AD ACOUSTIC DYNAMIC CASSETTE

Tape Selector	Normal (TYPE I)	Bias:Normal EQ:120μs

TDK AD 60 (90m) 60min.
@ 1-7/8ips (2×30min.)

TDK AD features newly developed Linear Ferric Oxide particles. Their ultra fine size and uniform shape provide higher remanence and excellent coercivity, giving AD greater sensitivity and a wider dynamic range. The [illegible]OL and lower bias noise level of AD results in more recording headroom, making it perfect for all high fidelity applications.
