

Opening of new cafeteria on Torrey Pines site

February 28, 1964

A new cafeteria and dining area accommodating 200 persons has expanded food service to a growing number of faculty, staff and students at the University of California's San Diego campus.

Dedicated in brief ceremonies this week, the cafeteria will be open from 7:00 a.m. to 7:00 p.m. each weekday. It is located in the southeast corner of the ground floor of Building C, the new structure which will soon house the Department of Physics at UCSD.

The cafeteria, which features both indoor and outdoor dining areas, is the first permanent food facility to be constructed on the University site at Torrey Pines Mesa. It was designed by UCSD Architects and Engineers.

Al Russo and Jay Di Renzo, partners in University Luncheon and Food Management, will manage the new cafeteria.

The cafeteria will remain the only food service on the Torrey Pines site until a much larger facility is opened in the fall of 1965.
