supreme capitalist in the sky. T cows are rasping on chinchilla fur balls; Shank and hi four wives are offering devotions by learning to buy and teaching to sell; Frogoyle schemes for a monop while struggling to keep the bottom from falling out the chinchilla market, and Big Bessie Bumper and he cted by Assad Kelada and now at the Old Globe's bargirls dance merrily in the middle, singing of nights and comforting bosoms, and welcoming a ne sweetheart into their clan with the encouraging "ye get a bang out of working with the gang." Necess complications include a chinchilla stampede, a bro heart ("passion rearranged") and the lawless order Sheriff Cash Cavendish and his deputy, Captain B Flowers, who delivers a forceful tirade against won and declares that whisky makes him positively gio For the grace of love and money, all ends well, Cas gets his, Big Bessie gets hers, Shank and his wives 8 theirs, and Frogoyle continues to chase his, following Shank's resurrected first wife, entombed and preserv for 30 years, who carries her cult westward to Califor

where "all is permitted and anything believed." These rustically-clothed and rusty-throated pione stand indolently on the honor of the West, a spri loaded trap that can clamp shut at the slightest dist bance, sending them flying into a ridiculous coun pop lament triggered by the ever present weight inances. The music is pleasant enough, dashing throu the contemporary adolescent funk scene with a goo sense of humor; but Franklin is pushing too hard some sort of flaming poetics. Musical comedy lyrics a never written to be rapturous verse any more the poetry is written with the intention of being set t greased, foot-trapping tune. For the score to escape all-too-imminent mark of a Hallmark greeting card lyrics must be underhanded, cynical, and swift, ne

ingly rhythmical but always raucous. George and Milt Savage have successfully avoided the ny rhymes, achieving even in the indulgent love n old-West naughtiness that ridicules modern y mania while praising the timeless free human

nent of the New Plaza Hotel in San Diego; and an unenviable job. His actors dance simple, dances around sparse, freshly dilapidated sets, across the modest stage without concern for ing lack of depth. They are painted faces, d, laughable, and sternly satirical, leaving no ocial platitude unnoticed by their jeering ward Wilson is a guttural-voiced, convincing Horn, and Patty Richard plays a dainty but ngry Frogoyle. Kathleen Bishop O'Rourke as Suzy Soubrette also has talent, consummated tbreaking lark, "I'm Gonna Cry," the high e show, but she is so cutely voluptuous that he nor I required it. With all that to offer, la" doesn't even need pertinent music.

Marget's hilarious but insistently bitter porof a desperate mother in "The Effects of Gamma through Nov. 12, is perna nance here in several seasons. She is bold, and insufferably contend with doing bout her destitution, and she nearly jeoparor Paul Zindel's efforts to conclude his play

de, the intelligent, introverted younger played unassumingly by Eleanor Auerbacher, ugh the dim light of her confinement to see etry of science; the wonders of the atom spin around us to create a miraculous diversity of sion is interrupted by the grim reality of such as her mother becomes a frantic, desolate shed to the limit of stability by her thankless ising an older daughter, Ruth, an epileptic; de, a struggling student who can't cope with 's demands and seeks refuge in her science, a pet rabbit which her mother merilessly calls ora manure machine." To support her the mother has taken in a senile, lifeless but abandoned by a career-girl daughter, her the four women spin in continual argured breeding out of misunderstanding and hreatening final destruction of their circle. ambitious science project, raising marigolds s exposed to varying degrees of gamma rays, eatens the family, but when even Ruth shows it she has made the finals of the competition,

Parkeningism

On Sat ... uay night, Oct. 28, the Recital Series of the La Jolla Chamber Orchestra opened with Christopher Parkening, classical guitarist. He presented a superb concert, varied in styles and excellently performed.

Historians trace the ancestry of the guitar to ancient oriental instruments, as far back as Egyptian lutes appearing in 500-year-old frescoes. The word "guitar" is probably related to the Greek "kithara," an oriental instrument introduced to Rome and later to Spain. This three-stringed instrument was modified by the invading Moors in the Eighth Century; they brought an ovalshaped "guitarra morisca"; the result was a new design and a fourth string.

No further structural changes occurred until the Sixteenth Century, when a fifth string was added and the instrument renamed the Spanish guitar. Juan Carlos Amat published the first treatise on the Spanish guitar in 1598. By the end of the century the instrument had become popular in Italy.

In the Eighteenth Century Fray Miguel Garcia, a master of the instrument, added a sixth string and thus completed the development of the spanish guitar as it is known today.

During this period the guitar became a favored instrument in royal households throughout Europe, replacing the outdated lute. Jabdo Kirkman, a harpsichord maker who feared the guitar would ruin his trade, contrived a nefarious scheme to discredit it: he bought a large number of inexpensive guitars, which he gave away to criminals, beggars, thugs and other disreputable elements in England, with free instruction in ribald songs. He apparently succeeded, because for a time the unsavory association brought the guitar into disrepute and the sale of harpsichords increased.

Early in the Nineteenth Century interest in the guitar quickened in England through the influence of Spanish instrumentalist and composer Fernando Sor. Sor was the composer of numerous works for the guitar, and was a great admirer of Mozart; his "Variations of the Magic Flute" were performed by Parkening. Another famous guitarist of this time was Malluro Guiliani. Great competitions were organized between these two per-

composer but Guiliani the better performer, prompting a contemporary to state "...the compositions of Sor performed by Giuliani must have left little or nothing to be wished for with regard to perfection on the guitar." Niccolo Paganini, regarded as the composer of some of the most difficult music for the violin and one of the greatest virtuosos for that instrument, abandoned the violin for three years, during which time he played only the guitar. He wrote at least 140 solos for guitar.

The guitar as an instrument for performing classical music has undergone a great revival in the Twentieth Century, due initially to the efforts of Andres Segovia. Wine & Beer The first impetus to the revival was provided by Francisco Tarrega, a great innovator as a performer and a transcriber of the compositions of Bach, Beethoven,

Albeniz, and Granados. Christopher Parkening started playing the guitar at age 11 in 1958. He decided to go classical instead of rock after a cousin's suggestion to listen to Segovia and then decide. As Parkening said, "The impression was so great that I started to study in earnest." He was selected to

play the premier of the Castelnuovo-Tedesco second guitar concerto at age 17, having won a full scholarship to study with Segovia at 15. Parkening is a full time instructor and head of the guitar department at the USC School of Music. He has performed as soloist with more than 20 orchestras and has served on several international jurys.

Parkening played several short works by Johann Sebastian Bach: "Preambulo-Allegro vivo" by Alessandro Scarlatti: "Prelude and gigue" by Sylvius Leopold Weiss; "Variations on a Theme by Mozart" by Fernando Sor; Maurice Ravel, Debussy, Satie, and, as an encore, "Levenda" by Albeniz. He played all with grace and virtuosity; if ever I have wanted to describe a performance as perfect, it would be now.

Half-Life

the mother reluctantly agrees to cooperate, dressing in elegant 1950 satin and fluff for the awards presentation.

She becomes temporarily a loving, understanding mother proud of her daughter's achievements, but when she again breaks down in depression and refuses to go, Marget's performance almost contradicts the play. Her attitude changes are almost too precise, too contrived, and her reversal to destitution is all too predictable. She plays a crafted, tightly controlled role of a woman aware of her stability and capable of walking the edge, remaining together only by tormenting her family with cruel sarcasms. When Mathilde explains the term "half-life" to her she embraces it as a metaphor of her own life: "you're looking at the original half life." Her anger with life is always unpretentious, bitterly laughable and almost charming. Mathilde's exploration of life injects vigor into the family; she marvels at the discovery that life is governed by the magical whirl of atoms and their glorious mutations and believes that out of these inevitable changes will come new hope. Her singular awareness brightens the grim stage that Paul Zindel has set, but the mother's weighted, immobile cynicism, that has brutally restricted her daughter's lives, hangs untouched by Mathilde's hopeful mutations and is a rugged, distasteful charge against modern American life.

If You're Having Fun, Who Cares?

BUTFAKES	5	0
YUBA CITY	5	0
BIG NURSE	3	2
DUBIES	3	3
KWISAL	1	4
GOONS	0	3
KRABS	0	5
FSTION: What is wrong wit	h the above standin	gs?

ANSWER: It's very simple

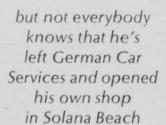

Remember, this is MEN'S FOOTBALL. Now, with this in mind, notice which teams are tied for the league lead! Notice further that both are undefeated! Now for those who don't know the BUTFAKES or the YUBA CITY HONKERS, these standings may mean very little. But for those unfortunate few who know anything about the flag football teams mentioned above, the realization is that these teams are not only bad, they're terrible!

Take the FAKES, for instance. This team is composed of a bunch of crazies who run the gamut from the ridiculous to the absurd. The CHOKEFAKES have been so nicknamed for their uncanny ability to blow anything if given sufficient time—like maybe two seconds. The fact that through no fault of their own they have managed to go undefeated this year would have to qualify as the upset of the century, were not the HONKERS in exactly the same situation. YUBA CITY, who came into this season prepared to bask in the glory of their 1-13 record over the past 2 years, is led by a diminuitive quarterback whose passes remind one of a squirrel trying to throw an oversized walnut out of a

The reason that these two rummy teams are tied for the Kyokota League lead is because the Kyokota League was designed by the Intramural Department specifically for rummies—and after all, somebody's got to lead the league. The only qualifications for this league were either receivers who couldn't handle a pass or a QB who couldn't handle a hike. Not surprisingly, all the teams in the league are proficient in one of the above and the GOONS and KRABS manage to excel at both. The fact that these teams seem to enjoy themselves as much or more than any others in intramural football is a reflection of the easy-going attitudes of the team members as well as the fact that football can be a lot more fun when you're not on the short end of a 50-5

In sports, we obviously can't all be winners. But if a game is played for enjoyment and exercise rather than revenge and ego, everyone can come out ahead. It was with this feeling that intramural sports were organized and it's this feeling that continues to bring more and more UCSD students into the program.

Up At Redlands

Water Polo: A Ref Game

Funny, but as the score for Reflands went up, so did

the frequency of whistles against the Tritons. By the end

of the game the Good Guys had been awarded 32

reprimands, the Reflands 16. Twenty-three of those

came in the second half, banishing four Tritons from

the game. Concurrently, Redlands was using some

brilliant ball-handling techniques: like taking the ball to

the bottom and bouncing passes off that six-foot gutter.

With a minute to go Reflands put the ball in the goal

for the go-ahead point. A Triton time out and a new

plan worked almost to a "T", but not quite to a score.

This was not to be a day when the Tritons could see

victory, for the chlorine was so bad that by the end no

In more than just slightly better retrospect, certainly

no blame or censure can be aimed at the Reflands

players. They were as gracious in victory as last year in

defeat. And the coach was thoughtfully apologetic too.

In Pixie's words, "All the guys on their team except the

ones in stripes were really nice." It was a sad situation,

which if nothing else, made the Tritons appreciate the

difference between just plain bad and blatant bias. It

points out that somewhere there is a lack of quality

control which is hard to combat, especially when one of

the refs (should we spell that r.f.) conveniently forgot to

sign the book. It is essential that occurrences like this

especially incite to action. It there is one saving grace

about athletics which cannot be debated, it is that it

ordinarily fosters an interaction based upon fairness.

This, along with the intensity of participation is the

essence of competition, even in water polo, a game so

heavily based upon the ability to cheat. But that is a

mutual indiscretion, something which is expected of

each team by the other, within the accepted ethics of

the game. Without the ethics there is no game. A game

without refs is anarchy! But a game without ethics is

criminal. The season record now stands won six, lost six,

Coed

One of the joys of intercollegiate competition is the opportunity to travel to the home ground of other teams, and interact in a new, different and challenging setting. For the UCSD water polo team that means a thrilling two-hour drive, cramped in nine or ten to a car, up scenic 395 to some of the garden spots of southern California. Friday last was one of those rare moments, and the paradise was Redlands. By twilight everybody was having second thoughts about the privilege of representing a school who lavishes so much on its intercollegiate teams, doubts about the Department of Highway engineering, shudders at the thought of Gary driving again, and most of all disgust with the practice of using the "home" situation to attain a subtle, but none the less, "fair advantage."

The place was Redlands, where the map people undoubtedly erred in the spelling, for it might more approriately be referred to as Refland. !t was in actuality a triangular match, disguised as a dual meet, including Redlands, UCSD and a smaller team wearing funny striped shirts and virgin white pants. No one could tell if they wore them to symbolize the fact that they had no experience, or as a deception, for they were seemingly quite versed in screwing people. No matter, the net result was the same, nine against seven, and in anybody's book that's a little two lopsided.

One of those real challenges was the pool itself. Stoner is a shrimp, but when he has to stand on someone's shoulders to reach the deck to get out, there's something weird in the puddle's construction. And it was so narrow that BJ hit his head on one side while diving in from the other. It might have been a

lousy pool, but at least the lighting was bad.. By halftime of the game, Sick Stoner had managed to coax the ball into the goal twice, and Pixie had pumped one himself; 3-1 Tritons. Midway through the third it was 5-2 and though the local's play was lethargic at best, it was adequate. And with perfect timing as the final quarter approached, there began, as the saying goes, the turning of the screw. The 9 on 7 began to take its

In the fourth quarter, the fit really hit the sham. The Tritons scored four or five times, but only one was allowed. Why? Well, there was an "inside the two" violation. That meant that if Refland got within two goals, then the Tritons would not be allowed to score. Period. Then there was "off the bottom." That meant that if there was a Triton on the bench who wasn't sitting on his ass with his mouth shut, the goal couldn't count. Perhaps the biggest mistake the Tritons made was failing to get a copy of the rules, the Refland rules,

act and test the illegality of the war, they could have taken a single file from Draft Board 33 and made a test case of it, thereby escaping or minimizing punishment.

No, the defendants claim they could not have been satisfied to do that. Instead, by destroying nearly 400 files, they were actually preventing killing. However, if that were their motive, why then were they so open about their sabotage? Why didn't they go underground so they could assail a succession of draft boards all over the country, saving far more men from war and wreaking havoc with the Selective Service System?

The Catonsville Nine wanted to inspire war resistance—but could it be that they were so concerned with vaunting their well-earned moral superiority that they may not have chosen the most effective way to oppose the war? Their self-righteous tones and the moral prerogatives they invoked as Christians leads to
