

First Scientific Publications from Scripps Institution of Oceanography

Deborah Day

Scripps Institution of Oceanography Archives

Scripps Institution of Oceanography started in 1903 as the Marine Biological Association of San Diego. The first scientific publications from Scripps are the following:

Bancroft, F.W., and Calvin O. Esterly. A case of physiological polarization of the ascidian heart. *University of California Publications in Zoology* 1:105-114, 1903.

The article states that it was based on experiments "carried out at the San Pedro laboratory of the University of California during the summers of 1901 and 1902."

Monks, Sarah P. Regeneration of the Body of a Starfish. *Proceedings of the Academy of Natural Sciences of Philadelphia* 55: 351, May 1903.

The work appears to have been done at San Pedro in 1902.

Raymond, W.J. New California Trivia. *Nautilus* 17:85-86, 1903.

Ritter, William E. Preliminary Report on the Marine Biological Survey carried on by the Zoological Department of the University of California at San Diego. *Science*, new series XVIII, no. 455:360-366, September 18, 1903.

Ritter, William E. The structure and affinities of *Herdmania claviformis*, the type of a new genus and family of ascidians from the coast of California. In: *Mark Anniversary Volume ; to Edward Laurens Mark, Hersey Professor of Anatomy and Director of the Zoölogical Laboratory at Harvard University, in Celebration of Twenty-five Years of Successful Work for the Advancement of Zoölogy, from his Former Students, 1877-1902*. New York: H. Holt and Company, 1903. pp. 237-261.
