

Five foreign researchers receive Fulbright-Hays awards to study at UCSD

December 17, 1974

Five foreign researchers, named among nearly 500 scholars from about 70 countries, have received Fulbright-Hays awards to study at the University of California, San Diego during the current academic year.

One of the researchers, known as Visiting Fulbright-Hays Scholars, has already completed his stay on the San Diego campus and three others are currently in residence. The fifth scholar is scheduled to arrive next month.

The Fulbright-Hays awards were given to foreign scholars for the purpose of lecturing and conducting research in the United States during the 1974-75 academic year. Each foreign scholar is assigned a campus Faculty Associate with whom he coordinates his work. The program is sponsored by the Council for International Exchange of Scholars through the National Research Council in Washington, D.C.

Dr. Jean L. Bernheim from Belgium is currently working with Dr. John. Mendelsohn in the Division of Hematology at the UCSD School of Medicine, Dr. Luigi Casola from Italy is working with Dr. Gordon Sato in the Department of Biology; and Dr. Howard Silver from Australia is working with Dr. Kurt E. Shuler in the Department of Chemistry.

Dr. Amnon Aharony of Israel is scheduled to arrive in January to work with Dr. Shang-keng Ma in the Institute for Pure and Applied Physical Sciences.

Dr. Abdenour Yaker of Algeria completed a campus visit this fall after spending six months working with Dr. Kurt Benirschke in the Department of Reproductive Medicine at the School of Medicine.
