

Campus Climate

I don't think UC us. I really don't think you see us at all.

Even with the campus notices you make,
You probably won't think nothing of it after you've sent in your statement.
Of course you had to say something after the election.
Your phone was blowing up when Trump won
And you're pretty sure that's all your staff were going to talk about next week.
If you were quiet, then the people of colors on campus might call you out for being racist.
You did what you could, and perhaps you can sleep soundly tonight.
Knowing that in 2017, UCSD won't be taking in any immigrants anymore
And that there won't be reverse racism in your school
Towards the white students, because we don't want the school to be overcrowded by Asians.
It's the end of white guilt as they say
so at least the students will shut up about privilege.

...

You worry about events like this finally happening.
You're scared that things are going to go out of control
That there is no way you can control the students going out in the streets.
And it finally happened,
Trump won and they're speaking up,
What is your next move really?
Maybe if you ask really nicely for the community centers to help you again
Fix this mess
Then, there won't be so many angry students on campus.
Maybe if I just reminded them about our policies
Then people won't come up to me
You know, I could just put up another center,
Maybe that's what they want.
But let's be sure to put it all the way in Sixth
I'm pretty sure there's no resources there for students anyways.
Maybe if there were more black freshmen coming in this year, they can take care of the school.
They can probably handle it anyways.
