

San Diego gifted children to attend special symposium on "The Biology of DNA: Past, Present and Future"

November 24, 1981

People looking for some solid advice on buying a Christmas tree should phone the DIAL INFO office at the University of California, San Diego.

One of the most popular tapes of the holiday season is titled "Selecting and Caring For a Christmas Tree." To listen to the tape give the DIAL INFO operator a call at 452-4636 (452-INFO) and ask for the Christmas tree tape.

The tape, prepared by the Agricultural Cooperative Extension of the University of California, is full of helpful hints on choosing, caring for and decorating a tree.

Also discussed are safety aspects, best sizes and shapes, Christmas tree farms and living Christmas trees.

DIAL INFO is an informational tape library operated as a public service by UC San Diego. The phone lines are open a total of 76 hours a week, from 7 a.m. to 7 p.m. Monday through Friday and 9 a.m. to 5 p.m. Saturday and Sunday. Brochures of topics are also available for free by phoning DIAL INFO (452-INFO).

For more information contact: Henry J. DeVries, 452-3120
