Dear Miss Mangan:

Please send us 500 of the reprints when you get them.

We would also like to have 20 copies of the pre-prints
if you can send them to us.

Many thanks.

Sincerely,

S. G. Naparstek

I see that you have requested 500 copies of the Szilard paper reprints from us. I think all we have are 1,000, and we are using those to meet the requests of individuals and of libraries. I would appreciate it if you would order 500 of the reprints directly from the Academy. If you address a letter to: The Proceedings of the National Academy of Sciences, Attention: Mrs. Josephine A. Williams, 2101 Constitution Avenue, Washington, D. C. 20418, I think you can get them at a nominal cost. Do you really need 500?

The enclosed paper, which will appear in the June issue of the Proceedings of the National Academy of Sciences, might perhaps interest you. It is an elaboration of a remark I made at a meeting held February 22-27 at the Salk Institute and it is the first of three instalments. Of the models for the recording and the recall of memory which I have so far seen, those which were sufficiently concrete to be capable of being disproven were manifestly inadequate to explain even Pavlov's basic observations on the conditioned salivary reflex of the dog --not to speak of higher mental functions. The model given in the enclosed paper is sufficiently concrete to be capable of being disproven and it is not obvious that the model is inadequate, even though it might ultimately turn out to be inadequate also.

Any comment which you might care to make will be appreciated. My address is: The Salk Institute for Biological Studies, P.O. Box 9499, San Diego, Calif.
