

Accession No.: 2003-41

PROCESSING RECORD
SCRIPPS INSTITUTION OF OCEANOGRAPHY ARCHIVES

Craig, Harmon Bushnell 1926-2003

Harmon Bushnell Craig Papers, 1948-2003

Physical Description: 37 mss

Description: The accession consists of the papers of geochemist Harmon Craig, subject, research and teaching files from Scripps Institution of Oceanography.

The accession includes correspondence, proposals, drafts of scientific papers, research notes, reading notes, field notes and other material. The accession consists largely of material documenting Dr. Craig's research on isotope chemistry, volcanism, continental margins, geysers, hot spots and active seismic regions. The accession includes one box of material documenting GEOSECS, including correspondence and minutes of the Executive Committee and Science Advisory Committee. The accession documents Craig's many expeditions to Africa, the South Pacific, and the Indian Ocean, especially the expeditions that Craig led, such as Papatua Expedition, and Nova Expedition, Leg 3. The accession includes Craig's files as an editor of *Earth and Planetary Science Letters* during the period 1969-1989. This material includes manuscripts of papers submitted to the journal and correspondence exchanged among editors.

GEOSECS; Geochemistry; Oceanography

Harmon Craig

Papers, 1948 – 2003
