## SELF-EDUCATION

### The Corner Stone to Success

Many people don't have the opportunity to attend a traditional college and get the formal education needed to be successful on the job and in their personal life. Attending a college is not an option that is available to everyone because of its high cost, or because of personal commitment to your job and family. Many successful men and women had to educate themselves in the non-traditional ways such as distance learning, self-education, and on-the-job apprenticeships.

Getting the education you need through distance-learning institutions like ICS offers YOU the opportunity to acquire new or improved job skills using the self-education process. The training you need for that new career, or to improve your skills for advancement on your present job could be listed below. You can choose from 55 career training programs offered by ICS. Select the one career field you would like to train for and indicate that choice in the coupon below. Cut out this ad and mail it to ICS TODAY.
